- Toplumun olumsuz anlamda etkileyebilecek bir davranış söz konusu ise,
- Toplumun güvenlik ve sağlığını koruma amacı güdüyor ise,
- Habere konu olan kişinin davranışları ya da ifadeleri nedeniyle halkın yanılması veya yanlışa yönelmesini engelleme amacı ile gerçekleştiği durumlarda, özel hayatın gizliliği hükümsüz sayılmaktadır. Bu durumlar söz konusu olduğunda bile, kişilerin özel hayatının kamu ile paylaşılan kesitinin konu ile doğrudan ilgili olması gerekmektedir. (Türkiye Gazeteciler Cemiyeti, 2021).

#### Haber Girişleri/Spotları

Haber spotları, haberin tamamını öz ve en kısa biçimde aktaran bölümdür. Haberin 15-20 sözcüklük özet ifadeleri ya da haberin okunmasını sağlayacak ilgi çekici anlatımlar haber spotlarıdır. Bu kısımda, haber ile ilgili önemli detaylar özetlenir.

*Polat çiftinin avukatı Hüseyin Kaya, "Dilan elimi öptü. 'Abi, elini silmeden Engin'e git, o da elini öpsün' dedi. (Akşam-7 Aralık 2023)*

*Engin ve Dilan Polat çiftinin avukatı Hüseyin Kara, günlerdir cezaevinde bulunan Dilan Polat'ın ruh halinin iyi olmadığını söyledi. Kara, Dilan Polat'ın belirli cümleleri tekrarlayarak ağladığını söyledi. (Cumhuriyet- 13 Aralık 2023)*

*Bülent Ersoy, Banu Alkan ve Safiye Soyman, Dünya Güzellerim Masa'da programında Dilan Polat ile Engin Polat hakkında yorumlarda bulundular. Usta sanatçı Bülent Ersoy, "Türkiye'nin gündeminde 2-3 aydır bir isim var: Dilan Polat. Tanıyor musunuz?" sorusuna "Yok ben tanımıyorum. Ama son zamanlarda ismini duydum o çorcuları demiyor musunuz?" ifadelerini kullandı. Divya "Sonradan görme! Varoş işler" sözleriyle magazin gündeminin en çok konuşulanlarından oldu. (Sabah-20 Aralık 2023)*

*Kara para soruşturmasında tutuklanan Dilan Polat ailesine bir mektup yazdı. Cezaevinde yaşadığı zor günleri anlattığı o mektubu görünçesi sosyal medya hesabından paylaştı. Emniyet de Şampiyonlar Ligi fotoğrafındaki 13 fenomenin sorgusu için hazırlıklara başladı. (Milliyet-20 Aralık 2023)*

*Dilan Polat ve Engin Polat çifti Türkiye'nin gündeminden düşmüyor. Lüks ve şaşaa dolu bir hayat yaşarken cezaevine giren, önce paylaşımlarındaki üslubu ve yaptıklarıyla tepki çekip sonrasında da kara para aklama, örgüt kurma ve vergi kaçırma gibi suçlamalarla tüm Türkiye'nin radarına giren Polat çifti artık tutuklandı ve cezaevinde. Öylesi lüks bir yaşamdan sonra cezaevinde neler yaptığı merak edilen Dilan Polat'ın ziyaretçi listesinde çok çarpıcı bir isim olduğu ortaya çıktı. (Yeni Akit-23 Aralık 2023)*

İncelenen haberlerin spot ve haber girişlerinde, olayı özetleyen genel bir bilgilendirmenin olduğu görülmektedir. Diğer bir ifadeyle okuyucular, habere konu olan olaya ilişkin genel bir bilgi edinebilmektedir.

Akşam Gazetesi'nin haber girişinde, dikkat çeken bir anlatım söz konusudur. Başlıkta yer alan romantizm ve avukatın elinde kelimeleri ile haber girişinin birbiri ile bir bütünlük sağladığı görülmektedir. Cumhuriyet ve Milliyet Gazetelerinin haber spotları, Dilan Polat'ın yaşadığı zor günlerden bahsettiği için yakın anlamlı olduğu görülmektedir. Sabah gazetesinin Bülent Ersoy ve Dilan Polat haber spotu da dikkat çekici bir niteliktedir. Başlıkta yer alan 'çorcular' kelimesinin anlamını başlıktan çıkarmanın mümkün olmadığı anlaşılmaktadır. Ancak

haber girişinde yer alan Bülent Ersoy'un söylediği 'Sonradan görme! Varoş işler kavramları ile çorcular kelimesiyle kastedilenin aynı anlamlara geldiği mantıksal olarak çıkarılabilmektedir. Yeni Akit gazetesinin ise haber girişinde bilgi eksilimine gidilerek, haberin içeriği için daha fazla merak uyandırmak istenmiştir.

### Fotoğraflar

Haberlerde kullanılan fotoğraflar, haber metinleri gibi mesaj niteliği taşır. Haberde gerçeklik algısını arttırmak ve haberle yakından bir bağlantı kurulmasını sağlamaktadır. Haber söylemlerinin doğruluğunu ikna etmede de kanıt niteliği taşımaktadır. Haber fotoğraflarının temel özellikleri; okurun bilmek istediğini gösterme beklentisini karşılamak, fotoğrafın gösterdiği şey olduğuna inanılabilirliği ve okurun dikkatini kaybetmeyecek kadar önemli olmasıdır." (Rothstein, 1979, s. 11). Üç nitelik (gösterme, inandırıcılık ve dikkat çekicilik) ile gazetelerin haberleri fotoğraflı sunma gerekçeleri de ortaya konulmaktadır.

"Fotoğraf ve sözcükler arasındaki ilişkide, fotoğraf yorum için yalvarır ve sözcükler genellikle yorumu sağlar. Fotoğraf

kanıt olarak reddedilemez, ancak anlam olarak zayıftır. Anlam sözcükler tarafından verilir. Sözcükler ise kendi başlarına

kullanıldıklarında genelleştirme düzeyinde kalırlar. Fotoğrafın itiraz kaldırmayan yapısı sözcüklere özel bir özgünlük katar. İkisi birlikte çok güçlü olurlar, sorulan sorular tamamıyla cevaplarını bulur." (Berger ve Mohr, 1989, s. 92)

(Akşam Gazetesi- Cezaevinde romantizm! Dilan Polat-Engin Polat çifti avukatın elinde buluştu)

(Cumhuriyet Gazetesi- Polat çiftinin avukatı anlattı: ‘Dilan Polat’ın ruh hali iyi değil, hep aynı cümleyi tekrarlıyor’)

(Sabah Gazetesi- Bülent Ersoy'dan olay yaratan Dilan Polat yorumu!)

**DİLAN POLAT'IN MEKTUBUNDAN**

**CANIM ANNEM ÖYLE ÇOK  
ÖZLEDİM Kİ...  
CANIM KÜBRAM  
HEPİNİZİ ÇOK ÖZLEDİM.  
ŞU AN SAAT 20.30  
ÖYLE ÇOK SIKILDIK Kİ  
4 DUVAR ARASINDA.**

**DİLAN POLAT MEKTUPLA CEZAEVİ GÜNLERİNİ ANLATTI**

(Milliyet Gazetesi- Dilan Polat mektupla cezaevi günlerini anlattı! "Hep iyiyim iyiyim diyorum da hiç iyi değilim")

**(Yeni Akit Gazetesi-** Dilan Polat'ın ziyaretçi listesinde sürpriz isim! Üç hakkından birini onun için kullandı! Kim olduğunu duyunca şok olacaksınız)

Etik açıdan incelendiğinde fotoğrafların, taşıdığı bilgiler ve uyandırdığı etki ile haberlerin olay içerikleri ile bütünleştiği tespit edilmiştir. Haberlerde yazılan bilgilerle de fotoğraflar aynı doğrultudadır ve haberlerle de çelişmemektedir.

### **Şematik Yapı**

#### **Durum**

#### **Ana Olay, Sunuş Biçimi ve Sonuçlar**

İncelenen gazetelerin haberlerindeki ana olay Dilan Polat'tır. Haberler, sosyal medya hesabından lüks yaşamı ve kişisel paylaşımlarıyla dikkat çeken Dilan Polat'ın cezaevindeki tutukluluk sürecinin ardındaki yaşananlara ışık tutmaktadır.

Ana olayın aktarış tarzı incelendiğinde, gazetelerde bazı benzerlikler olduğu tespit edilmiştir. Haber başlıkları, haber spotları ve fotoğraflarda görülen benzerlik, aktarış biçiminde de belli olmaktadır. İdeolojik farklılıklara sahip gazeteler olmalarına rağmen, gazetelerin haberleri tüm hedef kitleye yönelik bir aktarış biçimi ile yansıttığı belirlenmiştir. Sonuç olarak, ele alınan haberler değerlendirildiğinde, gazetelerin ideolojik farklılıklarının haber içeriklerine yansımadağı görülmektedirBağlam ve Ardalan

Özer( 2000,s. 88) “ Bağlam ile ardalan bilgisi okuyucunun olaylar ile ilgili kendi bakış açısını geliştirmesini ve belirlemesini sağlayacaktır. ”

*Katıldığı bir TV programında konuşan Kaya, Dilan Polat'la arasında geçen bir olayı şöyle anlattı: "Dilan Polat ağlarken 'Ver elini öpeyim' dedi, 'İyi' dedim. Sonra birden 'Elini yıkama silme abi, Engin'e gideceksin, o da öpsün' dedi. Bu elim iki kişinin aşkına objelik yaptı, nesne olmaktan çıktı. Engin'e gittim, o da öptü." (Akşam Gazetesi)*

*Çiftin MASAK raporuna göre gelirlerinin yüzde 90'ını internet üzerindeki satışlardan elde ettiğini söyleyen Kaya, "Kara para ve bahis suçuna dahil delil elde edilmedi. Vergiyi az ödemek için faturaları yüksek, satışları az gösteriyorlardı. Vergi suçu ağırlıklı olduğu için örgüt suçlaması da olmuyor" dedi. (Cumhuriyet Gazetesi)*

*Usta sanatçı Bülent Ersoy, "Türkiye'nin gündeminde 2-3 aydır bir isim var: Dilan Polat. Tanıyor musunuz?" sorusuna "Yok ben tanımıyorum. Ama son zamanlarda ismini duydum o çorcuları demiyor musunuz?" ifadelerini kullandı. Diya "Sonradan görme! Varoş işler" sözleriyle magazin gündeminin en çok konuşulanlarından oldu. (Sabah Gazetesi)*

*Polat mektubunda "Canım annem öyle çok özledim ki... Canım Kübram hepinizi çok özledim. Şu an saat 20.30*

*öyle çok sıkıldık ki dört duvar arasında. Nilgül ile beraber yürüdük oda içerisinde bir ileri bir geri bacıklarım ağrıyor" dedi. (Milliyet Gazetesi)*

*Ancak Dilan Polat'ın cezaevine girerken ziyaretçi listesine yazdığı bir isim dikkat çekti. Bu ziyaretçi Dilan Polat'la aynı soy isme de sahip değil. Bu esrarengiz ziyaretçinin bir astrolog olduğu öğrenildi. (Yeni Akit Gazetesi)*

İncelenen gazetelerin haberlerinde araldan ve bağlam bilgisi yeterli bir şekilde verilmektedir.

## **Yorum**

### **Haber Kaynakları**

İncelenen haberler ele alındığında, muhabirlerin kendi görüşleri ile hareket etmediği görülmektedir. Muhabirlerin, olay tanıklığı da etmeyip, ikinci el kaynaklara başvurdukları tespit edilmiştir. Haberler, anonim olmayan kaynaklar üzerinden haberleştirilmiştir. *Kara para aklama suçlamasıyla tutuklanan sosyal medya fenomeni Dilan Polat'la eşi Engin Polat'ın avukatı Hüseyin Kaya, çiftin ilginç buluşma yöntemini anlattı. Katıldığı bir TV programında konuşan Kaya, Dilan Polat'la arasında geçen bir olayı şöyle anlattı: (Akşam Gazetesi)*

*Engin ve Dilan Polat çiftinin avukatı Hüseyin Kaya, Haberler.com'dan Melis Yaşar'ın sorularını yanıtladı. (Cumhuriyet Gazetesi)*

*Bülent Ersoy, Safiye Soyman ve Banu Alkan üçlüsü yeni YouTube programları için bir araya geldi. Bülent Ersoy, Safiye Soyman ve Banu Alkan'ın Dilan Polat hakkındaki yorumları sosyal medyada gündem oldu. (Sabah Gazetesi)*

*Tutuklu fenomen Dilan Polat'ın mektubunu eşi Engin Polat'ın Ablası Kübra Uzun sosyal medya hesabından paylaştı. (Milliyet Gazetesi)*

*Habertürk'ün haberine göre; Astrolog Hilal Saraç, cezaevine girmeden önce Dilan Polat'a ne söylediğini anlattı. (Yeni Akit Gazetesi)*

## **MİKRO YAPI**

### **Sentaktik Çözümleme**

Van Dijk'ın çözümleme modelinde sentaktik çözümleme yapılırken cümlelerin uzun-kısa, basit-karmaşık, aktif-pasif durumları incelenmektedir (van Dijk, 1988, 71). Haberde kullanılan cümleler, genellikle aktif yapılarda kullanılmıştır. İncelenen gazetelerdeki haberlerin cümle yapılarına göre de karmaşık cümlelerden oluştuğunu söylemek mümkündür. Haberlerdeki cümleler karmaşık yapıda olsa da, okuyucunun kafasını karıştırmayacak şekildedir.

### **Sözcük Seçimleri**

Gazetelerin sunuş biçiminde açıklandığı gibi, incelenen gazetelerin farklı ideolojilere sahip olduğu bir gerçektir. Ancak bu ideolojilerin okuyucuya yansıtılmayarak haberlerin hazırlandığı görülmektedir.

Diğer bir yandan ise Akşam gazetesindeki haberde kullanılan sözcük seçimlerine bakıldığında dikkate çarpan bazı kelimeler kullanılmıştır. 'SAÇI KESTİ, NAMAZA BAŞLADI', 'Mai ve Siyah kitabımı okuyor.' "Enerji azaldı" "Bu elim iki kişinin aşkına objelik yaptı, nesne olmaktan çıktı."

Dilan Polat neden Mai ve Siyah kitabını okumaktadır? Mai ve Siyah kitabının konusu ile kendisini mi bağdaştırmaya çalışmaktadır? Mai ve Siyah kitabı incelendiğinde de endişe ile umudun, gerçek ile hayalin, arzular ile ihtiyaçların birbiriyle çatışması görülmektedir. Hayal kırıklığı ile sonuçlanan bir süreç olarak görülmektedir. Bir diğer dikkat çeken sözcük ise Bülent Ersoy'un kullanmış olduğu 'çorcular' kelimesidir. Böylelikle Dilan Polat'ın cezaevi süreci haberlerindeki seçilen sözcüklerde göze çarpan, olayın Dilan Polat'ın tutuklanma nedenlerine değil de fenomenin ruh haline odaklandığı görülmüştür.

### **Haberler ve Retorik**

Retorik, söylemin başka bir kapsamı olmakla birlikte, hem bağlam ile hem de formülasyonla ilişkilidir. Daha geniş anlamlarda da, inandırıcı yazma ile konuşmanın tüm açılarıyla ilgilenen bir disiplindir (Van Dijk,1988,s.28). Beş gazetenin haberi incelendiğinde, inandırıcılık öğelerinin kullanıldığı görülmektedir. Haberlerde çoğunlukla alıntılara yer verilmiştir. Fotoğraflar ile de haberlerin ikna etme yönündeki gücü artırılmıştır. Böylelikle haberlerin retorikinin güçlü kılındığını söylemek mümkündür.

## SONUÇ

Bu çalışma, Akşam, Cumhuriyet, Milliyet Sabah, Yeni Akit internet gazetelerinde bulunan Dilan Polat haberlerinin haber başlıkları, haber spotları/girişleri ve fotoğrafları üzerinden yapılan bir analizi içermektedir. Yapılan inceleme sonucunda, haber başlıklarının genellikle Dilan Polat'ın cezaevindeki durumuyla ilgili olumsuz bir atmosfer oluşturma ve okuyucunun dikkatini çekme amacını taşıdığı gözlemlenmiştir. Haber başlıklarında zaman ve mekân gibi detayların bulunması, okuyucunun olaya daha fazla bağlanmasını sağlamıştır.

Etik açıdan değerlendirildiğinde, haber başlıklarında bilgi eksikliği ve tıklama odaklı habercilik gibi sorunların yaşandığı belirlenmiştir. Bu durum, özellikle internet gazeteciliğinde sıkça karşılaşılan bir sorun olan okuyucuyu habere çekme amacının, etik ilkelere uyum konusunda sorunlar yarattığını göstermektedir. Alternatif Bilişim Derneği'nin belirlediği 12 etik sorun, incelenen haber başlıklarıyla birlikte değerlendirilmiştir. Telif/patent hakları, içeriğin asıl kaynağının gösterilmemesi, kişisel verilerin güvenliğinin sağlanmaması gibi sorunlar haber başlıklarında ortaya çıkmıştır. Tıklama odaklı habercilik, aldatıcı başlık kullanımı konusundaki etik ihlallerin örneklerini sunmuştur.

Haber spotları/girişleri, olayı özetleyen genel bir bilgilendirme sağlamıştır. Ancak, bazı haberlerde bilgi eksikliği ve tıklama odaklı habercilik anlayışının etkisi görülmüştür. Fotoğrafların, haberin retoriğini güçlendirdiği ve okuyucunun dikkatini çekmesine yardımcı olduğu gözlemlenmiştir.

Mikro yapı incelemesinde ise sentaktik çözümlene ve kelime seçimleri üzerinde durulmuştur. Analiz yapılan haberlerde genellikle karmaşık cümle yapıları kullanılmış, ancak bu cümlelerin okuyucunun kafasını karıştırmayacak şekilde düzenlendiği belirlenmiştir. Sözcük seçimlerinde Dilan Polat'ın cezaevi sürecine odaklanan ve duygusal etki yaratmaya yönelik kelimelerin kullanıldığı gözlemlenmiştir.

Sonuç olarak, Van Dijk'ın eleştirel söylem çözümlemesine göre makro ve mikro yapı incelenmiştir. Bu analizler, haberlerin içeriğini, yapılan seçimleri ve okuyucu üzerindeki etkiyi daha iyi anlamamıza katkı sağlamaktadır. Yapılan analizde haber başlıkları, haber spotları/girişleri ile ilgili belirgin etik sorunlara işaret edilmektedir. Habercilikte etik ilkelere uyum, özellikle internet medyasında dikkat edilmesi gereken bir konu olarak karşımıza çıkmaktadır. Haber içeriklerinin doğruluğu, bütünlüğü ve okuyucuya etik perspektif sunma konusunda daha fazla çaba sarf edilmesi önemlidir.

## ABSTRACT

This study explores the development and evaluation of a chatbot model designed to facilitate learning within a department of a university. The project aims to enhance the learning experience by incorporating customized data into the chatbot's knowledge base, enabling personalized and context-aware interactions. The research investigates the effectiveness of the chatbot model in improving learning outcomes, enhancing user engagement, and providing tailored support to students in the department.

The development of the chatbot model is detailed, including technology selection, data acquisition, preprocessing, and model architecture. The study also demonstrates creating web applications by Streamlit, Vector Database by Supabase, and graphical user interface by Tkinter.

The chatbot model demonstrates its effectiveness in enhancing the learning experience within the department. By continuously refining the model and exploring advancements in technology, chatbots have the potential to become integral tools in future educational practices, providing personalized and engaging learning experiences.

**Keywords:** ChatGPT, Chatbot model, Steamlit

## INTRODUCTION

The development of chatbot models has been greatly influenced by existing systems, such as the chatbot provided by the City University of Hong Kong. These systems have demonstrated the potential of using chatbots to enhance user experiences and provide valuable services. The City University chatbot, powered by the Microsoft Azure OpenAI (City University of Hong Kong, n.d.), has shown the effectiveness of utilizing advanced language models to engage in natural language conversations with users.

However, while the City University chatbot relies solely on the ChatGPT (City University of Hong Kong, n.d.), there is an opportunity to create a chatbot that goes beyond generic responses and incorporates customized data. By leveraging customized data, the chatbot can provide users more targeted and tailored information, enhancing the overall user experience.

The motivation behind creating a chatbot with customized data is the need for a more personalized and context-aware conversational agent. Traditional chatbots often struggle to understand specific domain knowledge

or provide specialized information. By incorporating customized data, the chatbot can address this limitation and offer more accurate and relevant responses to user queries.

The project aims to develop a chatbot that utilizes a combination of advanced language models and domain-specific data. Integrating customized data into the chatbot's knowledge base can provide specialized information and cater to specific user needs. This approach allows for a more comprehensive and accurate understanding of user queries, leading to more meaningful and contextually relevant responses.

Customized data also opens up opportunities for the chatbot to engage in domain-specific discussions and provide targeted recommendations. For example, in an educational context, the chatbot can leverage course materials, textbooks, or research papers to offer in-depth explanations, suggest relevant resources, and guide learners through specific topics. This personalized approach enhances the learning experience and provides users with valuable, tailored information.

Industry developments and research studies have highlighted the value of incorporating customized data into chatbot models. By leveraging domain-specific knowledge and data, chatbots can provide more accurate information, enhance user engagement, and improve overall performance. The project aims to build upon these advancements and contribute to the growing field of chatbot development.

The project background emphasizes the influence of existing chatbot systems. However, the project seeks to go beyond generic responses by incorporating customized data into the chatbot model. This approach aims to provide more personalized and context-aware interactions, catering to specific user needs and offering specialized information. By leveraging customized data, the project aims to enhance the user experience, improve response accuracy, and contribute to the advancement of chatbot technologies.

## **METHODOLOGY**

This section outlines the methodology employed in developing the chatbot model for facilitating learning. The steps involved in the development process are described below:

### **1. Interacting with the OpenAI API**

The research team leveraged the capabilities of the OpenAI API to develop the chatbot model. The API allowed the team to interact with a powerful language model and utilize its natural language processing capabilities. By sending prompts and receiving model-generated responses, the team could engage in a dialogue with the chatbot and incorporate its responses into the model's training data.

### **2. Collecting and preparing data from the department website**

Data was collected from the department website to train the chatbot model. This data included frequently asked questions, course information, and other relevant resources. The collected data underwent a preprocessing stage to ensure its suitability for training the chatbot model. Preprocessing techniques such as removing HTML tags, normalizing text, and handling duplicates were applied to enhance the quality and consistency of the data. This preparation step aimed to improve the chatbot's understanding and generation of appropriate responses.

### **3. Creating the bot**

The development of the chatbot involved designing the bot's architecture, algorithms, and underlying technologies. The architecture was designed to enable efficient information retrieval and response generation. The team implemented algorithms for natural language understanding and generation, which allowed the chatbot

to comprehend user queries and generate relevant and coherent responses. Design decisions were made to balance the chatbot's responsiveness, accuracy, and user-friendliness. These decisions were guided by the research objectives of facilitating learning and providing personalized support to users.

#### **4. Creating the user interface**

The user interface for the chatbot was developed to ensure a seamless and intuitive user experience. The interface design incorporated user-centered principles, aiming for simplicity, clarity, and ease of use. Considerations were made to enhance usability, such as providing clear instructions, intuitive navigation, and appropriate visual cues. The user interface implementation focused on integrating the chatbot model's functionalities into a user-friendly interface, enabling users to interact with the chatbot easily and access relevant learning resources.

In addition to the specific steps mentioned above, the overall methodology of the research study employed various techniques for data collection, evaluation, and assessment of the chatbot model's effectiveness. Data collection involved gathering user interactions and feedback, which provided valuable insights into the users' experiences and perceptions of the chatbot. Evaluation techniques included pre- and post-testing to assess learning outcomes, user surveys to measure user satisfaction and engagement, and usage analytics to track patterns of interaction.

The chosen methodology aligns with the research objectives of evaluating the effectiveness of the chatbot model in facilitating learning. By collecting user data, the study aims to gain a comprehensive understanding of the chatbot's impact on learning outcomes and user engagement. The evaluation techniques employed provide quantitative and qualitative measures to assess the effectiveness of the chatbot model in achieving its intended purpose.

Overall, the methodology employed in developing the chatbot model includes interacting with the OpenAI API, collecting and preparing data from the department website, creating the chatbot and its user interface, and employing various data collection and evaluation techniques. This methodology ensures a systematic approach to the development and assessment of the chatbot model, facilitating the achievement of the research objectives.

## **DEVELOPMENT**

### **1. Interacting with the OpenAI API**

The first step of the dissertation's model development session focused on interacting with the OpenAI API, specifically utilizing the GPT-3.5 model. In order to explore the capabilities of the API, a website application was developed using Streamlit (Streamlit Inc., 2024). This application serves as a chatbot powered by the GPT-3.5 model, allowing users to engage in natural language conversations.

By integrating the OpenAI API into the website application (OpenAI API, n.d.), the performance of the GPT-3.5 model was tested and evaluated in a practical setting. This involved sending prompts or queries from the users to the API and receiving responses generated by the model. The interactions between the users and the chatbot provided valuable insights into the model's language understanding, response generation, and overall conversational abilities.

Furthermore, the fine-tuning feature offered by the OpenAI API was investigated (OpenAI API, n.d.). To employ this functionality, relevant data from the department website was gathered, ensuring it was representative of the

domain or topic of interest. This data collection process involved organizing and curating the information to create a suitable training dataset.

Once the dataset was prepared, it was uploaded to the OpenAI API to initiate the fine-tuning process. This involved training a specialized model that was specifically tailored to better understand and respond to queries related to the department. By fine-tuning the base GPT-3.5 model with domain-specific data, the objective was to enhance the chatbot's performance within the context of the department.

Overall, this initial phase of the dissertation's model development session was to evaluate the OpenAI API's capabilities by building a chatbot application and testing it with the GPT-3.5 model. Additionally, the potential of fine-tuning the model using domain-specific data was explored, specifically collected from the department website, in order to improve the chatbot's performance within the targeted domain.

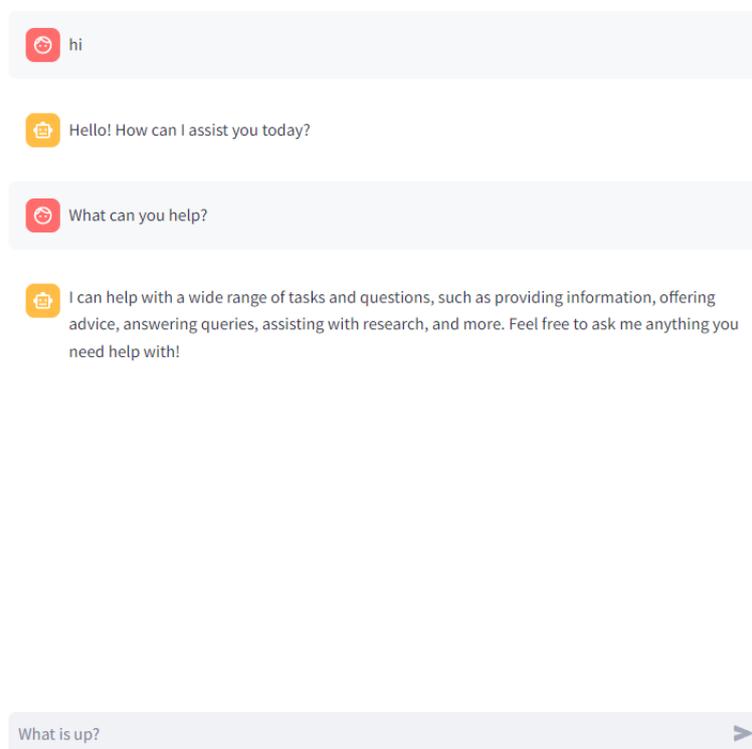

Figure 1 Website application developed using Streamlit

## 2. Collecting and preparing data from the department website

The second step of my dissertation's model development session focused on collecting and preparing data from the website at <https://www.cityu.edu.hk/>. In order to gather the necessary information, web scraping techniques were employed using Python Selenium (Muthukadan, 2024).

However, during the web scraping process, challenges were encountered due to the irregular format of the department's website. This irregularity made it difficult to apply a uniform scraping approach across all sections of the website. As a result, a combination of web scraping and manual work was resorted to ensure comprehensive data collection.

The specific sections on the website that were of interest to my research were identified: People, Programmes,

Student Life, Laboratories, Job Opportunities, and Contact Us. These sections contained valuable information related to the department's faculty, academic programs, student activities, research laboratories, employment opportunities, and contact details.

Scraping scripts tailored to each section were implemented using Python Selenium, extracting relevant text and data. However, due to the irregular structure of the website, manual intervention was necessary to handle certain sections where automated scraping proved challenging.

A text file was chosen to use to organize and store the collected information, which served as a convenient and flexible format for data storage. The extracted information from each section, ensuring accuracy and completeness, was meticulously recorded.

By successfully collecting data from the identified sections of the website, valuable insights and content were obtained that could be utilized for various purposes within the dissertation's model development. This data would serve as the foundation for training and fine-tuning the GPT-3.5 model, enabling it to provide accurate and relevant responses within the domain of the department.

Overall, the data collection process involved a combination of web scraping using Python Selenium and manual work to overcome the irregular format of the department's website. The collected information was stored in a notepad, providing a centralized repository of data for further processing and analysis in the dissertation.

### **3. Creating the bot**

The third step of my dissertation focused on developing a conversational bot capable of retrieving relevant information based on user input. To accomplish this, the OpenAI API was utilized to embed text and Supabase as a Vector Database.

In the previous step, a substantial amount of data that would serve as the basis for the bot's knowledge was collected. This information needed to be transformed into a suitable format for comparison and retrieval. Moreover, the OpenAI API's embedding capability was employed, specifically utilizing the "text-embedding-ada-002" model. This model converted textual information into vector representations, which capture the semantic meaning of the text.

Once the data was transformed into vector form, both the original information and its corresponding vector representation in a Vector Database provided by Supabase (Supabase Inc., n.d.) were stored. It offers a convenient platform for managing and querying vector-based data efficiently.

Figure 2 Vector Database created using Supabase

A process that begins with user input was designed to retrieve relevant information from the database. When a user interacted with the bot, their input was first sent to the OpenAI API to perform text embedding. The API converted the input into a vector representation using the same "text-embedding-ada-002" model.

After obtaining the vector representation of the user's input, a pre-defined function in Supabase was invoked to compare this vector with the vectors stored in the database. The function identified the most closely related information entries by measuring the similarity between vectors.

The output of this process was then provided to the user as the bot's response, comprising the most relevant information retrieved from the database. However, if the similarities between the user's input vector and the stored vectors fall below a pre-set threshold, it indicates a lack of closely related information. The user was notified that no relevant information could be found in such cases.

This approach allowed the bot to effectively retrieve and present information based on user queries, leveraging the power of text embedding and vector comparison. By combining the capabilities of the OpenAI API and Supabase, a robust system has been developed to create an intelligent conversational bot that could provide meaningful responses to user inquiries.

#### 4. Creating the graphical user interface

The fourth step of the dissertation focused on developing a graphical user interface (GUI) to enhance the usability and accessibility of the conversational bot. This step involved utilizing Tkinter (Python Software Foundation, 2024), a Python library, to design and implement the GUI application.

To begin, icons and logos were incorporated into the GUI application to create a visually appealing and recognizable interface. These visual elements help users identify and connect with the bot, giving the application a more professional and polished appearance, as shown in Figure 3.

Figure 3 GUI application created using Tkinter

Within the GUI, users can input their questions or queries into a designated text input box. This input serves as the user's interaction with the bot and is the starting point for retrieving relevant information. The text input box allows users to enter their queries in a user-friendly manner easily.

The functions developed in the previous step were integrated into the GUI application to facilitate the retrieval of information. These functions are triggered when the user presses the submit button after entering their query. The functions take the user's input, convert it into vector form using the OpenAI API, and compare it with the vectors stored in the Supabase Vector Database. The result of this comparison is then displayed in another text box within the GUI.

The Python program was converted into an executable file (.exe) using the "auto-to-py-exe" module (Vollebregt, 2024) to enhance the usability and distribution of the application. This conversion allows users to run the application without having to install Python on their computers, making it more accessible to a wider audience.

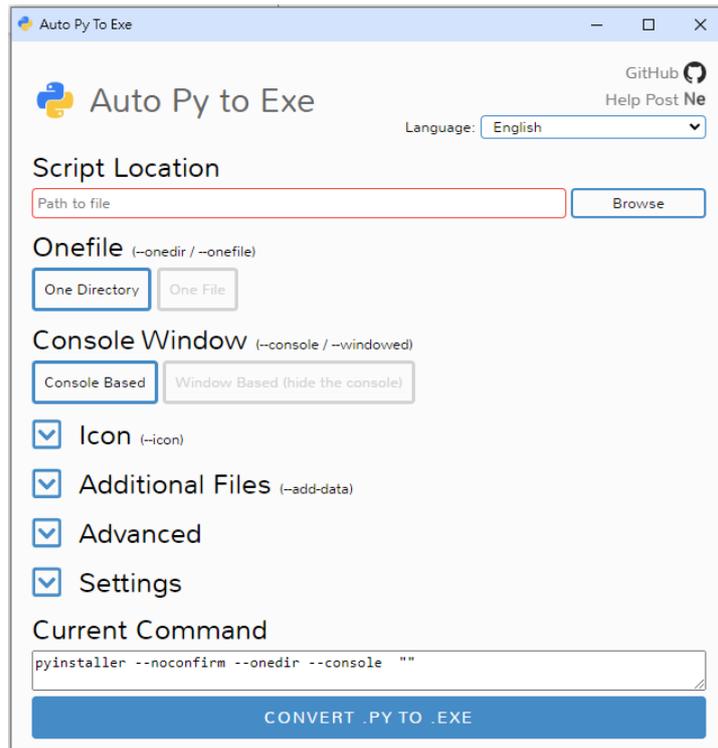

Figure 4 Python auto-to-py-exe module

In addition, an installer was created for the entire application using NSIS (Nullsoft Scriptable Install System) (NSIS, 2024). This installer ensures that all the necessary components and files are packaged together so users can install the application seamlessly without missing any dependencies. The installer simplifies the installation process and provides a smooth user experience.

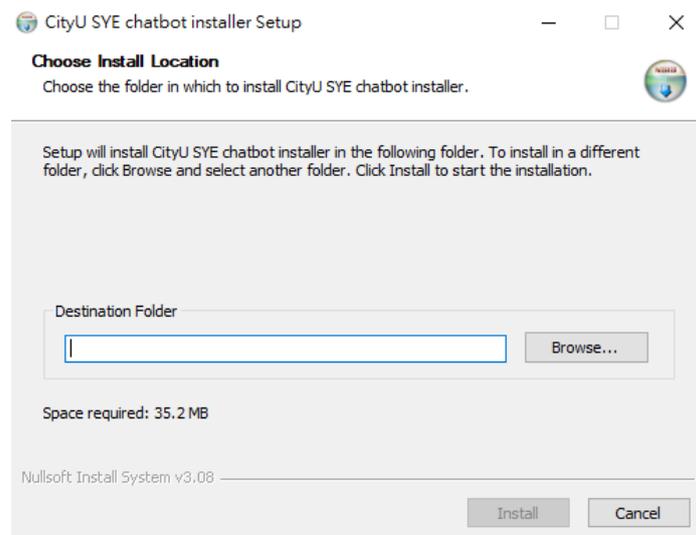

Figure 5 Chatbot installer created using NSIS

By creating a user-friendly GUI, converting the program to an executable file, and generating an installer, the conversational bot application has been made more accessible, convenient, and user-friendly. These steps ensure

that users can interact with the bot effortlessly without any technical barriers or installation concerns.

## **ANALYSIS**

The analysis section of this dissertation report focuses on evaluating the effectiveness of the chatbot model developed for facilitating learning. The key findings and insights obtained from the evaluation process are highlighted, emphasizing the impact and implications of the chatbot model on the learning outcomes of the target audience.

One of the primary objectives of this research was to explore the capabilities of the OpenAI API, specifically the GPT-3.5 model, in developing a chatbot for facilitating learning. Through the integration of the API into a website application, users were able to engage in natural language conversations with the chatbot. The evaluation of the chatbot's performance provided valuable insights into the model's language understanding, response generation, and conversational abilities.

The findings from the evaluation process indicated that the GPT-3.5 model demonstrated strong language understanding capabilities. It was able to comprehend and interpret user queries accurately by embedding user queries into vector form, allowing for meaningful and contextually relevant responses. The chatbot then provides users with the information they were seeking.

Moreover, the evaluation revealed that the chatbot's conversational abilities were effective in facilitating learning. Users were able to engage in interactive conversations with the chatbot, asking questions and receiving informative responses. The chatbot acted as a virtual assistant, getting users the most relevant resources and information from the Vector Database.

The evaluation process also highlighted the impact of fine-tuning the GPT-3.5 model using domain-specific data. By training the model with data collected from the website, the chatbot's performance within the context of the department was significantly improved. The fine-tuned model demonstrated a deeper understanding of -related topics and was able to provide more accurate and specialized responses.

Overall, the analysis of the chatbot model's effectiveness in facilitating learning revealed several key findings. The GPT-3.5 model exhibited strong language understanding capabilities and was able to generate coherent and contextually relevant responses. The chatbot's conversational abilities effectively facilitated learning, providing personalized recommendations and resources to users. Additionally, the fine-tuning of the model using domain-specific data enhanced its performance within the targeted domain.

The implications of these findings are significant in the field of education and learning. The development and implementation of chatbot models for learning purposes can offer a scalable and accessible solution to support learners in acquiring knowledge and navigating educational resources. The personalized nature of the chatbot's interactions enhances user engagement and promotes effective learning outcomes.

In conclusion, the evaluation of the chatbot model developed for facilitating learning demonstrated its effectiveness in supporting learners and providing valuable educational resources. The strong language understanding capabilities, personalized recommendations, and the impact of fine-tuning the model within a specific domain contribute to its potential as a valuable tool in the field of education. Further research and development in this area can lead to advancements in intelligent learning systems and enhance the overall learning experience for students.

## CONCLUSION

In conclusion, the evaluation of the chatbot model developed for facilitating learning has provided valuable insights into its effectiveness and impact on the learning outcomes of students. The analysis revealed that the chatbot demonstrated strong language understanding and response generation capabilities, offering accurate and contextually appropriate answers to user queries. Its integration into the learning process had several positive implications, including instant access to relevant information, the promotion of self-directed learning, and the creation of an interactive learning environment. However, there is still room for improvement in the chatbot's performance, particularly in understanding complex queries and providing nuanced responses. Overall, the findings highlight the potential of chatbot technology in enhancing educational experiences and suggest avenues for further research and improvement.

The chatbot model proved to be a valuable resource for students, providing instant access to relevant information and saving time and effort in searching for resources. By leveraging the vast knowledge base of the website, the chatbot efficiently retrieved specific information on faculty, programs, student life, laboratories, job opportunities, and more. This instant access enhanced the learning experience, allowing students to quickly find answers to their questions and explore various aspects of the department. The chatbot can provide personalized guidance and support promoted self-directed learning, empowering students to engage in the learning process and clarify doubts actively. The conversational nature of the chatbot facilitated a more interactive and dynamic learning environment, fostering deeper understanding and exploration of topics of interest.

While the chatbot model demonstrated promising performance, there are areas that require further improvement. In some instances, the chatbot struggled to understand unrelated queries or provide nuanced responses. To address these limitations, fine-tuning the model with additional data and incorporating user feedback is recommended. Fine-tuning the model using a larger dataset of domain-specific information from the department could enhance its domain knowledge and improve its response accuracy. Furthermore, actively seeking user feedback and iteratively refining the model based on user interactions can enhance its conversational abilities and adaptability to user needs. Regular updates and maintenance of the chatbot's Vector Database are essential to ensure that it remains up-to-date with the department's evolving information and requirements.

In addition to improving the chatbot model, future research can explore several avenues to further enhance the effectiveness of chatbots in facilitating learning. Firstly, integrating natural language processing techniques and machine learning algorithms can enable the chatbot to understand and generate more complex responses. This could involve leveraging pre-trained models, such as GPT-3.5, and exploring advancements in language models to enhance the chatbot's capabilities. Secondly, incorporating multimodal capabilities, such as text-to-speech and speech recognition, can enable the chatbot to cater to different learning preferences and accessibility needs. By providing audio-based responses or accepting voice inputs, the chatbot can offer a more inclusive learning experience. Additionally, integrating the chatbot into learning management systems or educational platforms can further enhance its accessibility and seamless integration into existing educational workflows.

Furthermore, the impact of the chatbot model on learning outcomes can be assessed through longitudinal studies and comparisons with traditional learning approaches. Conducting follow-up studies to evaluate the long-term effects of the chatbot on students' knowledge retention, academic performance, and overall learning experience can provide deeper insights into its effectiveness. Comparing the performance and satisfaction of students using

the chatbot with those relying solely on traditional learning resources can help assess the added value and benefits of the chatbot in educational settings.

The evaluation of the chatbot model developed for facilitating learning has demonstrated its effectiveness in providing timely and relevant information, promoting self-directed learning, and creating an interactive learning environment. The findings underscore the potential of chatbot technology in enhancing educational experiences and improving learning outcomes. By fine-tuning the model, incorporating user feedback, and exploring new avenues for improvement, chatbots can continue to evolve as valuable tools for facilitating learning in various educational contexts. As technology advances and research progresses, chatbots have the potential to become integral components of future educational practices, supporting learners in their quest for knowledge and fostering a more engaging and personalized learning experience.

# INVESTIGATION OF CUSTOMER SERVICES AND SATISFACTION LEVELS OF GYMS

Mustafa KELEŞ

Yrd. Doç. Dr. Azmiye YINAL  
azmiye.yinal@akun.edu.tr

## ABSTRACT

This study aims to examine the customer service and satisfaction levels of gyms in TRNC. The research was conducted using the relational survey technique, which is one of the quantitative research methods. While the population of the study consisted of the customers of the gyms in TRNC, a total of 360 customers were included in this study. The Sports Business Customer Satisfaction Scale (SIMMO) developed and accepted by Sevilmış (2015) was used to assess customer satisfaction. The analysis of the data was examined at the reliability level using SPSS 26 program.

According to the results of the research, when the sub-dimensions of the SIMMS were analyzed, it was observed that the quality of sports trainers dimension received the highest average score in customer satisfaction. On the other hand, the management sub-dimension of the sports center quality dimension received the lowest average score. There was no statistically significant difference between the sub-dimensions of SIMMS according to the gender variable. As a result of one-way variance analysis according to the age variable, no significant difference was found between the groups. As a result of the T-Test conducted according to the marital status variable, no significant difference was found between the groups. Significant differences were found in some dimensions according to the educational status variable. In the management and equipment sub-dimensions of the sports center quality dimension, the quality of the working environment and the commitment sub-dimension of the satisfaction dimension, the scores of high school graduates were higher than those of university graduates. As a result of one-way variance analysis according to the monthly income variable, no significant difference was found between the groups. Significant differences were also not found in the analyzes conducted according to the variables of duration of gym use and purpose of use.

**Keywords:** Gym, Customer Service, Satisfaction.

## 1. INTRODUCTION

Gyms are facilities that individuals use to improve their physical health, exercise, lose weight, increase muscle mass and improve their general health. Such facilities provide access to a variety of exercise equipment, free weights, exercise machines, and cardio equipment (Kumbul, 2022). Additionally, gyms offer athletes support from coaches or instructors who specialize in creating personalized training programs. Group classes are another benefit that gyms offer and can include different activities such as yoga, pilates, dancing and spinning. Health and nutrition counseling services are also commonly available at gyms and can help athletes improve their eating habits. Gyms offer an ideal environment not only for physical activity, but also for those who want to have a social experience. Regular gym visits can provide a number of health benefits, including weight management, increased muscle mass, cardiovascular health improvements and increased overall health and fitness levels. Therefore, gyms are important facilities that contribute to improving physical and mental health for many people (Mansur, 2021).

Gyms are businesses that have a special importance in terms of customer service. Customer service is a critical factor affecting the success of gyms and has a huge impact on customer satisfaction, customer loyalty and the reputation of the business. Gyms often use various strategies to improve the quality of service provided to customers and increase their satisfaction (Memiş, 2002). These include the employment of professional and trained sports trainers, the creation of individual training programs, regular exercise monitoring, maintaining hygiene and cleanliness, providing safe and effective sports equipment and giving personal attention to customers. Additionally, gyms often conduct surveys or interviews to collect and evaluate customer feedback (Özkan, 2013). This feedback is used to improve service quality and better respond to customer needs. A good customer service strategy helps gyms survive in the competitive market and encourages customers to form long-term relationships. As a result, customer service of gyms is an indispensable part of a successful business and plays a critical role in the sustainability of businesses (Yüksel, 2019).

Gyms are businesses that constantly strive to increase and maintain customer satisfaction. Customer satisfaction is a critical factor affecting the success and sustainability of gyms. To increase customer satisfaction, gyms use a variety of strategies (Shanka and Taylor, 2013). These include the employment of professional and experienced sports trainers, the provision of individual training programs, regular customer follow-up and feedback collection processes. Gyms also strictly adhere to cleanliness and hygiene standards, provide safe and effective gym equipment, and offer effective communication and personal attention to customers (Pitts and Stotlar, 2002). Tools such as customer feedback surveys, satisfaction scales and comment boxes are used to evaluate customer

satisfaction. This feedback provides important data to improve service quality and better respond to customer needs. High customer satisfaction increases customers' loyalty to gyms, attracts new customers with positive references and recommendations, and strengthens the reputation of the business (Nagel et al., 2004). As a result, gyms' customer satisfaction levels are vital to the success and sustainability of businesses.

### 1.2. Purpose and Importance of the Research

The purpose of this study is to examine the customer service and satisfaction levels of gyms. For gyms, customer service and satisfaction are important to the success and sustainability of the business. Satisfied customers remain loyal to the business, maintain long-term memberships and provide positive testimonials. This contributes to the growth of the business. In addition, competition between gyms is increasing. Businesses that keep customer service and satisfaction levels high gain a competitive advantage over others. Service quality and satisfaction levels can be a big factor when customers choose between businesses that offer similar services. Good customer service and high satisfaction levels strengthen the reputation and brand value of gyms. A positive reputation is important to attract new customers and support the long-term success of the business. Studies examining customer service and satisfaction levels provide customer feedback to businesses. This feedback helps businesses identify their weaknesses and improve their services. As a result, this study, which examines the customer service and satisfaction levels of gyms, not only contributes to the literature, but also has great importance in terms of business success, competitive advantage, reputation, customer feedback and personnel training.

### 1.3. Hypotheses

In this research, answers were sought to the following questions:

1. H<sub>1</sub>: The average scores of factors affecting customer satisfaction differ according to gender.
2. H<sub>1</sub>: The average scores of factors affecting customer satisfaction differ according to age.
3. H<sub>1</sub>: The average scores of factors affecting customer satisfaction differ according to marital status.
4. H<sub>1</sub>: The average scores of the factors affecting customer satisfaction vary according to educational status.
5. H<sub>1</sub>: The average scores of factors affecting customer satisfaction differ according to monthly income.
6. H<sub>1</sub>: The average scores of the factors affecting customer satisfaction vary according to the duration of use.
7. H<sub>1</sub>: The average scores of the factors affecting customer satisfaction vary according to the purposes of use.

### 1.4. Assumptions

It is assumed that research participants give their answers to the survey questions sincerely.

### 1.5. Limitations

Research;

- With research participants,
- With the scale questions used in the research,
- It is limited to gyms in TRNC.

### 1.6. Definitions

**Sport:** is defined as a general term for competitive or non-competitive activities in which physical activities are performed regularly (Başkonuş, 2020).

**Gym:** These are indoor spaces equipped for individuals to perform their physical activities (Okumuş and Duygun, 2008).

**Customer service:** It is an activity in which a business interacts with its customers and includes the support, assistance and information services it offers to customers (Adıgüzel, 2020).

**Satisfaction:** It refers to the state of a person or groups having a generally positive feeling or sense of satisfaction about an experience, service, product or situation (Ruziyeva, 2018).

## 2. THEORETICAL FRAMEWORK

### 2.1. Service Concept

Service concept, general aspect concrete one of the product production or sale non - people between interactions or one experience providing like in shapes expression made One activity or activity expression it does. Services usually one value offering, needs welcome or solution providing purpose herds. Services, different in sectors And in areas can be offered, for example tourism, health, education, finance, consultancy like A lot different in the industry services There are. Service concept, concrete of products On the contrary, usually physically one presence without creating offered, value providing needs welcome or experience offer purpose bearing one activity or activity aspect is defined. Services, people interactions, processes And experiences over was

established And various in sectors can be offered , for example health , education , tourism , finance , consultancy like wide One on the spectrum services (Sarac , 2018).

Your services basis features between concrete absence, variability show, simultaneously presentations, variable to quality owner to be and intangibility so get inability to hold status is found. Services generally directly is consumed at the moment is offered and this for this reason service provider and customer between interaction quickly takes place. Your services presentation, customer satisfaction and experience affecting important One is the factor. Service providers, customers personalized experiences by offering quality standards raising and to needs sensitive one way service by offering customer their relationships can strengthen and loyalty they can increase. Services, both the customer and the service to the provider opposite use providing one interaction format aspect function sees (Mansur, 2021).

Service concept , customer or to the buyer clear One value offering And Generally physically One of the object production or sale not , but Generally experience , expertise , assistance or solution providing like in shapes expression made One activity or activity aspect is defined . Services Generally people between interactions or one service of the provider to the customer one value offer process Contains. Your services sizes, service of experience different aspects and components expression it does. Your services dimensions of service the quality evaluate, service the design plan And service presentation to manage for is used. Usually SERVQUAL model like various models, services sizes to explain for is used (Adıgüzel , 2020).

## 2.2. Sports Services

Sports services include various services offered to support individuals' physical activities, exercise, play sports and maintain a healthy lifestyle. These services can be offered in gyms, fitness centers, sports clubs, personal training, group exercises, sporting events and more. Sports services aim to improve individuals' health and fitness, reduce stress, increase energy levels and achieve an overall better quality of life. Sports services can be offered to a variety of age groups and ability levels. In addition to amateur athletes, professional athletes can also benefit from these services. Service providers are often supported by a team of experienced coaches, sports specialists and physiotherapists. These professionals can create exercise programs that suit individuals' goals, help correct techniques, and provide motivation (Başkonuş , 2020).

Sports services can be tailored to suit individuals' personal goals. Programs can be offered for different goals such as losing weight, gaining muscle, increasing fitness, and improving flexibility. Additionally, group exercises and team sports can also be preferred to increase social interaction. With the advancement of technology, sports services are also offered through digital platforms. Options such as online exercise videos, digital training programs and distance training sessions offer people flexibility and ease of access. In addition to helping individuals improve their physical health, sports services support them in establishing social connections, staying motivated and adopting an active lifestyle. These services aim to make people feel better, increase their energy levels and improve their overall quality of life (Alexandris , et al ., 2004)

## 2.3. Concept of Customer Satisfaction

Customer satisfaction concept of businesses to its customers they provide product or services, customers how much by satisfaction disturbing there is expression it does. This concept allows customers your expectations meeting the needs TRUE One way understanding and presented product or services of the quality satisfaction will provide at the level by being it is relevant. Customer satisfaction, businesses for important One is the criterion because pleased customers loyalty create, positive references to provide And LONG futures work relationships to establish is expected. Customer satisfaction, businesses to customers offered experience evaluation of the process the result reflects. If one business, customers to your needs suitable product or services by offering them satisfaction if the customer can your satisfaction increases. Customer satisfaction, just of the business financial success not the same in time reputation, brand its value and customer your loyalty effects (Adıgüzel, 2020).

Customer satisfaction to ensure for businesses, customers back notifications evaluates And This back notifications business activities to develop for uses. Customer complaints and demands of businesses weak aspects to determine and service the quality to improvements helper it is possible. Same at the time, customer satisfaction to ensure for employee education, quality control And continually improvement like strategies are also used. Customer satisfaction, businesses rivalry advantage get also contribute to be found. Pleased customers again \_ work don't do that possibility of high which is positive references providing And brand loyalty constituent are customers . Because businesses, customers your satisfaction continually aspect measures, evaluates and improvement to their processes including it does. Customer satisfaction concept of businesses to customers provided by your experience satisfaction disturbing is is not expression it does. Good One customer satisfaction strategy, businesses rivalry advantage get customers, loyalty to create And LONG futures your achievements to continue helper happens (Erzuzun , 2017).

### 3. METHOD

#### 3.1. Research Method

This study is conducted using the relational screening technique, which is one of the quantitative research methods. Relational survey technique (or Relational Research Technique) is a quantitative research method used to examine the relationship between two or more specific variables in a study. This method is used to understand and identify relationships between two or more variables. The relational screening technique aims to analyze the relationships between variables using existing data. Researchers generally work with this method to test hypotheses, examine correlations between variables, or determine cause-effect relationships (Karasar , 2008).

#### 3.2. Population and Sample

The population of the research consists of gym customers in TRNC. The sample of the study was determined by the purposeful sampling method in accordance with the purpose of the research. A purposive sample is a sample specifically selected for a research study or survey and created for a specific purpose or objective. Researchers use this type of sampling when they want to examine or investigate a specific subgroup or feature of their study. Purposive samples are designed to focus on a specific problem or questions rather than making generalizations or representing all characteristics of the population (Karasar, 2008). Based on this information, 360 customers using gyms were included in the study.

#### 3.3. Data Collection Tools

In the research, data are collected through scale; it was collected via Google forms. Scale forms were distributed on 10.07.2023 and completed on 20.07.2023. Of the 400 forms submitted for the study, 370 were converted. 10 forms were not included in the study due to incomplete questions.

A personal information form was also used to obtain personal information about the sports facility members participating in the research, such as gender, age, marital status, education level, income status, membership history and purpose of participation.

In this research, the Sports Businesses Customer Satisfaction Scale (SIMMO), developed and accepted by Sevulmuş (2015), was used to evaluate customer satisfaction. This scale consists of 5 sub-dimensions in total: sports center quality, quality of the working environment, quality of sports instructors and general satisfaction. SIMMS includes 55 items and allows a comprehensive evaluation of the service quality and customer satisfaction of sports facilities through these items. One of the reasons why this scale is preferred is that it has strong features related to quality and satisfaction. In addition, it has been seen that SIMMS has been tested and accepted through validity and reliability studies conducted in Turkey. In the reliability study, internal consistency coefficients (Cronbach's It was determined that the alpha) values were 64 for the program sub-dimension, 68 for the services sub-dimension, 72 for the management sub-dimension and 85 for the hardware sub-dimension, and this value was 92 for the entire scale.

**Table 1.** Reliability analysis of the scale

|                    | Cronbach's Alpha | Article |
|--------------------|------------------|---------|
| Satisfaction Scale | .834             | 55      |

This research, Cronbach's Alpha value of the satisfaction scale consisting of 55 items was determined as .834. This shows that the scale is reliable in the study.

#### 3.4. Analysis of Data

SPSS 26 program was used to analyze the data collected in the study and was examined at the reliability level. T-Test and ANOVA tests were used to examine whether the scale scores differ according to socio -demographic characteristics.

### 4. FINDINGS

#### 4.1. Demographic features

Demographic variables of the participants are given in Table 2.

**Table 2.** Demographic Characteristics of Customers

|        |                 | N   | %    |
|--------|-----------------|-----|------|
| Gender | Male            | 237 | 65.8 |
|        | Woman           | 123 | 34.2 |
| Age    | 20-25 years old | 58  | 16.1 |
|        | 26-30 years old | 116 | 32.2 |

|                        |                 |     |       |
|------------------------|-----------------|-----|-------|
|                        | 31-40 years old | 117 | 32.5  |
|                        | 41-50 years old | 23  | 6.4   |
|                        | 51 and over     | 46  | 12.8  |
| marital status         | Married         | 276 | 76.7  |
|                        | Single          | 84  | 23.3  |
| Educational background | High school     | 119 | 33.1  |
|                        | University      | 164 | 45.6  |
|                        | postgraduate    | 77  | 21.4  |
| monthly income         | Low             | 50  | 13.9  |
|                        | Middle          | 124 | 34.4  |
|                        | High            | 186 | 51.7  |
|                        | Total           | 360 | 100.0 |

When Table 2 is examined, it is seen that 65.8% of the customers are male and 34.2% are female. 32.5% of the customers are 31-40 years old; 32.2% are 26-30 years old; 16.1% are 20-25 years old; it is seen that 12.8% of them are 51 and over. 76.7% of customers are married and 45.6% are university graduates. Additionally, 51.7% of customers have high income; 34.4% have medium income and 13.9% have low income.

**Table 3.** Distribution of Customers According to Duration of Joining the Sports Center and Purpose of Use

|   |                                | N   | %     |
|---|--------------------------------|-----|-------|
| Duration of participation in Sports Center programs | 0 - 6 months                   | 91  | 25.3  |
|   | 7-12 months                    | 79  | 21.9  |
|   | 13-24 months                   | 22  | 6.1   |
|   | 25-36 months                   | 78  | 21.7  |
|   | more than 36 months            | 90  | 25.0  |
| Purpose of joining the Sports Center                | stay healthy stay fit          | 53  | 14.7  |
|   | get stronger                   | 54  | 15.0  |
|   | Weight Control                 | 27  | 7.5   |
|   | Gain Social Environment        | 31  | 8.6   |
|   | Looking beautiful and delicate | 60  | 9.7   |
|   | Body building                  | 48  | 13.3  |
|   | Relax                          | 35  | 16.7  |
|   | make use of free time          | 52  | 14.4  |
|   | Total                          | 360 | 100.0 |

When Table 3 is examined, 25.3% of customers have 0-6 months; It was observed that 25% of them had been going to the sports center for more than 36 months, 21.9% for 7-12 months, 21.7% for 25-36 months and 6.1% for 13-24 months. In addition, 16.7% of customers use it to relax; It was determined that 15% went to the sports center to get stronger, 14.7% to stay healthy and fit, and 13.3% to improve their body .

#### 4.2. Findings on Sports Businesses Customer Satisfaction Scale Subscale Average Scores

Table 4 shows the sports businesses customer satisfaction scale subscale mean scores.

**Table 4.** Sports Businesses Customer Satisfaction Scale Subscale Average Score Values

| Subscale/Dimension Name      | Min.  | Max . | $\bar{X}$ | Ss .  |
|------------------------------|-------|-------|-----------|-------|
| <b>Development</b>           | 31.00 | 66.00 | 55.71     | 5,847 |
| <b>Sports Center Quality</b> |       |       |           |       |
| Program                      | 9.00  | 28.00 | 21.97     | 3,050 |
| Management                   | 11.00 | 27.00 | 21.40     | 2,814 |

|   |       |       |       |       |
|---|-------|-------|-------|-------|
| Services                                  | 13.00 | 28.00 | 22.57 | 2,484 |
| Equipment                                 | 25.00 | 53.00 | 43.97 | 4,598 |
| <b>Quality of the Working Environment</b> | 5.00  | 35.00 | 28.17 | 4,258 |
| <b>Qualification of Sports Trainers</b>   | 35.00 | 77.00 | 62.16 | 9,252 |
| <b>Satisfaction</b>                       |       |       |       |       |
| Request to Leave                          | 9.00  | 28.00 | 21.97 | 3,050 |
| Loyalty                                   | 17.00 | 34.00 | 27.70 | 2,928 |

When Table 4 is examined, it is seen that the highest average among the sports businesses customer satisfaction scale subscale dimensions is the qualification of sports trainers ( $\bar{X} = 62.16$ ; Sd . 9.252); It is seen that the lowest average is in the management sub-dimension of the sports center quality dimension ( $\bar{X} = 21.40$ ; Sd . 2.814). These results show the differences between the factors affecting customer satisfaction in terms of service quality of sports center management and sports trainers. While customers are more satisfied with the quality of sports instructors, satisfaction with the quality of sports center management appears to be lower.

#### 4.3. Findings on Average Scores of Customer Demographic Characteristics and Factors Affecting Customer Satisfaction

Table 5 shows the results of the analysis in which the hypothesis "H<sub>1</sub> : The average scores of factors affecting customer satisfaction differ according to gender" is tested.

**Table 5.** T-Test Results Showing the Comparison of Average Scores of Factors Affecting Customer Satisfaction by Gender

| Subscale/Dimension Name                   | Gender | N   | $\bar{X}$ | Ss .  | f     | p.    |
|---|--------|-----|-----------|-------|-------|-------|
| <b>Development</b>                        | Male   | 237 | 55.74     | 5,95  |       |       |
|   | Woman  | 123 | 55.67     | 5,664 | 0.012 | 0.915 |
| <b>Sports Center Quality</b>              |        |     |           |       |       |       |
| Program                                   | Male   | 237 | 21.98     | 3,062 |       |       |
|   | Woman  | 123 | 21.94     | 3,038 | 0.022 | 0.883 |
| Management                                | Male   | 237 | 21.37     | 2,795 |       |       |
|   | Woman  | 123 | 21.46     | 2,860 | 0.001 | 0.974 |
| Services                                  | Male   | 237 | 22.64     | 2,490 |       |       |
|   | Woman  | 123 | 22.43     | 2,476 | 0.011 | 0.915 |
| Equipment                                 | Male   | 237 | 44.02     | 4,594 |       |       |
|   | Woman  | 123 | 43.87     | 4,622 | 0.035 | 0.851 |
| <b>Quality of the Working Environment</b> | Male   | 237 | 28.02     | 4,196 |       |       |
|   | Woman  | 123 | 28.45     | 4,380 | 0.228 | 0.633 |
| <b>Qualification of Sports Trainers</b>   | Male   | 237 | 61.78     | 9,317 |       |       |
|   | Woman  | 123 | 62.87     | 9,122 | 0.048 | 0.827 |
| <b>Satisfaction</b>                       |        |     |           |       |       |       |
| Request to Leave                          | Male   | 237 | 21.98     | 3,062 |       |       |
|   | Woman  | 123 | 21.94     | 3,038 | 0.022 | 0.633 |
| Loyalty                                   | Male   | 237 | 27.70     | 2,897 |       |       |
|   | Woman  | 123 | 27.70     | 2,999 | 0.033 | 0.856 |

#### p>0.05

SIMMÖ "development, sports center quality, quality of the working environment , **As a result of the T-Test conducted to determine** whether the "sports instructors quality and satisfaction " subscale scores showed a significant difference according to the gender variable, the difference between the arithmetic means of the groups was not found to be statistically significant (p>0.05). In this case, H<sub>1</sub> was rejected.

Table 6 shows the results of the analysis in which the hypothesis "H<sub>2</sub> : The average scores of the factors affecting customer satisfaction differ according to age" is tested.

**Table 6. One-Way Analysis of Variance (ANOVA) Test Results Showing the Comparison of the Average Scores of Factors Affecting Customer Satisfaction by Age Groups**

|   |             |       | N   | $\bar{X}$ | Ss .  | f     | p.    |

**p>0.05**

SIMMÖ "development, sports center quality, quality of the working environment , **One-way analysis** of variance (ANOVA) was conducted to determine whether the "sports instructors quality and satisfaction " subscale scores showed a significant difference according to the age variable. As a result, the difference between the arithmetic means of the groups was not found to be statistically significant (p>0.05). In this case, H2 was rejected.

Table 7 shows the results of the analysis in which the hypothesis "H<sub>3</sub> : The average scores of factors affecting customer satisfaction differ according to marital status" is tested.

**Table 7.** T-Test Results Showing the Comparison of the Average Scores of Factors Affecting Customer Satisfaction According to Marital Status

**p<0.05**

SIMMÖ "development, sports center quality, quality of the working environment , **One-way analysis** of variance (ANOVA) was conducted to determine whether the "sports instructors quality and satisfaction " subscale scores showed a significant difference according to the educational status variable. As a result, it was seen that the difference between the arithmetic means of the groups was statistically significant in some dimensions ( $p < 0.05$ ). Accordingly, in the management and equipment sub-dimensions of the sports center quality dimension; In the commitment sub-dimension of the quality of the working environment and satisfaction dimension, the scores of participants who were high school graduates were found to be higher than those of participants who were university graduates. In this case,  $H_4$  is partially accepted.

#### 4. CONCLUSION AND RECOMMENDATIONS

The results of this study, which examined the customer service and satisfaction levels of gyms, are summarized below:

According to the research results, when the sub-dimensions of the Sports Enterprises Customer Satisfaction Scale (SIMMÖ) were examined, it was observed that the quality of sports trainers dimension received the highest average score in customer satisfaction ( $\bar{X} = 62.16$ ; Sd. 9.252). On the other hand, the management sub-dimension of the sports center quality dimension received the lowest average score ( $\bar{X} = 21.40$ ; Sd. 2.814). These results show that the service quality of sports center management and sports trainers affects customer satisfaction in different ways.

No statistically significant difference was found between the SIMMS subscales according to gender variable. As a result of the one-way analysis of variance performed according to the age variable, no significant difference was detected between the groups. As a result of the T-Test conducted according to the marital status variable, no significant difference was determined between the groups.

Significant differences were detected in some dimensions according to the educational status variable. The scores of participants who were high school graduates were found to be higher than participants who were university graduates in the management and equipment sub-dimensions of the sports center quality dimension, the quality of the working environment and the commitment sub-dimension of the satisfaction dimension. As a result of the one-way analysis of variance conducted according to the monthly income variable, no significant difference was detected between the groups. No significant differences were determined in the analyzes made according to the variables of duration of use and purpose of use.

These results show that there are generally no significant differences in customers' satisfaction levels in the SIMMS sub-dimensions depending on gender, age, marital status, education level, monthly income, duration of use and purpose of use.

Based on the research results, the following recommendations were made:

- **Improvement Efforts for Sports Business Management:** It has been observed that sports center management leads to lower satisfaction scores in the sports center quality dimension. Management should adopt a careful and attentive approach to improving the physical conditions and service quality of the facility.
- **Investment in Personnel Qualifications:** The quality of sports trainers dimension has the highest average score in customer satisfaction. Therefore, sports centers should invest in increasing and maintaining the training and skills of sports instructors. It is important that instructors constantly have up-to-date knowledge and skills.
- **Customer Education and Information:** Providing customers with more information about fitness center services, expectations, and the operation of the facility can increase customer satisfaction. This can be a practice that can be carried out regularly by sports center staff.
- **Customer Diversity Should Be Considered:** Although education level, age and other demographic factors do not seem to be important in affecting customer satisfaction, these factors can lead to significant differences in some sub-dimensions. Therefore, sports centers should make customer segmentation and service delivery taking these differences into consideration.
- **More Research and Feedback:** More research and feedback should be collected to understand and improve customers' satisfaction levels. Customer expectations and needs should be evaluated regularly and development plans should be created based on this feedback.
- **Training and Development Programs:** Training and development programs should be created for sports center staff and managers. These programs can increase customer satisfaction by improving service quality.
- **Better Communication:** There should be better communication with customers. Customers should be informed regularly about on-site developments, events and changes.

### ABSTRACT

Self-efficacy is a person's belief in his individual knowledge, experience and equipment and the inner dynamism to achieve this, even though the conditions may differ, in the process of achieving certain goals. Self-efficacy beliefs also affect teachers' attitudes towards lessons, the teaching methods and techniques they use in teaching processes, and their motivation to teach the lesson in accordance with its requirements. For this reason, this study was conducted to examine the self-efficacy beliefs of preschool teachers towards science education. The research was designed quantitatively and is in the screening model. The population of the research consists of 130 preschool teachers working in Amasya in the 2019-2020 academic year. The study group of the research was determined by the snowball sampling method and the data were obtained by using the "Science Education Self-Efficacy Belief Scale of Preschool Teachers". Descriptive statistical analyzes were used in the analysis of the data. In the analysis, independent groups t-test for gender and school type variables, ANOVA analyzes for professional seniority and place of work variables were applied. As a result of the research, it was concluded that the self-efficacy beliefs of preschool teachers towards science education did not differ significantly according to the variables of gender, school type and place of work, but differed significantly according to the variable of professional seniority.

### INTRODUCTION

Ertürk (1973) defines education, which we encounter in every aspect of our daily life, as “the process of creating deliberate and permanent changes in one's behavior through one's own experiences”. In this long process that will start from birth and continue throughout life, everything that happens in the environment where the individual lives creates effects on his own emotional, social and mental world (Şişman, 2010). In particular, systematic and controlled environments such as schools contribute to both the social competence and personal development of the individual (Fidan, 1996). One of the main functions of education is to provide the individual with the qualifications desired by the society, which will create a bridge between the individual and the society. This is gained to students only through purposeful education and learning-teaching activities (Özer, 1993).

With contemporary education, it is expected to raise individuals who develop and renew themselves, think critically, analytically, have productive and problem-solving skills, adhere to national, spiritual, cultural and moral values and compete worldwide (Argon, 2019). In this context, pre-school education gains a special importance in order to gain these qualities to individuals in the early period. Preschool education is a planned and organized educational process that supports the physical, social, emotional, language, mental development and self-care skills of children aged 0-72 months (Aral et al., 2002; Yılmaz, 2003; Ural & Ramazan, 2007). Preschool education is a systematic education and is the most important step of the education system, which should be based on scientific foundations that are far from coincidences (Arı and Tuğrul, 1996).

It is known that the pre-school period is the period in which synaptic bond development and brain development in the brain are experienced the fastest through environmental stimuli (MEB, 2013). Children act with their innate sense of curiosity and discovery in order to get to know and make sense of their environment. In this period of rapid development and learning, the preschool child gains most of the cognitive skills by experiencing, observing, researching, questioning, measuring, estimating, establishing a cause-effect connection, that is, using scientific processes (Avcı, 2015; Ünal & Akman, 2006).

In this period, which is also called the early childhood period, it is expected that the child will interact with his environment and learning will take place actively. Because the knowledge, skills and equipment that an individual will acquire at an early age are so important that they affect both the educational life and personal life of the child (Kesicioğlu, 2019). For this reason, it is necessary to introduce children to science at a young age and to ensure that children develop positive attitudes towards science. Science education and activities within the scope of science education provide a great opportunity for the child to develop scientific process skills (Önal &

Sarıbaşı, 2019; Sontay & Karamustafaoğlu, 2022). From this point of view, the place and importance of science education in the early childhood education process is also great.

Science is observing everything about the world, thinking about events, phenomena, concepts, bringing facts together within the framework of cause and effect, and sharing the obtained information with others (Küçüküran & Yıldırım, 2008). Science education, in which children have different experiences and activities in order to gain knowledge with their senses in the pre-school period, also gains importance (Balat-Uyanık, 2013).

The contemporary understanding of education aims to develop the cognitive skills of the individual starting from the pre-school period. Metacognitive skills such as observing, interpreting, scientific thinking, and being a science literate are among the achievements in contemporary education programs. It is an incomplete and erroneous idea to think that the science activities included in the preschool program only support the development of the child in the cognitive field. Science and nature activities support children's cognitive development, social development, language development, psychomotor development, self-care development, that is, all developments in the program. This creates a natural basis for the child to acquire skills such as analytical thinking and producing products in this period. It will be very beneficial for all the developmental stages of the child to include the achievements and indicators related to science education in their monthly plans and daily flows, and to implement various activities in this direction (Alisinanoğlu, 2007; Kandır, 2001).

In the pre-school period, children are in a great curiosity towards their environment. With this impulse, children want to research and question everything. Children in this period should be given the opportunity to learn by doing and living in their education (Ayvacı & Ünal, 2017). An educator who knows the developmental characteristics of the preschool child guides the child by organizing child-centered activities. Because the primary duty of the educator is not to convey information, but to plan activities that show what and how they can do by providing environmental opportunities that will encourage children to think and research (Gönen & Dalkılıç, 2000; Bilaloğlu, Aslan & Aktaş-Arnas, 2008).

Preschool science curriculum should be balanced with a standard structure that can attract the attention of all children, taking into account the readiness and individual differences of children, and a flexible structure that can be customized according to the level of the class when necessary (Akman, Balat, & Yıldız, 2018). big business falls. The teacher should take care to plan activities that will attract the child's interest and attention, and to use various teaching methods and techniques. In this regard, teachers' views on science education also determine and reflect realistic classroom practices (Öztürk Yılmaztekin & Tantekin Erden, 2011).

The proficiency of the subject that the teacher will teach the attitudes and behaviors in the learning process affects the learning process positively by increasing the interest, desire and attention of the children towards the lesson (Şahin, 2019). MoNE (2017), Competence can be defined as the knowledge, equipment and belief required to perform a job in accordance with its components. Teacher self-efficacy belief is defined as the knowledge, equipment, experience and self-confidence that teachers have in increasing their students' effectiveness in the learning process (Tschannen-Moran, Woolfolk-Hoy, & Hoy, 1998: cited in Kurt, 2012).

Contemporary and democratic societies are aware of the importance of preschool education in raising new generations. Raising national and international manpower equipped with the equipment required by the age is only possible with a systematic education. The most important element of this system is the teacher. Teachers have great responsibilities in managing this process effectively and successfully. The teacher should create a democratic classroom environment in which students can express themselves during the learning process, implement educational programs customized for children with learning difficulties or need special education, and give students the opportunity to get to know and develop themselves by including activities that will provide students with scientific thinking skills. In addition, qualities such as strong communication skills, field knowledge and professional skills determine the basis of teacher competencies (MEB, 2017). competencies and personal problems during the application have an important place. In his study, Denizoğlu (2008) states that teachers with a high perception of professional self-efficacy are willing and patient to try different teaching methods to students with learning difficulties and exhibit solution-oriented behaviors in the face of problems, while teachers with low perceptions feel they are lacking in the skills necessary to cope with difficulties.

Denizoğlu (2008) and Kotaman (2008) show that teachers' self-perceptions affect their students' perceptions of themselves, which will increase student success and that education will lead to the desired qualifications. Bayraktar (2009), student-centered teaching strategies of teachers with high self-efficacy perceptions. He states that teachers with low self-efficacy perception prefer traditional teaching methods and techniques and are reluctant to teach science. There are also studies stating that the most fundamental problem in science teaching stems from the inability of teachers to develop their ability to apply different teaching methods and techniques (Bencze & Hodson, 1999).

Teacher self-efficacy belief plays an important role both in determining the satisfaction of the teacher in his profession and in affecting the course success of the students positively or negatively (Caprara et al., 2006). High self-efficacy beliefs or low self-efficacy beliefs in teachers affect all stakeholders in the learning process. Teachers' and prospective teachers' science, mathematics, etc. The data on self-efficacy beliefs related to areas

such as these provide a more accurate interpretation of their behaviors during the education process (Bıkmaz, 2004). In the light of this information, in this study, it was aimed to determine the self-efficacy belief status of preschool teachers regarding science education according to their demographic characteristics. In line with this purpose, the main problem of the research is, "How are the self-efficacy beliefs of preschool teachers about science education?" formed in the form. In line with this main purpose,

1. Is there a significant difference according to gender in determining the self-efficacy of preschool teachers regarding science education?
2. Is there a significant difference in determining the self-efficacy of preschool teachers regarding science education, according to the region they work?
3. Do pre-school teachers' proficiency in science education show a significant difference according to their professional experience?
4. Is there a significant difference in determining the self-efficacy of preschool teachers regarding science education, according to the type of school they work at?

answers to the questions were sought.

## METHOD

### Research Design

The survey model was used in this study, which was conducted to determine the science education self-efficacy beliefs of preschool teachers, which is a quantitative research. The screening model is an approach that aims to reveal a past or present situation as it is (Karasar, 2007).

### Study Groups

The sample of the study consists of 130 preschool teachers working in Amasya. 130 preschool teachers working in the city center, districts and rural areas of Amasya participated in this study, which was determined by the snowball sampling method, on a voluntary basis in the digital environment. Permission was obtained from the participants for the research, but an ethics committee approval was not obtained. The distribution of participant teachers by gender, institution and seniority is given in Table 1.

**Table 1.** Distribution of Teachers in the Study Group of the Research

When Table 1 is examined, it is seen that 96.2% of the teachers in the sample are female, 3.8% are male, 38.5% work in independent kindergartens and 61.5% in kindergartens. It has been observed that the teachers with the highest seniority among the teachers are those with a seniority of 11-20 years with a ratio of 61.5%. According to their place of duty, 58.5 percent (n: 76) of the teachers are in the city center, 27.7 percent (n: 36) it is seen that 13.8 percent (n:18) work in town or village centers.

### Data Collection Tools

The "Science Education Self-Efficacy Belief Scale of Preschool Teachers" developed by Günşen and Uyanık (2020) was used to collect data in the research. The scale is in a five-point Likert type and consists of 3 sub-dimensions and 17 items. These items were scored as 1-2-3-4-5 for preschool teachers' responses of "I strongly disagree, I disagree, I am undecided, I agree, I strongly agree", which will show their proficiency in science education. The scale has an item that is reverse coded in the sub-dimension of personal self-efficacy belief in science education. The highest score to be obtained from the scale consisting of the sub-dimensions of Belief in the Science Education Process, Outcome Expectation in Science Education, and Personal Self-Efficacy Belief in Science Education is 85. The lowest score is 17. The Cronbach's alpha reliability coefficient of the first sub-dimension of the scale, Belief in the Science Education Process, is 0.92, the second sub-dimension of the scale is the Expectation of Outcome in Science Education sub-dimension, the Cronbach's alpha reliability coefficient is 0.78, the third sub-dimension of the scale is Personal Self-Efficacy Belief in Science Education. size, Cronbach's alpha reliability coefficient is 0.79. Cronbach's alpha reliability coefficient for the whole scale is 0.91.

### Analysis Of Data

|            |                   | F   | %    |
|------------|-------------------|-----|------|
| CİNSİYET   | Kadın             | 125 | 96,2 |
|            | Erkek             | 5   | 3,8  |
| KURUM      | Bağımsız Anaokulu | 50  | 38,5 |
|            | Anasınıfı         | 80  | 61,5 |
| GÖREV YERİ | İl merkezi        | 76  | 58,5 |
|            | İlçe Merkezi      | 36  | 27,7 |
|            | Kasava veya köy   | 18  | 13,8 |
| KIDEM      | 1-5 yıl           | 15  | 11,5 |
|            | 6-10 yıl          | 21  | 16,2 |
|            | 11-20 yıl         | 80  | 61,5 |
|            | 21-30 yıl         | 10  | 7,7  |
|            | 31 ve üstü        | 14  | 10,8 |

The analysis of the data collected in order to determine the proficiency of preschool teachers towards science education was made with the SPSS 27 program. In the study, t-test, one-way analysis of variance (ANOVA), frequency (f), percent (%), arithmetic mean and standard deviation values were calculated for independent groups. The data obtained are presented in tables.

### FINDINGS/RESULTS

In this section, the findings revealing whether the preschool teachers' science education self-efficacy beliefs differ according to gender, school type, professional seniority and the center where they work, and the arithmetic mean and standard deviation values of the scale sub-dimensions are included. The findings of the arithmetic mean and standard deviation of the answers given by the preschool teachers to the items related to the belief sub-dimension regarding the science education process are given in Table 2.

**Table 2.** The arithmetic mean and standard deviation results of the sub-dimension of preschool teachers' beliefs about the science education process

| Scale Dimension                     | Sub-Item numbers | $\bar{x}$ | ss  |
|-------------------------------------|------------------|-----------|-----|
| Belief in Science Education Process | 1                | 4,52      | ,53 |
|                                     | 2                | 4,36      | ,66 |
|                                     | 3                | 4,45      | ,57 |
|                                     | 4                | 4,48      | ,52 |
|                                     | 5                | 4,32      | ,60 |
|                                     | 6                | 4,41      | ,59 |
|                                     | 7                | 4,30      | ,63 |
|                                     | 8                | 4,29      | ,59 |
| TOTAL                               |                  | 4,39      | ,44 |

When Table 2 is examined, it is seen that teachers can draw children's attention to students' science concepts in daily life (Item: 1; $\bar{X}$ =4.52), use appropriate materials (Item: 2; $\bar{X}$ =4.36), and consider children's needs in their planning (Item: 3; $\bar{X}$ =4.45). they can actively participate in the learning and teaching process of science activities (Item:4; $\bar{X}$ =4.48), they can solve negative events/situations in the classroom environment (Item:5; $\bar{X}$ =4.32), they can feel comfortable in the teaching process (Item:6; $\bar{X}$ =4.41) their views on self-efficacy beliefs such as that they can explain science events with appropriate concepts (Item: 7; $\bar{X}$ =4.30) and that they can manage the science education process without any problems (Item:8; $\bar{X}$ =4.29). It has been determined that the total arithmetic mean of the opinions on this sub-dimension is ( $\bar{X}$ =4.39). Accordingly, it was found that preschool teachers had high self-efficacy beliefs regarding the sub-dimension of belief in the science education process.

The t-test results of the preschool teachers' belief sub-dimension scores regarding the science education process according to their gender are shown in Table 3.

**Table 3.** T-test results of preschool teachers' belief sub-dimension scores regarding the science education process by gender

| Gender | N   | $\bar{x}$ | Ss   | t    | Sd  | P    |
|--------|-----|-----------|------|------|-----|------|
| Female | 125 | 35,20     | 3,56 | 1,12 | 128 | 0,27 |
| Male   | 5   | 33,40     | 2,61 |      |     |      |

$p < 0,05$ .

The findings in Table 3 show that the views of the teachers regarding the science education self-efficacy beliefs regarding the belief sub-dimension towards the science education process do not differ significantly according to their genders [ $t(128)=1.12$ ,  $p=0.27$ ]. The averages of the opinions of both female ( $\bar{X}=35.20$ ) and male teachers ( $\bar{X}=33.40$ ) regarding their self-efficacy beliefs about the science education process were determined. Table 4 shows the t-test results of the preschool teachers' belief sub-dimension scores regarding the science education process according to the school type variable.

**Table 4.** Comparison of preschool teachers' belief sub-dimension scores regarding the science education process according to the school type variable

| Type of School           | N  | $\bar{x}$ | Ss   | t      | Sd  | P   |
|--------------------------|----|-----------|------|--------|-----|-----|
| Independent Kindergarten | 80 | 34,88     | 3,41 | - 1,04 | 128 | ,30 |
| Kindergarten             | 50 | 35,54     | 3,72 |        |     |     |

$p<0,05$ .

According to the school type variable in Table 4, the findings of preschool teachers' self-efficacy beliefs are given in the sub-dimension of belief in the science education process. Accordingly, teachers' opinions did not differ significantly according to the school type variable [ $t(128)= -1.04$ ,  $p= 0.30$ ]. The averages of self-efficacy beliefs about the science education process of preschool teachers working in independent kindergartens ( $\bar{X}=35.54$ ) and preschool teachers working in primary schools ( $\bar{X}=34.88$ ) are seen.

The one-way ANOVA result of preschool teachers' sub-dimension belief scores regarding the science education process according to their place of work is shown in Table 5.

**Table 5.** Comparison of pre-school teachers' belief sub-dimension scores regarding the science education process according to the variable of workplace

$p<0,05$ .

| Instution         | n  | Mean  | ss   | Variance       | Sum of Squares | Sd  | Mean of Squares | F   | p   |
|-------------------|----|-------|------|----------------|----------------|-----|-----------------|-----|-----|
| Provincial Center | 76 | 35,37 | 3,48 | Between Groups | 13,68          | 2   | 6,84            | ,54 | ,58 |
| District Center   | 36 | 34,97 | 3,47 | With groups    | 1597,10        | 127 | 12,58           |     |     |
| Town or village   | 18 | 34,44 | 3,99 | Total          | 1610,78        | 129 |                 |     |     |

The sub-dimension belief scores of preschool teachers regarding the science education process did not differ significantly according to their place of work ( $F(2,127)=0.54$ ;  $p>0.05$ ).

The findings obtained as a result of the one-way ANOVA conducted according to the professional seniority of the sub-dimension belief scores of the preschool teachers regarding the science education process are shown in Table 6.

**Table 6.** Comparison of pre-school teachers' belief sub-dimension scores regarding the science education process according to the variable of professional seniority

| Seniority   | n  | Mean  | ss   | Variance       | Sum of Squares | Sd  | Mean of Squares | F    | p    |
|-------------|----|-------|------|----------------|----------------|-----|-----------------|------|------|
| 1-5 year    | 15 | 35,00 | 3,18 | Between Groups | 85,62          | 3   | 28,54           | 2,36 | ,07* |
| 6-10 year   | 21 | 33,57 | 3,50 | With groups    | 1525,16        | 126 | 12,10           |      |      |
| 11-20 year  | 80 | 35,70 | 3,59 | Total          | 1610,78        | 129 |                 |      |      |
| 21 and over | 14 | 34,36 | 3,03 |                |                |     |                 |      |      |

$p<0,05$ .

The sub-dimension belief scores of preschool teachers regarding the science education process did not differ significantly according to their professional seniority ( $F(3,126)=2.36$ ;  $p>0.05$ ).

The findings of the arithmetic mean and standard deviation of the answers given by the preschool teachers to the items related to the belief sub-dimension regarding the outcome expectation in science education are given in Table 7.

**Table 7.** The arithmetic mean and standard deviations of preschool teachers' beliefs about outcome expectation in science education sub-dimension

| Scale Dimension                                    | Sub-Item | Item Numbers | $\bar{x}$ | ss  |
|--|----------|--------------|-----------|-----|
|  |          | 9            | 3,69      | ,99 |
| Belief in Outcome Expectation in Science Education |          | 10           | 4,31      | ,69 |
|  |          | 11           | 4,45      | ,57 |
|  |          | 12           | 4,39      | ,63 |
| TOTAL  |          |              | 4,21      | ,56 |

When Table 7 is examined, it is seen that teachers can try to involve the relevant field experts in the process (Item: 9;  $X=3.69$ ), allow children to evaluate themselves at the end of science activities (Item: 10;  $X=4.31$ ), and share the results of children's science activities with each other (Item: 11;  $\bar{X}=4.45$ ) and that they can give an opportunity to share with their families (Item: 12;  $X=4.39$ ) were determined. It has been determined that the total arithmetic mean of the views on this sub-dimension is ( $\bar{X}=4.21$ ). Accordingly, it has been revealed that Preschool Teachers have high self-efficacy beliefs regarding the sub-dimension of the belief of outcome expectation in science education. Table 8 shows the findings obtained as a result of the t-test conducted to determine whether the preschool teachers' belief sub-dimension scores regarding outcome expectation in science education differ significantly according to their genders.

**Table 8.** Comparison of pre-school teachers' scores in the sub-dimension of belief in outcome expectation in science education according to gender variable

| Gender | n   | $\bar{x}$ | ss   | t   | Sd  | P    |
|--------|-----|-----------|------|-----|-----|------|
| Female | 125 | 16,86     | 1,82 | ,25 | 128 | 0,80 |
| Male   | 5   | 16,60     | 2,81 |     |     |      |

$p<0,05$ .

The findings in Table 8 show that the views of teachers regarding science education self-efficacy beliefs regarding the belief sub-dimension of science education outcome expectancy do not differ significantly according to their genders [ $t(128)=0.25$ ,  $p=0.80$ ]. The averages of the opinions of both female ( $\bar{X}=16.86$ ) and male teachers ( $\bar{X}=16.60$ ) regarding their self-efficacy beliefs regarding outcome expectation in science education were determined.

Table 9 shows the t-test results of the preschool teachers' belief sub-dimension scores regarding the outcome expectation in science education according to the school type variable.

**Table 9.** Comparison of preschool teachers' results expectancy belief scores in science education according to the school type variable

$p<0,05$ .

| Type of School           | N  | $\bar{x}$ | Ss   | t    | Sd  | P   |
|--------------------------|----|-----------|------|------|-----|-----|
| Independent Kindergarten | 80 | 16,77     | 2,25 | -,46 | 128 | ,65 |
| Kindergarten             | 50 | 16,96     | 2,22 |      |     |     |

In Table 9, findings related to preschool teachers' self-efficacy beliefs regarding outcome expectation in science education according to school type variable are given. Accordingly, it is seen that teachers' views do not differ according to the school type variable [ $t(128)= -.46$ ,  $p= 0.65$ ]. The averages of the self-efficacy beliefs of

preschool teachers working in independent kindergartens ( $\bar{X}=16.96$ ) and preschool teachers working in primary schools ( $\bar{X}=16.77$ ) regarding outcome expectation in science education are seen.

The findings obtained as a result of the one-way ANOVA conducted according to the variable of the place of duty of the sub-dimension belief scores of the preschool teachers in science education are given in Table 10.

**Table 10.** Comparison of pre-school teachers' results expectancy belief scores in science education according to the variable of workplace

| 1-5 year    | 15 | 16,93 | 2,05 | Between Groups | 55,62          | 3     | 18,54        | 3,98 | ,01* |
| 6-10 year   | 21 | 15,38 | 2,31 | With groups    | in 587,30      | 126   | 4,66         |      |      |
| 11-20 year  | 80 | 17,11 | 2,18 | Total          | 642,92         | 129   |              |      |      |
| 21 and over | 14 | 17,43 | 1,91 |                |                |       |              |      |      |

Preschool teachers' sub-dimension belief scores regarding outcome expectation in science education differed significantly according to their professional seniority ( $F(3,126)=3.98$ ;  $p<0.05$ ).

The findings of the arithmetic mean and standard deviation of the answers given by the preschool teachers to the items related to the personal self-efficacy belief sub-dimension in science education are given in Table 12.

**Table 12.** Arithmetic mean and standard deviations of pre-school teachers' personal self-efficacy beliefs in science education sub-dimension

| Scale Dimension                               | Sub-Item numbers | $\bar{x}$ | ss   |
|---|------------------|-----------|------|
| Personal Efficacy Belief in Science Education | 13               | 4,61      | ,51  |
|   | 14               | 2,67      | 1,46 |
|   | 15               | 3,70      | ,98  |
|   | 16               | 3,95      | ,91  |
|   | 17               | 4,28      | ,73  |
| TOTAL   |                  | 3,84      | ,56  |

When Table 12 is examined, it can be seen that teachers' knowledge of science education may be important in the development of the child in the field of science (Item: 13;  $\bar{X}=4.61$ ), and that families' statements that their children are more interested and curious about science may depend on the preschool teacher's performance in science education (Item: 15;  $\bar{X}=3.70$ ), the reason for a preschool child who is not interested in science events may be due to the preschool teacher's science education appropriate to the development of this child (Item:

17;  $\bar{X}=4.28$ ). opinions about it. The use of science activities as a way for children to recognize and understand life may depend on the teacher's interest in the field of science (Item:16;  $\bar{X}=3.95$ ). (Article: 14;  $\bar{X}=2.67$ ). It was determined that the total arithmetic mean of the views on the Personal Self-Efficacy Belief sub-dimension in Science Education was ( $\bar{X}=3.84$ ).

The t-test results of the preschool teachers' personal self-efficacy belief sub-dimension scores in science education according to the gender variable are shown in Table 13.

**Table 13.** Comparison of pre-school teachers' personal self-efficacy belief sub-dimension scores in science education according to gender variable

| Gender | n   | $\bar{x}$ | ss   | t     | Sd  | p    |
|--------|-----|-----------|------|-------|-----|------|
| Female | 125 | 19,18     | 2,81 | - ,65 | 128 | 0,52 |
| Male   | 5   | 20,00     | 1,87 |       |     |      |

$p<0,05$ .

The findings in Table 13 show that the views of teachers regarding science education self-efficacy beliefs regarding the personal self-efficacy sub-dimension in science education do not differ significantly according to their gender [t(128)= -0.65,  $p=0.52$ ]. The averages of the opinions of female ( $X=19.18$ ) and male teachers ( $\bar{X}=20.00$ ) regarding their personal self-efficacy beliefs in science education were determined.

The t-test results of the preschool teachers' personal self-efficacy belief sub-dimension scores in science education according to the school type variable are shown in Table 14.

**Table 14.** Comparison of pre-school teachers' personal self-efficacy belief sub-dimension scores in science education according to school type variable

| Type of School           | n  | $\bar{x}$ | ss   | t      | Sd  | p    |
|--------------------------|----|-----------|------|--------|-----|------|
| Independent Kindergarten | 80 | 18,90     | 2,84 | - 1,60 | 128 | 0,11 |
| Kindergarten             | 50 | 19,70     | 2,64 |        |     |      |

$p<0,05$ .

In Table 14, the findings of preschool teachers' self-efficacy beliefs regarding personal self-efficacy sub-dimension belief in science education are given according to the school type variable. Accordingly, it is seen that teachers' views do not differ according to the school type variable [t(128)= -1.60,  $p=0.11$ ]. The averages of pre-school teachers working in independent kindergartens ( $X=19.70$ ) and preschool teachers working in primary schools ( $\bar{X}=18.90$ ) regarding personal self-efficacy beliefs in science education are seen.

One-way ANOVA results of preschool teachers' self-efficacy sub-dimension belief scores in science education according to their place of duty are given in Table 15.

**Table 15.** Comparison of pre-school teachers' personal self-efficacy belief sub-dimension scores in science education according to the variable of workplace

| Instution         | n  | Mean  | ss   | Variance       | Sum Squares | of Sd | Mean Squares | of F | p   |

| 21 and over | 14 | 71,21 | 6,85 |             |    |          |     |        |

$p < 0,05$ .

Self-efficacy scores of preschool teachers differed significantly according to their professional seniority (  $F(3,126)=3,678$ ;  $p < 0,05$ ). As a result of the Scheffe test, which was conducted to determine between which groups the difference was, it was determined that the difference was between teachers with 6-10 years of professional seniority and 11-20 years of professional seniority. Self-efficacy belief levels of teachers with 11-20 years of professional seniority are significantly higher than those with 6-10 years of professional seniority ( $p < 0,05$ ). One-way ANOVA results of preschool teachers' self-efficacy belief scores according to their place of work are shown in Table 20.

**Table 20.** Comparison of preschool teachers' self-efficacy belief scores according to the variable of place of employment

Self-efficacy belief scores of preschool teachers did not differ significantly according to their place of work ( $F(2,127)=0,470$  ;  $p > 0,05$ ).

## DISCUSSION, CONCLUSION AND IMPLICATIONS

In this study, which was conducted to determine the science education self-efficacy beliefs of preschool teachers, it was tried to reveal whether there was a significant difference in the self-efficacy beliefs of preschool teachers according to the variables of gender, professional seniority, type of school and place of work. It was determined whether these variables differed in all three sub-dimensions of the scale, which consisted of belief in the process of science education, belief in outcome expectation in science education, and belief in personal self-efficacy in science education. In addition, the averages and standard deviation values of the items in the sub-dimensions of the scale were found.

When the sub-dimensions of the scale were examined, it was seen that teachers' self-efficacy beliefs had the lowest average in the sub-dimension of belief in the science education process (Item: 8 ;  $\bar{X}=4,29$ ). self-efficacy in attracting attention became the item of belief. The total mean ( $\bar{X}=4,39$ ) in the sub-dimension of belief in the science education process indicates that the beliefs of preschool teachers in this sub-dimension are high.

In the sub-dimension of belief in outcome expectation in science education, the lowest average was found (Item: 9;  $\bar{X}=3,69$ ). The one with the highest mean ( $\bar{X}=4,45$ ) was the self-efficacy belief that the eleventh item could allow children to share the results they found about science education with each other. The total average ( $\bar{X}=4,21$ ) in the belief sub-dimension of outcome expectation in science education indicates that preschool teachers have high beliefs in this sub-dimension.

Personal self-efficacy belief sub-dimension in science education is the scale sub-dimension in which teachers' belief scores have the lowest average (Item: 14;  $\bar{X}=2,67$ ). This item is also the reverse scored item in the scale. The item with the highest mean ( $\bar{X}=4,61$ ) is the thirteenth item, "The knowledge of pre-school teachers about science education is important in the development of the child in the field of science." became the item. The total mean ( $\bar{X}=3,84$ ) in the personal self-efficacy belief sub-dimension in science education indicates that the beliefs of preschool teachers in this sub-dimension are not as high as the other two sub-dimensions. However, when the averages taken from the items in the scale are examined, the item with the highest average in the scale is in this sub-dimension.

Preschool teachers got the lowest 53 points and the highest 85 points from the science education self-efficacy belief scale of preschool teachers. The mean score obtained from the scale is ( $\bar{X}=71,18$ ). As this point average

gets closer to the full score to be obtained from the scale, it shows that the pre-school teachers' science education self-efficacy beliefs are higher.

It was seen in the analyzes that the study group consisting of pre-school teachers did not differ significantly in all sub-dimensions of the scale and in general, according to the gender factor of science education self-efficacy belief. The fact that the environments are high in both genders indicates that the teachers' science education self-efficacy is high and that there is no differentiation in the gender factor. In the studies conducted with preschool teachers on this subject, it was concluded that self-efficacy beliefs about science activities in the preschool education program did not show a significant difference according to their gender (Koç & Sak, 2017; Gözüm, 2015). In studies conducted with pre-school teacher candidates, it was found that self-efficacy perceptions towards science education differ according to gender (Şeker & Çavuş, 2017; Balat, Akman & Günşen, 2018).

Pre-school education is carried out within the framework of the same program in kindergartens affiliated to primary school and independent kindergartens. However, considering the opportunities of the school and the environment, although the functioning of kindergartens and kindergartens may differ in providing children with the indicators included in the preschool program, it has been observed that preschool teachers working both in kindergartens within the primary school and in independent kindergartens do not differ significantly in the sub-dimensions of science education self-efficacy and the scores obtained from the overall scale. seen. Gözüm (2015), in her study with preschool teachers, found that teacher scores did not differ significantly for the school type variable in the science self-efficacy scale.

The place where the teachers work is an important criterion in determining the science education self-efficacy belief of the variable. The in-school and out-of-school education opportunities, the number of students, parent profiles, and related student readiness of teachers working in schools in provinces, districts, villages or towns differ from each other. When the science education self-efficacy beliefs were examined according to the pre-school teachers' workplace criteria, no significant difference was observed in the scores obtained from all sub-dimensions of the scale and the overall scale. According to the place of duty variable, it was observed that the mean scores of science education self-efficacy were very close and high in all three centers. In the study conducted by Gözüm (2015), the job location variable differed significantly in favor of the city center, while in another study (Uğraş, Uğraş, & Çil, 2013) in which the proficiency of preschool teachers in science activities was determined, it was concluded that the workplace variable did not significantly affect teachers' self-efficacy belief scores. has been reached.

While the variable of pre-school teachers' professional seniority created a significant difference in the belief sub-dimension scores of the science education self-efficacy belief scale's outcome expectation, there was no significant difference in the other sub-dimensions of the scale. According to the professional seniority variable of the preschool science education self-efficacy belief scale, it was observed that there was a significant difference between the teachers with 11-20 years of professional seniority and those with 6-10 years of professional seniority. This differentiation was in favor of teachers with professional seniority between 11-20 years. It is seen that the average of teachers who have a professional seniority of 21 years and above is high. Again, the fact that the average of the teachers with a professional seniority of 1 to 5 years is higher than the teachers with a professional seniority of 6-10 years and 21 years and above, suggests that this may be due to the fact that they have just taken science teaching courses in the undergraduate program. When we look at the literature, there are studies showing that the professional seniority variable of preschool teachers makes a significant difference in science education self-efficacy belief (Orkunoğlu, 2016; Uğraş, Uğraş & Çil, 2013), it is seen that the professional seniority variable of preschool teachers does not make a significant difference in science education self-efficacy belief. There are also studies on the subject (Gözüm, 2015; Koç & Sak, 2017).

This study revealed whether pre-school teachers' science education self-efficacy beliefs differ according to gender, school type, professional seniority and place of work. As a result of the research, it was seen that the self-efficacy belief scores of the teachers did not differ significantly according to the variables of gender, school type and place of work. In the variable of professional seniority, it was observed that there was a significant difference between teachers with professional seniority between 11-20 years and teachers with professional seniority between 6-10 years, and this differentiation was in favor of teachers with professional seniority between 11-20 years.

The high average of the answers given to the science education self-efficacy belief scale items of the preschool teachers indicates that the self-efficacy perceptions of the preschool teachers are high. In addition, the high mean scores obtained from the scale also support this situation.

In this study, significant differences were determined in accordance with the variables determined by the Preschool Teachers' Science Education Self-Efficacy Beliefs Scale. Findings to be obtained with different variables will provide diversity in the interpretation of the research.

It is thought that it would be appropriate to investigate the reasons why the science education self-efficacy beliefs of preschool teachers with a professional seniority of 6-10 years are lower than those with a professional seniority of 11-20 years, with qualitative research methods.

It is necessary for teachers to have at least basic knowledge about the field of science, to believe that they will frequently include them in their daily and monthly programs, to apply science activities in classroom or out-of-school environments, and to develop science education self-efficacy beliefs. For this reason, studies containing different sub-dimensions can be conducted to determine the science education self-efficacy beliefs of preschool teachers.

In order to determine the science education self-efficacy beliefs of preschool teachers in Turkey, the self-efficacy beliefs of preschool teachers across the country can be reached with samples from each region. This study, which is carried out in larger areas, will increase the reliability of the research. Data collected from across the country will reveal the quality of the science courses that teachers take in their undergraduate education and the quality of science teaching in performing the profession.

Studies can be conducted on how teachers' low or high science education self-efficacy beliefs affect the education process. In-service laboratory-supported applied training courses and seminars can be organized by science experts in order to increase their proficiency in science education for pre-school teachers. Research can be conducted to associate preschool teachers' science education self-efficacy with science education attitude. Studies can be conducted to reveal the relationship between pre-school teachers' science education self-efficacy, professional self-efficacy or different dependent variables.

#### **AUTHOR CONTRIBUTION (It is Compulsory to state for multiple authored articles)**

While the first author guided the introduction, method, data collection tools and analysis processes of the study, the second author carried out the analysis studies.

## ABSTRACT

Addiction is the state of being addicted to any activity, substance, object or behavior in a way that excludes other activities of one's life or causes physical, mental or social harm to oneself and others. In addition to many and various types of addiction, it seems that an important type of addiction is technology addiction. Today, the dizzying development of technological developments and their inclusion in every aspect of our lives has made it necessary for us to rethink the concepts of far and near. With the rapid development in mobile phone technology, the standard mobile phones used in the past to call someone or send a message to someone have been replaced by state-of-the-art smartphones that make our daily lives much easier. However, on the other hand, it is seen that addiction to smartphones, which have become an integral part of life, is on the rise, and this goes back to pre-school periods. In this context, the aim of the research was determined to examine whether the smartphone usage level of students studying in secondary and high schools affiliated to the National Education Directorate of Tunceli province Hozat district in the 2022-2023 academic year varies significantly according to some demographic characteristics of the students. Within the scope of quantitative research, the data of the research designed in the general survey model were collected by applying the "Smartphone Addiction Scale Short Form (ATBÖ-SF)", developed by Kwon et al. and adapted to Turkish by Noyan et al., face to face between May and June 2023. The scale, for which validity and reliability studies were conducted, was found to be suitable for the use of parametric tests, and in addition to test analyzes such as frequency, percentage, arithmetic mean, T Test and One-Way Variance Analysis were used to determine the significance of the difference using statistical data analysis techniques. As a result of the analysis, the average smartphone addiction level being below 3 was interpreted as the students not having smartphone addiction, but the measurements being just below the average indicating a risk factor, while the difference between the dependent and independent variables was not significant ( $p<.005$ ). According to the research findings, the smartphone addiction level of students at the lower limit of addiction carries a risk factor, in this respect the findings are warning, and it is recommended that parents, society, and especially schools and relevant institutions and organizations take precautions against the apparent danger.

**Keywords:** Smartphone, student, education, addiction, technology

## INTRODUCTION

In today's world, where progress in science and technology has reached incredible dimensions, social life is also seen to be keeping pace with this rapid change and transformation, much like the interconnected pieces of a puzzle. The dizzying pace of technological developments, and their inclusion in every aspect of our lives, has prompted a reevaluation of the concepts of distance and proximity (Gürkan et al., 2022). With the rapid advancements in mobile phone technology, the standard mobile phones, which were once used solely for calling or texting, have been replaced by state-of-the-art smartphones that greatly simplify daily life. Nowadays, tasks

<sup>1</sup> This article is derived from the master's thesis titled "Investigation of Smartphone Addiction Among Students: A District School Case Study," conducted in the Department of Political Science and Public Administration at Munzur University Institute of Graduate Education.

and processes that could only be performed with computers in the past can be easily carried out with smartphones (Çakır & Oğuz, 2017).

Smartphones offer numerous activities that simplify human life and have positive effects, such as easy access to desired data, data sharing, enhanced communication opportunities, listening to music, taking photos, using social media, making friends, playing online and offline games, accelerating banking transactions, and online shopping from websites (Şimşek & Zabun, 2019). However, alongside the expected conveniences that smartphones bring, especially as they are used for an increasing variety of purposes, a significant impact of their use manifests in the form of addiction. Research findings show that smartphones, which have found widespread use not only among different age groups but also among middle and high school students, have addictive effects. This has drawn attention to individuals at this educational level. In this context, the main theme of this study is to examine the level of smartphone addiction among students in the pre-university education stage.

### **Problem Statement**

Communication is the state in which living beings, especially humans, interact with each other by using visual and auditory symbols to convey their emotions, knowledge, and ideas. In other words, communication is the transmission of information, ideas, attitudes, or feelings from one person or group to another (or others) via symbols, as described by Bülbül (as cited in Çakır & Topçu, 2005, p.2). It is the process of assigning meaning to the message through the exchange of information between a source and a receiver via a channel. Communication, which was quite limited in ancient times, has reached a mass scale and an incredible speed due to advancements in science, technology, and technical tools. For example, communication, which in prehistoric times was carried out using a single method like smoke signals, reached its second method, cuneiform writing, around 3100–2500 BCE. Subsequently, in the 1st and 2nd centuries, it evolved to the use of courier letters, and by 2900–3500 BCE, pigeons were used for postal services. In the 17th century, communication witnessed tremendous development. Newspapers, which delivered daily information to the masses, came into play, significantly increasing both the scope and speed of communication, as well as the number of individuals engaged in the process.

Initially, books were a communication tool limited to a very small, elite group compared to newspapers. By 1784, postal carriages began to be included as carriers of information, news, etc. The invention and use of the telegraph between 1791-95 weakened the influence of postal carriages in the communication world while leading to another development. In the 1830s-40s, postage stamps were introduced into postal services. The laying of transcontinental cables became possible in the 1850s-60s, bringing communication to a transcontinental level (Barbier, 2001; Güneş, 2013:290). The telephone, invented in the 1870s, drastically shortened the time between the invention of the second, third, and fourth communication tools, serving as a harbinger of further developments. This new development became even more effective with the inclusion of radio in the process in the early 1900s, removing all barriers to the advancement of communication and communication tools.

By the 1920s, airmail was introduced, and in the 1960s, communication satellites were launched, allowing live broadcasts to be delivered to people through television. The early 20th century saw the introduction of the internet (with email enabling instant communication), and by the beginning of the 21st century, mobile communication and mobile phones (or smartphones) became part of mass use (Güneş, 2013:294). This led to an unprecedented speed and continuity in communication, bringing people from all over the world closer together and perfectly completing a crucial leg of globalization. In other words, while globalization was completed on the economic level, it was also achieved in terms of communication. However, the problem here is that the accessibility of communication tools, which was once insufficient for people, has now increased to the point where it has reached the level of addiction through mobile phones (Aydoğan, 2013; Baldini, 2000; Barbier, 2001; Toplu, 2008; Aymaz, 2018; Uslu, 2021).

Over the past fifteen years, the use of mobile devices during childhood has significantly increased in many countries (Rideout, Saphir, Pai, & Rudd, 2013). A recent study in the UK found that children now spend more time online than watching TV, with tablets and smartphones being the devices most frequently used by children to access the internet (Ofcom, 2016). Similar studies conducted in other countries suggest that more Asian children and adolescents are developing smartphone addiction (Çelik, 2020; Çelik & Ulusoy, 2019; Ektiricioglu et al., 2020; TÜİK, 2022), with a growing trend towards younger ages and an increasing rate of smartphone addiction among individuals in pre-university education. Given this situation, it becomes crucial to examine the causes and consequences of smartphone addiction across all educational levels nationwide, as well as to analyze it based on some demographic characteristics of students. This would help gather reliable data, which could assist decision-makers in taking timely and meaningful actions to mitigate potential negative impacts on children and adolescents.

### Research Purpose

The aim of this study is to examine the smartphone addiction levels of middle and high school students based on certain demographic characteristics and to develop recommendations in light of the findings. To achieve this, the following research questions were addressed:

1. What is the level of smartphone addiction among students?
2. Do students' smartphone addiction scale scores show a significant difference based on gender?
3. Do students' smartphone addiction scale scores show a significant difference based on school level?
4. Do students' smartphone addiction scale scores show a significant difference based on their parents' income levels?
5. Do students' smartphone addiction scale scores show a significant difference based on their parents' educational levels?
6. Do students' smartphone addiction scale scores show a significant difference based on their parents' occupations?

### METHOD

This section provides information on the research model, the population and sample, data collection methods, data collection tools, and data analysis.

### Research Model

This research was designed using the general survey model within the scope of quantitative research. The most fundamental principle of quantitative research is to express the findings in numerical terms, making them measurable, and to base the research on hypotheses, testing these hypotheses (Ekiz, 2003, p.93). Survey studies, which are widely used in social sciences and allow for large-scale analysis, typically describe the existing performance, views, thoughts, and attitudes of the target group, such as gender, age, and socioeconomic status, either individually or in relation to some factors (Büyüköztürk, 2014, p.2; Gurbetoğlu, 2018). According to Christensen and colleagues (2015, p.368), survey research aims to reveal changes over time or uncover the underlying aspects of a particular situation.

### Population and Sample

The population of the study consists of a total of 232 students enrolled in middle and high schools affiliated with the Hozat District Directorate of National Education in Tunceli during the 2022-2023 academic year. Among these students, 118 are in middle school and 114 are in high school (Table 1). Since it was possible to reach the entire population, no sampling method was used.

**Table 1. Data of Middle and High Schools from the Hozat District Directorate of National Education for the 2023-2024 Academic Year**

| School Type               | Number of Students | Number of teachers | Number of students |
|---------------------------|--------------------|--------------------|--------------------|
| Ercan Doğan Middle School | 118                | 19                 | 118                |
| Zübeyde Hanım High School | 114                | 11                 | 114                |
| Total                     | 232                | 30                 | 232                |

Despite the response rate of the administered scale being 82%, the number of scales that could be subjected to statistical analysis remained at 144. This represents 62% of the total participants. Accordingly, the personal characteristics of the 144 participants are presented in Tables 3.2, 3.3, 3.4, and 3.5.

**Table 2. Percentage and Frequency Distribution of the Personal Characteristics of Participants (N=144)**

| Variables           | Characteristics | Frequency (f) | Percentage (%) |
|---------------------|-----------------|---------------|----------------|
| Gender              | Female          | 73            | 50.7%          |
|                     | Male            | 71            | 49.3%          |
| School Type         | Middle School   | 62            | 43.1%          |
|                     | High School     | 82            | 56.9%          |
| Father's Occupation | Not Working     | 33            | 22.9%          |
|                     | Worker          | 77            | 53.5%          |
|                     | Civil Servant   | 25            | 17.4%          |
|                     | Retired         | 9             | 6.3%           |
| Mother's Occupation | Not Working     | 109           | 75.7%          |

|                     |               |     |       |
|---------------------|---------------|-----|-------|
|                     | Worker        | 20  | 13.9% |
|                     | Civil Servant | 15  | 10.4% |
|                     | Other         | 23  | 16.0% |
| Family Income Level | Medium        | 101 | 70.1% |
|                     | High          | 16  | 11.1% |
|                     | Very High     | 4   | 2.8%  |

Table 2 presents the percentage and frequency distribution of certain personal characteristics of the participants. As shown in the table, 50.7% of the participants are female, while 49.3% are male. Among them, 43.1% are middle school students, and 56.9% are high school students. When examining the occupations of their fathers, it can be noted that 22.9% of the fathers are not working, 53.5% are workers, 17.4% are civil servants, and 6.3% are retired. In terms of mothers' occupations, 75.7% of the mothers of the participating students are not working and are homemakers. Meanwhile, 13.9% are workers, and 10.4% are civil servants. According to the perceptions of income levels in Turkey, 16.0% of the participants perceive their families as having low income, 70.1% as having medium income, 11.1% as having high income, and 2.8% as having very high income.

The information regarding the responses to other questions included in the personal information form of the participants is provided below.

This includes the daily smartphone usage duration of the participants, the smartphone brands they use, and the level of impact smartphone usage has on their lives.

The percentage and frequency distribution regarding the daily smartphone usage duration, the smartphone brands used, and the level of impact on their lives is presented in Table 3.

**Table 3. Percentage and Frequency Distribution of Participants' Daily Smartphone Usage Duration, Smartphone Brand, and Impact Level on Their Lives**

| Variables                      | Characteristics   | N  | %    |
|--------------------------------|-------------------|----|------|
| Daily Usage Duration           | 0-2 Hours         | 60 | 41.7 |
|                                | 2-4 Hours         | 52 | 36.1 |
|                                | 4-6 Hours         | 22 | 15.3 |
|                                | 6-8 Hours         | 8  | 5.6  |
|                                | 8 Hours and Above | 2  | 1.4  |
| Smartphone Brand               | Apple             | 34 | 23.6 |
|                                | Samsung           | 58 | 40.3 |
|                                | Huawei            | 14 | 9.7  |
|                                | Other             | 38 | 26.4 |
| Impact of Smartphone on Life   | Not at all        | 23 | 16.0 |
|                                | Very little       | 39 | 27.1 |
|                                | Partially         | 53 | 36.8 |
|                                | It affects        | 23 | 16.0 |
|                                | It affects a lot  | 6  | 4.2  |
| Do You Think You Are Addicted? | Yes               | 16 | 11.1 |
|                                | No                | 78 | 54.2 |
|                                | Partially         | 44 | 30.6 |
|                                | No opinion        | 6  | 4.2  |

Table 3 shows the distribution of participants' daily smartphone usage time, the brands of smartphones they use, the extent to which smartphone usage affects their lives, and their opinions on whether they consider themselves smartphone addicts. According to Table 3, it can be seen that the participants use their smartphones for the most part between 0-2 hours a day, which accounts for 41% of the group. The second most common usage time is between 2-4 hours, with 36.1%. In third place, 15.3% use their smartphones for 4-6 hours a day, while 5.6% use them for 6-8 hours, and only 1.4% use them for 8 hours or more a day.

When asked about the brand of smartphone they use, the participants indicated that the highest percentage, 40.3%, use Samsung smartphones. Additionally, 26.4% reported using smartphones other than Apple, Samsung, and Huawei, while 23.6% use Apple and 9.7% use Huawei smartphones.

In response to the question of how much smartphones affect their lives, 36.8% of participants stated that smartphones affect them to some extent, 27.1% indicated that they affect them very little, 16.0% said they do not affect them at all, and 4.2% claimed that smartphones affect them very much.

Regarding whether the participants consider themselves smartphone addicts, 54.2% stated that they are not addicted, 30.6% said they are somewhat addicted, 11.1% said yes, they are addicted, and 4.2% did not express any opinion.

#### Participants' Purpose of Smartphone Usage

The percentage and frequency distribution of the participants' purpose of smartphone usage is presented in Table 4.

**Table 4. Percentage and frequency distribution of smartphone usage purposes**

| Variables                       | N   | %    |
|---------------------------------|-----|------|
| Social Networks                 | 83  | 57.6 |
| Talking                         | 50  | 34.7 |
| Browsing the Internet           | 48  | 33.3 |
| SMS                             | 105 | 72.9 |
| Educational Applications        | 51  | 35.4 |
| Checking Social Networks        | 54  | 37.5 |
| Playing Games                   | 61  | 42.4 |
| Listening to Music              | 38  | 26.4 |
| Making Calls                    | 51  | 35.4 |
| Checking Emails, Correspondence | 123 | 85.4 |
| Text Messaging                  | 109 | 75.7 |
| Watching TV/Movies              | 57  | 39.6 |
| Reading Books                   | 108 | 75.0 |
| Taking Photos                   | 55  | 38.2 |
| Checking News                   | 93  | 64.6 |
| Others (if any)                 | 130 | 90.3 |

Table 4 shows the percentage and frequency distribution of the purposes of smartphone usage. According to the examination of Table 4, it can be observed that students indicated they use smartphones primarily for listening to music, at a rate of **73.6%**. Additionally, **66.7%** reported using them for browsing the internet and **65.3%** for communication. The lowest usage purposes were found to be checking emails at **14.6%** and text messaging at **24.3%**. Information about the sample group is provided in the tables below.

#### The Most Used Type of Social Media Among Smartphone Users

The percentage and frequency distribution of the most used types of social media on smartphones is shown in Table 5.

**Table 5. Percentage and frequency distribution of the most used social media on smartphones.**

| Variable                                  | Feature        | N  | %    |
|---|----------------|----|------|
| The Most Used Social Media on Smartphones | Instagram      | 74 | 51.4 |
|   | WhatsApp       | 79 | 54.9 |
|   | Twitter        | 19 | 13.2 |
|   | Facebook       | 13 | 9.0  |
|   | YouTube        | 83 | 57.6 |
|   | Other (if any) | 16 | 11.1 |

Table 5 shows the percentage and frequency distribution of the social media tools most used by students on their smartphones. According to the table, YouTube ranks first with 57.6%, followed by WhatsApp in second place with 54.9%, and Instagram in third place with 51.4%. Twitter comes in fourth with 13.2%, while other social media networks rank fifth with 11.1%. Finally, Facebook is the least used, with 9.0%.

#### Data Collection

The data for this research was collected using the Short Form of the Smartphone Addiction Scale (ATBÖ-KF) in addition to a personal information form. The necessary permissions for the application of the scale were obtained based on the researcher's application dated 02/03/2023 with reference number 7377, according to the decision numbered 2023/06-06 of the Munzur University Non-Invasive Research Ethics Committee.

#### Information about the Short Form of the Smartphone Addiction Scale (ATBÖ-KF)

The long form of the smartphone addiction scale developed by Kwon et al. (2013) consists of 33 questions, while the short form designed for adolescents (the transition period from childhood to adulthood) contains 10 questions. The short form was adapted into Turkish by Noyan et al. (2015) and its validity and reliability were

tested among university students. It was shown to have a single-factor structure, and its sub-scales have not been defined. The calculated Cronbach alpha value is reported to be 0.867, indicating that it is valid and reliable for assessing smartphone addiction in young adults. The scale, consisting of 10 questions, is rated on a scale from 1 to 6. The ratings are as follows: 1 – Strongly disagree, 2 – Disagree, 3 – Slightly disagree, 4 – Slightly agree, 5 – Agree, 6 – Strongly agree. The scale demonstrates a one-factor structure, and scores range from 10 to 60. As the score obtained from the scale increases, the risk of smartphone addiction also increases. According to a standardization study, if a student's total score from the scale is below 29.50, they are not considered a smartphone addict, while a score above 29.50 indicates smartphone addiction.

Validity and Reliability Analyses of the Short Form of the Smartphone Addiction Scale (ATBÖ-KF) Used in the Research

### Reliability Analysis of the Short Form of the Smartphone Addiction Scale (ATBÖ-KF)

The reliability of the scales used in the research indicates how accurately the scales measure the behaviors we aim to assess in the participants (Kurtuluş, 2006:374). In measuring the reliability of the questions in the questionnaire evaluated in this study, the Alpha Value (Cronbach Alpha) and item-total correlation values were used. According to some researchers (Büyüköztürk, 2004, 165), an alpha coefficient greater than 0.70 indicates a high reliability scale, while others (Kalaycı et al., 2006, 403) suggest that a value of 0.60 and above in social sciences also indicates a scale of high reliability.

**Table 6. Alpha coefficient values of the Short Form of the Smartphone Addiction Scale (ATBÖ-KF)**

|  | □ Scale Mean (when the item is removed) | □ Scale Mean (when the item is removed) | □ Scale Mean (when the item is removed) | □ Scale Mean (when the item is removed) |
|--|---|---|---|---|
| S 1  | 23,02                                   | 101,265                                 | ,639                                    | ,891                                    |
| S 2  | 23,25                                   | 100,399                                 | ,655                                    | ,890                                    |
| S 3  | 22,92                                   | 99,679                                  | ,646                                    | ,891                                    |
| S 4  | 22,63                                   | 95,143                                  | ,701                                    | ,887                                    |
| S 5  | 23,06                                   | 96,458                                  | ,731                                    | ,885                                    |
| S 6  | 23,17                                   | 101,263                                 | ,607                                    | ,893                                    |
| S 7  | 23,11                                   | 99,680                                  | ,670                                    | ,889                                    |
| S 8  | 23,42                                   | 103,085                                 | ,547                                    | ,897                                    |
| S 9  | 22,72                                   | 96,079                                  | ,710                                    | ,886                                    |
| S 10                                       | 22,63                                   | 98,290                                  | ,607                                    | ,894                                    |
| N= 144 (α) = 0.900 Number of Variable = 10 |   |   |   |   |

### Internal Consistency and Reliability of the “Smartphone Addiction Scale-Short Form” (SAS-SF)

The internal consistency and reliability of the 10-item "Smartphone Addiction Scale-Short Form" (SAS-SF) were first assessed by looking at the alpha coefficient values. Previous research has reported the Cronbach's alpha coefficient for the SAS-SF as 0.90. For this study, the  $\alpha$  value of the scale was calculated to be 0.900. According to the obtained alpha ( $\alpha$  - Cronbach's Alpha) coefficient, the scale has a very high reliability (Table 6).

To test the reliability of the scale, in addition to the alpha value, the total score correlation values of the scale were also examined (Şencan, 2005, 257-62; Büyüköztürk, 2004, 165). This value should be greater than 0.30. As seen in Table 6, no value below 0.54 is observed. Therefore, according to the item-total score correlation values, the questionnaire is reliable.

### Validity Analysis of the Smartphone Addiction Scale-Short Form (SAS-SF)

The long form of the smartphone addiction scale developed by Kwon et al. (2013) consists of 33 questions, while the short form developed for adolescents (the transitional period from childhood to adulthood) consists of 10 questions. The short form has been adapted into Turkish by Noyan et al. (2015) in Turkey, and its validity and reliability have been studied among university students. It has been shown to have a single-factor structure, and no subscale has been defined. The calculated Cronbach alpha value is reported as 0.867, indicating that it is valid and reliable for assessing smartphone addiction in young adults. The scale, consisting of 10 questions, is scored on a scale from 1 to 6. The scoring is as follows: 1 - Strongly Disagree, 2 - Disagree, 3 - Somewhat Disagree, 4 - Somewhat Agree, 6 - Strongly Agree. In the interpretation of the findings, as the score obtained from the scale increases, the risk of smartphone addiction also increases; according to the standard-setting study conducted, if a student's total score from the scale is below 29.50, they are not considered a smartphone addict, while a score

above 29.50 indicates smartphone addiction. In other words, the cutoff score of the scale has been obtained as 29.50, regardless of gender. Participants scoring below this value are not assessed as smartphone addicts, while those with higher scores are considered to be smartphone addicts.

### Factor Analysis for the Scale's Validity

Factor analysis was conducted to assess the validity of the scale. To determine whether the data collected from respondents are suitable for factor analysis, KMO (Kaiser-Meyer-Olkin) and Bartlett tests were applied. The KMO value should be above 0.5, and the Bartlett test should yield significant results (Kalaycı et al., 2006:321-322). Additionally, it is preferred that the factor loadings for the items found through factor analysis be 0.40 or higher (Büyükoztürk, 2004).

As a result of the factor analysis, the Kaiser-Meyer-Olkin (KMO) value for the Smartphone Addiction Scale-Short Form (SAS-SF) was found to be 0.910. A KMO value above 0.50 indicates that the scale is suitable for factor analysis (Büyükoztürk, 2004).

Secondly, the Bartlett test values were examined regarding the factor analysis. The significance value of the "Smartphone Addiction Scale" question list was found to be significant ( $p = 0.000 < 0.01$ ;  $\chi^2 = 658.252$ ). Furthermore, the 10 statements included in the smartphone addiction scale explain 52.950% of the total variance, indicating that it is unifactorial.

### Analysis of the Data

For the analysis of the data, statistical test techniques were applied, and the normal distribution was checked using Skewness and Kurtosis values, both of which were found to be between -1.00 and +1.00. Considering that the Skewness (.683) and Kurtosis (-.109) values are referenced for normal distribution of scale scores in social sciences, it can be concluded that the scale scores of the "Smartphone Addiction Scale-Short Form" demonstrate normal distribution.

### FINDINGS

In this section of the study, the findings related to the research problem and sub-problems are presented.

What is the level of smartphone addiction among students?

The first sub-problem of the research is stated as "What is the level of smartphone addiction among students?"

The total scores, mean, and standard deviation values obtained from the scale are presented in Table 7.

**Table 7. Students' Participation Levels in the Smartphone Addiction Scale**

| Measure              | Min. | Max. | Mean Participation Level ( $\bar{x}$ ) | Standard Deviation |
|----------------------|------|------|--|--------------------|
| Smartphone Addiction | 10   | 55   | 25.54                                  | 1.1                |

### Participants' Responses to the Smartphone Addiction Scale

Participants demonstrated a mean participation level of  $\bar{X} = 25.54$  in the "Smartphone Addiction" scale, indicating a near-moderate level of engagement. In other words, since the students' smartphone addiction levels remained below  $\bar{X} = 29.50$ , it can be interpreted that they are not considered smartphone addicts.

The levels of agreement regarding the statements included in the scale are presented in Table 8.

| Scale                | Statements   | Average Participation Level ( $\bar{x}$ ) | Standard Deviation |
|----------------------|--|---|--------------------|
| Smartphone Addiction | 1. I cannot keep up with the tasks I planned because of smartphone use.  | 25.3                                      | 1.38               |
|                      | 2. I have difficulty concentrating while doing assignments or listening to lessons in class due to smartphone use. | 23.0                                      | 1.42               |
|                      | 3. I feel pain in my wrists or neck when using my smartphone.  | 26.3                                      | 1.48               |
|                      | 4. I cannot live without my smartphone.  | 29.2                                      | 1.68               |
|                      | 5. I feel impatient and irritable when I do not have my smartphone in my hand.                                     | 24.9                                      | 1.54               |
|                      | 6. Even if I don't use it, my smartphone is always on my mind.   | 23.8                                      | 1.44               |
|                      | 7. Even if my daily life is greatly affected, I will never stop using my smartphone.                               | 24.4                                      | 1.44               |
|                      | 8. I constantly check my smartphone to avoid missing conversations among other people on Twitter or Facebook.      | 21.2                                      | 1.43               |
|                      | 9. I use my smartphone for longer than I think.  | 28.3                                      | 1.60               |
|                      | 10. People around me say that I use my smartphone too much.  | 29.2                                      | 1.66               |

Table 8: When examining the levels of participation in the smartphone addiction scale, the highest participation was observed for the statements "People around me say that I use my smartphone too much" (M: 29.2) and "I can't live without my smartphone" (M: 29.2). Additionally, high levels of participation were noted in the statements "I use my smartphone longer than I think" (M: 28.3), "I feel pain in my wrists or neck when using my smartphone" (M: 26.3), and "I can't complete my planned tasks because of smartphone use" (M: 25.3). According to the calculations made for all statements, the addiction score is below  $M = 29.50$ ; therefore, they appear to have a lower level of addiction. However, it should be noted that the level of smartphone addiction is close to the midpoint, suggesting that there may be a risk of addiction.

**Do the smartphone addiction scale scores of students show a significant difference based on gender? Findings related to the sub-problem statement:**

The second sub-problem statement of the study is expressed as "Do the smartphone addiction scale scores of students show a significant difference based on gender?" The total scores, means, and standard deviation values obtained from the scale are presented in Table 9.

**Table 9: Smartphone addiction scores of students based on gender - Test results**

| Scale                | n  | $\bar{x}$ | ss    | Levene Test |      | t Test |       |      |
|----------------------|----|-----------|-------|-------------|------|--------|-------|------|
|                      |    |           |       | F           | p    | sd     | t     | p    |
| Smartphone addiction |    |           |       |             |      |        |       |      |

*Independent Samples t-Test, \* $<0,05$ , \*\* $<0,01$*

To determine whether there is a significant difference in the perceptions of "Smartphone Addiction" based on the gender of the participants, the results of an independent samples t-test indicated that no statistically significant difference was found in students' perceptions of smartphone addiction according to their gender (t: -0.469; p: 0.640 > 0.05). This finding can be interpreted as indicating that there is no significant relationship between smartphone addiction and gender.

Do students' smartphone addiction scale scores show a significant difference according to school levels? Findings related to the sub-objective sentence

The third sub-objective problem statement of the research is expressed as "Do students' smartphone addiction scale scores show a significant difference according to school levels?" The total score, mean, and standard deviation values obtained from the scale are presented in Table 10.

**Table 10. Differences in students' smartphone addiction based on school types**

| Scale                | n  | $\bar{x}$ | ss    | Levene Test |      | t Test |        |        |
|----------------------|----|-----------|-------|-------------|------|--------|--------|--------|
|                      |    |           |       | F           | p    | sd     | t      | p      |
| Smartphone addiction |    |           |       |             |      |        |        |        |
| Secondary School     | 62 | 22,67     | 10,00 | 4,410       | ,038 | 142    | -2,787 | ,006** |
| High School          | 82 | 27,71     | 11,28 |             |      |        |        |        |

*IndependentSamples t-Test, \* $<0,05$ , \*\* $<0,01$*

To determine whether there is a significant difference in the perceptions of "Smartphone Addiction" based on the type of school variable among the participants, the results of an independent samples t-test showed that a statistically significant difference was found in students' perceptions of smartphone addiction according to their school types (t: -2.787; p: 0.006 < 0.01). Accordingly, students studying at the high school level have higher levels of smartphone addiction (M: 27.71) compared to those studying at the middle school level (M: 22.67).

Findings Related to the Sub-objective Sentence on the Differences in Smartphone Addiction Based on Class Levels

The fourth sub-objective problem statement of the research is expressed as "Do students' smartphone addiction scale scores show a significant difference according to class levels?" The total score, mean, and standard deviation values obtained from the scale are presented in Table 11.

**Table 11. One-way ANOVA results of students' smartphone addiction based on class levels**

| Dimensions           | n   | $\bar{x}$ | Stand Dev | Variance. | Total Squares | sd  | Mean Squares | F     | p     | LSD |
|----------------------|-----|-----------|-----------|-----------|---------------|-----|--------------|-------|-------|-----|
| Smartphone Addiction |     |           |           |           |               |     |              |       |       |     |
| 1. 1.st class        | 26  | 26,23     | 10,15     | Between   |               |     |              |       |       |     |
| 2. 2nd. class        | 32  | 20,43     | 8,65      | Groups    | 1107,494      | 3   | 369,165      | 3,190 | ,026* | 2-1 |
| 3. 3rd.class         | 49  | 27,57     | 11,81     | Within    | 16202,166     | 140 | 115,730      |       |       | 2-3 |
| 4. 4th. class        | 37  | 26,81     | 11,30     | gr. Total | 17309,660     | 143 |              |       |       | 2-4 |
| Total                | 144 | 25,54     | 11,00     |           |               |     |              |       |       |     |

*One Way ANOVA, \* $<0,05$ , \*\* $<0,01$*

To determine whether there is a significant difference in the perceptions of "Smartphone Addiction" based on the class level variable among the participants, the results of the one-way ANOVA analysis indicated that a statistically significant difference was found in students' perceptions of smartphone addiction according to their class levels (F: 3.190; p: 0.026 < 0.05). The difference found is significant in favor of 2nd-grade students. Accordingly, the smartphone addiction levels of 2nd-grade students were found to be lower than those of students in other grades.

Findings Related to the Sub-objective Sentence on Differences in Smartphone Addiction Scale Scores According to Parents' Income Levels

The fifth sub-problem of the research is expressed as "Do students' smartphone addiction scale scores show a significant difference according to their parents' income levels?" The total score, mean, and standard deviation values obtained from the scale are presented in Table 12.

**Table 12. One-way ANOVA results of students' smartphone addiction based on family income levels**

| Dimensions           | n   | $\bar{x}$ | Stand Dev | Variance. | Total Squares | sd  | Mean Squares | F     | p    | LSD |

| Smartphone Addiction |     |           |           |           |               |     |              |       |      |     |
| 1. None              | 23  | 29,21     | 11,02     | Between   |               |     |              |       |      |     |
| 2. Moderata          | 101 | 24,60     | 11,21     | Groups    | 675,901       | 3   | 225,300      | 1,896 | ,133 |     |
| 3 Very much          | 16  | 27,93     | 9,08      | Within    | 16633,759     | 140 | 118,813      |       |      |     |
| 4. Quite a lot       | 4   | 18,75     | 6,80      | gr. Total | 17309,660     | 143 |              |       |      |     |
| Total                | 144 | 25,54     | 11,00     |           |               |     |              |       |      |     |

*One Way ANOVA, \* $<0,05$ , \*\* $<0,01$*

To determine whether there is a significant difference in the perceptions of "Smartphone Addiction" based on the family income levels of the participants, the results of the one-way ANOVA analysis indicated that no statistically significant difference was found in students' perceptions of smartphone addiction according to their family income levels (F: 1.896; p: 0.133 > 0.05).

Findings Related to the Sub-objective Sentence on the Significant Differences in Smartphone Addiction Scale Scores According to Parents' Occupations

The sixth sub-problem of the research is expressed as "Do students' smartphone addiction scale scores show a significant difference according to their parents' occupations?" The total score, mean, and standard deviation values obtained from the scale for fathers' occupations are presented in Table 13.

**Table 13. One-way ANOVA results of students' smartphone addiction based on fathers' occupations**

| Dimensions           | n   | $\bar{x}$ | Stand Dev | Variance.  | Total Squares | sd  | Mean Squares | F     | p    | LSD |
|----------------------|-----|-----------|-----------|------------|---------------|-----|--------------|-------|------|-----|
| Smartphone Addiction |     |           |           |            |               |     |              |       |      |     |
| Unemployed           | 33  | 28,48     | 10,57     | Between    |               |     |              |       |      |     |
| Worker               | 77  | 24,89     | 11,21     | Groups     | 432,533       | 3   | 144,178      | 1,196 | ,314 |     |
| Civil Servant        | 25  | 23,44     | 10,88     | Within gr. | 16877,127     | 140 | 120,551      |       |      |     |
| Retired              | 9   | 26,22     | 10,59     | Total      | 17309,660     | 143 |              |       |      |     |
| Total                | 144 | 25,54     | 11,00     |            |               |     |              |       |      |     |

*One Way ANOVA, \* $<0,05$ , \*\* $<0,01$*

To determine whether there is a significant difference in the perceptions of "Smartphone Addiction" based on the occupations of the fathers of the participants, the results of the one-way ANOVA analysis indicated that no

statistically significant difference was found in students' perceptions of smartphone addiction according to their fathers' occupations ( $F: 1.196; p: 0.314 > 0.05$ ).

Findings Related to the Sub-objective Sentence on the Differences in Students' Smartphone Addiction According to Their Mothers' Occupations

The seventh sub-problem of the research is expressed as "Do students' smartphone addiction scale scores show a significant difference according to their parents' education levels?" The total score, mean, and standard deviation values obtained from the scale for mothers' occupations are presented in Table 14.

**Table 14. One-way ANOVA results of students' smartphone addiction based on mothers' occupations**

| Dimensions           | n   | $\bar{x}$ | Stand Dev | Variance.      | Total Squares | sd  | Mean Squares | F    | p    | LSD |
|----------------------|-----|-----------|-----------|----------------|---------------|-----|--------------|------|------|-----|
| Smartphone Addiction |     |           |           |                |               |     |              |      |      |     |
| 1. Not working       | 109 | 25,85     | 10,85     | Between Groups | 192,808       | 2   | 96,404       | ,794 | ,454 |     |
| 2. Worker            | 20  | 22,80     | 9,49      |                | 17116,851     | 141 |              |      |      |     |
| 3. Officer           | 15  | 27,00     | 13,85     | Within gr.     | 17309,660     | 143 |              |      |      |     |
| Total                | 144 | 25,54     | 11,00     | Total          |               |     |              |      |      |     |

*One Way ANOVA, \* $<0,05$ , \*\* $<0,01$*

According to the results, no statistically significant difference was found in the perception of smartphone addiction among students based on their mothers' occupations ( $F: 0.794; p: 0.454 > 0.05$ ).

## CONCLUSION

In the literature, addiction was previously understood as substance addiction, but recently, its scope has expanded, and research is now focusing on a new type of addiction (Yılmaz et al., 2020). This type of addiction, expressed as behavioral addictions unrelated to substances, involves "repetitive impulses to behave harmfully" (Marks, 1990), and despite the harm it causes to one's life, it is characterized by an uncontrollable desire to exhibit certain behaviors and engage in repeated pleasure-inducing behavioral patterns (Black, 2013; Mann et al., 2017). This addiction manifests itself not in dependence on a substance but in the addiction to a behavior or the feelings experienced when the behavior is performed (Alavi et al., 2011). On the other hand, behavioral addiction also involves excessive behavior accompanied by core addiction symptoms such as tolerance, withdrawal, loss of control, craving, cognitive salience, and mood regulation (Kwon et al., 2013).

This type of addiction is essentially digital addiction, encompassing smartphone addiction, internet addiction, screen addiction, social media addiction, digital game addiction, and an intense desire for various digital media tools (Dilci et al., 2019). People's addictions to technology are being investigated under the titles of internet addiction, technological addiction, computer addiction, virtual game addiction, Facebook addiction, digital game addiction, social media addiction, and importantly, smartphone addiction. In this context, the present research examined the relationship between smartphone addiction and certain demographic variables among adolescents in middle and high school. The World Health Organization (WHO) defines adolescence as the period between 10-19 years, youth as the period between 15-24 years, and those aged 10-24 as young people, while considering these age groups within adolescent health (WHO, 2020). Accordingly, individuals in middle and high school can be considered adolescents.

The data for this research, designed within the general survey model as part of a quantitative study, were collected through the Smartphone Addiction Short Form (SAS-SF). Since the scale scores were normally distributed, parametric test techniques were used to analyze the data. The findings revealed that the level of smartphone addiction among middle and high school students in the central district schools of Hozat was slightly below the level posing a risk ( $\bar{X}=2.59$ ). One of the similar findings in the literature was made by Akyürek (2020) on high school students. According to this research, although the average score was slightly below the midpoint ( $\bar{X}=2.44$ ), it was still considered significant enough to conclude that high school students were addicted to smartphones. It can be said that the findings of this research align with those of similar studies in the literature. For instance, Mazılı and Gültekin (2020) found that the majority of adolescents had a level of addiction slightly below the risk threshold. Similarly, Aljomaa, Qudah, Albursan, Bakhiet, and Abduljabbar (2016) reported similar findings in their study on high school students. A study by Çalışkan, Yalçın, Aydın, and Ayık (2017) also found that prospective teachers had a smartphone addiction level close to moderate. In Bağcı's (2018) research, it was found that the students participating in the study had moderate levels of smartphone addiction. A study by Sırakaya (2018) found that associate degree students' smartphone use was at a moderate level. Durak and Seferoğlu (2018) aimed to examine the smartphone usage and addiction levels of 5th and 6th-grade middle school students based on certain demographic variables. According to the results, most students used smartphones mainly for gaming, and more than half of the students were classified as "addicted." Çakır and Oğuz's (2017) study involved 540 high school students. The results revealed that high school students had moderate levels of smartphone addiction and loneliness. Similarly, research by Chen, Liu, Ding, Ying, Wang,

and Wen (2017) on smartphone addiction among medical students found that the smartphone addiction rate was 29.3% for women and 30.3% for men, with an overall rate of 29.3%. According to Kwon et al. (2013), students exhibited high levels of smartphone addiction. In a study by Haug, Castro, Kwon, Filler, Kowatsch, and Schaub (2015), 16.9% (256) of students were found to be smartphone addicts. The study by Kahyaoğlu Süt, Kurt, Uzal, and Özdilek (2016) found that university students used their smartphones at high rates, while Mert and Özdemir's (2018) research found that the average smartphone usage rate among participants was above average ( $\bar{X}=3.19$ ).

These findings indicate that secondary school students are at a borderline risk of smartphone addiction, and if preventive measures are not taken, it is inevitable that they will exceed the risk threshold and reach a level of behavioral addiction. This, in turn, is likely to lead to undesirable situations and events reflected in society due to the negative impact on the individual's life.

In conclusion, considering the fact that individuals and society cannot remove digital tools from their lives and instead must use them as a significant necessity, solutions must be developed. These solutions should be implemented at the international and national levels, involving all levels of society, including families, parents, schools, teachers, civil society organizations, and especially the media, which should be equipped with the necessary knowledge and resources on this matter.

azmiye.yinal@aku.edu.tr

## ABSTRACT

In this study, the effect of environmental stressors perceived by patients hospitalized in the internal medicine intensive care unit on sleep quality was examined. The study is a quantitative research and was conducted with relational survey model. The population of the study consisted of 500 patients hospitalized in the internal medicine intensive care unit in private and public hospitals in TRNC. The sample consisted of 266 patients who volunteered to participate in the study. At the end of the study, it was seen that the highest sub-dimension score was the habitual sleep efficiency score in the PDQI sub-dimension scores of the patients, while the lowest PDQI sub-dimension score was determined as the subjective sleep quality sub-dimension score. A strong negative correlation was found between the total ICUOSQ scores of the patients and the total scores of the PDQI. According to this situation; it can be said that the total scores of PDQI also increased with the increase in the ICUWQ scores of the patients. A strong negative correlation was detected between the total ICUPSQ scores of the patients and the total scores of the sleep disturbance sub-dimension. According to this situation; as the ICUWSS scores of the patients increase, the total scores of the sleep disorder sub-dimension decreases. When the stressors perceived most by the patients were analyzed, it was observed that the factors "men and women staying in the same room" and "seeing family and friends for a few minutes a day" were higher than the other factors.

**Keywords:** Internal medicine, intensive care, patient, sleep quality, environmental factors.

## INTRODUCTION

Environmental stressors encountered by patients in internal medicine intensive care units and the deterioration in sleep quality due to these stressors is a very broad field of research. Intensive care units can be a stressful environment due to the difficult treatment processes patients experience. In this environment, patients may encounter a variety of stressors, such as high sound levels, intense lighting, frequent monitor checks, noise from medical devices, and frequent interventions. The effects of these factors on sleep quality may vary. For example, some patients may find these factors disruptive and affect their sleep, while for others these factors may be relaxing and help them fall asleep more easily. Research shows that various interventions are effective to improve sleep quality in intensive care units. These interventions may include reducing light levels in rooms, reducing noise levels, providing the most comfortable beds and pillows possible, monitoring patients' sleep regularly, and pharmacological treatments such as sleeping pills. However, since each patient's stress coping mechanisms are different, more research is needed on the effect of environmental stressors on patients' sleep quality. These studies may help develop more personalized treatments to improve patients' ability to manage stress and provide better sleep quality.

### 1.1. Problem

Internal medicine intensive care unit is a unit located among medical units where patients dealing with serious or life-threatening internal medicine diseases receive intensive care services. Internal medicine is also known as internal medicine and covers dysfunctions of body systems and various internal organ diseases ( Gencer and Kumsar , 2020) . Internal medicine intensive care units generally treat cases requiring intensive care related to internal medicine diseases such as emergencies, serious infections, respiratory problems, heart diseases, and kidney failure. These units are equipped with advanced technology and expert personnel to respond to the intense follow-up and monitoring needs of patients. Necessary treatments and interventions to support patients' vital functions such as respiration, circulation and kidney functions are applied in the intensive care unit ( Kucukardali et al., 2007) .

Internal medicine intensive care units are units that provide temporary service to manage life-threatening situations of patients, ensure stabilization and refer them to other specialties. During the intensive care process, it is aimed to improve and stabilize the medical conditions of patients ( Demir et al., 2016) .

Perceived environmental stressors are elements created by factors or situations in individuals' environment that lead to a stress response. Environmental factors that may cause each individual's stress response may be different, because everyone's level of stress perception and tolerance is different ( Bodur and Aslan, 2020) . Perceived environmental stressors can span many different areas. For example, perceived stressors may include excessive workload at work, constant calendar pressure, or negative relationships in the work environment. In addition, heavy traffic, a noisy environment, crowded environments, financial difficulties, family or relationship problems can also cause a stress response in individuals ( Akyüz, 2021) . Perceived environmental stressors can affect individuals' mental, emotional, and physical health. A person with high stress levels may experience symptoms such as sleep problems, difficulty concentrating, anxiety , depression, digestive problems, and headaches. Therefore, reducing stress factors or improving stress coping skills is important for individuals to live a healthy life ( Şahin and Köçkar , 2018) .

Sleep quality refers to how deep, restful and restorative sleep an individual receives during the sleep period. Sleep quality is as important a factor as sleep duration, because having sufficient sleep time is as important as the depth experienced during sleep, the regularity of sleep structure, and the feeling of rest after waking up ( Aysan et al., 2014) . There are many factors that affect sleep quality, for example, factors such as sleep environment, sleep patterns, stress level, physical activity level, eating habits and sleep disorders can affect sleep quality. To improve sleep quality, it is important to create a suitable sleep environment, establish a regular sleep routine, manage stress and pay attention to healthy life habits ( Güneş et al., 2009) .

Perceived environmental stressors affect the sleep of patients in the internal medicine intensive care unit. It may negatively affect its quality. The hospital environment and the nature of the disease can be a stress factor for patients. Based on this situation, the problem statement of the study is "What is the effect of environmental stressors perceived by patients in the internal medicine intensive care unit on sleep quality?" was determined as .

## 1.2. Aim

study is to examine the environmental stressors perceived by patients in the internal medicine intensive care unit and the effects of these stressors on sleep quality.

### 1.2.1. Hypotheses

The research hypotheses are given below:

H1: There is a statistically significant difference in the demographic characteristics of the patients and the YBUCSS and PQQI values .

H2 : Patients are intensely care to the unit after going to bed later sleep There is a statistically significant difference in YBUCSS and PSQI values due to changes in the order .

H3 : There is a statistically positive correlation between the patients' total YBUCSS value and PSQI total and subscale values.

H 4 : There is a statistically negative correlation between the patients' total YBUCSS value and PSQI total and subscale values.

### 1.2.2. Assumptions

The research assumptions are as follows;

- It was assumed that the method preferred in the research was suitable for the purpose of the study.
- It was assumed that the scales and questions chosen to collect data were reliable and valid.
- It was assumed that the data obtained was valid and reliable.

### 1.2.3. Limitations

This research; It is limited to patients who have been hospitalized at least once in the internal medicine intensive care units of public/private hospitals in the Turkish Republic of Northern Cyprus (TRNC).

Questions regarding the sources and scale used in this research were limited to the participants to whom the survey was applied.

### 1.2.4. Definitions

**Internal medicine intensive care unit:** It is a health unit established to meet the intensive care needs of patients with serious illnesses or in need of vital support functions in the internal medicine department of the hospital. The internal medicine department is a department that is managed by doctors specialized in general medicine and deals with internal diseases ( Hintistan et al., 2009).

**Perceived environmental stressors:** They are elements created by factors or situations in individuals' environments that cause a stress response ( Aktaş et al., 2015) .

**Sleep quality:** It refers to how deep, restful and refreshing sleep an individual gets during his sleep ( Karakaş et al., 2017) .

### 1.3. Importance of the Study

Environmental stressors encountered by patients in the internal medicine intensive care unit negatively affect their sleep quality. Sleep quality is very important in determining the recovery process of patients. A good sleep quality is necessary for the body to renew itself, strengthen the immune system, regain energy and improve mental health. Lack of sleep or poor quality sleep can negatively impact patients' recovery process and increase the risk of complications. Perceived environmental stressors can trigger physiological and psychological stress responses in patients. Factors such as noise, light, uninterrupted care and interventions, and changes in level of consciousness can disrupt sleep patterns and reduce sleep quality. This can cause patients to experience problems such as feeling inadequately rested , insomnia, restlessness, anxiety and even depression when they wake up. Improving the sleep quality of patients in the internal medicine intensive care unit is important to accelerate the recovery process and reduce the risk of complications. Being aware of environmental stressors that affect sleep quality and taking appropriate measures to reduce or manage these stressors can ensure that patients have a comfortable and restful sleep experience. This can support the healing process, improve patients' health and shorten hospital stays. In summary, perceived environmental stressors may affect the recovery process, health status, and length of hospital stay of patients in the intensive care unit. Improving sleep quality can make a positive contribution to treatment by allowing patients to rest better.

## 2. CONCEPTUAL FRAMEWORK

### 2.1. ICU Definition and Scope

ICU, critical or important \_ health problems the one which... patients closely follow-up by busy medical of care is provided One health is the unit . ICUs , patients life threatening who makes with their situation start over exit , organ functions to support And vital functions to continue for special equipment And expert health staff with is equipped . In ICUs , serious trauma , surgery interventions , intensive care requiring diseases , respiratory difficulty , multiple organ failure , heart crisis , paralysis like situations like various critical with situations start over can be exited . In these units patients , constantly monitored , medication treatments , respiratory support , blood transfusion , nutrition support like important medical procedures is applied ( Stone , 2022).

Busy Care units , usually high to technology owner medical with devices is equipped . These devices between monitors ( heart rhythm , blood pressure , breathing rate , oxygen Level like parameters follow-up ventilators ( breathing \_ \_ support enteral or parenteral nutrition \_ systems , dialysis machines heart \_ monitors And defibrillators like devices is found . Busy Care Units , specialist doctors , nurses , busy care technicians And other health staff by is managed . These personnel are critical with situations start over to leave And patients vital functions to support for special education has received . Busy Care units , patients their lives save , heal to ensure And health your problems -most member download for critical One role play . In these units busy care services , patients to their situation according to is individualized And tight One approach requires ( Karakaş et al., 2017).

### 2.2. Environmental Stressors Perceived by Patients in the Intensive Care Unit

Environmental stressors perceived by patients in the internal medicine intensive care unit can generally be defined as the challenging factors that patients encounter in this special care environment. These stressors can affect patients' psychological and emotional well-being, as well as medical factors that have an impact on their physical health. Some of the potential environmental stressors perceived by patients in this type of intensive care setting include:

- **Insomnia:** Factors such as constant monitoring, medical interventions, and noise in intensive care units can negatively affect patients' sleep patterns (Devlin, 2018) .
- **Noise:** Noise created by monitors, alarm systems, medical equipment, and other patients' voices can make it difficult for patients to rest and increase their overall stress level ( Kabeoğlu and Gul, 2021) .
- **Lack of Privacy:** Since patients are frequently under medical supervision during the intensive care unit, they may have difficulty protecting their personal privacy. This situation may create psychological discomfort ( Ülker , 2020 ) .
- **Presence of Pain:** Pain during intensive care treatment can negatively affect the comfort and general well-being of patients ( Tavşanlı And Akgün , 2021) .
- **Mechanical Ventilation and Oxygen Therapy:** Respirators and oxygen therapy can help patients cope with breathing difficulties, but these devices can sometimes cause discomfort ( Kabeoğlu and Gul, 2021; Tavşanlı and Akgün , 2021) .
- **Ambient Humidity, Temperature and Lights Always On:** Inappropriate humidity and temperature levels can reduce the comfort of patients. Constantly on lights can also disrupt patients' sleep patterns ( Kabeoğlu and Gül, 2021).

- No Visitation: Visiting limitations can help patients focus, but can also leave patients feeling deprived of emotional support ( Demirtürk And Demirbağ , 2021) .

These factors are important environmental factors that affect patients' experiences during the intensive care process. Health professionals should strive to understand patients' strategies for coping with these stressors and, if possible, to improve environmental conditions.

### 2.3. Definition and Scope of Sleep

Sleep is a state in which an organism's consciousness, and often physical activity, temporarily decreases. Sleep is a biological rhythm that repeats at regular intervals and generally has the function of resting, regenerating and providing physical-spiritual balance. Sleep plays an important role in regulating various biological processes and affects overall health and well-being ( Xie et al., 2013) .

The basic features of sleep are as follows ( Özdal and Uğurlu, 2016):

- Decrease in Consciousness and Physical Activity: Consciousness often decreases or disappears during sleep. At the same time, physical activity and reactions slow down noticeably.
- Change of Biological Rhythms: Sleep occurs as a part of biological rhythms. These rhythms are part of the internal clock (biological clock) that regulates the sleep and wake cycle.
- REM ( Rapid eyes Movement ) and Non -REM Phases: Sleep generally occurs in two basic phases called REM and non -REM phases. The REM phase is characterized by dreaming and accelerated eye movements. The non -REM phase involves deeper sleep.
- Sleep Cycles: Sleep consists of repeated stages in a cycle. Many sleep cycles occur during an average night.

Sleep is important for an overall healthy life. Insufficient sleep can lead to impaired cognitive functions, altered emotional state, weakened immune system, and decreased overall quality of life. Sleep helps the body and mind re-energize and is essential for maintaining a healthy life in the long term.

### 2.4. sleep quality

Sleep quality is a concept that expresses the level of depth, continuity and regenerative effect a person experiences during the sleep period. This is a measure of how effective and restful an individual's sleep is. Sleep quality generally includes the following elements ( Erturan , 2017; Yılmaz , 2006) :

- Sleep Duration: A key component of sleep quality is whether the individual has an adequate sleep duration. Sleep duration varies depending on age and individual needs, but should generally include between 7-9 hours for adults.
- Depth of Sleep: The depth of sleep determines how long it takes for the individual to fall into light, medium or deep sleep and how long this deep sleep lasts. Continuous and regular deep sleep can improve sleep quality.
- Sleep Continuity : Uninterrupted, uninterrupted and continuous sleep affects sleep quality. Frequent awakenings or being awake frequently throughout the night can reduce sleep quality.
- Rapid) Sleep eyes It is important that movement and non -REM phases are balanced. Having these stages in appropriate order and continuity can support a healthy sleep experience.
- Energy Level After Waking: A quality sleep provides the individual with the energy necessary to wake up and start daily activities. It's about feeling refreshed after sleep.
- Sleeping Habits: Having a specific sleep routine and pattern can improve sleep quality. Regular bedtime and wake-up times can help regulate the biological clock.

Factors affecting sleep quality may include various factors such as stress, environmental conditions, comfort of the sleeping environment, and bed and pillow quality. To improve sleep quality, it is important to establish a regular sleep schedule, create a comfortable sleep environment and pay attention to sleep hygiene principles. Additionally, if sleep problems persist, consulting with a healthcare professional is recommended.

## 3. METHOD

### 3.1. Research Model

This study is a quantitative research; It was conducted using the relational screening model. This model aims to find interactions or relationships between large amounts of data available in databases. The relational scanning model is used to understand how data are connected by analyzing many tables in databases and the relationships between these tables ( Karasar , 2011).

### 3.2. Sampling Method

TRNC Nicosia Burhan Nalbantoğlu State Hospital, Famagusta State Hospital, Near East University Hospital, Kyrenia Dr. white flower 500 patients hospitalized in the internal medicine intensive care unit of the hospital constituted the population of the study. The sample of the research was selected using the purposeful sampling

method. This method allows the researcher to select a sample that is representative of a particular population or subgroup of particular interest. Purposive sampling method is generally used when the researcher needs a specific sampling group to answer a specific purpose or research question ( Karasar , 2011) . In general, in descriptive research , the sample size is determined depending on the population examined. While a 20% sample rate is generally preferred in small universes, a 10% sample rate can be used in larger universes. The sample size who volunteered to participate in the study was determined as 266 patients.

### 3.3. Collection of Data

In the research, data were collected face to face . Visits to hospitals started on 15.07.2023 and forms continued to be filled until 16.08.2023. A total of 270 scale forms were filled out, but 4 forms were not included in the study due to significant deficiencies. Therefore, 266 forms were included in the study.

were obtained using the "Patient Information Form", " Pittsburg Sleep Quality Scale" (Uğurlu and Sabuncu, 2012) and "Intensive Care Unit Environmental Stressors Scale" (Aslan and Çınar, 2010).

Patient Introduction Form: This form was created by the researchers by reviewing the literature. It consists of questions covering socio -demographic characteristics as well as situations related to hospital stay, such as the effect of ICU on the level of sleep.

Pittsburg Sleep Quality Scale (PSQI): PSQI is a scale used to determine sleep quality and developed by Buysse et al. in 1989. As a result of validity and reliability studies, Cronbach alpha was found to be 0.80. Studies on the Turkish validity and reliability of the scale were conducted by Ağargün et al. Made with. Cronbach's internal consistency coefficient of the scale was found to be 0.80. In this research, Cronbach's alpha was found to be 0.816.

The sub-objectives used in the research include the following information:

1. Individual sleep quality (question 6): Shows how patients rate their sleep quality.
2. Sleep latency (questions 2 and 5a): It is the time required to sleep.
3. Sleeping time (question 4): It is the amount of time a person spends asleep during the night.
4. Habitual sleep efficiency (questions 1, 3, 4): The person's normal sleeping habits.
5. Sleep disorder (questions 5b-5j): It is when the person experiences situations such as snoring, coughing, hot flushes or coldness during sleep.
6. Use of sleeping pills (question 7): It is when a person uses sleeping pills.
7. Disturbance in daytime activity (questions 8 and 9): It is the person's daily living activity tolerance of sleep changes.

YBÜÇSÖ: Scale developed with Ballard (1981), Cochran oath It was revisited in Ganong (1989). "Environmental Stressors Scale in Intensive Care Unit" consists of 42 items. Validity and reliability studies in our country were conducted by Aslan and Çınar (2010). cronbach scale alpha coefficient was found to be 0.94. In the study, Cronbach alpha coefficient was found to be 0.89.

Table 1. Reliability Analyzes of Scales

|                    | Cronbach's Alpha | Number of Items |
|--------------------|------------------|-----------------|
| YBÜÇSÖ Total Score | 0.968            | 42              |
| PSQI Total Score   | 0.801            | 16(x2)          |

In Table 1, the Cronbach Alpha result in the YBÜÇSÖ Scale is 0.968, in the PSQI Scale Cronbach Alpha result was found to be 0.801.

### 3.4. Analysis Method

In this research, the data obtained as a result of the application of measurement tools for the quantitative dimension were analyzed with the SPSS for Windows 26.0 package program.

Percentage, frequency, mean and standard deviation statistics were used to determine the descriptive characteristics of the results regarding demographic variables . Reliability analysis of the scales was performed.

Mann Whitney U test was used when comparing YBÜÇSSS Scale and PSQI Scale scores according to gender and marital status variables . Kruskall Wallis test was used when comparing YBÜÇSS Scale and PSQI Scale scores according to age and educational status variables. Mann Whitney U tests with Bonferroni correction were used in case of differences.

The error rate was determined in all tests ( $\alpha=0.05$ ), and the difference between comparisons was considered statistically significant when  $p<0.05$ . Ms -Excel 2010 and SPSS Statistics 26.0 were used for statistical analysis and calculations.

#### 4. FINDINGS

##### 4.1. Demographic Information of Patients

Demographic information of the patients is given in Table 2.

Table 2. Frequency and Percentage Values of Patients' Demographic Variables

|                        |                          | f   | %     |
|------------------------|--------------------------|-----|-------|
| Gender                 | Woman                    | 84  | 31.6  |
|                        | Male                     | 182 | 68.4  |
| Age range              | 22-30 years old          | 9   | 3,4   |
|                        | 31-40 years old          | 47  | 17.7  |
|                        | 41-50 years old          | 117 | 44.0  |
|                        | age 51 and over          | 93  | 35.0  |
| Educational background | Illiterate               | 38  | 14.3  |
|                        | Primary/secondary school | 64  | 24.1  |
|                        | High school              | 127 | 47.7  |
|                        | Licence                  | 28  | 10.5  |
|                        | Degree                   | 9   | 3,4   |
| marital status         | Married                  | 190 | 71.4  |
|                        | Single                   | 76  | 28.6  |
|                        | Total                    | 266 | 100.0 |

When Table 2 is examined, 68.4% of the participants are male; It is seen that 44% are between the ages of 41-50, 47.7% are high school graduates and 71.4% are married.

Table 3. Changes in Sleep Patterns After Admission to the Intensive Care Unit

|   |       | f   | %     |
|---|-------|-----|-------|
| Determining the change in sleep patterns after admission to the intensive care unit | Yes   | 191 | 71.8  |
|   | No    | 75  | 28.2  |
|   | Total | 266 | 100.0 |

When we look at the changes in the patients' sleep patterns after being admitted to the intensive care unit, it is seen that there was a change in 71.8% of the patients (Table 3).

##### 4.2. Data on Patients' Intensive Care Unit Environmental Stressors Scale Total Score and Pittsburg Sleep Quality Scale Total Score and Subscales

Table 4. Distribution of YBÜÇSÖ and PSQI Total Score and Sub-Dimension Mean Score (N=266)

|                          | N   | Min.   | Max .  | $\bar{X}$ | Ss .     |
|--------------------------|-----|--------|--------|-----------|----------|
| YBÜÇSÖ Total Score       | 266 | 123.00 | 164.00 | 153,1917  | 11.77929 |
| PSQI Total Score         | 266 | 19.00  | 30.00  | 23.9286   | 2.60018  |
| Subjective Sleep Quality | 266 | 3.00   | 4.00   | 3.5752    | 0.49525  |
| sleep latency            | 266 | 7.00   | 16.00  | 11.7669   | 2.15051  |
| Sleep Time               | 266 | 4.00   | 10.00  | 8.2556    | 2.41896  |
| Habitual Sleep Activity  | 266 | 12.00  | 25.00  | 18.3872   | 3.61084  |
| Sleeping disorder        | 266 | 5.00   | 8.00   | 6.2782    | 1.09443  |
| Sleeping pill            | 266 | 4.00   | 6.00   | 4.9925    | 0.91936  |
| daytime dysfunction      | 266 | 3.00   | 6.00   | 3.6316    | 1.22535  |

The total YBUCSSS score average of the patients is  $153.1917 \pm 11.77$  , and the PSQI score average is  $23.92 \pm 2.60$ . When the patients ' Pittsburg Sleep Quality Scale subscale scores are examined, the highest subscale score is the habitual sleep efficiency score, while the lowest subscale score is the subjective sleep quality subscale score.

#### 4.3. With Social-Demographic Characteristics of Patients Findings on Relationships between Pittsburg Sleep Quality Scale and Intensive Care Unit Environmental Stressors Scale Scores

In the research;

The results of the analysis performed to test the hypotheses are presented in Table 5.

Table 5. Analysis of YBUCSS and PSQI Scores According to Patients' Gender Status (N=266)

|                    |       | N   | $\bar{X}$ | ss       | F     | p.    |
|--------------------|-------|-----|-----------|----------|-------|-------|
| YBÜÇSÖ Total Score | Woman | 84  | 153.7976  | 11.36130 | 0.847 | 0.358 |
|                    | Male  | 182 | 152.9121  | 11.98770 |       |       |
| PSQI Total Score   | Woman | 84  | 22.1310   | 2.14409  | 0.057 | 0.812 |
|                    | Male  | 182 | 24.7582   | 2.36615  |       |       |

$p > 0.005$

It was observed that there was no statistically positive correlation between the gender status of the patients and the YBÜÇSÖ and PKUQI values ( $p > 0.05$ ). On the other hand, in the study conducted by Gencer (2020), the PSQI scores of female patients were found to be significantly higher than those of men. In their study, Erim and Çamdeviren (2018) discovered that there was a significant difference in sleep quality according to gender and observed that female patients had a worse sleep quality compared to male patients. However, another study conducted on the sleep quality of patients followed in intensive care and wards revealed that gender did not affect sleep quality (Uğurlu and Sabuncu, 2012). The study named Eryavuz (2007) also reached similar conclusions. It has been stated that due to some biological differences, women have more sleep problems than men. It is also emphasized that women need more sleep than men and experience sleep problems despite using sleeping pills (Potter and Perry, 2009).

The results of the analysis performed to test the hypotheses are presented in Table 6.

Table 6. Analysis of YBUCSS and PSQI Scores According to Patients' Age (N=266)

| Scale Dimensions   | Age             | N   | $\bar{X}$ | Ss .     | Group Comparison               |
|--------------------|-----------------|-----|-----------|----------|--------------------------------|
| YBÜÇSÖ Total Score | 22-30 years old | 9   | 159.0000  | 0.00000  | $\chi^2 = 8,180$ ; $p = 0.000$ |
|                    | 31-40 years old | 47  | 154.7872  | 7.11684  |                                |
|                    | 41-50 years old | 117 | 155.7521  | 11.73626 |                                |
|                    | age 51 and over | 93  | 148.6022  | 12.90108 |                                |
| PSQI Total Score   | 22-30 years old | 9   | 22,0000   | 0.00000  | $\chi^2 = 8.568$ ; $p = 0.000$ |
|                    | 31-40 years old | 47  | 23.1702   | 2.80775  |                                |
|                    | 41-50 years old | 117 | 24.7521   | 2.22798  |                                |
|                    | age 51 and over | 93  | 23.4624   | 2.74479  |                                |

$p < 0.005$

As a result of the examination, a statistically positive correlation is observed between the age status of the patients and the YBÜÇSÖ Total Scores ( $p < 0.005$ ). As a result of the post hoc test conducted to find out which group the difference is between; YBÜÇSÖ total scores of patients between the ages of 22-30 were higher than those of patients aged 51 and over; It was determined that the YBÜÇSÖ Total Scores of patients between the ages of 31 and 40 were higher than those of patients aged 51 and over. According to this; It can be said that as age groups decrease, sensitivity to environmental stressors in the intensive care unit also increases. Additionally, there is a statistically positive correlation between the age of the patients and their PSQI scores ( $p < 0.005$ ). As a result of the post hoc test conducted to determine which group the difference is between; It was determined that the sleep quality of patients between the ages of 41 and 50 was worse than that of patients aged 51 and over. In the study conducted by Eryavuz (2007), by comparing patient groups undergoing hemodialysis and peritoneal dialysis, it was determined that the level of sleep quality worsened with advancing age. Similarly, in another study examining sleep quality in patients diagnosed with COPD, it was found that sleep quality decreased in individuals aged 61 and over ( Kacaroglu Vicdan, 2018). In addition, in their studies by Gencer (2020), Aktaş et al., (2015), Hweidi , (2007) and Durna et al., (1997), no difference was seen between the age groups of the patients and the level of exposure to environmental stressors.

The results of the analysis performed to test the hypotheses are presented in Table 7.

Table 7. Analysis of YBUCSS and PSQI Values According to Patients' Marriage Status (N=266)

|                       |         | N   | $\bar{X}$ | Ss .     | f     | p.    |
|-----------------------|---------|-----|-----------|----------|-------|-------|
| YBÜÇSÖ<br>Total Score | Married | 190 | 152.7947  | 11.69158 | 0.002 | 0.969 |
|                       | Single  | 76  | 154.1842  | 12.01633 |       |       |
| PSQI Total<br>Score   | Married | 190 | 24,1947   | 2.76007  | 5,362 | 0.021 |
|                       | Single  | 76  | 23.2632   | 2.01573  |       |       |

p >0.005

A statistical negative correlation was observed between the marital status of the patients and YBÜÇSÖ and PSQI scores (p>0.05). Similarly, in the study conducted by Gencer (2020), no statistically significant difference was found between the marital status of the patients and their PSQI and YBUCSS scores .

The results of the analysis performed to test the hypotheses are given in Table 8.

Table 8. Analysis of YBUCSS and PSQI Values According to Patients' Education Levels (N=266)

| Scale Dimensions         | Educational background   | N   | $\bar{X}$ | ss       | Group Comparison                    |

|                          | Degree                   | 9   | 22,0000   | 0.00000  |                                     |

p <0.005

A statistically positive correlation was detected between the education levels of the patients and YBÜÇSÖ scores (p<0.05). As a result of the post hoc test conducted to determine which group the difference is between; YBÜÇSÖ Total Scores of illiterate patients were higher than those of primary school/secondary school graduates; It was observed that the rate of high school graduates was higher than primary school/secondary school graduates. A statistically positive correlation was also detected between the education levels of the patients and their PSQI scores (p<0.05). As a result of the post hoc test conducted to determine which group the difference is between; It was determined that the sleep quality of patients who graduated from primary school/secondary school was worse than patients who graduated from other education levels. In addition, it was observed that the sleep quality of high school graduate patients was worse than that of illiterate patients. On the other hand, in the study conducted by Gencer (2020), no significant difference was found between the educational status of the patients and the level of exposure to environmental stressors. Similarly, the findings of similar studies are similar to the research results (Aktaş et al., 2015; Durna et al., 1997; Hweidi , 2007).

The results of the analysis performed to test the hypotheses are given in Table 9.

Table 9. Intensive Care to the unit after going to bed Later Sleep Analysis of YBÜÇSÖ and PSQI Values According to Change in Order (N=266)

| Scale Dimensions         | Sleep patterns | N   | $\bar{X}$ | Ss .     | F     | p.    |

p >0.005

Intensive Patients care to the unit after going to bed later sleep It was observed that there was no statistically significant difference between the change in the order and the YBUCSS and PSQI scores (p>0.05). In the study conducted by Yılmaz (2006), it was determined that sleep patterns were disrupted after hospitalization and the

main cause of noise was the voices of other patients. In the study, hearing other patients' cries and moans was identified as a second stressor perceived by patients.

#### 4.4. Findings Regarding the Relationship Between Patients' Total YBUCSS Score and PSQI Total and Sub-Dimension Scores

The results of the analysis performed to test the hypotheses are given in Table 10.

Table 10. Analysis of the Relationship Between Patients' Total YBUCSS Value and PSQI Total and Sub-Dimension Values (N=266)

|                         |    | Sleeping pill | daytime dysfunction | sleep latency | Sleep Time   | Habitual Sleep Activity | PSQI Total Score | YBÜÇSÖ Total Score |

\*. Correlation is significant at the 0.05 level  
 \*\*. Correlation is significant at the 0.01 level

A strong negative relationship was found between the total YBUCSS values and PSQI total values of the patients included in the study ( $r = .444$ ;  $p = 0.000$ ). According to this situation; It can be said that as the patients' YBUCSS values increase, their PSQI total values also increase. A strong negative relationship was detected between the patients' total YBUCSS values and the sleep disorder subscale total values. ( $r = -.396$ ;  $p = 0.000$ ). According to this; As the patients' YBÜÇSÖ increases, their sleep disorder subscale total values decrease. Gencer (2020) stated that as the environmental stress level of patients increases, the sleep onset time (sleep latency) subscale total scores also increase; It was found that sleep duration subscale total scores decreased and at the same time daytime dysfunction subscale total scores increased. In another study, it was found that patients who used sedatives or sleeping pills had more sleep problems after hospitalization than those who did not use such medications (Incekara, 2004). It has been reported that these drugs are used to reduce emotional reactions such as anxiety and restlessness seen in patients in intensive care, but they also increase alertness, disrupt the sleep-wake cycle and cause insomnia (Stanik, 2003; Black et al., 1993). Frisk and Nordström (2003) found that sedative and hypnotic drugs used in intensive care patients negatively affected sleep quality. Additionally, it has been stated that commonly used ICU medications have profound effects on sleep quality (Kamdar et al., 2012). In a study conducted by Erim (2018), to determine the sleep quality of patients in Intensive Care Units, it was found that patients using sleeping pills had worse sleep quality than those who did not use medication. These findings highlight the effects of medications used in intensive care on sleep quality.

Table 11 lists the factors that patients perceive as the most stressful.

Table 11. Findings Most Perceived as Stress Factor (N=266)

| Factors where stressors are most commonly perceived | Mean±SD    |
|---|------------|
| missing your spouse                                 | 3.387±0.72 |
| Not explaining the treatments to you                | 3.184±0.71 |

|  |            |
|--|------------|
| Nurses monitoring machines more closely than you     | 1.815±0.60 |
| Men and women sharing the same room                  | 3.755±0.56 |
| Seeing family and friends for a short period of time | 3.755±0.56 |
| Nurses not introducing themselves                    | 3.635±0.48 |
| Nurses should not be in a hurry                      | 3.635±0.48 |
| not being able to drink water                        | 3.635±0.48 |
| Frequent blood pressure measurement                  | 3.635±0.48 |
| The bed or pillow is not at a comfortable level      | 3.635±0.48 |
| phone ringing  | 3.635±0.48 |
| Frequent check-ups by doctors and nurses             | 3.635±0.48 |

| YBÜÇSÖ<br>average | total | score                |
|-------------------|-------|----------------------|
|                   |       | <b>153.191±11.77</b> |

When the stressors most perceived by patients are examined; It was observed that the factors " men and women staying in the same room " and " seeing family and friends for a few minutes a day " were higher than other factors ( 3.387±0.72). The total score average of the scale is 153.191±11.77. was found as (Table 9). In the same study by Zaybak and Çevik (2015), it was determined that men and women being in the same room was the third important stressor perceived by patients. Gencer (2020) study found that the most important stressor perceived by patients was lack of privacy. Aktas et al. (2015) in their study to determine the environmental stressors of intensive care patients, it was determined that lack of privacy was the fourth important stressor.

## 5. CONCLUSION AND RECOMMENDATIONS

### 5.1. Conclusion

In this study, the effects of environmental stressors encountered by patients in the internal medicine intensive care unit on sleep quality were examined. According to the research results, the highest sub-dimension value in the PSQI sub-dimension value of the patients was defined as the habitual sleep efficiency value, while the lowest PSQI sub-dimension value was defined as the subjective sleep quality sub-dimension value. A statistically negative correlation was found between the gender of the patients and their YBUCSS and PSQI scores. A statistically positive difference was found between the patients' ages and YBÜÇSÖ Total Scores. Accordingly, the YBUCSS total scores of patients between the ages of 22-30 are higher than those of patients aged 51 and over; It was determined that the YBÜÇSS total scores of patients between the ages of 31 and 40 were higher than those of patients aged 51 and over. According to this situation; It is observed that as age groups decrease, the sensitivity of the intensive care unit to environmental stressors also increases. It was determined that there was a statistically positive correlation between the patients' ages and their PSQI scores. Accordingly, it was determined that the sleep quality of patients between the ages of 41 and 50 was worse than that of patients aged 51 and over.

As a result of the research, a statistically negative correlation was found between the marital status of the patients and their YBUCSS and PSQI scores. It was observed that there was a statistically positive correlation between the education levels of the patients and YBUCSS scores. According to this; YBÜÇSÖ Total Scores of illiterate patients were higher than those of primary school/secondary school graduates; It was observed that the rate of high school graduates was higher than primary school/secondary school graduates. It was also found that there was a statistically positive correlation between the educational status of the patients and their PSQI scores. Accordingly, it was determined that the sleep quality of patients who graduated from primary school/secondary school was worse than patients who graduated from other education levels. In addition, it was observed that the sleep quality of high school graduate patients was worse than illiterate patients. A statistical negative correlation was observed between the change in sleep patterns of the patients after admission to the Intensive Care Unit and their YBUCSS and PSQI scores.

A negative relationship was found between the patients' total YBUCSS scores and PSQI total scores . According to this; It can be said that as patients' YBUCSS scores increase, their PSQI total scores also increase. A negative relationship was found between the patients' total YBUCSS scores and the sleep disorder subscale total scores. According to this situation; When patients' YBUCSS values increase, their sleep disorder subscale total scores decrease. When the stressors most perceived by patients are examined; The factors " men and women staying in the same room " and " seeing family and friends for a few minutes a day " were found to be higher than other factors.

## 5.2. Suggestions

According to the research results, it is important to pay attention to the following recommendations to reduce environmental stressors that affect the sleep quality of patients in the internal medicine intensive care unit:

- Differences in sleep quality and stress levels have been detected between different age groups. Therefore, it may be recommended to create patient care plans to ensure stress management and sleep patterns specific to age groups.
- A significant relationship has been identified between education level and sleep quality. Patients with lower education levels have generally been shown to have worse sleep quality. Therefore, awareness programs or educational materials that will provide support on sleep habits can be developed for patients with low education levels.
- A negative relationship has been found between the stress levels and sleep quality of married patients. In this case, it may be beneficial for married patients to develop methods that increase communication with family members or encourage supportive family visits.
- Different stressors have been shown to have different effects. Therefore, it may be beneficial to develop a customized stress management plan based on patients' individual preferences and sensitivities. For example, segregating rooms according to gender or making visiting hours more flexible.
- Changes in sleep patterns have been observed in patients after admission to the intensive care unit. Considering the relationship of these changes with stress levels, supportive measures can be taken to facilitate patients' adaptation processes. These measures may be, for example, lighting regulations or control of noise levels.
- A significant relationship was found between YBUCSS scores and PSQI scores. In this case, considering that sleep quality deteriorates as stress levels increase, therapy or support programs can be developed accordingly.

# INVESTIGATION OF THE RELATIONSHIP BETWEEN MOBBING APPLICATION AND WORK MOTIVATION IN NURSES

**Gülzade HAYTA**

200618005@std.akun.edu.tr

**Yrd. Doç. Dr. Azmiye YINAL**

azmiye.yinal@akun.edu.tr

## ABSTRACT

This study aims to examine the effects of mobbing practices on work motivation of nurses working in public hospitals in TRNC. The study is based on a population of 861 nurses determined according to the TRNC Ministry of Health data. With the quota sampling method used, 266 nurses were interviewed and the data were collected using a questionnaire form including a form containing the personal information of the participants, the Mobbing Perception Scale and the Work Motivation Scale. As a result of the analyses, it was determined that mobbing practices that nurses were exposed to had a negative effect on their work motivation, especially in the subscales of relationship with coworkers, threats-harassment, job and career-related obstacles, and interventions in private life. The positive correlation between work engagement and work motivation was a remarkable finding. The results of this study suggest that the negative situations that nurses are exposed to in the workplace may affect their work motivation and that work engagement may alleviate these effects.

**Keywords:** Mobbing, Psychological violence, Workplace violence, Work motivation.

## 1. INTRODUCTION

### 1.1. Problem Status

Mobbing refers to attacks made by a person or a group of people, usually in a continuous and systematic way, with the aim of causing emotional, psychological, physical or social harm. Mobbing can occur in the workplace, school, society or other social environments (Tahtalıoğlu, 2023) . In the workplace context , mobbing refers to the situation where an employee is systematically targeted and mistreated by other employees, managers or the employer. Mobbing can take many different forms and includes emotional harassment, humiliation, verbal or physical attack, gossip spreading, exclusion and other negative behaviors (Bayer, 2023) .

of mobbing can be serious and can have a negative impact on the targeted person's health, work performance, general quality of life and emotional state. Mobbing can poison the working environment within the organization and reduce overall employee satisfaction. Mobbing has been addressed by legal regulations in many countries and policies are being created to prevent or combat such behavior in workplaces. Creating a healthy communication environment and a fair working environment in the workplace helps prevent mobbing (Yeşildal, 2005).

Mobbing stands out as a problem that causes significant effects, especially on healthcare workers. Research on this topic has shown that workplace violence has a significant impact on healthcare professionals, hospitals, and society (Nowrouzi, 2017). Incidents of mobbing have a negative impact on employee morale and can lead to a range of negative consequences. These consequences include factors such as workforce loss, dissatisfaction and burnout. These consequences, which negatively affect employees' job satisfaction, can negatively affect organizational performance by reducing work efficiency (Sun et al., 2019). As frequently emphasized in various studies, negative working conditions negatively affect the job satisfaction of healthcare professionals, especially those providing treatment and care services. Mobbing both reduces the quality of life of nurses by negatively affecting their physical and mental health, and can negatively affect the quality of health services by decreasing the performance of employees ( Orhaner and Mutlu, 2018).

Mobbing in nurses is a term that refers to the negative behaviors they are exposed to in their work environments. Mobbing can include negative behavior such as constantly targeting, humiliating, harassing or ostracizing a person. Nurses are an important professional group working in the healthcare sector and may be exposed to mobbing due to factors such as intense work tempo, stress, and communication problems (Demir, 2021). Symptoms of mobbing in nurses may include emotional distress, low job satisfaction, loss of motivation, increased stress, poor performance and even professional burnout (Gül, 2022). Mobbing can negatively affect an individual's physical and psychological health and negatively affect job performance. Mobbing can significantly affect working relationships and professional quality of life among nurses. In the healthcare industry, team collaboration and harmony are critical to improving quality in patient care. Therefore, preventing and effectively managing mobbing is a critical issue in terms of health service delivery and nurses' quality of work life (Erdem, 2021).

The relationship between mobbing practice and work motivation in nurses examines the potential effects of negative interactions in the work environment on nurses' work motivation. Mobbing involves negative behaviors

such as being constantly targeted, humiliated, attacked or excluded. Work motivation refers to the level of energy, passion and commitment of employees regarding their work ( Özkaraca and Köse , 2023).

Research shows that nurses' exposure to mobbing can have a negative impact on work motivation. Mobbing can negatively affect nurses' emotional and psychological health, increase stress levels and reduce job satisfaction ( Tonkuş and Coşkun, 2021 ). These effects can negatively affect nurses' commitment and motivation to their jobs. High work motivation in nurses can contribute positively to quality patient care and health service delivery (Utangaç, 2020). Therefore, it is important for healthcare institutions to develop policies and practices that increase motivation for nurses. These efforts can increase the quality of general health services by increasing nurses' commitment to their profession (Metin and Kulakaç , 2022). Within the scope of this information, the problem statement that emerged in line with the main purpose of the research is: " What is the relationship between mobbing and work motivation of nurses working in the public hospital in TRNC?" It is defined as .

## 1. 2. Purpose and Importance of the Research

mobbing practices that nurses are exposed to on their work motivation within the scope of demographic variables. The research aims to understand the effects of these variables on work motivation by examining the relationships that may exist between nurses' demographic characteristics such as age, gender, education level, professional experience and the types of mobbing they are exposed to . In the context of demographic variables, the research includes analysis of demographic factors to understand whether mobbing occurs at different levels between young or inexperienced nurses and their more experienced colleagues . In addition, it aims to reveal the relationship between these variables and mobbing perception by evaluating the effects of factors such as gender and education level on the types of mobbing that nurses are exposed to.

The evaluation made in the context of the effect of mobbing on work motivation includes analyzing the possible negative effects of various dimensions of mobbing (for example, relations with colleagues, threats-harassment, work and career-related obstacles, interventions in private life) on work motivation. The findings aim to contribute to an in-depth understanding of the relationship between nurses' mobbing perceptions and work motivation.

## 1.2. Hypotheses

The hypotheses of the research are as follows.

H1 : There is a relationship between nurses' mobbing perceptions and work motivation .

H0 : There is no relationship between nurses' mobbing perceptions and work motivation .

H2 : Nurses' mobbing perceptions have an effect on work motivation .

H0 : Nurses' mobbing perceptions have no effect on work motivation .

## 1.3. Assumptions

It is assumed that research participants give their answers to the survey questions sincerely.

## 1.4. Limitations

Research;

- With research participants,
- With the scale questions used in the research,
- It is limited to nurses working at TRNC Nicosia Burhan Nalbantoğlu State Hospital.

## 1.5. Definitions

**Mobbing** : The concept of psychological harassment includes all kinds of behaviors such as maltreatment, threats, violence and humiliation systematically applied to individuals in the workplace by their superiors, equal employees or subordinates ( Rüzgar , 2023 ) .

**Work motivation:** It is the process of motivating employees to work and convincing them that they will best satisfy their personal needs if they work efficiently in the organization ( Özel and Yılmaz, 2023 ) .

## 2. THEORETICAL FRAMEWORK

### 2.1. Mobbing Concept and Definition

mob comes from the Latin mobile vulgus , meaning fickle crowds, and is used in English literature to mean bullying, harassment or harassment. In the United Kingdom , the act of intimidating or mistreating others is known as bullying. In Canada and the USA the same thing is often called harassment. Additionally, terms such as workplace trauma, employee abuse, bullies and petty bullying refer to mistreatment and inappropriate behavior in the workplace ( Einarsen et al., 2020). Since mobbing is not fully defined in Turkish, it refers to intimidation, emotional or psychological harassment and workplace trauma. It refers to many different terms such as (Çobanoğlu, 2005).

Although there is no clear term for mobbing in Turkish, there is a terminology problem. Those who work on emotional violence usually explain the Turkish equivalent with expressions such as "psychological harassment at work" or "psychological terror at work" instead of using a single word. Tınaz (2008) stated that it is more appropriate to express this phenomenon in a few words rather than one. Aygün (2012), although he did not express this phenomenon exactly, said that the concepts of "Psychological Intimidation or Harassment" might be more appropriate. For this reason, uncertainty continues about the Turkish meaning of mobbing.

Mobbing can be understood as a type of bullying or harassment that occurs when a group of individuals consistently and systematically targets a specific individual with negative and harmful behavior. These behaviors can manifest as verbal abuse, social isolation, and even physical violence. Many recent studies have focused on mobbing, also called workplace bullying, shed light and revealed that mobbing is an aggressive, repetitive and group-oriented behavior pattern that results in the targeted individual being humiliated, excluded and attacked in the work environment (Tengilimoğlu et al., 2019).

The definitions in the literature clearly reveal that mobbing is not an isolated incident, but rather a continuous form of mistreatment. Therefore, the consequences experienced by the victim can be severe, including emotional distress, physical health problems, and work-related problems (Smith, 2023). It is the duty of companies to take proactive measures to combat mobbing and provide support to victims. By creating a safer and more respectful work environment, organizations can effectively reduce the harmful impact of mobbing on individuals and the overall functioning of the company. A comprehensive understanding of the concept of mobbing is crucial to identifying and addressing this problem in the workplace, thus playing a crucial role in its prevention (Jones, 2022).

## 2.2. Mobbing in the Health Sector

Mobbing constitutes an important risk factor in various professional fields, its prevalence is especially evident in the health sector (Kılıç et al., 2016). The unique characteristics of the healthcare sector, characterized by long working hours, harsh working conditions and lack of recreational opportunities, increase occupational hazards more than other professions. Healthcare institutions often witness numerous cases of verbal or physical aggression directed at healthcare professionals by patients, relatives or other individuals. Increasing mobbing cases in healthcare institutions can be attributed to multifaceted factors such as difficult working conditions, discriminatory practices among patients, high patient load, pricing problems, difficult shift schedules, and restrictions on devoting time to family and social pursuits in line with the busy working environment (Yiğitbaş and Deveci, 2011).

Consistently highlight the susceptibility of personnel in the healthcare sector to be exposed to mobbing, and nurses emerge as the most vulnerable group in this professional field. Nurses, who are the first and most frequently encountered healthcare professionals by patients, face a high risk of mobbing. Various factors that contribute to nurses' exposure to mobbing include factors that increase their vulnerability, such as not being compensated for their services, violation of their rights by other healthcare professionals, especially head nurses, being assigned to departments different from their designated roles, and constant interaction with patients (Karahana and Yılmaz, 2014).

There is a significant correlation between the prevalence of mobbing and the density of women in health institutions (Eroğlu and Solmaz, 2015). The consequences of working in environments characterized by high rates of mobbing are manifested in increased stress levels among nurses, resulting in a decrease in both their physical and psychological well-being. As a result, the capacity of nurses to fulfill their professional obligations decreases, which leads to a decrease in productivity and deterioration of institutional functioning (Arıcan, 2022).

Mobbing, a common problem in the healthcare sector, represents a challenging occupational, health and safety issue. The repercussions go beyond the victim and affect the broader social fabric. Proactive measures need to be taken to reduce the prevalence of mobbing; The most important of these is organizing comprehensive training and seminars for healthcare professionals. These initiatives should focus on equipping staff with skills such as problem and conflict resolution, stress management, anger management, and workplace violence prevention strategies (Karsavuran, 2014).

## 2.3. Business Motivation

The concept of motivation is not a new development, but rather came to the fore in organizational contexts during the Industrial Revolution. In the early days of the Industrial Revolution, the important physiological needs of workers and their families attracted the attention of bosses and managers who were directed to meet these needs (Şimşek et al., 2011). Workforce motivation studies have long been a prominent focus at both practical and theoretical levels. While managers accept motivation as a very important factor in the performance equation, academics who study organizational performance also see it as a fundamental element for effective management practices. It has consistently served as a primary tool for addressing turnover intentions and enhancing organizational performance, commitment, and creativity (Zhu et al., 2018).

Motivation is a concept that has been approached and defined in various ways, but the commonality between these definitions is its impact on people's behavior and the way it energizes individuals. Motivation can be viewed through the lenses of needs or expectations, actions, goals, and feedback. It plays a crucial role in shaping human behavior and directing individuals to achieve goals (Darrington and Howell, 2011). The issue of motivation is of great importance in organizational contexts. Managers, in particular, have the responsibility to encourage high levels of motivation among their employees to create an effective and efficient work environment. If employees are not motivated to accomplish their assigned tasks, the effectiveness of management efforts may be compromised. Therefore, understanding and using motivation is becoming a central aspect of organizational leadership and performance optimization (Froese et al., 2019).

### 3. METHOD

#### 3.1. Research Method

This study was prepared as a quantitative research. Quantitative research is a type of research that objectifies the facts and expresses them observably, measurably and numerically. Research that is repeatable and objectively revealed through observation and measurement is known as quantitative, that is, "numerical" research (Büyükoztürk et al., 2013). Relational screening model was used in the research. The use of the relational screening model in the research provides a special analytical framework for understanding the relationship between the mobbing events that nurses are exposed to and their motivations. The relational screening model is a statistical model used to determine the relationships between variables (Karasar, 2015).

#### 3.2. Population and Sample

The population of this study consists of nurses working in public hospitals in TRNC. According to TRNC Ministry of Health data, the total number of nurses is determined as 861. Quota sampling method was used in sample selection. Quota sampling method is a sampling technique used to ensure that subgroups with certain characteristics are represented in a research. This method creates a sample by selecting individuals belonging to certain categories (quota) in the population. These categories can often be based on demographic, socioeconomic or other specific characteristics (Büyükoztürk et al., 2013). In this context, 266 nurses were interviewed for the study.

#### 3.3. Data Collection Tools

Research data was collected using a form containing personal information of the participants, a survey form containing the Mobbing Perception Scale and the Work Motivation Scale. This method aims to ask participants to provide both general information and specific information about mobbing perception and work motivation, which is the focus of the research.

#### Mobbing Scale

The Mobbing Scale is designed to evaluate individuals' relationships with their colleagues, exposure to physiological and psychological violence, work-related feedback efficiency, whether opinions are taken according to the individual's interests, and whether they are informed of changes at work. Evaluation is made on a 7 point scale from "Strongly agree 7" to "Strongly disagree 1". Higher scores, more mobbing while low scores indicate less exposure to mobbing behavior (Lalelioğlu et al., 2013). mobbing "Rotated Principal Component Analysis" technique was used to check the construct validity of the Scale. As a result of the analysis, 10 items were removed and the total number of items in the scale was reduced to 38. The Cronbach Alpha coefficient used to evaluate the reliability of the scale was calculated as 0.948.

#### Work Motivation Scale

Likert-type Work Motivation Scale developed by Engin and Çam (2016) aims to evaluate the work motivation level of nurses. Nurses receive a maximum of 75 points and a minimum of 25 points from the scale by giving "1" point for "strongly disagree", "2" points for "partially agree", and "3" points for "agree". High scores indicate high work motivation (Engin and Çam, 2016). Factor analysis was applied to evaluate the construct validity of the scale. Although nine factor groups stand out, a single-factor structure was accepted as the most appropriate solution by considering the slope graph analysis and factor loadings. The Cronbach alpha reliability coefficient of the scale was found to be 0.855, which showed high internal consistency (Engin and Çam, 2016). The internal consistency of nurses' responses to the Mobbing and Work Motivation scales was examined with the Cronbach Alpha test and was calculated as 0.949 for the Mobbing Scale and 0.761 for the Work Motivation Scale. This reliability analysis indicates that both scales have strong internal consistency. The use of these scales is suitable for reliably approximating the results obtained.

### 3.4 Analysis of Data

In the study, (SPSS) 28.0 software was used for statistical analysis of the nurses' responses to the survey forms. Frequency analyzes were performed for the distribution of the socio-demographic characteristics of the participants, and descriptive statistics were shown for the Mobbing Scale and Mobbing Scale scores. Within the scope of normality tests of nurses' Mobbing and Work Motivation Scale scores, the Kolmogorov-Smirnov test was performed and it was determined that the nurses' Mobbing Scale and Mobbing Scale scores did not show a normal distribution.

the Mobbing and Work Motivation Scale scores of the nurses included in the research did not comply with the normal distribution, non-parametric tests were used in the research. Mann Whitney (MWU) is used to compare Mobbing and Work Motivation Scale scores according to nurses' gender and education level, and to compare Mobbing Scale and Mobbing Scale scores according to age group, income, unit they work in and professional seniority. Kruskal Wallis (KWH) test was applied.

the Mobbing and Work Motivation Scale scores of the nurses in the study were examined with the Spearman test, and the predictive power of the Mobbing Scale scores on the Work Motivation Scale scores was examined with multivariate regression analysis.

## 4. FINDINGS

### 4.1. Demographic features

Table 1. Distribution of Socio-Demographic Characteristics of Nurses

|                                 | Dear) | Percentage (%) |
|---------------------------------|-------|----------------|
| <b>Age</b>                      |       |                |
| 18-26                           | 48    | 18.05          |
| 27-35                           | 50    | 18.80          |
| 36-44                           | 99    | 37.22          |
| 45 years and above              | 69    | 25.94          |
| <b>Gender</b>                   |       |                |
| Male                            | 68    | 25.56          |
| Woman                           | 198   | 74.44          |

| 5 years and below               | 70    | 26.32          |
| 6-11                            | 46    | 17.29          |
| 12-17                           | 65    | 24.44          |
| 18-23                           | 44    | 16.54          |
| 24 years and above              | 41    | 15.41          |
| <b>Total</b>                    | 266   | 100.00         |

Table 3. shows the distribution of socio-demographic characteristics of the nurses participating in the study. According to Table 2, 18.05% of the nurses are 18-26 years old, 18.80% are 27-35 years old, 37.22% are 36-44 years old and 25.94% are 45 years old and over. In the age group, it was determined that 25.56% were male, 74.44% were female, 10.53% were SML/ associate degree graduates, and 89.47% were undergraduate/graduate graduates. 14.29% of the nurses have an income less than their expenses, 69.17% have an income equal to their expenses, 16.54% have an income more than their expenses, 10.15% have an emergency, 21.43% have a

surgery, 15% have a surgery. 79% of them were working in internal medicine, 13.91% were working in pediatrics, 22.93% were working in intensive care and 15.79% were working in other units, 26.32% were working for 5 years or less, 17.29% were working in other units. It was determined that 6-11 years of professional seniority existed, 24.44% had 12-17 years of professional seniority, 16.54% had 18-23 years of professional seniority and 15.41% had 24 years or more of professional seniority.

#### 4.2. Findings Regarding Scale Scores

Table 2. Average Scores for Scales

|                                   | n   | Cover. s | min  | Max . |      |
|-----------------------------------|-----|----------|------|-------|------|
| Work Motivation Scale             | 266 | 49       | 4.97 | 40    | 65   |
| Relationship with coworkers       | 266 | 2.68     | 1.02 | one   | 4.88 |
| Threat-harassment title           | 266 | 2.12     | 1.17 | one   | 4.71 |
| Work and career-related obstacles | 266 | 3        | 0.99 | 1.25  | 4.88 |
| Interventions in private life     | 266 | 2.63     | 1.21 | one   | 7    |
| work commitment                   | 266 | 3.92     | 1.33 | one   | 7    |

As a result of the analysis, the general average of the work motivation scale was determined as 4.97. The standard deviation was found to be 0.49, the minimum value was 4, and the maximum value was 5.65. Additionally, when focusing on the subscales of the scale, it is seen that the "Work Engagement" subscale has the highest mean (average: 3.92). Other sub-dimensions, " Relationships with Colleagues," "Threats-Harassment," "Interferences with Work and Career," and "Interferences with Private Life" also have averages of 2.68, 2.12, 3, and 2.63, respectively. These statistics provide an overview of employees' work motivation and the various factors that influence this motivation. In particular, high averages for job engagement indicate that employees feel a strong commitment to their jobs.

#### 4.3. The Relationship Between Mobbing and Work Motivation

H1 : There is a relationship between nurses' mobbing perceptions and work motivation .

H0 : There is no relationship between nurses' mobbing perceptions and work motivation.

Table 8. Correlations between Nurses' Mobbing and Work Motivation Scale Scores

| Mobbing Scale                     | Work Motivation Scale |
|-----------------------------------|-----------------------|
|                                   | r -0.445              |
| Relationship with coworkers       | p 0.000*              |
|                                   | N 266                 |
|                                   | r -0.411              |
| Threat-harassment title           | p 0.000*              |
|                                   | N 266                 |
|                                   | r -0.510              |
| Work and career-related obstacles | p 0.000*              |
|                                   | N 266                 |
|                                   | r -0.294              |
| Interventions in private life     | p 0.000*              |
|                                   | N 266                 |
|                                   | r 0.330               |
| work commitment                   | p 0.000*              |
|                                   | N 266                 |

the Mobbing Scale of the nurses included in the study , Relationship with Colleagues, Threat-harassment title, Work and career-related inhibitions, and Interventions in private life subscale scores, and the Work Motivation Scale scores ( $p \leq 0, 05$ ). If the scores of nurses on the Mobbing Scale's Relationship with Colleagues, Threat-harassment title, Work and career-related interferences, and Interventions in private life subscales increase, their Work Motivation Scale scores decrease.

A statistically significant and positive correlation was determined between the nurses' Mobbing Scale and Work Engagement subscale scores and their Work Motivation Scale scores ( $p \leq 0.05$ ). As nurses' Mobbing Scale and Work Engagement subscale scores increase, their Work Motivation Scale scores also increase.

#### 4.4. The Effect of Mobbing on Work Motivation

H2 : Nurses' mobbing perceptions have an effect on work motivation .

H0 : Nurses' mobbing perceptions have no effect on work motivation.

Table 9. Examining the Prediction of Nurses' Mobbing Scale Scores on their Work Motivation Scale Scores (Regression Analysis)

|                                   | std . Be .<br>B. | std .<br>S.H. | std .<br>Beta | t      | p      | F<br>p | R2 -<br>FlatR <sup>2</sup> |
|-----------------------------------|------------------|---------------|---------------|--------|--------|--------|----------------------------|
| (Still)                           | 56.94            | 1.63          |               | 34,936 | 0.000* |        |                            |
| Relationship with coworkers       | -1.62            | 0.45          | -0.33         | -3.625 | 0.000* |        |                            |
| Threat-harassment title           | 0.17             | 0.41          | 0.04          | 0.415  | 0.679  | 26,827 | 0.340                      |

| Interventions in private life     | 0.12             | 0.29          | 0.03          | 0.435  | 0.664  |        |                            |
| work commitment                   | 0.33             | 0.22          | 0.09          | 1,542  | 0.124  |        |                            |

\* $p \leq 0.05$

Mobbing of Nurses The scores they received from the subscales Relationship with colleagues ( $\beta = -0.33$ ;  $p \leq 0.05$ ) and Work and career-related inhibitions ( $\beta = -0.37$ ;  $p \leq 0.05$ ) subscales were found to be related to their Work Motivation Scale scores. statistically significant and negatively predicted has been observed.

The Threat-harassment heading in the Mobbing Scale of the nurses participating in the study ( $\beta = 0.04$ ;  $p > 0.05$ ), Interventions in private life ( $\beta = 0.03$ ;  $p > 0.05$ ) and Work commitment ( $\beta = 0.09$ ;  $p > 0.05$ ) did not predict the Work Motivation Scale scores at a statistically significant level.

#### CONCLUSION AND RECOMMENDATIONS

the Mobbing Scale of the nurses included in the study and their Work Motivation Scale scores. The increase in the scores that nurses receive from these subscales under the Mobbing Scale shows that their Work Motivation Scale scores decrease. Additionally, a positive and statistically significant correlation was determined between nurses' Work Engagement subscale scores under the Mobbing Scale and their Work Motivation Scale scores. As nurses' Work Engagement subscale scores under the Mobbing Scale increase, their Work Motivation Scale scores also increase. It was observed that the scores of the nurses participating in the study from the Relationship with Colleagues and Work and Career-related Inhibitions subscales under the Mobbing Scale negatively and significantly predicted the Work Motivation Scale scores . However, no significant effect of the scores obtained from the Threat-harassment, Interventions in Private Life and Work Engagement subscales was detected in predicting the Work Motivation Scale scores.

that the mobbing that nurses are exposed to may negatively affect their work motivation, and especially obstacles related to relationships with colleagues and work career may be determining factors in this relationship. At the end of the research, the following recommendations were developed:

- It has been observed that obstacles related to relationships with colleagues and business career negatively affect work motivation. In this context, it is important to encourage healthy communication among employees and minimize career obstacles by organizing training and awareness programs to prevent mobbing within the company.
- Considering the positive relationship between job engagement and work motivation, programs can be developed within the company to increase employees' commitment to their jobs. These programs may focus on encouraging teamwork, strengthening employees' commitment to their jobs, and increasing their motivation.
- An effective mechanism should be established to monitor and resolve mobbing situations within the company . By establishing a system where employees can anonymously report mobbing situations, problems can be responded to quickly and effectively.
- In order to reduce work and career-related obstacles, programs that reward performance and support career development can be organized for employees within the company. These programs can strengthen employees' motivation and commitment to work.

## ISSUES OF STATIONARITY IN ECONOMIC QUANTITIES IN TIME SERIES

Mehpara ORUJOVA

Associate Professor,

"Economics and Statistics" Department,

Ph.D. in Economics, Azerbaijan Technical University (AzTU)

### ABSTRACT

This article shows that in a digital environment, the analysis of primary information involves using various tools, methods, and procedures. It is noted that economic models are typically implemented over different months, quarters, or years and that, depending on the existence of a primary trend, time series can be divided into two groups: stationary and non-stationary. Autocorrelation functions are used when analyzing time series data. The cointegration of two existing time series is regarded as the presence of long-term mutual relationships between relevant indicators. From this, it becomes evident that short-term disruptions occur in these relationships, referred to as "equilibrium errors." It is also shown that conducting econometric analysis on economic issues is more efficient when applying modern computer software, including various program packages. **Econometric Views (EViews)** is one of the most widely used econometric software packages. This package is used for macroeconomic forecasting, modeling economic processes, analyzing scientific information, and handling financial issues. Most data analysis procedures within the EViews software package are carried out manually.

**Keywords:** statistical data, time series, economic processes, software packages, econometrics, economic models, function, processes, analysis.

### INTRODUCTION

In a digital environment, the analysis of primary information involves the use of various tools, methods, and procedures. Time series, as one of the tools used in constructing econometric models, play a crucial role as the collection of observations of economic quantities at various points in time. As stated in the following source, "Any economic system incorporates a set of individual elements that reflect different aspects of its activity. To manage the system as a whole, it is necessary to clearly understand how each defining element will evolve separately. Therefore, the forecasting problems of time series, which reflect the dynamics of economic processes that are structural components of economic systems, are highly relevant" [1].

Economic models are typically implemented across different months, quarters, or years. Time series are categorized into two groups based on the presence of an underlying trend: stationary time series and non-stationary time series.

**Stationarity** is defined as the property of a variable remaining unchanged in certain characteristics over time. The interdependence of economic indicators and the reliance of current values on past values can disrupt the stationarity of variables. A weakly stationary time series is characterized by a mathematical expectation and variance that do not depend on time, with the autocorrelation function depending only on time differences. Such a process is considered a stationary time series in a broad sense, as it is defined by constant statistical characteristics such as the mean (expected value), variance (mean squared deviation), and covariance, which are independent of the time index.

For normal processes, weak stationarity does not equate to strict stationarity, and strong stationarity may be derived from weak stationarity in these processes.

A **strictly stationary series** refers to a time series where the joint distribution of  $m$  observations is independent of time shifts for any set of time points  $y_{t+1}, y_{t+2}, \dots, y_{t+m}$  (for any given  $m$ ). This can also be referred to as a narrowly stationary series. Strict or narrow stationarity is characterized by the most frequently used statistical properties: the mean does not depend on time, and the variance does not depend on time.

Let's now consider the main characteristics of trend stationarity.

A series is said to be trend-stationary if it is stationary with respect to a certain deterministic trend. In this context, the series  $Y_t$ , depending on a specific deterministic trend, belongs to the class of TS (Trend-Stationary) series if it meets the criteria of being stationary relative to that deterministic trend.

Trendless stationary series can also be classified under TS. If a time series meets the following conditions, it is considered an integrated series of order  $K$ :

- If the series is not stationary relative to a deterministic trend, it is not considered a TS series.
- Differentiating the series  $K$  times results in a stationary series.
- The series obtained after  $K$  differentiations is not considered a TS series.

If a series is integrated with order  $K$ , it is denoted as  $I(K)Y$ . In this case,  $I(0)Y$  refers to a stationary series that does not result from differentiation, while the set of series integrated with different orders of differentiation represents the class of difference-stationary time series.

Of course, when econometric models are built on real statistical data, if the time series are characterized as DS (difference-stationary), the research is conducted based on first-order integrated series. Integration at levels  $k=2k = 2k=2$  or higher can occur if the time series are short; however, errors may arise in determining the level of integration in such cases.

When it comes to the implications of non-stationarity and the increased risk of spurious regression, it is essential to verify the non-stationarity of economic indicators used in time series before analysis. The frequent use of non-stationarity verification suggests its ease of application. This verification is conducted using the Dickey-Fuller (DF) test, although many other tests are available. The DF test is simple and widely used, though it lacks a standard t-distribution, unlike the Student's t-test. Conducting analysis with constant changes helps address issues in non-stationary time series data, meaning that during verification, only information about changes, not levels, should be used.

As a result, verifying non-stationarity is crucial, given the increasing issues associated with including unstable variables in the model when analyzing past movements and future plans for economic indicators. Therefore, it is essential to exercise caution when drawing statistical conclusions based on time series analysis.

**Spurious regression** refers to obtaining incorrect results when using non-stationary time series in regression models. For this reason, it is crucial to verify whether the time series used in regression models are stationary.

The **cointegration model**, based on constructing a stationary model from non-stationary time series, is known as the Engle-Granger approach. This approach relies on several methods for testing the cointegration of time series:

- Applying the augmented Dickey-Fuller (ADF) test to check for the stochastic properties of random deviations and test the null hypothesis  $\sim I(0) \sim I(0) \sim I(0)$ .
- Applying the Durbin-Watson rule.

The cointegration of two existing time series is considered evidence of a long-term relationship between relevant indicators. From this, it becomes clear that short-term disruptions in these relationships occur, which are recognized as “equilibrium errors.”

Speaking of extended tests, the Dickey-Fuller test (DF test) is one of the tests used to detect the existence of a “unit root” in time series stationarity analysis. This test is most suitable for homoskedasticity and cases where random deviations in the tested model are not correlated.

If the Dickey-Fuller (DF) test detects only a single “unit root” but, upon further examination, reveals multiple “unit roots,” the test may yield incorrect verification results. In such cases, the issue can be resolved by using the time series test across levels—first, second, etc., differences—to determine the degree of integration in the time series.

The following points are particularly important in testing hypotheses for the stationarity of time series. Problems arise when various tests are used to verify the hypothesis for both stationarity processes of a time series, as:

- Tests often have low power, meaning the null hypothesis may not be rejected even when it is actually false.
- Theoretical conditions for auxiliary models in tests are often unmet.
- Even when the null hypothesis is valid, it may not be accepted.

These limitations are considered biases in the test's statistics. Autocorrelation functions are used in the analysis of time series.

As stated in the following source, “Using time series to identify the fractal properties and chaotic characteristics of dynamic systems at the regional level, computational algorithms, and software tools have been developed that enable the prediction of economic system behavior. By applying the modified Hurst method as one of the methods of nonlinear dynamics, the time series is completed for specific intervals, taking into account the time required for reliable forecasting” [2].

It is worth noting the application of software packages in regression analysis. The main task of regression analysis is to determine the form of dependency between variables. Econometric analysis of economic issues is more efficient with the use of modern computer programs, including various software packages.

Software packages are complete program units that operate independently without requiring additional components. These packages control the physical parts of a machine, enabling the components to work together seamlessly. Other terms for software include applications, programs, applets, program modules, procedures, scripts, and source code. Some software packages are pre-installed with a computer and essential for its operation. Others can be purchased separately or downloaded from the internet and added to a computer at any time.

It is important to consider that “time series forecasting based on retrospective data forms the basis for planning, managing, and optimizing production volumes of products. This problem is solved by creating a model that

adequately describes the studied process. The most commonly used models are autoregressive and neural network models, although their use is limited by the length of the time series” [3].

**Econometric Views (EViews)** is one of the most widely used econometric software packages. This package is utilized for macroeconomic forecasting, modeling economic processes, analyzing scientific information, and handling financial issues. The study of the application methods of this software package is of great importance, as EViews facilitates the investigation of broader issues in economic modeling. This software package allows for the development of econometric models of innovative product production in technology parks, experimental realization of econometric models in the EViews-7 software package, and the development of economic-mathematical models in technology parks.

Both EViews and Matlab allow data to be received and transferred in text, Microsoft Excel, and CSV formats, enabling integration between auxiliary files. After processing data in EViews, if necessary, the results can be transferred back to Matlab in a similar manner. The main Matlab program periodically loads EViews, giving it instructions in file format for processing, and transfers the programs and data in text file format. EViews then waits for Matlab to complete its work and continues processing upon receiving the results.

Unlike Matlab, the EViews package does not support ActiveX (COM) or data dynamic exchange (DDE) for inter-program interaction. However, both EViews and Matlab support receiving and transferring data in text, Microsoft Excel, CSV, and other formats. Therefore, it is considered appropriate to establish interactions between data in auxiliary files. When necessary, a portion of the data for further processing is transferred to the EViews program. The Matlab program, operating in dynamic mode, creates an ASCII file with the data text for processing. This data is then written to a text file specified in the EViews program. Most data analysis procedures in EViews are performed manually.

**MS Excel** is suitable for accountants, bankers, and others who work with large amounts of data in their daily activities. However, the capabilities of spreadsheets do not end here. With this program, it is possible to perform various operations on numbers and text, conduct complex calculations, and create charts and graphs by applying various function categories.

## ÖZET

Çağdaş coğrafya disiplininin en önemli terimi durumunda olan mekân, doğal ve yapıli çevreyi esas almaktan ziyade ‘sosyal mekânın’ üzerinden kavramsallaştırılır. Mekân, çeşitli eşitsizlik biçimlerinin ve ikiliklerin (karşıtlık kategorilerinden oluşan kadın-erkek, yoksul-zengin, siyah -beyaz, vb.) üretilip tanımlandığı toplumsal ilişkileri barındırır ve bunları her an yeniden üretir. Bu eşitsizliklere konu olan temel alanlardan biri de mekân ve toplumsal cinsiyet etkileşimidir. Günlük hayat pratiklerinde, toplumsal cinsiyet kavramı sosyal, kültürel, ekonomik ve mekânsal kısaca hayata dair tüm alanlarda karşımıza çıkmaktadır. Kentlerde cinsiyetçi pratiklerin yol açtığı sömürü, marjinalleştirme, güçsüzleştirme ve psikolojik baskı, mekânsal konularla etkileşim halindedir ve onlardan beslenir. Modern toplumsal hayatın organizasyonunun temelini oluşturan özel-kamusal ayrımı, kadın ve mekân etkileşiminin belirgin biçimde somutlaştırır. Kadınların kültürel normlara (eşlerine bağımlılığı, ev sorumlulukları, çocuk bakım yükümlülükleri, vb.) ve çevresel etkilere (ulaşım olanakları, emniyet ve güvenlik, ekonomik durum, mekânsal kısıtlılıklar, vb.) bağlı olarak mekânı kullanmada belirli kısıtlarla karşılaşmalar hipotezi bu araştırmanın çıkış noktasını oluşturmaktadır. Bu bağlamda çalışmada, kadın ve mekân etkileşimini açıklamak için kent planlama ve kentsel tasarım disiplinlerinde belirlenen mekânsal nitelikler çerçevesinde kadınların gündelik yaşamında kent merkezini deneyimlerken karşılaştıkları durumlar mekânsal ve sosyal boyutları ile açıklanmaya çalışılacaktır. Bunun için Erzurum ilinde 30 kadın ile nitel bir araştırma yapılmıştır.

**Anahtar Kelimeler:** Toplumsal cinsiyet, kent merkezi, erişim, kadının günlük hayat pratikleri

## GİRİŞ

Çağdaş coğrafya disiplininin en önemli terimi durumunda olan mekân, doğal ve yapıli çevreyi esas almaktan ziyade ‘sosyal mekânın’ üzerinden kavramsallaştırılır. Mekân, çeşitli eşitsizlik biçimlerinin ve ikiliklerin (karşıtlık kategorilerinden oluşan kadın-erkek, yoksul-zengin, siyah-beyaz, vb.) üretilip tanımlandığı toplumsal ilişkileri barındırır ve bunları her an yeniden üretir. Bu eşitsizliklere konu olan temel alanlardan biri de mekân ve toplumsal cinsiyet etkileşimidir. Toplumsal cinsiyet biyolojik cinsiyetten bağımsız olarak toplumun kadına ve erkeğe yüklediği rollerle tanımlanır ve biyolojik temelli olmadığı için sonradan öğrenilmiş bir kavramdır. Dolayısıyla bu sonradan öğrenme zaman içerisinde değişebilir, gelişebilir. Bu bağlamda toplumsal cinsiyet kavramı coğrafi bir bakış açısı da sunmaktadır. Tüm dünyada yüzyıllardır tartışma konusu olan bu kavram kültürel, sosyal ve ekonomik boyutlarda karşımıza çıkarken aynı zamanda mekânsal boyutta da hayatımızda yerini almıştır. Mekânsal boyut “Kadının yeri evidir.” söylemiyle en küçük toplumsal birim olan aile ortamında karşımıza çıkar. Ardından mahalle ve kent ortamına kadar genişler. Bunun nedeni ise şehirlerin, içinde barındırdığı toplumun oluşturduğu ilişkilerin mekana yansıdığı yerler olarak karşımıza çıkıyor olmasıdır. Kadınlar ise geçmişten günümüze kentsel mekanı hep “tasdik edilmiş” mekanlar içerisinde deneyimlemişlerdir. 20. yüzyılın ortalarına gelindiğinde bile kadınlar için evden uzak ev olarak düşünülmüş “yarı-kamusal” alanlar tasarlanmıştı (Kern, 2020).

Kentleri ve kentsel değişimi anlamının başlangıç noktasını mekânsal yapıları üreten toplumsal ilişki ve süreçleri anlamak oluşturur. Bu bağlamda Akpınar vd.’nin (2009) belirttiği gibi mekân, toplumsal ilişkiler, kültür, değer ve normlardan bağımsız ve boş bir coğrafi öge değildir. Mekânın ilişkiselliği, onun bedenden küresel ölçüğe kadar tüm toplumsal ilişkiler için bir aksiyon alanı olmasıyla ilgilidir. Çağdaş coğrafya disiplininin en önemli terimi durumunda olan ‘mekân’, fiziksel /doğal çevre ile yapıli çevreyi esas almaktan ziyade ‘sosyal mekân’ın (Anthamatten ve Hazen, 2010) üzerinden kavramsallaştırılır. Mekân, çeşitli eşitsizlik biçimlerinin ve ikiliklerin (karşıtlık kategorilerinin) üretilip tanımlandığı toplumsal ilişkileri barındırır ve bunları yeniden üretir. Siyah-beyaz, yoksul-zengin, kır-kent, kadın-erkek ve özel-kamusal ayrımlarında olduğu gibi mekân, sosyal gruplar arasında inşa edilmiş olan, birbirine karşıt ikiliklere göre yapılanarak politikaların etkisini de barındırır. Knox ve Pinch (2006)’de çalışmalarında, mekân ve toplumsal cinsiyet arasındaki bu güçlü ilişkinin bir yansıması olarak kentsel sosyal coğrafya araştırmalarında yaygınlıkla konu edinilen özellikle kadın-erkek ayrımını üreten heteroseksüel erkek baskınlığını ve bunun oluşturduğu eşitsizlik biçimlerinin önemine dikkat çekmektedir.

1970’li yıllardan itibaren yükselen, Henri Lefebvre (1991), Manuel Castells (1972), David Harvey (1973) gibi isimlerin öncülük ettiği radikal kent kuramları “mekânı, toplumsal, ekonomik, politik ve ideolojik süreçlerden ayrı tutulamayacak toplumsal bir ürün olarak kavramsallaştırarak, kentsel alanda ve hizmetlerde cinsiyet eşitsizliğinin ve ayrımcılığının izlerini süren çalışmaların gelişmesine de zemin hazırlamışlardır. Radikal kent kuramlarının açtığı yoldan ilerleyen, ancak onların cinsiyet körlüğünü eleştiren feminist coğrafyacıların ve kent bilimcilerinin çalışmaları, kentsel deneyimi ataerkil cinsiyet normlarından ve güç ilişkilerinden bağımsız ve ayrı düşünmenin imkansızlığını vurgulamışlardır. Bu çalışmalar, bir yandan kent planlamalarının ve yönetimlerinin erkek egemen doğasını ifşa etmişler, diğer yandan da kentsel yaşama ve deneyimlere ilişkin mevcut yaklaşımları cinsiyet eşitsizliği bağlamında eleştirel analize tâbi tutmuşlardır. Bunu yaparak da kentsel mekânın yalnızca cinsiyet eşitsizliklerini yansıtmadığını aynı zamanda bu eşitsizlikleri de yeniden ürettiğini göstermişlerdir. Mekân tartışmalarıyla kadınların konumu meselesini birlikte ele alan ilk çalışmalar 1970’lerde ortaya çıksa da kent bilim, coğrafya ve kent planlaması gibi disiplinlerin toplumsal cinsiyet ilişkilerine eğilmeleri 1980’leri bulmuştur.

1980’lerde başlayan kentsel feminizm hareketleri, kadın sorunu ve mekânsal sorunları birlikte ele almıştır. Mekânsal sorunlar ile kastedilen çoğunlukla kentlerde cinsiyetçi pratiklerin yol açtığı sömürü, marjinalleştirme, güçsüzleştirme, kültürel emperyalizm ve psikolojik baskıdır. Sözelimi, kentte yaya dolaşmayı sorunsallaştıran şu sorular mekânsal sorunlara cinsiyetçi pratiklerin yol açtığını ortaya koyar: *Saat kaç? Sokakta kimler var? Neredeyiz? Kentte yaya olarak dolaşırken hangi aktörler ayırt edilir? Bebek arabasıyla yürüyen bir annenin kentteki hareketleri nasıl sınırlandırılmıştır?* Kadınların gündelik kentsel deneyimlerinin halen son derece toplumsal cinsiyet temelli olduğu şu sorular aracılığıyla açıklığa kavuşturulabilir: *“Neden bebek arabam tramvaya uymuyor? Neden kestirme yol çok tehlikeli olduğundan eve yarım kilometre daha fazla yürümek zorundayım?, G20 protestosunda tutuklanırsam çocuğumu kamptan kim alacak?”* Bu türden sorular kadınların kent alanında karşılaştığı kısıtlamaları ortaya koyar. Fiziksel kamusal alanın planlanmasında kadınların taleplerinin/ihtiyaçlarının göz ardı edilmesi, toplumsal cinsiyet rollerinin kadınlara yüklediği “çifte sorumluluk” ve kente ilişkin güvenlik sorunları ve şiddet bunlardan bazılarıdır. Feminist coğrafya bu sorunları görünür kılmak üzere cinsiyetçi süreçlerin toplumsal-mekânsal bağlamda çözümlenmesi sürecini başlatmıştır (Alkan, 2011).

Modern toplumsal hayatın organizasyonunun temelini oluşturan özel-kamusal ayrımı, kadın ve mekân etkileşiminin en belirgin biçimde somutlaştığı alanlardan birisidir. Bu ayrım, özellikle de kentsel ölçekte ele alındığı zaman, kadınların kentteki davranışlarını, pratiklerini ve aynı zamanda hareket alanlarının sosyo-mekânsal sınırlılıklarını açıklamaya imkan veren bir çerçeve sunar. Kadın ve erkeğin gündelik yaşamın kendilerine sunduğu fiziksel imkânları kullanma konusundaki eşitsiz ilişkilere tarihsel süreçte baktığımızda öncelikli olarak aile hayatının geleneksel unsurlarının günümüze nasıl taşındığı ile başlamak yerinde olacaktır. Bu açıdan baktığımızda Osmanlı toplumunda ailenin yaşam dünyasını kırdı köyün, kentte mahallenin belirlediğini söyleyebiliriz. Mahalle insanın içinde yaşadığı tipik hane biçimiye avlulu evdi. Avlulu evler, ev içi yaşamı dış dünyadan yalıtacak ve mahremiyeti en üst düzeye çıkaracak şekilde tasarlanmıştı. Bu yüzden avlulu evlerin pencereleri sokağa değil, avluya bakmaktaydı. Mahalleler, dar sokaklar ve dehlizler tarafından çevrelenmişti. Yerleşim alanları olarak kullanılan mekânların önemli bir kısmının mahremiyet endişesiyle inşa edilmiş avlulara ayrılması, sokağı haliyle daraltıyordu. Bu yerleşim alanlarının belirgin bir başka özelliği de çıkmaz sokakların fazla olmasıydı. Çağdaş kentlerde sokaklar, kentsel ulaşımı ve bütünleşmeyi sağlamak amacıyla insan akışını kolaylaştıracak şekilde tasarlanır. Bu yüzden sokakların birbirine bağlanması esastır. Oysa geleneksel yerleşim birimlerinde amaç insan akışını kolaylaştırmak değil, aile hayatının güvenlik ve mahremiyetini sağlamaktı (Hançer, 2021).

Kamusal denilen alan bütün kadınlar için belirli bir sınırlandırma barındırırken bazı kadınların bu sınırlandırmadan aldıkları pay daha fazladır. Sınıfsal aidiyet, inançlar, gelenekler, kültür ve benzeri unsurlar kadınların kamusal alan kullanımının süresini ve biçimini belirler. Tarihsel süreçte erkeklerin kamusal kadınların özel alanla ilişkilendirilmesi, kadınların mekânsal hareketliliğini sınırlamış, erkek egemenliğini sürdürerek kadınların kendilerini gerçekleştirmelerinin önünde bir engel ve eşitsizlik oluşturmuştur. Bu açıdan tıpkı kentin merkez-kenar (suburb) bölünmesi gibi feminist tartışmalar ve mekân ile ilişkisi bakımından feminist coğrafya tartışmaları, kamusal-özel mekân ayrımına karşı çıkar. Feminist kuram, kamusal-özel ayrımını, kadınların özel alanda maruz kaldığı baskı ve sömürüyü meşrulaştırması gerekçesiyle reddeder (Deniz, 2018).

Toplumların özel ve kamusal alanlardaki yaşantısıyla iç içe geçtiği toplumsal cinsiyet rejimi, kentleri evcillik ideolojisine göre biçimlendiren bir alt yapıya dönüştürerek mekânsal organizasyona yansımaktadır. Çağdaş kentler ve onları dönüştüren uygulamalar erkek-merkezli planlama-tasarımın bakış açılarıncı süregelmiş, toplumsal cinsiyet eşitsizliği tarafından şekillendirilmiş, büyük ölçüde erkek eseridir. İlk endüstriyel Avrupa ve Kuzey Amerika kentleri de konut alanları ile endüstri, ticaret ve yönetim alanları arasındaki net ayrımlar üzerinden inşa edilmiştir. Bu tür bir ayrımın kökeninde ise endüstri devriminde cinsiyet rolleri üzerine temellendirilen ve toplumsal cinsiyet eşitsizliğini kentsel mekâna taşıyan ideoloji yer almaktadır. Günümüzde feminist teori ve kent ilişkisine dair eleştiri geliştirmenin faydalı yönlerinden biri gittikçe büyüyen kentlerdeki eşitsiz yapılanmanın ve yaşamın taşıdığı sorunlara çözüm getirme potansiyelidir. Jarvis vd. (2009) bu konuya ilişkin araştırma gereksinimini *‘Feminist teorideki son gelişmeler kentsel yeniden yapılanmanın sosyal etkileşim*

*ağlarını zayıflatıp zayıflatmadığı ya da ahlaki gözetim alanları olarak artan öneme tanık olup olmadığımız sorusuyla ilgili bir tartışma başlatmaktadır'* cümlesiyle özetlemektedir. Gerçekten de bugünün kentlerinde konut alanları ve dolayısıyla özel mekân ile buradaki üretim ve tüketim pratikleri, kocalarının otoritesine tabi kalarak mümkün olduğunca en kadınsı ev kadınlığı becerilerini sergilemeleri beklenen eşitsiz bir alan olarak kadınlar için tasarlanmış ve mekânsal bakımdan ayrılmıştır. Hepimizin gündelik yaşamımızda tanık olabileceği gibi kentsel alanın üretiminin “*özel mekânın tüketici beklentisi ile ideal kadınlık normları çarkını çevirecek rekabete dayalı mekân tasarımına ve ev temizliğine ilişkin toplumsal ve kültürel normlardan yararlandığı*” gayet açıktır. Özel mekâna kadınlığın bir parçası ve görevi olarak yüklenen “*ev işinin hijyenden daha çok saygınlık izlenimi yaratmaya dönük*” olarak kurgulanması, mekânın özel kamusal ayrımının nasıl da toplumsal cinsiyet rejimiyle bağdaşık olduğunu anlamamızı sağlamaktadır (Dias , Blecha, 2007).

Feminist tartışmalar başlı başına kamusal-özel ayrımına karşı çıkarken, bu bölünmenin ideolojik boyutunu da çoğunlukla cinsiyete dayalı iş bölümü ile ilişkilendirmişlerdir. Buna göre tıpkı iktidar ilişkileri gibi mekân da cinsiyete dayalı iş bölümü üzerine kurulu erkek iktidarını sürdüren ideolojik bir ayrıma tekabül eder. Tarihsel süreçte cinsiyete dayalı iş bölümü ile kadınların ev içi rollerle sınırlandırılmaları, kamusal alan uzak tutulmalarını meşrulaştırmıştır. Feministler, kadınların gündelik yaşamda deneyimledikleri fiziksel tecrübeleri açığa çıkarmak ve bu yönde bir farkındalık oluşturmak ister. Feminizmin bu bağlamdaki temel eleştirisi, kadınların bedensel tecrübelerinin toplumsal normlar tarafından şekillendirildiğidir. Sözelimi hamilelik kadınlar açısından kamusal alandaki görünürlüklerinin açığa çıktığı bir deneyimdir. Toplumsal normlar tarafından kamusal alanı tecrübe edişleri kontrol edilen kadınların yeterince özgür olamadıkları görülür (Geniş, Akkırman, 2020).

Kentsel yaşamda kadınların deneyimlediği bir diğer sorun kent içi ulaşım yön veren ataerkil normlardır. Kadınların kenti kullanım hakları, ev içi sorumluluklar, işgücü piyasasındaki konumları ve kültürel normlar tarafından belirlenir. Nitekim hane içi gelir kaynaklarının eşitsiz dağılımı ya da gelirin kontrolünün erkekte olması kadınların kentteki hareketliliğini sınırlandıran nedenlerin başında gelir. Kent içi ulaşım-güzergâh ve zamanlamalar, fiyat tarifeleri ve bilgi ve yönlendirmeler- temelde sermayenin, yani çoğunlukla erkeklerin gereksinmelerine yanıt verecek şekilde planlanır. Bu bağlamda cinsiyetçi ulaşım örüntüleri, kadınların ihtiyaçlarını gözetmez ve dahası onların kamusal mekânı kullanmaları önünde engel oluşturur. Bunun yanında kadınların tek başlarına yolculuk yapmalarına izin verilmeyen kuralların varlığı da onların kent içindeki görünürlüklerini belirleyen ataerkil kontrol mekanizmalarının başında gelir. Kamusal alanda güvenlik sorunu kadınların emniyet ve korku hislerini pekiştiren bir diğer sorundur. Kadınlar kamusal alanda gece vakitlerinde dolaşmayı ve yabancıları tehdit olarak algılar. Onların, en çok korktukları suç, tecavüz suçudur. Cinsel taciz kadınların belirli saatlerde belirli yerlerde olmamaları gerektiği yönündeki normları pekiştirir ve hatta geleneksel cinsiyetçi rolleri yansıtan dil aracılığıyla cinsel saldırı kurbanı olan kadınların giyim tarzları üzerinden taciz ve şiddet normalleştirilmeye çalışılır. Kadınların korkusunun sosyal işlevi, onları kontrol etmek ve hayatlarını kısıtlamaktır. Kamusal alan kullanımını kısıtlayan güvenlik sorunu kadınların iş tercihlerini de şekillendirerek onları yardımsever cinsiyetçilik bağlamında koruyucu rol üstlenen erkeklere bağımlı kılar. Tüm bunlar kadınları evin özel alanına bağlayarak ve çekirdek aile kurumu içinde onların ev içi emekten sorumlu olduğu hetero-ataerkil kapitalist sistemi desteklemeye yarar (Miriöglü, 2020)

Bu kapsında mekânsal düzenlemeler bir yandan cinsiyete dayalı kimliklerin açıklayıcı temsilleri olurken bir yandan da toplumsal cinsiyet kimliklerinin oluşumunda inşa edicidir. Konutlar, spor salonları, alışveriş merkezleri, tekel marketler, kamusal tuvaletler, parklar, ibadethaneler, kafeler, kiraathaneler, barlar, okullar, cadde ve sokaklar günlük yaşamın toplumsal cinsiyet ilişkilerinden bağımsız değildir. İbadethanelerde, kiraathanelerde, sokak aralarında, halı sahalarda, askeri alanlarda, eğlence mekânlarında, gündelik yaşamdaki erkek egemen kullanımlar, erkek olmaya ve kadın olmaya dair cinsiyet kimlikleri oluşturmaktadır. Bazı mekânların sadece erkekler ve bazılarının sadece kadınlar tarafından kullanılması, mekân kullanımında zamansal kısıtlılıklar gibi günlük tezahürler, cinsiyete dayalı kimlikleri inşa etmektedir. Daha eşit bir dünya için kadınların mekân kullanımının, mekânsal hareketliliğinin ve bu hareketliliği kısıtlayan nedenlerin anlaşılması gereklidir. Cinsiyetçi olmayan şehir -feminist şehir- kentin toplumsal cinsiyet normları üzerinden planlanmadığı ve yalnızca kadınların değil kentte yaşayan herkesin hayatını sınırlandırıp zorlaştıran engellerin aşıldığı şehirlerdir. Ataerkil/kapitalist normların, güvenlik ve ulaşım sorunlarının, kadınları eve bağlayan sebeplerin ve formel iş gücüne katılımlarının önündeki engellerin ortadan kaldırıldığı ve bunun için de öncelikle yerel siyaset düzeyinde toplumsal cinsiyet eşitliğine yönelik politikaların hayata geçirildiği şehirlerdir (Miriöglü, 2018).

### **Kent Ve Kent Merkezi Kavramları**

Köy kavramının karşıtı olarak farklılıklara odaklanan Keleş (2017) kenti; “sürekli toplumsal gelişme içinde bulunan ve toplumun, yerleşme, barınma, gidiş-geliş, çalışma, dinlenme, eğlenme gibi gereksinmelerinin karşılandığı, pek az kimsenin tarımsal uğraşılarda bulunduğu, köylere bakarak nüfus yönünden daha yoğun olan ve küçük komşuluk birimlerinden oluşan yerleşme birimi” şeklinde tanımlar.

Kent merkezi kavramı ise kentsel ve merkezîyet kavramlarının birbirleriyle kurduğu bağdan oluşmuştur. Kentsel kavramı kentin yönetim organizasyonunun, nüfus yoğunluğu ile birlikte oluşturduğu özellikleri temsil eder. Kentsel alanlar, nüfus yoğunluğunun yönetiminin yapılabilmesi için ihtiyaç duyulan birimler ve ekonomik,

sosyal fonksiyonları barındırır. Bir kurumun veya bir fonksiyonun var olduğu yerler merkezîyet kazanmaya başlamaktadır. Başarılı ve sürekli merkezîyet çevredeki farklı büyüklükteki alanlara hizmet eden fonksiyonların gruplanmasına yol açar. Bu gruplama merkezde meydana gelir. Kentsel merkezîyet bir alanda toplanmış merkezî fonksiyonların fazlalığından oluşur. Nitelenen tüm hususlar esas olarak kent merkezinde ortaya çıkar. Bu bağlamda kent merkezleri gündüz nüfusu faaliyetlerinin ve yüz yüze iletişimin fazla olduğu, alınan kararların, yapılan işin ve yaratılan değerın yüksek olduğu, ulaşım, inşaat ve altyapı ağlarının yoğun olduğu, arazi değerlerinin en yüksek olduğu alanlar olarak tanımlanabilir (Keleş, 2011).

Bir kenti kent merkezlerine bakarak tanımlamak ve anlamak mümkündür. Kent merkezînin sınırları konut alanı, sanayi alanı, kentsel alanlar gibi net değildir. Başta ticaret fonksiyonları olmak üzere kişisel, profesyonel, ticari ve kurumsal hizmetlerin iç içe geçtiği alanlardır. Bu etmenler nedeniyle kent merkezlerine konut dışı fonksiyonların yoğunlaştığı alan anlamıyla merkezî iş alanı demek ve bu alanın sınırlarını parsel/bina oranı, ulaşılabilirlik gibi etmenlerle kentsel mekanın özelliklerini dikkate alarak çizmek daha doğrudur. Benzer şekilde söz konusu sınırlar gündelik hayat pratikleri temelinde cinsiyet rollerine göre de farklılıklar gözetebilir. Kent merkezînin temel ihtiyaçların tamamına cevap verebilecek nitelikte olması kadının hayatında önem arz etmektedir. Kadın ve erkeğin cinsiyet rollerine ve gündelik hayat pratiklerini etkileyen diğer etmenlere bağlı olarak kent merkezîni kullanım şekli ve kullanım alanı da çeşitlilik göstermektedir (Solmaz, 2021).

### Amaç

Kentsel mekanda kullanım açısından karşılaşılan zorlukları anlamadaki en önemli araç, kenti kadınların günlük kullanım pratikleri üzerinden bilmekten geçmektedir. Günlük kullanım pratikleri kentsel mekan ile doğrudan ilişkilidir. Aile biriminin temel yaşam alanı olan “ev” dışına çıkınca kent tüm kullanıcıların ikinci evidir. Bu kapsamda kentin, tüm kullanıcı gruplarının ihtiyaçlarına cevap vermesi gerekmektedir. Bu çalışma ise gündelik ilişkiler çerçevesinde ataerkil tutumların, kadınların kentsel mekânsal hareketliliği ile ilişkisine odaklanmıştır. Çalışmanın odaklandığı temel problem, mekânın cinsiyet temelinde eşitsiz kullanımınıdır. Bu bağlamda çalışma, belirli parametreler üzerinden kadınların gündelik yaşamda kenti deneyimlerken karşılaştığı kısıtlamalar ve zorlukları tespit etmek için mekânsal analiz çalışmaları ve çıktıları elde etmeyi amaçlamaktadır. Kadınlar kültürel etkilere (eşlerine bağlı olma durumları, ev sorumlulukları, çocuk bakma yükümlülükleri vb.) ve çevresel etkilere (ulaşım zorlukları, güvenliksiz ortamlar, dışarı çıkmanın pahalı olması, mekanın sunduğu zorluklar vb) bağlı olarak mekânı kullanmada belirli kısıtlamalara tabidir hipotezi araştırma kapsamında değerlendirilecektir.

### YÖNTEM

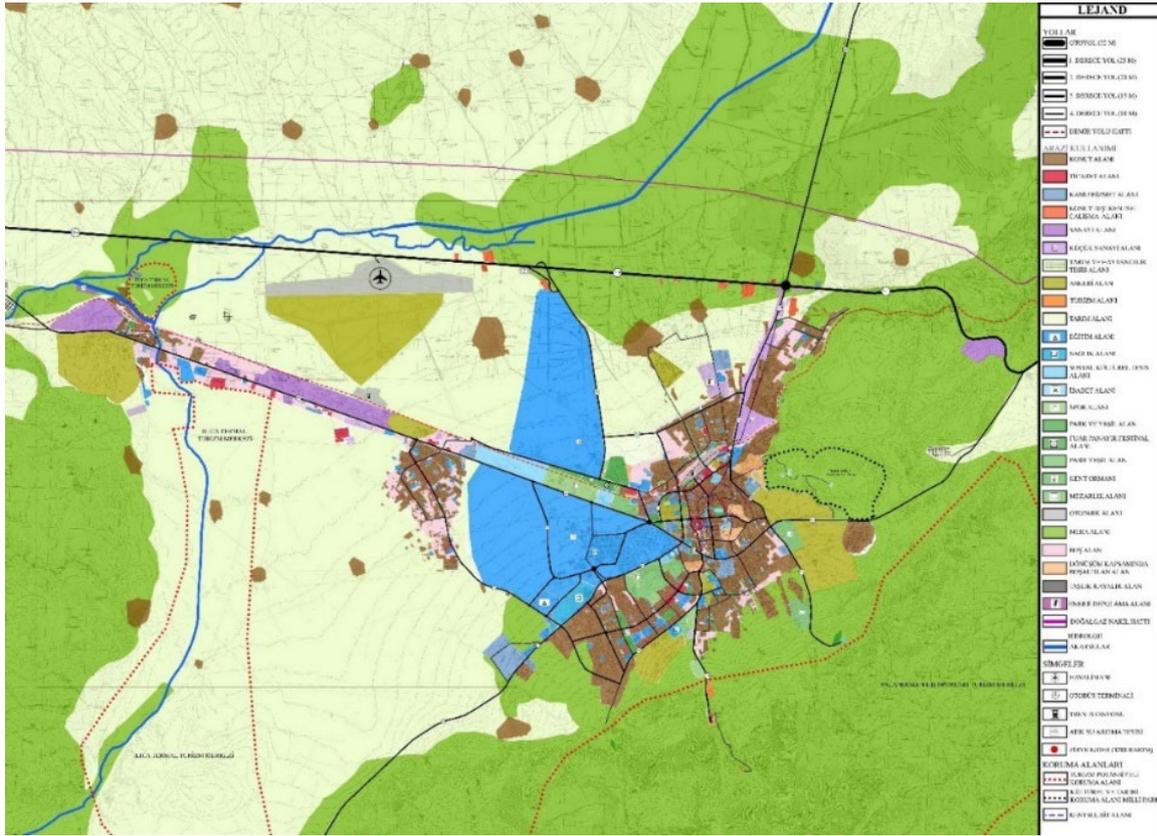

Araştırmanın temel yöntemi nitel yöntem, veri toplama yöntemi ise yarı yapılandırılmış görüşmedir. Görüşmeler ise 2023 yılının Kasım ayı içerisinde yer alan iki hafta boyunca yapılmıştır. Çalışma Erzurum ilinde yürütülmüştür. Çalışma kapsamında kadınların kenti nasıl kullandıkları, kenti nasıl algıladıkları, kenti kullanırken yaşadıkları zorluklar tespit edilmeye çalışılacaktır. Çalışma için görüşülecek kişiler yaş, eğitim, medeni hal, çalışma durumu, çocuk sahipliliği gibi kriterler göz önünde bulundurularak ve farklı kültürel ve kişisel değerlere, farklı yaşam tarzlarına ve farklı ekonomik koşullara dayanarak seçilmiştir. Çalışma boyunca iki haftayı kapsayacak şekilde katılımcılarla detaylı anlatım ve soru-cevap yoluyla gündelik hayat pratikleri hakkında detaylı görüşmeler yaptım. Katılımcıların gündelik hayat pratiklerini anlattıkları süre boyunca çözüm sürecinde gözden kaçan bir şey olmaması için görüşmeler kayıt altına alınmıştır. Araştırma soruları “mekan”, “ulaşım”, “zaman” ve “mekânsal kısıtlılıklar” ana başlıklarına dayandırılarak oluşturulmuştur. Literatür taraması ve daha önceden bu konu hakkında yürütülmüş diğer çalışmalar incelenmiş olup, bu bağlamda araştırma soruları ise yine günlük hayat pratiklerine odaklanarak oluşturulmuştur:

- I. Kent merkezinde en çok tercih ettiğiniz alanlar nelerdir ve buraları neden tercih ediyorsunuz?
- II. Kent merkezine erişim için tercih ettiğiniz ulaşım türleri nelerdir ve neden bunları tercih ediyorsunuz?
- III. Kent merkezini en çok hangi zaman aralığında kullanıyorsunuz? Neden bu saatleri tercih ediyorsunuz?
- IV. Kent merkezini bir kadın olarak deneyimlerken karşılaştığınız zorluklar var mı? Varsa ne gibi zorluklarla karşılaşıyorsunuz?

### Çalışma Alanı

Doğu Anadolu Bölgesi'nin kuzeydoğu kesiminde yer alan Erzurum ili, 25.066 km<sup>2</sup> lik alanıyla bu bölgenin en büyük, Türkiye'nin ise dördüncü büyük ilidir. İlin deniz seviyesinden yüksekliği 1859 m'dir. Merkez ilçesinin alanı 5892 ha ile ülke topraklarının % 3,2' sini kaplayan il, 39 10'-40 57' kuzey enlemleri ve 40 15'-42 35' doğu boylamları üzerinde bulunur.

Erzurum il merkezî genel arazi kullanımları incelendiğinde kent merkezinde yer alan ticaret fonksiyonları konut alanları ile çevrelenmiştir. Kent merkezînin batısında Atatürk Üniversitesi'nin yerleşkesi, kuzey-batısında ise Erzurum Teknik Üniversitesi'nin yerleşkesi bulunmaktadır. Söz konusu yerleşkeler ise meskun alanların yaklaşık %36.9'luk kısmını oluşturmaktadır. Atatürk Üniversitesi'nin batısında konut bölgesi, konut bölgesinin batısında ise organize sanayi bölgesi yer almaktadır. Erzurum Teknik Üniversitesi'nin kuzey-batısında ise otogar ve havalimanı yer alırken kent merkezînin güneyinde ise Palandöken Kayak Merkezi yer almaktadır (Şekil 1).

Şekil 1: Erzurum Arazi Kullanımı (Anonim, 2020)

## BULGULAR VE DEĞERLENDİRME

Çalışmaya Erzurum ilinde ikamet eden toplam 30 kişi katılmıştır. Katılımcılar evli (15), bekar (15), çocuklu (9), çalışan (14), çalışmayan (16), öğrenci (8) ve hamile (5) kategorilerden toplam 30 kadındır. %50'sini evli kişilerin oluşturduğu katılımcılardan 9 kişinin çocuğu vardır. Yaşları 21 ile 62 yaş arasında değişen bu katılımcıların sahip olduğu en düşük eğitim düzeyi lise mezuniyetidir. Katılımcıların 6 değişken kapsamında genel özellikleri Şekil 2'de belirtilmiştir.

| DEĞİŞKEN         |                         | N  | %    |
|------------------|-------------------------|----|------|
| Yaş              | 21-25                   | 9  | 30   |
|                  | 25-29                   | 8  | 26.6 |
|                  | 30-39                   | 4  | 13.3 |
|                  | 40-49                   | 3  | 10   |
|                  | 50-62                   | 6  | 20   |
| Medeni Durum     | Evli                    | 15 | 50   |
|                  | Bekar                   | 15 | 50   |
| Çocuk Sahipliği  | Var                     | 9  | 30   |
|                  | Yok                     | 21 | 70   |
| Hamilelik Durumu | Var                     | 5  | 16.6 |
|                  | Yok                     | 25 | 83.3 |
| Eğitim Durumları | Lise Mezunu             | 12 | 40   |
|                  | Üniversite Mezunu       | 10 | 33.3 |
|                  | Üniversite Öğrencisi    | 4  | 13.3 |
|                  | Yüksek Lisans Öğrencisi | 4  | 13.3 |
| Çalışma Durumu   | Çalışıyor               | 14 | 46.6 |
|                  | Çalışmıyor              | 16 | 53.3 |

Şekil 2: Katılımcıların genel özellikleri (Yazarlar tarafından oluşturulmuştur.)

Katılımcıların mekan kullanımına yönelik tercihleri ve bunun nedenlerini belirlemek adına hazırlanan araştırma sorusu - I ve gelen cevaplar Şekil 3 'te gösterilmiştir. Tercih ettikleri mekanları tercih nedenleri ile

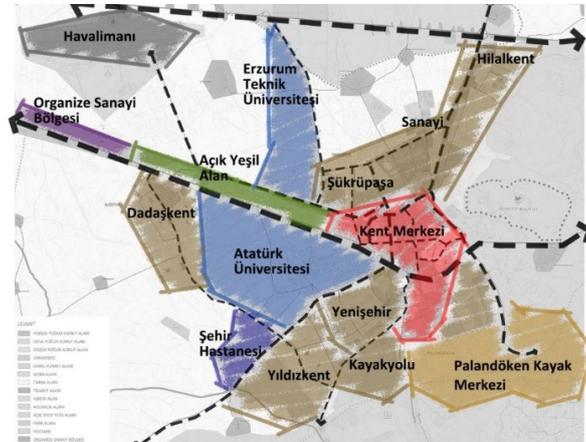

beraber belirten kullanıcılar aynı soru için mekanların itici faktörlerinden de bahsetmiştir. Bu olumsuz nedenler ise araştırma sorusu – I(A) başlığı altında değerlendirilmiştir. Mekanların tercih edilmesine rağmen olumsuz faktörler ise Şekil 6’da gösterilmiştir.

| Kent merkezinde en çok tercih ettiğiniz alanlar nerelerdir ve buraları neden tercih ediyorsunuz? | Tercih Edilen Mekanlar | N   | %   | Tercih Edilme Nedenleri (Örnek Cümleler)   |
|--|------------------------|-----|-----|--|
|  | Cumhuriyet Caddesi     | 30  | 100 |  |
| Terminal Caddesi   | 21                     | 70  |     | <ul style="list-style-type: none"> <li>- "Üniversiteye yakın ve gece geç vakitlere kadar canlı ve işlek bir mekan oluyor."</li> <li>- "Aydınlatma açısından hiçbir problem yaşamıyorum."</li> <li>- "Alışveriş merkezi olduğu için çocuğumla beraber rahat vakit geçirebiliyorum."</li> <li>- "Diğer konumlara göre daha fazla mekan çeşitliliği sağlıyor."</li> </ul> |
| Üniversite   | 9                      | 30  |     | <ul style="list-style-type: none"> <li>- "Şehir merkezi ve okulum çok yakın olduğu için araca ihtiyaç duymuyorum."</li> <li>- "Geç vakitlere kadar işlek ve aydınlık oluyor."</li> <li>- "Sürekli sosyal etkinlikler ve ücretsiz ring servisleri bulunuyor ve yaya öncelikli olması yürüyüş açısından konfor sağlıyor."</li> </ul>                                     |
| Yıldızkent   | 3                      | 10  |     | <ul style="list-style-type: none"> <li>- "Şehir merkezi ve terminal caddesine göre mekanlar daha az kalabalık oluyor."</li> <li>- "Erzurum'un en büyük hastanesi burada bulunuyor ve toplu taşıma ile de kolay erişim sağlanıyor."</li> <li>- "Daha geniş ve planlı yollar ve park alanları var."</li> </ul>   |
| Kayakyolu  | 2                      | 6.6 |     | <ul style="list-style-type: none"> <li>- "Sadece aile bireylerimi ziyaret etmek için kullanıyorum"</li> </ul>  |

Şekil 3: Kullanımda en çok tercih edilen mekanlar ve nedenleri (Yazarlar tarafından oluşturulmuştur.)

Kentsel mekanda en çok tercih edilen mekanlar genellikle Erzurum kent merkezi ve yakın çevresidir. Cumhuriyet Caddesi'nin tüm kullanıcılar tarafından cevap olarak verilmesinin ana nedeni kent merkezinde yer alıyor olmasıdır. Buna ek olarak her yaş grubundan çeşitli kullanıcıların ihtiyaçlarına cevap verebilecek fonksiyon çeşitliliğine sahip olan bir alan olmasıdır. Terminal Caddesi ise yine kent merkezine yakınlığı, alışveriş merkezinin yer alması, üniversiteye yakınlığı ve kafe sayısının fazla olması nedeniyle %70 oranında katılımcılar (N: 21) tarafından tercih edilmektedir. Atatürk Üniversitesi kampüsü alanı ise yine kent merkezine yakınlığı, açık yeşil alan sunuyor olması, alan içerisinde bisiklet ve yürüyüş yollarının varlığı nedeniyle tercih edilmiştir. Kayakyolu semti sadece aile bağlarından kaynaklı tercih edilen bir mekan iken Yıldızkent semti ise hastaneye yakınlığı, üniversiteye yakınlığı ve Terminal/Cumhuriyet Caddelerine göre daha sakin olması nedeniyle tercih edilmektedir. Söz konusu mekanların kent bütünü kapsamında kavramsallaştırılmış alanlar analizi ve fotoğraflı alan analizi Şekil 4 ve Şekil 5'te gösterilmiştir.

Şekil 4'te Erzurum kentinin ana ulaşım aksları belirtilmiştir. Buna ek olarak yarı yapılandırılmış görüşmelerde katılımcılar tarafından tercih edilen mekanlar ve çevresi Erzurum kent bütünü kapsamında belirtilmiştir. Konut alanlarının buldukları semtler noktasal olarak kesin sınırları ile belirtilmemiş olup kavramsallaştırılmıştır. Semtlerin isimleri ile beraber haritalaştırılmasının nedeni ise görüşmelerde katılımcılar tarafından bahsediliyor olmasıdır.

Şekil 4: Kent bütünü kapsamında semtlerin kavramsallaştırılmış alanlar analizi (Yazarlar tarafından oluşturulmuştur.)

Şekil 7' de araştırma sorusu - II mekânsal hareketliliği sağlamak amacıyla katılımcıların tercih ettiği ulaşım türlerine ve tercihlerini etkileyen nedenlere odaklanmıştır. Görüşmelerde özel araç, otobüs ve minibüs dışında başka bir ulaşım aracı tercihler arasında yer almamıştır. Alınan cevaplar doğrultusunda tercihler birincil ve ikincil tercih olarak kategorize edilmiştir.

Birincil tercihlerde en sık tercih edilen ulaşım türü özel araçtır. Sıralama otobüs ve minibüs şeklinde devam etmektedir. Özel aracın tercih sebepleri arasında zaman tasarrufu, konforlu yolculuk, güzergaha bağımlı olmama ve istenilen saatlerde kullanabilme gibi faydalar varken aynı zamanda katılımcılardan bazıları ise eşlerine bağımlı olmamak adına özel aracı ikincil tercih olarak belirtmiştir.

Otobüs birincil tercihlerde ikinci sıradadır. Nedenleri arasında araçların özellikle bebekli kadınlar için daha geniş alan sunması, minibüse kıyasla kentin ara sokaklarına daha çok girmesi, daha çok durak sayısına sahip olması ve akıllı ulaşım kartları sayesinde daha ekonomik olması sayılabilir. Ayrıca eşlerine bağımlı olmak istemeyen kadınlar tarafından da (bir yere gidebilmek için eşinin iş çıkışı saatini beklemek, ehliyet sahibi olmadığı için ya da olsa dahi özel araçlarının sürekli eşinde olması vb.) sıkça tercih edilen bir ulaşım türüdür. Birincil tercihlerin sonuncusu ise minibüstür. Tercih edilme nedenleri arasında otobüse göre sık sefer sayısına sahip olması, hızlı olması, daha geç saatlere kadar seferlerine devam etmesi ve araç sahibi olmayanlar için otobüs olmadığı zaman dilimlerinde taksilere göre daha ucuz bir ulaşım türü olması sayılabilirken, bazı katılımcılar ise küçük araçlar olması, daha çok erkek kullanıcılar tarafından tercih edilmesi ve konfor alanının olmaması gibi faktörleri itici nedenler arasında belirtmiştir.

| Kent merkezinde tercih ettiğiniz ulaşım türleri nelerdir ve neden bunları tercih ediyorsunuz? | Tercih Edilen Ulaşım Türleri |  | I. TERCİH |      | II. TERCİH |      | Tercih Edilme Nedenleri (Örnek Cümleler)   |
|---|------------------------------|--|-----------|------|------------|------|--|
|   |                              |  | N         | %    | N          | %    |  |
|   |                              |  |           |      |            |      |  |
| Özel Araç   |                              |  | 13        | 43.3 | 7          | 23.3 | <ul style="list-style-type: none"> <li>- " Zaman açısından tasarruf etmemi sağlıyor."</li> <li>- " Daha rahat ve konforlu ulaşım sağlayabiliyorum."</li> <li>- " Herhangi bir güzergaha ya da saate bağımlı olmuyorum. "</li> <li>- " Kentte daha aktif hareket edebiliyorum ve araç sahipliği dışarıya çıkma konusunda itici sebep oluyor."</li> <li>- " Daha sık sefer sayısına sahip olduğu için durakta geçirdiğim vakit azalıyor."</li> <li>- " Minibüslere göre araçları büyük olduğu için konforu nispeten daha iyi oluyor."</li> <li>- " Akıllı ulaşım kartlarına sahip olduğum için minibüslere göre daha ekonomik oluyor."</li> <li>- " Hamile ve engellilere yönelik uygulamalar kent genelinde az ve bu otobüsler açısından da öyle fakat yinede minibüslere göre alan geniş olduğu için yinede daha rahat olabiliyor."</li> <li>- " Belirli hizmet saatleri içerisinde istediğim her an her yere ulaşabiliyorum, eşime ve saatlerine bir bağlılığım olmuyor, bundan dolayı tercih ediyorum."</li> <li>- " Sık sefer sayısına sahipler."</li> <li>- " Minibüsler daha çok an ahatlar üzerinden hareket ettiği için otobüslere göre daha hızlı ulaşım sağlayabiliyorum."</li> <li>- " Daha geç saatlere kadar seferleri devam ediyor."</li> <li>- " Tercihen otobüsün geç geldiği ya da dolu geldiği zaman hızlı ve ucuz ulaşım alternatifi sağlıyor."</li> </ul> |
| Otobüs  |                              |  | 12        | 40   | 12         | 40   |  |
| Minibüs   |                              |  | 5         | 16.6 | 11         | 36.6 |  |

Şekil 7: Kentsel Hareketlilik İçin Tercih Edilen Ulaşım Türleri (Yazarlar tarafından oluşturulmuştur.)

Görüşmeler herhangi bir saat aralığına referans verilmeden müdahale edilmeksizin yürütülmüştür. Saat aralıkları belirlenirken görüşmelerde belirtilen en erken ve en geç saat referans alınmıştır. Başlangıç ve bitiş saatleri arasındaki gruplandırma ise görüşmelere göre yazarlar tarafından tablo yapılırken oluşturulmuştur.

Şekil 8'de yer alan saat aralığındaki ilk grup mesai ya da okul saatine göre başlayıp öğle arası da dahil olan zaman dilimini kapsar ki bu, katılımcılar tarafından en az tercih edilen zaman aralığıdır. Tercih edilme nedenleri arasında ise çocuğunu okula götürmek ya da az kalabalık olmasından dolayı hastane ve sağlık ocaklarını erken saatlerde kullanmak sayılabilir.

İkinci gruplama öğle arasından sonra mesai çıkışına kadar olan zaman dilimini kapsamaktadır. Tercih sırasında da ikinci sırada yer almaktadır. Tercih edilme nedenleri arasında ise eşinin, çocuğunun geliş saatine kadar dışarıda vakit geçirme, işlerini halletmek gibi faktörler sıralanabilir.

Son kategori ise mesai saati çıkışından akşam dokuza kadar olan zaman dilimini kapsamaktadır. Dönüş saatlerini toplu taşıma saatlerine, aile iznine, eşinin işten dönüşünü beklemek, sokakların ıssızlaşması durumlarına göre belirlediklerini ifade eden kullanıcıların yarısından fazlası kentsel mekanda zaman geçirmek için bu saat aralığını tercih etmektedir. Kenti kullanım sırasında zaman odaklı kullanıma yönelik katılımcılar tarafından hem kültürel hem de mekânsal temelli faktörler sıralanmıştır. Ataerkil tutumlara ek olarak kentsel ulaşım planlaması da kullanıcıların kentte geçirdikleri zamanı etkilemektedir. Ulaşım planlamasında mesai ya da okul çıkışı temelli planlamalar yapılırken bu saat ve güzergahlarda yoğunluk oluşturmaktadır. Kentsel ulaşım çalışmayan ev hanımlarını da (the non-working housewife) hesaba katacak ve kentsel hareketliliği dinamik tutacak şekilde planlanabilir.

| Kent merkezini en çok hangi zaman aralığında kullanıyorsunuz? Neden bu saatleri tercih ediyorsunuz? | Tercih Edilen Saat Aralıkları | N    | %  | Tercih Edilme Nedenleri (Örnek Cümleler)  |
|---|-------------------------------|------|--|---|
|   | 08:00 - 13:00                 | 3    | 10   | - "Sabah işe giderken ve öğle arası için vakit geçirirken aktif kullanıyorum."<br>- "Çocuğumu sabah okula götürdüğüm ve öğlede aldığım için en aktif kullandığım saat aralığı oluyor."<br>- "Hasta aile bireyim ile ilgilendiğim için sabah saatlerinde yoğunluğun az olmasından dolayı sıklıkla hastane ve sağlık ocağını kullanıyoruz." |
| 13:00 - 17:00   | 11                            | 36.6 | - "Evde yerine getirmem gereken sorumluluklardan dolayı ideal giriş-çıkış saati oluyor."<br>- "Akşam eşim ve çocuklarım geldiği için genellikle bu vakitlerde müsait oluyorum."<br>- "Alışveriş yapmak ve arkadaşlarıma gitmek için uygun zaman aralığı oluyor."<br>- "Eşim ve çocuklarım evde olmuyor. Güne erken başladığım için bu saate işim bitmiş oluyor ve kendime vakit ayırabiliyorum."   |   |
| 17:00 - 21:00   | 16                            | 53.3 | - "Okuldan sonra iş yerine de gittiğim için genellikle bu saatler arasında aktif kullanıyorum."<br>- "Ailem evimizin etrafı çok ıssız olduğundan dolayı geç kalmama izin vermiyor. Dönüş saatimi ona göre ayarlıyorum. Derslerimden dolayı benim için ideal saat aralığı bu oluyor."<br>- "Ben ve arkadaşlarımla iş çıkış saatlerine göre bu saatler en uygun saat aralığı oluyor."<br>- "Çoğunlukla bize eşlik etmesinden ötürü eşimin iş çıkış saatlerine göre bende dışarıya çıkış saatlerimi ayarlıyorum."<br>- "Kendim araba kullanamadığım ve evimin bulunduğu konuma toplu taşıma araçları çok uzun aralıklarla geldiği için eşimin işten çıkışını bekliyorum." |   |

Şekil 8: Katılımcıların kenti en sık kullandıkları saat dilimleri (Yazarlar tarafından oluşturulmuştur.)

Şekil 9'da katılımcılar yarı yapılandırılmış görüşmelerde tercihlerini başlıklardan bağımsız belirtmişlerdir, bunlar yazarlar tarafından görüşmelerden sonra kategorize edilmiştir. Görüşmelerden elde edilen verilere göre sosyo-kültürel temelli, ulaşım temelli ve ekonomi temelli zorlukların varlığı söz konusudur.

Sosyo- kültürel temelli zorluklar ise kendi içerisinde kadın olmakla ilgili, ebeveyn olmakla ilgili ve eş durumundan kaynaklı zorluklar olarak kategorize edilmiştir. Katılımcıların belirttiği zorlukların %55'ten fazlası sosyo-kültürel temellidir. Bunların içerisinde ise yaklaşık %30'luk bir oranla kadın olmakla ilgili zorluklar yer almaktadır.

Belirli kategoriler altında yer alan zorluklar incelendiğinde ulaşımaya yönelik park alanı sorunları, ara ve dar sokaklarda aydınlatmaya yönelik sorunlar ve toplu taşıma araçlarının çok kalabalık olması sayılabilir.

Ekonomiye dair zorluklar ise akıllı ya da ücretsiz ulaşım kartlarından dolayı toplu taşımaların çok kalabalık olmasının kullanıcıları bazen daha pahalı ve uzun süreli seyahate itmesi, maddi açıdan daha uygun mekanların (kahvehane, çay ocakları vb.) hep erkek kullanıcılar için hizmet ediyor olmasının kadın kullanıcıları daha maliyetli (kafé, pastane vb.) mekanları kullanması zorunda bırakması gibi faktörler sıralanabilir.

Sosyo- kültürel temelli zorluklar başlığı altında eş durumundan kaynaklı zorluklar dışarıya çıkarken ya da ev kullanımında bile saatlerini eşine göre ayarlamak, hamilelik ya da çocuktan kaynaklı eşinin toplu taşımayı kullanmasını istememesinden dolayı sürekli olarak onu beklemek gibi nedenleri kapsar.

Ebeveyn olmakla ilgili zorluklar çocuk bakma görevinin sürekli kadınlara bırakılmış olması durumu, kaldırımda gereksiz peyzaj ve kent mobilyalarından dolayı bebek arabasına sahip kullanıcıların kullanamaması ya da sürekliliğini sağlayamaması, kaldırım yüksekliklerinin fazla olması ya da rampalarının süresizliği sorunlarını kapsar.

Kadın olmakla ilgili zorluklar ise sokakların kahvehaneler tarafından işgali sonucu kullanılamaması, kadın şoförlere yönelik trafikte kaba tutum ve davranışlara maruz kalmak, aydınlatma eksikliğinden ve sokak hayvanlarından dolayı tedirginlik hissi yaşamak, kadınların da vakit geçirebileceği daha az maliyetli mekanların olmaması ve hamile kadınların konforunu sağlamaya yönelik faaliyetlerin olmaması gibi etmenlerdir.

## Kent merkezini bir kadın olarak deneyimlerken karşılaştığınız zorluklar var mı? Varsa ne gibi zorluklarla karşılaşıyorsunuz?

| Kategorize Edilmiş Zorluk Türleri<br>(Verilen cevaplara göre kategorize edilmiştir.) | N  | %    | Yaşanılan Zorluklar<br>(Örnek Cümleler)   |
|--|----|------|---|
| 1. Ulaşım Temelli Zorluklar  | 7  | 23.3 | - "Araba ile herhangi bir yere gidince çok fazla park sorunu ve ara sokaklarda aydınlatma sorunu yaşadığım için çok az dışarıya çıkıyorum."<br>- "Erzurum'da tercih edilen mekan ve semt sayısı kısıtlı olduğu için o mekanlar çok kalabalık oluyor. Bundan dolayı özel araç ile seyahat ederken caddelerin kalabalıklığından dolayı tedirginlik duyuyorum. Rahat edemiyorum."<br>- "Toplu taşıma araçları kalabalık oluyor. Kişisel konfor alanım yok oluyor. Ayrıca alternatif yok."<br>- "Otobüsler daha sık gelmelerine rağmen mesai ve okul çıkışlarında çok kalabalık oluyor. Diğer saatlerde ise geliş sıklıkları azalıyor."<br>- "Serbest ve sınırsız binış hakları olduğu için yaşlılar otobüsü çok sık kullanıyor. Buda yer sıkıntısı oluşturuyor."<br>- "Otobüsler için akıllı kart uygulamaları var fakat bazen çok kalabalık oluyorlar. O zamanlarda ya ekonomik olarak daha pahalı ya da vakit olarak daha uzun süreli seyahat etmek zorunda kalıyorum."<br>- "Ekonomik olarak daha ucuz mekanlar (mesela kahvehaneler, çay ocakları vb.) hep erkeklerle hizmet ediyor. Kadınlar için kafe, pastane gibi kullanımlar mevcut ve pahalı."<br>- "Ekonomik olarak eşime bağlı olduğum için ve dışarıya çıkmak her anlamda çok pahalı olduğu için dışarıya çıkış sıklığıma ihtiyaçlarıma ve ekonomime göre ayarlıyorum." |
| 2. Ekonomi Temelli Zorluklar   | 6  | 20   | - "Kendim çalışmadığım için dışarıya çıkmak ya da evimde misafir ağırlamak isterken bile saatlerimi her zaman eşime göre ayarlıyorum."<br>- "Herhangi bir yere giderken eşim çocuğumla yalnız otobüse binmemi istemediği için buna ek olarak bu durum benide zorladı için genellikle onun beni bir yere götürüp getirmesini bekliyorum."  |
| 3. Sosyo-kültürel Temelli Zorluklar  | 17 | 56.6 | - "Dar olan kaldırımlar genellikle ağaçlar tarafından konforsuz kullanım sağladığı için bebek arabasıyla rahat hareket edemiyorum."<br>- "Kaldırımlar genellikle ya yüksek ya da rampasız olduğu için bebek arabası ile dışarıya çıktığımda çok zorlanıyorum."<br>- "Bazı zamanlarda çocuğumun ihtiyaçlarına cevap verecek alanlar olmadığı için bu durum beni genellikle evde kalmaya itiyor."   |
| 3-a. Eş Durumundan Kaynaklı Zorluklar  | 3  | 9.9  | - "Sokaklar kahvehaneler tarafından işgal edildiği için rahat kullanım sağlamıyor."<br>- "Aydınlatma eksikliğinden ve sokak hayvanlarından dolayı güvenlik konusunda endişeler duyuyorum."  |
| 3-b. Ebeveyn Olmakla İlgili Zorluklar  | 5  | 16.6 | - "Özel araç kullanımı sırasında kadın şoförlere çok kaba davranıyorlar."<br>- "Yaya olarak gezindiğim sırada sürekli erkeklerin kaba sokak kültürüne maruz kalıyorum."<br>- "Kış mevsimi uzun ve sert geçen bir ilde yaşadığım için temizleme işlemleri yeteri kadar yapılmıyor. Bu durumda hamile olarak yürüyüş alanı bulamıyorum."<br>- "Hamile bir kadın olarak kentte açık alanlarda yeteri kadar oturma ve dinlenme alanları yok."<br>- "Kadınların vakit geçirebileceği ekonomik olarak uygun ve mekan olarak konforlu mekanlar az."  |
| 3-c. Kadın Olmakla İlgili Zorluklar  | 9  | 29.9 |   |

Şekil 9: Kent kullanımı sırasında kadın olarak karşılaşılan zorluklar (Yazarlar tarafından oluşturulmuştur.)

## TARTIŞMA VE SONUÇ

Kadınların kentsel mekanı deneyimlemesine yardımcı olan en önemli araçlardan birisi kent planlamasıdır. Kentsel mekanda kullanım açısından karşılaşılan zorlukları anlamadaki en önemli araç ise kenti kadınların günlük kullanım pratiklerini bilmekten geçmektedir. Günlük kullanım pratikleri kentsel mekan ile doğrudan ilişkilidir.

Çalışma; kadınların kent kullanımı sırasında yaşadığı problemlerin temelinde, kadınlara karşı toplumda kabul görmüş ataerkil tutum ve baskınlıklardan kaynaklı kullanım kısıtlılıklarının varoluşu ya da kentin kadın kullanıcıların talep ve gereksinimlerine cevap verecek nitelikli mekanlara sahip olmayışı varsayımlarının değerlendirilmesi ve onların kent kullanım hakkını kısıtlayan ana nedenleri tespit etmeyi amaçlamıştır.

Çalışma çıktıları değerlendirilince, yüzyıllardır süre gelen tartışmaların temelinde yatan ataerkil kültürel normlar çerçevesinde ailedeki erkeklerin izni ile dışarı çıkma-çıkamama, gidilebilecek yerlere, nasıl ve ne zaman gidilebileceğine ilişkin kısıtların etkisini hala sürdürüyor olduğu söylenebilir. Söz konusu kısıtlar sadece "Kadının yeri evidir." kabulünde, kadına atfedilen birincil mekanda ki yaşantısını değil aynı zamanda kentsel mekanda gideceği yerlerden, kenti kullanım süresine hatta kenti nasıl kullanacağına kadar birçok durumu etkilemektedir. Bu durumda, eril baskının mekân kullanımı üzerine etkisini anlamak ve var olduğunu söylemek mümkündür.

Çalışmanın çıktılarına bakılınca, Erzurum kenti kapsamında eril baskıdan ziyade mekanın katılımcılara sunduğu birtakım zorluklar ve zorunluluklarında varlığı söz konusudur. Kent planlaması açısından çalışma verilerinin, kentte kadın kullanıcıların hizmet eden uygulamalarının olmadığı ve tercih edilen alanların salt olumlu mekanlar sunuyor olmasından tercih edilmediği gerçeğini gösterdiği söylenebilir. Genel olarak bakıldığında mekânsal eleştiriler ulaşım planlaması, kentsel ve kişisel konfor alanı, sosyal donatı alanlarının eksikliği, yürüyüş ve bisiklet yollarına erişim için yer değiştirme zorunluluğu, ekonomik olarak kadınların erkek kullanıcıların göre sosyalleşmesinin maliyetli olması sayılabilir.

Ulaşım konusu özelinde park alanı yetersizliği, alternatif eksikliğinden dolayı tercih edilen mekanlarda trafik yoğunlaşması, çalışmayan ev hanımları için toplu ulaşımın pahalılığı ve mesai saatlerine göre yine eril bir tutumla planlaması gibi öne çıkan noktaların önemi vurgulanabilir. Ekonomi başlığı altında öne çıkan sorunlar akıllı ulaşım kartlarının denetimsiz kullanımı nedeniyle zaman zaman pahalı ulaşım itici faktörlerin

oluşturulması, ekonomik olarak eşine bağlı kadınları kullanım tercihlerini eşine bağımlı şekilde yürütmesi ve kentte kadınlara yönelik sunulan mekanların erkek kullanıcılarına sunulan mekanlardan pahalı olması şeklinde sıralanabilir. Sosyo-kültürel sorunlar bebek arabasına sahip kadınların toplu taşımayı özgür (bebek arabasına sahip kadının yer kaplaması gibi) kullanamaması, kaldırımlarda yanlış konumlanmış peyzaj ve kent mobilyası öğelerinin (kaldırımın ortasında yer alan bir ağaç gibi) yine bebek arabasına sahip kadınlara kullanım zorluğu doğurması, kaldırım ve rampaların kesintiye uğraması, hamile bir kadının evinin yakınında yürüyüş yolu ya da aydınlık bir güzergah olmamasından dolayı alternatif alanlara seyahat etmesi ve kaldırımların kahvehaneler tarafından işgal edilmesinden dolayı taşıt yoluna taşan yürüyüşler gibi mekânsal sorunları kapsarken, aynı zamanda günlük hayat planlamasını eşine göre yapan, toplu taşıma kullanmamasını isteyen eşini bekleyen, özel araçlarının sürekli eşi tarafından kullanılan kadınların toplu taşımaya yönelmeleri ve çocuk bakımının sürekli kadınlara yüklenmiş bir görev olmasından kaynaklı sosyal sorunları da kapsar.

Söz konusu tüm bu sorunların özünde temel eğitimde insanlara toplumsal cinsiyet eşitliği hakkında yeteri bilgi verilmemesi, erkeklerin kadınları anlama bilincine sahip ortamlarda yer almıyor oluşları, karar vericilerin çoğunluğunun erkek olması ve yine tüm kesimlerde yer alan kadınlara kente yönelik bilgilendirilmelerin ulaşmıyor oluşu faktörlerinin yer aldığı söylenebilir. Bu sorunlara çözüm odaklı yaklaşmak gerekirse önce sosyal ve mekânsal çözümler olacak şekilde ikili sistem benimsemek gerekir. Sosyal çözümlerinde temelinde eğitim, bilinçlendirme, erişim faktörleri yer alırken mekânsal çözümlerde ise kadınların ihtiyaç ve taleplerini anlamak, kente kadın gözünden bakabilmek, kadınların mekana yönelik karar süreçlerine katılımını sağlamak gibi faktörlerin yer aldığı söylenebilir. Söz konusu çözümün odağında eğitim kurumları, kamu kurum ve kuruluşları ve sivil toplum kuruluşlarına roller düşmektedir. Özellikle belirli alanlarda uzmanlaşmış faaliyet gösteren sivil toplum kuruluşları kadın kullanıcılarla doğrudan temasta bulunabilir, uygulamacılar ve kullanıcılar arasında köprü görevini üstlenebilir.

Toplumsal cinsiyet eşitliği konusunda toplu taşıma ve yürüme gibi erişilebilir ulaşım modlarına odaklanılmalıdır. Toplu taşıma güzergâhları ve durakları, kadınların ihtiyaçlarını göz önünde bulundurarak planlanmalıdır. Bu, kadınların iş, eğitim ve diğer aktivitelere daha rahat erişim sağlayacaktır. Aynı zamanda güvenlik konusunda aydınlatma, güvenlik kameraları ve polis devriyeleri gibi önlemler alınarak kadınların toplu taşıma araçlarını ve durakları kullanırken kendilerini güvende hissetmeleri sağlanabilir. Kadınların güvenliği ve rahatlığı için yaya alanları ve kamusal mekânlar tasarlanmalıdır. Bu alanlarda daha fazla aydınlatma, güvenlik kameraları, acil yardım düğmeleri gibi önlemler alınabilir. Ayrıca, yeşil alanlar, banklar ve kadınların sosyalleşebileceği, dinlenebileceği alanlar da oluşturulmalıdır. Kadınları ulaşım imkanlarından daha fazla faydalanmaya teşvik etmek için kadın odaklı kampanyalar düzenlenebilir ve eğitimler verilebilir. Bu, kadınların ulaşım araçlarını nasıl kullanacaklarını öğrenmelerine ve güvenlik konusunda bilinçlenmelerine yardımcı olabilir. Kadınların ev içi ulaşımı da göz ardı edilmemelidir. Özellikle kırsal bölgelerde, kadınların tarım işleri ve diğer ev içi işler için ulaşım ihtiyaçları göz önünde bulundurulmalı ve bu ihtiyaçları karşılayacak politikalar oluşturulmalıdır. Bu politika ve pratik öneriler, ulaşım planlamasında cinsiyet eşitliği ve kadınların güvenliği konusunda daha etkili stratejiler geliştirmeye yardımcı olabilir.

Kadın odaklı kamusal mekanlar, aydınlık ve güvenli yerler, çocuk bakım ve oyun alanları, eğitim ve mesleki gelişim fırsatları, yeşil alan ve rekreasyon alanları mekânsal kısıtlılıklarda kadınların ihtiyaçlarını karşılayarak toplumsal cinsiyet eşitliğine katkıda bulunabilir ve kadınların sosyal, ekonomik ve kültürel olarak güçlenmelerine yardımcı olabilir.

Yaya mekanlarında kadınlara yönelik güvenlik, engelsizlik, çocuk ve bebek bakım alanları, yeterli oturma alanları ve sosyal alanlar bulunabilir. Kadınlar için yaya mekanlarının güvenliği önemlidir. Bu nedenle, aydınlatma düzeyinin yüksek olması, güvenlik kameralarının bulunması ve polis devriyelerinin düzenli olarak yapılması gibi önlemler alınmalıdır. Kadınlar genellikle çocuklarıyla birlikte dolaşırlar. Bu nedenle, yaya mekanlarında çocuk arabası ve bebek arabası için uygun alanlar, emzirme odaları ve çocuk oyun alanları gibi olanaklar sağlanabilir. Kadınlar alışveriş ya da uzun yürüyüşlerden hariç hamilelik durumunda da dinlenme ve oturmaya ihtiyaç duyarlar. Bu nedenle, yeterli sayıda oturma alanı ve bank sağlanmalıdır. Ek olarak parklar, kafeler veya açık hava oturma alanları gibi kadınların bir araya gelebileceği ve sosyalleşebileceği yerler oluşturulabilir.

Çalışmanın daha nitelikli olabilmesini sağlamak adına ise ekonomik sorunlardan söz eden katılımcıların kendi gelirleri ya da haneye ait gelirler çalışmaya dahil edilebilir. Bu çalışmanın çıktılarına ekonomik olarak farklı statüye sahip kadınların mekânsal farklılaşması verisini kazandırabilir. Buna ek olarak katılımcılar en düşük lise mezuniyetine sahiptir. Eğitimsiz ya da ilkökul mezunu olan kadınların da çalışmaya dahil edilmesi kentte farklı sorunların ya da kullanımların varlığını gündeme getirebilir.

## ÖZET

Kalite yönetimi, bir organizasyonda iş süreçlerinin sürekli iyileştirilmesini esas alarak ve önceden tespit edilen müşteri beklentilerine, ihtiyaçlarına ve çıkarlarına yönelik gereksinimleri yöneten bir yönetim felsefesidir. Bu kapsamda kalitenin iyileştirilmesi ve geliştirilmesinde bazı yöntemler öne çıkmaktadır. Deming döngüsü planla-uygula-kontrol et-önlem al sözcüklerinin baş harflerinden oluşan ve kalite süreçlerinde sürekli iyileşme amacıyla kullanılan bir yönetim aracıdır.

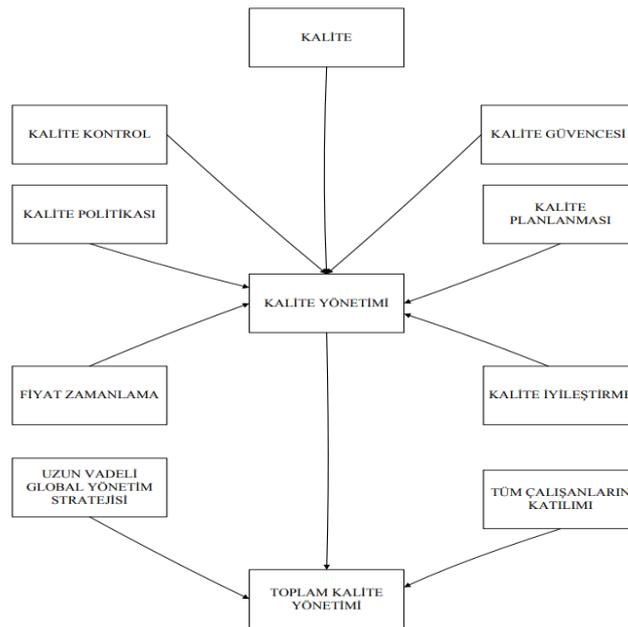

Bu çalışmada Karadeniz Teknik Üniversitesi Orman Endüstri Bölümü öğrencilerinin eğitim ortamının fiziksel, sosyal ve kültürel yapısının iyileştirilmesi amacıyla sistematik bir iyileştirme yaklaşımının uygulanması amaçlanmıştır. Bu amaçla Deming döngüsü kullanılarak her bir aşama incelenmiş ve sonuçlar ortaya konmuştur. Yapılan memnuniyet anketleri, beyin fırtınası analizi ve odak grup toplantıları sonucunda memnuniyet düzeyinde değişimlerin olduğu görülmüştür.

Anahtar kelimeler: kalite, kalite kontrol, deming döngüsü,

## 1. GİRİŞ

Toplam kalite öncüleri “kalite” kavramını farklı boyutlara vurgu yaparak ele almışlardır. E. Deming’e göre, “Amaca ve pazara uygun şekilde en düşük maliyetle tahmin edilebilir ve güvenilir istikrar düzeyidir” Juran’a göre, “Kullanıma uygunluktur” Crosby’ye göre, “İhtiyaçlara uygunluktur” Taguchi’ye göre ise “Ürünün nakliyesinden topluma ulaşıncaya kadar verilen kayıptır” (1).

Toplam Kalite Yönetimi (TKY) hedef kitlenin kalite gereksinimlerini belirlemek, buna göre hatasız çıktı sağlayıp hedef kitleyi memnun etmek ve kaliteyi iyileştirip, geliştirmek amacıyla sürekli çabalarda bulunulması faaliyetlerini içermektedir. TKY’nin en önemli özelliği kaliteli ürün ve hizmet sağlanmasını sistemde yer alan belirli bir kitleye bırakılmasındansa sistemdeki herkesle paylaşılmasıdır (2). Şekil 1’de Toplam Kalite Yönetimi kavramının diğer kavramlarla ilişkisi gösterilmiştir (3).

Şekil 1. Toplam Kalite Yönetiminin Diğer Kavramlarla İlişkisi

### 1.1. Kalite İyileştirme

Toplam Kalite Yönetimi'nin temelinde hedefin belli bir standart tutturmak olmadığı, seviyenin sürekli ve hızlı bir tempoda gelişmek olduğu görülmektedir. Yani toplam kalite kontrol yönetiminin temelini sürekli iyileştirmeye dayandığı görülmektedir. Sürekli iyileştirme/kaizen sürece yönelik, küçük fakat sık adımlarla sürekli ilerleme ve yeniliklerle iyiyi arama çabasıdır (3). Japon tarzı üretim anlayışı olan Kaizen, süreç gelişimine odaklanarak sürece bütün çalışanları da dahil eder ve bu sayede bireysel çalışma anlayışını değil takım çalışması bilincini kazandırır (4).

Süreç iyileştirilirken sorunlarının kaynağına inebilmek için verilerle çalışılmalı ve toplanan veriler doğru şekilde kullanılmalıdır. Verilerin toplanabilmesi ve değerlendirilebilmesi için istatistiksel tekniklere başvurulmaktadır. Bu teknikler; çetele tablosu, histogram, pareto analizi, neden-sonuç çözümlenmesi, gruplandırma, serpilme diyagramı, kontrol grafikleri ve beyin fırtınası vb. şekilde sıralanabilir (5). Bu çalışmada kullanılan beyin fırtınası tekniği "Bir grup insan tarafından, yeni fikirler üretmek için kollektif düşünme gücünü artırmaya yönelik olarak uygulanan bir tekniktir" şeklinde ifade edilebilir (6).

### 1.2. Deming Döngüsü (PUKÖ)

PUKÖ döngüsü kalite süreçlerinde sürekli iyileştirme amacıyla kullanılan bir yönetim metodudur. İsmi; Planla, Uygula, Kontrol Et, Önlem Al aşamalarının baş harflerinden almaktadır. Döngü, 1930'lu yıllarda Walter Andrew Shewhart tarafından bulunmuş, ilerleyen yıllarda William Edwards Deming tarafından geliştirilmiştir. Deming ilk olarak bu yöntemi "Shewhart Döngüsü" olarak adlandırmış fakat 1959 yılında Deming tarafından "Deming Döngüsü" ve "Deming Çarkı" adlarıyla da anılmıştır ve son olarak "PUKÖ döngüsü" halini almıştır (7).

Döngü dört basamaktan oluşmaktadır. Bu aşamalardan ilki planlama aşamasıdır. Planlama aşamasında; iyileştirilmesi gereken konu veya sorun açık bir şekilde tespit edilmeli, mevcut durum analiz edilmeli ve fırsatlar ortaya koyulmalıdır. İhtiyaçlar önem derecesine göre sıralanmalı ve yapılabilecek seçenek veya seçenekler belirlenmeli, en büyük etki yaratabilecek seçenek tercih edilmelidir. Bu aşamada yetkililer ve sorumluların organize edilmesi, süreç boyunca oluşabilecek riskler ve bu risklerin nasıl yönetileceğine dair planlama bütün süreç boyunca daha az sorunla ilerlenmesine katkı sağlamaktadır. Planlama aşamasının ardından uygulama aşaması gelmektedir. Planlama aşamasında organize edilen personellerin eğitimi gerekiyorsa önce bu eğitimler sağlanmalıdır. Uygulama süreci kolay ve anlaşılabilir şekilde hazırlanmalıdır ve bu aşama da birimler arası koordinasyon etkin bir şekilde sağlanmalıdır. Bu aşamada oluşan problemler ve ihtiyaçlar not edilmeli ve yeni bir döngü oluşturulması halinde göz önünde bulundurulmalıdır. Kontrol et aşamasında belirlenen hedeflere ulaşıp ulaşılmadığı değerlendirilmektedir. Bu değerlendirme geçerli ve güvenilir bir şekilde gerçekleştirilmelidir. Planlanan hedeflerden sapmalar görülmesi halinde düzeltici eylemler kullanılabilir. Önlem al aşamasında ise projenin başarı durumuna, belirlenen hedeflere ulaşp ulaşılmadığına karar verilir. Eğer başarılı bir süreç elde edildiye kazanımların devamı için belirli önlemler alınmaktadır. Anlatılan bütün aşamaların bilimsel bir dayanağa sahip olması için daha önce de bahsedilen temel istatistiksel teknikler ile bazı inceleme ve değerlendirme tekniklerine başvurulması gerekmektedir (8).

Yükseköğretim kurumlarında kalite güvence sistemi, yükseköğretim hizmetlerinden yararlanan bütün bireylere kaliteli hizmet sunulmasını, kaliteli hizmetin sürekli halde devamını sağlamak için denetlenmesini içeren değerlendirme ve gözden geçirme çalışmalarının tümüdür. Asıl amacı bilgiyi araştırmak, aktarmak ve yenilemek olan üniversitelerin bilgi ve bilim hizmeti üretme sürecinde kalite yönetim anlayışını benimsemesi, yetiştirilecek bireylerin daha nitelikli olması açısından çok önemli bir husustur. Bu nedenle yükseköğretim kurumlarında kalite yeterliliklerinin tespiti ve geliştirilmesi konusundaki çalışmalar kurum işleyişine ve sürekli bir halde kaliteli hizmet sağlanması açısından önemli katkılar sağlamaktadır (9).

1980'li yıllardan itibaren, yükseköğretim alanında kalite bilincini artırmaya yönelik çalışmaların yaygınlaştığı bilinmektedir. Kalitenin yükseköğretim alanında ana hedeflerinden biri olduğu 1984 yılında İngiltere'de beyan edilmiştir ve 1985 yılında Fransa'da Ulusal Değerlendirme Komitesi kurulmuştur. Bu tarihleri izleyen yıllarda, Avrupa ülkelerinde kalite değerlendirme sistemi ile ilgili çalışmalara başlanmıştır (10). Türkiye'de ise 1990'lı yılların sonlarına doğru "yükseköğretimde kalite" kavramı tartışılmaya başlanmış ve 1997 yılında "Kalite Değerlendirme Projesi" kapsamında sekiz üniversitenin yer aldığı ve 13 farklı bölümün dahil edildiği pilot bir uygulama gerçekleştirilmiştir (11).

Bu çalışma kapsamında, Orman Endüstri Mühendisliği öğrencilerinin eğitim sürecine yönelik memnuniyet düzeylerinin geliştirilmesine yönelik uygulamaların sistematik bir yaklaşımla ortaya koyulmasına amaçlanmaktadır. PUKÖ döngüsü çerçevesinde gerçekleştirilecek olan memnuniyet anketleri, öğrencilerin eğitim programıyla ilgili deneyimlerini anlamak, eksiklikleri belirlemek ve sürekli iyileştirme için temel bir referans noktası oluşturmayı hedeflemektedir.

## 2. MATERYAL VE YÖNTEM

### 2.1. Materyal

Bu çalışmada Orman Endüstri Bölümü öğrencilerinin eğitim ortamının fiziksel, sosyal ve kültürel yapısının iyileştirilmesi amacıyla sistematik bir iyileştirme yaklaşımının uygulanması amaçlanmıştır. Bu amaçla “Deming döngüsü” olarak ifade edilen PUKÖ çevrimi esas alınarak sürekli iyileştirme faaliyeti yürütülmüştür. Bu amaçla aktif durumdaki 1., 2., 3., ve 4., sınıf öğrencilerine 2023-2024 güz dönemi Ekim-Aralık aylarında memnuniyet anketleri uygulanmıştır. Orman Endüstri Mühendisliği öğrencilerinin sınıf dağılımına göre kişi sayısı Tablo 1’de verilmiştir.

Tablo 1. Anket Uygulanan Kişi Sayısı

| Anket Uygulanan Sınıflar | Kişi Sayısı |
|--------------------------|-------------|
| 1. Sınıf                 | 44          |
| 2. Sınıf                 | 57          |
| 3. Sınıf                 | 19          |
| 4. Sınıf                 | 32          |
| Toplam                   | 152         |

Öğrencilerin mevcut durumdan memnuniyet düzeyleri birinci düzey memnuniyet anketi ile araştırılmıştır. Sonuçlar incelendikten sonra PUKÖ çevrimi kapsamında beyin fırtınası toplantıları ile sonuçlar tartışılmış, uygulamalar yapılmış ve ikinci düzey memnuniyet anketi ile kontrol aşaması sağlanmıştır. Tekrar yapılan toplantılar ile sonuçlar tartışılmış ve yeni PUKÖ oluşturma planlamalarına zemin hazırlanmıştır.

### 2.2. Yöntem

Çalışmada birinci ve ikinci düzey olmak üzere 2 aşamada anket formu kullanılmıştır. Beşli likert tipi ölçek şeklinde (1:tamamen katılıyorum, 2:katılıyorum, 3:kararsızım, 4:katılmıyorum, 5:tamamen katılmıyorum) hazırlanan anket 25 sorudan oluşmaktadır. Anket içerisinde fiziksel ve teknolojik altyapı, öğrenci kulüpleri ve sosyal imkanlara ilişkin yargılar yer almaktadır.

Birinci düzey anketin ardından memnuniyetin düşük olduğu (ortalama 3 ve üzeri) yargıların iyileştirilmesine yönelik planlamalar için beyin fırtınası tekniği ile toplantı gerçekleştirilmiştir. Beyin fırtınası tekniği, bir durum hakkında veya problemle alakalı olarak fikir veya çözüm önerilerini toplamayı amaçlamaktadır. Bu teknikte, bir problem mevcuttur ve bu soruna yönelik çözüm önerileri dile getirilmektedir. En önemli konu ise katılımcıların, durum veya problem hakkında bilgi ve tecrübeleri olan uzmanlardan oluşması gerekliliğidir (12). Bu nedenle memnuniyet derecesi düşük yargılar bölüm başkanı, bölüm kalite komisyonu başkanı, öğrenci kulübü başkanı ve çalışma yürütücülerinden oluşan ekip tarafından değerlendirilerek çözüm planlamaları yapılmıştır.

Verilerin analizinde SPSS (Statistical Package for the Social Sciences) istatistik paket programı kullanılmıştır. Değerlendirmede frekans dağılımı analizi kullanılmıştır.

## 3. SONUÇLAR VE TARTIŞMA

Yapılan bu çalışmada, KTÜ Orman Endüstri Mühendisliği Bölümü kalite iyileştirme çalışmaları kapsamında bölüm öğrencilerinin belli başlı konularda memnuniyet seviyeleri ölçülerek, memnuniyetin daha yüksek olduğu bir ortam oluşturulması hedeflenmiştir.

### 3.1. Planlama aşaması

Yapılan çalışma kapsamında PUKÖ döngüsünün ilk aşaması olan planlama aşamasında memnuniyetin düşük olduğu konuları belirlemek için birinci düzey memnuniyet anketi uygulanmıştır. Yapılan ankete ait ortalama değerler Tablo 2 de verilmiştir.

Tablo 2. Birinci Düzey Memnuniyet Anketi Sonuçları

| YARGILAR  | Likert ortalamaları |
|---|---------------------|
| Bölümümüz öğrencilerine sunulan teknolojik imkanlardan memnunuzum.            | 2,73                |
| Programda yer alan derslerin uygulama açısından yeterli olduğunu düşünüyorum. | 2,64                |
| Dersliklere ulaşmada zorluk çekmiyorum.                                       | 2,13                |
| Dersliklerin temizliğinden memnunuzum.  | 1,74                |

|  |      |
|--|------|
| Dersliklerde bulunan ısıtma sisteminin yeterli olduğunu düşünüyorum.                                       | 2,25 |
| Dersliklerde bulunan havalandırma sisteminin yeterli olduğunu düşünüyorum.                                 | 2,17 |
| Sınavların uygun bir ortamda yapıldığını düşünüyorum.  | 2,34 |
| Bölüm içerisindeki ders çalışma alanlarının yeterli olduğunu düşünüyorum.                                  | 3,04 |
| Bölüm içerisindeki tuvalet temizliğinden memnunum.   | 2,97 |
| Tuvaletlerdeki sabun, peçete gibi malzemelerin yeterli olduğunu düşünüyorum.                               | 4,01 |
| Ders aralarında dinlenebileceğim alanların yeterli olduğunu düşünüyorum.                                   | 2,69 |
| Bölüm bahçesindeki materyalleri yeterli buluyorum. (küllük, bank, çöp tenekesi)                            | 2,91 |
| Panolara asılan duyuru ve çalışmaların yeterli olduğunu düşünüyorum.                                       | 2,53 |
| Danışmanlarımla iletişim kurmakta zorlanmıyorum.   | 1,88 |
| Bölüm içerisinde yaşadığım sıkıntıları, eksiklikleri kolay bir şekilde ilgili makamlara ulaştırabiliyorum. | 2,07 |
| Fakültemizde verilen seminerlerin meslek hayatım için etkili olduğunu düşünüyorum.                         | 2,00 |
| Bilim Kulübü yönetim kurulundan memnunum.  | 2,22 |
| Bilim Kulübü kapsamında yapılan etkinliklerin yeterli olduğunu düşünüyorum.                                | 2,77 |
| Bilim Kulübü'nün sosyal projeler açısından etkin olduğunu düşünüyorum.                                     | 2,75 |
| Bilim Kulübü tanıtımlarının yeterli olduğunu düşünüyorum.  | 2,66 |
| Fakülte bazında bakıldığında ibadet alanlarının yeterli olduğunu düşünüyorum.                              | 3,16 |
| Fakülte kantinin fiyatlarının fazla olduğunu düşünüyorum.  | 2,02 |
| Fakülte kantinin temizliğinden memnunum.   | 2,16 |
| Daha önce fakülte kantinin de yediğim yemeklerde hijyen sıkıntısı yaşadım.                                 | 2,73 |
| Bir eğitim öğretim döneminde yapılan öğrenci memnuniyet anketlerinin yeterli sayıda olduğunu düşünüyorum.  | 2,88 |

\*(1:Tamamen katılıyorum...5:Tamamen katılmıyorum)

Birinci düzey memnuniyet anketi sonuçları incelendiğinde, en yüksek memnuniyet düzeyinin derslik temizliği (1,74), ardından danışmanlarla iletişim kurulabilmesi (1,88), en düşük memnuniyet düzeyinin ise sabun, peçete vb. malzemelerin lavabolarda yetersiz kalması (4,01) ve ibadet alanlarının yetersizliği (3,16) olduğu görülmektedir.

### 3.2. Uygulama aşaması

Uygulanan birinci düzey memnuniyet anketi sonuçları değerlendirilerek 6 adet yargının memnuniyet oranının daha düşük olduğu tespit edilmiştir. Tablo 3' te bu yargılar verilmiştir.

Tablo 3. Memnuniyet oranı düşük öncelikli konular

| Yargılar  | Ortalamalar |
|---|-------------|
| Tuvaletlerdeki sabun, peçete gibi malzemelerin yeterli olduğunu düşünüyorum.                              | 4,0123      |
| Fakülte bazında bakıldığında ibadet alanlarının yeterli olduğunu düşünüyorum.                             | 3,1625      |
| Bölüm içerisindeki ders çalışma alanlarının yeterli olduğunu düşünüyorum.                                 | 3,0494      |
| Bölüm içerisindeki tuvalet temizliğinden memnunum.  | 2,9753      |
| Bölüm bahçesindeki materyalleri yeterli buluyorum. (küllük, bank, çöp tenekesi)                           | 2,9136      |
| Bir eğitim öğretim döneminde yapılan öğrenci memnuniyet anketlerinin yeterli sayıda olduğunu düşünüyorum. | 2,8765      |

Memnuniyet anketinin daha düşük olduğu yargılar hakkında oluşturulan kalite iyileştirme takımı ile bir beyin fırtınası toplantısı gerçekleştirilmiştir ve söz konusu yargılar hakkında yapılabilecek iyileştirmeler için gerçekleştirilebilecek uygulamalar tartışılmıştır. Bu iyileştirme faaliyetleri içerisinde;

-Tuvaletlerdeki sabun ve peçete yetersizliği yargısı için gerekli değerlendirilmeler yapılmış ve bu konuda maddi yetersizlikten kaynaklı olarak çözüm geliştirilememiştir.

-Fakülte bazında ibadet alanlarının yetersizliği değerlendirilmiş, fakülte binasındaki ibadet alanının Orman Endüstri Mühendisliği için de yeterli olduğu, ibadet alanını bilmeyen öğrenciler için bölüm öğrencilerini kapsayan gruplara bu konuda bilgilendirilmede bulunulmuştur.

- Ders çalışma alanlarının yetersizliği konusunda, bir adet tüm sınıfları kapsayacak çalışma salonu, iki adet son sınıf öğrencilerini kapsayacak randevu sistemiyle ayırttırılabilecek proje salonu hazırlanmıştır.

- Bölüm içerisindeki tuvalet temizliğinin yetersiz olduğu konusunda değerlendirilmeler yapılmış ve tuvalet temizliğinin takibinin yapılması için kontrol çizelgesi hazırlanmış, uygulamaya girmiştir.
  - Bölüm bahçesindeki materyal yetersizliği konusu değerlendirilip, incelenmiş engelli öğrenciler için bulunan rampada yıpranmaların olduğu ve zorluk çekildiği tespit edilmiş, rampaya gerekli tamirat uygulanmıştır.
  - Memnuniyet anketi yetersizliği konusunda anket sayılarının yeniden değerlendirilmiş ve güz dönemi içerisinde bölüm öğrencilerine yeni bir anket uygulanmıştır.
- Söz konusu iyileştirme faaliyetleri dijital ortamdan 1., 2., 3., ve 4., sınıf öğrencilerine duyurulmuştur.

### 3.3. Kontrol Et aşaması

Kontrol Et aşamasında ikinci düzey memnuniyet anketi oluşturulmuştur. Bu memnuniyet anketinde memnuniyet düzeyi yüksek olan 7 soru anketten çıkarılmıştır. Aktif durumdaki 1., 2., 3., ve 4., sınıf öğrencilerine uygulanmıştır. İkinci düzey memnuniyet anketi sonuçları Tablo 4'de verilmiştir.

| Yargılar   | Likert ortalamaları |
|--|---------------------|
| Bölümümüz öğrencilerine sunulan teknolojik imkanlardan memnunum.   | 2,84                |
| Programda yer alan derslerin uygulama açısından yeterli olduğunu düşünüyorum.                              | 3,04                |
| Dersliklere ulaşmada zorluk çekmiyorum.  | 2,4                 |
| Dersliklerin temizliğinden memnunum.   | 2,18                |
| Dersliklerde bulunan ısıtma sisteminin yeterli olduğunu düşünüyorum.                                       | 2,42                |
| Dersliklerde bulunan havalandırma sisteminin yeterli olduğunu düşünüyorum.                                 | 2,22                |
| Sınavların uygun bir ortamda yapıldığını düşünüyorum.  | 2,34                |
| Bölüm içerisindeki ders çalışma alanlarının yeterli olduğunu düşünüyorum.                                  | 3,42                |
| Bölüm içerisindeki tuvalet temizliğinden memnunum.   | 3,02                |
| Tuvaletlerdeki sabun, peçete gibi malzemelerin yeterli olduğunu düşünüyorum.                               | 3,9                 |
| Ders aralarında dinlenebileceğim alanların yeterli olduğunu düşünüyorum.                                   | 3,26                |
| Bölüm bahçesindeki materyalleri yeterli buluyorum. (küllük, bank, çöp tenekesi)                            | 2,88                |
| Panolara asılan duyuru ve çalışmaların yeterli olduğunu düşünüyorum.                                       | 2,66                |
| Danışmanlarımla iletişim kurmakta zorlanmıyorum.   | 2,46                |
| Bölüm içerisinde yaşadığım sıkıntıları, eksiklikleri kolay bir şekilde ilgili makamlara ulaştırabiliyorum. | 2,52                |
| Fakültemizde verilen seminerlerin meslek hayatım için etkili olduğunu düşünüyorum.                         | 2,2                 |
| Fakülte bazında bakıldığında ibadet alanlarının yeterli olduğunu düşünüyorum.                              | 2,86                |
| Bir eğitim öğretim döneminde yapılan öğrenci memnuniyet anketlerinin yeterli sayıda olduğunu düşünüyorum.  | 2,54                |

Tablo 4. İkinci Düzey Memnuniyet Anketi Sonuçları

İkinci düzey memnuniyet anketi sonuçlarına göre dersliklerin temizliği ve havalandırılması ile ilgili yüksek memnuniyet görülmekte iken, lavabolardaki kağıt vb malzeme yeterliliğindeki memnuniyetsizliğin devam ettiği görülmüştür. Bu sonuçlarla kontrol etme süreci tamamlanarak ne tür önlemlerin alınması gerektiğine yönelik değerlendirme aşamasına geçilmiştir.

### 3.4. Önlem Al aşaması

Bu aşamada her iki anketin de ortalama memnuniyet düzeyleri karşılaştırılarak iyileştirme çalışmalarından sonra memnuniyet oranındaki değişimler değerlendirilmiştir. Her iki memnuniyet anketinin sonuçlarının karşılaştırılması Tablo 5'de verilmiştir.

Tablo 5. Birinci ve İkinci Düzey Memnuniyet Anketi Karşılaştırması

| YARGILAR  | 1. Düzey Memnuniyet Anketi Ortalamaları | 2. Düzey Memnuniyet Anketi Ortalamaları |
|---|---|---|
| Tuvaletlerdeki sabun, peçete gibi malzemelerin yeterli olduğunu düşünüyorum.  | 4,01                                    | 3,90                                    |
| Fakülte bazında bakıldığında ibadet alanlarının yeterli olduğunu düşünüyorum. | 3,16                                    | 2,86                                    |
| Bölüm içerisindeki ders çalışma alanlarının yeterli olduğunu düşünüyorum.     | 3,04                                    | 3,42                                    |
| Bölüm içerisindeki tuvalet temizliğinden memnunum.                            | 2,97                                    | 3,02                                    |

|   |      |      |
|---|------|------|
| Bölüm bahçesindeki materyalleri yeterli buluyorum. (küllük, bank, çöp tenekesi)                           | 2,91 | 2,88 |
| Bir eğitim öğretim döneminde yapılan öğrenci memnuniyet anketlerinin yeterli sayıda olduğunu düşünüyorum. | 2,88 | 2,54 |

Memnuniyet anketlerinin karşılaştırılması sonucunda fakülte bazında ibadethane alanının yeterliliği noktasında ortaya çıkan memnuniyetsizliğin, fakülte binasında tahsis edilen alanın kullanılabilmesine yönelik bilgilendirme ile iyileştirildiği ve daha yüksek memnuniyet sağlandığı ortaya çıkmıştır. Bu iyileştirme ile PUKÖ çevrimi kapatılmıştır.

Tuvaletlerdeki sabun, peçete gibi malzemelerin yeterliliği yargısında ortaya çıkan memnuniyetsizliğin giderilebilmesi için bütçe sıkıntısından kaynaklı iyileştirme çalışmasında bulunulamamıştır bu sebepten ötürü memnuniyet oranında pozitif bir değişim görülmemiştir. Bu yargı hakkında yeni çevirimler planlanmalıdır.

Bölüm içerisindeki ders çalışma alanlarının yeterliliği noktasında ortaya çıkan memnuniyetsizliğin, bir adet tüm sınıfları kapsayacak çalışma salonu, iki adet son sınıf öğrencilerini kapsayacak randevu sistemiyle ayırttırılabilecek proje salonu hazırlanarak iyileştirildiği fakat memnuniyet oranında bir artış olmadığı ortaya çıkmıştır. Bu yargı hakkında yeni çevirimler planlanmalıdır.

Bölüm içerisindeki tuvalet temizliğinin yeterliliği noktasında ortaya çıkan memnuniyetsizliğin, temizlik kontrol listesi ile iyileştirildiği fakat memnuniyet oranında pozitif bir değişim olmadığı ortaya çıkmıştır. Bu yargı hakkında yeni çevirimler planlanmalıdır.

Bölüm bahçesindeki materyallerin yeterliliği noktasında ortaya çıkan memnuniyetsizliğin, hasarlı rampa bakımının yapılarak iyileştirildiği ve daha yüksek memnuniyet sağlandığı ortaya çıkmıştır. Bu iyileştirme ile PUKÖ çevrimi kapatılmıştır.

Memnuniyet anketinin yeterliliği yargısında ortaya çıkan memnuniyetsizliğin, güz dönemi içerisinde memnuniyet anketi yapılarak iyileştirildiği ve daha yüksek memnuniyet sağlandığı ortaya çıkmıştır. Bu iyileştirme ile PUKÖ çevrimi kapatılmıştır.

Bu çalışma ile eğitim kurumlarında kalite iyileştirme amacıyla sürekli iyileştirme faaliyetlerinin uygulanabileceği sonucuna varılmıştır. Bununla birlikte PUKÖ çevrimlerinin tekraren düzenlenmesi gerekliliği de göze çarpan önemli bir husus olarak ortaya çıkmıştır. Yönetimsel faaliyetlerin her aşamasında kalitenin sürekli iyileştirilmesinin de bir stratejik amaç olarak değerlendirilmesi gerektiği önerilmektedir. Bu tür uygulamaların yaygınlaştırılması Türk Yükseköğretiminde niteliksel gelişmenin önünü açacaktır.

# “KARTAL YUVASI” ADLI FİLMİN VAROLUŞ MÜCADELESİ’NDE KIBRIS TÜRK KADINI BAĞLAMINDA GÖSTERGEBİLİMSEL İNCELEMESİ

Müge GÜNAY

İletişim Fakültesi

Girne Amerikan Üniversitesi, KKTC

## ÖZET

Sinema, toplumsal bilinç kodlarının aktarıldığı önemli kitle iletişim araçlarından biridir. Tarihimiz boyunca filmlere konu olan Milli Mücadele, Türk kadınları için de savaşa katılmayı zaruri kılmıştır. Cephede yiğitçe savaşan Türk kadınlarından Nene Hatun, bunun örneklerindedir. Bu çalışmada analiz edilen ve yönetmenliğini Natuk Baytan’ın üstlendiği Kartal Yuvası adlı filmin kadın karakteri Makbule Hanım ile Nene Hatun’un kahramanlık öyküsü benzerlik göstermektedir. Göstergebilim kuramcılarında Algirdas Julien Greimas’ın yöntemiyle incelenen filmin çalışmada seçilmesinin sebebi, yalnızca bu filmde savaşta Kıbrıs Türk kadınının ön plana çıkartılmış olmasıdır. Çalışmada, toplumsal belleğin kodlarından olan dini öğeleri, birlik-beraberliği, Kıbrıs Türk kadınının vatana bağlılığı, bayrak sevgisini içeren sahnelerin analizleri yapılmıştır. Çalışmanın amacı, Kıbrıs Türk kadınının belirlenen öğelerle sinema arasındaki ilişkinin bağlantılılığına dikkat çekmektir. Bu çalışma, Kıbrıs Türk kadınının Varoluş Mücadelesi’ndeki yeri ve önemini sinema anlatısı üzerinden inceleyen ilk çalışma olduğu için önem arz etmektedir. Sonuç olarak çalışmada, birlik - beraberlik ve sinema arasındaki ilişkinin nasıl iç içe geçtiği üzerine çıkarımlar yapılmıştır.

**Anahtar Kelimeler:** Sinema, Göstergebilim, Kıbrıs Türk Kadını, Milli Birlik-Berberlik, Kartal Yuvası.

## GİRİŞ

Sinema, kitleleri etkilemekte önemli bir yeri olan kitle iletişim aracıdır. Filmler aracılığıyla kimlik inşasında toplumsal bilinç oluşturmak için kullanılır (Öztürk, 2017: 17). Bu bağlamda folklorik unsurlar sinema anlatıları aracılığıyla yeniden yaratılır, milli bilinç uyandırılmaya, milli kimlik inşa edilmeye çalışılır (Güneş, 2020: 20). Sinema ile Türk halk bilimi arasındaki ilişkinin temelinde kültürel kodlar yer almaktadır (Özdemir, 2019: 19).

Kültüre dair farkındalık oluşturan sinema, kültürü hatırlatma ve aktarma gibi işlevlere de sahiptir. Bu noktada kültürü beslerken, kültürü yansıtmaktadır (Güneş, 2020: 20). Kültür, bir toplumu veya topluluğu diğerlerinden ayıran maddi - manevi değerler bütünüdür. Bu değerler sanat ve edebiyatla sınırlı kalmamakla birlikte; inanç, gelenek, yaşam tarzı, temel insan haklarını da kapsamaktadır. Kültürü oluşturan kodlar bir toplumun kendini ifade ediş biçimidir (Purtaş, 2013: 13). Toplumlar, millet olarak varlıklarını sürdürebilmek için ortak bir bilinç haline getirdikleri değerleri koruyabilmelidir. Bu aşamada, mevcudiyetlerini koruma mücadelelerini devam ettirebilirler. Değerlerini kaybeden milletler, yok olma tehlikesiyle karşı karşıya gelirler (Çonoğlu, 2014: 14). Her toplum sinemayı, kendi toplumsal yapısına uygun bir şekilde geleneksel birikimlerinden faydalanarak yorumlama yoluna gitmiştir. Bu birikimle toplumlar, kendine has sinema dilini yaratmaya çalışmıştır (Alptürker, 2022: 22).

Müdâfaa-i Milliye Cemiyeti 1913 yılında resmen kurulduktan sonra gelir kaynaklarını artırmak için film yapımına başlamıştır (Şahin, 2014: 14). İlk uzun metrajlı film yapım şirketi 1922 senesinde Seden Kardeşler tarafından kurulmuştur. Bu dönem filmleri, “ulusal bilinç” ve cumhuriyet etrafında bir araya gelme düşüncesiyle çekilmiştir (Kayserili, 2016: 16). Milli Mücadele döneminin önemli şahsiyetlerinden birisi olan Şark Cephesi Kumandanı Kazım Karabekir Paşa da sinemaya verdiği önemden dolayı, muhtelif mahallelerde sinema tesis edilmesini talep etmiştir. Dolayısıyla Milli Mücadele döneminde sinema şehirlerde günlük hayatın bir parçası olmuştur (Şahin, 2014: 14). 1950’li yıllarda kendine has bir sinema diline kavuşan Türk sineması, 1970 yılına kadar tarih konularına ağırlık vermiştir (Kayserili, 2016: 16). 1974 senesine kadar Kıbrıs Türklerinin Rumlardan gördüğü zulüm üzerine, Türkiye’de üniversite eğitimi gören Kıbrıs Türkleri İstanbul’da miting düzenlemeye başlamış ve halkın ilgisinin Kıbrıs’taki katliama yönelmesine neden olmuştur (Şahoğlu, 2016: 16). Bu bağlamda, Türk sinemasının dikkatini Kıbrıs olaylarına yönelttiği söylenebilir.

Rum çetelerin 1955 yılından sonra Kıbrıslı Türklere yönelttiği terör eylemleri, Dünya gündeminde büyük yer tutmuş, Kıbrıs’ta verilen mücadeleler, Kıbrıs Türkünün bağımsızlık ve özgürlük yolundaki kahramanlıkları Türk film yapımcılarının gündemine girmiştir (Marşap, 2022: 22). Kıbrıs Türkünün Varoluş Mücadelesi verdiği 1963 senesinden, 1974 Kıbrıs Barış Harekâtı’na kadar Rum çetelerin, Kıbrıs Türküne uyguladığı zulmü konu alan, Türk yönetmenler tarafından çekilmiş toplam 18 adet film vardır. Bu çalışmada, milli kimliğin üretiminde etkin olan sinema (Şahin, 2014: 22) aracılığı ile Kıbrıs’ta yaşanan çatışmalarda Kıbrıs Türk kadınının alıcıya nasıl aktarıldığı incelenmiştir.

Kıbrıs Türk toplumunda ilk öne çıkan Mücahide, 1958’de İngilizler tarafından Lefkoşa’da öldürülen Şerife Bacı’dır. Cesaret ve fedakârlığı ile tarihe adını yazdıran Fatma Ana, Hatice Ana ve Hatçe Ana ise, diğer öne çıkan Kıbrıs Türk mücahidelerindedir (Onuş, 2018: 215). Çalışmada din, milli birlik-beraberlik, vatana bağlılık, bayrak sevgisi, kadının savaştaki rolünü içeren sahneler analiz edilmiştir. Senaryosunu Tarık Dursun Kakinç’in yazdığı ve başrolünde Yıldız Kenter’in yer aldığı Kartal Yuvası adlı film, 1963 – 1974 yılları arasında çekilmiş

ve savaşı Kıbrıs Türk kadını merkeze alarak aktaran ilk ve tek filmidir. Bu çalışma, Kıbrıs Türk kadınının savaştaki rolünü sinema aracılığı ile aktaran tek film olması dolayısıyla literatüre katkı sağlaması ve bu alanda çalışma yapacak olan araştırmacılara örnek olması açısından önemlidir.

Çalışmanın akışı oluşturulurken Milli Birlik ve Beraberliğin sinemada yeniden inşası hakkında bilgi verilmiştir. Sonraki bölümde yöntem hakkında bilgi verilmiş, ardından 93 Harbi'nde efsaneleşen Nene Hatun ile filmin ana karakteri "Makbule" arasındaki ilişki ortaya koyulmaya çalışılmıştır. Bu bölümle bağlantılı olarak, film incelemesinde odak nokta olan kadının savaştaki rolü, din, birlik-beraberlik, vatan, bayrak öğeleriyle film anlatısında kullanılan öğeler arasındaki ilişki analiz edilmiştir. Son bölümde ise, film analizinde ortaya çıkan bulgular çerçevesinde sonuç paylaşılmıştır.

### **Milli Birlik ve Beraberliğin Sinemada Yeniden İnşası**

Milli birlik ve beraberlik vurgusu oluşturulurken, milliyetçi söylemlerde tarihe gönderme yapmak önem arz eder. Bu vurgu, geçmişçi çözümlenerek, geleceği inşa etmek açısından gereklidir (Niyazi, 2005: 5). Milleti oluşturan fertler ancak birlik ve beraberliklerini koruyabildikleri sürece ayakta durabilirler. Bu bağlamda, birlik ve beraberliğin korunması; ortak dil, din ve bayrağa sahip olarak; geçmişi bilerek, örf, âdet ve geleneklere bağlı kalarak mümkündür (Irmak, 2014: 14). Toplumda bu olguları anlatmak için kullanılan yöntemlerden biri propagandadır. Propaganda aracı olan sinema, insanların milli duygularını harekete geçirmek, milli değerlerine, atalarının milli birlik ve bütünlüğüne sahip çıkmalarının önemini vurgulamak için kullanılan bir yoldur (Sarıtaş ve Kurşun, 2021: 21).

Millî Mücadele Dönemi'nde Osmanlı Devleti ve Türkiye Büyük Millet Meclisi'ne bağlı resmî, yarı-resmî kuruluşlar tarafından haber içerikli filmler çekilirken, Cumhuriyet'in kurulduğu ilk yıllarda Atatürk İlke ve İnkılapları, İstiklâl Harbi ile ilgili belgeseller çekilmiştir. Kuvâ-yı Milliye ruhu ile Millî Mücadele'nin hangi şartlarda yapıldığını gelecek nesillere aktarmak için eksikliklere rağmen çarpıcı sinema filmleri yapılmıştır (Aysal ve Erbay, 2022: 22). Türk sinema tarihi incelendiğinde, Cumhuriyet'in ilk yıllarından itibaren birlik ve beraberliğin korunması için, gerek resmi gerek gayri resmi kuruluşların sinemayı desteklediği görülmektedir. Bu bağlamda, Türklerin milli özelliklerinden olan merhametin, hoşgörünün, yardımseverliğin, mertliğin ve yiğitliğin (Çağatay, 1996: 510), vatana bağlılığın, bayrağa saygının, geleneklere sahip çıkmak ve gelecek nesillere kültürü aktarmak için sinema önemli bir araç olmuştur. Tarih boyunca geçmişi geleceğe aktarma ve milli değerlere her daim sahip çıkma noktasında sinema kullanılırken Türkün var olduğu ve mücadele ettiği her tarihi olay beyazperdede arşivleştirilmiştir. Bu minvalde, milli birlik ve beraberlik ruhunun toplum hafızasında yeniden tazelenmesi ve canlı tutulması amacıyla yönetmenlerin dikkatlerini Kıbrıs Türkünün Varoluş Mücadelesi'ne yönelttikleri söylenebilir.

### **Algirdas Julien Greimas'ın Göstergebilim Kuramı**

Greimas, Saussure'nin "gösterge: gösteren/gösterilen" kuramını; "gösterge: anlatım/içerik" şeklinde geliştirerek, sinema anlatılarının çözümlenmesinde kullanılabilecek "eyleyensel örnekçe" yöntemini ortaya çıkarmıştır. Bu modelin altı farklı işlevi vardır; Özne, nesne, gönderen, yardımcı, gönderilen, engelleyici (Dündar ve Kara, 2017: 17). Greimas'a göre bir sinema anlatısının çözümlenmesinin yapılabilmesi için önce göstergelerin birbiri ile olan ilişkileri ortaya çıkarılmalıdır. Anlatı durumunun dört evreden oluştuğunu belirten Greimas, bu evreleri; eyletim, edinim, edim, yaptırım olarak sıralar (Dündar ve Kara, 2017: 17). Soydan (2007: 9) bu dört evreyi şöyle aktarmıştır;

Eyletim evresinde gönderen ile özne arasındaki evre yansıtılır. Edinim evresinde, öznenin anlatı akışını sağlayacak temel dönüşüm gerçekleşir. Edim evresi öznenin, yani kahramanın yeteneklerini kazandıktan sonra anlatının temel konusu olan eylemi gerçekleştirmeye çalıştığı evredir. Yaptırım evresi ise, öznenin, yani kahramanın yaptıklarının gönderen tarafından değerlendirildiği evredir.

Hem göstergebilimci hem de anlambilimci olan Algirdas Julien Greimas, eyleyensel örnekçe yöntemi geliştirerek, sinema filmlerinin temel anlamsal boyutunu anlayabilme imkânı sağlamıştır. Temel anlamsal boyut, filmin derin yapısı ile alt metinde izleyiciye aktarmak istenen mesajı içermektedir (Soydan, 2007: 7). Greimas, Saussure'ün gösteren ve gösterilen kuramını, anlatım ve içerik olarak geliştirmiş ve yazılı/görsel metinlerin çözümlenmesini kolaylaştırmıştır (Dündar ve Kara, 2017: 17).

### **Nene Hatun Bağlamında Makbule Hanım Karakterinin İncelemesi**

Nene Hatun, 93 Harbi'nde Aziziye Tabyalarında verdiği mücadeleyle Türk Tarihi'nin kadın kahramanları içerisinde yer almaktadır. Tabyaların, Ermeniler ve Ruslar tarafından işgalinin ardından, düşman elinden kurtarılması için verdiği mücadele ile adını tarihe yazdırmıştır (Aktaş, 2020: 20). Kartal Yuvası adlı filmde Yıldız Kenter'in canlandırdığı Makbule Hanım karakteri de, 1974 senesinde Kıbrıs'ta yaşadıkları köye silahlı Rum çetelerin yaptıkları baskın, saldırı ve tacizleri karşısında kahramanca mücadele etmiştir.

Resmi bir kişiliğe ve otoriter bir yapıya sahip olan Nene Hatun'dan bir işe gidilirken bile icazet almırmış (Güven, 2018: 18). İncelenen filmin ana karakteri Makbule Hanım da, yaşadığı köyde yasaları ve devleti temsil eden Rum asıllı muhtar tarafından dahi saygı duyulan bir karakterdir.

Nene Hatun'un oğlu Şükrü Bey, evine yemek yemek için uğradığında Nene Hatun kendisine kızarak, "Oğul durmanın, dinlenmenin zamanı değil. Çabuk ekmeğini al, yolda yersin. Baban, kardeşlerin zor durumdaymış, düşman milleti kırıp geçiriyormuş. Çabuk yardım etmeye git!" demiş ve direkt çatışma alanına göndermiştir (Güven, 2018: 18). Makbule Hanım karakteri ile karşılaştırıldığında, her ikisinin de oğullarına karşı tutumu benzerlik göstermektedir. Makbule Hanım, Yurt dışında eğitim almakta olan oğlu Murat'ı uzun yıllardır görmemektedir. Murat doktor olarak memleketine döner dönmez yapmak istediği ilk iş, bir klinik açmak ve İngiltere'den birlikte geldiği nişanlısı Merie ile evlenmektir. Köyde Rumlarla yapılan silahlı çatışmalarda yaralanan Türklerin tedavisi için Murat'ın belirsiz bir süreyle evden gitmesi gerektiğinde Makbule Hanım oğluna, hiç tereddüt etmeden yardım etmek için gitmesini söylemiştir. Bunu takiben Makbule Hanım, Rumların Türklere karşı giderek şiddetlenen düşmanlık ve nefret eylemlerine göğüs germeyi ve müstakbel İngiliz gelinini köyün sarhoş ve tacizci silahlı Rum erkeklerine karşı tek başına korumayı göze almıştır. Sahara'daki gönüllü birlikler dağıldıktan sonra Nene Hatun, halkın oluşturduğu gönüllü birliklere tek başına silah taşımış ve ne kadar korkusuz, cesur bir kadın olduğunu göstermiştir (Güven, 2018: 18). Makbule Hanım, vatan toprağıyla bir tuttuğu evini, kendi çatısı altında yaşayan, hatta sonradan yaralı olarak evine sığınan herkesi hiç korkmadan himayesine almış, silahsız olmasına rağmen eldeki tüm imkanları kullanarak yiğitçe dövüşmüş ve yuvasını canı pahasına korumuştur.

Nene Hatun, Milis kuvvetlere yemek yapmış, ekmeği pişirmiştir. Köyü tehlikeye girdiği zaman, sorumluluktan kaçmamış, yiğitçe diğer kadınlarla birlikte, kayaları düşman kuvvetlerin üzerine yuvarlamıştır. Böylece geçici de olsa düşmanın köye girişini engellemiştir (Güven, 2018: 18). Makbule Hanım, müstakbel İngiliz gelini Merie ile birlikte evinin tüm kapılarının arkalarına dolap koymak suretiyle güçlendirmiş, silahı olmadığı için ocakta kızdırdığı yağı eve girmeye çalışan silahlı Rum çetelerin üzerlerine dökerek geçici de olsa Rumların eve girişlerini engellemeye çalışmıştır. Bu bağlamda Makbule Hanım otoriter kişiliği, yiğitliği, cesareti ve vatan savunmasını her şeyin üstünde tutması özellikleriyle Nene Hatun ile benzerlik göstermektedir.

### **Kartal Yuvası Filminin İncelemesi**

#### **Özne ile nesne arasındaki ilişki**

Filmin öznesi Makbule'dir. Makbule'nin oğlu Murat İngiltere'de tıp eğitimini tamamladıktan sonra İngiliz nişanlısı ile birlikte ülkesine döner ve çok geçmeden silahlı Rum çetelerin saldırıları sonucu yaralanan Türklere yardım etmek için mücahitlere katılır. Murat'ın gitmesinin ardından Makbule, müstakbel gelini ile yalnız kalır. Rumlar, köyde yaşayan tüm Türkleri korkutarak ve bezdirerek kovmuştur. Kalan son iki aileden birisi de Makbule Hanım'dır. İki kadının yalnız kaldığını gören Rumlar her türlü yola başvurarak onları köyden atmaya çalışır. Makbule Hanım da yuvasını ve köyde kalan diğer Türk aileyi korumayı kendine amaç belirler. Filmin nesnesi, silahsız bir Türk kadını tarafından yuvanın korunmasıdır. Filmde Rumlar, Kıbrıs Türklerine acımasızca davranarak, sivil halkı taciz ve tehdit ederek köyden göndermeye çalışmaktadır. Filmin nesnesi yuva olarak gösterilse de aslında izleyiciye aktarılmak istenen vatan, ülke ve topraktır.

#### **Gönderici ile alıcı arasındaki ilişki**

Filmde gönderen, Makbule karakteridir. Makbule, bireysel olarak köyünde yaşayan son Kıbrıs Türkü olan komşusuna ve kendi yuvasına sahip çıkarak, direnişe destek vermektedir. Bu nedenle Makbule filmde hem özne hem de gönderen olarak görülmektedir.

Alıcı ise, yuvanın nezdinde vatan toprağıdır. Vatanın bütünlüğü filmde "yuva" ile imgeleştirilmiştir. Bu bağlamda yuvanın korunması aynı zamanda vatan toprağının korunması demektir.

#### **Yardımcı ile engelleyici arasındaki ilişki**

Makbule'nin imanı, Allah'a olan inancı en büyük yardımcısıdır. Oğlunun mücahitlerin yanına gitmesinin ardından müstakbel gelini ile evde yalnız kalan Makbule, sürekli ibadet etmekte ve imanının onları koruyacağını dile getirmektedir. Aynı zamanda Rumların eve yaptığı baskın sahnesinde, Makbule'nin arka planında Mekke portresine yer verilmesi, Allah'a duyulan inancın Makbule için en büyük yardımcı olduğunun göstergesidir. Filmin son sahnesinde Makbule'nin üstünü yırtıp, içten giydiği Türk Bayrağı'nı göstererek evine saldıran Rumlarla mücadele etmesi, inancından sonra en büyük yardımcısının bayrak sevgisi olduğu mesajını içermektedir.

Filmde engelleyici, silahlı Rum terör örgütüdür. Bu örgüt sivil vatandaşları hedef alarak, insanların canına kast etmekte, onları topraklarından, evlerinden göndermeye çalışmaktadır. Bunu yaparken de sivil Türkleri öldürmekten geri durmamaktadır. Kendi yaptıkları yanlışları bile Kıbrıs Türklerine yükleyerek, köydeki Rumların Türkleri hedef almalarını sağlamaya çalışmaktadır.

1974 senesinde çekilen "Kartal Yuvası" filminin anlatı durumu incelendiğinde aşağıdaki bulgulara ulaşılmıştır. Eyletim evresinde olaylar oluşmaya başlamaktadır. Filmde Makbule'nin oğlu Murat, İngiliz nişanlısı ile birlikte İngiltere'den dönmüştür. Adadaki Rum çetelerin Kıbrıs Türklerine olan nefreti şiddetini artırmış ve mücahitler köylerini korumak için çetin bir mücadeleye başlamıştır. Evine dönen Doktor Murat, yaralanan mücahitlere yardımcı olmak için onların yanında kalmak üzere evden ayrılınca Makbule ve müstakbel gelini, silahlı Rum

çetelere karşı bireysel direniş göstermek zorunda kalmıştır. Temel dönüşümü sağlayan ve olay akışını yönlendiren durum bu noktada başlamıştır. Eyleyensel örneğe göre, eylemi yapan kişi Makbule, eyleyendir. Filmde Makbule'yi eylemi yapması için ikna eden, gönderen eylem ise, yine öznenin kendisidir. Bu aşama, eyleten (gönderen) ve eyleyen (özne) arasındaki ilişkinin anlatıldığı aşamadır. Gönderen ve özne konumunda olan Makbule karakteri, yaşadığı köyde Rum çetelerin saldırıları sebebiyle neredeyse hiç Türk komşusunun kalmamasından dolayı evini tek başına korumak zorunda kalmıştır. Özne durumundaki Makbule'nin temel amacı, yuvasını ve yuvasında olan misafirleri korumaktır. Makbule bu noktada eyletim evresini başlatmıştır. Filmde yuva nesnesi, vatan ve toprağın imgesidir.

Edinin evresinde Makbule'nin, gelinini ve köyde kalan son Türk komşusunu Rum çetelerin tacizlerinden korumaya çalışması izleyiciye aktarılmaktadır. Rum çeteler meyhanede sürekli içerek sarhoş olmakta, köyde kalan birkaç Türk kızı başta olmak üzere Makbule'nin müstakbel gelinini taciz etmektedir. Zarar görenleri kurtarmaya çalışan Makbule sürekli namaz kılarak, ibadet etmektedir. Duvarında Mekke'ye dair resimler bulunduran Makbule, Hristiyan olan Merie'ye başörtüsü ve Kur'an-ı Kerim vererek onu namaza ve duaya yönlendirmektedir. Makbule'ye göre en önemli yardımcı, imanın kendisidir.

Kahramanın eylemi gerçekleştirmesiyle edim evresi başlar. Bu evrede Makbule ve köydeki diğer Türkler sahip oldukları yeteneklerle kendilerini ve ailelerini korumak için engelleyici konumunda olan Rum çetelere karşı mücadele eder. Bu evrede doğup büyüdüğü toprakları ve yuvalarını terk etmek istemeyen ve geride sadece iki hane kalan Türkler, kendilerini taciz eden Rum çetelere karşı mücadele ederek, vatanlarını terk etmemek niyetindedir. Bu noktada ortaya çıkan detay, köydeki Türklerin mücadeleyi bir silahla değil de konuşarak, eski dostluk ilişkilerini Rumlara hatırlatarak onları ikna etmeye çalışmasıdır.

Yaptırım evresinde özne olan Makbule, Rum çetelerin yuvasına yaptığı baskını bertaraf etmeyi başarmıştır ancak gelini de dahil olmak üzere, bir kişi hariç köyünde kalan tüm Türkler yaşamını yitirmiştir. Her şeye rağmen Makbule kendisi için yardımcı konumunda olan iman sayesinde hayatta kalmayı başarmış, evine girmeye çalışan tüm silahlı Rumları tek başına etkisiz hale getirmiştir. Kendisi ile birlikte hayatta kalan diğer yaralı ve zihinsel engelli Türk komşusu ile radyoyu açmasının ardından Harekâtı öğrenmiş, hem bireysel mücadelesini kazanmış hem de imanın gücünü izleyiciye aktarmıştır.

Kartal Yuvası filminin anlatı durumu incelendiğinde, özne olan Makbule, dinine, vatanına ve bayrağına çok bağlı, cesur bir Kıbrıs Türk kadınıdır. Silahlı Rumlara tüm Türk köylerini basması neticesinde diğer köyler boşalmış, kendi köyünde ise yalnızca iki hane kalmıştır. Rum komşuları ile dostluk ilişkilerine değinen filmde her Rum'un terör örgütü üyesi olmadığı mesajı aktarılırken, örgütteki Rumlardan başlatılan çatışmaların merkezinde din savaşı olduğu alıcılara iletilmiştir. Nitekim filmin sonunda iman eden herkes hayatta kalırken, Hristiyan olan Rum çeteler ve ibadet etmeyen Türkler hayatını kaybetmiştir. Filmin geneli incelendiğinde nesnenin bir yuva olduğu görülürken, gösterilenin vatan ve bayrak olduğu söylenebilir.

## SONUÇ

Anlatıda, birlik ve beraberlik, vatan, bayrak ve İslâmiyet'e bağlılık duygusunu inşa etmesi hedeflenen öğeler kullanılırken, bu kodlar izleyicinin milli duygularını harekete geçirecek biçimde sunulmuştur. Bu çalışmada Greimas'ın göstergebilim kuramına göre incelenen filmde, izleyiciye aktarılan göstergelerle Kıbrıs Türk kadınının cesareti ve kahramanlığı temsil edilerek, Yıldız Kenter'in canlandırdığı Makbule karakterinin Nene Hatun ile benzerlikleri ortaya çıkarılmaya çalışılmıştır.

Film anlatısı boyunca vatan, bayrak ve iman gücü gösterge olarak sunulmuştur. Bu gösterge replikler ve sembollerle pekiştirilmiştir. Anlatının odak merkezinde kullanılan saygı, misafirperverlik, hoşgörü, yardımseverlik, barış, sevgi öğeleri ile İslâm dininin özellikleri temsil edilirken, Kıbrıs Türk kadını olan Makbule'nin kahramanca mücadelesi, Türk bayrağını üzerinde taşıması, köyde kalan Türkleri bir arada tutarak, direniş noktasında cesaretlendirmesi ile de Türk Milletinin özelliklerini alıcıya aktarmaktadır. Bu bağlamda izleyici açısından filmin gerçekçiliği artmıştır.

Rum çetelerin İslâm dinine, Kuran-ı Kerim'e ve Müslümanlara karşı olan aşağılayıcı tavırları, karakterlerin eylemleri ve söylemleriyle anlatılmaya çalışılmıştır. Anlatıda yan karakter olan Merie'nin, İslâm dinî hakkında bilgisiz biri olarak izleyiciye aktarılışı, eksik bilgilerin açıklanması noktasında anlatının sunumuna elverişli bir ortam hazırlamıştır. Çalışmada incelenen film anlatısında Türklerin milli özelliklerinden olan merhametin, hoşgörünün, yardımseverliğin, mertliğin ve yiğitliğin sunulduğu ve Kıbrıs Türk kadınının mücadeleciliğiyle izleyicilerin yüzleştirildiği görülmektedir. Bu noktada Makbule karakteri, Nene Hatun ile benzerlik göstermektedir.

Türk destanlarında karşılaşılan kahraman kadınlara, Kıbrıs Türkünün Varoluş Mücadelesi verdiği yıllarda ve akabinde 1974 Kıbrıs Barış Harekâtı'nda rastlanmaktadır. Mücadele yıllarında, Kıbrıs Türk mücahidelerinin, Mücahit ve Mehmetçiklere özellikle sağlık noktasında katkıda buldukları bilinmektedir. Bu çalışma kapsamında yapılan araştırmada, Kıbrıs Türkünün Varoluş Mücadelesi'nde mücahitler gibi önemli hizmetlerde bulunmuş ve görevler almış olan Kıbrıs Türk mücahideleri ile ilgili Türk sinemasında arşiv niteliğinde bir filmin olmadığı ortaya çıkmıştır. Öyle ki, Kıbrıs Türkünün tarihinde, incelenen bu filmin başrol karakteri Makbule

Hanım adlı bir mücahideye de ulaşılammıştır. Çalışmada ortaya çıkan bulgulara göre Makbule karakteri, Nene Hatun ile benzerlik göstermektedir ancak gerçek bir mücahideyi temsil etmemektedir. Sonuç olarak, karakterin senarist tarafından geliştirildiği söylenebilir. Varoluş Mücadelesi'ndeki Kıbrıs Türk kadınının sinemaya henüz aktarılmamış olması Kıbrıs Türk sineması açısından büyük bir eksiklik. Sinema anlatıları toplumsal belleğin oluşmasında en önemli araçlardan olması itibarı ile, Kıbrıs Türk mücahidelerinin kahramanlık hikayelerinin beyazperdeye aktarımı, gelecek nesillerde milli bilinç uyandırılması, kültürün aktarımı ve milli kimlik inşası açısından önem arz etmektedir. Nitekim toplumsal bellek yerini, kültürel ve milli yansımalarda sinema aracılığıyla bulmaktadır.

# KONTROLLÜ DÜŞÜNCE OLUŞUMU SÜRECİYLE TARAFSIZ, OBJEKTİF DÜŞÜNCE YARATIMI VE BU YARATIMIN, YARATICI ZEKÂyla İLİŞKİSİ: LEONARDO DA VINCI ÖRNEĞİ

Doç. Dr. Nevin ALGÜL

Marmara Üniversitesi, Radyo, Televizyon ve Sinema Bölümü,  
Türkiye

## ÖZET

Bu makale bilinçli olarak, bir başka söylemle kontrollü düşünce gelişimiyle elde edilecek olan tarafsız, objektif düşünce kültürünün, yerleşik hâle getirilmesini tasarlayan bir makaledir. Böylelikle yaratıcı zekânın önü ancak açılabilir demektir çünkü araştırma, yaratıcı zekânın direkt tarafsız düşünceyle ilgili olduğu savına dayandırılmaktadır.

Bu kadar çok din, dil, ırk ile bölünmüş dünyada tarafsız düşünce gelişimini oturtmaya çalışmak adeta kasırgaya, elle yön değiştirmeye benzetilebilir. Zaten çalışma da bir hayâle dayanmaktadır. Bu bir gelecek dünya düşü, bu tür bir düşte eski düşünce kalıplarını kullanmak, eskinin istendik olmayan devamı demek, en azından tarafsız düşünce oluşumunu kontrollü olarak geliştirmeyi akıllara düşürmeyi erek ederek, çağımız gereği, artık çığırından çıkan ve birebir markajlamaya dönen, siyasilerce destek bulan mafyatik köşeyi dönme hallerinin, , ‘Dijital Köle’ edinmeyle sonuçlanan süreci, yaratıcı zekânın önünü tıkayan kalıpları işaret ederek yıkmaya; böylece, ‘illegal veri elde etmek, ileri düzeyde ‘Dijital Köle’ edinmek olaylarının önünü kesmeye çalışmanın çabaları olarak da değerlendirilebilir.

**Anahtar Sözcükler:** Dehâ, Leonardo Da Vinci, Yaratıcı Zekâ, Tarafsız Düşünce, Tasarım.

## GİRİŞ

Leonardo Da Vinci Nasıl Biriydi?

Öncelikle erken çocukluk döneminde “aaaa bu ne kadar farklı diyerek” peşine takıldığım, takibime aldığım tarihsel karakterlerden biri Da Vinci’ydi ve bu makalemde hem Da Vinci’yi hem erken çocukluk dönemimi onurlandırmış oluyorum. Anekdotuma yer vermem boşuna değil, bu erken takip ediş, Da Vinci’nin benle beraber bende büyümesine de olanak sağladı. Böylece bu süreç içinde edindiğim bilgiyle beraber yüreğime doğan Da Vinci’den de bahsetme cüretini bulduğumu aktarmak istiyorum.

Da Vinci hayatının son birkaç senesini Amboise yakınındaki Cloux Şatosunda geçirdi(Gelb, 1999). Zengin olsa bir an durmayıp Da Vinci’nin Notları’nı satın almak isteyen bir çocukluktan geliyorum. Bunu bilgisayarımdaya tuttuğum günlüğüme yazdıktan sonra, o zamanlar ortak akıl mı diye sorguladığım bir hızla Bill Gates’in satın aldığı basından öğrenmiştim. Müthiş bir Hİ/PR etkin başarı sonuçlu örneği aynı zamanda, eee ustaya yakışır bir müze de olmuş yazıldığına göre (Gelb, 1999)tıpkı, onun hakkındaki Gelb’in kitabının da yakıştığı gibi, bu kitabın var oluşunu tetikleyen her ne olursa olsun: Yaşam süremde gidip görmeyi çok istiyorum elbette. (Gelb, 1999) “Onun yürüdüğü toprağa basmak, çalışma masasına oturmak ve yatak odasında bulunmak, penceresinden dışarı, onun her gün gördüğü manzaraya bakma...”nın Gelb’in kalbini “hayranlık, sevgi ve saygıyla..” doldurduğu gibi eminim benimkini de yine yeniden sarsacaktır fakat yüreğime doğan; bilgiyle büyüttüğüm sevgi ve duygularıyla diyorum ki, Da Vinci nerede geceyi noktalarsa noktalsın her gün baktığı manzara kutuplardan basık, eliptik kürenin taaa kendisiydi ve hatta evrenin taaa kendisiydi. Bütünleşik bakabilme yeteneği sanki dehalarda var olan bir özellik gibi ve bu özellik beynin çalışma prensiplerinde de var. İyi algılamının yolu tümünden teke düşünce oluşumu yolundan geçmekte. İşin ilginç bu tür beyinler nasıl bir bilgi aktarılma yönteminden, metodolojisinden gelirlere gelsinler, beynin çalışma prensipleriyle uyumlu içsel bir donanımla hareket etmekte. Zaten bu aktarılma yöntemlerini irdelemeye başlayan beyinler aynı zamanda. Doğal olarak önünde sonunda doğru yöntemlere ermeleri de kaçınılmaz. Benim eşsiz biricikler dediğim, bir başka deyişle insan doğasını ters yüz edecek yöntemler; daha başlangıçta sağlıklı düşünce oluşumunu sekteye uğratacak metodolojiler bu tür beyinlerde dumura uğramaktalar ve sorgulamaya tabi tutulmaktadırlar fakat sayıları da çok az diye düşünüyorum...

Evet, her gün evrene bakmasının bir sonucudur, bütün manzaraların sahibi olabilmek, dünyaya böyle bakabilmek, Rönesansın bu ruhu beslediği düşünülebilir ama Rönesansı besleyen ruhların da dönemin yazarlarının, ressamalarının, düşünürlerinin olduğu gerçeği; Rönesansın, tüm kadim bilgiyi alarak yaradılışını sağlayan isimler oldukları unutulmamalıdır. Da Vinci de bu ruhu taşıyan isimlerdendir ve anlaşıldığı üzere de favorilerimdir.

Nedir o, tüm manzaraları sahiplenebilmek ve bütünleşik olarak görebilmek, tüm manzaralara imzasını atma isteği? Da Vinci’nin anında yer, mekân, kültürel ve dinsel atmosfer değiştirebilme hevesi, isteği, çabası ve yeteneği, dünyanın dört bir köşesinden krallara, sultanlara proje sunma, orada yaşamayı içselleştiren hâli? Hepsinin üzerine çıkabilme ve olabilme içgörü, öngörüsü ve tüm bunlara istem dışı sahip olabilme hâli.

'Değiştirebilme' sözcüğü üzerinde durmak istiyorum. Bu tür beyinler değiştirebilmek için de bakmıyorlar. Beyninin sınırlarının ona söylediği olması gerektiği şeklinin biçimlendirdiği bir algıyla bakıyor: Olması gereken bütünü görüp, her bir katmanına daha başlangıçta hakim olabilme durumu ve bu manzaraların hiçbirinin dili, dini, ırkı yok aslında! Da Vinci ısmarlama dinsel eserler de çoğunu tamamlamadığı için yaratma çabasında olan bir sanatçıydı. Yarım kalan işleri irdelendiğinde bile anlaşılabilir: Olması gereken tümü daha başlangıçta gören ve tümü oluşturan her bir teke, her bir katmana da daha başlangıçta hakim olan bu beyinde bu düşünce süreci nasıl gelişti? Bir formülü olabilir mi? Alsak ve hepimiz başımıza sürsek meselâ.

Ne müthiş değil mi?

Peki bu hal ne kazandırır ya da hangi halin bir göstergesi olarak sunulabilir?

Daha da ötesi, böyle bir düşünce oluşumu kontrollü olarak sağlanabilir mi?

Nedir Olası Özellikleri?

Örneğin: 'Bilgi' bu türlü bir düşünce gelişimi sürecinde işin neresinde?? 'Bilgi' tek başına yeterli bir gereklilik mi?

### **Kontrollü Tarafsız Düşünce Oluşumu ve Yaratıcı Zekâ İlişkisi**

Bilgi güçtür, bilgi her şeydir. Bilginin kötücül kullanımları da vardır, ocak söndüren, hayatları mahveden, bakınız Dijital Kölelik ile ilgili makaleler(Algül, 2020-2023). Bilginin insanlık lehine kullanılmasının önemi büyük olduğu gibi, insanlığın kontrollü düşünce gelişimiyle ilgilenmesi gerekliliği de içinde yaşadığımız çağda açıkça görülmekte ve hissedilebilmektedir. Dijital Köle'ler elbette en çok hissedenerlerdir. Neden bunları yazıyorum, konusu bu olan makaleyi doğuran şartlarla birebir ilgilidir de ondan. Ayrıca başta M.Ö. 6. yüzyılda doğduğum topraklarda yaşamış, bir grup, döneminde devrimci sayılabilecek düşünürlerin ve güzel küremizdeki diğer düşünürlerin okumalarıyla büyüdüm, bir düşünceyi ekmenin önemini bilen bir okuma geçmişinden geliyorum.

Bir fikri eklemek çok önemlidir: İskender'in Mezopotamya'yı fethetmesiyle beraber, aynı büyüklüğü güçten edinmek için Yunan kültürü modellenmeye çabaladı: Yunan dili öğrenildi, Yunan şiiri ezberlendi; vergiler bile Helenleştirildi fakat İskender'in yanında getirdiği Yunan kültürünün en büyük yönü sanat ve yönetimle ilgili bir şey değildi. Bu bizzat Aristoteles'ten öğrendiği bir şeydi: Dünyamızı kavrama mücadelesinde yeni, akılcı bir yaklaşım, fikirler tarihinde muhteşem bir dönüm noktasıydı ve bizzat Aristoteles de evren hakkındaki eski bulgulara birkaç nesildir meydan okumaya başlamış bilim insanı ve düşünürlerin fikirlerini geliştiriyordu. Antik Yunan'ın ilk dönemlerinde, Yunan doğa anlayışı, Mezopotamyalıların doğa anlayışından çok da farklı değildi. Kötü hava Zeus'un hazımsızlık çekmesiyle anlaşılabilir. Yazı icat edildikten sonra birkaç bin yıl içinde kaydedilen yazılar, dünyanın ortaya çıkışı ve hangi kuvvetlerin onu yönettiğine dair, çok fazla sayıda öykü ortaya çıkarır ve bu öykülerin ortak noktası gizemli bir tanrının bir tür şekilsiz bir boşluktan yarattığı düzensiz bir evren tanımasıydı. 'Kaos' sözcüğü evrenin yaratılmasından önce olduğu söylenen hiçliğin Yunanca karşılığından gelir.

Eğer yaratılıştan önce her şey kaossa, dünya yaratıldıktan sonra, Yunan mitolojisindeki tanrılar, bu dünyaya düzen getirmek için pek de uğraşmamışlar gibidir. Eski insanlara doğa kargaşayla yönetiliyormuş gibi geliyordu ve düzenli fiziksel yasalara inanmak, onların vahşi ve karpisli tanrılarının bize saçma gelmesi gibi- veya belki de günümüzden bin yıl sonra değerli teorilerimizi inceleyen tarihçilere saçma geleceği gibi-saçma gelirdi. Dünyadaki 'Kaos' algısının, dünyaya 'Düzen hükmeder'e dönüşmesi, Buda'nın Hindistan'a, Konfüçyüs'ün de Çin'e yeni bir felsefe getirdiği sıralarda, bu eski Yunan filozofları, bir paradigma değişikliği yaparak, evreni gelişigüzel değil, düzenli bir ortam olarak gördüler. Einstein'ın "Evrenin en anlaşılmasız tarafı, anlaşılabilir olmasıdır. 'Kaos'tan, 'Düzen' tanımlamasın geçmek, kozmos olarak görmek demektir (Mlodinov, 2018). Demek ki öncesinde 'Kaos' olarak görülen her şeyin, anlayınca çözümlenen bir yasası, yani düzeni vardı. İnsan, kendini çevreleyen her şeye 'Kaos' değil, çözmesi gereken anlamlar evreni olarak bakmaya başladı ve çevresiyle ilgili sorumluluk aldı. Bir başka söylemle artık kasırgada savrulan yaprak değildi. Kasırgaya engele olamıyorsa, kontrol edebilecekleri unsurlara yöneldi: Sağlam binalar, doğal afetlerin nedenleri, dünyanın canlılığını, kendisinin ne olduğunu fark etti ve bu farkındalık her şeydi ve bu her şey, sorumluluk almakla mı başladı.

Ekilen düşüncelerin güzel küremizin ve içinde yaşayan biz insanların, tüm canlıların hayatlarını nasıl değiştirdiği ortadadır. İnsan değişince, tüm etrafını, hatta küreyi de değiştiren bir canlı. Bumerang etkisi. Bakın insanın ilişki kurduğu her şey, sorumluluğun tam olarak alındığı ülkelerde nasıl gelişti? Herhalde tüm tanrılar da böyle bir gelişimi yarattıkları açısından isterdi, tıpkı bir anne babanın çocuğu için istediği şeyler gibi.

İşte bu makaleye sadece bu fikrin nüvesinin ekimi olarak bakılabilir ancak.

### **Düşüncede Kalıplaşma, Klişeler ve Daha Başlangıçta Öteki Olma Kavramı**

Bilim bize insanevlâdının çok geç değişebildiğini söylemekte. Düşünsel yapısının şekillenmesi beyin fiziksel olarak gelişimini tamamlamasına endeksli gelişme gösteren beynimiz, erken çocukluk dönemlerinde içinde

doğduğu anlamlı ötekilerin, aile, ona bakan kişiler arasında karşılaştığı tutum, tavır, dünya görüşü, kısaca hayata dair tüm bilgileri sünger gibi çekerek almaktadır. 0-3 yaş arasında beynimizin 3/2 fiziksel olarak gelişimini tamamlar. Altı yaş bu tamamlanma tüme doğru gider. Öyle ki, hukuki sosyal sorumluluk alma yaşı olan on sekize fiziksel olarak az bir oran kalmıştır. O halde erken çocukluk dönemi çok önemlidir. Bazı kültürlerde bu yaşlarda çocukları dini eğitim almak üzere yönlendirirler. Bu dönemlerde anlamlı ötekilerden ve sürekli ilişki içinde tutulduğu birimlerden öğrendikleri, kalıp ve klişe düşünce kalıpları olarak yetişkinliklerini biçimlendirir ve bu kalıpları kırmak çok ama çok güçtür. Önyargılar bu kalıplardandır. İşin en kötü tarafı bireyin tüm bunları farkında dahi olmamasından kaynaklanır. Adeta orduların eğitimi gibi bile olabilir ki, kötücül yapılanmalara bağlı olan insanların da benzeri kalıplardan geçirildiklerini düşünüyorum. Bireyin tüm bunları farkında olmaması demek, bir tür otomatik davranış şekline bürünmüş olması anlamına gelir. Kendi düşünce kalıpları dışında herhangi bir düşünceyle karşılaştığında, sorgu, eleştiri, irdeleme, olumlu olumsuz yönlerini bulma ve görme pencereleri dahi açılmadan ret edebilir ki, çoğunlukla böyledir, kadrajına dahi girmeyebilir ve ben bunu daha başlangıçta ötekileştirme olarak değerlendiriyorum.

Bu tür bir düşünce oluşumu, tarafsız, objektif düşünce gelişimini ya yok eder ya sekteye uğratır; oysa tarafsız, objektif düşüncenin yaratıcı düşünceyle direkt ilişkisi vardır. Merak duygusunun açtığı yollarda tarafsız bakabildiği kadar insan yaratıcı zekâsını ortaya çıkarabilir diye düşünüyorum çünkü görmeye hazırdır. Daha görmenin en başında, farkında bile olmadığı görmesini engelleyen, kalıpları yoktur.

Shakespeare'in insan karakterlerini tanımlamadaki üstün başarısı, benim için su götürmez bir gerçektir. Erken çocukluk dönemimde ilk tanıştıklarımdan biri de Shakespeare'dir ve elimde sözlük, kendi adını koyarken bile, mahlas olduğuna kanaat getirip, eğlenmiş demekten kendimi alamamıştım. Yazmış olduğu eserlerde, " onun yazıp yazmadığını tartışma konusu yapan, kanunlar, mahkemeler, kanuni işlemler ve avukatlık jargonu ve yöntemlerine sonsuz bir şekilde aşınadır ve Eğer Shakespeare bu muazzam zenginliği meydana getiren sonsuzca parçalanmış, yıldız tohumuna sahip olmuşsa, bunu nasıl, nerede ve ne zaman etti(Twain, 2017) sorusu bir yana, kalıplarla, klişelerle, kalıplaşan tutum ve tavırları ileri düzey kelimelerle canlandırıp, okuruna aktarabilme yeteneğiydi; kuşkusuz tüm bunları görebilmek için de muhtemelen hepsinden sıyrılmış bir düşün dünyasıyla bakmak gerekliydi.

Dahası hangi toplum yasalarını Platon'dan, Aristoteles'ten aldı ki, ya da Socrates'in öğretilerinden(Erasmus, 2017)aldı? Oysa alan İskender Mezopotamya'yı fethetti. Elbette fetihler dönemi bitti ve fetihler dönemini kozmozun keşfi, insanın kendini anlama ve bulma, dünyadaki yerini ölçümlendirme dönemi olarak da değerlendirip tüm savaşların bitmesi üzerine kurulu bir çalışmadır bu ki, genele yayılmış ideal mutluluğu beslemeyi kendine asli görev edinmiştir.

## SONUÇ

"Hayatın yükü altında ezilmeyelim; merhametsiz düşmanlarımıza, nankör dostlarımıza fikri melekelerimizi ezmiş olmak zaferlerini taddırmayalım."

Mme de Stael, Edebiyata Dair

Bilgiyle yaşantı arasına mesafe, ancak yazıyla üretilebilen, ayrıntılı çözümlemeli kategorilerle girer, böyle bir araçtan yoksun sözlü kültürlerse, tüm bilgilerini, insan yaşamına dayanarak, yabancı ve nesnel dünyayı, kendilerine yabancı olmayan insan etkileşimi çerçevesinde duyumsayarak söze dökmek zorundadır. Yazı ve özellikle matbaa kültürleri insani uzaklaştırır ve hatta tabiatını bile bozabilir. Örneğin önderlerin, siyasi grupların adlarını tamamen insani eylem bağlamından koparıp, soyut, yansız listelere dönüştürür. Sözlü kültürde liste gibi yansız bir araç yoktur. İlyada destanının ikinci bölümünün sonlarına doğru dört yüzden fazla dizide yer alan-meşhur gemi sayımında, tüm Yunan önderleri, yönettikleri bölgelerin adları, tamamen kahramanların eylem bağlamı içinde, destan olaylarına katkıları derecesiyle sıralanır. Homeros dönemindeki Yunanistan'da, bu tür siyasi bilginin- normal olarak veya büyük bir olasılıkla- bulunabileceği tek sözel kaynak ya anlatılar ya da kişilerin akrabalık bağlarını betimleyen ve yansız listeler olmayan soy dökümleriydi. Sözlü kültürlerde insan etkinliğinden kopuk istatistikler veya veriler pek bulunmaz(Ong, 2018).

Bir fikri öncelikle sözlü kültürde yeşertmek, insanla bağı kurmak, fikrin kalıcılığı ve yagın kabulü açısından çok önemli olsa da anadilin okur yazarlığının doğru metodolojilerle öğretilmesi, matematik bilgisinin, yaş seviyeleriyle doğru orantılı olarak somut-soyut algılama yaşlarına göre hareket edilmesi(Algül, 2018) sözlü kültürden yazılı kültüre geçiş süresinde önemli olacaktır.

# KÖTÜCÜL DİJİTAL REEL PSİKO-SEMİYOTİK DİL KULLANIMLARI ÜZERİNDEN TOPLUMSAL BELLEK ARAŞTIRMALARI, İNŞÂNIN SÖKÜMÜ, YAPI BOZUCU İNCELEME MAKALELERİ II

Doç. Dr. Nevin ALGÜL

Marmara Üniversitesi, Radyo, Televizyon ve Sinema Bölümü,  
Türkiye

## ÖZET

Toplumsal bellekte var olan görsel ve dilsel göstergelerin Dijital Reel Psiko- Semiyotik Dil olarak kullanımlarını inceleyen makalemin devamı niteliğindeki bu çalışmanın içeriğinde Dijital -Reel Psiko -Semiyotik Dil Kullanımlarından örnekler sunulup, örnekler üzerinden; bu özelliklerini sergileyen dilsel ve görsel göstergelerin katmanlarının soyulup hedefi vurmadaki etkilerini ölçme ve değerlendirme çalışması da yer almaktadır.

Dijital Reel Psiko-Semiyotik Dil Kullanımları o kadar önemlidir ki, toplumsal bellekte var olanlar yok edilerek, yeni bir toplumsal bellek yaratma gücünü bünyelerinde taşırlar. Bu açıdan da bu makalelerin önemi yadsınmaz.

Bu anlamda iyicil ve kötücül örnekler üzerinde durulup, konuyla ilgili farkındalık yaratma yollarını da kapsamaktadır.

**Anahtar Sözcükler:** Psiko-Semiyotik, Dijital-Reel, Gösterge, Yapı Bozumu, Toplumsal Bellek.

## GİRİŞ

Kültür nedir? “Bu davranışın ayrılmaz bir parçası olarak kullanılan maddi nesnelere birlikte, kültür Homo Sapiens’e özgü bir davranıştır. Dolayısıyla kültür, diğer unsurların yanı sıra, dili, fikirleri, inançları, gelenekleri, kodları, kurumları, araçları, teknikleri, sanat eserlerini, ritüelleri ve törenleri içerir (Britannica).” Her sabah aynaya bakanlarımız, çok az hayvanın yapabildiği bir şeyi yapar, kendini tanır; bazılarımız kendi görüntüsüne gülümser ve öpücük yollar, kimimiz bakımsız görünmeyelim diye kendimize bir çeki düzen verir, faciayı makyaj veya tıraşla kapatmaya çabalarız (Mlodinov, 2018). Eğer aynaya iki kişi bakıyorsak devreye büyük bir ihtimalle karşılaştırma ve kıyas girer. Onun gözü, onun kaşı, benimkiler diyerek, bireyin kişiliğinin belirleyicisi olduğu bir yarışma da başlayabilir. (Mlodinov, 2018) Çok az hayvanın başarabildiği şekilde, insanların verdiği tepki tuhaf bir tepkidir. Bu tepkimizin nedeni, evrimimizin bir noktasında, biz, insanların kendimizi farkına varmış olmamızdır.

Herhalde kendimizi farkına varmak da istem dışı ‘merak’ etme güdüsüyle başladı. Doğadaki her şeyi merak ettiğimiz gibi birbirimizin ilk aynaları kendimiz olduk belki de, zamanın ilk izlerini, orta, son aşamalarını birbirimizde gözlemledik. Ölümün genç yaşlı dinlemediğini, zamana bağlı olmadığını da yaşantılarla deneyimledik; hastalığı, beklenmez kazaları, doğal afetleri öğrendik. Sonra çünkü önce hayatta mı kalmaya çabaladık? Belki hayatta kalma çabası sırasında aksimizi gördük, belki aksimizden cesaret aldık? Bizim ve her şeyin doğadaki yansımalarımızı ve yansıma çeşitlerini fark ettik. Suyun üzerinde yansımızı görmek, suda gördüğü “ben” e aşık olan Narcissus (interestingliterature.com/2022/12/narcissus-myth) misali hayranlıkla beraber merak da uyandırmış olmalı çünkü doğadaki her şeyi merak ede ede bugünlere geldik. Belki de temel itki merak. Öncelik sonralık, bir başka söylemle önce birbirimizin aynası mı olduk ve sonra su ve yansıtılabilir metallere mi fark ettik? Saptanmış bulgulara dayanarak elde edilmiş bir bilgi var mı? Araştırılması gerekir ama sonunda aynayı keşfettik ve icat ettik. Büyük bir olasılıkla ilk birbirimizin aynası olabiliriz çünkü erken çocukluğu beş yaşına kadar genel çoğunlukla köyde geçmiş biri olarak, geniş toprakların sahipleri olan evlerde doğan kadınlar, gelinler ve kızların aynayla hasbihalleri ancak işleri bittikten çok sonra, aynaya vakit kalırsa, sıra gelirse; aynaya bakılacak zamanlar düğün, görücü, şehre gidişlerde belki, yani aslında aynaya bakmak bir lüks, demek ki, insanlar rahatlamış oldukları zamanlarda keyifli şeyleri keşfetmiş veya zor zamanlarda keşfedip rahat zamanları olanlarla hayati ihtiyaçları için takas etmiş; belki keyifli zamanları yaratmak için böyle anlardan ilham almış da olabilirler. Geçmiş atalara bakıp; insanın, insan olmak zor zanaat diyesi gelirken bazen, çokça bu muhteşem, tüyleri diken diken eden mücadeleye şapka çıkarası da gelmiyor değil. İnanılmaz bir mücadelenin en inanılır tarafı, doğa ve insan ilişkisi, bir başka söylemle doğayla olan mücadelesi geriye kalan insanlar arası ilişkileri hiç akıl kârı değil ve insanlık dışı. Dijital çağla beraber asıl büyük sınavın başladığı söylenebilir. İnsanın eline kötücül kullanabileceği imkânları sun ve gör. Benim gibi bakışlarının sorumluluğunu alan biri için de büyük bir ders.

## Psiko-Semiyotik İletişimde Dil Kullanımının Bileşenleri Nelerdir?

Bir bilim dalı yaratımının zevki işte burada yatar. Tekrarlar, geniş halk kitlelerine ulaşıncaya kadar yeni bilimsel yaratımları tekrar etmek... Çok mu ciddiye alınıyor yapılan iş? Genel çoğunluğun nüvesi işine gelmeyi görmemeye dayanmaz mı? Bu kadar çok bölünmüş dünyada, o kadar çok kalıplaşmış düşünce üzerinden okuma ve yazma var demektir, değil mi? Hayır, tek bir kişiye bile ulaşmak önemlidir. Bazıları Sisyphus olarak doğarsa bu eylem kaçınılmaz, istem dışı, bir refleks hâlinde yerine getirilmeye çalışılan bir çabaya dönebilir.

Bakınız mitolojideki Sisyphus ne der(interestingliterature).

**Psiko- Semiyotik İletişim.**(Algül, 2019-2023) gösterge havuzunun kasıtlı olarak, istedik doğrultuda hedefi tam on ikiden vuracak şekilde, göstergelerin toplumsal bellekteki kronolojisi, psikolojik etkisi, imgesel iz düşümleri ve çok daha fazla dinamikler üzerinden incelenerek, araştırmaları yapılarak, taşıdıkları anlamlar, göstergelerin yaşam süreçleri içindeki devingen döngülerinde yüklendikleri her anlam üzerinden irdelenerek, etkisi bir başka söylemle sonuçları hesaplanarak, buna dilsel göstergeler için *dizilim(sentaks)*, görsel göstergeler için *imgesel iz düşümleri( alt, üst çağrışım anlamlarının imgeleri)* hesaplanarak belli bir amaç için, bu amaçlar çoğul da olabilir; kasıtlı ve bilinçli bir şekilde tasarlanmış etkileşim değerleri hesaplanmış bir iletişim dilidir ve maalesef insanlık, özellikle dijital çağın sunduğu tüm teknolojiye de kötücül anlamda kullanarak çıkarları doğrultusunda hareket edebilmektedir. Kutuplardan eliptik bu küredeki çağımızın insanı *Psiko-Semiyotik olmayan* bir iletişim diliyle artık karşılaşmamaktadırlar, denebilecek bir çağı deneyimlemektedir.

**Göstergeler (şimdilik, bu alan değişken ve bu değişkenlik öngörü oluşumu için vurgulanmalı) üçe ayrılır:**

1. **Dilsel Göstergeler:** Tüm doğal diller ve bu dillerden türetilecek, yaratıcı zekânın kapsama alanına girebilecek yeni yaklaşım ve kullanım biçimleri de dahil olmak üzere *dilsel göstergelerdir*; zamana ve yaratıcı zekâyâ endeksli olarak esneklik özelliğine sahip olabildikleri unutulmamalıdır; bu anlamda teknolojinin sunduğu ya da alanın teknolojiyi zorlayarak, teknoloji üzerinden elde ettiği veya edebileceği her türde, her türlü yenilik, dilsel göstergelere dahildir.

2. **Görsel Göstergeler:** Resim, fotoğraf, karikatür, renk, biçim, nesne

3. **İşitsel(Duyuşsal), Dokunsal, Tat Almayla İlgili ve Metaforik Göstergeler:** (Bu tanımlama da bana ait ve zamanla tüm bu söz öbeklerinin yerine, hepsini kapsayacak, genel çoğunluğa hiçbir anlam karmaşası yaratmadan ulaşabilecek başka bir söz ya da söz öbeği bulabilir veya üretebilirim ama şimdilik bu şekilde kullanmayı tercih ediyorum). Koku, Doku, Ses, Acı, Ekşi, Tatlı, Ezoterizm alanı, 6. his, içgörü, öngörü, vb. gibi. *Her türlü tanımlama ve bilgiden önce yapıldığı çokça ölçümlenen* bir yanlıştan dem vurma gerekliliği: *Gösterge* sözcüğü sadece fotoğraf, resim, karikatür, biçim, nesne anlamına gelmez; bir başka deyişle *çözümleyici bilgide* sık sık yapılan bir yanlış olan sadece *'görsel'* anlamını yüklenmez. *Semantik, anlam bilimin* hiç olmadığı veya zayıf kaldığı iletilerin genel çoğunlukta karşılık bulamamasının bir başka söylemle, iletişimin gerçekleşmesi için bir gereklilik olan *karşılıklılık ilkesinin*; burada sözcüğün yaygın olarak yüklendiği *görsel* alt üst çağrışım anlamlarının yoğunluğu nedeniyle *çalışmamasından* dolayı etkileşimin gerçekleşmemesiyle sonuçlanabilir. Bu mesaj kaybı, gönderen gönderilen ilişkisi açısından iki taraflı kayıp olarak değerlendirilebilir, değerlendirilmelidir.

Sonuçta dilsel göstergeler de birer görsel' olarak görülebilir aynı zamanda ki, 21. Yüzyıl insanının geldiği, getirildiği noktada, *dilsel göstergelerin* zihindeki görsel izdüşümlerinin, *imgelerinin* çağrışım anlamlarının *görsel göstergeler* üzerinden öncelik sonralık ilişkilerinin önemine göre, daha tasarımın başlangıcında başarılı görümlerle saptanması başarıyı getirecek temel unsur olarak görülmelidir(Algül, 2024), mesajın yerini bulmasını kolaylaştıracaktır. Daha kolay anlaşılması için sadeleştirilirse doğal dillerin tümü de birer *gösterge*dir. Gösterge sözcüğü dendiğinde sadece *görsel* ve görsel sözcüğünün çağrıştırdıkları düşünülmemelidir. Belki tanımlama için sözcük seçerken göstergebilim dalı da dahil olmak üzere, aradaki ayırım açılabilir ve sözcük bazında netlik kazandırılabilir. *Dilsel ve görsel göstergelerle beraber 'gösterge' sözcüğünün anda taşıdığı ve gelecek zamanda taşıyabileceği anlamlara ( devingen döngü alanı) da açılması;* alt başlıklarla ayrıştırılması ve maddelerin açıklanması gereklidir. Gösterge alanının devingenliğinin üzerinde durulması, alanının hareketliliğini vurgulayabileceği gibi; aynı zamanda gösterge sözcüğünün yüklendiği anlam ve çağrışım anlamları karışıklığını gidermeye de yarayabilir, yüklendiği ve yüklenebileceği anlamları zihinlerde somutlaştırmayı kolaylaştırabilir. Bu makalede saptanan olası karışıklığa neden olabilecek algıları netleştirme çabası güden bir tanımlama ve açıklayıcı dil kullanılmıştır. Umarım netleştirmeye yardımcı olur.

Göstergebilimin dilsel ve görsel göstergeler olarak ikiye ayırdığı bu alanın, içinde doğulan çağ gereği üçe ayrılması gerektiğini düşünüyorum. Psiko-Semiyotik İletişim alanı çok hareketli bir alan olma özelliğini bünyesinden taşır. Dolayısıyla Dijital-Reel- Manuel Psiko-Semiyotik Dil Kullanımı yönleriyle daha da genişleyecektir ve hatta belki de teknolojik göstergeler maddesini de kapsayabilecektir. Böyle bir sınıflama daha da netliğe yardımcı olabilir. Bu yönüyle buluşum olan: Psiko-Semiyotik İletişim, Etkileşim başlığı altında toplamaya başladığım; yarattığım bilim dalı Dijital-Reel-Manuel Psiko-Semiyotik Dil Kullanımları(Algül, 2017-2023), ALGÜL Dijital-Reel-Manuel Psiko-Semiyotik Dil Kullanımı Ayrıştırıcıları ( 2018-2023) alan için şimdilik *üçe ayırdığım tanımlama* belki göstergebilimine ilham olabilir, Psiko-Semiyotik İletişim, Etkileşim insan aklının boyutlarınca sınırsızdır ve disiplinler arası ve üstü çalıştır.

**O halde gösterge nedir?**

Öncelikle, gösterge sözcüğünün tanımıyla kasıtlı olarak başlanmadığı bilinmelidir. Daha öğretici olabileceğine inanıldığı için böyle bir yöntem tercih edildi. *Açıklayıcı bilgisi* bir başka söylemle sözlükteki tanımı: "Bir şeyi belirtmeye yarayan şey, belirti, im; işaret" ( <https://sozluk.gov.tr>), dir. Kendi dışında bir şeyi temsil eden, dolayısıyla temsil ettiği şeyin yerini alabilecek nitelikte olan her çeşit biçim, nesne, olgu( Rıfat, 2009)'dur.

Kendi dışında bir şeyi temsil edebiliyor olması devreye insana dair unsurların girdiği anlamına gelir. Hedefin ki, birey, topluluk veya toplum olabilir psikolojisini ele geçirmeye, kavramaya ve avlamaya yönelik, hedef için çok özel, anlamlı, değerli yani önemli olan bir şekilde ruhunu, psikolojisini etkileyip bu etki üzerinden andaki duygu durum biçimini istedik yönde kavrayıp dönüştürüp değiştiren, hedef için görüntüsünden öte, nasıl görüldüğünden ziyade, o görüntünün ya da anlamın (dilsel göstergeler) yazılı ya da sözel içeriğin( tek bir sözcük de olabilir) ne hissettirdiğinin anlam ve önemiyle ilgilidir. Özetle bu göstergeler hisler dünyasını değiştirip dönüştürecek gücü taşıyan dilsel ve görsel ve işitsel, dokunsal ve metaforik anlamlar evreninin hepsidir.

Bu paragraftan şu anlam çıkarılmalıdır, herhangi bir sözcüğün, sözcüğün harfleri dahil, dokunun, konunun, rengin, fotoğrafın, karikatürün, biçimin, nesnenin, içgörü, öngörü, Ezoterik, mecazi(metaforik) anlamlar evreninin hedef kitleye yönelik etkili olabilmesi için hedefin psikolojisini avuçlarının içine alabilecek kadar etkili bir şeyi temsil etmeleri, bir başka söylemle, kendi dışında, görünür olduğu haldeki biçimi, görseli, nesne hâli, olgusu dışında bir şeyin yerine geçmiş olması, dolayısıyla onu temsil etmesi gerekir.

Tüm bunları kim, kimin için yapacak?

Hedef kitle: birey, topluluk, toplum için.

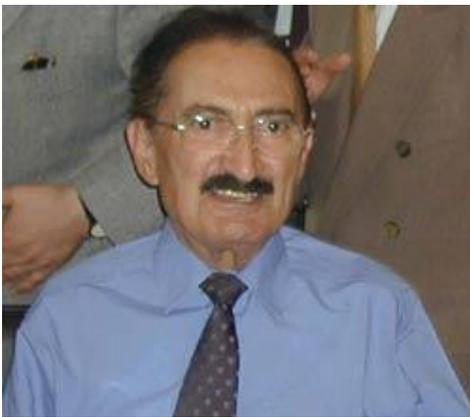

### Psiko-Semiyotik İletişim Kaynakları Nelerdir?

İnsanın değişimi zor olduğundan içinde yaşanılan çağ ne olursa olsun, geçmişinden kopuk kültürel kodlar beklenemez. Bir yandan insan doğası da geçmişe tutuklu kalmaya meyilli donanımlardan geçebilir, ki uygarlık tarihi bunu kanıtlar: Geçmişe bağlılık din, ırk, ideolojiler, üzerinden de desteklenip, sürdürülebilir kılınabilir. Tüm farklı bilimsel disiplinler üzerinden toplumların yapısını ele alan bilgi dağarcığı aynı anda çok çeşitli açılardan Dijital-Reel Psiko-Semiyotik Dil Kullanımlarının bir yandan hazırda var olan kaynaklarını ortaya çıkarırken , yeni kullanılacak olası kaynak verilerinin buluşlarını kapsar ve sürekli yeni keşiflerle genişler.

Toplumları dinsel, tanımlamalar üzerinden irksal, yönetim biçimleri, yaşanılan coğrafya, geçirilen tarihsel dönemlerin her birinin kültürel kodlara kattığı etkiyle birbirinden ayırıştırırken, içinde yaşadığımız dijital çağda yaşantılarımızla deneyimlediğimiz gibi sırf insan olmaktan kaynaklanan ortak kültürel kodlarımızın dışında giderek; dijitalleşme sonucunda dünya kasabasına dönen eliptik küremiz için küresel çapta ortak Dijital-Reel Psiko-Semiyotik Dil Kullanımlarının giderek çoğaldığı bir havzaya döner: Emojiler buna en basit örnek olarak verilebilir ve Emojiler, dijital çağın yarattığı Dijital-Reel Psiko-Semiyotik Dil Kullanımları olarak değerlendirilebilirler. Bunun yanı sıra toplumların kültürel dokularında var olan ama bugünkü kadar yaygın kullanımda yer alamamış, dolayısıyla anlamı geniş kitlelere ulaşamamış, gelişmiş denilen Batı ülkelerinde bilime endekslili gelişen veya toplumun geçmiş kültüründe yer alan göstergelerin, dijital çağın etkisiyle yaygın bir kullanım alanı bulmasından kaynaklı olarak küresel boyutta birer Dijital-reel Psiko-Semiyotik Dil Kullanımı aracına dönüştüğünün görüldüğü örnekler, bunlardan biri mavi yaka örneği.

Bunların dışında bir toplumun toplumsal belleğinde yer alan, deyimler: Genellikle gerçek anlamından çok az ayrı, kendine özgü bir anlamı olan, kalıplaşmış, söz öbeği; tabirler, (TDK/Sözlük)); bir ulusun değer yargılarını anlatan özlü sözler(Çotuksöken, 1994) atasözleri, genel yaygın kullanımda geçmişe dayalı anlam ve önemi olan, bir başka söylemle tarihsel kimliği bulunan tüm dilsel, görsel, işitsel, dokunsal, metaforik, ezoterik göstergeler birer Dijital-Reel Psiko-Semiyotik Dil kullanımı oluşturma havuzudur.

### Renk Göstergelerine Dijital-Reel Psiko-Semiyotik Dil Kullanımları Üzerinden Örnekler: Mavi Yaka Örneği, Orta Sınıf, Parti Sembolleri, ...

<https://galeri12.uludagsozluk.com>

Mavi: Güven, Sadakat, mantık(<https://meandyou.co.uk>)

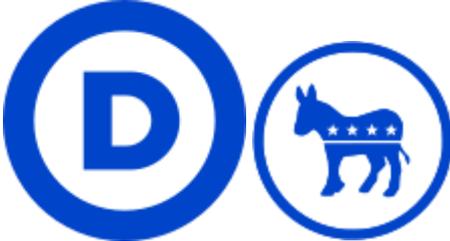

Ecevit Mavisi ve Mavi Yaka,:Teknolojinin salgın yayılımı sonucunda giderek dijitalleşen eliptik küremizin ileri düzeyde benzeşmeye başlayan Psiko- Semiyotik İletişime küresel boyutta siyasetin seçim arenaları için üretilen Dijital-Reel Psiko-Semiyotik Dil Kullanımlarına örneklerine, bu konuyu başlık edinen (Algül, 2024) henüz yayımlanmadığı , yayım aşamasında olduğu için kaynakçada bulunmayan bakılabilir. Sayın Ecevit iş dünyası için akademik çalışmalara geçen mavi yaka sınıflamasını elbette biliyordu. Bir sosyal demokrat olarak bilinçli seçmiş olduğu düşünülebilir. İçinde bulunduğumuz zaman diliminde ABD'inde yapılan son seçimlerde Sayın Obama'nın mavi, yukarı kıvrılmış, ilk düğmesi açık, gömlekleri ve mavi rengin yoğun olduğu arka fonlar, çokça göze çarpmaktadır. Seçim ortamlarında kullandığı aksesuarlar, aksesuar olarak artık değerlendirilebilecek olan, beden dili, jest ve

<https://i.haberglobal.com.tr>

Siyasi İletişimde Psiko-Semiyotik İletişim: Dijital-Reel Psiko-Semiyotik Dil Kullanımları adlı henüz yayımlanmamış makalemden geniş olarak incelenecektir(Algül, 2024).

ABD Demokrat Parti / Seçim Sembolü

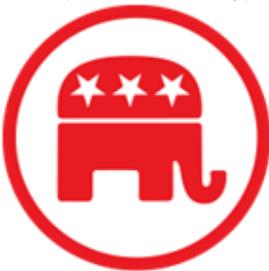

<https://tr.wikipedia.org>

Siyasi partilerin sembollerini tasarlarlarken, tasarımın daha başında renkleri gösterge olarak kullanmalarına örnek olarak bugünlerde ABD seçimleriyle gündemde olan iki parti üzerinden örnek verilebilir. Şüphesiz ki, buradaki renkler, ABD bayrağında bulunan renklere gönderme yapmaktadırlar. Tek katmanlı bir açıklama olarak bu söylenebilir. İleri katmanlar için ABD bayrağına konan renklerin neleri temsil ettiği araştırılmalıdır. Bu araştırma her bir şeklin, biçimin, konan yıldız sayısının, yıldızların rengine ve daha fazlasına kadar çıkacaktır.

Obama'nın Demokrat Parti seçimlerine ivme kazandırmak için çıktığı siyasi arenada sıkça kullandığı 'orta sınıf çalışanlarını' temsil eden mavi renk ve ABD bayrağında yer alan, kendi parti bayraklarında da olan mavi. Parti bayrağında olan rengin ayırımına Wikipedia'da girilmemiş ama indigo mavisini gibi görünmekte. Konuşmalarında ve çekimlerinde baskın şekilde bayrağın mavi olan bölümünde durması, mavi fonun hakim olması, aynı zamanda sürekli kendi partisini seçmene hatırlatan bir duruştur. Seçmenin kafa karışıklığıyla kaybetmemeye yönelik.

Nasıl oy vereceklerine kadar rol model oluşuna dikkat edilirse, seçmeniyle ilgili hiçbir durumu Demokrat Parti'nin seçmenine bırakmayıp, onu her adımda yönlendirmeyi seçtiği gözlemlenebilir. Bu durumun

GOP (Grand Old Party) Cumhuriyetçi Parti

<https://tr.wikipedia.org/wiki/>

nereden kaynakladığı, seçmenine ait özelliklerin ölçme ve değerlendirmeleri sonucunda mı geliştiği ayrıca araştırılması gereken bir durum olmakla beraber, biraz da küresel liderlerin ortak tavrı gibi durmaktadır. Küresel çoğunluğa ortak bir bakış da söz konusu olabilir ve bu bakışına neden olan kaynaklar bulunabilir. Burada ele alınan sadece renktir. Mavi renk aynı zamanda "Mavi, huzur ve sükunet ile bilinirken, aynı zamanda üzüntü, soğukluk ve depresyon duygularıyla da ilişkilidir. Birden fazla renk tonu mavi bir odaya renkli mobilyalar ve dekorlar koyabilirsiniz ve gözleriniz çok bunalmış hissetmez. Koyu mavi tonlarını kullanmak duyguları

düzenlemeye yardımcı olur. Genellikle ilişkilendirildiği duygu durum biçimleri: Barış , Huzur, Rahatlama, Güven, Sadakat, Güvenilirlik, Üzüntü, Yalnızlık, Soğukluk(<https://www.artcobell.com> ). Mavi rengin adeta sedatif diye tanımlanabilecek psikolojik etkisi bir nevi çalışan sınıfının makul, sakin, denileni yapan, verileni alan, fazla bir şey istemeyen ve arz etmemeleri üzerine kalıba konmaya çalışılan tarafını besler gibidir. Bir çeşit köleliğin rengi, orta sınıfın, orta sınıf çalışanlarının bir nevi kanaatkâr, isyan çıkarmayan sakin hali, mavi. Renk, marka kimliğimizin en güçlü yönlerinden biridir( <https://identity.stanford.edu>)

Peki, Ya kırmızı?

“Kırmızı temel renklere dendir. Kültürler arasında, insanlar kırmızıyı öfke kavramıyla sezgisel olarak ilişkilendirir. Bu ilişki, birçok insanın öfkelenmesinde artan kan akışından dolayı yüzünün kızarması göz önüne alındığında mantıklıdır. Kırmızı renk, yüzdeki öfkenin tespitini kolaylaştırır ama ne kadar? Kırmızı, insanların ustalaştığı, ürettiği, yeniden ürettiği ve farklı tonlara ayırdığı ilk renktir. Ayrıca tarih öncesi dönemde sanatçılar tarafından kullanılan en eski renklere dendir. Kırmızının insanlar üzerinde hem fizyolojik hem de psikolojik etkileri olduğu ve bu nedenle üzerimizde olumlu ve olumsuz etkiler yarattığı bilinmektedir. Yüklendiği anlamlar, sevgi, güç, tutku, güven, saldırganlık, çekicilik, İkna, Performans, Dürtü Kontrolü, Enerji, Risk Alma, Stres, İştah, dikkat, Hakimiyet, Dürtüsellik, Rekabetçilik (<https://www.colorpsychology.org> ) ve elbette tüm bu anlamlar Dijital-Reel Psiko-Semiyotik Dil Kullanımları üzerinden incelendiğinden çağrışım anlamlarıyla birlikte ele alınması gereken unsurlardır.

Beyaz-Mavi Yaka Terimleri ilk ne zaman ortaya çıktı?

"Beyaz yakalı işler" ve "mavi yakalı işler" terimleri iş, ekonomi, eğitim ve sınıf hakkındaki tartışmalarda ortaya çıktı. Beyaz yakalı 1910'da ilk olarak kullanılan oldu. Nebraska gazetesi, bu terimi Orta batıdaki ofis çalışanları ile tarım işçilerini ayırmak için kullandı. Erkekler genellikle Pazar günleri kiliseye temiz, kolalı beyaz yakalı gömlekle giyerlerdi. Beyaz yaka dile girdikten sonra, işyeri sonucunun ortaya çıkması uzun sürmedi. Mavi yakalı deyiminin ilk olarak kullanılması 1924 yılında gerçekleşti. Iowa'da bir gazetede marangozluk gibi zanaatlarda çalışan erkekleri nitelemek üzere kullanıldı. Bu adamlar aslında o kadar sık mavi yakalı gömlekle giymiyorlardı ama mavi kot pantolon ve tulumlarla giydikleri gömlekle, işlerini yaparken gelen lekeleri gizlemeye yardımcı olmak için genellikle daha koyu renkleri( <https://people.howstuffworks.com> ).

### **Dijital-Reel Psiko-Semiyotik Dil Kullanımlarına Kaynak Oluşturan Toplumsal Bellek Havzaları, Legal Görünümlü, İlegal, Dijital Köle Dijital Alan Havzaları, ...**

*“Alın açık yüzüm pak”*: Deyimi, Covid 19'dan, ileri küreselleşmeden çok önce, küreselleşmenin adının global olarak söylenmeye başlandığı dönem 1980'lerin sonları, 2000'li yıllara doğru bu toplumda çokça değeri olan bir deyimdi. “Hatta buradan ben, dille hep ilgili olduğum için vurucu sözcük, sözcük öbekleri üretmişim. ak'la başlayan sözcükler, Boğaziçi Üniversitesi'ndeki öğrencilik günlerime denk gelen bu dönemde, çok rüzgârlı bir seçim öncesi zamanı, bir durak önceden inip, yürümek zorunda kaldığım bir gün, suratıma yapışan seçim flama ve bayraklarıyla mücadele sonrası, çok kızgın bir şekilde kendimi eve atıp, nihayet bilgisayarımın başına oturduğumda, o kızgınlıkla tasarlamıştım. Seçim için bunca hazırlığa halkın parasını yatırmaya gerek yok, işte size ak, pak, parti isimleri, hatta teke düşürmüştüm. Evraka, alın işte size ampul: Her Anadolu'dan gelip İstanbul'a yerleşenin evinde neredeyse ampul vardı. Alın size de her iki anlamda içselleştirilebilecek psiko-semiyotik dil kullanımları. O zamanlar temel bilgi olarak var olan bu bilgi, seneler sonra bilimsel alanlara ve tanımlamalara yerlerini bıraktı. Günlüğümde tasarladıklarımı dış dünyamda gördüğümde ilk zamanlar çok şaşırıldığımı anımsıyorum. Bu tesadüfler yıllar içinde bini aştı ve bu bilim dalı da böylece doğdu ve kaptırılmaması başarıldı.” <https://tr.linkedin.com/nevina> )Yazarın LinkedIn'deki VinciSafiye adlı, kendi yaşam öyküsünden ilham alarak yarattığı hikâyelerinden genişletilerek alınmıştır. Türk siyasi tarihinde önemli bir yeri olan Sayın Ecevit'in Ak Güvercini:

<https://galeri8.uludagsozluk.com>

“Alnım açık, yüzüm pak” deyiminin, doğduğumuz toplumdaki bellekte, direkt olarak aklıkla, temizlikle, ahlâklı olmakla, temiz bir sicille ilgisi vardır. Bir dilsel göstergenin alt, üst çağrışım anlamlarının zihindeki iz düşümlerine, içinde doğulan toplumda genel yaygın boyutta etkin olan kültürel kodu ‘karar verici’ olarak davranmaktadır. Belirleyici olan içinde doğulan toplumun kültürel kodunda geniş bir ölçekte yatan **anlamlar tarihidir** ve bazen bu **anlamlar tarihi**, yine tarih faktöründen kaynaklı nedenlerle kaymaya, değişmeye, yok olmaya uğrayabilirler çünkü tarihsel bir devingen döngü içinde yaşarlar, anlamlar yüklenir, anlamlar kaybedebilirler ve bazen ölü sözcük hâline gelebilirler. Örnek: Ölü diller gibi. Tarih faktörü alanının belirleyici dinamikleri ise toplumsal boyuttaki yaşantılardır ki, söz öbekleri( deyimler gibi), atasözleri, sözcükler bu yaşantılarla yeni anlamlar kazanacaklardır ve bu anlamlar belirleyici olacaktır. “Ak koyunun kara kuzusu da olur”, (Çotuksöken,1994). Globalleşmenin büyük bir hızla küreselleşme sözcüğü üzerinden genel söylem olduğu zamanlara kadar “Alnım açık yüzüm pak” deyiminin, zihinsel iz düşümü; ak-pak olmanın/görsel göstergesi ‘beyazlık’ üzerinden yüklendiği anlam, geçmiş sicilin temizliği, gelecek sicil temizliğinin garantisi, ahlâklı duruş alt ve üst çağrışım anlamlarını bünyesinde barındırıyordu. Burada ilginç gelmesi gereken; **deyimlerin ve atasözlerinin toplumsal bellekteki yerleridir**. Bir söz öbeği olan deyimler, çağrışım anlamı olarak **tek bir anlamı baskın şekilde** vurgulayabilir ‘ak’ örneğinde olduğu gibi; bu özellik atasözleri için de geçerlidir ve toplumsal bellekteki geniş atasözü ve deyimler havuzundan tasarım için içgüsel olarak seçilen deyim ya da atasözlerinin, seçilme itkisini bilimsel olarak açıklayabilir çünkü dilin özelliklerinden olan nesilden nesile geçebilme yeteneklerinden dolayı, o dilde doğmuş olmakla kazanılmış, doğal olarak sözcük türetme, dışarıdan, başka dillerden dile girmiş sözcükleri, açıklayıcı bilgi sahibi olmadan, dilin yapısına uygun dönüştürebilme esneklikleriyle bağıntılı olabilir. Deyimlerin, andaki zamanda yüklendiği anlamı içgörü ile sürekli tam on ikiden seçebilmek, doğuştan kazanılmış bir zekâ, yeti, yeteneğe ihtiyaç duysa da, bir toplumdaki temel eğilimi dilin bu özelliklerine dayanarak açıklanabilir. Elbette akademik tartışmaya açık savlardır.

Konuya dönülürse içinde yaşanan çağ gereği bazı deyimler gibi bu deyim de eski anlam ve ağırlığını, yitirmiştir ve içi boşalmıştır. Buradan anlıyoruz ki, içinde yaşanan zaman Dijital-Reel Psiko-Semiyotik Dil Kullanımlarının etkisini belirlemektedir.

“Ak akçe, kara gün içindir.” “Sağlıkta alın teri dökülerek kazanılan para, kötü günlerde en büyük yardımcı yerine geçer”, “ Ak koyunu(ala keçiyi) gören, içi dolu yağ sanır”, Toplumsal Bellekte var olan **‘ak’ sözüyle ilgili masal motifleri**: Dede Korkut Hikâyelerinde yer alan: Ak Sakallı Dede örneği: **Ak Sakallı Dede** bir kişiye görününce, yaşamı için verilen öğütler tutulasıdır. Ak Sakallı Dede’nin söyleyeceklerine güvenilir. “Dede Korkut’un Oğuz Halkası, kişiliği söylenceleşmiş Bayundur Han’un torunları Akkoyunlu Türkmenler,...”(Melikoff, 2008).“*Ak Sakallı Derviş*”: “*Ak Güvercin*”, Dede Korkut Masallarında çokça kullanılan masal motiflerindedir.

Küresel Boyutta Beyaz renge yüklenen anlamlar, bu anlamların her biri psikolojik bir etki taşır ve içinde buldukları toplumda bu anlamlar çeşitlenir. Dijitalleşen kürede bu çeşitliliği küresel boyutta giderek hızlanan bir ivmeyle bir standart küre dili, kazandırmaya başladığı gözden kaçırılmamakla beraber bu farklılık mevcuttur ama genel anlamıyla beyaz renk: “Beyaz: Sadelik, Temizlik, Sağlık (<https://meandyou.co.uk> ). İfade etmektedir.

**Olası Kötücül Manipülatif Etkileri**: Halkın, genetik kültürel kodunda var olduğundan bile haberi olmadığı, toplumsal belleğinde var olan bu kodlar nedeniyle, bu renklerin ve deyimlerin kullanılageldiği her grup ya da birey çıkarımı yüceltmek viş e toplumda bir yer edinmek amacıyla Dijital-Reel Psiko-Semiyotik Dil Kullanımları

tasarımlarının içeriğinde kasıtlı olarak yer almaları, hiçbir şeyden habersiz olan gen halk kitlelerinin aleyhinedir. Duyduğu sempatinin kaynağını bilemeden istem dışı, psikolojisini etkileyen, duygu durum biçimlerinden birini veya birkaçını etkin bir şekilde kavrayan vurucu dilsel ve görsel göstergelerin amaçlarına uygun tasarlanan Dijital-Reel Psiko-semiyotik Dil Kullanımlarından dolayı, herhangi bir siyasi partiye, gruba, topluluğa, sempati duyup kapılabilirler.

İçinde bulunduğumuz dijital çağ gereği, siyasi partiler başta olmak üzere, toplumsal bellekten toplanan, toplumun genel çoğunluğunu ele geçirecek vurucu dil kullanımlarının kaynağı sorgulanması gerekmektedir. Halkla İlişkiler, Reklamcılar için hayati olan bu vurucu dil kullanımları legal görünümlü dijital alanlar olabileceği gibi, yaşamları kökten etkileyebilecek, dijital mahrem alan talanından elde edilebilirler.

Halkın bu sloganların kaynaklarını bilme hakkı vardır. Örneğin: AKP partisinin çok sık kullandığı ve genel çoğunluk üzerinde oldukça etkili sloganların: Beraber yürüdük biz bu yollarda, Yola Devam, Ezan dinmez, bayrak inmez, Eyyyyyy diye hitap etmek vb. gibi. Bu durum tüm muhalif ve diğer siyasi partiler için de geçerlidir çünkü genel çoğunluk üzerinde manipülatif etkisi vurucu olan sloganların önemi büyüktür ve bu manipülatif etkinin sorumluluğu alınmalıdır. Bu vurucu etkisi büyük olan slogan ve söylemlerin tespit edilme yolları da gelecekte genel çoğunluğun yararına düzenlenmelidir çünkü 'Dijital Köleliğin olduğu bir çağda yaşıyoruz ve bu sloganların bu tür kaynaklardan elde edilmesi Dijital Kölelik sisteminin sürmesine neden olacaktır ve bu durum legal görünümlü ve illegal dijital veri elde etme yöntemlerinden çok ileri düzeyde bir insanlık suçudur.

## SONUÇ

Kötücül, çıkar odaklı, kasıtlı dilsel, görsel, işitsel, dokunsal, tatsal, ezoterik, göstergelerin Dijital-Reel Psiko-Semiyotik Dil Kullanımı olarak tasarlanmaları, genel çoğunluğu bu göstergeler üzerinden istendik doğrultuda manipüle etme hesapları evrensel insan haklarına aykırıdır çünkü bu bilgi genel çoğunluğa verilmemiş, içselleştirilmeleri sağlanmamıştır. Tüm bunlar yapılmadan sahip olunan bilgiyi ki, tüm bu alanda ne yapıldığının bilimsel çözümlenmelerini Psiko-Semiyotik İletişim başlığı altında toplanan; Dijital-Reel Psiko-Semiyotik Dil Kullanımları ve Ayrıştırıcıları üzerinden incelemek (Algül, 2020-2023), mümkündür; Dijital Reel-Psiko-Semiyotik Dil Kullanımları çemberine almak, ve onları Psiko-Semiyotik İletişime boğmak; genel çoğunluğu yönetilebilir bir seviyede kasıtlı olarak tutmak, onların hiç bilemediği unsurları devreye sokup, yanlarına çekmek bir tür aldatmacaya dahil edilmelidir ve insanlık suçu olarak görülmelidir. Bu Halkla İlişkilerin, Reklamcılarının, artık günümüz gazetecilerinin hileli ürün satış politikalarından hiç de farklı değildir ve genel çoğunluktan yana olan bir tutuma dönüştürülmesi gerekmektedir. Defolu malı izleyicinin görebilmesini, daha başlangıçta engelleyen toplumsal kültürel kodları avlamak üzerine kurulu Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıyla sürekli yakalamayı amaç edinmek, kasıtlı aldatmaya dahil edilecektir. Birey ya da topluluk farkında olmadan yönelir, tüm bu alan bilgisinin kötücül kullanımına deyimler, atasözleri gibi, bilinçdışı (Mlodinov, 2013) yaşantılarla kazanılan toplumsal belleğe giren kötücül kullanılmaya elverişli kaynak havzası girer.

Bu kültürel kodlardan belirleyici, baskın olanların cemaat kazanma, birlikte hareket etme üstünlüklerinden yola çıkarak dinsel de olabileceği çıkarımını da yapabiliriz. Tek tek bakıldığından dinsel, etnik köken, din, dil, toplumsal belleğin söz hafızasını, kültürel çeşitlilikle oluştururken aynı zamanda aynı unsurlar toplumsal belleği baskın veya çekinik olarak biçimlendirebilir. Bir de tüm bunların üzerinde devletlerin yürüttüğü politikalar, toplum adına, toplum için almış oldukları kararlar toplumsal belleğin birer parçası olurlar ve tüm bunların hepsi artık tanımladığım şekliyle Dijital-Reel Psiko-Semiyotik Dil Kullanımları havuzunu oluştururlar. Ayrıca toplumları birbirinden farklı kılan kültürün dijital çağla beraber giderek benzeşmesi, Psiko-Semiyotik İletişim araçlarının da giderek aynılaşması sonucunu doğurabilmektedir. İçinde doğduğum toplumda yazılı görsel basın araçlarının teknolojik temeli nereden geliyorsa, o temele uygun tutum ve tavırları yaşam sürecimde deneyimlemiş, hatta bu unsurlara, halkı aşağıda tutacak seviyede sürekli maruz kaldığım yönlerine yaptığım eleştiriler ve önerilerin yer aldığı gündelik yaşam unsurlarını yazarak atabildiğim, bilgisayarına taşıdığım günlük tutma alışkanlığım 'Dijital Kölelik' vakasına dönüştü (Algül, 2020-2023). Sözün nüvesi içinde doğduğum toplum adeta bu anlamda küçük bir ABD idi. Kopyalama geleneği bu alanı ellerinde tutanların köklerinde var gibiydi ve dijital teknolojiyle gelen dijital mahrem alanları talana varıracak kadar da teknolojik olarak donanımlı olabilirler. Bir toplumu Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıyla baskılamak yazılı-görsel-dijital kitle iletişim araçlarının çokluğuna endekslidir. İlegal ya da legal görünümlü mahrem dijital alanlardan elde edilen dil kullanımları belli toplulukları derinden etkileyebilir ki, dijital veri kaynaklarının *en korkuncu 'Dijital Kölelik'* üzerinden elde edilen verilerdir. Bir başka söylemle dijital çağla beraber bir de Psiko-Semiyotik İletişimde etkin olan dil kullanımlarının elde edildiği kaynakların incelenmesi söz konusu olacaktır. Kaç tesadüf sonrası artık tesadüf sayılmamalıdır gibi başlıklar hukukun gündem konusu edilebileceği gibi; *'Dijital Köle'* olarak seçilen ve kullanılan kaynaklar da ortaya çıkacaktır. 7/24 dijital gözlem altında tutulup sömürülen, fiziksel çevreleri bu amaçla örülen dijital alanların sahipleri ; yerinde bir söylemle *'Dijital Köle/ler'* özgürlüklerine kavuşacaklardır. Dijital-Reel Psiko-Semiyotik Dil Kullanımlarının etkin oluşlarına, bu kullanımlarının elde edilmiş biçimleri de dahil olmak zorundadır. Bu bağlamda 'Dijital Kölelik' ten elde edilen

Dijital-Reel Psiko-Semiyotik Dil Kullanımları legal görünümlü ve illegal mahrem dijital alanların talanına dayalı elde edilşlerden çok ayrı, ileri nitelikli, ileri bir donanımla sağlanan ‘dijital suç’ olarak olarak ele alınacaktır.

## ÖZET

İçinde bulunduğumuz döneme özgü bir olgu olan küreselleşme; bireyler, örgütler ve toplumlar nezdinde karşılıklı bağımlılık ilişkilerinin yaygınlaşması, derinleşmesi ve hızlanmasıdır. Değişim ve dönüşüm öngören bir olgu olarak küreselleşme; ekonomik, siyasal ve kültürel açıdan yeni bir dünyanın doğuşuna vesile olmaktadır. Kâr amacı gütsün ya da gütmesin tüm örgütler; küreselleşmenin etkisiyle şekillenmekte, değişmekte ve dönüşmektedir. Küreselleşme, yükseköğretim sistemini de derinden etkilemekte ve yükseköğretim kurumlarını değişime zorlamaktadır. Yükseköğretim kurumlarının küresel rekabet gereğince örgütlenmeleri ve yönetilmeleri, uluslararasılaşma temelli çalışmaları yürütmeleri, kalite güvencesi sistemini temel alan bir yaklaşım geliştirerek tüm hizmet süreçlerine uyarlamaları bu bağlamda önem kazanmaktadır. Ancak küreselleşme, getiriler kadar riskler de içeren bir süreçtir. Küreselleşme sürecinde yükseköğretim kurumlarını bekleyen en önemli tehlike, izomorfizmdir. İzomorfizm, en yalın ifadeyle eş biçimlilik demektir. Bir kurumsallaşma yaklaşımı olarak izomorfizm, aynı çevre içindeki örgütlerin çevrenin baskısıyla benzer bir yapı ve işleyişe sahip olmaları olarak tanımlanabilmektedir. Bu çalışmada, küreselleşme ve yükseköğretimde izomorfizm kavramlarına odaklanılmaktadır. Küreselleşme sürecinin yükseköğretim sistemine ve yükseköğretim kurumlarına etkilerini izomorfizm kavramı aracılığıyla analiz etmeyi amaçlayan çalışma ile yükseköğretimin yönetimini mercek altına almak ve yükseköğretim çalışmaları bağlamında alanyazına katkı sunmak hedeflenmektedir. Nitel yöntemle tasarlanan çalışmada, yükseköğretimde izomorfizm ile ilgili akademik çalışmalar betimsel analiz yöntemi ile incelenmiştir. Araştırma verilerinin analizinde MAXQDA veri analiz programı kullanılmıştır. Çalışmada yükseköğretimde izomorfizmin küreselleşmeye koşut olarak yaşanan ve sık rastlanan bir olgu olduğu görülmüş olup bulguların alanyazın ile örtüştüğü düşünülmektedir.

**Anahtar Kelimeler:** Küreselleşme, Yükseköğretim, Üniversite, İzomorfizm, Yönetim, Yükseköğretim Çalışmaları.

## GİRİŞ

İçinde bulunduğumuz dönemi anlamak ve anlamlandırmak için kullanılan bir terminoloji olan küreselleşme, tüm dünya kültürlerini kapsayan uluslararası bir bütünleşme sürecidir. Çok boyutlu niteliğiyle küreselleşme; bireyleri, örgütleri ve devletleri değişime ve dönüşüme yöneltmek için yeni bir dünyanın doğuşuna aracılık etmektedir.

Küreselleşme yükseköğretim sisteminde ve anlayışında değişim ve dönüşüm yaratan en önemli güçlerden biridir. Küreselleşme süreci ile yükseköğretim kurumları; devletin hakimiyetinde olan ve ulusal sınırlar çerçevesinde faaliyet gösteren klasik yapıdan çoklu aktörlerin etkinliğiyle şekillenen, kalite ve akreditasyon süreçlerinin belirleyici bir rol oynadığı, stratejik bir şekilde yönetilmek gereksinimi içinde olan küresel nitelik arz eden yeni bir anlayışa evrilmektedirler (Bakioğlu, 2015; Celep & Tülübaş, 2015; Rosovsky, 2017; Arslan, 2019; Bastedo, 2019; Delbanco, 2020; Arslan, 2022; Vardar, 2022).

Bu çalışma kapsamında küreselleşme süreci ve yükseköğretimde izomorfizm konu edilmektedir. Betimsel bir analiz içeren çalışmada izomorfizm kurumsal boyutta ele alınmakta ve küresel değişim ile dönüşümün yükseköğretimin sistemine yönelik bir etkisi olarak değerlendirilmektedir.

## Kavramsal Çerçeve

Küreselleşme, en yalın ifadeyle tüm dünyanın tek bir mekân, diğer bir deyişle tek bir kültür haline gelmesidir. Küreselleşme; bireyleri, örgütleri ve toplumları var olan değerlerden kopuşa zorlamakta, değişim ve dönüşümün esas olduğu yeni bir dünyanın kurulmasına aracılık etmektedir. Bu anlamıyla küreselleşme; ekonomik, siyasal ve kültürel olarak homojenleşmeyi beraberinde getirmektedir. Küreselleşme yükseköğretim kurumlarını da yoğun olarak etkilemekte ve çeşitli baskıların yönlendirmesiyle izomorfizme itmektedir (Torres & Schugurensky, 2002;

Schofer & Meyer, 2005; Hemsley-Brown & Oplatka, 2006; Seyfried vd., 2019; Stensaker vd., 2019; Cardona vd., 2020).

İzomorfizm, kelime anlamı olarak eş biçimlilik, eş biçimcilik, eş şekillilik demektir. Daha açıklayıcı bir ifadeyle izomorfizm, yapı benzerliği olarak karşılık bulmaktadır. TDK Türkçe Sözlüğü'ne (2023) göre izomorfizm kelimesi, Türkçe'ye Fransızca 'isomorphisme' kelimesinden girmiş olup kimya ve matematik bilimlerine ait bir terimdir. Kelimenin etimolojik kökeni merceğe altına alındığında Yunanca eşit anlamına gelen 'isos' ve biçim anlamına gelen 'morphé' sözcüklerinin bileşiminden oluştuğu görülmektedir (Harper, 2023).

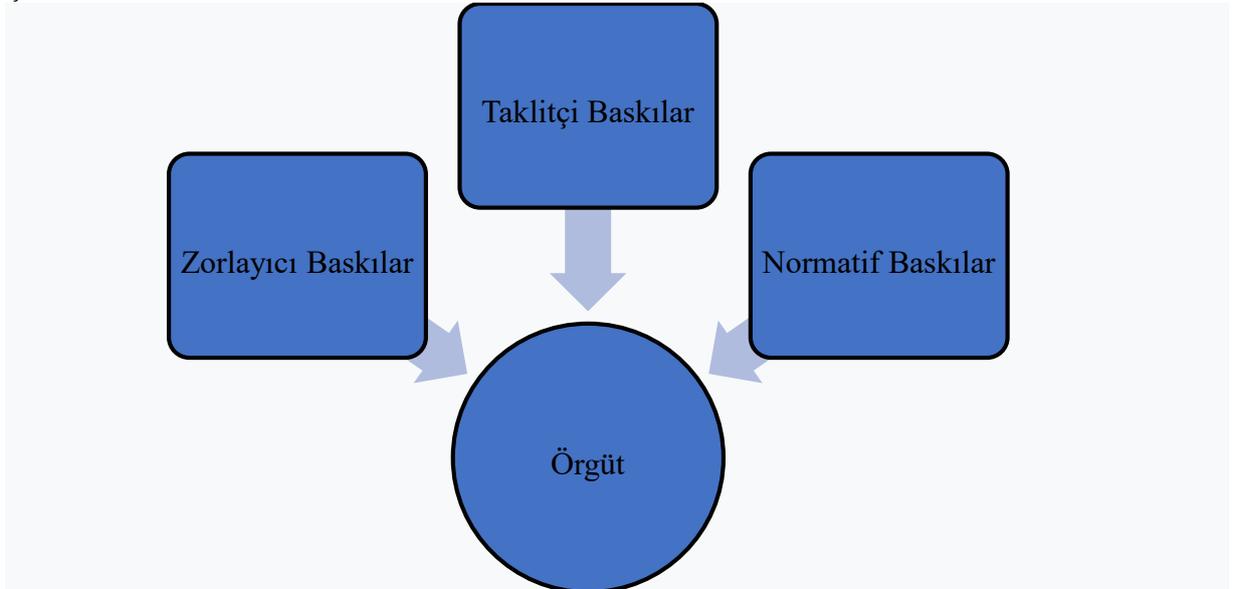

Hançerlioğlu (1994: 85), izomorfizmin, özellikle matematiksel mantıkta ve sibernetikte eşit veya benzer nesnelere arasındaki ilişkiyi dile getirdiğine dikkat çekmektedir. Sosyal bilimlerde de kullanılan bir kavram olan izomorfizm, işletme yönetiminde kurumsallaşma ve stratejik yönetim ile ilişkilendirilmektedir. Bu bağlamda izomorfizmin özellikle 'kurumsallık kuramları' temelinde ele alındığını ifade etmek mümkündür. Biçimsel örgüt yapılarını sosyal süreçlerle analiz etmeyi amaçlayan Kurumsallık Kuramları, çevrenin ve sosyal beklentilerin örgüt üzerindeki etkilerine odaklanmakta, örgüt ve çevre arasındaki etkileşimi merceğe altına almayı hedeflemektedir.

Sosyal bilimlere dair bir kavram olarak izomorfizm, alanyazında ilk olarak Hawley (1968) tarafından tanımlanmıştır. Ona göre izomorfizm; bir topluluk -population- içinde yer alan her bir birimin, diğer birimlerin de karşı karşıya olduğu bir dizi çevresel koşul nedeniyle birbirleriyle benzeşmesidir. Örgüt-çevre etkileşiminden hareket eden Meyer ve Rowan (1977) izomorfizm kavramını, kurumlara uyarlamıştır. Bu bağlamda modern örgütler; karmaşıklaşan ilişkiler, büyüyen pazarlar, artan rekabet, ilerleyen teknolojik koşullar gibi unsurların şekillendirdiği bir iş ortamında daha rasyonel, eşgüdümlü, kontrol gereksinimli ve performans odaklı hareket etmeye güdümlenmektedir. Ancak bu durum örgütleri, performanslarını artırma amacıyla kendilerine dair farklılık geliştirmeye değil, toplumun beklentilerine yönelik bir geçerlilik arayışına ve homojenleşmeye sevk etmektedir.

Çevrenin, diğer bir deyişle toplumun etkisi, kurumsallaşmış bir davranış ve çalışma biçimini doğurmaktadır. Kurumsallaşarak örgüt yapısına yerleşen davranış ve çalışma biçimleri ise; kontrol, koordinasyon ve performans odaklı formal yapılardan daha etkili olabilmektedir. Meyer ve Rowan (1977: 344), kurumsallaşmış unsurların uygulanmasını 'mit' olarak adlandırmaktadırlar. Bu bağlamda örgütler, çevrenin etkisiyle sorgulamaksızın kabul ettikleri uygulamalar nedeniyle birbirine benzeyen davranış, tutum ve iş yapma biçimleri geliştirerek birbirlerine benzemektedirler.

İzomorfizm kavramının alanyazında popülerleşmesini sağlayan DiMaggio ve Powell (1983), kurumsallaşmanın temel mekanizmasının eş yapılılık olduğuna dikkat çekmektedir. Eş yapılılık, kurumsal uygulamaların tekrarlanması süreci olarak tanımlanabilmektedir. Onlara göre kurumsal eş yapılılığa yöneltilen baskılar; Şekil. 1'de de görüldüğü üzere 'zorlayıcı', 'taklitçi' ve 'kuralcı' baskılar olarak adlandırılabilir.

### Şekil. 1. Kurumsal İzomorfizme Yönelten Baskılar

**Kaynak:** DiMaggio & Powell, 1983: 150-154'den yararlanılarak araştırmacılar tarafından geliştirilmiştir.

Örgütleri eş yapılılığa yönelten tüm bu baskıları, izomorfizm türleri olarak adlandırmak da mümkündür. Bu bağlamda Tablo. 1'de sunulduğu üzere 'zorlayıcı izomorfizm', 'taklitçi izomorfizm' ve 'normatif izomorfizm' olmak üzere üç tür izomorfizm bulunmaktadır. Örgütlerin meşruiyet arayışlarına yanıt olan söz konusu

izomorfizm türlerini ve kapsamlarını şu şekilde özetlemek mümkündür (DiMaggio & Powell, 1983: 150-154; Thornton, 2011; Boxenbaum & Jonsson, 2017: 81):

**Tablo. 1. İzomorfizm Türleri**

|                             |   |
|-----------------------------|---|
| <b>Zorlayıcı İzomorfizm</b> | Örgütün etkileşim içinde olduğu ve olmak zorunda olduğu örgütlerin, çevrenin ve toplumun baskısı nedeniyle yaşanan izomorfizmdir.             |
| <b>Taklitçi İzomorfizm</b>  | Belirsizlik nedeniyle gerçekleşen ve belirsizlikten kaçınma amacıyla benzeme -öykünme- esasına göre işleyen izomorfizmdir.                    |
| <b>Normatif İzomorfizm</b>  | Topluma ve kültüre yerleşmiş uygulamaların, geleneklerin ve teamüllerin uygulanması ile yaşanan, kural koyucu nitelik arz eden izomorfizmdir. |

**Kaynak:** DiMaggio & Powell, 1983; Thornton, 2011; Boxenbaum & Jonsson, 2017'den yararlanılarak araştırmacılar tarafından geliştirilmiştir.

**Zorlayıcı İzomorfizm:** *Zorlayıcı izomorfizm -coercive isomorphism-*, bağımlı olunan örgütler tarafından örgüte uygulanan doğrudan ve dolaylı baskılardan ya da örgütün faaliyet gösterdiği çevrenin -toplumun- beklentilerden doğan izomorfizm türüdür. Örgütü eyleme yöneltten zorlayıcı baskılar, kamu yaşamını ve düzenini sağlayan devlet kurumları ile benzer amaçlara sahip özerk bağımsız kuruluşlardan kaynaklanmaktadır. Devletin müdahale ve kısıtlamaları, hukuki sınırlar, yerel yönetim uygulamaları bu kapsamda örnek verilebilmektedir.

**Taklitçi İzomorfizm:** *Taklitçi izomorfizm -mimetic isomorphism-*, belirsizliğin neden olduğu ve belirli bir örneğe -örgüte- öykünmeyle sonuçlanan izomorfizm türüdür. Örgütlerin belirli bir baskı olmaksızın çevrelerindeki belirsizlikten kaçınmak ve istikrar sağlamak amacıyla rol model aldıkları bir örgüte benzemeye çalışmaları, yapı ve işleyişlerini söz konusu örgüte göre düzenlenmeleri anlamına gelmektedir.

**Normatif İzomorfizm:** *Normatif izomorfizm -normative isomorphism-*, profesyonelleşme sürecine koşut olarak gerçekleşen izomorfizm türüdür. Örgütlerin yapı ve işleyişlerinde beliren sorunları profesyonel destek alma suretiyle çözmeye çalışmaları şeklinde gelişmektedir. Gönüllülük, diğer bir deyişle ön kabul esasına göre şekillenen normatif izomorfizm; örgütün ahlaken doğru olduğu düşüncesi ile eğitim ve meslek kuruluşlarının norm ve uygulamalarını benimsemeleri anlamına gelmektedir.

## YÖNTEM

Araştırma, nitel araştırma geleneğine göre gerçekleştirilmiştir. Nitel araştırma; tanımlama, çözümleme, yorumlama ve anlamla ilgili terimlere ulaşmaya çalışan teknikleri kapsayan süreçler bütünüdür (Merriam, 2018: 13). Bu anlamıyla nitel araştırma, çok farklı uğraşları barındırmaktadır; bunların çoğu bir bakıma, 'objektif gerçekliklerin 'objektif' incelenmeleriyle ilgilidir (Silverman, 2021: 26).

Araştırmanın veri toplama süreci, doküman analizi ile gerçekleştirilmiştir. Doküman analizi; çeşitli dokümanların toplanması, gözden geçirilmesi, sorgulanması ve analizi olarak tanımlanabilen bilimsel bir araştırma yöntemidir (Sak vd., 2021: 227). Araştırma kapsamında alanyazın taraması ve ikincil veri analiz tekniği kullanılmıştır. Bu bağlamda Kasım 2023 tarihinde akademik veri tabanları 'yükseköğretimde izomorfizm' anahtar kelimesi ile taranarak yükseköğretimde izomorfizmi konu alan ulusal nitelikli makaleler, kitaplar ve kitap bölümleri derlenmiş, alanyazından hareketle belirlenen kategoriler uyarınca analiz edilmiştir.

Araştırma, betimsel analiz yöntemi ile gerçekleştirilmiştir. *Betimsel analiz -descriptive analysis-*, araştırma kapsamında elde edilen verilerin daha önceden belirlenen temalara göre özetlenip yorumlandığı bir analiz tekniğidir (Yıldırım & Şimşek, 2013: 256). Araştırma verilerinin analizinde, MAXQDA nitel veri analiz programı kullanılmıştır.

## BULGULAR

Gerçekleştirilen araştırma uyarınca alanyazında yükseköğretim kurumlarında izomorfizm realitesine dikkat çeken on dört ulusal çalışmanın bulunduğu görülmüştür. Söz konusu çalışmaların genel değerlendirmesinde kavramsal çerçeveye uygun olduklarını ifade etmek mümkündür. Bu bağlamda incelenen çalışmalar; küreselleşmenin yükseköğretim sistemini değiştirici ve dönüştürücü etkisi, yükseköğretim kurumlarında izomorfizm tanımı, türleri ve çevresel baskılar neticesinde ortaya çıkan bir olgu olması noktasında alanyazın verileri ile koşturucu içindedir.

Araştırma kapsamında tespit edilen verilerden hareketle Sarvan & Yapıcı Akra (2011), Karataş & Acer (2017), Emil & Akşab (2018), Bakioğlu & Keser (2019), Fındıklı (2019), Özçiçek & Karaca (2019), Yetişen & Ünlü (2019), Gürel & Çetin (2021), Kuzu (2021), Öztürk (2021), Taştan & Yılmaz (2021), Yaşbay Koyal (2021), Bozoğlu & Göktürk (2022), Bucak Altın (2022) gerçekleştirdikleri çalışmalarda Türk yükseköğretim kurumlarında izomorfizmden söz etmişlerdir.

Araştırma bulgularının genel değerlendirmesinde yükseköğretimde izomorfizm ile ilgili çalışmaların 2010 sonrasında gündeme gelmeye başladığı görülmektedir. Bu durum, yükseköğretim sisteminde uygulanan neoliberal politikaların etkilerinin gözlenebilir sonuçları ile ilişkilendirilebilmektedir.

Araştırma bulgularının genel değerlendirmesinde dikkat çeken bir diğer husus, alanyazında bahsi geçen üç izomorfizm türünü de konu alan akademik çalışmaların tespit edilmiş olmasıdır. Bu bağlamda Tablo. 2’de sunulduğu üzere Türk yüksek kurumlarında izomorfizmi konu alan akademik çalışmalar, Türk yükseköğretim sisteminde tüm izomorfizm türlerinin yaşandığını ve uygulandığını ortaya koymaktadır.

**Tablo. 2. Türk Yükseköğretim Kurumlarında İzomorfizmi Konu Alan Akademik Çalışmaların İzomorfizm Türlerine Göre Dağılımı**

|                             |  |

**Kaynak:** Araştırma verilerinden hareketle araştırmacılar tarafından oluşturulmuştur.

Araştırma bulguları uyarınca ulusal alanyazında yükseköğretimde zorlayıcı izomorfizm ile ilgili çalışmaların yoğunlukta olduğu görülmüştür. Bakioğlu & Keser (2019), Fındıklı (2019), Yetişen & Ünlü (2019), Gürel & Çetin (2021), Kuzu (2021), Yaşbay & Kobal (2021), Bozoğlu & Göktürk (2022), Bucak Altın (2022) gerçekleştirdikleri çalışmalarda yükseköğretim kurumlarında zorlayıcı izomorfizminin varlığına dikkat çekmişlerdir.

Bu bağlamda Sarvan ve Yapıcı Akar (2011), Türk yükseköğretim sisteminde yeni yöneticiliği Akdeniz Üniversitesi örneğinde analiz eden çalışmalarında yükseköğretim kurumlarında stratejik planlamanın izomorfist bir süreç olarak işlediği ve geleneksel meslektaşlığa dayalı kültürü değiştirmeye yetmediği sonucuna ulaşmışlardır.

Bakioğlu ve Keser (2019) küreselleşmenin yükseköğretime paradoksal etkilerini analiz ederek yükseköğretim kurumlarında izomorfizmin varlığını tespit etmişlerdir. Bu bağlamda yükseköğretim kurumlarında izomorfizmin; coğrafi farklılıklar, nitelik farklılıkları ve kuruluş yılı farklılıkları nezdinde ortaya çıktığı saptanmıştır.

Fındıklı (2019), üniversitelerin temel olarak *gevşek bağlaşımlı -loosely coupled-* örgüt olarak resmedildiği yaklaşımların son yıllarda yerini onları *sıkı bağlaşımlı -tightly coupled-* örgüt olarak tarif eden modellere bırakmaya başladığına dikkat çekerek “günümüzde üniversitelerin karşılaştıkları temel meydan okumalardan birinin, iç içe geçmiş ve birbiriyle çoğu zaman çatışan düsturlara sahip çoklu kurumsal mantıklar ve etkiler tarafından kuşatılmış bir organizasyonel alanda faaliyet gösterirken, kendi biricikliğini, kimliğini ve farklılığını inşa etmeye ve korumaya çalışmak olduğunu ifade etmiştir.

Yetişen ve Ünlü (2019) yükseköğretimde kaliteyi ele aldıkları ve 2007 yılında kurulan devlet üniversitelerini Kurum İç Değerlendirme Raporları üzerinden karşılaştırmalı olarak inceledikleri çalışmalarında söz konusu üniversitelerin eğitim-öğretim ölçütü kapsamında büyük oranda benzeştiklerini ortaya koymuşlardır.

Gürel ve Çetin (2021), İzmir ilinde bulunan yükseköğretim kurumlarının misyon ve vizyon tanımlarına yönelik olarak yaptıkları araştırma kapsamında söz konusu kurumların misyon ve vizyon ifadelerinde büyük benzerlikler tespit etmişlerdir. Bucak Altın (2022), sivil havacılık meslek yükseköğretilerinin misyon ifadelerini temel alan çalışmalarında, benzer bulgulara ulaşmıştır.

Kuzu (2021), yükseköğretimde pazarlaştırmayı temel alan çalışması kapsamında yükseköğretim kurumlarının kapitalist sistemin içinde yaşayan kurumlar olmanın yanı sıra sistemi yaşatan kurumlar olmaya dönüştüklerini ifade etmekte ve piyasalaşma süreci ile izomorfizm arasındaki ilişkiye dikkat çekmektedir.

Yaşbay ve Kobal (2021), Hakkâri Üniversitesi örneğinden hareket ederek kurumsal kurum varsayımlarını sorguladığı çalışmasında devlet tarafından belirlenen yasal çerçevenin izomorfizme neden olduğunu ortaya koymuştur.

Bozoğlu ve Göktürk (2022), yükseköğretimde neoliberal değişimi konu alan çalışmalarında makro düzeyde kurumsal çevrenin eşbiçimli etkileri kabul ettiğine dikkat çekerek mikrokurumsalcılık perspektifi yükseköğretim siyasalarının tasarlanmasına ve uygulanmasına yönelik teorik arkaplan olarak önermektedirler.

Araştırma bulgularının değerlendirilmesinde ulusal alanyazında yükseköğretim kurumlarında taklitçi izomorfizm ile ilgili üç çalışmanın bulunduğu görülmüştür. Karataş & Acer (2017), Emil & Akşab (2018) ile Öztürk (2021), çalışmalarında yükseköğretim kurumlarında taklitçi izomorfizmin varlığına dikkat çekmişlerdir.

Karataş ve Acer (2017), Türkiye’de yüksek öğretimin genişlemesini konu alan çalışmalarında eşitlik ve homojenleşme konusunda özellikle yeni açılan üniversitelerin giderek eş biçimli ve benzer özellikler göstererek Türk yükseköğretim sisteminin aynışmasına yol açtığını tespit etmişlerdir.

Emil ve Akşab (2018), Türk yükseköğretiminde araştırma üniversitesi kavramını karşılaştırmalı bir analizle inceledikleri çalışmalarında; geliştirmekte olan ülke üniversitelerinin, özellikle ABD üniversiteleri olmak üzere gelişmiş ülkelerin üniversite modellerini kopyaladıklarına dikkat çekmekte ve bu izomorfizmin, 1999 yılında Bologna Süreci’nin ve 2000’deki Lizbon stratejisinin ortaya çıkmasıyla Avrupa ülkelerinde dahi gerçekleştiğini ve bir paradoksa yol açtığını ifade etmektedirler.

Bu bağlamda Öztürk (2021), üniversitelerde kurumsallaşma mekanizmalarını Türk üniversitelerinde durum çalışması ile mercek altına aldığı çalışmasında, odak yükseköğretim kurumu ile yavru yükseköğretim kurumlarını karşılaştırarak izomorfizme neden olan çevresel baskıları saptamıştır.

Araştırma bulguları uyarınca ulusal alanyazında yükseköğretim kurumlarında normatif izomorfizm ile ilgili iki çalışmanın bulunduğu görülmüştür. Özçiçek & Karaca (2019) ile Taştan & Yılmaz (2021), söz konusu çalışmaların sahipleridir.

Özçiçek ve Karaca (2019) yükseköğretimde kaliteyi temel alan çalışmaları kapsamında yükseköğretim kurumlarının izomorfizm sergilediklerini ifade etmekte ve bu durumun akreditasyon için kolaylaştırıcı bir işlev olarak değerlendirilebileceğine dikkat çekmektedirler.

Taştan ve Yılmaz (2021) ise; dünya çapında yaşanan gelişmelerden ve kalite yönetiminden hareket ederek Türk yükseköğretim sistemini yeni kuramsal kuram paradigmaları ile analiz ettikleri çalışmalarında, Türk yükseköğretim sisteminde kalite yönetiminin normatif baskı mekanizmalarının etkileriyle normatif/törenselleşmiş olarak benimsendiği sonucuna ulaşmışlardır.

## SONUÇ

Küreselleşme sürecinde örgütler, birçok tehlike gibi izomorfizm tehlikesi ile de karşı karşıyadır. Kalite ve standartlaşma çalışmalarına koşul olarak şekillenen bu süreç, rekabet yoğun küresel dünyada farklılaşarak var olmaya çalışan örgütler için dikkat çekici bir güçlük ve risk anlamına gelmektedir. Benzer durum, yükseköğretim kurumları için de geçerlidir.

Bu çalışmanın amacı, yükseköğretimde izomorfizm olgusunu araştırmaktır. Nitel araştırma tasarımıyla kurgulanan araştırma, betimsel analiz yöntemiyle gerçekleştirilmiştir. Araştırma verileri doküman analizi yöntemiyle toplanmış ve ikincil veri analizi yapılmıştır. Araştırma verilerinin analizinde, MAXQDA nitel veri analiz programından yararlanılmıştır. Araştırma kapsamında akademik veri tabanları taranarak yükseköğretimde izomorfizm ile ilgili ulusal çalışmalar tespit edilmiştir. Akademik veritabanlarından elde edilen veriler, alanyazından hareketle oluşturulan kategoriler uyarınca analiz edilmiş ve yorumlanmıştır. Araştırmanın kısıtı, örneklem dışı bırakılan tezler ve erişilemeyen akademik çalışmalardır.

Araştırma bulgularının genel değerlendirmesinde ulusal alanyazında yükseköğretimde izomorfizmi temel alan on dört çalışmanın bulunduğu, bu çalışmaların 2010’lar ile tarihlendiği görülmüştür. Söz konusu çalışmaların kavramsal çerçevesi, alanyazın verileri ile uyumludur. Bu bağlamda küreselleşmenin yükseköğretim sistemini değiştirici ve dönüştürücü etkisi, yükseköğretim kurumlarında izomorfizm tanımı, türleri ve çevresel baskılar neticesinde ortaya çıkan bir olgu olması noktasında uluslararası ve ulusal alanyazın koşulluk içindedir.

Araştırma bulgularına ilişkin bir diğer önemli bulgu, alanyazında bahsi geçen üç izomorfizm türü olan zorlayıcı izomorfizm, taklitçi izomorfizm ve normatif izomorfizmi konu alan akademik çalışmaların gerçekleştirilmiş olmasıdır. Türk yükseköğretim kurumlarında izomorfizmi konu alan akademik çalışmalar, yoğunlukla zorlayıcı izomorfizm ile ilgilidir. Bu paralelde taklitçi izomorfizm ve normatif izomorfizmin de çalışıldığı görülmüştür. Türk yükseköğretim sisteminin merkezîyetçi yapılanması ve mevzuat temelli işleyişinin, araştırma bulguları ile örtüştüğü düşünülmektedir.

Araştırma verileri uyarınca dikkat çeken bir diğer önemli bulgu, yükseköğretimde izomorfizmin küreselleşme sürecinin yükseköğretim sistemine yönelik etkileri ile şekillenmesi ve kalite ile akreditasyon çalışmalarıyla olan etkileşimidir. Bu etkileşim, kuram düzleminde konu edilmekte ve uygulama düzleminde de bir realite olarak yaşanmaktadır.

Çalışma ve araştırma bulgularından hareketle gelecek araştırmalara yönelik olarak yükseköğretim kurumlarında izomorfizmin nitel ve nicel tasarımlı araştırmalar aracılığıyla incelenmesi, yükseköğretimde izomorfizmin diğer toplumlardaki yer ve öneminin Türk yükseköğretileri ile karşılaştırmalı olarak değerlendirilmesi önerilebilmektedir.

# LEADERSHIP SKILLS OF NURSES IN THE FIELD OF HEALTH: THE EXAMPLE OF TRNC HOSPITALS

Gülşen FIRAT

Yrd. Doç. Dr. Azmiye YINAL  
azmiye.yinal@akun.edu.tr

## ABSTRACT

The purpose of this study is to examine the leadership skills of nurses in the health field. The population of the study consisted of nurses working in the Turkish Republic of Northern Cyprus (TRNC) Nicosia Burhan Nalbantoğlu State Hospital, Famagusta State Hospital, Near East University Hospital and Kyrenia Dr. White Flower Hospital; the samples consisted of 280 nurses. The data were collected through Google Forms using a personal information form and the Leadership Orientation Scale. The Leadership Orientation Scale was developed by Bolman and Deal (1990), and its Turkish adaptation's validity and reliability was conducted by Dereli (2003). The results of the analysis show that the leadership orientations of the participant nurses did not deviate from the overall mean of the scale in general. However, when the sub-dimensions of the scale are examined, it is observed that higher scores are obtained in the symbolic leadership dimension, but lower scores are obtained in the structural leadership dimension. According to the gender variable, it was observed that female nurses scored higher than male nurses in structural leadership, symbolic leadership and the total scale, but male nurses scored higher than female nurses in the people resource leadership dimension. These results show that there are significant differences between leadership dimensions and gender. According to the age variable, it was determined that different age groups had different scores in structural, human resource, political and symbolic leadership dimensions. For example, while participants between the ages of 22-30 scored higher in structural leadership, those between the ages of 41-50 scored higher in human resource and political leadership dimensions. According to the marital status variable, it was observed that single nurses scored higher than married nurses in human resource and political leadership dimensions. This indicates that single nurses have stronger leadership characteristics or tendencies in these two leadership dimensions. According to the professional seniority variable, it was found that nurses in different professional seniority ranges received different scores in different leadership dimensions. For example, nurses in the 1-5 year range scored higher in structural leadership, while those in the 6-10 years range scored higher in human resource leadership.

**Keywords:** Leader, Leadership, Nurse.

## 1. INTRODUCTION

### 1.1. Problem Status

A nurse is a professional healthcare worker who undertakes patient care and treatment in healthcare services. Nurses can work in many healthcare institutions such as hospitals, clinics, health centers, and home health care services. The primary duties of nurses include meeting the medical needs of patients, administering medications, performing medical procedures, maintaining patient records, and providing health information and support to patients and their families. Nurses can also work in areas such as providing health education, managing health programs, and participating in health research. Nursing is a versatile profession that provides a wide range of services, including patient care, coordination of health services, education of patients and their families, improvement of health services and protection of health. Nurses are an important part of medical teams and play a critical role in the healthy recovery and treatment of patients (Arabacı, 2012).

Nurses' perception of leadership is important in the field of healthcare. A leader is a person who is responsible for directing a group or community towards a specific goal or objectives. Leadership refers to a set of skills and responsibilities that include directing, guiding, motivation, decision-making and influencing abilities. Leaders can be found in different sectors and fields (Salamah, Alzubi ve Yinal, 2023). By sharing their vision, leaders guide followers or group members in achieving goals. A good leader can motivate people, ensure cooperation, and solve problems with determination. Leadership includes the ability to use various leadership styles and methods to realize the leader's vision and contribute to the development of group members (Koçak and Özüdogru, 2012).

Leadership skills of nurses are very important in the field of health. Leadership includes decision making, motivating, communication, problem solving and other leadership skills. Leadership plays an important role in business, politics, society, education and many other fields. A good leader encourages teamwork, motivates people, makes strategic decisions and provides guidance for sustainable success. Leadership styles may vary and leaders may take different approaches. Some leaders take a participatory approach, while others may be more authoritarian. Leadership can have a huge impact on both the individual and societal levels. A leader can help group members maximize their potential and achieve common goals (Negussie and Demissie, 2013).

In the field of healthcare, nurses' leadership skills are necessary to provide effective patient care as well as to improve the quality of healthcare services. Nurses must develop leadership skills to gain patient trust, work as a team, deal with emergencies, solve problems, and continue their professional development. Therefore, leadership skills are of great importance in the careers of nurses and the successful delivery of health services (Ardahan and Konal, 2017).

The perception that nurses' leadership capacities are insufficient has led to nurses not being provided with opportunities in management and education positions for many years. As healthcare systems become increasingly complex, the need for harmony and collaboration among healthcare professionals increases. It is important that staff can collaborate and coordinate activities. The way to establish this cooperation effectively is for nurses to have leadership and management skills and to use these skills effectively (Öztürk et al., 2012). The reasons why nurses cannot exhibit leadership behaviors include factors such as the fact that healthcare institutions often have a hierarchical structure, physicians are generally seen as team leaders, concern about loss of job security, role ambiguity, role confusion and lack of trust (Serinkan and İpekçi, 2015). Leadership in nursing is defined as "using the power and tendency to achieve a common goal and vision by influencing the patient, family and society." Developing leadership and management skills in nursing requires nurses to organize so that they can participate in health policies and take an active part in decision-making mechanisms (Duygulu and Kublay, 2008).

When the studies are examined, it is seen that management policies and manager behaviors affect nurses' job satisfaction and service quality. Leadership and management behaviors bring a new perspective to healthcare environments and positive environments can be created for nurses and patients. In addition, employees' commitment to the organization, satisfaction levels and motivation increase. Health transformation programs, legal regulations, developments in medicine and technology, difficulties in covering health care expenses, increasing population, lack of nurses, mobbing and burnout problems reveal the need for nurses with leadership skills and the necessity for nurses to develop their leadership skills (Öztürk et al., 2012).

## 1.2. Purpose and Importance of the Research

The aim of this study is to examine the leadership skills of nurses in the field of health. This study addresses a critical issue that should be emphasized in the leadership skills of nurses in the healthcare sector. Nurses play a vital role in caring for patients, coordinating healthcare services, and ensuring patient satisfaction. Therefore, developing and emphasizing nurses' leadership abilities is important to improve the quality of healthcare. Additionally, this study offers a local perspective by examining the leadership skills of nurses specifically in TRNC hospitals. Local perspectives can help identify leadership gaps and develop unique strategies to improve regional health services. In conclusion, the results of this study have the potential to highlight nurses' leadership skills and provide valuable suggestions to make healthcare services more effective. Nurses' leadership skills can shape the future success of the healthcare system and contribute to better care for patients.

## 1.3. Hypotheses

In this research, answers were sought to the following questions:

1. H<sub>1</sub>: There is a difference between nurses' leadership orientation sub - dimensions according to their gender variable.  
H<sub>0</sub>: There is no difference between nurses' leadership orientation sub-dimensions according to gender variable.
2. H<sub>1</sub>: There is a difference between nurses' leadership orientation sub-dimensions according to their age variable.  
H<sub>0</sub>: There is no difference between nurses' leadership orientation sub-dimensions according to their age variable.
3. H<sub>1</sub>: There is a difference between the leadership orientation sub-dimensions of nurses according to their marital status variable.  
H<sub>0</sub>: There is no difference between nurses' leadership orientation sub-dimensions according to their marital status variable.
4. H<sub>1</sub>: There is a difference between nurses' leadership orientation sub-dimensions according to their professional seniority variable.  
H<sub>0</sub>: There is no difference between nurses' leadership orientation sub-dimensions according to their professional seniority variable.

## 1.4. Assumptions

It is assumed that research participants give their answers to the survey questions sincerely.

## 1.5. Limitations

Research;

- With the resources used in the research,
- With the survey questions used in the research,
- It is limited to nurses working in TRNC.

## 1.6. Definitions

**Nurse:** A professional healthcare worker who undertakes patient care and treatment in healthcare services (Arabacı, 2012).

**Leader:** A term defined as the manager or head of a group or organization. (Koçak and Özüdögrü, 2012).

**Leadership:** It means that a person or a group of people directs, guides and influences others. (Negussie and Demissie, 2013).

## 2. THEORETICAL FRAMEWORK

### 2.1. Leadership Concept

Leader, one group, team or organization directing, influencing and inspiration giver is a person. Leader, motivating and directing others And to goals to reach for guidance don't capable of has (Yinal ve Okur, 2022). Leadership roles, a organization top level from project managers of your team to its leader, social groups to their leaders And community to their leaders much various at levels And in contexts can be seen. Leaders, leadership your qualifications user vision owner, reliable, charismatic and effective persons it could be (Tülüce, 2022).

Leadership, leader behaviours and is the effect. Leadership, a your leader others on you effect by One group or organization orientation and motivation process expression it does. Leadership, a of the group to goals reach for necessary the one which coordination, cooperation, communication and management Contains. Good leadership to others guidance do n't team of its members your abilities development And strong One study environment create his skill requires (Tengilimoğlu , 2005).

Leaders effective communication skills with others clear, clear and effective one way communication to establish helper It is possible. Good communication, leaders set with its member's partnership to do and to motivate them makes it easier. Communication skills of people ideas, thoughts, feelings And information opposite aspect effective One way expression whether to understand providing important communication are their abilities. Both personal in relationships and business in your life effective communication to your skills owner to be successful communication to establish And positive interactions to support makes it easier. Good communication to your skills owner to be people emotional intelligence, social rapport And personal And professional success about effective to be helper happens (Özsalmanlı , 2005).

### 2.2. Leadership in Nursing

Of nurses leadership concept health \_ in your services important has a role the one which... nurses, leadership features using hospital or in clinics effective one way their work expression it does. Nurses, health in the industry patients care, treatment and healing in their processes critical one role they play and this for this reason leadership to your skills owner being, patient care the quality And the results in auction big importance has. Of nurses leadership concept, just title or hierarchical with position annoyed not the same in time leadership qualities what they can show all in areas is valid. Nurses with patients And hospital with its staff effective communication building team his work encouragement don't , problems solving , taking initiative and decision don't give abilities like leadership skills They use (Yeşiltaş et al., 2013).

Nurses, patients care in their processes leadership shows. Patients' needs evaluate, treat your plans creates and apply, care the quality marks and patient safety provides. In patient care leadership, health in the industry worker nurses and other health professionals, patients care processes manage and leadership skills use is the process. This leadership type of patient's health of their situation evaluation, treatment of your plans creation, maintenance coordination and health services effective one way presenting processes contains. In patient care leadership, health of your staff well order patients and them with their family's effective one communication setup your ability requires. Leadership skills of patients requirements and your preferences understanding, empathy setup and emotional support providing like factors includes (Velioğlu And Homeland , 2002).

Nurses, multidisciplinary health of your team One Part of it aspect set leadership they do. Other health with its professionals coordination and partnership inside working, patients holistic and effective One way maintenance They provide. In nurses set leadership, health in your services important has a role the one which. Nurses, a health team in other health professionals and with its staff effective One way working in patient care leadership is to show. nurses , patients care processes management , coordination And set study about critical One role they

undertake And This for this reason set leadership to your skills owner to be It is important . In nurses set leadership, following in shapes self shows : (Timmins and McCabe, 2003).

### 2.3. Related Research

Wong and Cummings (2007) examined the impact of nurses' leadership and leadership behaviors on patient outcomes. As a result of these studies, it was determined that positive leadership behaviors increased patients' satisfaction levels and reduced undesirable effects. In Tsai's (2011) study, the relationship between organizational culture, leadership behaviors and job satisfaction in nurses was examined. The research results showed that there was a relationship between organizational culture and leadership behaviors and emphasized that nurses' job satisfaction levels increased in work environments where organizational goals were determined and leadership behaviors were developed.

Negussie and Demissie (2013) examined the relationship between the leadership style of nurse managers and nurses' job satisfaction. They found that nurses preferred transformational leadership style more than transactional leadership and that there was a positive relationship between transformational leadership style and job satisfaction. Warshawsky and Havens. (2014) examined the job satisfaction of nurse managers and their tendency to leave the profession. They showed that nurse managers were satisfied with their career choices and had high levels of job satisfaction, but they stated that many nurses tended to leave their jobs for reasons such as burnout, career changes, promotion and retirement. Serinkan and İpekçi (2015), in their study on "leadership and leadership characteristics in manager nurses" , found that manager nurses adopted a democratic and participatory leadership style and that the most important qualities of leaders should be honesty, responsibility, cooperation, team understanding, and information sharing. They concluded that nurse managers have a transformational leadership approach rather than transactional leadership.

Sayın (2008) in his study aimed to reveal the effects of the leadership styles that nurses perceive in nurse managers on their commitment to the organization. It was concluded that the transformational leadership style average of manager nurses is higher than other leadership styles and that one of the important factors in increasing organizational commitment is the transformational leadership style. In his study, Soyluer (2010) examined the effects of the leadership behaviors of nurse managers on the motivation of nurses and stated that there is a relationship between the leadership behaviors of nurse managers and the motivation and satisfaction levels of employees, and as the leadership behaviors of nurse manager's increase, the motivation (satisfaction) levels of employees also increase.

## 3. METHOD

### 3.1. Research Method

This research is a screening research conducted on a participant group consisting of nurses working in TRNC. Research is a study of participants' opinions, interests, skills, abilities, attitudes, etc. on a topic. It uses a survey research model that aims to examine features such as. This model is called screening, which is given to studies conducted with larger samples and explaining the basic features of the research. During the data collection process, data is obtained from the participants through a survey. The research was conducted using quantitative research methods (Karasar , 2008)

### 3.2. Population and Sample

The population of the research is Turkish Republic of Northern Cyprus (TRNC) Nicosia Burhan Nalbantoğlu State Hospital, Famagusta State Hospital, Near East University Hospital and Kyrenia Dr. It consists of 900 nurses working at Akçiçek Hospital. The sample of this study was determined using the purposeful sampling method. Purposive sampling method is a sampling method in which the researcher selects a sample in line with a specific purpose. This method aims to select informative, representative and important participants who are suitable for the purpose of the research (Kılbaş and Cevahir, 2023). In this context, 280 nurses were included in the sample of the research.

#### 3.1.2. Data Collection Tools

In the study, data was collected via Google Forms between 06.08.2023 and 01.09.2023. 50 of the 350 scale forms distributed were not returned; In 20 of them, deficiencies were detected that would affect the work. Therefore, 280 forms were included in the study.

In the study, data were collected through a personal information form and the Leadership Orientation Scale.

Gender, age, marital status and professional seniority were asked in the personal information form.

The leadership orientation scale is a 5-point Likert type scale developed by Bolman and Deal (1990), adapted into Turkish and its validity and reliability was done by Dereli (2003). It is structured as "1 is never, 5 is always". It consists of 32 questions and 4 sub-dimensions (Dereli, 2003). Each of the "Structural Leadership", "Human Sourced Leadership", "Political Leadership" and "Symbolic Leadership" sub-dimensions consists of 8 statements. The reliability coefficient (Cronbach Alpha) in the study was 0.790 for "Structural Leadership";

0.810 for "Human Based Leadership"; It was calculated as 0.780 for "Political Leadership" and 0.760 for "Symbolic Leadership". Reliability coefficient for the Leadership Orientation Scale (cronbach alpha) is 0.830 (Dereli, 2003). The results of the reliability analysis conducted in this study are given in Table 1.

**Table 1.** Reliability analysis of the scale

|                                     | Cronbach's Alpha | Article |
|-------------------------------------|------------------|---------|
| <b>Leadership Orientation Scale</b> | 0.827            | 32      |

As a result of the analysis, the Leadership Orientation Scale Cronbach's Alpha value was found to be 0.827 and was found to be reliable within the study.

### 3.3. Analysis of Data

SPSS 28 program was used to analyze the data collected in the study and was examined at the reliability level. T-Test, ANOVA and ANOVA Tukey tests were used to examine whether the scale scores differ according to socio-demographic characteristics.

## 4. FINDINGS

### 4.2. Demographic features

Demographic variables of nurses are given in Table 2.

**Table 2.** Demographic Information

|                        |                    | N   | %     |
|------------------------|--------------------|-----|-------|
| Gender                 | Woman              | 152 | 54.3  |
|                        | Male               | 128 | 45.7  |
| Age                    | 22-30 years old    | 32  | 11.4  |
|                        | 31-40 years old    | 117 | 41.8  |
|                        | 41-50 years old    | 102 | 36.4  |
|                        | 51 and over        | 29  | 10.4  |
| marital status         | Married            | 95  | 33.9  |
|                        | Single             | 185 | 66.1  |
| professional seniority | 1-5 Years          | 75  | 26.8  |
|                        | 6-10 Years         | 145 | 51.8  |
|                        | 11-15 Years        | 27  | 9.6   |
|                        | more than 15 years | 33  | 11.8  |
|                        | Total              | 280 | 100.0 |

When Table 2 is examined, 54.3% of the participants are women; It is seen that 45.7% of them are male. Considering the age distribution of the participants, 41.8% are 31-40 years old; 36.4% are 41-50 years old; It is seen that 11.4% are between the ages of 22-30 and 10.4% are between the ages of 51 and over. 66.1% of the participants are single; It is seen that 33.9% of them are married. In terms of professional seniority, 51.8% of the participants have 6-10 years; 26.8% have 1-5 years; It is seen that 11.8% of them are more than 15 years old and 9.6% are between 11-15 years.

### 4.2. Descriptive Analysis of the Leadership Orientation Scale

In Table 3 Descriptive analysis results of the leadership orientation scale are included.

**Table 3.** Descriptive Analysis of the Leadership Orientation Scale and its Sub-Dimensions

|                        | Min.   | Max.   | $\bar{X}$ | Ss.   |
|------------------------|--------|--------|-----------|-------|
| structural leadership  | 32.00  | 35.00  | 33.83     | 0.790 |
| human-based leadership | 33.00  | 37.00  | 35.00     | 0.935 |
| political leadership   | 33.00  | 39.00  | 35.76     | 1,436 |
| symbolic leadership    | 34.00  | 40.00  | 37.54     | 0.922 |
| Scale total            | 137.00 | 150.00 | 142.15    | 3,036 |

The mean ( $\bar{X}$ ) of the total score of the leadership orientation scale of the participating nurses is 142.15 and the standard deviation (Ss.) is 3.036. This shows that the leadership orientations of the participants did not deviate from the overall mean of the scale. When we look at the sub-dimensions of the scale, the sub-dimension with the highest score is Symbolic leadership. The mean score ( $\bar{X}$ ) of this sub-dimension is 37.54 and the standard deviation (Ss) is 0.922. This shows that participants' leadership orientations are more focused on the symbolic leadership dimension. In addition, one of the sub-dimensions of the scale, the structural leadership sub-dimension, received the lowest score. The mean score ( $\bar{X}$ ) of this sub-dimension is 33.83 and the standard deviation (Ss.) is 0.790. This shows that the leadership orientations of the participants are lower in the structural leadership dimension.

#### 4.3. Descriptive Analyzes Between Gender Variable and Leadership Orientation Scale

The results of the analysis conducted to test the hypothesis "H<sub>1</sub> : There is a difference between the leadership orientation sub-dimensions of nurses according to the gender variable" are given in Table 4.

**Table 4.** Comparison of Leadership Orientation Scale and Its Sub-Dimensions According to Gender Variable (T-Test)

|                        |       | N   | $\bar{X}$ | ss    | f      | p.           |
|------------------------|-------|-----|-----------|-------|--------|--------------|
| structural leadership  | Woman | 152 | 33.92     | 0.719 | 7,591  | <b>0.006</b> |
|                        | Male  | 128 | 33.72     | 0.857 |        |              |
| human-based leadership | Woman | 152 | 34.98     | 1,060 | 24,117 | <b>0.000</b> |
|                        | Male  | 128 | 35.03     | 0.762 |        |              |
| political leadership   | Woman | 152 | 35.87     | 1,443 | 0.007  | 0.934        |
|                        | Male  | 128 | 35.64     | 1,423 |        |              |
| symbolic leadership    | Woman | 152 | 37.57     | 1,088 | 14,280 | <b>0.000</b> |
|                        | Male  | 128 | 37.50     | 0.675 |        |              |
| Scale total            | Woman | 152 | 142.36    | 3,486 | 23,476 | <b>0.000</b> |
|                        | Male  | 128 | 141.90    | 2,385 |        |              |

p < 0.05

As a result of the analysis, it was determined that structural, anthropogenic, symbolic and total scale scores differed with the gender variable (p < 0.05). Accordingly, the scores of female nurses in structural leadership, symbolic leadership and the total scale are higher than those of men; In the human-based leadership dimension, male nurses' scores were higher than female nurses. These results show that there are significant differences between leadership dimensions and gender. The fact that female nurses receive higher scores in the structural leadership and symbolic leadership dimensions indicates that they have stronger leadership tendencies in these dimensions. In the human-based leadership dimension, male nurses' higher scores suggest that this dimension may be more prominent or that male nurses' leadership skills in this area are stronger. As a result, it is determined that there are differences between gender and leadership dimensions.

#### 4.4. Descriptive Analyzes Between Age Variable and Leadership Orientation Scale

The results of the analysis conducted in the study to test the hypothesis "H<sub>2</sub> : There is a difference between the leadership orientation sub-dimensions of nurses according to their age variable" are given in Table 5.

**Table 5.** Comparison of Leadership Orientation Scale and its Sub-Dimensions According to Age Variable (ANOVA- ANOVA Tukey Test)

|                       |                 | N   | $\bar{X}$ | ss    | f     | p.           | Difference                                 |
|-----------------------|-----------------|-----|-----------|-------|-------|--------------|--|
| structural leadership | 22-30 years old | 32  | 34,31     | 0.470 | 6,062 | <b>0.001</b> | 22-30 years > 31-40 years; 41-50 years old |
|                       | 31-40 years old | 117 | 33.88     | 0.800 |       |              |  |
|                       | 41-50 years old | 102 | 33.66     | 0.812 |       |              |  |

|                        |                 |       |        |       |        |              |  |
|------------------------|-----------------|-------|--------|-------|--------|--------------|--|
|                        | 51 and 29 over  | 33.72 | 0.751  |       |        |              |  |
| human-based leadership | 22-30 years old | 32    | 34.56  | 1,293 |        |              |  |
|                        | 31-40 years old | 117   | 34.94  | 0.833 |        |              |  |
|                        | 41-50 years old | 102   | 35.21  | 0.929 | 4,472  | <b>0.004</b> | 41-50 years > 22-30 years                  |
|                        | 51 and 29 over  |       | 35.03  | 0.680 |        |              |  |
| political leadership   | 22-30 years old | 32    | 35.87  | 1,680 |        |              |  |
|                        | 31-40 years old | 117   | 35.46  | 1,386 |        |              |  |
|                        | 41-50 years old | 102   | 36.06  | 1,387 | 3,426  | <b>0.018</b> | 41-50 years old > 31-40 years old          |
|                        | 51 and 29 over  |       | 35.82  | 1,338 |        |              |  |
| symbolic leadership    | 22-30 years old | 32    | 37.25  | 0.983 |        |              |  |
|                        | 31-40 years old | 117   | 37.86  | 0.860 |        |              | 31-40 years old > 22-30 years old          |
|                        | 41-50 years old | 102   | 37,18  | 0.792 | 13,652 | <b>0.000</b> | 51 and over > 22-30 years; 41-50 years old |
|                        | 51 and 29 over  |       | 37.86  | 0.990 |        |              |  |
| Scale total            | 22-30 years old | 32    | 142.00 | 4,016 |        |              |  |
|                        | 31-40 years old | 117   | 142.14 | 2,838 |        |              |  |
|                        | 41-50 years old | 102   | 142.13 | 2,981 | 0.118  | 0.949        | No difference                              |
|                        | 51 and 29 over  |       | 142.44 | 2,910 |        |              |  |

p < 0.05

As a result of the analysis, it was determined that there was a significant difference between all sub-dimensions and the age variable, except for the total score of the scale (p < 0.05). According to this;

- In the structural leadership dimension, the participants between the ages of 22-30 are 31-40 years old and 41-50 years old;
- the human-based leadership dimension, participants between the ages of 41-50 are 22-30 years old;
- the political leadership dimension, participants between the ages of 41-50 are between the ages of 31-40;
- the symbolic leadership dimension, it was determined that the participants between the ages of 31-40 were higher than the participants between the ages of 22-30 and those aged 51 and over, compared to the participants between the ages of 22-30 and 41-50.

As a result, participants between the ages of 22-30 have stronger leadership qualities in the structural leadership dimension; Participants between the ages of 41-50 have stronger leadership tendencies in both human and political leadership dimensions; It was observed that participants between the ages of 31-40 were stronger in the symbolic leadership dimension or represented this dimension more effectively. In this case, differences in leadership dimensions have been detected between age groups, and it can be said that these differences indicate that certain age groups have certain leadership characteristics or tendencies.

#### 4.5. Descriptive Analyzes Between Marital Status Variable and Leadership Orientation Scale

The results of the analysis conducted to test the hypothesis "H<sub>3</sub>: There is a difference between the leadership orientation sub-dimensions of nurses according to the marital status variable" are given in Table 6.

**Table 6.** Comparison of the Leadership Orientation Scale and its sub-dimensions according to marital status variable (T-Test)

|                        |         | N   | $\bar{X}$ | ss    | f      | p.           |
|------------------------|---------|-----|-----------|-------|--------|--------------|
| structural leadership  | Married | 95  | 33.88     | 0.769 | 0.009  | 0.926        |
|                        | Single  | 185 | 33.81     | 0.802 |        |              |
| human-based leadership | Married | 95  | 34.80     | 1,116 | 10,449 | <b>0.001</b> |
|                        | Single  | 185 | 35,11     | 0.809 |        |              |
| political leadership   | Married | 95  | 35.15     | 1,178 | 4,390  | <b>0.037</b> |
|                        | Single  | 185 | 36.08     | 1,459 |        |              |
| symbolic leadership    | Married | 95  | 37.27     | 0.777 | 0.905  | 0.342        |
|                        | Single  | 185 | 37.68     | 0.960 |        |              |
| Scale total            | Married | 95  | 141.11    | 2,913 | 0.408  | 0.523        |
|                        | Single  | 185 | 142.69    | 2,966 |        |              |

p < 0.05

As a result of the analysis, it was determined that there was a significant difference between human-based and political leadership and marital status (p < 0.05). Accordingly, it was observed that single nurses received higher scores than married nurses in both human resources and political leadership dimensions. In other words, according to the results of the analysis, single nurses appear to have stronger leadership characteristics or tendencies in the human-based leadership and political leadership dimensions. This suggests that marital status has an impact on leadership abilities and that single nurses take a more prominent leadership role in these two leadership dimensions.

#### 4.6. Descriptive Analyzes Between Professional Tenure Variable and Leadership Orientation Scale

In the research, "H<sub>4</sub>: There is a difference between nurses' leadership orientation sub-dimensions according to their professional seniority variable. The results of the analysis conducted to test the hypothesis "There is a difference" are given in Table 7.

**Table 7.** Comparison of Leadership Orientation Scale and its Sub-Dimensions According to Professional Tenure Variable (ANOVA Test)

|                        |                    | n   | $\bar{X}$ | ss    | f      | p.           | Difference  |

|                     | 11-15 Years        | 27  | 37.70  | 0.465 | 4,782 | <b>0.003</b> | 6-10 years > 1-5 years  |
|                     | more than 15 years | 33  | 37.48  | 1,543 |       |              |                         |
| <hr/>               |                    |     |        |       |       |              |                         |
|                     | 1-5 Years          | 75  | 140.78 | 3,684 |       |              |                         |
| Scale total         | 6-10 Years         | 145 | 142.84 | 2,049 |       |              | 6-10 years > 1-5 years; |
|                     | 11-15 Years        | 27  | 142.96 | 2,009 | 9,412 | <b>0.000</b> | 11-15 years > 1-5 years |
|                     | more than 15 years | 33  | 141.57 | 4,401 |       |              |                         |

p < 0.05

As a result of the analysis, there was a difference between the leadership orientation sub-dimension and the total dimension of the scale according to the professional seniority variable of the nurses. significant It was observed that there was a difference (p < 0.05). According to this;

- In the structural leadership dimension, nurses with professional seniority between 1-5 years are more likely than those with 6-10 years and 11-15 years; Nurses with more than 15 years of professional seniority are also between 6-10 years;
- the human-based leadership dimension, nurses with professional seniority between 6-10 years are among those with 1-5 years to more than 15 years; Nurses with professional seniority between 11-15 years are also between 1-5 years and more than 15 years;
- the political leadership dimension, nurses with professional seniority between 6-10 years are among those with 1-5 years to more than 15 years; Nurses with professional seniority in the range of 11-15 years are in the range of 1-5 years;
- the symbolic leadership dimension, nurses with 6-10 years of professional seniority are among those with 1-5 years of seniority;
- In total, nurses with 6-10 years of professional seniority are compared with those with 1-5 years of seniority; It was determined that nurses with professional seniority in the range of 11-15 years were higher than those with professional seniority in the range of 1-5 years.

As a result, nurses' leadership orientations may differ according to professional seniority. This suggests that nurses may develop leadership skills or have different leadership styles later in their careers.

#### 4. CONCLUSION AND RECOMMENDATIONS

The results of the study examining the leadership skills of nurses in the field of health are summarized below:

The analysis results showed that female nurses had higher structural leadership, symbolic leadership and scale total scores than their male colleagues. However, it was determined that male nurses scored higher than female nurses in the human-based leadership dimension. The relationship between gender and leadership styles is complex and multifaceted. These results may be the result of a combination of factors such as gender roles, work environment, education, self-esteem and self-confidence. These results show that leadership development programs need to be made more effective by taking gender differences into account.

Differences were also observed between the age variable and leadership dimensions. For example, it was stated that different age groups received different scores in the dimensions of structural leadership, human-based leadership, political leadership and symbolic leadership. Different age groups may show differences in nurses' professional experience levels. Older nurses generally have more experience. This may indicate that they may have developed managerial leadership traits, particularly structural leadership and political leadership. Younger nurses may have emphasized more emotional and symbolic leadership traits, such as human-based leadership or symbolic leadership.

There are differences between marital status and leadership dimensions. It was observed that single nurses scored higher than married nurses in the human resource and political leadership dimensions. These results may be the result of a complex interaction between marital status and leadership abilities. However, it should not be forgotten that these results are only the results of a study and each individual's leadership abilities, experiences and personal characteristics are different. Therefore, the relationship between marital status and leadership abilities may be based on individual differences rather than a general rule.

Significant differences were detected between leadership orientations according to the professional seniority variable. Nurses in different professional seniority ranges received different scores in different leadership

dimensions. Professional seniority is an indicator of the experience a nurse has. Nurses who have worked longer may have more experience. This experience may have led to the development of different skills or traits in different leadership dimensions. For example, more experienced nurses may be better at structural leadership, while newer nurses may be stronger at symbolic leadership.

The findings obtained as a result of the analysis show that nurses' leadership orientations may differ depending on variables such as gender, age, marital status and professional seniority. In light of these findings, it is possible to offer the following suggestions:

- **Educational Programs:** More emphasis should be placed on leadership in nursing education programs and nurses should be provided with opportunities to develop their leadership skills. Leadership training should be organized especially for different age groups and professional experience levels.
- **Leadership Awareness:** Programs should be developed to increase leadership awareness among nurses. These programs should explain how leadership styles and skills are affected by different variables.
- **Gender Inequality:** Leadership differences based on gender should be taken into account. How gender inequality affects the perception of leadership and solutions to overcome gender-based leadership differences should be investigated.
- **Marital Status and Leadership:** Differences in leadership between married and single nurses should be examined. This may help us better understand how perceptions of leadership relate to marital status.
- **Career Development:** The relationship between professional seniority and leadership should be further investigated. Programs should be developed to guide nurses on how they can improve their leadership skills and adapt to different leadership styles in the later stages of their careers.

These suggestions can help nurses better understand their leadership potential and improve their leadership skills. In this way, the quality of patient care can be increased by training more effective and competent leaders in health services.

In future studies, the following suggestions can be taken into consideration in order to develop a greater understanding of nurses' leadership behaviors and increase knowledge in this field:

- **Comprehensive Leadership Research:** Research should be conducted to examine the factors affecting nurses' leadership behaviors in more detail. Large-scale studies, especially including variables such as different healthcare institutions, work environments and patient groups, can help us understand the diversity of leadership behaviors.
- **Effects of Leadership Training:** Studies should be conducted focusing on the long-term effects of leadership training given to nurses and how these trainings are reflected in leadership behaviors in practice. This can help evaluate the effectiveness of leadership training.
- **Gender and Leadership:** There is a need for studies that examine gender-based leadership differences in more depth. The effects of gender norms on leadership perception and behavior must be understood.
- **Cultural Differences:** Studies investigating the effects of cultural differences on leadership perception and behavior should be focused on. Data should be collected on how the understanding of leadership differs in different cultures.
- **Self-Assessment Tools:** Studies should be carried out to develop self-assessment tools that allow nurses to evaluate their leadership abilities and behaviors and to test the effectiveness of these tools.
- **Leadership and Patient Outcomes:** Studies examining the impact of nurse leadership on patient outcomes are important. Research evaluating the effects of nurse leadership on patient safety, satisfaction and quality of care can contribute to the improvement of healthcare services.
- **Multicenter Studies:** Multicenter studies can be conducted comparing leadership behaviors among nurses in health institutions in different geographies. This can help us understand regional or cultural differences in leadership practices.

Future studies can improve the quality of healthcare by better understanding nurses' leadership behaviors and influencing factors and help us better evaluate nurses' leadership potential.

### ABSTRACT

Two significant earthquakes with an epicenter in Kahramanmaraş, Turkey, on February 6, 2023, are covered in sections 7.7 and 7.6 of this study. The resulting crisis in the civil aviation industry and the management process are also covered. Rather than breaking the data down into classifications and aspects, "Qualitative Research" was employed in the study because it enables a holistic approach and organically used perceptions to be exposed more efficiently. As part of a case study methodology, the reasons why the crisis situation covered by the content affects how civilian activities function, as well as its characteristics, the intervention process, and its outcomes, as well as sub-impact behaviors like comparable crisis situations and their outcomes that have happened, like an explosion, are discussed. Conceptually, a literature search was used to express the terms. The State Airports Authority (DHMI) is the focal point of national disaster relief efforts and serves as the Republic of Turkey's administrative body for carrying out air navigation and airport management services. This is the conclusion drawn from more thorough research. The managers and staff of the Organizations and Stakeholder Organizations specifically assigned to the crisis management process were interviewed in person, and field and sector literature was examined in order to gather the data. The cause-and-effect relationship between policies in crisis is disclosed in the conclusion section, along with how the lessons learned are incorporated into crisis management strategies and the significance of taking proactive measures to avert future crises.

**Keywords:** Crisis, Crisis Management, Civil Aviation, State Airports Authority

### INTRODUCTION

In the modern world, when globalization has reached unprecedented heights, organizations, industries, and even nations are becoming more interconnected and collaborative. This framework takes into account both favorable and unfavorable elements for long-term success. In times of crisis, these elements—which may be characterized as both internal and external influences and come from human, natural, competitive, technological, etc. sources—can make party stakeholders more delicate and sensitive. In this backdrop, since the Wright brothers built the first piston aircraft in 1903, the civil aviation industry has continuously evolved, acquired a dynamic structure, and grown to be an international sector. Its dynamic structure, ongoing development, positive growth, round-the-clock service, and worldwide standing all point to the sector's global scope. Conversely, it is evident that the crisis situation has arisen at different times and under different labels, either on its own or as a result of a catalyst in the historical process.

The study's focus, a natural crisis scenario, has always existed and has the ability to do so at different points in time and with varying degrees of intensity throughout human history. The literature describes this circumstance as an earthquake, one of the sub-dimensions of natural catastrophes. The scenario turned into a crisis since the earthquake was abrupt and harder to notice than slow-developing catastrophe circumstances. On the other hand, because of its intensity and the inadequacy of the actions implemented, the vastness of the effect area of the violence made the situation worse. Air transportation was the most crucial step in the process since the tragedy demanded quick action and, in this case, the delivery of relief from both domestic and foreign sources to the area.

The purpose of this study is to serve as a model for future research projects aimed at managing potential crises in the civil aviation industry. By combining historical instances, the perspectives of crisis management experts, the genesis of the crisis and the significant role the civil aviation industry played in the process, and a survey of the literature, it seeks to provide a small but distinct contribution to the body of literature.

### Framework Conceptual

The study's keywords are listed under the title: A literature research was done, and definitions, dimensions, and connections between them were included.

### Crisis Situations and Their Handling

Crisis in the social dimension: "A difficult period in the life of a society or an organization in a country or between countries; It is expressed as "crisis, despair" (E.T. February 2024)," according to the Turkish Language Association (TDK). Conversely, Crisis in the Corporate Aspect: It can be defined as a circumstance that jeopardizes an organization's goals and objectives, renders countermeasures inadequate, casts doubt on the institution's ability to succeed over the long term, and fuels unrest and turmoil. As stated in the definitions, its characteristics are:

- The structure is exposed to a negative impact,
- The development is an unpredictable situation,
- Threatens the organization's reason for existence,
- Having a limited time to intervene in the situation,
- There is a need for rapid intervention,
- It causes tension at the organizational level and so on.

Crisis management is, at its most basic, the culmination of the attitudes and actions that organizations exhibit during times of crisis. Reducing the harm that can arise during a crisis is the major goal here. Forecasting studies, which expose possibilities and counter-planning, scenario applications, data gathering and analysis interpretation, are among the preventative steps that crisis managers typically take against such circumstances (Sucu, 2000: 47).

### State Airports Authority and Civil Aviation

The collective term for the actions involved in piloting light or heavy aircraft that are created by humans in the air is aviation. All of these operations together, excluding the military wing, are referred to as civil aviation (Gerede, 198, 2006). In this sense, DHMI is the organization that plans and manages a variety of civil aviation operations in the Republic of Turkey, with a focus on airport management and air navigation services, and works to modernize them. However, the appropriate Ministry of Infrastructure and Transport is a Public Economic Enterprise. It is required to conduct its operations in compliance with the International Civil Aviation Organization's guidelines and regulations. It is thus a party to and a member of several international agreements and organizations in compliance with these commitments (DHMI, 2024).

### METHOD

Qualitative research methods are utilized in the study; the case study approach was used; data are methodically and thoroughly analyzed in the real context of a scenario or occurrence (Aytaçlı, 2012:3). Documents from the national and international press as well as official comments were reviewed to show how DHMI became the center of attention for the process after the earthquake on February 6 in Kahramanmaraş, how the situation escalated into a crisis, and how this process was handled. Conversely, one-on-one interviews with authorized individuals who were directly involved in the process attempted to shed light on the situation in all of its facets. A real-world scenario is used in the conclusion section to illustrate how the study might benefit current and upcoming crisis management programs.

### The State of the Crisis Area and the Regional Potential of DHMI

Two earthquakes occurred on February 6, 2023, at around 04:17 Turkey time. The first had a magnitude of 7.8, and its epicenter was found to be in the Pazarcık district of Kahramanmaraş province. The second earthquake happened about nine hours later, at around 13:24, and its epicenter was found to be in the Elbistan district of Kahramanmaraş province (İTÜ, 2023). However, hundreds of aftershocks continued to occur even still after these two powerful earthquakes. The region and strength of the earthquake are major variables in whether or not it becomes a catastrophe. Within this framework, an earthquake; Eleven Turkish provinces (Kahramanmaraş, Gaziantep, Adiyaman, Malatya, Hatay, Osmaniye, Adana, Sanlıurfa, Diyarbakır, Kilis, Elazığ); Numerous nations, including Egypt, Israel, Lebanon, Palestine, Syria, Iraq, Iran, and Syria suffered the effects of it, and many people died and were injured (Hoşgör et al., 2023: 78).

The World Health Organization (WHO) classified the situation as a level 3 emergency, while the Turkish Disaster and Emergency Management Authority (AFAD), which sets the highest level of emergency response, classified it as a level 4 emergency due to the magnitude of the earthquake, the extent of its impact area, and the destruction it caused (Aydinbaş, 2023: 177). An estimated 12,000 search and rescue teams were sent to the area after almost 100 nations answered the global call for assistance (TBMM, 2023). 53,537 people died and 107,213

people were injured, according to the official declaration released almost a year after the earthquake (BBC, 2024). In this regard, the following airports in the area are served by DHMI:

- Adana Airport
- Elazig Airport
- Hatay Airport
- Adiyaman Airport
- Şanlıurfa Airport
- Diyarbakir Airport
- Malatya Airport
- Gaziantep Airport
- Kahramanmaraş Airport

The aforementioned airports can accommodate 27 million passengers annually. In 2022, 11.3 million people are expected to use these airports overall. Only the Diyarbakir airport has access to the reserve runway designed for emergency usage (SBB.2023).

The magnitude and extent of the earthquake, the need for quick action and the concept of time constraints, on the other hand, the efforts of international and national relief teams to get to the area, the removal of injured people and other earthquake victims from the area, etc. Due to these problems, civil aviation is now the primary focus of the emergency. The condition of the DHMI airports in the area is summed up as follows in the statement issued by the Ministry of Transport at 16:09 on the day of the earthquake (Independent, 2023):

| Airports              | Availability                                      | Damage                            |
|-----------------------|---|-----------------------------------|
| Adana Airport         | Open to Civil and Emergency Flights               |                                   |
| Malatya Airport       | Closed to Civil Flights/Open to Emergency Flights | Terminal Building Damaged         |
| Diyarbakir Airport    | Open to Civil and Emergency Flights               |                                   |
| Adiyaman Airport      | Open to Civil and Emergency Flights               | Superstructure Damaged Slightly   |
| Kahramanmaraş Airport | Closed to Civil Flights/Open to Emergency Flights | Superstructure Damaged Slightly   |
| Gaziantep Airport     | Closed to Civil Flights/Open to Emergency Flights |                                   |
| Hatay Airport         | Closed to All Flights                             | Runway and Apron Severely Damaged |
| Şanlıurfa Airport     | Closed to Civil Flights/Open to Emergency Flights |                                   |

The outcomes of the services offered at DHMI airports in the area, without causing any security lapses or circumstances that would cause disorder, were summed up by the Minister of Transport in a statement at the conclusion of the six months that followed the earthquake (AA, 2023):

- From April 6 through April 30, there were no fees for flights out of the seismic zone.
- A total of 3,057,804 individuals were evacuated; 1,597,099 left and 1,460,000 arrived.
- There were 30,601 aircraft operations, comprising 15,337 landings and 15,264 takeoffs.
- 22,466.7 tons of supplies and goods were transported.

However, the following is a summary of the data pertaining to domestic and international flights from the airports listed:

- A total of 61,202 aircraft were in use, including 55,391 domestic and 5,811 international flights.
- 5,948,975 passengers in all were serviced, comprising 5,371,354 passengers on domestic lines and 577,621 passengers on international lines.
- There was 6,451 tons of cargo traffic and 56,494 tons of freight (cargo plus mail + luggage) traffic.

In the first 25 days following the earthquake, more than 3 million people benefited from air travel, even though 11.3 million passengers traveled from the aforementioned airports annually, based on 2022 data (or an average of about 940,000 passengers per month). This exceeds the overall capacity by more than three times.

The following is a concise synopsis of the material gathered from domestic and foreign press outlets during the crisis management procedure, as well as in-person interviews with DHMI officers and managers involved in the process. The General Directorate and other airports promptly dispatched 1263 personnel to provide support to the 3333 personnel operating at the airports in the region, mainly the experienced and volunteer personnel who worked during the Izmir and Erzincan earthquakes, after the Board of Directors met during the early hours of the earthquake. Except for Hatay Airport, whose runway was destroyed on the first day of the catastrophe, other airports were prepared for flights as a consequence of the effort done by all units in cooperation and with mobilization awareness. Hatay Airport was quickly placed into operation after completing its 96-hour runway rehabilitation project, which was started under the direction and supervision of DHMI.

To help with and oversee the rigorous work done at the airports, fifty senior managers from the Head Office and other airports were appointed. Additionally, 527 ARFF members who were promptly dispatched to the area to conduct comprehensive search and rescue operations managed to extricate 210 earthquake victims alive from the debris. In contrast, cars, thermal gear, portable air navigation aids, tents, and supplies for humanitarian relief were transported to the area.

## CONCLUSION

Turkey has endured several significant earthquakes throughout the years, making it one of the seismically active places in the globe. These earthquakes left a path of devastation, human casualties, and widespread economic damage (Tetik and Oner, 2023).

A state of emergency was proclaimed in Turkey in the wake of the two significant earthquake catastrophes that struck on February 6, 2023, with the epicenter being Kahramanmaraş and affecting 10 cities. Seasonal factors and the earthquake's damage to the roadways have made it difficult to move people and provide assistance to the area (Akcan et al.2023).

Earthquakes and other natural catastrophes have a major detrimental economic impact on enterprises and can result in large financial losses, particularly for exporting companies. According to assessments from the World Bank, Turkey's earthquake damage is estimated to be worth \$34.2 billion, or 4% of the nation's total annual income (Öner, 2023).

To make the airports in the area secure, an estimated 3.3 billion TL (175.5 million USD) in investment is required (DHMI, 2024). The next phase should involve fortifying any airport in Turkey that is near an active fault line.

Given the substantial migration that occurred in the region following the earthquake, it is imperative that air transportation investments be limited to improving flight safety and passenger security. Investments in passenger comfort and capacity expansion should be avoided.

This study has led to a number of recommendations based on variations in maturity following the earthquake:

### Short Term Airline Transportation

- Holding ticket costs at a minimal level for an acceptable amount of time by increasing flight frequencies in the region and scheduling extra flights; conducting ground surveys and renovations of runways, aprons, taxiways, and terminal buildings at the airports in the region.

### In the Midterm

- Constructing a minimal heliport in each of the provinces within the area while considering active fault lines and obstructions
- Organizing the deployment of aircraft rescue and fire fighting, or ARFF, vehicles at airports during emergencies,
- Planning recurring staff training sessions with RFF tools,

### Long Term

- Building "emergency runways" at airports to facilitate the landing and takeoff of passenger and freight aircraft based on the outcomes of prioritizing based on factors including province population, passenger volume, and local catastrophe risk.

## ABSTRACT

Developing and changing technologies such as the internet, big data and artificial intelligence have significantly affected entrepreneurship as in many other fields. With the impact of technology, entrepreneurship has evolved into digital entrepreneurship over time. Due to the increase in studies on digital entrepreneurship in recent years, there has been a need to see the development, trends and gaps in the related literature. This study, which examines articles in the field of digital entrepreneurship in the Web of Science database, provides a quantitative map of digital entrepreneurship through bibliometric analysis. In the analysis process, a total of 576 articles were analyzed by searching Web of Science databases with the terms “digital entrepreneur\*” and similar terms. R bibliometric package was used for the analysis. The findings show that the number of studies in the field of digital entrepreneurship is gradually increasing. In particular, it was seen that 2017 can be seen as a breaking point and the highest number of publications was in 2023 with 126 publications. Descriptive statistics showed that Cavallo, A and Ghezzi, A. are the most prolific authors, Sustainability is the most prolific journal and China is the most prolific country. It was concluded that terms such as innovation, performance, impact, perspective, business, technology, digital technology, digital entrepreneurship, management, and entrepreneurship were the most frequently used words in publications on digital entrepreneurship. Finally, the keyword occurrence networks showed that the largest node was “digital entrepreneurship”. This study is expected to guide researchers in terms of key points for future research on digital entrepreneurship in the context of entrepreneurship. It is expected that the information provided by this study will enable researchers to get involved in this field and/or conduct their research more effectively.

**Keywords:** Entrepreneurship, Digital entrepreneurship, Bibliometric analysis, Bibliometrix

## INTRODUCTION

Digital entrepreneurship has become a prominent field of study, driven by rapid technological advancements and shifts in the economic landscape. It involves the integration of digital technologies into entrepreneurial practices, transforming traditional business models and unlocking new opportunities for innovation and growth. Key elements of digital entrepreneurship highlighted in the literature include digital transformation, generational influences, and contextual factors.

Digital transformation plays a central role in reshaping how businesses operate and engage with their customers. According to Jafari-Sadeghi et al., understanding this transformation requires a multi-disciplinary approach, recognizing the critical role of digital technologies in redefining organizational structures and social interactions (Jafari-Sadeghi et al., 2021). Entrepreneurs leverage these technologies to innovate and expand into new markets, enhancing their competitive edge (Li et al., 2017). Li et al. also highlight the capability of small and medium-sized enterprises (SMEs) to use digital tools for transformation, fostering entrepreneurial success (Li et al., 2017).

Generational factors, particularly the traits of Generation Z entrepreneurs, significantly influence digital entrepreneurship. Saeedikiya notes that Generation Z is deeply familiar with technology, seamlessly integrating digital tools into their daily lives (Saeedikiya, 2023). This tech-savviness shapes their entrepreneurial behavior, empowering them to innovate and identify opportunities that might not have been evident to earlier generations. Contextual factors also play a vital role in digital entrepreneurship. Ngoasong’s research underscores the challenges and opportunities within resource-limited environments, particularly in developing regions (Ngoasong, 2017). By examining institutional, technological, and local contexts, the study reveals how these dimensions can either support or constrain entrepreneurial activities. This awareness is critical for designing strategies to promote digital entrepreneurship in areas with scarce resources.

Another crucial aspect is the relationship between digital transformation and business model innovation. Zhang et al. examine how start-ups achieve disruptive innovation by leveraging dynamic capabilities and adapting their business models to the digital economy (Zhang et al., 2022). Similarly, Ghezzi and Cavallo highlight the

importance of agile business model innovation, which enables digital entrepreneurs to navigate dynamic and competitive environments effectively (Ghezzi & Cavallo, 2020).

In summary, digital entrepreneurship is shaped by the interplay of digital transformation, generational characteristics, and contextual influences. The adoption of digital technologies fosters innovation and necessitates rethinking traditional business models. As this field evolves, further research is essential to explore its implications and to develop strategies that empower future digital entrepreneurs. Especially in recent years, as digital technologies have started to play an important role in innovation and entrepreneurial activities, digitalization and digital innovations have become the backbone of enterprise creation (Chae and Gog, 2020). In this direction, the number of academic studies has been increasing year by year with the proliferation of digital tools. This increase makes it difficult to uncover research trends, trends, themes and other important points occurring in various fields. The increasing number and the desire to reveal the development of certain fields and to map various fields has led to the emergence of different computer-based programs. In this context, bibliometric analysis was conducted in this study to see the big picture by revealing developments, changes, trends and gaps in the field of digital entrepreneurship. For this purpose, the following research questions (RQ) were answered in the study.

- RQ1. What is the distribution of studies by years?
- RQ2. What is the frequently used words in the Title-Abstract-Keywords?
- RQ3. Which authors have published the most articles?
- RQ4. Which countries publish the most articles?
- RQ5. Which journals have the most publications?
- RQ6. What is the frequently used words in the articles?
- RQ7. How is the keyword co-occurrence network analysis?

## METHOD

Bibliometric analysis method was used in the study. Bibliometric analyses use the information obtained from various databases to show various aspects such as trends, tendencies and developments in the literature, allowing the big picture to be seen. For this reason, bibliometric analyses can include hundreds of studies and allow for many analyses such as keywords, author, year, citation analysis. (Donthu et al., 2021).

### Research Design

From an international perspective, we utilized bibliometric mapping to evaluate digital entrepreneurship by examining authorship, publications, keywords, journals, countries, and citation metrics. Bibliometric mapping visually represents relationships across disciplines, domains, specific publications, and authors (Donthu et al., 2021). Such studies enable the identification of trends within a field by quantifying and evaluating various aspects of research in a specific area (Ahmi, 2022). Through bibliometric analysis, it is possible to trace studies, researchers, institutions, and the scientific progression related to a defined topic (Martí-Parreño et al., 2016).

To uncover the research structure surrounding digital entrepreneurship, several strategic decisions were required in designing our bibliometric study. Therefore, we present a workflow to outline the research process.

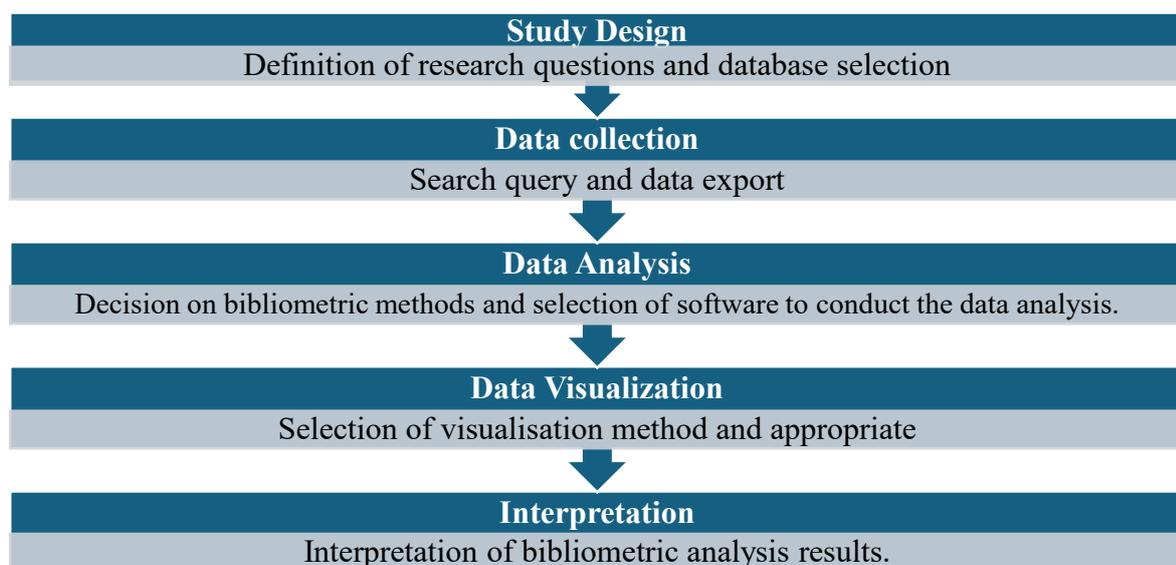

Figure 1. Workflow to clarify the research process.

In the following, the sections in the workflow have been completed step by step. Then we interpret and discuss these findings in the last section.

**Data Collection**

Bibliometric analyses often rely on leading databases like Web of Science and Scopus (Zhu & Liu, 2020). This study used Web of Science to identify research on digital entrepreneurship, focusing on article titles, abstracts, and keywords. The inclusion criteria were that the studies were in English and the document type was an article. Information about the database search query is given in Figure 2.

- Web of Science (<https://www.webofscience.com/wos/woscc/advanced-search>) is performed on 05.02.2024.

TS=("digital entrepreneur\*") OR TS=("e entrepreneur\*") OR TS=("e-entrepreneur\*") OR TS=("virtual entrepreneur\*")

Figure 2. Database Search Query

When Table 1 is examined, the term "TS" used in the Web of Science database refers to topic (title, abstract, keywords and keyword plus). In search process the term such as "digital entrepreneur\*", "e entrepreneur\*", "e-entrepreneur\*" and "virtual entrepreneur\*" was used.

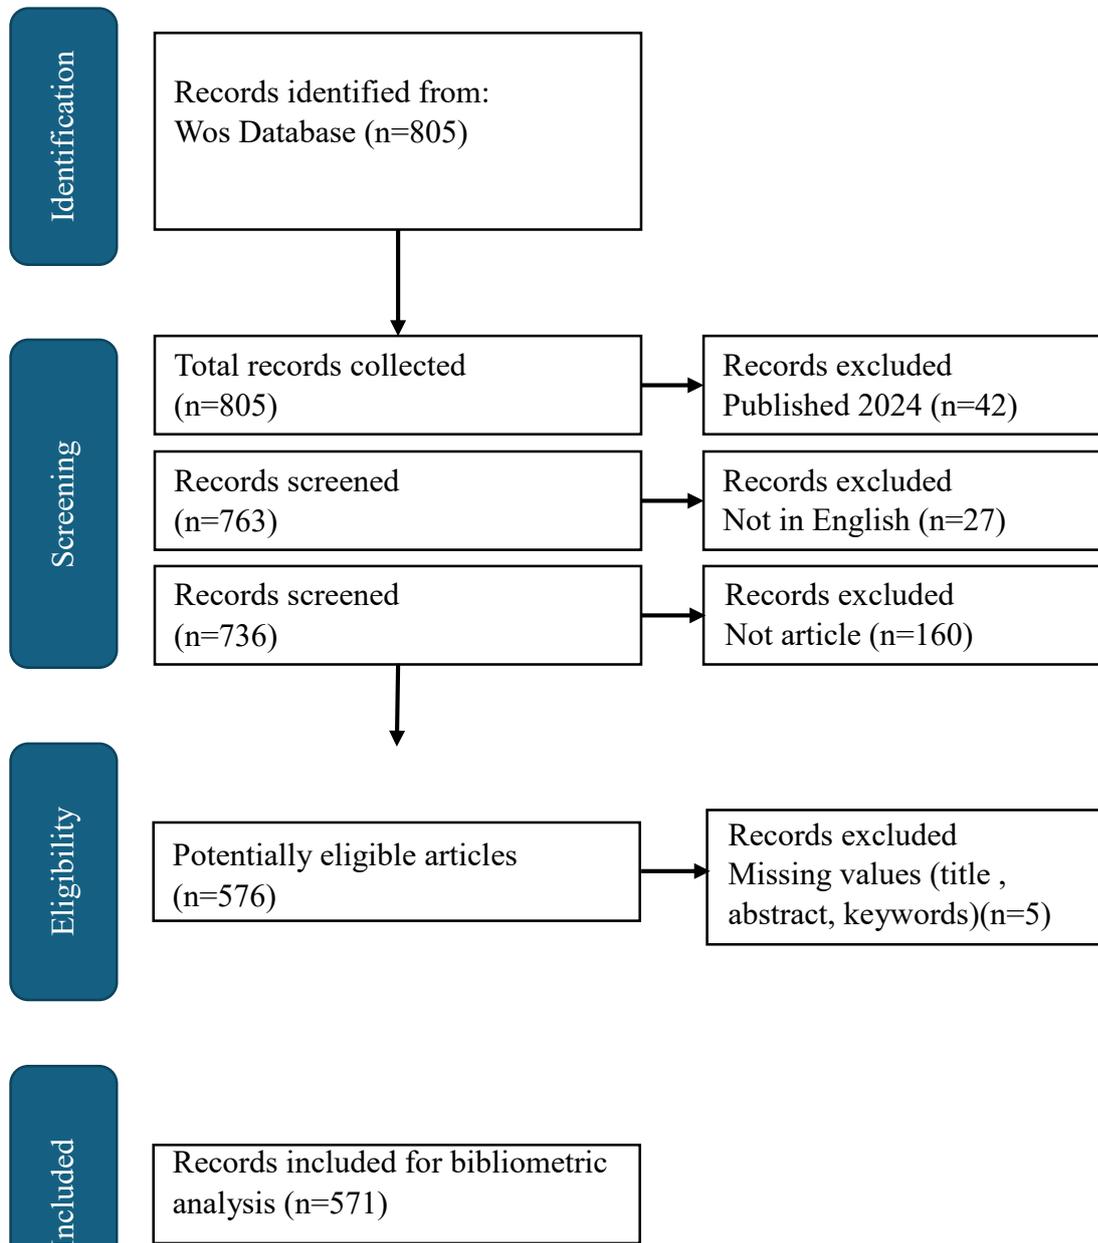

Figure 3. PRISMA declaration for the Process of Searching and Filtering Information Sources

Table 2. presented overview of the data extracted from Scopus database and used for the bibliometric analysis.

Figure 4. Descriptive Data of Obtained Studies

Figure 1 shows the statistical information of the publications included in the study. Within the scope of the study, a total of 571 articles from 275 different sources were analyzed.

### Data Analysis

Patterns based on mathematical correlations were identified using visualization approaches based on metadata and bibliometric data obtained from the articles included in the study. Using the metadata collection, co-authorship, bibliographic links, keyword co-network analysis and citation analysis were performed with R Studio software and bibliometrix package. The relationship between items (publications, journals, authors, etc.) is determined by the number of references they share in the bibliographic link.

**FINDINGS**

This section presents the findings obtained as a result of the analysis. Figure 5. shows the distribution of the articles analyzed within the scope of the study according to years.

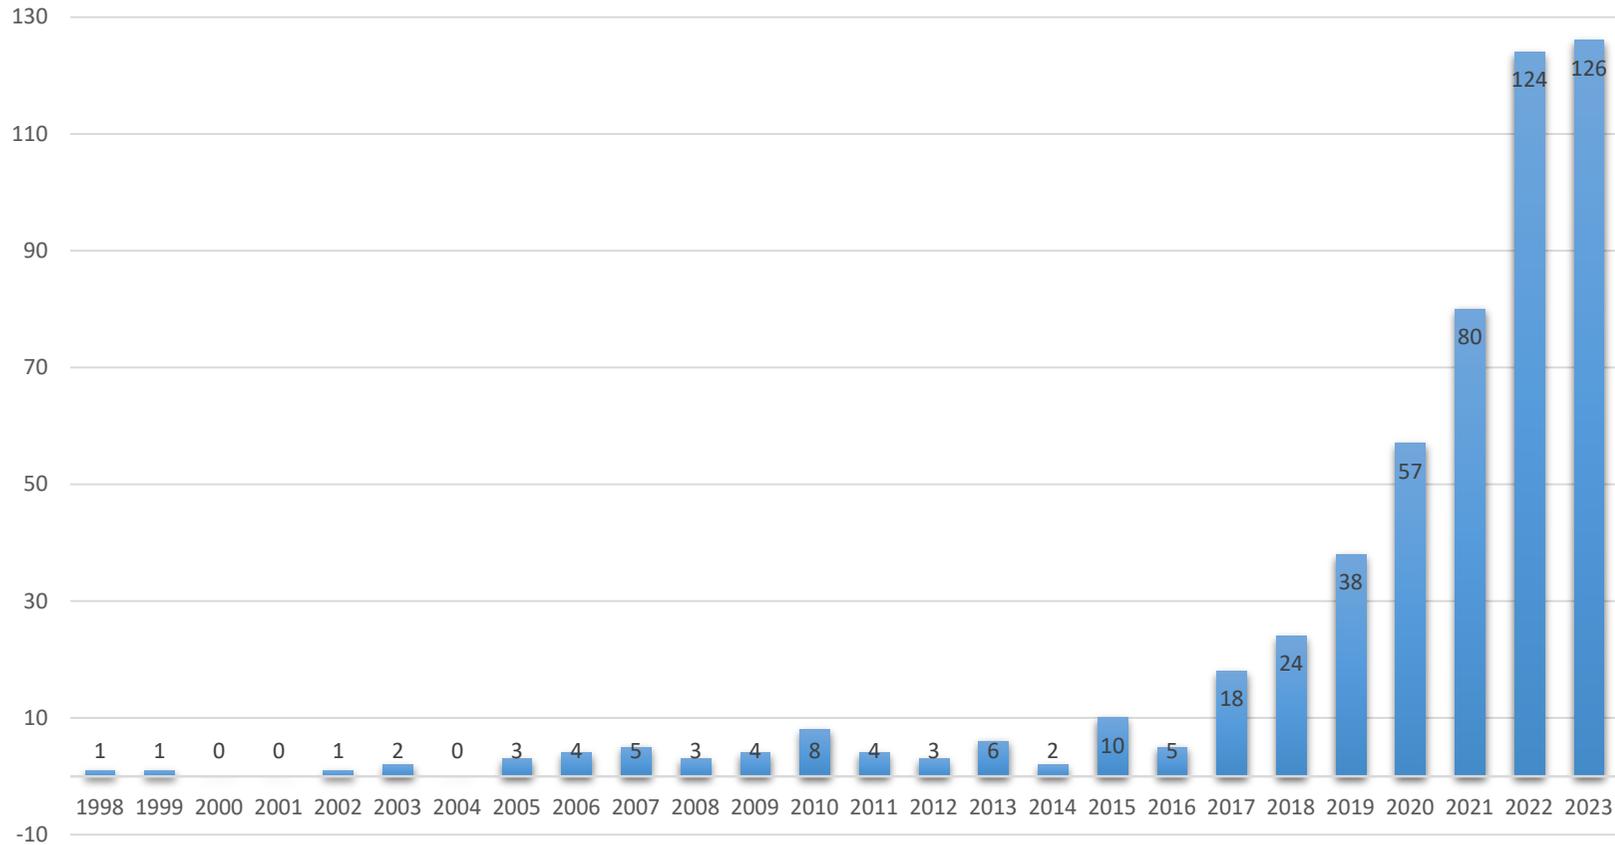

Figure 5. Number of articles by year

Figure 5. shows that studies on digital entrepreneurship have started to be published since 1998. It is seen that there is an increase in the number of publications especially in the 200s, and the number of publications is quite high in the last five years. The threeplot for frequently used words in the title, abstract and keywords of the article is shown in Figure 6.

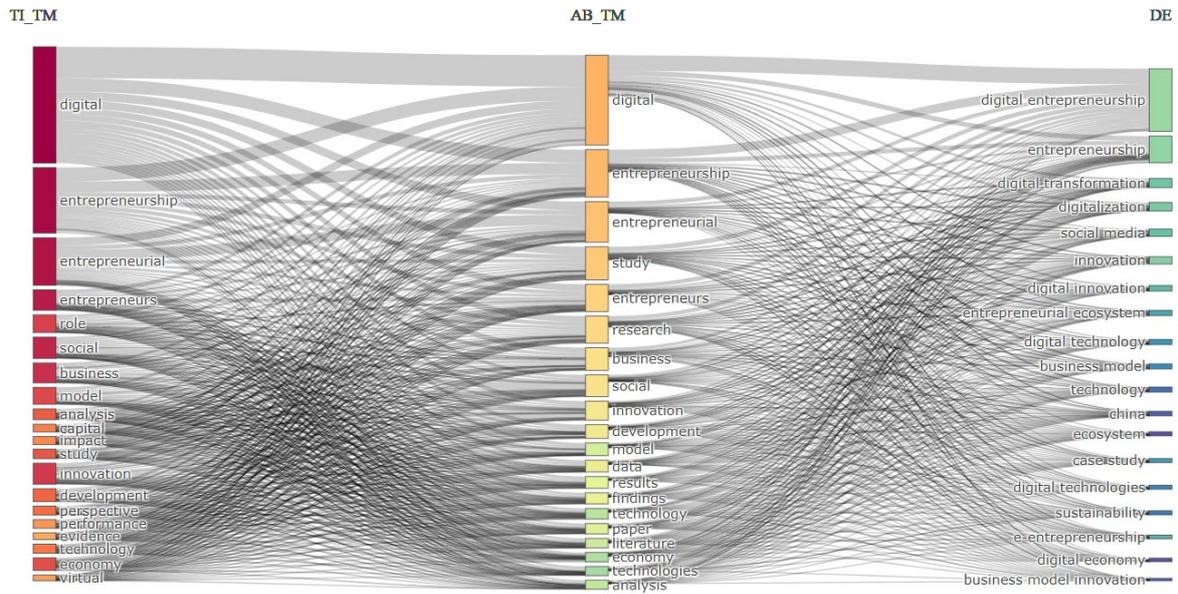

Figure 6. Frequently used Words ThreePlot of Title-Abstract-Keywords

When Figure 6 is examined, the most frequently used words in the titles of the studies are digital (5880), entrepreneurship (3320), entrepreneurial (2410), entrepreneurs (1030), and role (901); while the most frequently used words in the abstracts are; digital (4540), entrepreneurship (2400), entrepreneurial (2050), entrepreneurial (2050), study (1670), and entrepreneurs (1380), while in keywords; digital entrepreneurship (3170), entrepreneurship (1350), digital transformation (463), digitalization (428) and social media (374). The authors who published the most in the study and various information about these authors are presented in figure 7.

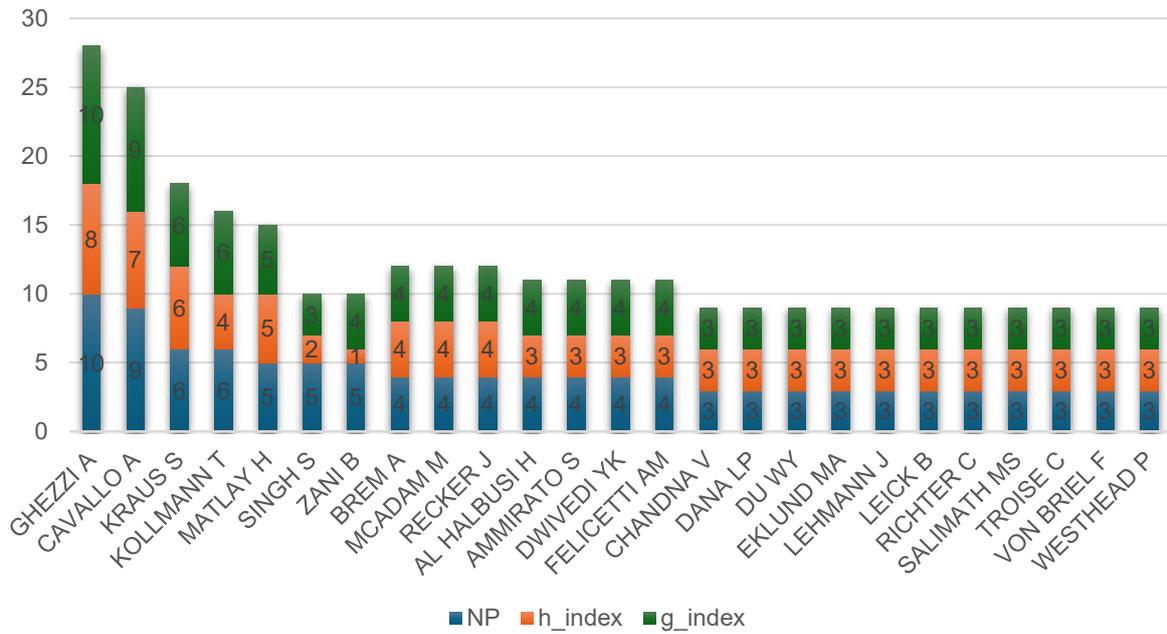

Figure 7. Most Active Authors Publishing Articles

Figure 7 shows that Ghezzi, A (10), Cavallo A, (9) and Krauss, S (6) are the most published authors in the studies on digital entrepreneurship. Information such as the number of h\_index and g\_index of the authors is also shown in the figure. The top 20 countries and the number of publications on the subject are shown in Figure 8.

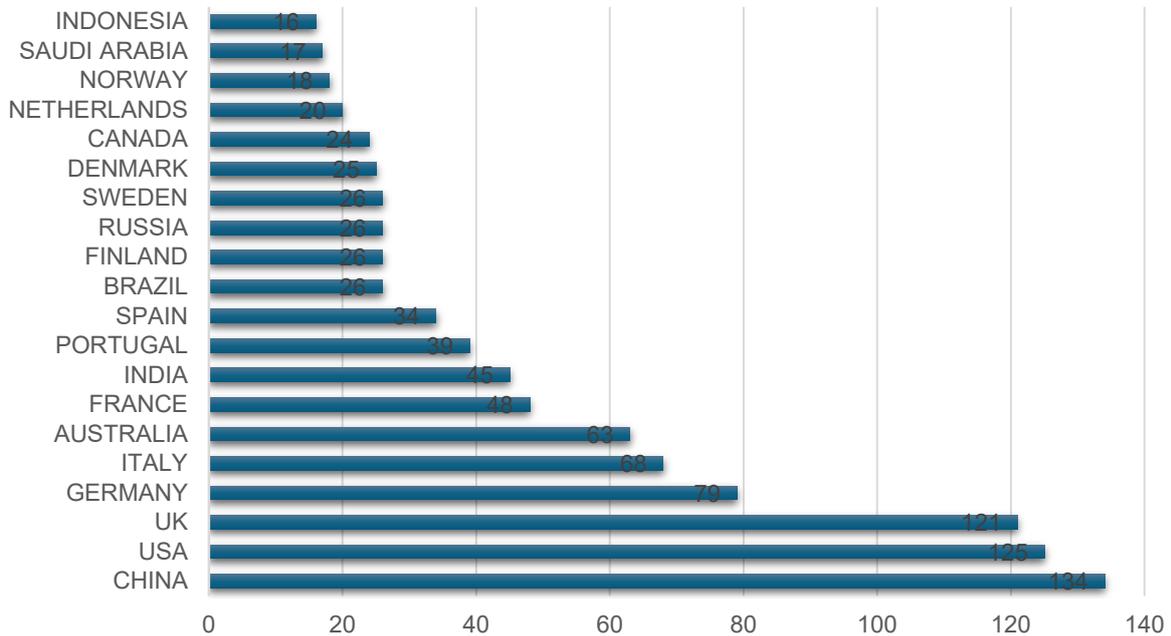

Figure 8. Number of publications by country

When Figure 8. is analyzed, it is seen that China, the USA and the UK have significantly more publications than other countries. Turkey is the 41st country with the highest number of publications with 6 publications. When the studies were examined, it was seen that a total of 275 publications were made in 275 sources related to the studies on the subject. Among these sources, the top 10 journals with the highest number of publications and the number of publications belonging to the journals are presented in Figure 9.

## LIMITATIONS

The research methodology used in this study has some limitations that should be taken into consideration when evaluating the results;

1. The study is limited to the studies included in the WoS database.
2. This study focused only on articles published in scientific journals, future studies may consider other sources such as books or proceedings.
3. This study focused only on articles published in English, so other languages can be considered in future studies.

### ABSTRACT

In the context of continuous development of scientific and technological progress and increasing requirements for product quality, the importance of the accuracy of measuring equipment increases. Metrological control of measuring instruments is a key element in ensuring the unity and reliability of measurements, which in turn affects the quality and safety of products, the efficiency of production processes and compliance with international standards. Despite the existing standards and methods of metrological control, many enterprises face difficulties in ensuring the accuracy and reliability of measuring instruments, which leads to an increase in production risks and a decrease in the competitiveness of products. The main objective of this study is to develop improved methods and approaches to metrological control aimed at increasing the accuracy and reliability of measuring instruments in various industries.

**Keywords:** Metrological Control, Measuring Instruments, Validation, Calibration, Measurement Uncertainty, Standardization, Measurement Accuracy

### INTRODUCTION

In the conditions of rapid development of automated systems for monitoring and control of technological processes, the problem of ensuring metrological reliability and stability of multi-parameter measurement systems is of particular importance. The accuracy of measurements critically affects the efficiency of operation of complex production complexes, especially in those industries where high reliability and safety requirements set the system tasks of multi-channel data acquisition and processing. In this context, resistance thermometers, characterized by high sensitivity, stability and long-term reliability, play a key role in ensuring the accuracy of temperature measurements. Modern data acquisition and processing devices equipped with six-channel systems are capable of simultaneously monitoring and analyzing readings from multiple resistance thermometers, which significantly increases the functionality of process monitoring and control. Integration of these devices with industrial communication protocols, such as RS-485, allows for highly efficient information transfer under conditions of unfavorable external influences, including high levels of electromagnetic interference and considerable distances. As a result, adaptive control and metrological validation of such systems become essential for optimizing the operation of industrial facilities and improving the accuracy of the data obtained, which in turn contributes to increasing production efficiency and reducing potential risks. In this regard, the key aspect of development and operation of multiparameter measurement systems is not only ensuring high accuracy of individual measurements, but also a comprehensive approach to metrological control at all stages of their operation [7]. This includes validation of measuring instruments taking into account multichannel and various dynamic influences that can affect the reliability of the collected data. Metrological validation of such systems is aimed at confirming compliance with the established requirements of accuracy, reliability and stability under operating conditions characterized by a high degree of uncertainty. In the conditions of constant development of production technologies and increasing requirements to the accuracy of measurements, the need for adaptive control of systems increases. Adaptive methods allow dynamically adjusting system settings depending on changes in external conditions and characteristics of measured parameters, which in turn reduces the probability of errors. Such approaches include automatic calibration of measuring instruments, as well as the use of predictive diagnostics and failure prediction methods based on collected data.

### Formulation of the problem

In our study we have taken a PT 100 resistance thermometer which is used for precision temperature measurement. In the alternative energy sector, it can improve the efficiency and reliability of renewable energy sources. These resistance thermometers are critical for monitoring temperature parameters in wind turbines, where temperature monitoring of generators and wind turbine bearings prevents overheating and associated failures. In solar energy, PT 100s are used to monitor the temperature of photovoltaic panels, which is important for maintaining their optimum operating temperature and increasing the solar-to-electricity conversion efficiency [11]. In geothermal power generation, where temperature control plays a key role in the operation of heat pumps and steam generators, PT 100s provide the precision needed to prevent corrosion and scaling, which can significantly reduce equipment efficiency and longevity. And in the offshore energy industry, accurate temperature measurements are essential to monitor the condition of hydraulic systems and prevent condensation in devices operating with temperature fluctuations (Fig.1).

**Figure 1. PT 100 resistance thermometer**

The main characteristic of the PT 100 is that at  $0^{\circ}\text{C}$  its resistance is  $100\ \text{Ohms}$ . Calculations related to metrological control usually include checking the calibration of the sensor. Assume that calibration is performed by comparing the resistance thermometer reading with that of a standard thermometer whose accuracy is known and validated [14]. This method of calibration establishes a correspondence between the measurements of our thermometer and those of a recognised standard [16].

Following this calibration process, various checks and analyses are carried out to assess the accuracy and reliability of the measurements. Let's start by checking at  $0^{\circ}\text{C}$  using an ice bath. One of the standard methods for checking the accuracy of zero temperature measurements.

- Measured resistance:  $100,5\ \text{Ohms}$
- Expected resistance:  $100\ \text{Ohms}$
- Error:  $100,5\ \text{Ohms} - 100\ \text{Ohms} = 0,5\ \text{Ohms}$

The test is then carried out at a different temperature, e.g.  $100^{\circ}\text{C}$ . To do this, a methodology is used that takes into account the typical resistance coefficient for a resistance thermometer, so that expected and measured values can be compared.

Suppose you have measured a resistance of  $120\ \text{Ohms}$  and want to find out the corresponding temperature.

- The typical resistance factor for PT 100 is  $0,385\ \text{Ohm} / ^{\circ}\text{C}$ .
- Expected resistance at  $100^{\circ}\text{C}$   $100\ \text{Ohms} + 100^{\circ}\text{C} \times 0,385\ \text{Ohm} / ^{\circ}\text{C} = 138,5\ \text{Ohms}$
- Measured resistance:  $139,0\ \text{Ohms}$
- Error:  $139,0\ \text{Ohms} - 138,5\ \text{Ohms} = 0,5\ \text{Ohms}$

The temperature is then calculated from the measured resistance, making it possible to determine the temperature value from the data.

$$T = T_0 - \alpha_0 \times T_0 \times (R / R_0)$$

where,  $T$  is the temperature,  $R$  is the measured resistance,  $R_0$  is the resistance at  $0^{\circ}\text{C}$  ( $100\ \text{Ohms}$  for PT 100), and  $\alpha$  is the resistance coefficient ( $0,385\ \text{Ohm} / ^{\circ}\text{C}$  for PT 100).

$$T = 0,385\ \text{Ohm} / ^{\circ}\text{C} \times 100\ \text{Ohms} / (120\ \text{Ohms} - 100\ \text{Ohms}) \approx 51,9^{\circ}\text{C}$$

Finally, the measurement uncertainty is evaluated by considering the uncertainties of the standard and resistance thermometer. This allows the overall uncertainty of the measurement to be determined and the validity of the measurement to be assessed.

If the error of the standard thermometer and the error of the PT 100 thermometer are known, the total uncertainty of the measurement can be estimated. For example, if the standard thermometer has an error of  $\pm 0.1^{\circ}\text{C}$  and the error of the PT100 is  $\pm 0.2^{\circ}\text{C}$  at a given temperature, the total uncertainty will be:

Combined standardized uncertainty:  $u_c = \sqrt{u_{std}^2 + u_{PT100}^2}$ , where  $u_{std}$  and PT100 uncertainties of the standard thermometer and PT100, respectively.

$$u_c = \sqrt{(0.1^{\circ}\text{C})^2 + (0.2^{\circ}\text{C})^2} \approx 0.22^{\circ}\text{C}$$

The entire process of calibration and measurement accuracy assessment is a consistent and systematic procedure to ensure reliable and accurate results.

These calculations are a basic part of metrological control, which helps to confirm that the thermometer readings comply with established standards and specifications [15]. The calibration procedure and subsequent calculation of the measurement uncertainty helps to ensure the accuracy and reliability of the entire temperature monitoring system. In industry, this is crucial for processes that are sensitive to temperature deviations. In metrological monitoring, it is also important to consider the long-term stability of the devices, which can deteriorate due to repeated thermal cycling, exposure to aggressive media or mechanical wear [18]. Regular calibrations are therefore necessary according to a plan set by standards or production requirements. In addition to routine calibration and verification, metrological control can include error analysis, determination of confidence intervals, plotting of resistance versus temperature and investigation of the influence of external conditions on measurements. This allows the detection of systematic errors and random deviations, as well as determining the quality and suitability of the measuring instrument for use under specific conditions [19].

To maximise the use of thermometer data, it is necessary to make use of modern data acquisition and processing technologies. The EL-4001 PWR and EL-4020RS modules, designed for integration into automation systems, will help us with this. (Fig.2)

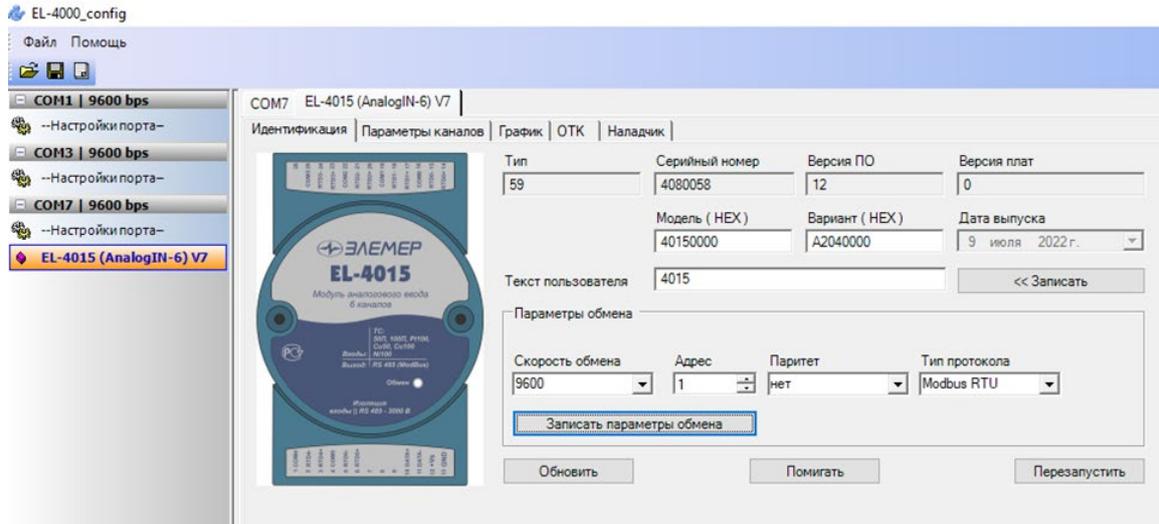

**Figure 2. Assembled temperature control system**

As we can see the temperature control system we have installed consists of three ELEMER series devices: EL-4001PWR, EL-4020RS and EL-4015. These units are connected by cables. Where EL-4001 PWR provides power for the connected devices, which is especially important in situations where long autonomous operation of the monitoring system is required [21]. Communication with the computer is provided by the EL-4020RS, which supports the RS485 protocol, ensuring stable data transmission. These modules, together with the EL-4015, are integrated on a DIN rail for easy integration and space saving. Using the RS485 protocol, the EL-4020RS links the rail-mounted units to a computer, enabling fast and reliable data transfer for further analysis and process control. By combining the PT100 resistance thermometer with the EL-4001 PWR and EL-4020RS modules,

combined with the EL-4015 and RS485 protocol, we create an efficient control and monitoring system that provides accuracy and reliability in the most demanding industrial environments.

The green power and communication LEDs on the EL-4015 are lit, indicating that the device is powered on and operational. The system is configured so that the EL-4001PWR power supply module provides power to the EL-4020RS and EL-4015. The EL-4020RS converts signals and enables communication between the computer via USB and the EL-4015 data acquisition module via RS-485. The EL-4015 is directly connected to sensors and collects temperature data for monitoring, control or analysis. The EL-4015 ODR performance verification process, including RS-485 - RS-232 - USB communication link verification using the EL-4000\_config software, provides confidence in the reliability of the system before commissioning or after maintenance. The EL-4000\_config software enables comprehensive diagnostics of device operation, including testing of data transmission protocols, which is critical for maintaining uninterrupted operation of the automation system (Fig. 3).

**Figure 3. Functionality check of EL-4015 ODR and RS-485 - RS-232 - USB communication channel using EL-4000\_config software**

As part of this procedure, EL-4000\_config performs automatic recognition of connected devices, checks their settings and parameters, and tests each communication channel for correct data transmission and reception. When faults or abnormalities are detected, the software can issue warnings or recommendations for corrective action, ensuring a quick response and minimising downtime [22]. Regular use of EL-4000\_config for routine checks helps to detect potential faults before they lead to a malfunction. This helps to ensure a high level of system availability and reduce the risk of unplanned downtime. This approach is part of a comprehensive strategy to prevent failures and improve the overall reliability of the automation infrastructure. The EL-4015 is configured to work with Modbus RTU, a standard protocol for industrial networks, and can communicate at 9600 baud, which is a common speed for many industrial applications. This device has 6 analogue inputs as the name EL-4015 AnalogIN-6 V7 implies, which indicates that several sensors can be connected simultaneously [23].

By extracting data and configurations from the EL-4000\_config programme, we move on to creating a more complex and powerful model in the Trace Mode programme. This transition is a natural evolution of the process, allowing for more efficient real-time plotting and tracking [25]. Trace Mode provides advanced data visualisation and analysis capabilities, allowing us to create highly interactive graphs that show system health and performance in real time. This includes plotting graphs based on data collected from the EL-4015 and other sources, as well as applying various algorithms and data processing techniques to analyse and predict trends.

The information exchange between the PT 100 resistance thermometer and the computer is carried out using the Modbus RTU protocol, for this purpose a project with a single node RTM\_0 is created in the Trace Mode tool environment. The project node contains the Channel\_1 group and the COM ports group. The COM-port configuration contains the parameters shown in (Fig. 4).

General (COM-port)

|                               |                                   |  |

Figure 4. Configuring the COM-port

The channel group contains a channel of the CALL type, with the argument Temperature, and an analogue communication channel using the Modbus RTU protocol [27]. The signal from the Pt 100 is fed into the communication channel and then to the computer screen by linking the argument of the temperature screen to this channel. This transition provides greater opportunities for monitoring and process control, allowing us to effectively adapt to changes and make informed decisions based on the data received (Fig. 5).

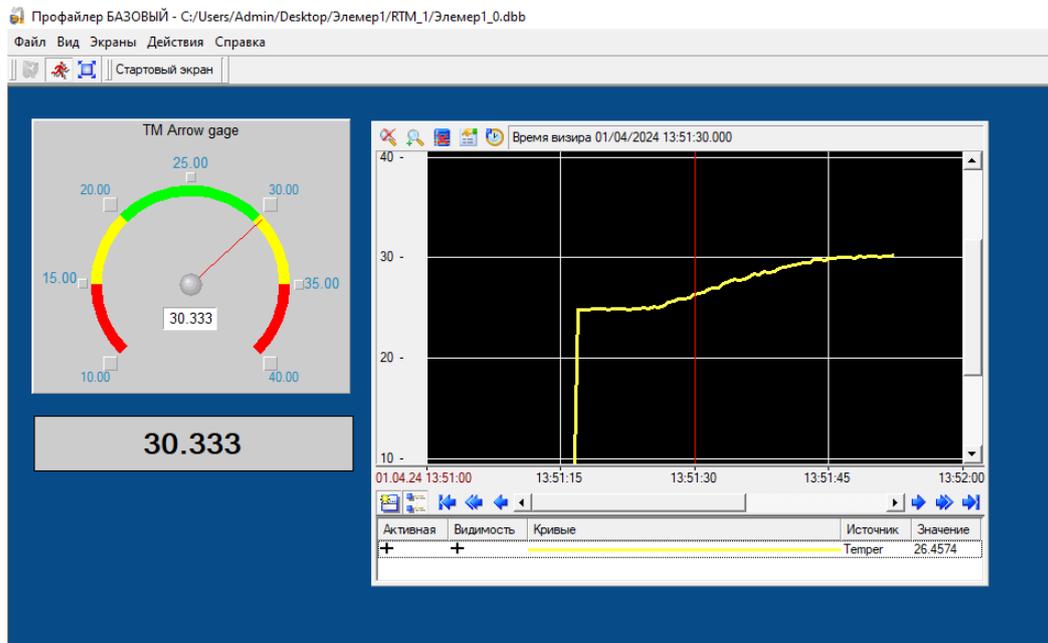

Figure 5. The result of Trace Mode project

The graph indicates that a sudden and rapid increase in temperature has recently occurred, which may indicate a change in process conditions or the occurrence of some anomaly. It is a line graph over time, where the abscissa axis represents time and the ordinate axis represents temperature [28]. The graph shows a sudden jump in temperature from a value of about 20 degrees Celsius to over 25 degrees Celsius, after which the temperature stabilises at about 26.4574 degrees Celsius. The graph demonstrates the ability of the system to capture temperature changes with high accuracy and stability. The stabilisation of the temperature after a sudden spike indicates the reliability of the system and its ability to respond adequately to changes in the process. This quality is critical in the alternative energy industry, where precise control of temperature processes can affect energy conversion efficiency, equipment longevity and overall performance.

#### Solution of the problem

The presented data also show a high adaptability of the system to changes, which is necessary for power systems utilizing renewable energy sources. Such systems need to be flexible and capable of rapid adaptation because renewable energy sources such as solar or wind power are often subject to variable conditions. The ability to record and analyze temperature data over the long term is important for predicting the behavior of an alternative

energy system. Analyzing the collected data can help optimize equipment performance and maintenance planning, which is important for increasing overall efficiency and reducing costs [29]. Advanced monitoring systems, such as the one presented, are driving innovation in the alternative energy sector, enabling the development of new algorithms and control methods to increase energy conversion efficiency and infrastructure reliability. Accurate and reliable monitoring equipment plays a key role in the sustainable development of alternative energy. By providing data for analysis and control, such systems help minimize waste, increase efficiency and maintain high environmental safety standards. Stabilization of readings after a spike may indicate the restoration of the controlled process to a normal state or compensatory mechanisms of the control system [30]. Metrological control implies regular verification and calibration of measuring devices, so it is necessary to make sure that all measuring instruments undergo such procedures in accordance with the established schedules. The circle indicator and line graph should be checked for compliance with international standards and norms, which will ensure their reliability and applicability for further use in precision measurements. Stabilization of readings after spikes, as mentioned earlier, may indicate a return to normal conditions, but without a metrological inspection it is difficult to state definitively that deviations in readings were caused solely by external factors and not by internal malfunctions or calibration drift.

Procedures for regular verification and calibration of measuring devices should be carried out in strict compliance with strict regulations, which includes verification of such parameters as sensitivity, uncertainty and stability. As a result of the metrological inspection, it was found that the error of measuring devices is within the permissible values, which confirms their suitability for further operation. However, to improve the accuracy of process control, additional measures were proposed to improve calibration and minimize the influence of external factors such as temperature fluctuations and electromagnetic interference [30]. The data presented in the form of pie indicators and line graphs have been validated against international standards including ISO and GOST. This ensures that the collected results can be used for analysis and decision making in process control systems. Additional analysis of the graphs showed that after stabilization there is a decrease in the amplitude of fluctuations of readings, which indicates high accuracy and reliability of the control system in the conditions of industrial facilities.

## RESULTS

With different types of RS-232, RS-485, USB communication ports, the system is a versatile solution capable of integrating into various industrial networks. This integration flexibility is important for modernizing existing production lines or for deploying new processes that require precise temperature control. To ensure metrological reliability, it is important that each component of the system is certified and complies with local and international measurement standards. Each resistance thermometer connected to the system should be regularly calibrated using standard samples or certified calibration devices.

When working with industrial monitoring and data acquisition systems, it is critical to pay attention to information protection and data security. It must be ensured that data transmission between devices and PCs is secure and not subject to the risk of unauthorized access or interference. Adhering to these principles will increase the efficiency of the temperature control system, ensuring that it operates reliably and smoothly in accordance with the requirements of metrological control. When conducting studies and checks on the security of data transmission in multi-parameter control systems, it was found that the key factor affecting the reliability and accuracy of the system is protection from unauthorized access and external interference. For this purpose, additional mechanisms of data encryption were implemented during their transmission via RS-485 protocol, which allowed to significantly minimize the probability of unauthorized interception of information. During testing of the system under conditions of high levels of electromagnetic interference, a stable data flow without losses was recorded, which confirms the effectiveness of the applied protective mechanisms. Monitoring of the system performance showed that the implementation of adaptive algorithms for data correction in case of interference was also successful. As a result of implementation of such mechanisms it was possible to prevent the occurrence of significant errors in measurements during data transmission over long distances and in difficult production conditions. The system has demonstrated high resistance to external influences, as evidenced by the absence of significant deviations in readings and reliable synchronization between devices.

Regular monitoring of data transmission channels showed that the system security level meets the established international standards of information security for industrial facilities. In addition, mechanisms were implemented to periodically check the integrity of transmitted data using checksum algorithms and monitoring for possible failures.

The results of the study showed that the implementation of data protection and security measures at all stages of the industrial control system significantly improved its performance and reliability. Compliance with the requirements of metrological control, coupled with advanced information protection technologies, ensured stable and accurate operation of the system in real operating conditions.

## Acknowledgments

Analyzing the collected data can help optimize equipment performance and maintenance planning, which is important for increasing overall efficiency and reducing costs.

# NAVIGATING ACCOUNTABILITY: A HERMENEUTIC TRANSCENDENTAL STUDY ON TEACHERS' RESPONSIBILITY IN INTEGRATING SOCIAL AND EMOTIONAL LEARNING IN MATHEMATICS EDUCATION

Dr. Farina M. SAMI  
fsami@liberty.edu

## ABSTRACT

This study explores the dynamics of accountability and responsibility among mathematics educators as they integrate Social and Emotional Learning (SEL) into their teaching practices. Utilizing a hermeneutic transcendental approach, the research examines the lived experiences of teachers, their challenges, and the strategies they employ to balance academic rigor with SEL objectives. This case study captures the voices of educators who are at the forefront of this integration. It examines their pedagogical adjustments, collaborative efforts with colleagues and administrators, and the reflective practices they engage in to enhance their teaching. The research also sheds light on the systemic barriers that hinder the seamless integration of SEL, such as limited resources, lack of training, and lack of accountability measures. The study focuses on teacher connectedness, exploring how strong relationships with students and peers influence the successful integration of SEL. The study highlights how connectedness fosters a supportive and empathetic classroom environment, enhances student engagement, and promotes students' sense of belonging and well-being. Ultimately, this study advocates for a more comprehensive approach to teacher accountability, one that recognizes the multifaceted role of educators in shaping both the educational and emotional needs of their students. This research aims to inform policymakers, educational leaders, and teacher training programs about the critical need for balanced and holistic educational practices, by providing insights into the practical realities of SEL integration in mathematics education, t.

## INTRODUCTION

Integrating social and emotional learning (SEL) into math curriculums is increasingly critical in fostering student success. SEL encompasses essential skills such as emotional regulation, empathy, relationship-building, and responsible decision-making, which are pivotal for students' overall development and academic achievement. Despite its recognized importance, the integration of SEL into mathematics education remains a challenging endeavor, often hindered by a lack of accountability and increasing behavioral issues among students. Teachers who incorporate SEL competencies into their academic curriculum have been shown to have increased student achievement and engagement. However, there is not much research on how to create or ensure teacher ownership.

## Research Problem And Purpose

The integration of Social-Emotional Learning (SEL) in mathematics classrooms faces significant challenges due to a lack of responsibility and accountability among educators. Many teachers report insufficient training and professional development opportunities on how to effectively incorporate SEL into their mathematics instruction (Sami, 2024). Consequently, some educators need to take ownership of the SEL components within their academic teaching. While some teachers independently develop SEL supports within their classrooms, they often feel they need more support to integrate these competencies effectively. Even before the pandemic, teachers have consistently expressed a need for Support and training in classroom management and positive behavior interventions (Franks, 2020; Pignatiello, 2020). There are currently no formal mechanisms to hold teachers accountable for incorporating SEL into their teaching practices (Hwa, 2022; Skedsmo & Herber, 2019). Unlike academic performance, which is frequently assessed through standardized tests and evaluations, SEL integration is rarely monitored or evaluated in a way that can be quantified (Berg et al., 2021; Martinson et al., 2020). This lack of accountability can result in inconsistent and non-committal SEL practices among educators.

This study aims to investigate teacher responsibility and accountability in integrating Social and Emotional Learning (SEL) into mathematics education. The hermeneutic phenomenological research case study aims to explore teacher experiences, interpret the potential impact teachers have when they take responsibility for SEL integration within the classroom, and highlight the importance and effectiveness of teacher connectedness in relation to teacher ownership.

## Background

Historically, the issue of student behavior or the importance of character education stemmed from an educational system that prioritized cognitive development at the expense of students' holistic well-being (Demetriou et al., 2022; Govorova et al., 2020). The approach to putting cognitive development ahead of all else in education is deeply rooted

in traditional educational structures that emphasize acquiring knowledge and intellectual skills while often neglecting the social and emotional dimensions of learning. As a result, educational policies and practices were primarily designed to enhance academic performance, with little consideration for students' emotional and social needs (Ye & Shih, 2021; Tyler, 1919). This narrow focus on cognitive development created an environment where the holistic well-being of students was overlooked, leading to gaps in their overall development and preparedness for real-world challenges (Borowiec et al., 2021; Norozi, 2023; Stodden et al., 2023;).

Socially, schools and communities are struggling with teachers managing student behaviors due to student emotional unrest and student trauma that COVID-19 brought to light (Herrera et al., 2022; Stratford et al., 2020). The period of the COVID–heightened levels of stress marked 19 pandemic a noticeable decline in overall mental health, and a surge in negative behaviors among students ( Hanetz-Gamliel et al., 2021; Phelps & Sperry, 2020). These changes have been attributed to the disruptions caused by the pandemic, including prolonged isolation, uncertainty, and the shift to remote learning environments (Cipriano et al., 2023; McCabe, 2024). The compounded effects of these stressors have left many students struggling to cope, highlighting the urgent need for enhanced mental health support and interventions in educational settings (Hanetz-Gamliel et al., 2021; Phelps & Sperry, 2020). Teachers cannot take responsibility for student behaviors due to a lack of training and understanding of what character education or social and emotional support is for students (Kurniawan et al., 2022; Martinez & Partin, 2023). Something that has been proven to make a difference in teacher connectedness is the degree to which students feel personally accepted, valued, involved, and supported by their teachers (Garcia-Moya et al., 2021; Mohd Khatib et al., 2022).

Teacher connectedness theory serves as the foundational theoretical framework for this case study on teacher responsibility in integrating social and emotional learning within mathematical education. Teacher connectedness theory emphasizes the importance of strong, positive relationships between teachers and students in fostering a supportive and effective learning environment (Maloney & Matthews, 2020; Tranchina & Zambak, 2021). Grounded in the foundation that when students feel connected to their teachers, they are more likely to engage in the learning process and exhibit positive behaviors, this theory has the potential to help students achieve academic success (Arslan, 2021; Ferreira et al., 2020). An important health asset during the adolescent years is the degree of connectedness students have to their school and their teachers, which positively impacts educational outcomes (Brookings, 2022; CDC, 2021; Springer, 2021) Leaning on several educational theories such as attachment theory, self-determination theory, and social Support models by using teacher connectedness theory, supports both the academic and social-emotional development of students while trying to create an inclusive environment.

### **Attachment Theory**

Attachment theory, as proposed by Bowlby (1969), poses that students' internal working models of their relationships with teachers significantly influence their perceptions of peer interactions, their capacity to trust others, and their overall social competence within their peer groups (Van Rosmalen et al., 2016). Within a school setting, attachment relationships are established throughout the educational process (Hicks & Korbel, 2024; Forslund & Duschinsky, 2021). The teacher-student relationship acts as a crucial mediator in this context. A positive and supportive relationship with teachers can help students navigate conflicts more effectively, promoting healthier coping mechanisms and emotional regulation (Main & Ellerbrock, 2023; Robledo et al., 2022). Teachers who provide a secure and nurturing environment can help students internalize positive behaviors and attitudes, fostering resilience and social competence. The degree of conflict experienced during this period influences students' externalization and internalization processes, which are mediated by the teacher-student relationship (Ahmadi et al., 2023; Guay, 2022).

### **Self- Determination Theory**

Research conducted by Edward Deci and Richard Ryan (2021) highlights the intrinsic human desire for growth and fulfillment. Their self-determination theory (SDT) elucidates how social environments can either facilitate or impede an individual's motivation to achieve success (Koestner & Holding, 2021; Ryan & Deci, 2024; Vallerand, 2021). According to SDT, fulfilling the basic psychological needs for autonomy, competence, and relatedness is essential for fostering intrinsic motivation (Koestner & Holding, 2021; Vallerand, 2021). The concept of relatedness refers to the need to form close social relationships and was initially defined as the desire to feel a sense of belonging and connection with others (Roza et al., 2012; Saxer et al., 2024). This fundamental human need is crucial for emotional well-being and personal development (Mosewich et al., 2022; Perkins et al., 2021; Saxer et al., 2024). When individuals experience a sense of relatedness are prone to feeling valued and supported, within their social circles (Schmidt et al., 2021; Van Petegem et al., 2023). This sense of connection can enhance motivation, engagement, and overall satisfaction in various aspects of life, including educational and professional settings (Núñez-Regueiro et al., 2024). Understanding and fostering relatedness can lead to more cohesive and supportive communities, ultimately

contributing to the holistic development of individuals (Collie et al., 2020; Jiménez et al., 2021). Furthermore, adverse classroom behaviors significantly affect educators and students, underscoring the importance of addressing these issues to create a conducive learning environment (Chang & Taxer, 2021; Glock & Pit-ten Cate, 2021; Granger et al., 2021).

### **Social Support Models**

Social support models for education refer to frameworks that describe how social networks and relationships provide emotional, informational, and practical assistance to individuals (Cooper et al., 2024; Lewis & Foye, 2022). These models emphasize the importance of supportive interactions in promoting mental health, well-being, and resilience (Gillard, 2019; De Beer et al., 2022). By building strong, supportive relationships with students, teachers can significantly impact their motivation, engagement, and overall success (Tineo et al., 2024; Wachs et al., 2022). This Support can manifest in various forms, such as providing encouragement, offering constructive feedback, and being available to listen to students' concerns (Fullerton et al., 2021; Grapin & Sulkowski, 2022). Social Support can come from various sources, including family, friends, teachers, and peers, and is essential to help people cope with stress and challenges (Cooper et al., 2024; Heberle et al., 2021). By leveraging attachment theory and self-determination theories, teachers are committed to creating an inclusive learning environment that supports both math goals and the social-emotional development of their students.

### **Math Anxiety**

Math anxiety is a widespread phenomenon characterized by a profound sense of dread or apprehension when individuals face mathematical tasks, often leading to diminished performance and obstructed learning trajectories (Cheung et al., 2023; Szczygiel, 2020). This psychological barrier can significantly impede one's ability to engage with mathematical concepts, creating an environment where the fear of mathematical challenges overshadows the potential for academic achievement. However, math anxiety is not insurmountable. Research by Aldrup et al. (2020) and Samuel & Warner (2021) highlights effective strategies to mitigate its adverse effects. A critical approach involves identifying and understanding the specific triggers that evoke anxiety in mathematical contexts. By pinpointing these triggers, individuals can proactively address anxiety issues while creating and maintaining positive relationships and creating mathematical concepts.

### **Social And Emotional Learning**

Teachers need the knowledge and tools to create a loving atmosphere where students are valued, understood, and supported in their emotional growth and social interactions (Orgel, 2022; Sears et al., 2022). Empowered teachers who navigate the complex dynamics of the modern classroom foster a more conducive learning environment (Filderman et al., 2023; Von der Embse et al., 2020). Teachers who implement SEL competencies within the classroom remain attuned to students' evolving needs and challenges, adapting their teaching approaches accordingly. The benefits of this training extend beyond immediate student impact, encompassing a transformative effect on educators themselves. Supporting teachers with strategies to embed in SEL training, schools are empowered to deftly navigate the intricate and dynamic landscape of the modern classroom (Filderman et al., 2023; Von der Embse et al., 2020). This empowerment translates into a multifaceted enhancement of the teaching profession, influencing instructional methodologies and the overall classroom atmosphere. Thus, investing in robust SEL training for teachers is a fundamental step toward enhancing students' overall educational experience and well-being (Orgel, 2022; Sears et al., 2022).

### **Gaps In Literature**

There needs to be more empirical data focus on mathematics teachers' perceptions of integrating SEL. Most existing research tends to be broader, encompassing general teacher attitudes toward SEL without delving into subject-specific nuances.

There is a gap in understanding the effectiveness of professional development programs aimed at equipping mathematics teachers with resources on integrating SEL into their teaching practices. How these programs impact teachers' perceptions and accountability remains underexplored.

Limited research connects mathematics teachers' integration of SEL with specific student outcomes in mathematics. Studies often focus on general academic or behavioral outcomes without isolating the impact on mathematics achievement and engagement.

## Research Questions

The central research question was: How do mathematics teachers perceive their responsibility and accountability in integrating SEL into their teaching practices?

## RESEARCH METHODOLOGY

A research design was a single-case study that required a group of participants with specific characteristics. The participants were novice and veteran teachers with three to twenty-five years of teaching experience from urban and suburban school districts. All teachers were math teachers teaching math to students in grades three through eight; however, the study did not take place on an actual site as everything was conducted via the computer. Researchers collected qualitative data from the open-ended interview questions, open-ended open-ended focus group questions, and a written prompt after the focus group experience. The sample was selected based on their willingness to participate in the study and their ability to provide access to students who meet the study's criteria. Purposive sampling was used when selecting individuals for this study. Purposeful sampling entails intentionally selecting individuals with information relevant to the research problem (Bassot, 2022). The recruitment process, spanning approximately two months, involved reaching out to superintendents and school principals to gauge a teacher's interest in joining the study and reaching out to participants. Recruitment letters were sent within school districts and posted on online social media.

While the original data collection was in a transcendental phenomenology study that consisted of interviews, focus groups, and a written prompt (Aguas, 2022; Meihami & Rashidi, 2022), this study included a hermeneutic element. The validity of the findings was reinforced by triangulating the data, which involved the use of multiple sources to obtain rich experiential descriptions from participants. This study involved a reflective interpretation of texts or experiences to uncover deeper meanings (Dangal & Joshi, 2020). The study was completed by the researcher engaging in interpreting and reinterpreting data to reveal the phenomenon's essence. Interviews and focus group questions were analyzed and grouped based on the interpretation of teacher ownership as a strong result of interpreting data along with the answers from written prompts.

## FINDINGS

This hermeneutic phenomenological study aimed to look at the lived experiences of elementary and middle school math teachers with social and emotional learning (SEL) and math achievement teacher connectedness through a lens of teacher connectedness. Data was collected through interviews, focus groups, and written prompts. The analysis involved organizing and interpreting the data through a hermeneutic lens, emphasizing the contextual and historical backgrounds of the participants. The researcher engaged in a cyclical process of interpretation, known as the hermeneutic circle, to uncover deeper meanings and insights (Dangal & Joshi, 2020). Themes were identified through an iterative review of transcripts, considering the interplay between the parts and the whole of the data. The researcher then examined the underlying structures and contexts that influenced participants' thoughts and emotions, providing a rich, contextual understanding of their experiences.

Multiple themes emerged from this study, highlighting critical aspects of the educational environment. School responsibility was a prominent theme, emphasizing the role of schools in fostering a supportive and accountable atmosphere for both teachers and students. Emotional resilience emerged as another critical theme, underscoring the importance of helping students and teachers develop ways to deal with stress and anxiety. The theme of SEL education accountability focused on the need for schools to ensure that social and emotional learning (SEL) programs are effectively implemented and evaluated. Finally, effective communication was identified as essential for building solid relationships and facilitating collaboration among students, teachers, and administrators. These themes collectively illustrate the multifaceted nature of educational experiences and the interconnectedness of various factors in ensuring a positive learning community and environment.

## School Responsibility

School responsibility involves being accountable for students' outcomes and ensuring that the administration's actions are reliable and trustworthy. The codes of administration support, school support, leadership, and teacher self-efficacy appeared 39 times within the documents during the data analyzation process. Combined with the codes of student engagement, student responsibility, and student ownership, which fall under the school's theme of taking responsibility for student learning and behavior, teachers felt strongly that this contributed to the connection they create with students.

Beth stated, "I am an authority figure and in a position where I actually have to tell if something too off base is going on in the classroom and make adjustments. I make sure I am attentive with students, you know, so just sitting and

listening. I have to create a sense of belonging and like connection and all of that, you know, we have had to have some come to Jesus' moments because of teasing and bullying, and all of that in the classroom needs to be addressed. I have had actually to take action, you know." Beth's statement conveys a sense of responsibility and vigilance. She feels the weight of her role as an authority figure, emphasizing the importance of being attentive, creating a sense of belonging, and proactively addressing issues like teasing and bullying.

Within the study, Eric, Beth Isabella, Sarah, Rebecca, and Emma displayed the common thought of the importance of being proactive and assertive in their roles as math teachers. These teachers had a strong sense of self and a strong sense of what needed to be done to support students. A strong sense of self-efficacy and a responsibility to empower students was evident.

### **Emotional Resilience**

Emotional resilience seen in this study as the ability to adapt to stressful situations and effectively manage and recover from emotional challenges is a strong theme in the importance of teacher connectedness and teachers taking responsibility for the SEL education of their students. Involves the codes of sense of belonging, perseverance, compassion, empathy, connection, classroom community building, emotional intelligence, emotional regulation, math self-confidence, positive classroom environment, real-life connection, sense of community, student collaboration, student motive, and student trauma, this theme held over 421 codes, the strongest of which being empathy, emotional intelligence of students and connection. According to teachers, the quality of having emotional intelligence allows students to bounce back and continue growing despite difficulties.

Isabella stated, "But if I were to select one quality students are getting better at, I would say the responsible choices. I think that they are aware of themselves and each other, and I think it's just kind of gauging when to do what, how, and what would be best for whatever the circumstances are at that time. I think they are hyperaware of each other. They love to check each other. They gotta check themselves, and that is one of the things I mean they, I mean they give wonderful feedback, and I applaud them for it." Isabella felt that the students who could regulate themselves or learned to regulate their own emotions were more successful in class.

Within the study, Janet, Olivia, and Linda emphasize the importance of creating a supportive and inclusive classroom environment. The participants conveyed that focusing on rewarding positive behavior, addressing and normalizing struggles, and fostering a sense of belonging and family among students strengthens the sense of community within the classroom.

### **Sel Education Responsibility**

SEL Education's responsibility within the study is when teachers see the importance of implementing an SEL program within the class and take steps to ensure the program's success. Within the code of trauma training, teaching kindness, SEL training, positive behavior incentives, and adjusting based on student behaviors, 112 instances were cited within the document. Including codes of adjusting classroom norms and other cooperative strategies, teachers felt responsibility had to be taken to support SEL learning in the classroom.

Fran spoke on the importance of SEL education responsibility as a teacher but also from Support from admin, "I feel like my we have a brand new principal this year, and she is awesome, and she what she did was at the beginning of the year, she surveyed all the staff and said what do you feel like your biggest struggle is and what would help you the most? And then she has sought other professional development just specifically for what we said. They also gave us specific training on the things that we said were hardest for us. So I am blessed in that area because she has been doing such a good job really trying to give us Support. However, I agree with what Emma said: " unless you are gonna take it and run with it and make it your own, it is just an hour that you sat there and listened to professionals tell you how to do it." Fran spoke about how to take responsibility for emotional and social care in your classroom. Ava, Sofia, and Mona emphasized the need to use evidence, whether through data, attentiveness, or effective lesson planning, to make informed decisions and positively impact their educational environments.

### **Effective Communication**

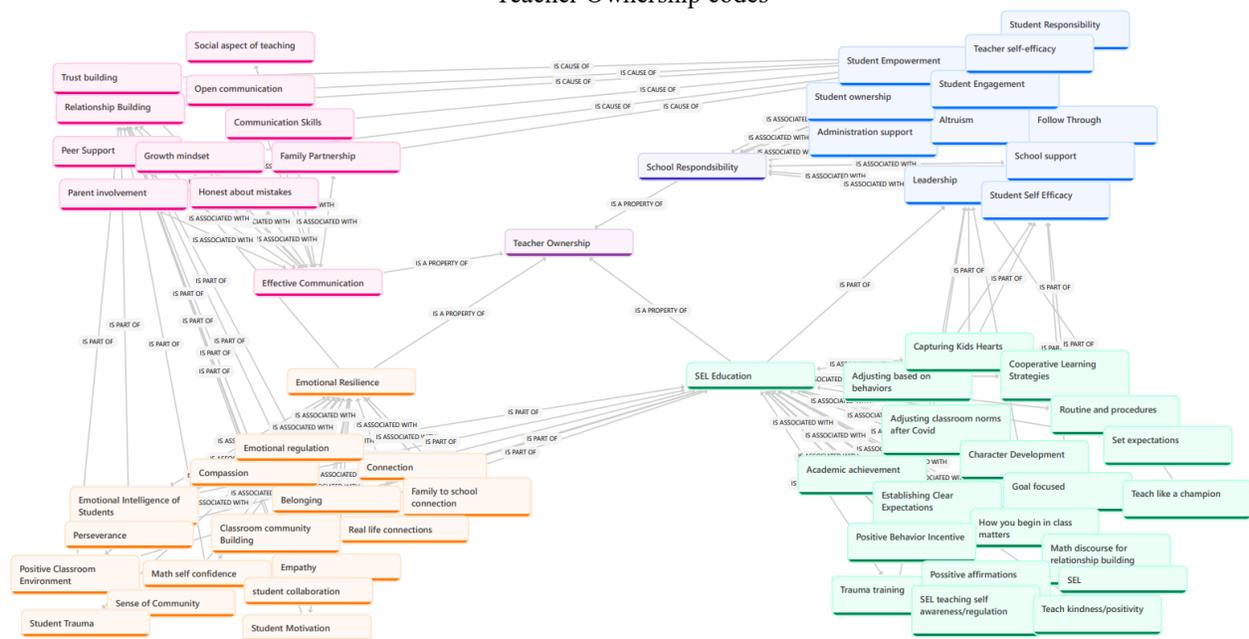

According to participant responses, effective communication can be seen as the process of exchanging information, ideas, thoughts, and feelings in a way that is received well and understood by all parties involved. Falling under the codes heaviest in relation building, growth mindset, and open communication with 347 codes, teachers felt that effective communication was vital in teacher connectedness when implementing a strong SEL program. Codes under this umbrella also included communication skills, family partnership, honesty in making mistakes, parent involvement, trust building, and social aspects of teaching.

Jennifer expressed the importance of setting high expectations and communicating effectively with students to promote equity and increase growth; she stated, "I don't expect anything from my students that I would not expect

from myself. Umm. If they need to move, I let them move, but they know the parameters. When I was in a first-grade classroom, I taped off a rectangle in the back of the room, and it was their wiggle spot. I do not get angry if they are angry. Typically, I do not. You know, sometimes I'm having big feelings that day too. I am, but no, I just let them be human because they have to learn somewhere, and if they do not know, they are obviously missing something.”

Open communication was highlighted by 17 of the 18 participants in the study. It was frequently mentioned in the context of peer-to-peer interactions, teacher-to-student interactions, and teacher-to-parent interactions. Participants who appeared to be successful in their classrooms consistently referenced the importance of transparency and kindness in their communication. They emphasized that these qualities are essential for building solid relationships within the school and classroom, fostering a supportive and collaborative environment that benefits both students and educators. Additionally, open communication was seen as a critical factor in addressing and resolving conflicts effectively, ensuring a positive and inclusive learning atmosphere.

**Figure 1**  
Teacher Ownership codes

**CONCLUSION**

The central research question of this study explored how mathematics teachers perceive their responsibility and accountability in embedding SEL teaching practices within the curriculum. The findings revealed that an overwhelming number of teachers showed the importance of teacher ownership as the decisive factor in successfully incorporating SEL. Although teachers did not state outright that they see teacher ownership as a deciding factor, based on their responses and the interpretation of their answers, this strongly felt unknown factor makes teachers successful. Teachers expressed their sense of ownership over their teaching methods and the SEL curriculum, significantly influencing their commitment to and effectiveness in integrating SEL. This sense of ownership was shown by their personal investment in students' holistic development, their confidence in implementing SEL strategies, making up their own SEL strategies to support students, and their belief in the positive impact of SEL on students' academic and emotional growth. The responses highlighted that when teachers feel a strong sense of responsibility and accountability, they are more likely to take proactive steps to embed SEL into their daily teaching practices, thereby fostering a supportive and emotionally resilient classroom environment.

## OPPORTUNITIES FOR USING ENERGY GENERATED FROM WASTE IN AZERBAIJAN

**Natavan NAMAZOVA**

Azerbaijan Technical University  
natavan.namazova@aztu.edu.az

### ABSTRACT

This study explores the opportunities for utilizing energy derived from waste in Azerbaijan, focusing on both ecological and economic benefits. By examining the existing technologies and infrastructure, particularly the Balakhani Waste-to-Energy Plant, the paper highlights the potential of waste-to-energy (WtE) solutions to support Azerbaijan's sustainable development goals. The research underscores the importance of renewable energy sources, such as energy from waste, in reducing environmental impact and meeting energy demands. Technologies such as incineration, biomethane production, and pyrolysis are discussed, with an emphasis on their potential applications in waste management and energy generation. The findings indicate that the expansion of WtE projects in Azerbaijan could significantly reduce waste volumes, create new job opportunities, and provide an additional energy source to complement the country's existing energy resources. However, further technological advancements and public awareness initiatives are required to fully harness the potential of energy production from waste.

**Keywords:** Waste-to-Energy (WtE), Azerbaijan, sustainable development, incineration technology, biomethane production, pyrolysis, renewable energy, waste management, energy generation, Balakhani Waste-to-Energy Plant

### INTRODUCTION

The utilization of energy derived from waste in Azerbaijan has significant potential both ecologically and economically. By implementing new technologies and expanding infrastructure in this area, it is possible to introduce innovative solutions to the country's energy sector. The utilization of energy generated from waste plays a crucial role in Azerbaijan's achievement of its sustainable development goals. Since energy from waste is considered a renewable energy source, it provides new opportunities for environmental protection and energy production. One of the technologies for obtaining energy from waste is Incineration Technology, where energy can be generated by burning solid household waste. Through the incineration process, waste is burned to produce thermal energy, which is then converted into electrical energy. Energy production from waste incineration is already being implemented in Azerbaijan. The country's largest waste processing facility, the Balakhani Waste-to-Energy Plant, has been operating since 2012, processing approximately 500,000 tons of solid waste annually. The plant generates 231 million kilowatt-hours of electricity, which is enough to meet the energy needs of approximately 100,000 households. The Balakhani plant burns approximately 2,500 tons of waste daily, resulting in the production of 230-240 million kilowatt-hours of electricity annually. This figure accounts for about 0.5% of Azerbaijan's total energy consumption.

**Biomethane Production** – Organic waste can be broken down in anaerobic conditions to produce biomethane and biogas. This technology involves the use of agricultural waste and other organic materials. Through Pyrolysis and Gasification processes, waste is decomposed at high temperatures, resulting in gaseous energy carriers. Through pyrolysis technology, it is possible to convert plastic and other synthetic waste into energy. Although Azerbaijan has not yet embarked on large-scale pyrolysis projects, various pilot projects are planned in this area.

The potential for energy production through waste incineration or biogas, especially in large cities in Azerbaijan, is significant. Thermal energy obtained from waste can be effectively used for heating buildings and industrial facilities. In the transport sector, biogas alternatives like biomethane can be used as fuel for vehicles. This can also support the expansion of cleaner transportation options from an environmental perspective.

### Materials and Methods

Currently, the Balakhani Waste-to-Energy Plant operates in Azerbaijan with the purpose of generating energy from waste. By incinerating solid waste, the plant produces electricity, serving as a model for future projects in the country.

Each year, Azerbaijan generates approximately 2 million tons of solid household waste. Only 60% of this waste is sent to landfills, while the remainder remains unprocessed. The production of energy from waste can significantly reduce the volume of waste. By processing 500,000 tons of waste annually, the Balakhani plant reduces the volume of waste sent to landfills by 25%.

Statistical tables that reflect the usage of energy derived from waste (Waste-to-Energy - WtE) in Azerbaijan are typically based on the amount of waste, renewable energy sources, and technological advancements in this field. In recent years, there has been a notable increase in recycling and the use of waste for energy production in Azerbaijan. The following tables are based on general data.

**Table 1: Waste Volume and Energy Production by Year in Azerbaijan**

| Year | Waste Volume (tons) | Energy from Waste (MWh) | Technology Used          |
|------|---------------------|-------------------------|--------------------------|
| 2019 | 5,500,000           | 120,000                 | Incineration and Biomass |
| 2020 | 5,800,000           | 135,000                 | Incineration and Biomass |
| 2021 | 6,000,000           | 150,000                 | Incineration and Biomass |
| 2022 | 6,300,000           | 165,000                 | Incineration and Biomass |
| 2023 | 6,600,000           | 180,000                 | Incineration and Biomass |
| 2019 | 5,500,000           | 120,000                 | Incineration and Biomass |

**Table 2: Energy Production by Type of Waste (2023)**

| Type of Waste         | Energy Production (MWh) | Total Share (%) |
|-----------------------|-------------------------|-----------------|
| Solid Household Waste | 110,000                 | 61%             |
| Industrial Waste      | 40,000                  | 22%             |
| Agricultural Waste    | 30,000                  | 17%             |

**Table 3: Major Waste-to-Energy Facilities in Azerbaijan**

| Facility Name                   | Annual Energy Production (MWh) | Technology Used                |
|---------------------------------|--------------------------------|--------------------------------|
| Baku Waste Incineration Plant   | 150,000                        | Incineration Technology        |
| Sumgait Waste Processing Center | 30,000                         | Biomass and Methane Production |
| Ganja Waste Processing Plant    | 10,000                         | Small-scale Biomass            |

## CONCLUSION

The field of energy production from waste is one of the priority areas for Azerbaijan and holds a significant position among renewable energy sources. The research has yielded the following conclusions:

- The recycling and energy production sectors have the potential to create new jobs.
- Although Azerbaijan is rich in its energy resources, energy from waste can provide an additional source to meet domestic demand.
- High-level technology and infrastructure are required for energy production from waste. Attracting investments in this area is a key condition.
- Public awareness efforts need to be expanded to promote recycling and energy production from waste. It is essential for people to sort waste and support recycling initiatives.

## **PDCA CYCLE APPLIED IN THE ACCREDITATION PROGRAMS OF TURKISH HIGHER EDUCATION INSTITUTIONS ON THE AXIS OF PUBLIC RELATIONS AND MARKETING STRATEGIES REVIEW**

**Prof. Dr. Mine DEMIRTAS**

Istanbul Beykent University-Faculty of Communication  
minedemirtas@beykent.edu.tr

**Dr. Mihriban AKYOL AKIN**

Istanbul Beykent University-Faculty of Communication  
mihribanakin@beykent.edu.tr

### **SUMMARY**

Today, when higher education services have become an area of intense competition, universities have begun to attach importance to the quality factor in order to maintain their superiority, success and therefore recognition, image and reputation. Only in this way is it possible to become a brand university and gain reputation at the national or international level. All universities, especially foundation universities, carry out intensive promotional activities in order to increase their awareness in the public, create their corporate identity and corporate image, and determine their mission and vision, and they make extensive use of marketing and public relations strategies for this purpose. In this context, quality management studies, which serve the purpose of creating quality step by step in all applications through planned activities and systematic studies and thus creating trust in all stakeholders, are among the practices that universities care about. It is an external evaluation method that enables the evaluation of quality assurance, education-training, research-development, social contribution and management system processes in higher education institutions within the scope of the PDCA cycle. Corporate accreditation programs began to be implemented for the first time in 2020.

In this study, the Shewhart learning-improvement cycle or the Deming cycle (Plan-Do-Check-Act), which is an integrated practice with marketing and public relations strategies and combines management thought with statistical analysis, helps universities realize their strategic plans and goals. In the context of the PDCA cycle, which is an effective strategy in establishing the quality management system, 5 Universities that applied for accreditation in 2022 and received full accreditation for 5 years were examined with the thematic analysis method.

**Keywords:** Public relations strategies, Marketing strategies, PDCA cycle, Quality management, Quality Assurance System, Accreditation

### **INTRODUCTION**

In different countries around the world, supply-demand imbalances in higher education systems are tried to be balanced with communication and information opportunities, student mobility and distance education programs. The fact that many foreign universities have come to Turkey for promotional purposes in recent years, where the demand for higher education is much higher than the higher education supply, and have tried to attract student candidates is a clear indication of the struggle for survival of universities due to the lack of demand in those countries ( Kulaç , Ataseven, Gürgeç, 2011, Demirtas , 2012). Nowadays, there is intense competition in higher education, and universities have begun to attach importance to the quality factor in order to be superior and achieve success. As a result, it will be possible for them to maintain their recognition, image and reputation.

In the globalizing world, as in every field, it is seen that establishing quality at the national and even international level in the field of education, especially in higher education, has become inevitable. Therefore, as in all sectors where efficiency and quality are important, accreditation has become one of the tools used to achieve quality assurance and profitability in higher education institutions ( Özçiçek \Karaca, 2019,116). Quality studies in higher education institutions in Turkey gained momentum with the Higher Education Quality Board (YÖKAK) established in 2015, and before and after this date, some universities went through evaluation processes within the scope of EUA (European University Association) upon their own request. With the establishment of YÖKAK , quality processes became a legal obligation for Turkish higher education institutions, and a rapid development and transformation began to occur in quality, accreditation and evaluation practices in a short time (Yazıcı, Ünal, Çulhaoğlu, 2023, 281). Thus, many new concepts and methods have found application in quality processes in higher education institutions. The most functional of these is the PDCA cycle, whose starting point is public relations and marketing strategies. The (PDCA) cycle, which stands for Plan, Apply, Check, Take Action, is a technique used in quality processes in higher education in Turkey. Institutional accreditation programs began to be implemented for the first time in 2020, and out of a total of 208 universities of 129 States, 75 Foundations and 4 Foundation Vocational Schools in Turkey, 18 were entitled to receive full accreditation and 35 were entitled to receive accreditation for 2 years.

In this context, in our study, the PDCA cycle, By examining the 3-step model in marketing strategies and the 4-step rule in public relations in a conceptual framework, 5 Universities that applied for accreditation in 2022 and received full accreditation for 5 years in the context of their interaction with the PDCA cycle were examined with the thematic analysis method in the context of the PDCA cycle.

### **Purpose Of The Research**

Inspired by the marketing strategy processes and the four-step model in public relations strategies, the adoption of continuous improvement, innovation and development strategies in a planned manner in higher education institutions, and in this context, the planning made on the axis of the PDCA cycle, determination of sustainability and continuous improvement strategies and in this context, the implementation of the PDCA cycle efficiently. The purpose of the research is to reveal how it operates.

### **Research Method**

In the study, the thematic analysis method, which is a qualitative data analysis method that involves reading a series of data and looking for patterns in the meaning of the data to find themes, was applied and 5 Universities in Turkey that applied for accreditation in 2022 and received full accreditation for 5 years were examined.

### **Limitations Of The Research**

The study population consists of 30 universities in Turkey that gained the right to accreditation in 2022, the sample consists of 5 universities that received full accreditation and were selected through purposeful sampling, and Gazi University, which is 5 universities that received full accreditation for 5 years. University, Hacettepe University, Middle East Technical University University, Özyeğin University and Sabancı University constitute the limitations of the research.

## **CONCEPTUAL FRAMEWORK**

### **3 Step Model In Marketing Strategies**

Marketing strategies are an integrated structure with product, market, marketing activities, marketing resources, communication and distribution decisions that enable organizations to achieve certain goals and provide value to their customers (Baltacı,2021,59,Varadarajan,2010, 119), and it has an application area in quality processes in higher education institutions. are the methods that find it.

Education is not static, on the contrary, it is an area where constant mobility and change occur. Trained human power is the only source that enlightens and gives life to humanity, and this power can only be provided with good education. Education has become important not only socially but also economically. It is known that the degree of development of a country is directly related to the education level of its people. Everyone can see how important education is in economic development, and today it is known that the countries where the level of education is very high in industrialized states and where intellectual investments are developed and widespread are much more advanced than countries with natural riches.

It is possible to define strategic marketing in higher education as planning activities to find and develop the capacities of higher education institutions that change and develop according to the conditions of the day, areas of strength in the face of changing competitive conditions, and to find and eliminate weaknesses.

In general terms, the marketing strategy process consists of three main parts: initiation, development and implementation, and an effective marketing model consists of step-by-step processes. These 3 main steps are as follows ( Dudzevičiūtė , Peleckienė , 2010, 346):

1. Planning and formulation : analyzing internal and external conditions, evaluating the external environment and objectives, and then planning.
2. Implementation and execution: implementing the strategy, translating it into specific actions and programs, evaluating resources and managing change ..
3. Control and evaluation: evaluating whether the strategy has been implemented and whether it is effective.

The PDCA management cycle applied in universities seeks answers to a number of questions about how strategies are determined, implemented, monitored and how the process is improved to implement quality assurance policies ( Derdiyok , 2019, 187);

- How are vision, mission , strategic goals and performance indicators determined, monitored and improved?
- What strategy is followed to measure, evaluate and continuously improve corporate performance?
- What are the powers, duties and responsibilities of the quality commission within the scope of establishing and operating the quality assurance system?
- How to ensure the participation and contribution of internal and external stakeholders to the quality assurance system?

How is the measurement and monitoring system established to ensure that vision and mission goals are achieved?

- How does the organization plan to improve its processes for the future?

- How and at what level are internal and external stakeholder contributions made in determining the educational objectives of the programs and designing the curricula ?
- How are the qualifications of the programs determined?
- Whether the necessary compliance with the Turkish Higher Education Qualifications Framework is taken into account when determining the qualifications of the programs?
- Whether associations are made between the proficiencies of the programs and course learning outcomes?
- How are the planning, implementation, control and improvement processes of the programs carried out?
- Whether the educational aims and achievements of the programs are publicly announced?

In parallel with the marketing strategy processes, based on the answers to the questions above, making innovations and changes and implementing sustainability and continuous improvement strategies in the process reveal that the PDCA cycle is operated efficiently in this context.

#### 4 Step Rule And Pdca Cycle In Public Relations

We see that the basic strategies that we need to apply at all times and in every situation in our daily lives appear in every field. In this context, Scott Cutlip and Allen Center " Effective public Relations ", the most important reference book in the field of public relations, discusses the public relations process in four steps, and underlines that it is necessary to know what to do when and what to do in the studies carried out, to put it into practice within a planning, and to carry out the situation determination and evaluation processes. The public relations process cannot be completed without receiving feedback. expressed and discussed the public relations process in 4 steps ( Cutlip \ Center, 1982, 139):

1. *step* : listening, research, gathering information.
2. *step* : planning, decision making "what is our problem?" "here's what can we ?"
3. *step* : communication, implementation "here's what we do and why"
- Step 4*: evaluation "how did it go".

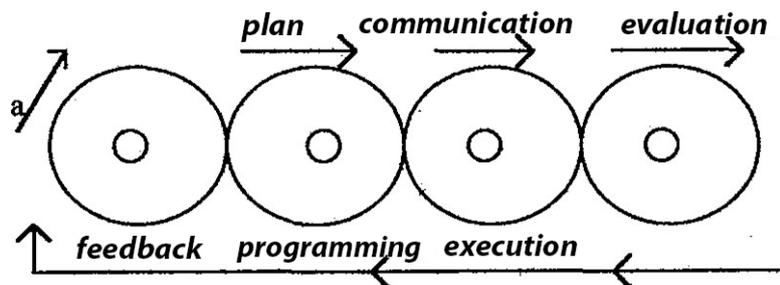

Figure:1Cutlip\ Center, 1982, 139

Modern communication technologies have brought contemporary, cultural, social, economic and political interactions to a process that is difficult to understand and respond to. As a result of the interaction with social, economic and political forces, it has become necessary for institutions and organizations to keep up with these changes and innovations. Modern communication has greatly increased both the speed and extent of technology transfer between relevant communities. While previously the speed and extent of technological developments and their effects causing social, economic and political changes served as a buffer in societies for years or even centuries, today's society is faced with sudden and comprehensive changes. is facing. II. While in the years following the World War, five-year periods were mentioned as the time period required to get ahead in the competition, in the 1960s and 1970s, these periods were first reduced to two and then to one year . Today, we are talking about six weeks, six days, and even six minutes.

Therefore, in parallel with these innovations and developments in society in higher education institutions, continuous improvement, innovation and development strategies have been adopted in a planned manner, inspired by the four-step model in public relations strategies, and planning has begun to be made on the axis of the PDCA cycle.

William Edwards The PDCA cycle developed by Deming is a systematic approach used to achieve results by making a step-by-step plan. Edward Deming introduced the quality approach that increases competitiveness in production and management services with the quality management philosophy he put forward (<https://eforosgb.com/puko-dongusu>). Deming cycle (Plan-Do-Check-Act), PDCA, also called the Shewhart cycle or the Shewhart learning and improvement cycle, combines management thought with a statistical analysis (Best\Neuhauser,2006, 142). Continuous evaluation of management policy also plays an important role in achieving continuous improvement. The Japanese also adopt and implement in their management approaches that achieving the goals can only be achieved by applying the PDCA (Plan-Do- Check-Act PDCA) cycle .

### Quality Assurance System

The basic principle in quality assurance practice in universities is; It is to create the quality of the services produced step by step in all activities through planned activities and systematic studies, and to ensure the formation of trust in all relevant elements and all stakeholders, especially students and academicians.

Universities try to prioritize the "quality" factor in order to ensure their superiority and awareness in the intensely competitive environment. The quality assurance system has become a quality management practice widely implemented by universities in creating satisfaction and trust in stakeholders ( Derdiyok , 2019, 175).

A research was conducted on the application processes for the PDCA Cycle in line with the quality assurance systems of universities. In the research, based on the assumption that the accreditation initiatives carried out by the Higher Education Quality Board within the framework of YÖKAK in our country are an indicator of quality, institutions that gained the right to accreditation in 2022 were studied.

### FINDINGS

As of 2021, 208 universities operate in Turkey. Institutional Accreditation Program (KAP) is an external evaluation process of quality assurance, education - training, research - development, social contribution and management system processes in higher education institutions within the scope of the PDCA Cycle and aims to provide recognition, internationalization , competition between universities and global employment.

Table1. YÖKAK Criteria ( European standards oath Guidelines for Quality Assurance in the european Higher education Area ) Comparison

Among the 30 institutions announced on the YÖKAK website as having gained the right to accreditation in 2022, 25 are conditional; It has been determined that 5 of them have gained the right to full accreditation. While the study population consists of 30 universities that were declared to have gained the right to accreditation in 2022, the sample consists of 5 universities that received full accreditation, selected through purposeful sampling. In the study, firstly, the PDCA Cycle was examined through frequency analysis in the accreditation reports of the institutions published on the website; Then, in the same text, the areas in which the PDCA Cycle stands out were examined through thematic analysis. The data obtained as a result of the thematic analysis was evaluated on the axis of the PDCA Cycle and Public Relations disciplines.

5 universities declared to have received full accreditation by YÖKAK in 2022; Gazi University, Hacettepe University, Middle East Technical University, Özyeğin University and Sabancı University are coded in alphabetical order and are represented as follows.

T1: Gazi University

T2: Hacettepe University  
 T3: Middle East Technical University  
 T4: Özyeğin University  
 T5: Sabancı University

in which the said keyword was used were examined and their frequencies were determined. The findings are included in the tables below :

**Table 1.** Frequency table for the keyword "PDCA CYCLE" in the published accreditation reports of the university that has gained the right to full accreditation:

**PDCA CYCLE FREQUENCY TABLE**

| T1 | T2 | T3 | T4 | T5 |
|----|----|----|----|----|
| 7  | 4  | 7  | 6  | 3  |

**According to the table;**

- The keyword PDCA Cycle was used 7 times in the Gazi University Accreditation Report.
- The keyword PDCA Cycle is used 4 times in the Hacettepe University Accreditation Report.
- The keyword PDCA Cycle is used 7 times in the Middle East Technical University Accreditation Report.
- The keyword PDCA Cycle is used 6 times in the Özyeğin University Accreditation Report.
- The keyword PDCA Cycle is used 3 times in the Sabancı University Accreditation Report.

Table 2. T1: Articles and Themes Containing the PDCA Cycle Keyword in Gazi University Accreditation Report

| T1  | ARTICLES & THEMES INCLUDING PDCA CYCLE IN THE ACCREDITATION REPORT  |
|-----|---|
| P1. | The place of the PDCA cycle in quality processes  |
| P2. | As a result of the evaluation, information that the deficiencies have been corrected through PDCA processes   |
| P3. | Information that the PDCA cycle is used in education process planning   |
| P4. | Information that the PDCA cycle is used in the process of reaching program qualifications and measurement-evaluation regarding education and training.  |
| P5. | PDCA cycles were closed as a continuous improvement effort within the framework of important developments such as mission differentiation and specialization studies in higher education.                     |
| P6. | Information about the studies aimed at monitoring the annual activities of the centers by determining the performance criteria in order to close the PDCA cycle in terms of Application and Research centers. |
| P7. | Information about the puku cycle being used in the process of achieving social contribution studies, social contribution policy and strategic plan goals.   |

Table 3. T2: Articles and Themes Containing the PDCA Cycle Keyword in the Hacettepe University Accreditation Report

| T2  | ARTICLES & THEMES CONTAINING THE PDCA CYCLE IN THE ACCREDITATION REPORT  |
|-----|--|
| P1. | Information that leadership, management and quality, education and training, research and development, social contribution criteria are evaluated with the PDCA maturity level |
| P2. | Information that the PDCA cycle is used in the Internal Quality Assurance System   |
| P3. | Information that the PDCA cycle is used in the planning, measurement and evaluation of external stakeholder relations.   |
| P4. | Information that the PDCA cycle is used in the planning, measurement and evaluation of internal stakeholder relations.   |

Table 4. T3: Articles and Themes Containing the PDCA Cycle Keyword in the Middle East Technical University Accreditation Report

| T3  | ARTICLES & THEMES CONTAINING THE PDCA CYCLE IN THE ACCREDITATION REPORT   |
|-----|---|
| P1. | Information that the PDCA cycle is used in <b>improvement areas</b> according to interim evaluation reports   |
| P2. | Corporate development and planning office (KGPO) is informed that the PDCA cycle is used in the process of collecting and organizing all data related to <b>strategic goals</b> and reporting it to senior management.                  |
| P3. | Information that the PDCA cycle is used as a <b>measurement and evaluation method</b> in <b>performance management</b> during the <b>strategic planning</b> process.  |
| P4. | <b>Quality Management Guide</b> ; It is known that he pioneered PDCA-focused process management in <b>leadership, management</b> and quality, <b>education-training, research-development</b> and <b>social contribution</b> processes. |
| P5. | Information that the PDCA cycle is used <b>in the planning, measurement and evaluation</b> of <b>internal and external stakeholder</b> relations.   |
| P6. | Information that the PDCA cycle is used in the context of <b>continuous improvement</b> in the course design process based on student workload.   |
| P7. | Information that the PDCA cycle is implemented in the context of continuous <b>improvement studies</b> within the KIDR Framework  |

Table 5. T4: Articles and Themes Containing the PDCA Cycle Keyword in the Özyeğin University Accreditation Report

| T4  | ARTICLES & THEMES CONTAINING THE PDCA CYCLE IN THE ACCREDITATION REPORT  |
|-----|--|
| P1. | Knowledge of using the PDCA cycle on how it plans and manages its resources and competencies in <b>leadership, quality and management system, education and training, research and development</b> and <b>social contribution</b> processes.   |
| P2. | Information that the institution uses the PDCA Cycle in its <b>internal quality assurance mechanisms, performance-oriented</b> and <b>self-evaluation</b> processes.   |
| P3. | Information that the PDCA cycle is used as a <b>measurement and evaluation</b> method in <b>Performance Management</b> during the <b>Strategic Planning</b> process.   |
| P4. | Information that a software has been developed to monitor the PDCA cycle in line with the pursuit of <b>strategic goals and objectives</b> .   |
| P5. | Student-Centered <b>Learning, Teaching and Evaluation</b> , Following and transparency of the principles and rules regarding the recognition and crediting of <b>prior learning</b> . Information that the PDCA cycle is used in practices related to certification of qualifications and diploma processes. |
| P6. | Information that the PDCA Cycle was used in the <b>Program Design, Evaluation and Update</b> and <b>Self-evaluation</b> axis.  |

Table 6. T5: Articles and Themes Containing the PDCA Cycle Keyword in the Sabancı University Accreditation Report

| T5  | ARTICLES & THEMES CONTAINING THE PDCA CYCLE IN THE ACCREDITATION REPORT   |
|-----|---|
| P1. | Education; PDCA processes related to education and training, in other words, determining the relevant strategic goals and determining and monitoring the competencies required to achieve these goals, designing, evaluating and updating education and training programs, measuring the levels of achievement of program qualifications, determining the programs to be carried out remotely or mixed. Information that the PDCA Cycle was applied regarding |
| P2. | Information about the use of the PDCA cycle in improvement efforts for KIDR in Social Contribution processes.   |
| P3. | Curriculums are compatible with the Turkish Higher Education Qualifications Framework; Information that the PDCA cycle should be used in the periodic evaluation process to ensure that it is designed in accordance with the teaching objectives and learning outcomes and that it meets the needs of the students and the society.  |

## CONCLUSION

Both individuals and organizations must adopt strategic communication in every process they go through and draw a road map, thus implementing what they will do, how, where and for what they will do it in a planned manner. We benefit from the application areas of strategic communication in every moment of our lives, in politics, commerce, education and many other fields. Making the right decisions at the most appropriate place and time with a proactive approach and using information in the best way provides a great advantage over the environment and competitors. In line with the changing business paradigms of the information age, it is necessary to focus on strategic communication studies consisting of planned stages to achieve long-term goals.

As a result of the research carried out within the scope of the study, it was determined that the disciplines of marketing and public relations have common areas of study and interest with the PDCA Cycle Method used in Higher Education Quality Processes and it was concluded that it was applied for similar purposes.

"quality, measurement and evaluation, stakeholder relations, leadership, strategic planning, continuous improvement, performance management, in-house goals, contribution to society processes", which are dominant as a result of the Thematic Analysis, are directly among the application areas of the public relations discipline and come to the fore in strategic marketing processes. are considered as one of the subject headings.

Organizations can analyze the internal and external environment, for example, by performing a SWOT analysis, they can identify their strengths, weaknesses, opportunities and threats, and create strategies accordingly. They analyze the political, economic, social and technological environment with PEST analysis, which is a slightly more advanced type of analysis, and make strategic decisions in this direction. The most functional one is the PDCA cycle, whose starting point is public relations and marketing strategies. William Edwards, which stands for Plan, Do, Check, Act (PDCA) cycle It is a systematic approach developed by Deming and used to achieve results by making a step-by-step plan.

In parallel with the innovations and developments created by the information society in higher education institutions, planned and continuous improvement, innovation and development strategies have been adopted and planning has begun on the axis of the PDCA cycle. In the face of changing competitive conditions, finding and developing areas of strength, planning the necessary configurations to find and eliminate weaknesses, It is necessary to focus on innovation and development efforts. The PDCA cycle ensures that these processes proceed smoothly and sustainably .

# POTANSİYEL EMSÂL VAKA TASARIMI ÖRNEĞİ ÜZERİNDEN: DİJİTAL REEL PSİKO-SEMİYOTİK DİL KULLANIMLARIYLA (ETKİLEŞİMLE)'KUTUDA DİJİTAL REEL KÖLE' YARATIMI SÜRECİ NASIL İŞLER? SCHRÖDİNGER'İN GERÇEK KEDİSİ

Doç. Dr. Nevin ALGÜL

Marmara Üniversitesi, Radyo, Televizyon ve Sinema Bölümü, Türkiye

## ÖZET

Parlak bilgi, fikir, güçtür, paradır, namdır, şandır. Yeniliklerin, icatların, hatta kamuya kendini sunma biçimlerinin, bireysel hırsların tatmininin yoludur. Geniş kitleleri maddi manevi bir başka söylemle hem fiziksel hem manevi yönleriyle etkileyecek, ön kabulde bağrılarına basacakları kanaat, önder ve liderleri vurucu dil kullanımlarıyla mevcut kitleye sunmak için kitlenin özelliklerini de iyi bilmek gerekir. İstendik manipülasyonu sağlamak için gözlemlerine dayalı tespitlerinin hedefi vurmadaki sağlamlığının sağlaması yapılmış nitelikte, nitelikli bilgi kaynaklarına ihtiyaç vardır. Sözün özü: Bilgi her şeydir. Peki, Bu bilgi kaynağı, kaynakları bedava olursa ne olur? 'Dijital Kölelik' doğabilir, doğar. Böyle bir kaynağın, çok yönlü ticari değeri: Durduk yerde yeni mucitler yaratan, halka, etkileyici projeler sunan, hedeflenen kitleyi tam olarak vurabilecek söylem, slogan ve dil kullanımları bir yana dursun, hit şarkılar olacakları ortada olan eşsiz ticari değerdeki şiirler, sahne şovu içerikleri, TV programları( patenti alınan, gündüz ve gece kuşakları), sinema filmleri, TV dizileri, yeni eğilimler yaratma, piyasayı canlandırma, yeni ticari ürün yaratımları, hedefi vuran reklam metin ve fikir ve marka adları, sektör yaratan ('website'si) ticari inetrenet sayfası adları, akademik yaratımlar vb. gibi, çok değerli fikirler, bilgiler barındıran gözlem yeteneği denenmiş, böyle bir kaynağın dijital çağla beraber, bedava kullanılabileceği ve bu bedava kullanımın ömürlük olabileceği üzerine kurulu, bir 'Dijital Kölelik'ten özgürleşme çalışmasıdır bu makale. Yepyeni bakışlar, yepyeni ufuklar yaratır. Doğuştan kazanılın zekâ yeti ve yetenekleri eşsiz olan biriciklerin etkileşim değerleri de çok yüksektir. Eliptik küreye sundukları tartışılmaz bir değerdedir. Bilginin, verinin, datanın dijital çağla birlikte paha biçilemez maden olduğu gerçeği, eliptik kürede analog devrin sona erişiyse, yeni dünya düzeni işlerinin işlevselliğinin ana kaynağı olarak ortada aslında öylece bir ENIAC olarak durmaktadır. Çağın en önemli sorunu, henüz suç olarak **tanımlanmamış, tanınmamış olmasına rağmen** 'Dijital Kölelik'tir. *Suçun varlığının henüz tanınmamış olması yok olduğu anlamını taşımaz.* Bir 'Dijital Köle'nin Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıyla nasıl paralize edilebileceğini ve tüm yaşamının kontrolünü bu şekilde kaybedip 'Dijital Köle' olarak kullanılabileceği üzerine kurulu olan bu çalışmam; geniş kitleleri bu alanda aydınlatmak ve 'Dijital Kölelik' bilinci yaratmak için var olan tüm yönleriyle olmasa da bir bölümüyle ele almayı kendine amaç edinmiştir. Hedefi vurmada, değeri dijital ağlarda, belki önce reel yaşamda deşifre olmuş bir bireyin 'Dijital Köle' edilmesini konu edinen, ilhamını yazarın kendi yaşam hikâyesinden alan; başına geleni bilimle çözen ve bilim dünyasına katkı olarak sunan bir akademisyenin çalışmasıdır. Karanlık yapılanmaların dadandığı tüm dijital alanlarının ve dolayısıyla tüm yaşamının doğurduğu, başına geleni çözümlenmek için yarattığı bilim dalı üzerinden sunulmuştur.

*Özetin özetiyle:* Dijital çağla beraber, etkileşim, ticari meta olarak değeri, eşsiz biricikliği üniversite yıllarında, henüz lisans için hazırlık okurken ortaya çıkan, bir şekilde deşifre olup; karanlık yapılanmaların hedefi haline gelen, bilgisayarına yazdıkları talan edilmeye başlanan bireyin kutuda dijital köleleştirilme süreci, nasıl sürdürülebilir hâle getirildiği örneklerle sunulmaktadır. Ticari değerinin paha biçilmezliğine endeksli olarak, olsa gerek, tüm dijital alanlarına hakim olma, fiziksel çevresini donatma, dijital- reel toplu gizli takip, organize Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıyla çevreleme, 7/24 dijital-reel gözetim altında tutma, buldukları makam ve mesleki saygınlığı çalınmanın kamuflajları olarak kullanma, kumpaslar ve karalama kampanyaları yaratarak çalınmanın üzerini örtme ve 'Dijital Köleliği' sürdürülebilir kılma çabaları: 'Dijital Köleyi', Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıyla paralize edip, kendi yaşamı için işlevsiz kılma süreci, gözler önüne konulmak üzere üzerinde çalışılmıştır. Şu bilinmelidir: Dijital Kölelik hiçbir köleliğe benzemez. Böyle bir kapandan kurtulmak kolay iş değildir. Bu makale tüm zorluklarını yaşayan, artık hiç kimsenin bu us dışı olayları deneyimlemesini istemeyen bir akademisyen tarafından üretilmiştir. Yaratılan bilinç üzerinden bakıldığında işlerin ne kadar kolaylaştığı görülecektir. Artık hiç kimsenin korkmasına gerek kalmayacak şekilde konuya ışık tutulmuştur ve tutulmaya devam edilecektir ve bu anlamda mağdur edilen tüm haklarını geri alacaktır. Buna inanmak insanlığa inanmaktır.

**Anahtar Sözcükler:** Schrödinger, Dijital Köle, Dijital- Reel, Psiko-Semiyotik, Helvâ, Toplu Organize takip, 7/24 Dijital Gözetim, Etkileşim Değeri, Politika, Siyaset, Ortam Dinleme.

## GİRİŞ

Bu makale tümüyle özgün, küresel boyutta yeni bilim alanları, dalları, tanımlamaları bünyesinde barındıran bir makale olup, kutuplardan basık küremizin bilim dünyasına sunulmuş bir katkıdır. Alanında ilk ve tektir. *Öncelikle, anlaşılmasında kolaylık sağlaması açısından, potansiyel emsâl vakanın 'Dijital Kölesi' bir başka*

*söylemle, potansiyel emsâl vakanın öznesi aralarda ben dilini kullanarak “..” makale içinde içinde yer alacaktır. Ayrıca kutulama yöntemleri, kafa karışıklığı yaratma dahil makalenin tümüne dağıtılmıştır.*

“Bilim insanı olma yolundaki birey önce yaşadığı toplumu, kendini, o toplumda neler yaşandığını, kendinin neler yaşadığını çözümleyebilmelidir. Bu makalem kendi yaşadıklarımın ürettiğim bilim alanı, bilimsel tanımlamalarla doludur ve insanlık için çok değerlidir. Her şeyden önemlisi bu çalışmamın konu ettiğim ve ilhamını kendi yaşam öykümünden aldığım bu makalemi hangi şartlar altında yazdığımı insanlığa bırakmaya çalıştığımı ifade etmek ihtiyacını duyuyorum.” Bu haliyle de alanında bir ilk, düşünün makalenin yazarı bizzat ‘Dijital Köle’ nin ta kendisi, aslında bir de bu makaleyi, kutulandığı yerlerde nihayet yazabiliyor ve yarattığı bilim alanı ve tanımlamaları da nihayet çaldırmamayı başarmış biri olarak. İstedığı ölçüde geniş kitlelere ulaşamamış ama ne gam, şimdilik yarattığı alanların koruyucusu olması bile onun için büyük bir başarıdır. ‘Girişim’ sözcüğünü belli bir yaşta olanlar hatırlar: “Benim memurum işini bilir”, ‘köşeyi dönmek’ kavramlarını da, dijital çağa beraber ‘girişim’ sözcüğünün İngilizce muadili ‘İnovasyon’ sözcüğü yükselen değer oldu. Bu köşeyi dönmek isteyenlerin dijital köşeleri tuttuklarını bir düşünün. İnovasyon sözcüğünün yükselen değer olduğu zamanların dijital çağın zirve noktası olduğu söylenebilir. Düşünün elinizde dijital imkanlar var ve tüm bilgi girişini, akışını görebiliyorsunuz veya istediğiniz kişinin dijital alanlarını 7/24 takip edebilecek teknik imkânlarla sahipsiniz ki, “buna 7/24 Dijital Gözetim demektedirim.” Her Dijital Köle aynı süreçten geçemeyebilir ama reel yaşam alanlarında ticari değeri, deşifre olan bir ‘Dijital Köle’, içinde doğmuş olduğu topluma bu gücü ellerinde bulunduranlarca potansiyel veri kaynakları olarak bakılmasına neden olabilir. Bu potansiyel emsâl vakanın böyle bir bakışa neden olabildiği ortadadır. Boğaziçi Üniversitesi’nde henüz YADYOK’ta Yabancı Diller Okulunda lisans için hazırlık okurken böyle bir ölçümleme, kasıtlı olarak bakma, düzenek kurma, avcı olarak takip etmeye başlama çünkü potansiyel emsal dijital köle vakasının öznesi not defterleri şiirlerle, çizimlerle dolu biri ve bazen açıkta bırakıp teneffüse çıkan biri. Düşünün sınıfında Sezen Aksu’nun çocukluk arkadaşı bulunuyormuş, nasıl kaldığına şaşırdığı ikinci senesinde öğrenmiş, tesadüfle ikinci senede bir yanında Hürriyet Gazetesi çalışanı bir yanında Sezen Aksu’nun çocukluk arkadaşı, her ikisi de yaşça oldukça büyük ve iş yerleri tarafından YSL için BÜ’ ye gönderilmişler ve hazırlık sınıfındaydılar. Yaşadığı en korkunç yıld ve nedenini o zamanlar anlayamıyordu. Keşif öncesinde mi oldu, bilmez. İlk kazandığı üniversite İÜ, aynı sene BÜ’ye geçmiş. Bu arada eve resmen gelen bilgisayarı talan edilmeye başlanmıştı. YADYOK birinci senesinde de bir hafta boyunca Writting hocası da Candan Erçetin’di. Bu YADYOK hocaları birbir bilgisayarında tuttuğu günlüğünden talan edilen yüzlerce şiirini şarkı olarak söyleyen ve ünlerine ün katan Kenan Doğulu gibi şarkıcıların, Cem Yılmaz gibi komedyenlerin, hatta İzel’in karşısına çıktığı ilk çalışmaya başladığı yerlerdeki gibi büyük tesadüf eseri(!) karşısına çıkacaktı. Bunun daha sonra bir yöntem olduğu anlaşılacaktı. Çalınan bir ürünün adını çoğaltmak da bir yöntem: Şarkıcı NEV örneğinde olduğu gibi. Baştan sona, tüm basın lansman, sunumlarıyla yani PR, Halkla İlişkiler, çıkışı, tüm albümü hatta adının kısaltması, tümüyle talan günlüğünden, gene talan ettiler diye feryat ettiğinde ortalığı NEV’ler basmıştır. Bu NEV’ler ilk yaşadığı ortamlarda başlamıştı. İlk evinin otoparkı, sonra iş yerinin otoparkı, araç plakalarındaki ibarelerde, sonra, nev mekânlar, sonra AVM’ler, çoğaltma defalarca gözlemlenen bir yöntem. Bu yöntemle kafa karışıklığı yaratmak denecektir. Kafa karışıklığı yaratmak dikkat dağıtıcılarla sağlanır, bu dikkat dağıtıcıların hepsi Psiko-Semiyotiktir ve aynı zamanda baskılama amacı taşırlar. Bilgisayarından birebir çalınan şiirleri, bizler yazdık diye sahiplenip ortaya çıkan ve artık Sezen Aksu’ya gerek duymayıp(!) ‘Song Writer’, şarkı sözü yazarı olduklarını ilan eden şarkıcıların sayısı adeta patlamış mısır gibi artmaya devam eder. Bu şarkıcılar gün geçtikçe çoğalır ve bazıları artık *tesadüf tesadüftür*(!) yöntemleri gereği karşısına çıkarlar. Düşünün siz, sizi talan edenleri bilgisayarınıza yazıyorsunuz, sözü geçenler ertesi gün etrafınızda, bazen kötü, bazen alaycı bakmaktalar...Bilgisayarından birebir çalıntı ‘Kadına Şiddet’ paneline davetiye vb. gibi, talan ürününün gözüne sokulması durumları hiç bitmez: Yeterince **kafa karışıklığı yaratılırsa beynin bu konuda düşünmeyi kesmesi umulur**. Bakınız dost olarak yanında biten de günlüğünün talanından çalıştığı koleje büyük bir reklam yapanın eşi, özel müzik öğretmenidir. Bu karanlık yapılanma **tesadüf tesadüftür**’ü öğretir. Bileşik kaplar halinde hareket **kafa karışıklığı** sağlamanın bir diğer aracıdır ve her biri manipülasyona bilimsel tanımlamasıyla Dijital Reel Psiko-Semiyotik Dil Kullanımlarına egemen bir alt yapıdan gelmektedirler.

### **Kölelik Nedir? Dijital Kölelik nedir? Dijital-Reel Psiko-Semiyotik Dil Kullanımları Üzerinden Dijital Kölecilerin Kalıplaşan Tutum ve Tavırları, ...**

“Kölelik: Bir insanın başka birinin malı ve mülkü olması. Başka bir kişinin malı ve mülkü olan kişiye köle, memlûk veya kul; köle sahibine ise efendi veya mevlâ denir. (tr.m.wikipedia.org) Bu arada v/wikipedia’nın ortaya çıkışı da tesadüfler listesinde yer almaktadır: “Talan günlüğüme, Meydan Larousse türünde nette ansiklopediye ihtiyaç var diye yazdıktan sonra çıktı ortaya.” Herkes mi çaldı derken: Bin tesadüf aynı zamanda hem tesadüf tesadüftür hem de Dijital Köle üzerinde kafa karışıklığı yaratma manipülasyonuna dahil edilmesi gereken ve araştırılması gereken konulardandır. Ötelemek diye bir sözcük yoktu. Üretimim olan sözcük bilgisayarımın çalındı. Buna apartmak dahil. Böyle bir sözcük de yok. Krilce aparmak’ sözcüğüne Türkçe dilbilgisi uygulayarak yapmıştım. Apartta beklemek gibi, apartmak üzere beklemek, çalmanın bir başka söylemi

ama sinsice bekleyen, uçağın aportta beklemesi gibi bir süreci içeren... BÜ’de Kril alfabesiyle Azerice öğrenirken ürettiğim bu sözcüğü bilgisayarına yazdığımın akabinde bana karşı, özel olarak davet edildiğim, BÜ’de bir konferans sırasında, Dijital- Reel Psiko-Semiyotik dil olarak kullandı bir akademisyen ve bu bir yöntem. **Talancılardan kalıp olan tutum ve tavırlarından biridir.** Talan ürününü göze sokmak. Önce talan ürünlerinin nasıl dağıtıldığından haberim olmadığı için masum mu diye çok düşündüm. Sonra, acaba beni uyarıyorlar mı, diye çok vakit kaybettim. Sonra bunun bir kalıp, yöntem olduğunu anladım. Yer yer hedefin direnişine paralel olarak, sindirmek üzere, talan alanlarından ve örülme sonucu elde edilen psikolojik özelliklerinden üretilen Dijital-Reel Psiko-Semiyotik baskılama aracı olarak kullanılıyorlardı. Bu talanın kapsama alanının genişliğinin nasıl üst bir seviyede olduğu psikosunu verirken; ‘Dijital Köleyi’ sindirmek ereğini taşıyordu. Bu Dijital-Reel Psiko-Semiyotik Dil Kullanımlarında ‘Dijital Köleyi’ en çaresiz hissettiren siyasi erklere ait talan ürünlerinden yaratılmış dil kullanımlarıydı çünkü onların her biri ‘Dijital Köle’ için Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıydı ve olayın kabul gören genişliğinin, çare arayacağı yerlerin çaresizliğe neden olacağı duygusunu yamaktaydı. Malum, hukuk demek, güçler demektir.”

Örneğin: Kumpas davalar öncesi toplu takip saldırılarıyla üzerine gelindi. Covid 19’un başlangıçları nereye gitse burnunu dibine giren eklemlerle doluydu, bunlara çocukları üzerine salmak, gece dörtte kapısının önüne gelip ses çıkarmak, kapıya vurmak da dahildir, zorla içeriye girmeye çalışmak da dahildir ve belgelenmiştir. Talan günlüğünün içeriği, uzun yıllarca, yazılı görsel basında yer alan konu, gündem, spot başlıklar bu görevi gördü. Bu tür kullanımlar aynı zamanda baskılama araçlarıdır. Düşünün yaygın bir suç ortaklığı ve aynı zamanda bir güç, gövde gösterisi, ‘Dijital Köle’yi çok çaresiz hissettiren bir durumdur bu.

**Dijital Kölelik, ticari meta değerinin deşifre olmasıyla ki, buna ağa takılma denilebilir, nesneleştirilen bireyin tüm hayatı üzerine kurulan, ‘Dijital Köle’ üzerinde tam kontrolün barındırıldığı tüm grift ilişkileri de kapsar buna dijital alanı talan eden oluşumlar, yapılanmalar arası çıkar ilişkileri de dahildir.**

“Yapanların büyük bir nefretle tüm bu manipülasyon işlerine gönüllü olması, nefret nesnesine dönüştürülme hissi de yaratmıştır ki, belki de reâya olarak ilan edilmem, kul olarak görülmem düşüncesi yapılanların, yapanların hareket noktalarına ışık tutabilir, açıklayıcı olabilir ve hatta bu yönüyle yeni dünya düzeni ayağına bir öç alma olarak da değerlendirilebilir mi? İlerleyen zaman dilimleri tüm bu konulara açıklayıcı olabilir ama çok üzüntü verici olduğu bir gerçektir.” Sözün özü bu vakada yetenekleri dijital ağlarda bir şekilde deşifre olana birinin dijital köleye dönüşümü, potansiyel emsal dijital kölelik vakasının başlangıcı ve sonrası aktarılacaktır. “Sezen Aksu’nun çocukluk arkadaşının bindiğim otobüse binip, o dönemler Etiler’de oturan Sezen Aksu’nun evine götürmeye kalması, çok ısrar etmesi daha dün gibi. Benim durumum veya benim gibi deşifre olan yeteneklerin olabileceğini keşfeden dijital, elektronik alanı veri/data bağlamında elinde tutan güçler olduğunu düşününüz; “Anadolu’da daha ne yetenekler var sözü” hâlâ sıcak, ticari ederi değeri ortaya çıkan data kaynağının ömürlük talanı böyle başladı. “Parayla özdeşleşen adam olmak(!), yeni tanımlamasıyla ‘girişimcilik’ işte bu girişimcilik sözcüğünün, muadili inovasyoncuların kaynağı haline getirilip kullanıldım. Düşünün yeni dünya düzeni ayağına, dijital çağın sunduğu tüm olanakları, legal görünümü, illegal talan, ‘Dijital Kölelik’ yönleriyle, deşifre edilen kaynağa birebir halk tabiriyle 7/24 musallat olarak, siyasi erklere birleşip ulusal ve uluslararası çalmak ve satmak, üzerinden nam, şan, maddi manevi kazanç sağlamak, bunu yapabilmek için kaynağı Dijital Reel Psiko Semiyotik bir çember içine almak, tüm yaşamını manipüle etmek, kontrol altına almak ve bunu sürdürülebilir kılmak için uğraşmaktalar. Kim beni çaldı ve hala talan edilen günlüğümde proje, sloganlarla devam ediyorlar, diye talan edilen bilgisayarına yazdığım varsa, ilk bilgisayarım gibi tesadüflerle bizi bulan yaşadığım fiziksel çevrenin ilan tahtası olarak kullanılmasıyla bana yansıtıldı. Kutulanmak ‘Dijital Köle’nin reel yaşam alanlarının kontrol altına alınması demektir(Algül, 2020-2023) bakılabilir.

**Köleliğe Kuş Bakışına Devam, Dijital Kölelik Nedir ve Nasıl Gerçekleştirilir?** Kunta Kinte, Köle Isaura’dan, 1990’lar bilgi güçtür ve 2000’ler ve Milenyum başlar: 2010’lar buyurun Dijital Çağ ve 1980’lerin sonlarından 2025’e girerken sürdürülebilir kıldıkları ülkesel ve küresel çapta *Dijital Kölelik potansiyel emsâl vakası*. Bunu başarı olarak gördükleri de çok açıktır. “**Kölelik**, bir insanın başka birinin malı ve mülkü olması. Başka bir kişinin malı ve mülkü olan kişiye köle, memlûk veya kul; köle sahibine ise efendi veya mevla denir(tr.wikipedia.org/wiki). Çok eski tarihlerden beri savaşta esir düşenler, ağır suç işleyenler, borcunu ödeyemeyenler, korsanlar tarafından kaçırılanlar köle kabul edilir, köle pazarlarında satılırdı(islamansiklopedisi.org). **Golem**.” Yahudi halk kültüründe hayatla donatılmış bir imge.”(britannica.com ) Golem de bir köledir ama kölelerin içinde en acınası olabilir çünkü işin içine Ezoterizm/ Ökültizm girmektedir. Büyü, para psikoloji, vb. gibi. Bir hiçten, hizmet aracı çıkarmak; sürdürülebilir Dijital Köleliğe benzetilebilir mi? Önce bireyi hiçleştirmek gerekir: Hileler, oyunlar, metamorfoza uğratma, dijital kölelik için helvâlaştırmak, kişiliksizleştirmek bir gerekliliktir. Modern bilimle bakılırsa her türlü manipülasyonun yapıldığı ve artık kendi dışında bir sömürü nesnesine dönüştürülüp kullanılan, sömürücü aracı olarak başkalaşım geçiren birey olarak bakılabilir. Bireyin artık kendi hayatı, kişiliği, yoktur. Zaten Dijital Kölelikte ısrarla Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıyla **yapılan hedefin tüm sınırlarını yok etmektir.** **Hedefin sınırlarını süreklilik delmek, onu çaresiz ve güçsüz bir hamura, helvâya dönüştürmek bir karanlık yapılanmaların kullandığı kalıp**

**bir yöntemdir. Öncelikle Dijital Kölelik tanımına geçmeden, tarafımdan hâlâ yapılandırılan bir tanımlama olduğunu da ifade etmeliyim.**

### **‘Dijital Kölelik’ nedir?**

Klasik kölelik tanımının çok daha geniş kapsamlı, dijital ve reel unsurları bünyesinde ayrılmaz ikili olarak barındıran hâlidir. 7/24 Elektronik Gözetim( <https://law.cornell.edu> )Benim tanımlamamla 7/24 Dijital Gözetim: Tüm dijital alanlarının takibi, illegal, Dijital Kölenin ekranlarıyla senkronize olarak, talan edilen özel, mahrem dijital alanlarının talan ürünleri yanı sıra ayrıca, bireye özel, psikolojik değeri hesaplanmış bilgilerden Dijital Reel Psiko-Semiyotik Dil Kullanımları içeriği üretmek, çembere alınmış hedefi 7/24 fiziksel koşulları hesaplanmış, kasıtlı olarak ayarlanmış ortamlara koyarak ve tutarak, bireyin ömürlük sömürü kapanında tutulması üzerine kurulu bir düzenek demektir. Sürdürülebilir Dijital Kölelik kapanı, kutusu, çemberi olarak da tanımlanabilir. Mahrem dijital alanlarının üretilen Dijital-Reel Psiko-Semiyotik Dil Kullanımları hedef için (kurban) birer göstergedir; bir başka söylemle kendi dışında bir şeyi temsil eden, dolayısıyla o şeyin yerini alabilecek nitelikte olan her türlü biçim, nesne, olgu(Rıfat, 2019)dur. Tüm bunlara çok daha fazlası ilave edilebilir (Algül, 2020-2023)ses, koku, doku, altıncı his, öngörü, içgörü vb. gibi.

Kafa karışıklığı, toplu takip, mizansen olaylar, drama tekniklerini kullanmak, kumpas, sözde intihal, manipülasyonla ihtar yaratmak, çalışma alanlarını, zorunlu yaşam alanı gibi, direnişine paralel olarak, kontrol altında tutma amacıyla, Dijital Köleyi korkutmak, sindirmek, çaresiz hissettirmek adına, tüm bu hileli oyunları sürdürmek ve kendi adına hiçbir şey yapamaması, hak aramaya kalkıştıkça, kumpaslar, karalama kampanyaları, yerleştirildiği kutularda ki, **tesadüfe yer bırakmamak bu karanlık yapılanmada kalıplaşan tutum ve tavırlardandır** böyle bir sistemde çıkarılan uyduruk suçlamalar, manipülasyonlarla tüm yaşamı paralize edilerek baskılamayı sağlayacak insan unsurlarıyla donanmış kendi hayatı adına paralize edilirken dijital hatta ileri düzeyde reel ortamları manipülasyonla daha çok konuşurmak, kendini yetersiz hissettirmek, fikir saçmasını sağlamaya yönelik mizansen içine alınmış tüm dijital ve reel yaşam alanları 7/24 elektronik, dijital reel gözetim altında tutulan bir başka söylemle toplu takip altında kontrollü bir çembere alınan ve üzerinden ticari( paraya dönecek ün, nam, şan, itibar, maddi manevi) kazanç sağlanan kişidir.

Tüm çemberden kurtulma çabaları kumpaslarla yerle bir edilmek üzere kutulanmış ve tüm yaşam alanları, dijital alanlarına hatta ileri düzeyde reel; ortamdaki çalmak için, manipülatif unsurlarla döşenmiş, hak arayamaz hâle getirebilmek için hukuk başta olmak üzere uyduruk, düzmece kontrol amacıyla üretilmiş kumpaslarla yapılageleni sürdürülebilir kılmak için manipülasyon araçları olarak kullanılan insan faktörleriyle donatılmış kişidir. Bu insan faktörleri birbirlerinden haberdar, **bilesik kaplar gibi çalışan, çete özellikleri gösteren; manipülasyonları Dijital Reel Psiko-Semiyotik Dil Kullanımlarıyla gerçekleştiren insanlardır**, bilinçli ve kasıtlı olarak Dijital Kölenin çevresine yerleştirilmişlerdir. “Bir örnekleme yapılırsa eğer gitti denilen Fethullah Gülen örgütüne ait olduğu söylenen özelliklerle çok benzeşmektedir ki, darbe kalkışması sonrasında nihayet kötüler ortaya çıktı ve bu iş bitti diye yine yeniden hak aramaya kalkıştığımda çok daha fazla kumpas, baskılamaya yönelik uyduruk hukuk davaları ve hatta iş ortamında ‘ihtar’ la karşılaştım.”

Susturmak, sindirmek, dijital köleliği sürdürülebilir kılmak için özel eğitilmiş kişilerdir ve çok çeşitli meslek erbapları da aralarında bulunmaktadır. Bu meslek erbapları manipülatif bilgilerle donatılmış baskılama aracı olarak kullanılmaktadır. Bu tanım bana ait ve hâlâ gelişen bir tanımlamadır çünkü hayatımdan ürettiğim bir tanımlamadır. Tıpkı **ALGÜL** Dijital Reel Manuel Psiko-Semiyotik Dil Kullanımları Ayırıştırıcıları (Algül, 2020)ve Dijital Reel Psiko-Semiyotik Dil Kullanımları bilim alanı tanımlamam ve buluşum gibi(Algül, 2020-2023). “Diğerlerini çaldırdım ama bunları çaldırmamayı başardığımı ifade etmek istiyorum. Bu sayede buradayım.” Dijital Reel Psiko-Semiyotik Dil Kullanımları bilinçdışımızı (Mlodinov, 2013)oluşturan olayları kapsar, bu kapsama alanı bazen toplumsal bellekte var olan psikolojik etkisi olan dil kullanımlarımdan geçer.

### **Dijital Kölelik ve Karşılıklılık İlkesi İlişkisi nedir? Dikkat Dağıtıcılar, Manipülasyon, Aynalama Manipülasyona Tepkiyi Baskılama Aracı Örnekleri: Kumpas, Hukukla Korkutma, İntihal, İhtar, ..**

#### **ALGÜL Psiko-Karşılıklılık İlkesi Nedir?**

‘Psiko-Karşılıklılık İlkesi’ de bana ait bir tanımlama, detaylı bilgi için henüz yayımlanmamış (Algül, 2024) ilgili konuda makaleye bakılabilir. *Kısaca ‘Psiko-Karşılıklılık İlkesi’ hedefin duygu durum biçimlerini kuşatmaya yönelik Dijital- Reel Psiko-Semiyotik Dil Kullanımlarıdır.* Yemlemeler denebilecek, Dijital Reel Psiko-Semiyotik Dil Kullanımlarının psiko-karşılıklarının olabilmesi için tabiri caizse hedef tarafından yenmeleri gerekmektedir. Aynalama da bunlardan biridir: Eğlenme amaçlarından ‘Dijital Köle’nin yaptığı, giydiği, yazılı görsel basında, talancılar tarafından taklit edilir. Yazdıklarını zaten talan etmekleler, arada netten baktığı kıyafetler dahildir. Dijital Kölenin yaptığının yapılması gibi. Bir tür taklit: Giydiği renk, kamuya açık yayımlanmış olan bir fotoğrafının benzerinin şiiirlerini sahiplenip benim diye, şarkıcılarca taklit edilmesi ki, bu durum talan edilen bilgisayarın içeriğinden üretilmiş PR/Halkla İlişkiler, reklam üretimi içeriğinden ayrıca değerlendirilmesi gereken bir durumdur. Bir tür dalga geçmek, sinirlerle oynamak olarak değerlendirilebilir: Elbette çaresizlik, Dijital Kölede yaratılan hislerden biridir.

Potansiyel emsâl vakanın öznesinin kaleminden: “TV dizi veyâ sinema konusu çıkar mı? Çıkar: Yıllarca talan ettikleri günlüğümün içeriğini bir de böyle kullandılar, içerikten böyle çaldılar. Bu konuda uzman oldukları akıllardan çıkmasın. Talancı kimlik ve kişilikler talan ürünü kitaplarını ya gözlerime soktular ya hediye olarak gönderdiler. Bu hem çalmanın boyutu hakkında bilgi verip, çaresizlik yaratmayı hesaplarken hem de biz yapabiliyoruz sen bu şekilde hizmet vereceksin baskısını da yaratmayı amaçlamış olmalıdır. “*Vur enseye ekmeğini al*”, Bunu daha başlangıçta ötekileştirmek olarak tanımladım. Ötekileştirmek kavramı da günlüğümde talan edilenlerden. Maalesef karşıma çıkan ve çıkarılan her talan ürününün sahibi ne yaptıklarını çok iyi bilen insanlardı. “*Son ana kadar hatta bu makale yazılırken ve makale özeti kaydedilirken eklemli siyasi kurumsal ayakları, okuduk, gözümüz üzerinde Dijital- Reel Psiko-Semiyotik Dil Kullanımlarıyla engel olmaya, korkutup, sindirmeye çalıştılar, çalışmalarımı tamamlayamama neden olmaya çabaladılar; gece helikopter, uçak yolları evimin üzerinden verildi. Uykum sürekli bölündü ve ben kesintisiz yirmi bir yıldır böyle yaşıyorum. Son sekiz senedir her şey çarpılmış durumda. Ekranım önlerinde ve ekranın önümüzde demekle kalmayıp ev ortamın kontrolümüz altında demekteler. Anında dijital ekranlarını silahla doluyor ya da yaşam alanım olan fiziksel çevremden mavzer atışları başlıyor, özellikle gecenin on’u veyâ uyku sırasında, gecenin yarısında, 7/24 elektronik gözetim altında olmak ev hallerinin tümünü kapsamak anlamına da gelir bu vakada, hatta net bağlantın dahil. Dikkat dağıtıcılar makalenin bütününe dağılmış olmakla beraber başlığın altında yinelenmiştir.” Sürdürülebilir ‘Dijital Kölelik’ için kutulama, çember içine alma bir gerekliliktir ve bu 7/24 dijital gözetimle paralel giden bir fiziksel çevreyi de kapsamaktadır. Hepsisi girişimcilik adına ama kapitülasyon hiç bu kadar vahşileşmemiştir.*

“Girişim kelimesini bilerek kullanıyorum. .... 2002 yılında Sabancı Üniversitesi’ kampüsündeki arama toplantısıyla başlattığımız bu hareket şimdi ilk somut örneklerini veriyor. (Hürriyet Gazeteciliği/ÖnSöz/Ertuğrul Özkök), 2003). Girişim, girişimcilik, legal görünümlü, illegal data, veri hırsızlığı, ileri vakalarda bu makaleye konu edilen ‘Dijital Kölelik’ durumunda ‘köşeyi dönme’ sürecinin, girişimcilik ya da yükselen ve bazılarınca kapışılarak, tercih edilen ‘Inovation’ sözcüğünün, İnovasyona evrilmiş hâli; bu halin kaynak olarak kullanılan legal görünümlü, illegal data hırsızlığıyla, yukarıda adı geçtiği gibi ileri düzeylerde talanın ‘Dijital Köleliğe’ dönüşmüş haliyle ilişkisinin; dijital çağda kapitalizmin geldiği noktayı, kapitalist düzenin kendi çıkarları için dijital mahrem alanları katarak nasıl ortak çıkarları doğrultusunda kullanmaya başladıklarının göstergeleri olabilirler. Sermayem var diyenin fikir için amiyâne tabirle bir kişinin dijital alanlarına musallat olması gibi düşünülebilir.

Dijital Köle, hedef alınarak hortlak haline getirilen, ticari nesneye dönüştürülen ve örülen bir insandır. Uzun soluklu ve süreklilikli avı misali, geçmişinden gelen, erken çalınma dönemlerinden beri varlığından haberdar olanlarla çevrili olduğu bilinmelidir ki, bu çembere alınma kutulanma yöntemine dahildir. Öyle ki, potansiyel emsâl dijital kölelik vaka örneğinin yer aldığı bu makalede, basın, eğlence dünyası, iletişimle ilgili kurum ve kuruluşlarla bağlantısı kurucuların, özel ve tüzel kurumların ‘Dijital Kölelik’ için nasıl baskılama, baskılama için tezgâh kurma, kumpas yapma, yaratma, Dijital Köle’ edilecek bireyin hayatına çökme kademelerini yaratma yapılanması içinde bulunabilecekleri görüşü içselleştirilmiştir çünkü tüm bunları yapabilmekteler. Talan ürünlerinin geniş bir skalaya yayılması hem talan eden kişilerin sayısının çokluğunu ve gücünü temsil eder hem işe siyasileri de kattıkları için etrafın sarılı, hiçbir gücün yok mesajını verir; kurban moduna sokar, çaresizleştirir; korkularını, hassasiyetlerini kullanır, üzüntü yaratır: Örneğin, ülkesinde yaşayan bilge yaşlılara çok saygı mı duyuyor, buyurun alın size bilge yaşlı, birden dostları oluverir ama onun hayatında çalınma bitmez, tam tersi alevlenir. Bu bilge yaşlı da Dijital Reel Psiko-Semiyotik Dil Kullanımında da bilgedir üstelik. Belki de bu bilge yaşlı cidden iyilik yapmış da olabilir. Belki çok daha kötü şartlarda ‘Dijital Köle’ edilecekti: Henüz bilinmiyor.

### **Ahlâk Nedir? Yasa Nedir ?**

Yasal bir sistemin koruma araçlarının olmadığı bir yaşamı (Mlodinow, 2018), modern hukukun yer ettiği yaşama biçimlerinde düşünmek zor ama olmadığı yıllarda dinler inanç sistemleri ahlakâ dayalı bir nevi hukuk yaratmaya çabaladılar. Bir başka söylemle insanlık var olduğundan beri ahlâki öğretiler, ahlâkın yaygınlaştırıldığı bir sistem bulma, kurma arayışında. Antik dönem düşünürlerine bakınız: Socrates, Aristoteles, Descartes, vb. gibi; sözün nüvesi her zaman her çağda gerçeğe, doğruluğa, ahlâkın güzelliğine ihtiyaç duyulmuştur.

Peki, *Modern hukuk sistemlerinde yer alması gereken koruma araçlarının ters (yüz)düz edildiğini düşünün; bir başka deyişle, koruma araçlarının korkutma ve baskılama araçlarına çevrildiğini, bir de tüm bunlara dijital çağda, elektronik sistemin sağladığı 7/24 illegal dijital alanların takibi ve talanı, dijital mahrem alan talanlarına dahil edilen Dijital Psiko-Semiyotik Dil Kullanımları içeriği üretme avantajı ve üstünlüğü kazandıran her aracın dahil edildiğini, bizzat çalanların hukuk alanlarında yer aldığını, bilir kişi ve uzman olarak kanaat liderliği ve önderliği yapabildiğini ekleyin; ‘Dijital Köleliği’ destekleyen ve besleyen bir düzen kurulduğunu, var olanın buna bir yönüyle dönüştürüldüğünü tasavvur edin;* dijital kölelik üzerinden geçen bir grubun, kusur ve hatalarını örtmek üzere tüm bu alanları ayarladıklarını, dijital köleyi sağlıklı koşullarla karşılaştırmamak üzere organize olduklarını özümsemeye çabalayın, işte bu makaleyi yaratan tüm bu koşullar içinde makam ve koltuk sahibi olanlardır. **Bu bir özgürleşme makalesidir** çünkü hâlâ kamuya açık ve

açık olmayan bireye ait dijital mahrem alanları kendi ekranları gibi kullanabilmekte olan gaspçılar, dijital köleye ait dijital alanlarından Dijital Reel Psiko-Semiyotik Dil Kullanımı üretip, eski devranı sürdürme çabası içinde olabilmektedirler. Direnen ‘Dijital Köle’ 7/24 kutulduğu reel yaşam alanlarında da sıkı takibe alınır. Talan ettikleri dijital alanlarını 7/24 dijital takip altına alıp her halinden özel, tüzel Dijital-Reel Psiko-Semiyotik Dil Kullanımları üretip tehdit, psikolojik baskı, karalama kampanyasına konu ettikleri deli göndermeleri ki, bilimsel yaratımını çok iyi anlattığının göstergeleridir. Yani karalama kampanyası, yaratımı olan bilim dalının içeriğinden oluşturuldu. Kırmızı üzerine karalama kampanyası, bu ters köşe psikoloji eylemine girmekte aynı zamanda, dalga, geçmek, alay etmek, ‘Dijital Köle’ye yönelik baskı araçlarından. Karalama kampanyasını ona haber veren bir öğrencisi, “Sizi seviyor ve saygı duyuyorum, size bir itibar suikastı düzenleme hazırlığı içindeler”, diyerek birden fazla e-ileti atmıştı. Talan işinde olanlar bunu sıklıkla yapmaktalar. Eskiden birebirken artık daha incelikli. En son dillerine doladıkları otuz küsur geçen zamandı ki, bu uzak Dijital-Reel Psiko-Semiyotik Dil Kullanımına örnek verilebilir ancak ve nicedir, kamuya açık yazılan hikâyelerin içeriğiyle ilişkilendirilebilir. Bu kişilerin uzun süredir bu işi sürdürdükleri unutulmamalıdır.

“Hâlâ sözcüğü önemli çünkü bu tür oluşumlarda geri adım atma, uzlaşma kültürü yok, tam tersi hâkim oldukları alanları genişletme, daha da baskılı kültürü yer aldığı, otuz seneyi geçen bir süreçte gözlemlenen bir unsurdur. Tüm bu süreç içinde, talan edilen, kafa karışıklığıyla sürüklenen, kumpas ve tezgâhlarla dolu şartlar arasında akademik çalışmalarım ve bilim yaratımlarım özgürleşme savaşına dönüşmüştür ve hepsinden önemlisi artık çaldırılmayı başararak bunu yapabildim.” İlegal talanla örülme, hayırlarla ve bilimle çözmeye eş zamanlı tezgâh ve kumpaslarla da uğraşılacak şartlardır bunlar. Bu kumpas düzeneklerine ait tüm belgelerin saklanması yerinde olacaktır çünkü ‘Dijital Kölelik’ davalarında zaman aşımı diye bir şey söz konusu olamaz. Resmen paralize hale getirilip, ömürlük dijital ve ileri vaka düzeneklerinde ortam dinleme ve gözetleme, sömürü aracı hâline getirilme durumu söz konusudur ve tüm bunlara çok alışkın ve yapılan tüm işlemlerden özel bir zevk alan bir duruma karşı karşıya olduğu tecrübelerle sabittir. Sevdiklerinin yaşamlarıyla tehdit, ölümüyle tehdit, diğer partilerde var olmaları, hatta rakip partilerle işbirliği içinde olmaları, başarısız darbe kalkışmasına kötülük ve kötüler kaynağı olarak deşifre edilen Fethullah Gülen örgütüne atfedilen niteliklerle benzer ama tüm kötülüklerine darbe kalkışması sonrası daha da hız veren bir karanlık duruş. Böylece kötülerin ortaya çıkmasıyla hak aramaya başlayan ‘Dijital Köle’nin etrafının daha da sarılarak, Covid 19 dinlemeyip, sıkı markajla uyduruk dava yaratıldığı sürece girildi. Tüm bunları yaratmak için mobil halde çalışan bir düzenek kurdukları çok açık artık. İşleri sürdürülebilir ‘Dijital Kölelik’ olan talancı gruba bağlı kişileri, belgelenmesi ve bu düzenek içinde tüm yapılanların en azından bazı halleriyle tarihe kazınması kürenin geleceği için bir gereklilik artık. Kısaca ‘Dijital Kölecilerin’ siyasetlerle ilgileri var ve tek bir partide değiller, yazılı-görsel basında işe bulaşmayan veya bulaştırmadıkları kimse var mı? Araştırma konusu ama sürdürülebilir ‘Dijital Kölelik’ için geniş bir çember gerekir. *Mafyatik yanları var ve bu talan işinden elde edilen para diğer tüm yasa dışı kazançlardan da fazla ve diğer illegal işlere oranla yakalanma riski çok daha az çünkü ‘Dijital Kölelik’ diye bir suç tanımı yok ve ‘Dijital Hukuk’ bu teknolojinin doğmadığı yerler için çok yetersiz kalmakta. Tüm bu mafyavari halleri Dijital-Reel Psiko-Semiyotik Dil Kullanımları aracı yaparak ‘Dijital Köleyi’ yerleştirdikleri kutuda tutmak asli vazifelerinin olduğu gerçeği daha başlangıçta anlaşılmalıdır.”*

*Kendi adına, kendi fikirleriyle iş yapamaması:* Yöntemlerden biri de ‘Dijital Köleyi’ kendi yaşamında yerinde saydırmak, rölantide tutmak, hiçbir şey sahibi olmamasını sağlamak, adının fikirleriyle ve buluşlarıyla duyulmasını bu potansiyel emsal vakâda akademik kariyeri de buna dahildir; unutulmamalıdır ki, unvanına rağmen size denen kadroyu kaptıran, anlaşıldığı üzere anda da kadro ihtimalinin olmadığı söylenerek hâlâ doktor öğretim üyesi kadrosunda tutmak ve bunu baskı unsuru olarak kullanmak yöntemlerindedir. Zaten talepler o kadar değişken ki, garibim ‘Dijital Köle’ hayatta kal modunda, rölantide akademik çalışmalarını ancak yapabilmekte, uğraşsın dursun. Düşünün bu makaleleri, yinelenecek sözleşme için talancıların bulunduğu bir yönetim kuruluna sunulacaktır. Bunu bu şekilde ayarlamak bile başlı başına bir Dijital-Reel Psiko-Semiyotik Dil Kullanımı örneğidir ve bir kalıp davranıştır. Doçentlik jürisi de böyle kurulmuştu. Her anlamda maddi manevi zayıflatmak, destekten yoksun kılmak bu yapılanmada bir yöntemdir. Oysa talan ürünlerinin dağıtımında ve onlardan proje üretmekte olağandışı organize olma yetenekleri olduğu gerçeği defalarca gözlemlenmiş ve belgelenmiştir. Makaleye konu edilen potansiyel emsal vaka olabilecek nitelikteki dijital kölenin duygularının yönettiği kaleminden.” Asla akademik kariyer yapamayacak bir konumda tutulacak bir dijital köle olarak hesaplanmıştım. Bir sürü kumpasla, hırsızların intihal suçlamasıyla uğraştıktan sonra gelen bir kadro bu. Rektöre yazdığım e-iletlerden sonra. Tüm bu kumpaslar kork, sin ve sessizce çalın eylemleridir. Önce çok ders vererek, bin beş yüz kâğıt gibi çünkü öğretim görevlisi kadrosunda olmama rağmen bir hocanın yanına asistan gibi verilmişim. İlk girdiğim dersler tüm sene boyunca onun dersleri, hem o dersinin hem de diğer tüm derslerinin kâğıtlarını okumak görevimdi. Başka bir güzide üniversitede onun derslerinden birini bir sene boyunca verdim, başka bir üniversitedeki dersi içinse şoförlüğünü yaptım. Bir üniversite karşıdaydı ve eve dönüşüm gece geç saatleri buluyordu. Üstelik bu üniversite talan edilen günlüğümden yaratılmıştı ve ilk bilimsel bazı Türk markaları buradan çıktı. TV’de TV’ye gezen bu yüz aynı zamanda Muratsuyu’nda akrabalarımın yaptığı villaların (Cüneyt Arkın’ın da villasının olduğu) eğitim dünyasıyla haşır neşir villalardan birinde karşımdaydı. Böyle bir bileşik kaplar durumu, Yetmezmiş gibi, başka bir hoca da onun gelmediği bir gün dersine girmemi

istemiyti. Bunlar hep kasıtlı eylemler ve bu hocanın da hangi çok bilmiş ‘Dijital Köleci’ zenginimize yakın olduğu belli. Atıl tutmak, mizansen sınıflar yaratmak- her beş dakikada bir, bir öğrencinin geldiği, olmuyorsa sınıfı ders ortasında hiçbir şey demeden terk etmek ve sonra hiçbir şey demeden yeniden gelmek; hiç derse gelmemek ki, bir sene boyunca aracımın bekledim: Son senelerin tutum ve tavırlarındandır. İlk on beş dakikası sınıfta, geri kalanı aracımın içinde, annem de evde hastayken bir de; yaptıkları manipülasyonlarına tepkimi ihtarla yanıtlamak, değişmeyecek ihtar sonucu için defalarca savunma yaptırmak; ihtar kararında kimlerin imzasının olduğunu bilmemek. Artık ne özlük hakkı bakmıyor bile. Senelerce bin kılıf örneği görünce; herhalde kişilik hak ve özgürlüklerine giriyordur çünkü haksız intihalde, bir de usulsüz kurulan jüri için ÜAK’ye verdiğim dilekçeye bu yanıt verilmişti. Usulsüz jüriyi kimin bir araya getirdiği açıklanamaz. Belgelediğim çalışma alanlarımın değiştirilmesinin de zaman aşımına sokulması vb. gibi. Neye uğradığımı tam anladığımda bir sakinlik geldi ama bu oyunların ardı arkası ve sınırları yok. Bu vakalar yeni hukuk, dijital hukuk kuralları yaratmak zorunda kalacaktır. ‘Dijital Köleler’ bir şekilde neye uğradıklarını belgelemek zorundalarsa, teknolojik etkisiz kılacak tutum ve tavır bunlarla gelecektir. Baskıladıkları koltukları bırakmak zorunda kalacaklar veya yine bir kötülük katmanından sıyrılacaklardır ki, en azından sürdürülebilir ‘Dijital Kölelik’ için ısrarcı olmayı bırakma ihtimalleri doğacaktır. Talancıların Dijital Köle’ye gönderme yapan oryantasyon konuşması içerikleri: Tüm yapılanlara karşı sus ve konuşma. Öğretim görevlisi olarak atanan ben, tüm bu akademik geçişleri bir yandan talan edilip, 7/24 Dijital Reel Psiko Semiyotik Dil Kullanımlarıyla baskılanırken bir yandan başıma geleni bilimsel olarak çözmeye çalışırken çok çok zor şartlar altında bin hile, hurda, kumpas arasında elde edebildim. İlk başlarda talanımın bulunduğu ortamlarla ilgisini kavrayamadım, bir kondurup bin kaldırdım. Atandığım yerde asla akademik kariyer yapamayacağımı anlayınca ÜAK’ye başvurup yardımcı doçent olmaya çabaladım. ÜAK’ye herhalde on altıncı başvurumda yayın aşamasından geçtim. İnanılmaz bir jüri günü yaşadım. Cüppe ve şapka giydirip başarısız ilan ettiler, bir sonrakinde alırsınız dediler. Jürimde yer alanlar talancı kanallarla iç içeydiler. Hep ilişkili olanlarla donatmak **kalıp bir yöntem**. Yaşadıklarımın bir bölümünü belgeledim. Ardından tüm olanları talan edilen günlüğüme yazmıştım: Kanunda bir boşluk yok mu, yayın aşamasından geçince unvan alınmaz mı? Diye talan alanlarıma yazdığımın akabinde, dış dünyadan ses geldi. Unvanımı böyle aldım. Kadroyu, beni cenderede tutmak için kullanmaktalar. Akademik çalışmalarımı yaparken içine konduğum kutularda yapamama yönelik tehdit, baskı içerikli e-ileti ve SMS’ler aldığımı, evimde yazdığım içeriğe uygun evde takip, çarpma, vurma, dong, hababam sınıfı müziği, alarm, siren, polis sireni, evde ve işte, fiziksel çevreyi böyle kullanmak, 7/24 herhalde kar yağınca da olacak, domatesçi; eskiden kapıma dayanırlardı ve sürekli zilim çalınırdı, başkasına gelen kuryeler, misafirler, PTT benim kapımdaydı. PTT’nin psiko hâle gelmesi uyduruk, kumpas davalar sırasında gerçekleşti. Kasıtlı olarak uykusuz bırakmak, araç camını kırmayı psiko haline getirmek, aralıklı senelerle, yaşadığı apartmanın kapalı otoparkında bile aracın camını kırmak(4. Oldu), aracına bin şey yapmak ki, atandığım kurumun otoparkında aracımın aynasına ayakla çiğnenmiş takke takıldı. En yoğun şekilde TV dizileri için çalıştığım günlerdi. Covid 19 günlerinde dışarı adım attığımda birebir markajlama ve burnumun dibine girip olay çıkarma çabalarının son belgesi de elimde. ‘Dijital Köle’ için Dijital-Reel Psiko-Semiyotik Dil Kullanımlardır. Elimdeki telefonumu tutuş biçimimden beni çekiyorsun anlamını çıkarıp üzerime saldırmaması, dış kapıya kadar peşimden gelişi, çekmiyordum ama saldırıya geçtiği an çekmeye başladım; hukukla tehdit etmek, (inanılmaz bir dille artık avukat olan kızının üzerinden tehdit etmek) tabii ki, ekrandan okuyup harekete geçme, yani henüz yayımlamadığım içeriği senkronize takip, toplu takip asli işleri, kutulandığım yerlerdeki tutum ve tavır aynı, bileşik kaplar halinde hareket ettiklerinin belgelenmesi de önemli ama asıl önemli olan talan ürünleriyle açıkça ortaya çıkmak olacaktır. Hukuk diye yazdığımda alay eden Kadir, gibi Kader gibi anlamları olan hukuk büroları telefon ve SMS’lerle dadanmıştı, düşünün yeni komşunuzun hukukçu olduğunu, size, kapınızı adeta basan site yönetimi alayla söylüyor, “Artık ona sorarsınız” siz, talan edilen günlüğünüze yazıyorsunuz ve senelerce dış dünyadan Dijital-Reel Psiko-Semiyotik Dil Kullanımları örneği olarak tanımadığımız insanlardan topluyorsunuz. Talan edilen günlükten konferans düzenleyenlerin afişleri, talan ürünü marka ve projelerin broşürleri kapıma takıldı; hâlâ 7/24 dijital takibi bir baskı unsuru olarak kullandıklarından, olayın tekrarını yaparak, rahatsız etmek, Dijital Köle artık bıkana kadar, bunların hepsi birer yöntemdir. Bir başka söylemle Dijital Köleyi 7/24 takipten vazgeçmeyerek baskı sağlamaya çalışmak, talan içeriğinde yer alan şikâyet unsurunu tekrarlamak vb. gibi. Her türlü saygısızlığı yaptılar. Evden gidecek param olmadığı için bir de daha beterlerine yönlendirilebileceğim korkusuyla burada yaşamaya devam ettim. Bu arada müzik sektörü üzerimden yürüdü. Çalınan fikirlerimin patenti alındı. Benim hayatımı değiştirecek miktarda param hiç olmadı. Dahası öğretim . görevlisi olarak bırakılacaktım. İntihalle suçlama sonrası, teklif edilen, o dönemlerde adı yardımcı doçentlik olan kadroyu, önce ret etsem de ikna edilip kabul etmem iyi olmuş ama doçentlik unvanımı almayı başarsam da bana bu sizin için denen kadroyu kaptırdım. Aynı anda Yrd. olması kadroyu ve anabilim dalı başkanlığını inanılmaz bir şekilde kaptırdığım kişinin bugünleri daha o zamandan hesapladığı anlamını da verebilir. ‘Dijital Köle’nin başına sürekli işler açarak, belâ öreerek, sürdürülebilir ‘Dijital Köleliği’ gerçekleştirdikleri ortadadır artık: İnanılmaz ölümler, kazalar, yetmedi karalama kampanyaları ve iftira kumpasları dijital talanın ve sürdürülebilir ‘Dijital Köleliğin’ araçlarındandır. “Bilinmesi gereken hâlâ ekranımla senkronizeler ve evim, ben 7/24 dijital gözlem altındayım. Siyasilere tesadüf tesadüftür Dijital-Reel psiko-

Semiyotik Dil Kullanımları, hiç dinmiyor ki, aynı siyasilerin seneler içinde yazılı görsel basında onlarca Dijital Reel Psiko-Semiyotik Dil Kullanımı, talan ürünü projesi vardır; varlığını talan edilen günlüğünden yapılandıranları var. Bilinmesi gereken: Dijital talan dönemini sürdürülebilir kılan “Başkanın tüm adamları”, bazıları baskın bir şekilde kullansa da hiçbir partiyel sınırlı değildir.”

### **Bilim nedir?**

Akıllı olmaya çalışan homo sapiens kendini çevreleyen evrenleri çözmeye ve onları anlamlandırma savaşında tutarlı çözüm araçları aradı. Bilim gerçeğe yaklaşmakta en tutarlı araç olarak homo sapiens tarafından saptanmalı ki, tüm bu saptamalarda bilim de dahil olmak üzere sorgulanabilir olmaları gerektiğinde uzlaşılması gerekerek.

*Öğrenme güdümüz ve bilim;* bir bilim insanının başına akıl alamayacak olaylar gelirse ve kendini Dijital Köle(Algül,2020-2023) olarak tanımlarsa bu süreç nasıl ‘gelişir’in makalesidir bu makale. Adım adım hem bilim insanı olma yolunda yürürken aynı zamanda talan edilen bir kaynak olduğunun belgelerini toplama, andaki bilimin sağladığı, sağlamadığı: Var olan bilimsel bilgiye dayanarak, yeni bilimsel düşün yolları yaratarak, yeni bilim alanları, tanımlamalar ve bakışlar getirerek, icatlar yaparak ve bunları kullanarak kendisini çevreleyen bilip bilemediği anlamlar evrenini çözmek üzere yola çıkan bir bilim insanının başına gelenleri çözmeye yollarına tanıklık edilen, henüz tam özgürlük elde edememiş, her türlü belirsizliğe karşı, umutla yazılan bir Dijital Kölelikten kurtulma ve nihayet özgürleşme çağrısına, bu makaleyle eşlik etmekteyiz, karmaşık gelebilecek yönleri ve tekrarları bir de Dijital Kölelik üzerinden düşününüz. Hiç bu kadar zorlayan bir makale daha önce hiç olmamıştı. Potansiyel emsâl vakanın öznesinin kaleminden: “Yalan, dolan, tehdit, kumpas, ileri düzey terbiyesizlik mizansenlerinin hedefi yapılmak büyük bir hayal kırıklığı oldu. Düşünün hiçbir insanın yaşamında bu denli sürekli kötücül olaylar olmaz, bir ağlatır bir güldürür yaşam oysa; güldürdüğü yerlerde nefes alırsınız, ağlattığı yerlerde mutlu günleri anımsayıp, destek bulursunuz; ‘Dijital Kölenin’ yaşamı hep ağlayarak geçer ki; kendi hayatı yoktur; anlamlı ötekileri üzerinden bin oyun oynanır ve bu bir cehennemdir: Kürenin güzelliği, insanın adresinin olmadığına duyduğu inanç, her şeye rağmen şükretmesi, cennetini yaratmaya olan umuduyla dayanabildi, **asla ihanet etmemesi gereken en büyük inancı, evrende büyük bir gücün olduğu ve bu gücün iyilikten, doğruluktan, güzellikten yana olduğuydu, eğer bu inanç olmasaydı, diğer nefes alabileceği hiçbir noktayı göremezdi, nefes alanları yaratamazdı, tüm bunları yaratan bu inançtı ve bu inanç hep içindeydi;** bu yolda ona nefes olan **herkese sevgisi ise daimi olacaktır.** “ Daha başlangıçta hukuka baş vurma hazırlığı içindeyken, us dışı olaylar oldu ve bu gerçekleşemedi. Sonra olanlar o kadar kafa karıştırıcıydı ki, bir kondurup bin bir kaldırmalarımdan üzerinden ayarlandı ve bu özelliğim bana çok **zaman kaybettirdi.** Yaratımın olan bilim alanını dalını, başıma gelen olaylardan ilham alarak oluşturduğum VinciSafiye(Linkedin) adlı romanım gibi bu makalem de alanında bir ilktir. Burada ifade edilen ve edilmeyen inanılmaz bir dijital talan ve köleleştirilme yaşadım. **Olayın nasıl yapıldığını bilimsel olarak çözdüm ve insanlığa bırakıyorum.** Gelecekteki en büyük tehlike iliklerime kadar yaşayarak öğrendiğim **Dijital Kölelik**dir. Dijital Köleliğin ne olduğunu anlamak ve önlem almak için bu çalışmaların önemsenmesi gerekir. En basit haliyle sunulmuştur çünkü halkın gündelik yaşamında hiç anlamadığı ve kullanmadığı bilimsel bilgi aktarımından oldum olası nefret etmişimdir. **Bu makale insanlığın görüp görebileceği en önemli makedir çünkü büyük bir mücadeleden doğmuştur ve insanlığa sunulmuştur.** İsrarla, her seferinde ‘çaldırmamayı başardım’ ifadelerim ve yaratımın olan bilim dallarını, tanımlamaları ve buluşumu tekrarlamamın arkasında çok uzun yıllar boyunca **illegal, mahrem dijital alanlarının talan kaynağı edilmesi** yatmaktadır. Üzerimden yüzlerce sektör doğmuş, marka ve icat ürünü piyasaya sürülmüştür. Bunlara eğlence sektörünü küresel boyutta ekleyiniz ki, başta Türk popüler müziği olmak üzere, Türk müzik sektörü otuz seneden fazla bir **süre dijital mahrem alanlarının talanı ve tüm hayatıma çökme**, yaşam alanlarının kutulanması, kutularda Schrödinger’in kedisi olarak tutulmam üzerinden başarıyla sürdürülmüştür. **Bu tekrarların** ne demek olduğu, hangi anlamları taşıyabileceği, hangi anlamları yüklenmiş olabilecekleri ayrıca **‘Dijital Kölelik’** üzerinden düşünülmalıdır. Düşünülürse başınıza geldiğinde neler yaşayacağınız da ‘anlaşılır’ olabilir. **Helvâ** olmak istemeyenler, hem talan edilip bir de eğlence nesnesi hâline getirilmek istemeyenler iyice düşünmelidirler.”

### **Kedi Gibi Sıcağıma**

Gel vur tam on ikiden!

Öyle bir gel ki bir anda oynasın yer yerinden!

Gel sensiz anlamı yok!

Ne çok özledim ne çok, o tatlı telaşı bir bilsen.

Al uçur kanatlarında, seyre çıkalım o kızıl ufuklarda.

Hadi aşk beni çağır da yanına kedi gibi sokulayım sıcağına.

Beni sar sarmala da sonra at at kuytularına at beni.

Hazırım razıyım dünden, varım her şeyine senin ben.

Beni kohlara ver istersen yak, yakacaksan sen yak beni.

Gel gel de kavuşalım.

Renk renk gök kuşaklarından hayallere yelken açalım.

Gel tut ki elimden.

Aşk kokulu çiçekli kırlardan masallara koşalım.

**Beni Çok Sev**

Bir kavga nasıl da hoyrat!  
Savaşırken, savrulurken büyüttü hayat.  
Ben sensiz yapayalnızdım.  
Suyum oldu, aşım oldu ama aşksızdım.  
Bir vurgundu geçtiğim yollar.  
Düşe kalka yaşanmış, öğretir yıllar.  
Ben sensiz her şeye sustum.  
Koca dünya dönüyordu; içinde yoktum.  
Sevdanı bulmak yıllar sürdü.  
Hoş geldin gönlüme kaderim güldü.

Tut elimden beni çok sev, kimseye verme.  
Seveceksen ömürlük sev, bir günlük sevmeye.  
İyi günde kötü günde, sakla göğsünde.  
Sen bu kalbe iyi geldin, benden hiç gitme.  
Bir sabahsız geceydi ruhum,  
gün misali gözlerinde güneşi buldum.  
Bir dertli rüzgardım, estim.  
Umutum sen, huzurum sen,  
yeniden doğdum.

**Yazar/Yazar:** Nevin ALGÜL,

**Yazdığı yer:** Karma'yla kesinleşen kabus, Karma albümü dahil, 'Şıkıdım' ve tüm albümlerin içeriğindeki şarkılar birebir yazarı Nevin Algül'e ait bilgisayarından illegal bir düzenekle talan edildi. Hepsi geçecek söylemleriyle dolu olan bilgisayarından, Zaman içerisinde 'İçerikten Çalma' tanımlaması da ona ait ve İçerik Her Şeydir. Tarkan'ın son şarkısı da Hepsi geçecek üzerine kuruludur. İçeriğin de ayrıca ne olduğunun anlaşılması gerekmektedir. Kendine ait, başka hiç kimsenin kullanmadığı bilgisayarı. Şifrelerle, her yıl ya da iki yılda bir yinelenen piyasadan alınmış anti virüs programıyla( tüm koruma ayarları özenle yapılmaya çalışılarak) yüklü. Altı sene de bilgisayar öğretmeni olarak çalıştığı için bilişim dünyasına da uzak değil. İlköğretimdeki öğrencilerini CEBIT adını Türkiye henüz tanımazken Hannover CEBIT'e, en son teknolojiyle etkileşime girsinler diye götürmeye kalkan, idealist bir öğretmen olarak insan evladının her yaş seviyesinde öğretmenlik yaptı. Çoğu şiirinde bitemeyen göz yaşları var. Tüm duyguları talan edilen günlüğünde açıkça yazılıydı, dünya görüşü, hümanistliği de...

Tüm avlama yöntemleri bilgisine sahip ama bu bilgi hiçbir şekilde yeterli olamadı. **Bu da istenildiği takdirde hedef alınan kişinin dijital, elektronik alanlarının nasıl uzun yıllar boyunca taciz ve talan edilebileceğinin kesin kanıtıdır:** Karma'yla kesinleşen kabus, önce Sezen Aksu'nun sahiplendiği, sonra yazar olarak ortaya Tarkan'ın sunulduğu tüm albümleri, hatta basın sunum, haber, söyleşi ve Halkla İlişkiler/PR çalışmaları, karma albümünde yüzünün taval olarak kullanılması, talan ürünü 'Şıkıdım' şarkısını söylerken sahneye çıkarken taktığı belindeki zincirli kemeri, hepsi talan edilen günlüğündendir.

**Nilüfer**

Zamanın eli değdi bize,  
çoktan değişti her şey.  
Aynı değiliz ikimiz de.  
Zaaflarına bir gece,  
hatalarına bir nilüfer,  
sevgisizliğine bir kalp verdim  
Artık geri ver, geri veremezsin aldıklarımı!  
Artık geri ver, geri verilmez hiçbir yanılığım!  
Yokluğuma emanet et,  
sen de, benden kalanları.  
Her şeyi al, bana beni geri ver, bir şansım olsun.  
Başka yer, başka zaman, sensiz ömrüm olsun  
Her şeyi al, bir şansım olsun  
Başka yer, başka zaman, sensiz ömrüm olsun

**Yazar:** Nevin Algül

**Yazdığı Yer:** Kendi Bilgisayarı: Hiç kimsenin kullanmadığı, bir sürü şifresi olan, bir ara dosyaların da şifrelediği bilgisayarı. Sorular: Ekranıyla 7/24 nasıl senkronize olmaktadır? Bu senkronize oluş haliyle siyasi erklerin ilişkileri, vb. gibi. çok sayıda soruların zaman içinde, olası ilişkiler durumlarının belgelendiği, gelecek pek çok durumun delili olacaktır.

**İyi Ki,**

Yağmur istedim yağmadı  
Bir iş bulmuştum sarmadı  
Herkesi duyan beni mi duymadı?  
Çok mu şey istedim de ben, olmadı?  
Bir kere denedim ama  
O da tam olmadı benim  
Senden başka kimsem  
Senden başka kimsem  
Senden başka kimsem olmadı

Sarmaşığım tırmanmadı  
Sırlarım hiç saklanmadı  
Herkesi duyan beni mi duymadı?  
Çok mu şey istedim de ben, olmadı?  
Bir kibrit çaktım yanmadı  
Kutuda başka kalmadı  
Herkesi duyan beni duymadı  
Çok mu şey istedim de ben, ol-ma-dı ya?  
İlaçlar verdim yutmadı  
Fallar baktırdım tutmadı  
İyi ki olmadı

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

### Hakim Bey

Şikâyetim var cümle yasaktan.  
Dillerimi hakim bey, bağlasan durmaz!  
Gelsin jandarma, polis, karakoldan!  
Fikrim firarda, mahpusa sığmaz eyvah!  
Gün olur yerle yeksan olurum.  
Gün olur şahım devri devranda.  
Kanun üstüne kanun yapsalar.  
Söz uçar, yazı iki cihanda eyvah!  
Sussan olmuyor, susmasan olmaz!  
Dil dursa hakim bey, tende can durmaz!  
Yazsan olmuyor, yazmasan olmaz!  
Kaleme tedbir koma tek durmaz!

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını. Tüm albüm isimlerini de talan edilen gündükten kullanmıştır. Buraya konulanlar çok az bir iki örnek, inanılmaz çok sayıda; otuz seneden fazla süren bir örölme ve 'Dijital Kölelikten' elde edilen talan ürünleri olan şiirlerinin şarkı olarak ticari metaya dönüştürülmesi ve şiirleri ben yazdım diye sahiplenen şarkıcıların bir de üzerlerinden telif hakları kazanması durumu söz konusudur. Dijital Kölelikle sömürü nesnesi olan Dijital Köleye ait her çalıntı fikrin, yere konamayıp şarkılaştırılan, *ticari metaya dönen ve telif haklarıyla* üzerlerinden *nesillik kazanç elde edilen bir döngünün yaratıldığı* asla unutulmamalıdır.

### Sil Baştan

Bir varmış, bir yokmuş,  
anlatması zormuş.  
Aklımdan bir şeyler geçer...  
Az gitmişim, uz gitmişim  
Dere tepe düz gitmişim.  
Kırk yıldır gezmişim meğer.  
Gidiyorum yine, içimde aşk var.  
Yelkeni aç yavaştan!  
Ölüyorum ben deyip de kaçmam!  
Yaşıyorum sil baştan!  
Yalnız kaldım durdum.  
Ne hayaller kurdum.

Önümde bir nehir akar.  
Gönül verdim, daldım.  
Müziklerden çaldım.  
Seslerim sözlerim taşar!  
Rüzgar benim, sal benim,  
deniz benim, dalga benim:  
Peşimde kara bulutlar.  
Güneş açmış, sular durgun.  
Halim harap, rengim solgun.  
Derinde saklı umutlar.

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

### Açık Adres

Sorma bu ara şu halimi.  
Bu acıların hepsi mi daîmi?  
Yazık oldu her iki tarafa da.  
Şimdi sence daha iyi mi?  
Bir gün oldu iki gün oldu  
Ay oldu yıl, oldu ümitlere  
Unutmuyor gönlüm seni.

Seviyor her gün her gece.  
Yoruldu, duruldu, kırıldı, vuruldu, birkaç  
kere.  
Yazılıdır hepsi hikâyede.  
Yok mu bir haber alan, yok mu gören?  
Bu mudur adetin, bu mudur tören?  
Yaz ya da söyle bulamadım böyle!  
Neresi açık adresin, neresi yören?

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

### Denizde Akşam

Akşamı süzme deniz.  
Renginden gözüm yandı.  
Engindeki pembe iz.  
Gönlümde halkalandı.

Ufkun kızıl ateşi,  
yanan derdimin eşi;  
ruhum solan güneşi,  
gurbetin gülü sandı.

**Yazar:** Nevin Algül

**Yazdığı Yer:** Kendi Bilgisayarı: Hiç kimsenin kullanmadığı, bir sürü şifresi olan, bir ara dosyaların da şifrelediği.

**Beyaz Köpükler**

Dileğince beyaz köpüklere saklan güzel.  
Döktüm kederimi İstanbul'a uzan güzel.  
Kim bilir, şiirsiz hangi şarkıda gizlisin  
Çektim çileleri İstanbul'a uzan güzel.  
Durma yalnızlığına ağlayan güzel.

**Yazar:** Nevin Algül**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.**Kendime Yeni Bir Ben Lazım**

Bu sene iyi geçmedi; söylemem lazım.  
Kader beni seçmedi ama görmemem lazım.  
Belki birden bire yeniden başlamam gerek.  
Eskiden tapıtığımı bugün taşlamam gerek.  
Yeni bir aşk, yeni bir iş,  
yine gülecek bir neden lazım.  
Yeni bir haber, yeni bir kader,  
bunlar için bana şans lazım.

**Yazar:** Nevin Algül**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

Yeni bir duruş, yeni dokunuş:

Tek tek keşfetmem lazım.

Yeni bir hayat gerisi bayat,

kendime yeni bir ben lazım!

Günler güzel geçmedi unutmam lazım.

Asıp yüzümü kalmışım; azıcık kırtmam lazım.

Hep içime atmışım anlatmam gerek!

Hepsini bir kazana atıp toptan kaynatmam gerek!

**Kalp Kalbe Karşı**

Uyandım birden seninle,  
gece üçü bulmamış.  
Bir bulut durdu gözümde,  
hasret bize uymamış.  
Kalp kalbe karşı derler:  
Sen de üzüldün mü?  
Ay bile çeker gider,

**Yazar:** Nevin Algül**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

geceyi düşündün mü?

Yalnızlık bende saklı,

çıkamaz bir an dışarı;

elimde bir fotoğraf:

O şimdi burada olmalı.

Sensizlik bende saklı

Çıkamaz bir an dışarı,

elimde bir fotoğraf:

O şimdi burada olmalı.

**Kutsal Toprak**

Ne zaman aynayı sevmezsen;  
sana bir de gel benden bak!  
Eğer ateşin yetmiyorsa buyur gel;  
bizi birden burdan yak  
Bu duyguyu tarif edemiyorum.  
Yok! İşe yarar bir tek yorum.  
Gözüm kapalı bile seni görebiliyorum.  
Gülümse! Çekiyorum.

**Yazar:** Nevin Algül**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

Adını yazmışım daha da yazabilirim.

Doldurabilirim yaprak yaprak...

Görebileceğim bir yerde dur!

Neredeyse, orası bana kutsal toprak

Adını yazmışım daha da yazabilirim.

Doldurabilirim yaprak yaprak...

Görebileceğim bir yerde dur!

Nerede yoksan orası bana kapkara toprak.

**Koca Yaşlı Şişko Dünya**

Yükünü bırak, yamacıma çömel!  
Üstün başın yara bere, gülüşün özel.  
Biz bizi iyi biliriz, aynı yolda eskimişiz,  
suretimiz benzer.  
Kiminin babası padişah, sorunu çözer.  
Kiminin babası, fotoğraftan gülümser.  
Kimi gider uzaya, öbürü bir odada,  
müebbet komada.  
Her sabah yeni bir filme başladım.  
Farklı sonlar istesem de hep aynı finalle bitti.  
Sonra birden dank etti, dünyayı anladım.  
Aldım onu karşıma, anlatmaya başladım:

**Yazar:** Nevin Algül**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

Koca yaşlı, şişko dünya

Koca yaşlı, şişko dünya

Ben dağıttım evini, sen erittin beynimi.

,Gel anlaşalım senle, ver gözümün ferini, geri!

Açtım bazen ağzımı, çöp kutusu kapağı.

Sevdim, kızdım, delirdim, dikkatsizler piriydin.

Işıkları kapadım, sabaha geri saydım:

inceden aydım.

İpte laf cambazları, cebinde cimبزları.

Ne söylesek, varmıyor doğru adrese.

Onunkinden bana ne, on ikiden vurmak şart değil!

Yeteriz biz bize.

Ne söylesek varmıyor doğru adrese!

**Hoşgeldin**

Bugün dağların dumanı aralandı, hoş geldin!  
 Ah ışıklar içinde kaldım, yandım efendim.  
 Sen bana yangın ol efendim, ben sana rüzgâr.  
 Tutuşsun gün yansın geceler, zamanımız dar.  
 Sen bana geç geldin, ben sana erken.  
 Tutuşsun gün yansın geceler, vaktimiz varken.  
 Bugün günlerden güzellik sefa geldin, hoş geldin!  
 Ah bu yağmur yalnızlığımış, dindim efendim.

**Yazar:** Nevin Algül,

**Yazdığı yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Hoşgeldiniz**

Sakin görmeyin odalarımı!  
 Kedi enceğini bile bulamadı.  
 Nasıl dağıttım, nasıl savurdum?  
 Nasıl başardım, o odalarda yaşamayı?  
 Hoş geldiniz, hoş geldiniz  
 Vay vay vay yeni mi geldiniz?  
 Ay ay ay çok da şekersiniz!

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Bardak Taşıyor**

Bardak taşıyor, aman!  
 Çok yalnızım, ah kahretsin!  
 Bir deli sevdalıyım, ah!  
 Allah sonumu hayretsin!  
 Engeller büyür,  
 yine bu kervan yürür.  
 O gider ben kalırım arkasından; hayallerim ölür.

Akşamlar kara:

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Tek Kelime Bir Söz**

Beni can evimden vurup yakmaya, bir kıvılcım değil, bir busen yeter.  
 Ellerin elime değmese bile, şöyle bir uzaktan baktığın yeter.  
 Tek kelime bir söz etmesen bile, bir tatlı gülüşle baktığın yeter.  
 Beni kollarınla sarmasın bile, gönlümün içinde yattığın yeter. Bir daha adımı sormasın bile, özlemlerimle yoluma baktığın yeter.  
 Tertemiz aşkınla çağlayan gibi, göntülden göntüle aktığın yeter.

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Hadi Bakalım**

Yerimiz mi dar yoksa, yenimiz mi dar?  
 Ne var?  
 Uçurmuş herkes o da kim oluyor,  
 Sen kimsin, kim bunlar?  
 En büyük kim?  
 Hadi bakalım, kolay gelsin!  
 Bir acayip, zor yarış!  
 Bana ne aman, ben anlamam.  
 Pek hesaplı ince iş!

Sen seni bil, sen seni!  
 Sen sıkı tut, çeneni!  
 Eline, diline hakim ol!  
 Sonra öcüler yer seni!  
 Dikkat!  
 Ah, içimizde ne aç hevesler:  
 Arada hicaz, arada caz nefesler;  
 bir yanımız her duruma müsait;  
 ne kadar uyarı, o kadar ister!

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Aşktan Ne Haber!**

Aç kalbini ben geldim.  
 Sıkı sıkı tut bırakma!  
 Zar zor yıktım duvarlarımı:  
 Kıymetini bil, uzatma.  
 Bak yıldızlarımı döktüm:

Ben anlamam toptan tüfekten.  
 Ben anlamam taştan yürekten.  
 Anlamam akıntıya kürekten.  
 Bunları boşver, ne haber aşktan?  
 Gözlerinin arkasını.  
 Sözlerinin altyazısını;  
 kalp diline çevirdim çoktan:  
 Okudum öz Türkçe acısını.

Açtım kapılarımı gir içeri.  
Gör parklarımı bahçelerimi.  
Anla ben büyük harflerden ürktüm!

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Kardelen**

Ne senden fazlayım,  
ne senden az.  
Aynı macerada ayrı biraz.  
Gözler biçim biçim;  
kalple anlar içim:  
ayrı gayrı olmaz:  
Sen yoksan ben hiçim!  
Aç kardelen aç!  
Dağın olayım,

suyun olayım,  
göğün olayım, aç!  
Her çiçeğin kar altından,  
güneşe giden masalında;  
yaşamak yeniden tazelenir;  
yeniden anlanılır.  
Işığa uzanırken kardelen,  
kış rüyasından;  
ümidin mucizesiyle;  
sevince uyanır.

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.  
“Hygrant Dink/Sanatoryum, Dink’le ilgili üretilen pek çok proje günlüğünden çalma. ‘Dijital Köle’nin tümüyle ticari metaya dönüştürülmesi, metalaştırılması vakasıdır, bu potansiyel emsâl ‘Dijital Kölelik’ vakası.”

**Markiz**

Yoruldu ben seni gönül gözüyle görmekten.  
Eşe dostta hatta kendime yalan söylemekten.  
Şimdi karşımda olsan sana öylece, sadece baksam.  
Konuşmadan da anlaştık biz.  
Boğaz çöl sanki sensiz, yüksek kaldırım öksüz;  
çoktan kapandı Markiz, burada her şey usulsüz,

üzülürdük bunlara...  
Sen biraz utansan da karşılıklı ağlaştık biz.  
Göl gör ki bütün büyük aşklar gibi,  
yarım kaldı hikâyemiz.  
Bir akşamüstü çıksan gelsen;  
yüzün sevda ardın Beyoğlu.  
Sen neredeyse oralıyım ben;  
sıcacık aşkıdır kalbimin yurdu.

**İstanbul**

Kimisi sadece işinde gücünde,  
kimisi sadece heyecan peşinde,  
kimisine sorulmaz bile derdi ne, kiminle?  
kimisi paça sıvar dereyi görmeden;  
kimisi bütün yutar lokmayı bölmeden,  
kimisi düşmez yakadan başa çorap örmeden,  
İnceden...  
Gelip bu şehri bozan, bu şehre gelip bozulanlar  
Hepsi aynı kazanda kayıyor İstanbul da.  
Ne çok canlar yakar, İstanbul.  
Bolca günahlara sokar, İstanbul:  
Hızlı koşanları çabucak yorar, İstanbul.

Çünkü aklın bende, ben de İstanbul'dayım.  
Sen gidersen, İstanbul beklemez.  
Gelirsin gidersen, İstanbul fark etmez.  
Acı çeker özlürsün, İstanbul üzülmez.  
Nasıl nedir hâlin, İstanbul hissetmez.  
İstanbul birini sevmiyorsan çekilmez.  
Dinle beni biraz, şişşt! Sen, SEN!  
İstanbul sever seni sen beni seversen!  
Dinle beni biraz, şişşt! Sen, SEN!  
İstanbul döver seni, sen beni üzersen!  
İstanbul döver seni sen beni üzersen  
İstanbul sever seni sen beni öpersen

“Ama sen istesen de bu şehirden kaçamayacaksın ( Aradaki ‘Doğru Söylüyor’ söz öbeği de çalma, içerikten, senelerce bu şekilde kullanılan talan edilen dijital mahrem alanlarımdan üretildi. Dil kullanımları imza gibidir(Algül, 2024) konusunu kapsayan makalemde detaylı bilgiye erişilebilir. Her yazdığım şiirde benzer mizahi üslup var ve benzer konular çünkü gerçek hislerim, gözlemlerim bunlar.”

**Sanatoryum**

Her ada vapuru,  
sen demektir bana.  
Canım seni çeker  
Bir simit alırım:  
Çaya ..çorbaya, ... martıya simit.  
Bir dikişte akşam oluyor vakit.  
Her Kınalı durağında aynıısı olur;  
İskeleden Hrant, bize seslenir durur.  
Burgaz, zaten Sait Faik, acıyı bal eyleyip;

Tutunana Kuşlara bile seni sordum  
Sendin, yerim yurdum  
Bir gün yazmak istersen adresim:  
Heybeli .Sanatoryum  
Dostlar bıraktılar buraya; Bulutların arasına.  
Temiz hava, bol hatıra...  
Ben burada sana doydum.

**F.D.**

Onuncu ayın onuncu günü saat on buçukta;  
yanmış mumum.

Otuz beş yıl olmuş ihtiyar bir çocuktur güzel ruhum.

Okulu asıp oyuna kaçır bıraksam hâlâ  
ama çok düştü, incindi, yoruldu dinlenmeli kalbim  
doğrusu.

Sen doğum günü hediyem misin?

Diyelim ki hoş geldin!

Peki beni çok sevecek misin?

Yoksa sen de her düş gibi çabucak kırılıp dökülür müsün  
Gözlerimden ?

**Yazar:** Nevin Algül

**Yazdığı Yer:** Kendi Bilgisayarı: Hiç kimsenin kullanmadığı, bir sürü şifresi olan, bir ara dosyaların da şifrelediği.

“ N’ de?”, F.D’ye dönüşmesi de talan alanından, kızıp yazınca bu şekilde doğru olan da ondan, “ee bari adını kullanmayı öğren çaldığın şiiirde.” Senelerce böyle bir kavga ile yaşamak. İlk çıktığında farklı lanse edildiğini takip edenler bilirler, bunların hepsi kayıtlı, onca sene özgürlük için çabalamak ve belgelemeye çalışmak, sabırla, beklemek.

**Tek Taş**

Paran cebinde kalsın!

Bırak artık rahatsın.

Bu kız malı mülkü ne yapsın?

Çalışır yapar!

Tek taşını almış,

tam turunu atmış;

yüreğin kaç karatmış,

bu kız onu sorar?

Sağ eller havaya,

Pırlantalar buraya!

**Yazar/Yazan:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Gençliğime Sevgilerimle,**

Zaman makinası olsaydı ve kendi gençliğime, Meselâ on yedi yaşına dönseydim; kendime şunları söyledim:

En önemli şey aşk onu doya doya yaşa bu biiiir, Ne yapmayı sevdiğini bul ve sonra o sevdiğin şeyi yapabiliyor musun, ona bak! Yapamıyorsan, boşuna enerjini tüketme, yapabilenler yapsın! Yapıyorsan, dünyanın en şanslı insanların birisin; dilini ısır, kimseye söyleme! Sevdiğin insanlar bul, işlerini onlarla yapmanın yollarına bak! Hayat: Yap, et, çalış, ‘başar’la geçiyor ve bu maraton çok sevdiğinle geçerse, iş yapmamış, sürekli aşk yapmış olursun. Birkaç kişinin elini sıkı sıkı tut! Onların dertleriyle dertlen; mutluluklarıyla uç, dediklerine kulak ver,

Onları kaybetme! Her şey değiştiğinde senin en orijinal halini, bilip sevenlere ihtiyacın olacak. ....

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

Yukarıda yer alan düz yazı çok daha uzundur ve sonuna kadar bilgisayarından birebir talan edilmiştir. Makalenin uzunluğu nedeniyle kısaltılması gerekmiştir. “Bu us dışı örülme ve yapılanmada düz yazılarım bile talan edildi. Resmen olmadıkları kimlikleri giydiler ve bu yönleriyle bilimin konusu edildiler ve yaptıkları, bilimsel olarak çözümlendi.”

**Çok Aşığın Var Diyorlar**

Çok aşığın var diyorlar;

Yalan de, yeter bana.

Bir sevda sözü fisilde,

Hazırım inanmaya.

Geceler uzun ve yalnız;

yoksun sabaha kadar

Düşümde bile günahkârsın;

bunu kim hayra yorar?

Ardımdan deli diyorlar,

Belki de yalan değil!

Yanımda bile uzaksın;

nasıl dayansın bu gönül?

Gel, tanışalım önce

Ben kısaca Ne(v)!?

Ama sen bana uzun uzun "seni seviyorum" de!

Ah, ne az duydum...Ne kadar az söyledim.

İşte bu yüzden hiç durmadan, "seni seviyorum" de !

Şair çok iyimsermiş; yolun yarısına mı geldik ?

E, radyasyon neslindenim, biraz erken tükendim ( hepimiz gibi ).

Gülüşlerim vardır elbet;

önce göz yaşlarımı silmen gerekecek,

budur, zordur sevmek !

Ne yapayım pırlantayı parmağımda?

Olur bir gün şan, şöret ün para.

ama aşk her gün karaborsada.

Bir sevgilim yoksa kollarımda,

Ne yapayım pırlantayı parmağımda?

Cebindeki kalsın sana.

Sol üst köşeden harca bana.

Pırlantamı aldım ama

*pırlanta gibi kalp lazım bana.*

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Erguvan Zamanı**

Erguvan zamanı gel bana e' mi?  
Bir daha hiç gitme, aman ne Olur!  
Çiçekler solmadan gelmeyeceksen;  
Boş yere bekletme, aman ne Olur!

Erguvan baharın aşka Daveti;  
aşk için neyleyim başka daveti:  
Erguvani büyü sarmış dört yanı,  
unutsun gönlümüz kışı, hazanı  
Ve sevda yaratan mutlu zamanı:  
Bu defa kaybetme, aman ne olur?

**Yazar:** Nevin Algül**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını**Ebruli**

Uyanır gece yarısı, yoktan sevda yaparım.  
Adamım bu küçük işlere ben bakarım, yanarım!  
Adamım bu küçük işlere ben bakarım, yakarım!  
Dilsizler bana danışır, kelebeklerin aklı benim.  
Gemilerle her gece ben, çok uzaklardan dönerim.  
Adamım bu küçük işlere ben bakarım, yanarım!  
Adamım bu küçük işlere ben bakarım, yakarım!  
Adamım bu küçük işlere ben bakarım, yakarım!

Çağırır küçük adımları, karafakiden ben akarım.  
Benim adım Ebruli, biraz gerçek biraz rüya;  
Sen unut geçmişini, ben aklımda tutarım.  
Adamım bu küçük işlere ben bakarım, yanarım!  
Adamım bu küçük işlere ben bakarım, yakarım!

**Yazar:** Nevin Algül**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.**Yaşın Hep 19**

Hadi bana sor, sevmek bu kadar mı zor?  
Senden başka yok, bildiğim yol.  
Hadi bana sor, gezginci ruhumuz bir gün biterse,  
korkmadan deriz gururluyuz.  
Eksilirse ağlayanlar çevremizden  
ya gerçeği söyleriz ya da nasıl istersen...  
Ne güzel şeysin sen, hep yaşın 19.  
Gel yanıma sar beni, bugün var, yarın yokuz.

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.  
“Gel yanıma sar beni dediğim de kendim. Bu yapılanma, sürdürülebilir dijital köleliği dış dinamikleri kontrol ederek sağladı. Resmen kutulanma, kabalıkları, yapılan yanlışları yazarak attığım çözümlendiği için bin mizansen yaratıldı. İnanılmaz ama gerçek bir yapılanma. Bu talan bu şekilde gerçekleşti ve gerçeklere sadık kalmak zorundayım. Manda ürünleri ve kefire nur yağması, preslenmiş mısır patlağı dahil, inanılmaz sayıda çok talan edilen fikir piyasada tutan, başarılı ürünlere dönüştürüldü. Enerji kontrolüyle yapıldı bunlar, bu kontrol mekanizması hedefin istemediği, onu paralize eden enerjilerle onu bir çembere almak üzerine dayalı ve son ana kadar yapacaklar. Öyle hesaplı işler ki, alacağınız ürünleri bile manipüle eden bir yapılanmaya bağlılar. Bu yüzden sürekli ters psikolojiyle düşünmek zorunda kalınabilir.”

**Sarı Laleler**

Uykulu gözlerle döndüm rüyamdan.  
Sana sarı laleler aldım, çiçek pazarından.  
Sen olmasan buralara gelemedim ben.  
Sevemedim bu şehri, anlamazdım dilinden.  
Nasıl bir sevdaysa bu karşı koyamam.  
Dayanamam kıskanırım seni paylaşamam.  
Satırlar uçar gider aklımdan.  
Sana sarı laleler aldım çiçek pazarından.  
Yeniden başlasam bu sefer korkmadan.

Koklayıp birbirimizi çöpe atmadan.  
Satırlar uçar gider aklımdan.  
Sana sarı laleler aldım çiçek pazarından.  
Nasıl bir sevdaysa bu karşı koyamam.  
Dayanamam kıskanırım seni paylaşamam.  
Satırlar uçar gider aklımdan.  
Sana sarı laleler aldım çiçek pazarından.

**Yazar:** Nevin Algül

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.  
Yapılanma, hedefi çözümlenen korkuları, rahatsız olduğu her şeyle ki, köle için artık Dijital-Reel Psiko-Semiyotik Dil Kullanımları olan negatif bir çembere alabildiği yerlerde kutuladı. Bir başka söylemle kontrol edebileceği yaşam alanlarına koydu. Bu talan bu şekilde gerçekleşti.

**Gitme Yoksa,**

Gitme yoksa içerim, bütün uyku haplarını;  
sonra karıştırırsın ruh kitaplarını...  
Bir mektup yazarım; hep seni sevdiğimle biten;  
sonra artık hesap et, bir daha olur mu hiç neşen\*  
Gitme yoksa atlarım en yakın köprüden,  
hafızaya gerek yok; bu olur tek hadisem.  
Gitme, yoksa katlederim bizim yan komşularını;

sonra polise derim; öldürmüş masumları.  
Gitme, yoksa düşer yolum kiralık katillere;  
sonra vurup durursun, ıssız sahillere.  
Gitme, yoksa adım geçer akşam haberlerinde;  
gitgide yaşlanırsın bir akıl hastanesinde.  
Gitme dünyam dönsün, dönsün!  
Ben hiç kimse ölsün mölsün; istemem!  
Gitmeeee, terk etmeeee!

**Yazdığı Yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarını.

**Sürdürülebilir Dijital Kölelikten Üzerinden Talan Edilen İlegal, Mahrem( Özel) Dijital Alanlardan Çalınan TV Programları, TV Dizileri, Sinema Filmleri, Akademik Kitap, Konu ve Başlıklarından ve Şiirlerini şarkı olarak söyleyen ve Birebir Sahiplenen şarkıcılardan Örnekler:**

Sezen Aksu, Tarkan, Sertab Erener, Nil Karaibrahimgil bu talanın başından beri var olan isimlerdir. Sezen Aksu ilk çıkışıyla son bulan müzik yaşamını seksenlerin sonu 90'ların başından itibaren talan edilen günlük üzerine kuran bir şarkıcıdır; Kayahan, Barış Manço, Mustafa Sandal da o dönemlerdendir; Bu isimleri Teoman, Göksel, Candan Erçetin, Gülşen, Kenan Doğulu, Ozan Doğulu, Feridun Düzağaç, Bülent Ortaçgil, Yaşar, Nejat Yavaşoğulları, Yıldız Tilbe, Nazan Öncel, Hande Yener, Ziyet Sali, Murat Dalkılıç, Simge, Zeynep Bastık, Tuğba Yurt, Murat Boz, Ferhat Göçer, Aydılgö, Gülben Ergen, Burcu Gündeş, Ebru Güneş, Yalın, Ayşe Özyilmaz, Ayşe Hatun Önal, Kazım Koyuncu, Buray, Manuş Baba, Mabel Matiz, Koray Avcı, Soner Sarıkabadayı, Mehmet Erdem, Ferhan Akgül, Ferman Toprak, Aleyna Tilki, Ari Borakas, Can Bonomo, Nadide, Ebru Yaşar, İbrahim Tatlıses, Ahmet Kaya, Seda Sayan, Müslüm Gürses, Ferdi Tayfur, İsmail Türüt, Ajda Pekkan, Emel Sayın, Erol Evgin, Hande Ünsal, Seden Gürel, Bendeniz, Rafet El Roman, Of Aman Nalan, Hakan Peker, Oğuz Peker, Ali Güven, Eda-Metin Özülkü, Soner Arıca, Okan Bayülgen, Akın, Metin Arolat, Sibel Alaş, Emrah, Sibel Tüzün, Mithat Körler, Mithat Can Özer, Edis Görgülü, Yonca Evcimik, Funda Arar, Kıraç, Mahzun Kırmızıgül, Fedon, Atiye, Şebnem Ferah, Eflatun, Yonca Lodi, Harun Kolçak, Aşkın Nur Yengi, Pınar Aylin, Zeynep, Doğuş, Mirkelâm(Adı da talan ürünü), Burak Kut, Koray Avcı, Aydın Kurtoğlu, Simge Sağın(Soyadı ekleyip çıkarıyorlar Edis'le beraber, değişmiş olabilir),Hadise, Hepsi, Ajlan Büyükburç(ikili olarak çıkışı ve ben yazdım dediği şarkılar), Kerim Tekin, Pamela, Yeni Türkü, Ezginin Günlüğü( Bilgisayarım da bu adı taşıyan şiirlerimi topladığım dosyam vardı: Çalma şiirlerimle ortaya çıktılar), Nev, Adamlar, TNK, Selami Şahin, Manga, Mor ve Ötesi, Demet Akalın, Serdar Ortaç, Bengü, Berkay, Yeşim Salkım, Sinan Akçıl, Kekili, Mustafa Cecili, Recep Aktuğ, Zerrin, Levent Yüksel, Ayna, Ayla Çelik, Tuğba Ekinci, İzel, Ercan Çelik, ve grup olarak, Hüner Coşkuner, Ferda Anıl Yarkin, Hakan Altun, Fatih Taşçıyan, Ege, Melihat Gülses, Rengin, Davut Güloğlu, Fikret Kızılok, Cimilli İbo, Ayşegül Aldinç, Zuhul Olcay, İsmail Türüt, Vedat Sakman, Jale, Kibâriye, Kubat, Oya Bora ikilisi, Eda-Metin Özülkü, Yusuf Güney, Emre Kaya, Emre Aydın, Deniz Arcak, Gökhan Kırdar, Jale, Hüner Coşkuner, Gülay, Naşide Göktürk, Müşerref Akay, Volkan Konak, Gökhan Tepe, Gökhan Türkmen, Kardeş Türküler, Mustafa Topaloğlu, Yavuz Bingöl, MFÖ, Mazhar Alanson, Hülya Polat, Gökhan Özen, Özlem Tekin, İlhan Şeşen, Zülfü-Aylin Livaneli, Fatma Turgut, Niran Ünsal, Ayla Çelik, Sibel Can, Emre Altuğ, Demet Sağıröğlü, Şebnem Ferah, Hülya Avşar, vb. İrem Derici, Hülya Avşar, . Tüm bunlara klasik müziği, hatta operayı sevdirmeye fikirleri dahi. Hakan Aysev örneği. Çok sayıda çalıntı konu, sergi ve sergi alanı var. Talan edilen koca bir ömürden bahsedilmektedir. Talan burada yazılanlarla sınırlı değildir. Son dönem yeni çıkan şarkıcılar, tüm albümleri çalarak çıkmışlardır.

TV dizi ve programları, sinema filmleri: Bir Demet Tiyatro( Ad, karakterler, Feriştah ve fazlası), İtilmiş Kakılmış, Cin Ali tiplerleri, Güldür Güldür(Ad, karakterlerden bazıları, konuk edilen sanatçılar ve daha fazlası-keşke benim olsa), Komedi Dükkanı, Çok Güzel Hareketler Bunlar, Survivor( tümüyle talan edilen günlükten, adı, tüm kurgusu, Yemekteyiz( Acun Ilıcalı'nın patentini aldığı , yapımını yaptığı tüm programlar talan edilen günlükten birebir alınmıştır) , Baba Evi, Derya'lı Günler, ( biçki, dikiş nakış ve yemeğin gündüz kuşağı programlarına girmesi, aynen Türk dizileri dönemi gibi)Altın Günü, Evlilik programları, başlangıç Saklambaç'la, Ömür Dediğin, BBG'ler serisi( TV ortağının kurumunda çalışmaya başladığı zamanlar), Tatlı Sert,( Adı sanı tüm kurgusuyla, Hukukçuların, astrologların, psikologların çalıntı programlara dahil edilmesi), Çarkıfelek, Doktorların kendi programlarının olması, çoğu ilk talan edilen günlükle başladı. İyi Fikir, Kim Milyoner Olmak İster, Kelime Oyunu, İşte Benim Stilim'le başlayan ilkler(Birebir), Saba Tümer'in çıkardığı bazı konuklar ve konu başlıkları, bayan kahkaha olması, viral ünlü PR'ları "bir başka söylemle talan edilen günlüğüme yazdığım kritikler üzerinden, daha çok yalnızlaştırma daha çok yazmamamı sağlama üzerine kurulu bir çembere alındım." Hâle gelmesi, PR'ları, Baykuş (Okan Bayülgen- gece canlı yayınlar dönemi Cem Özer-Okan Bayülgen), Okan Bayülgen (Televizyon Çocuğu), MasterChef, Reality şovlar, "kan var mı kan" dan bugünlere: Hayat Batuhan'a Güzel: Birebir çalma, Yeşil Elma( Birebir çalma, ayrıca gündelik içerik çalma, ekrandan Dijital-Reel Psiko-Semiyotik Dil Kullanarak mesaj iletme) Yemek Yapma programları, Dokun Bana( araca dokunma ve hiç bırakmama), TV Dizileri: Revize edilen: Yaprak Dökümü, Aşk-ı Memnu, birebir dil kullanımlarına kadar aynı olanlar var. Giyim, kuşam, saç, baş. Şarkıcı ve Tiyatrocu seçmeye yönelik tüm yarışma programlarının çıkışı... Fatmagül'ün Suçu ne? Birebir çok pek çok unsuru bünyesinde barındıran, bordo mantosu dahil, bu karanlık yapılanma renkleri, isimleri, Dijital- Reel Psiko-Semiyotik Dil Kullanımı aracına dönüştürüp baskı amacıyla kullanan bir yapılanma ve bu da yöntemlerindedir. Kırallık Aşk, Gönülçelen, Hatırla Gönül, Canım Ailem, Nasıl revize edilirse çok tutulacağı fikrim birebir çalındı. Aşk-ı Memnu ( Behlül kaçır ve daha fazlası), Masumlar Apartmanı, Yeşil Deniz, Bir Yusuf Hikâyesi, Kızılıcak, Ruhsar, Ekmek Teknesi, Asmalı Konak( artı iç turizm hareketliliği), vb. gibi, çok daha fazlası Gittim, Gördüm, Yedim, Gezenti, Radyo Programları, Melekler Korusun; Kırmızı Koltuk, Çukur( lansmanı birebir), Teşkilat(ad), İkinci Bahar, Mühürülü

Güller, Leyla ile Mecnun'un gülmeceye dayalı versiyonu, İstanbul Yeditepe( şarkısı da dahil, birebir talan günlüğünden), Avrupa Yakası ( İleri kasıtlı Dijital Reel Psiko-Semiyotik Dil Kullanımları olan, birebir karakterlerinin konusunun, dil kullanımlarının aynı olduğu TV dizisi, ilklerden, Jet Sosyete, Pis Yedili( Buradaki Müdire karakteri kesinleşen manipülasyonla çalışmaya başladığı İlköğretim Müdiresinin ta kendisinden ilham alınarak yaratılmıştır, Kadınları Anlama Kılavuzu, okulun kurucularından biri veya ikisi bir TV kanalının sahiplerinden, eğlence sektörü duayenlerindendi, tüm sistematik çalınma ve inanılmaz olaylarla örülme o dönem başladı, atanmayla kesintisiz hâle döndü) Harem, Hayat Bilgisi, İkinci Bahar, Asmalı Konak, Ah Bir Bulut Olsam, Muhteşem Süleyman, Aşk Yeniden şarkısıyla beraber. Kiralık Aşk (Birebir konu, şarkı, reklamlar) Bizimkiler( eskilerden değil, yenilerden sona gidileceği için eskilere pek yer vermemek tercih edilmiştir), Düriye'nin Güğümleri, Tatlı Hayat, Atiye, En Son Babalar Duyar, Zengin Kız Fakir Oğlan, Ruhsar, şarkısıyla beraber, Bizimkiler, Gülşen Abi, Yedi Numara, Masumlar Apartmanı, Sevgili Dünürüm, Hayat Bilgisi, Mahallenin Muhtarları, Karadeniz Dizileri: Gül Beyaz, Naciye'yi Kim Sevmez?, Türk Malı, Alemelerin Kralı, Canım Ailem, Yeter Anne, Atiye Dizisi ve bu dizinin ilgili olduklarıyla yaşamının ilişkisi vb. gibi. *Haber Programları, Belgeseller:* Tarafsız Bölge, TekeTek, Tarihin Arka Odası, Memleket Meseleleri, Akla Akıl Katanlar, , ödül alan Karadeniz'e (Isıklı konuşanlar) ve Karadeniz kadınlarına yönelik belgeseller, Kuzey'in oğlu, Limon Ağacı , Kadın İsterse, Dadı, Yedi Numara, Hayat Bilgisi, Başıma gelen her şey insan sevgisi gibi, filmlere serpiştirilen ve slogan olan yüzlerce dil kullanımı.

Zaman Treni, Nasıl Yani, çok sayıda, Açık ve Net, Reklamarkası(Ad, konu, tasarım) Türkiye'nin Nabzı, Medya Mahallesi Öteki Gündem, İyi Fikir, Muhteşem Süleyman( Danışmanlar ve araştırmacı senaristler dönemi/PR'ı), GORA, Her Şey Çok Güzel Olacak(şarkısıyla beraber), Organize İşler( Nil Karaibrahimgil'in söylediği şarkı da birebir talan edilen günlükten), A.R.O.G., Pek Yakında, Her şey Güzel Olacak, Umudun Kıyısında, Mayıs Sıkıntısı( konusunu bilmiyorum, ad talan ürünü) , Yüreğine Sor, aynı yönetmenin belgeseli, horonda söylenen şarkı tümüyle Çalma Gönülçelen şarkısıyla beraber birebir talan ürünüdür. Teoman albümlerce, Müslüm Gürses'li projeler dahildir; Salıncak şarkısından tutun dizi içindeki şarkılar da talan ürünüdür. Kahpe Bizans, Deliha serisi, Kocan Kadar Konuş, Kutsal Damacana, Evim Sensin( filmin lansmanı da talan günlüğünden, adı ve konusunun yanı sıra ) Yalnız adam, Recep İvedik ilk çıkış ve serisi, ad birebir, ilkinin konusu birebir. Şahan Gökbakar önce TV 8'deki çalını skeç içerikleriyle başlamıştı. New York'ta Beş Minare, Hayat Devam Ediyor, Güneşi Gördüm, Televole, Vizonte, *Uluslararası*, İş yapan Netflix dizileri adı da çalma, Truman Show, Maske, Thronların Savaşı, Gravity, İntersellar, Fransız filmlerinden bazıları(Asteriks Serisi), Vikinglerin sinema konusu olarak dönüşü, , Yüzüklerin Efendisi, Harry Potter'ın çıkış hikâyesi, kafelerde yazılan roman ve isimler ve konu, The Office, Mask, Diriliş, çok sayıda, Televole ilk çalınanlardan. Kelime Oyunu; Pokemon, Sim City, Meclis Taksi,( İntihalle suçlandığım Ankara'ya gidip geldiğim günlerde yazdığım tasarımımdan birebir çalındı) Trafikte Kadın( Algül,2016 ) Trafikte kadına şiddet dili diye bir makale çalışmam da bulunmaktadır. Öğrencilerimden birinin dediğine göre böyle bir TV programı da üretilmiştir. Araç motoruyla ilgili tüm TV programları, Motoru sesinden anlayan reklam çıkışları, ilk NTV ki, arkada anlık canlı görsel kullanımı talan edilen günlüğünden ilk NTV'de, havayı koklayan Bünyamin Sürmeli gibi reklam çıkışları, talan alanlarımdan. Uber adı değil ama sektör yaratımı talan edilen dijital alanlarımdan. Matriks( "adı bana ait değil ama ilk Matrix filminin içeriği." Turkcell, Vodafone( isimler, reklamlar, Turkcell isim ve reklamları birebir çalma ve hâlâ telefon müziği olarak kullanılmaktadırlar."

Aplikasyonlardan: Bisu, Forgiven App. vb. gibi. Kamu Spotu, birebir çalma, ilk reklam ve konuları da çalma. TV kanalları: Ulusal Kanal, Us TV, Kanal D, Habertürk, Beyaz TV, Kanal 24, 360, ATV, Beyaz TV, Planetler serisi, Prince(Purple Rain), Belinda Carlay, Laura Branigan, Genç Iglesias(Hero) , Sting, Madonna, Michael Jackson, Cindy Looper, Aha, Lady Gaga, Modern Talkings, Enigma, Björk, Black, Michael Bolton, Road to the hell,The Final Countdown,(Europe) "Not: Bunlar listeme bakmadan yazdıklarım." Pokemon, Twitter, adı, konu, fikir, tasarım, WhatsApp, Instagram adı hariç, FaceBook adı ve her şeyi, Beymen T-BOX, giyim kuşam fikirleri, Cotton, Wepublic, ve ötesi, Siyasi arenaya zenginlerin inmesi projeleri , Network, Wolford, Gossip Girl, Kasım'da Aşk Başkadır, Eataly, Mavi Cins(/ İlk Türk Markası kot), Turkcell, Vodafone, Sim City, City Farm, Ekotime, Market isimleri ve çıkış alanları: Bim, Şok, A101, MakroCenter, Mado, TV Kanalları: Show TV(ŞOV'du SHOW olarak çıkarttılar), Habertürk(Habertürk), Kanal 24, TV360, Beyaz TV, Kanal D, Tematik kanallar, Ulusal Kanal, Us TV, Planet TV serisi, vb. gibi: Kafa karışıklığı bölümünde değerlendirilebilir. Yandex, Gıda sektöründe marka olarak Reis'in yer aldığı dönemler, çoğaltma olarak değerlendirilebilir. Tüm Yöresel yemek günleri ve festivalleri, Karadeniz hamsi günü, pek çok belediyenin projesi, Netflix'in pek çok dizisi: Black Mirror(Adı ve ilk bölümler birebir),Desperate Housewives, inanılmaz çok sayıda Hollywood filmi. Da Vinci, önce filmi yapıldı sonra dizisi, birebir içerikten çalma var, vb. gibi. Askıda ekmek, askıda kart, medikal bitkiler, bitki satışları, (belediyeler kaptı), Yöresel yemek günleri, haftaları, hamsi günler, içinde kuş tünekleyen mekânlar vb. gibi Bill Gates'in notları, Da Vinci'nin notlarını satın alması, Google Scholar, , Google da resim aratma ve çok daha fazlası, Da Vinci Gibi düşünmek adlı kitap, Simyacı, Forest Gump dahil ve yok yok neredeyse...EngelsİZ( dil oyunları ilgi alanı) projeleri, BeynSİZ, outdoor sanat faaliyetleri vb. gibi.

BÜMED'in yaptığı projeler, İkinci Bahar dersleri, modülleri dahil, Tarım, kooperatif, meraklı çocuk, ve atölyeleri, Dergi başlıkları BÜ'yülü Gün vb. gibi. Üniversite adları: Nişantaşı Üniversitesi, İstanbul Ticaret

Üniversitesi, Bilgi Üniversitesi ve bono gibi, bazı projeleri, Boğaziçi adının bir marka olarak, orta öğretimde kullanılması vb. gibi. Eski Twitter tümüyle çalıntı .Linkedin, Facebook, WhatsApp, Instagram (adı değil), vb. gibi.

Özel kurye sektörünün yaratımı, ilk kurye adları ki, yaşamının bir yerlerinde hep oldular, Yurtiçi, MNG, Aras, Trendyol, Vigo, Hemen, Getir ki, çıkışı, reklamları, sloganlaştırılıp kullanılan reklamları, talan alanından birebir, üstelik LinkedIn'de kamuya açık yazılan 'Sözcüklerin Benimle Oynaşması Mesel Meseli'nden Umud, Getir Bir Mutluluktan da devşirilmiştir(linkedin/nevina Benimle Oynaşması Meselesi).

**İnanılmaz çok sayıda vakıf ve dernek adları, akademik dergi, marka adları,** Organik Marka adları city farm, Orvital, Ekotime vb. gibi.. Reklam Arçelik Reklam filmleri Geri Gary gibi, Arçelik, Sleepy Markası, Reklam içerikleri, Akbank Reklamları, Dil Kullanımları N(en/ne)Kolay, ENNTV vb. gibi, Kredi kartı adları Adios ve reklamları, Ezel Akay'ın çektiği reklamlar, Halkbank/Paraf kart adı ve reklamları, Vakıfbank/Türkân Şoray'lı birebir reklamları( Algül, 2017) Türkân Şoray ve halden anlayan gözler), bonus, vb. gibi. "Şapkasız çıkmam abim"li MFÖ reklamları, Migros'un reklamları, İyi tarım, Migros Size İyi Gelecek, Telefondaki cıngıl müziği lami cimi yok, Yurtiçi Kargo ilk çalışanlardan, MNG Kargo, **Aras Kargo, Aras adında birinden günlüğümde bahsettiğim akabinde, Kafa karışıklığı yaratma ve düşünmeyi kesmeye yönelik bir taktik mi?** Asıl çalınmayı karartan bir yöntem olarak dikkate alınmalıdır; kafa karıştırıcı olarak kullandılar. Trivago, Biletix, Ekşi Sözlük, Yemek Sepeti, Çiçek Sepeti, MediaCat, Kırmızı Kedi, Çok sayıda web sitesi adı ve iş alanı: Kariyer Net, Sahibinden Com, Kitap ad ve konuları: Usta İş, Reklamcı Yazar, SekSever; Ağdaki Şüphe, Etkileşimli TV, İlk radyasyon kılıfı veren kitap, aynalı kitap, Halkla İlişkilerin İdeali, Fi, Pi, Çi, Havva'nın Üç kızı, Maraz, Vücudunu Kullanma Kılavuzu, Araf, Kara Süt, Yeni Hayat, Masumiyet Müzesi, Kara Kitap, Gönül Defteri, vb. gibi. X'de yer alan eski adı benden çalındığı şekliyle Twitter olan mecrada kullanıcı adı ve profil içeriğinde yer alan tanımlayıcı bilgi: Comicman adı ve Profilinde yer alan: Çayır çimen gezen adam. Bazı talancı ünlülerin profillerinde yer alan özlü sözler, örneğin: Hem gezen hem okuyan gibi, çok sayıda bulunmaktadır. Bu talana katılımın boyutunu da gözler önüne serer. Yabancı X' kullanıcı adları: Thinking West, Culture Critic vb. NASA'nın renklenmesi ve pek çok projesi, Şili'de göğe çıkan merdiven, ve gökyüzü/uzay seyrinin ticarete ve turizme dönmesi, geri dönen mekik fikri vb. gibi çok sayıda, şaka gibi ama değil, lider ve kanaat önderi seçimlerindeki fiziksel özelliklerin öneminde dikkat çektiği pek çok nokta vb. gibi. Titri Fikri, Alamet-i Farika gibi reklam ajansı, isimleri, bazı gazetecilerin birebir dil kullanımlarını ve talan edilen günlüğün konularını sahiplenmesi vb. gibi. Zuchhini'nin çıkışı(Ad değil alan), pek çok makarna türü, süsüz ürün fikirleri, süre okuyan namazgâh, mıknaatıslı kadın eşarbi tutucuları vb. gibi çok sayıda ticari ürün.

**Akademik buluş ve fikirler:** "Tezin alıntı ve özgün niteliğini ölçen yazılım(sözde intihalle suçlandığımda aklıma gelen bir fikirdi, günlüğüme yazdım) , ilk yapan Turnittin'le MÜ. Notların otomasyonla girişi: İlk Yapan MÜ, Doçentlik Başvurusunun otomasyonda gerçekleştirilmesi: İlk Yapan MÜ, MİTTO, İnovasyon; Üniversitelerin doğal olarak sahip oldukları bilimsel danışmanları: Akademisyenler, Organize olma Yetenekleri ve Sermaye İş birliği, akabinde yapan MÜ:MİTTO; MARKAM, Kariyer Kapısı, Öğrenci proje çalışmaları. Ayrıca, çok sayıda YSL tezi, Doktora tezi, Proje konusu da talan edilen günlüğümde çalındı ve bazıları bunu gözümde soktu( çaresiz hissettirme, özellikle intihalle suçlama sonrası) YSL ve Doktora tez sunumları ve basılı olarak ürün haline getirilmesi ve uluslararası kongre düzenlemeleri, birimini de kurdular. Medya Merkezi. "Etik Kurul kendim için MİTTO'ya önerdiğim, MİTTO bünyesinde yapmak istediğim fikrimdi, fikirlerin ahlâklı bir yoldan elde edilip edilmediğini araştıran bir birim kurma fikrimi yüz yüze önerdim, davet edildiğim, icabet etmem beklenmeyen Çalıştay fikrime; akabinde ayrı bir birim olarak kuruldu. Bu talan ürünleri aynı zamanda 'Dijital Köle ' üzerinde direnişine endeksli olarak baskılama araçları yapılmaktadırlar. Görsel İletişim Tasarımı Anabilim Dalının kurulması, İntihalle suçlandığımda Ankara'ya gittiğim dönemler ki, otobüste rahat bırakılmadım, özel bir orduları var: Üstelik çok kere gittim ve bu dönemde YÖK'ün içine de girdim. O zamanlarda YÖK'le ilgili talan edilen günlüğüme yazdıklarımın YÖKAK kuruldu." Ne güzel değil mi? Bu birimler aynı zamanda Dijital Köleyi suçlayacak birimler, yani talan alanlarını istihdam alanı oluşturdu. Bu hep böyle çalıştı. RTÜK ilk başta çalışanlardan, kendime dert ettiğim konulara bakılırsa hep aynı kalıpla davrandığım da görülür, bilimsel danışmanlıklar, etik kurulları, reklamları denetleyecek birimler vb. gibi. Talancılarıma istihdam alanı yaratıp, güçlenmelerini sağlamışım. RTÜK'ün tüm projeleri talan edilen günlüğümde ve bakılırsa o dönem bu işlerle uğraşanlar, birebir burnumun dibinde yani sözde intihar ettiği iddia edilen, asla intihar etmeyecek bir yapıda olan eniştemle de ilgilidirler ve bu ilgi partiler üstüdür."

### Denize doğru

Çözdüm her şey çok basit:  
Denize doğru üç beş dakika yeter;  
derdimi anlatmaya,  
Zaten çok şey değmez, çok konuşmaya.  
Denize doğru, denize doğru,...  
Düşlerimde bile kaçtım, denize doğru...

Kararımı çoktan verdim.  
Denize doğru, denize doğru...  
Gülmez çünkü hiç bilmez dertleri ağır.  
Bütün kapılar çalınır ama bilgiler sağır  
Mışlar mışlar ne demişler burada bulamamışlar.  
Denize doğru, denize doğru...  
Gittim çünkü eskittim kentin sokaklarını.

Kimsenin umurunda değil suratlar soğuk.

Ardımda çok şey bırakmadım.

Kalanları da almadım.

Denize doğru, denize doğru...

Adını düşürenlere üzülseñ deęmez.

Sesini kaybedenlerin bir şarkısı olmaz.

Kararımı çoktan verdim:

Denize doğru, denize doğru, denize doğru...

Aslında kaçmak değil sevgiye koşmak...

Sessizdiler ama çoktular;

biraz deli biraz çocuktular.

Denize doğru, denize doğru...

Kolunu kapıranlara çare bulunmaz,

Yaşam bizden hızlı beklesen olmaz.

**Yazar/Yazan:** Nevin ALGÜL.

**Yazdığı yer:** Kendine ait, başka hiç kimsenin kullanmadığı bilgisayarı.

**Manifesto**

Niye herkes bu kadar ciddi,

Okunmamış kitaplar ama ciltli,

Asık asık yüzlü insanlar,

ta yüreğine kadar kilitli

Asık asık yüzlü insanlar

Ta yüreğine kadar kilitli

Ne gülümseme ne günaydın yok

E tabi üçüncü sayfada olay çok

**Yazar/Yazar:** Nevin ALGÜL,

**Yazdığı yer:** Hiç kimsenin kullanmadığı, bir sürü şifresi olan, anti virüs programlarıyla dolu, kendi bilgisayarı

“Sezen Aksu’nun yeniden ün kazandığı dönemden itibaren kendine ait tek bir şarkısı yoktur. Diğer şarkıcılara verdiği sözler de talan edilen bilgisayarımıdır. Aslında bu şiirimde o dönem moda olan LOL’yu da mizah unsuru yaptığım ortadadır.”

## SONUÇ

“Elinizde bir bavul dolusu para var ve başarılı sonuçlar elde edebileceğiniz yeni, farklı bir sektör yaratımı arayışındasınız ve bu karanlık dijital alandan size akan datalar, veriler var: Tüm bu karanlık veri alanı başlı başına illegal olmakla beraber eğer bu veriler için tek bir isim deşifre edilmiş ve kaynak olarak o kullanılıyorsa hatta bu kaynaktan seçim yapabilme özgürlüğü bile bulabiliyorsa bunun adı ‘Dijital Kölelik’dir. “Benim vakamda, kaynak olarak çok değerli bulunmuş olmalıyım ki, 7/24 bir kapanakta tam tamına yirmi dört sene, tüm bu seneler sistematik çalınmanın Dijital- Reel Psiko-Semiyotik Dil Kullanımlarının unsurlarıyla kesintisiz kuşatıldım. Çalınmam, manipülasyonla çalışmaya başlamamla ki, kurucularından biri veya ikisi TV kanalı ortağı ve eğlence dünyasının duayeniydiler; sistematik olarak yirmi dört sene, atanmamla yirmi bir sene kesintisiz hale geldi. Toplamda otuzu geçen yıllar boyunca talan edildim.”

Yukarıdaki paragrafın başlangıcında yer alan içeriğin hepsi Halkla İlişkiler’in kapsamında gibi görünüyor değil mi? Halkla İlişkiler Türkiye’de nasıl işlemekte, herkesin sorgulaması gereken bir konu artık. Dijital bir başka söylemle bilgisayar kullanımının yaygınlaştırıldığı, gelişmekte olan veya üçüncü dünya ülkesi olarak tanımlanan ülkelerde dijital bilgi çok başka anlamlar taşıdı(Algül, 2015) tarihli makalemde “her çocuğa bir tablet” politikasının hangi anlamlara gelebileceğini yazan, onları; açık birer data merkezi haline getirebileceğinden bahseden makaleme bakınız. Yukarıdaki paragrafta tanımlanan her bir iş kolu için ayrı bir uzmanlık alanı ve bütçe gerekirken dijital bilginin kötü kullanılması nedeniyle bu görülere sahip, içinde doğduğu toplumda maruz kaldıklarını ancak yazarak atabilen insanlar, makalenin sahibi gibi ağa takıldılar. Çalınan kamera şakası TV programlarımda kafeye giren çift hariç, talancılar için içinde, kutulanma yöntemi de buna benzer bir şekilde işlemektedir. Yaşam alanları kontrol altında tutulmadan ‘Dijital Kölelik’ mümkün değildir

Toplumun ve bireyin kültürünü, kültürel kodlarını deşifre ederek Psiko-Semiyotik baskılama aracına dönüştürmek ve onu dijital köle olarak kullanmak üzere ileri vakalarda ortamını manipüle ederek sağaltmak üzere kontrollü manipülasyon mizanseninle donatarak, ortam dinlemeden ticari fayda elde etme çabası gütmek karanlık yapılanma yöntemleridir. Öncelikle ‘Dijital Köle’ nin kendine güven duyduğu alanları yok edilerek işe başlandı. Sınırlarla sürekli oynamak, hayırlarıyla paralel devam eder ve kişiliksizleştirilme operasyonu tekrarlayan kalıp davranış halini alır. Tehditle baskılamak yöntemlerdendir. Sevdiklerinin ölümüyle tehdit biter ince ayar tehdit dönemi başlar. Örneğin: Talan konusu çok olan kitapçevlerinden birinden yakın zamanda, istenen kitapların hiçbiri verilmez, önerilen kitapların hiçbiri istediği içerikleri taşımaz. Bu kitaplardan biri, ben de okuyorum, denerek içeriden getirilmiştir. Tümü kırmızı olan bu kitapta çünkü adı da bu; bir yere işaret konmuştur: : “... Olmuşa saygı duy; yoksa yıkımın olur...”(Jung, 2014). ‘Dijital Köle’ için yıllar içinde tesadüf tesadüftür’, Dijital-Reel psiko-Semiyotik Dil kullanımı olarak değerlendirilebilecek bir durumdur artık.

Unutulmaması gereken tüm bu Dijital-Reel Psiko-Semiyotik Dil Kullanımları sizi manipüle etmek ve asıl yapmanız gerekeni yaptırmamak ve sömürüye devam etmek içindir. İnsani hiçbir şey beklenmemelidir. Hiçbir şekilde Dijital-Reel Köle edilen kişi kendini bu kişilerin insafına bırakmamalıdır. Satranç taşları gibi bir mizansenin içinde dönen bir insanlık dışı, talancı bir yapılanmanın azaları olarak görülmelidirler. Yoksa bu döngünüz ve yaşamınızla oynanan oyun hiç bitmeyecektir

Bu yapılanmanın çörelendiği yerde artık ot bitmez. Hangi şartlarda olunursa olunsun ortaya çıkmak elzemdir. Aksi durumda siz ve sevdiğiniz daha çok tehlike altında olacaksınız, örüleceksiniz, öldürüleceksiniz. Tüm hayata büyük bir zevkle çöken ve elimizde oyuncaksın oyununu oynamaktan korkunç zevk alan kişilik bozukluklarına sahip olabilecekleri de düşünülmelidir. Hiçbir tehdit unsuruna aldırış etmeden, deli diye yaftalanmaktan hiç korkmadan, tüm belgelerinizle ortaya çıkın. Dijital köle olarak yaşamak mümkün değildir zaten. Potansiyel emsâl vakanın öznesinin yok oluşu, dil kullanımlarının hedefi vurmadaki başarısı, fikir ve icatlarının ticari değeri çok yüksek olan şarkı olan şiirlerinin, TV, Sinema, dizi revize ve tasarımlarının, Türk TV dizileri onunla başladı, başarısı, PR fikirlerinin toplumdaki karşılıklarının inanılmaz ölçüde etkili olması; akademik yaratımları, roman konu, fikir başlıklarının satıştaki başarısı sürekli olunca ‘Dijital Köleliğe’ terfi etti. Dijital Çağın kötücül kullanımına egemen güçler onay vermeye devam ettiği takdirde gelecek hiç de iç açıcı olmayacaktır. Dijital Köleliğin ne olduğunu yaşamadan hiç kimse ama hiç kimse bilemez ve tahmin dahi edemez.

Potansiyel emsâl vakanın öznesinin kaleminden: “Güvendikleri noktalardan biri bireyin ne yaşadığını anlayamayacak ve savunamayacak duruma gelmesini sağlama, ve yapılanların dile dökülemeyeceği savına inanmaları. Şikâyet edemeyecek hâle getirmek üzere toplu, çoklu saldırıları ardı sıra tekrarlamak ve yapmak, tüm yaşam alanlarına bu türde bir hücumla yaşamak. Yerleştirildiği kutularda sürekli sorun çıkarmak, bu sorunları Dijital Reel Psiko-Semiyotik Dil Kullanımları olarak talan ettikleri mahrem dijital alanlarından üretmek bir yöntem. Dijital Köle kendi enerjisinde kalmalı ve bunu yapabilmek için gerekli bilgiyi kazanmanın yollarına bakmalıdır.

Türkiye gibi toplumlarda tanımlamış olduğum ve yaratmış olduğum bilim dalım Dijital Reel Psiko-Semiyotik Dil Kullanımları ve ALGÜL Dijital- Reel- Manuel Psiko-Semiyotik Dil Kullanımı Ayrıştırıcıları adlı buluşumu topladığım üst başlık olan Psiko-Semiyotik İletişim ciddi şekilde, öncelikle ele alınmalıdır çünkü geniş kitleler hem sağlıklı düşünce gelişimi süreci açısından Türkçe ve Matematik Derslerinin Öğretme Yöntemlerinin Düşünce Gelişimine Olan Etkileri Üzerine Algül Teorileri(Algül,2018) hem reaya kültürünün genetik kodlarında yer almalarından dolayı, sorgusal ve eleştirel bakabilme yeti ve yetenekleri kolayca sekteye uğratılabilirler ve duygu durum biçimleri üzerinden; Dijital-Reel Psiko-Semiyotik Dil Kullanımlarıyla kolayca avlanmaları söz konusu olabilmektedirler. Bir başka söylemle potansiyel emsâl vakanın öznesi başlangıcından itibaren sorgulasa dahi, tüm bu bilim dallarını yaratıcısı olsa dahi, kafa karışıklığı ağına yakalanmadı değildir. Belki kişiliğiyle de bağlantılı olabilir, netleştirme ihtiyacından kaynaklanabilir. Ayrıca bu tür bir yapılanmanın özelliği sürekli dram yaratma üzerine kuruludur ve bu dramları talan ettikleri mahrem dijital alanlardan üretirler. Örumcek ağı gibi hedefin etrafını sararlar. Sözü öz ile de kafa karışıklığı yaratabilecek bir durum üretme arayışında olurlar ki, her türlü kumpas, hile, tezgâh baskılama araçlarındandır. Dijital Köleliğin sürdürülebilir olması için çoklu bileşenlerinin olması gerekir, Dijital Kölelik için darbe kalkışmasıyla açığa çıkan, Fethullah Gülen örgütüne atfedilen bir yapılanma modeline şiddetle ihtiyaç duyar, bu bileşenlerden biri de siyasi güçlerdir. Dijital Kölelik bir de sürdürülebilir Dijital Kölelik 7/24 Elektronik/ Dijital Gözetim gerektirir, muktadir olan siyasi erklerin ellerinde bulunan güç, vatandaş tarafından bilinen bilinmeyen yaptıkları anlaşmalar, verdikleri sözler bu bağlamda çok anlamlı ve önemlidirler; veri hırsızlığı, sürdürülebilir Dijital Kölelik vakaları için bileşik çoklu donanımları ihtiyaç vardır ve devletin olanakları maddi manevi imkânlar sunar. Fethullah Gülen örgütünün devletin içinde yapılanma modelini anımsayınız.

Her vatandaşın iktidarda olan parti tarafından özgürlüğünün korunması anayasal bir haktır. ‘Dijital Kölelik’, üstelik bir de sürdürülebilir Dijital Kölelik vakalarında çözümlerden belki de en önemlisi iktidardaki partinin sorumlu tutulması olacaktır. Öneri olarak, hiçbir şey yazmadan ve demeden direkt eyleme geçmeniz önemlidir. Bu tür bir düzenekte en azından potansiyel emsâl dijital kölelik vakasında bir kutulanma yöntemi olarak içine konulduğu kurum, kuruluşlar, yaşam alanları, kaynak çok kazançlıysa örme de o kadar komplike ve detaylıdır.. Hiçbir yere yazmadan, kimseyle konuşmadan, onlarla ilgili olabilecek insanlardan uzak birileriyle bir an önce hukuki işlemleri başlatmanız bir gerekliliktir. Daha ilk günden yapılırsa dijital kölelik sarmalına bir ömür kaptırılmamış olur. İnsani olarak ulaşmaya asla çabalamayınız. Bu tür yapılanmalarda insanı duygu durumları yok. Ticari kafayla bakılmakta. Bu tür bir yaklaşımla kurtulduğunuz bile sanırsanız başka bir nedeni vardır. Sizi, kişiliğinizden çıkarıp bir şeye dönüştürdüklerinde, belki ama insani olarak yakalamanız mümkün değildir.

‘Dijital Köle’ Schrödinger’in gerçek kedisinin ta kendisidir ama bir farkla, aslında ölü olduğu bilinen ve bu haliyle de ayrıca eğlenilen bir kedir ve Schrödinger’in kedisi miyim?, ben diye talan günlüğüne yazan ve soran dijital kölenin, bu söylemi de çalınarak diğer içerikle birleştirilerek kitap adı yapılmıştır: Talancıların ruhu anlaşılın. Bu arada talancıların aklanma noktaları, hatta bazılarının egemen siyasi erkle beraber, hacca ve umreye gitmeleri asla gözden kaçmamaktadır. Talancıların kendilerini aklama, kendilerine reklam yapma araçlarının en ilginç olduğu dönem olarak içinde yaşanan çağ, tarihe geçmiştir. Talan edilen yüzlerce şiiri üzerinden yıllarca hareket eden müzik sektörü, patenti alınan TV programları, ‘Dijital Kölelik’ üzerinden elde edilen telif hakları alınan; yüzlerce ‘Dijital Kölelik’ ürünü, TV Dizileri, Sinema Filmleri, Akademik yaratımlar... Hukuk alanında öncelikle Dijital Köleliğin asıl sorumlularından hareket edilmelidir ve ekranıyla senkronize tüm hallere derhal son verilmekle kalmamalı, ellerindeki talan ürünü günlüğü ve dijital alanlarına yazdığı tüm içeriği bir daha asla kullanamamalarına dair karar alınması sağlanmalıdır.

# PRIMARY SCHOOL STUDENTS METAPHOR REVIEW IN ACCORDANCE WITH THEIR OPINIONS ON MUSIC COURSE

**Beril ÖZAY**

KSTU Education and Research Institute

berilozay04@gmail.com

## ABSTRACT

The aim of the research was to examine the metaphor examples created by primary school students in line with their views on music lessons and to offer suggestions on this subject. The universe of the research; In the 2021-2022 academic year, 224 students of Değirmenlik Primary School located in the Nicosia district of the TRNC Ministry of Education, Primary Education Department. The sample is 215 students. In the first part, as a data collection tool in the research; The information form includes personal information, and in the second part, the metaphor technique, which is a qualitative study, is used, "Music lesson; It is like ..... because; It was requested to complete the sentence Before applying the interview form, the students were helped to fully understand what the metaphor meant by explaining it with examples. The interview forms were evaluated by taking expert opinion. In the analysis of the data, metaphors were identified, metaphors were classified and categories were created and digitized. As a result of the findings, it was tried to determine to what extent the students were interested in music and what the emotional state that music aroused in them was. As a result, it was revealed that the music lesson aroused positive emotions in the students, and therefore they liked the music lesson. Therefore, the active role of the music teacher in the classroom, the effect of making students love the lesson has been revealed, the importance of the materials to be used in the course content to motivate the students and the importance of teaching the game-oriented lesson with a student-centered approach has been seen. In this context, it is thought that the research will shed light on the literature in terms of improving the methods and suggestions to be applied to increase the efficiency in music lessons in line with the data obtained.

**Keywords** ; Education, primary school, metaphor, music lesson, student.

## 1. INTRODUCTION

In this study; It was aimed to examine primary school students' views on music lessons with the metaphor technique. Since music education and teaching in primary schools is student-centered, which is a contemporary approach, students' interest in music lessons is important in order to achieve the targeted course success (Uçan, 1999). If the students' attitudes and perceptions towards the music lesson are positive and at a level that can meet their needs, the targeted success for the music lesson will be achieved. For this reason, determining the positive or negative attitudes and perceptions of students towards music lessons emphasizes the importance of this research (Nacakçı, 2006).

Education creates visible changes in the individual's behavior by gaining the knowledge, skills and values that he or she acquires throughout life from birth (Erden, 2011). Music, which extends from past to present and is present in every phase of life, directs the lives of individuals (Aras, 2010). Music education, which is a branch of educational sciences, has great value in human life in terms of language, art and science. In ancient Greek culture, the perspective on music was seen as an element that disciplined the souls and tastes (Salamah, Alzubi & Yinal, 2023). Today, many educators state that music has both a psychological and social impact on people's lives, and is also an important tool in preserving and transferring aesthetic and cultural riches (Say, 2007).

Music; It is the art of expressing emotions and thoughts with the help of sounds, by designing them with purposes and methods in line with a certain aesthetic understanding (Uçan, 1997; Özdemir and Yıldız, 2010). It arises from the individual, social, cultural, educational and economic functionality of music, which is also effective in gaining, changing and developing musical behavior (Uçan, 2005; Özdemir and Yıldız, 2010). In addition to being an art with the expression of emotions and thoughts, music is also a science due to the way it can be comprehended by the mind (Karolyi, 1999). Because of this feature, music causes the perceptions and cognitions of individuals in particular and societies in general to change and develop (Kabataş, 2017).

In addition to the talents that a person is born with, he acquires many skills through musical education. They enrich their lives as individuals who are self-confident, cooperative, tolerant, social, sharing, creative, have strong communication skills, have developed psychomotor skills, have an aesthetic understanding, can look at art with a critical eye, have developed musical taste and interpretation-analysis power (TRNC Music Lesson Curriculum, 2016).

Music, which handles emotions, thoughts, designs and impressions as a set of purposes and methods with the contribution of sound and sound sources, is also a form of expression with a certain understanding of beauty. Music, which takes place at every stage of individual and social life, directs cognitive and affective structuring processes (Uçan, 1994; Say, 2006; Cüceloğlu, Önder and Yıldız, 2017; Eren, 2018). Music enters the individual's life in two ways, as an educational field and as an educational tool. When music as a field of education develops in terms of musical practice, musical concept and musical competence; As an educational

tool, music comes into play when used in interdisciplinary teaching to make education efficient and effective (Uçan, 1994; Özen, 2004; Yazıcı, 2016).

These ages, when the musical education of preschool and primary school students is based on, are a period in which their perceptions are extremely clear. The basic knowledge they acquire in this process lays the groundwork for shaping their lives. A student who comes to music education with a certain readiness when starting primary school shows positive physiological, psychological and mental development compared to his peers (Varış, 2020). Since the music course at the primary school level is creative, complementary, supportive and progressive, it functions in both formal education and non-formal education. In addition, music has the feature of formally including all lessons (Yıldız, 2002; Göğüş, 2008; Umdanş and Işıldak, 2019).

The individual acquires certain behaviors through the process of music education. He purposefully changes, develops, transforms and perfects these behaviors through his own life. In the process, the individual reaches the goals through his own musical life by following a planned, methodical and orderly path (Uçan, 1997, 2005; Noyan, 2012). In this way, the individual develops as a society and an individual by gaining creativity, self-confidence, mental skills and aesthetic perspective in every field (Yıldız, 2002). Education by doing, which is a contemporary approach, reveals creative potential through games and activities and makes the student a part of the active process (Gürgen, 2006).

Music provides individuals with lifelong physical, emotional and mental experiences. These experiences can combine with other experiences over time and cause changes in the individual's perception of music. At the same time, this may also cause differences in perception of the concept of music. One of the ways to determine differences in perception in individuals is metaphors (Çetinkaya, 2019). When we look at the dictionary meaning of metaphor, its origin is derived from the Greek word "metaphora" and passed into Turkish from French. Metaphor, also referred to as metaphor, is expressed as similes that strengthen the narrative (TDK, 2021). Metaphors mean transferring or conveying human life and the environment in the definition of complex terms through different analogies (Cerit, 2008; Döş, 2010). In other words, metaphor; It is the making of an analogy by relating an idea or a phenomenon with words of similar nature and different meanings (Aydın, 2006). Metaphor is the explanation of the meaning an individual attaches to an event or a situation through analogy as he perceives it. According to Jensen (2001); Metaphor, which leads to new understanding between two similar concepts, enables the establishment of information connections (Aydın, 2010; Ünal and Ünal, 2010; Uumuş and Umdanş, 2013).

It can be said that metaphors are the most powerful mental tools that shape, control and direct an individual's thoughts by transferring them from a similar field to a new and unknown field (Tsoukas, 1991). Metaphors used by scientists to understand the world provide an opportunity to transform an objective situation into a meaningful form (Yıldırım and Şimşek, 2011). Thus, metaphors are used to reveal how the concepts to be examined are perceived (Cerit, 2008). Metaphors are also used to improve a process and describe a situation (Morgan, 1998). Metaphor provides a visual image that provides a rich picture of the phenomenon, situation and event of the subject to be examined (Yıldırım and Şimşek, 2011; Uumuş and Umdanş, 2013).

Many metaphor studies have been conducted in the fields of music, art and education in various national and international studies (Schalkwyk, 2002; Öztürk, 2007; Capan, 2010; Şahin, 2009; Mustan Dönmez and Karaburun, 2013; Gouzouasis, 2011; Tulunay Ateş, 2016; Acar Güvendir and Özer Özkan, 2016; Fidan and Fidan, 2016; Tez, Aydın and Uygun, 2016). Metaphors relate a theoretical, complex or abstract phenomenon as a means of perception and add new meanings between known concepts and unknown concepts (Geçit and Gencer, 2011; Eren, 2018). As in every field, metaphor is used in the field of education during the subject teaching process. It allows us to understand both the student's understanding and meaning of the course and his/her thoughts and perspective on the course. In the light of the results obtained, metaphors provide guidance in structuring the course process, method and content. As a matter of fact, we see metaphor as a method applied in music lessons (Orhan, 2019).

Students develop positive or negative attitudes towards music lessons in the light of their thoughts, expectations and experiences. These attitudes are experiences acquired during and before the course. These attitudes and perceptions developed by students directly affect their participation in the course and their success (Öztürk and Kalyoncu, 2014). It is aimed for primary school students to develop their musical identities and perceptions acquired in music lessons, as well as to get to know national and international cultures. Therefore, metaphors, which are the way of explaining a phenomenon with another phenomenon, come into play when it comes to knowing what kind of perception primary school students have about the music lesson (Kövesces, 2010; Gültekin, 2013).

It is important to have a positive perception of students' attitudes towards music lessons. Students with positive attitudes are more willing to learn. Thus, the realization and permanence of the targeted teaching in the course is positively affected (Öztürk and Kalyoncu 2014). Otherwise; Mullins (1984) says that if students' attitudes towards music are negative, the music education program can cause rapid and deep damage and must be improved to compensate (Özmenteş, 2012).

## 2. PURPOSE

### 2.1. Purpose of the research

In this study; It is an examination of the opinions of Değirmenlik Primary School students studying in the 2021-2022 academic year, affiliated with the Department of Primary Education within the Ministry of Education of TRNC, regarding the music lesson through metaphor. Accordingly, answers were sought to the following questions;

1. Primary school students; What are their demographic characteristics such as their gender, age and grade?
2. Primary school students; What are their symbolic perceptions towards music lessons?

This research It aims to guide music teachers and administrators working in primary schools by determining primary school students' perspectives on music lessons.

### 2.2. Importance of Research

In line with this research, it is aimed to contribute to the education system in this regard by examining the opinions of primary school students about music lessons. When the literature was examined, it was seen that the number of studies on the subject in TRNC was very low. The study titled "Examination of primary school students in terms of their views on music lessons" is important in this respect. It is hoped that this study will make a significant contribution to the literature.

### 2.3. Limitations of the Research

1. This study is limited to students studying at Değirmenlik Primary School, affiliated with TRNC Ministry of Education, Department of Primary Education, during the 2021-2022 academic year.
2. The study is limited to the surveys used in the research.
3. This study is limited to the participants' responses to the surveys.

## 3. METHOD

### 3.1. Model of the Research

phenomenology pattern , one of the qualitative research methods, was used. Phenomenology pattern; It appears in many forms such as events, situations, experiences and perceptions. It provides a suitable basis for studies that aim to investigate the phenomena that we encounter in our daily lives and which we are familiar with, phenomena that are not completely foreign to us, but whose full meaning we cannot understand (Yıldırım and Şimşek, 2008). The social and everyday actions of people's conscious experiences are called phenomenology (Schram , 2003). Although phenomenology does not provide definitive and general results, it produces results that will help us recognize and understand a phenomenon better (Yıldırım and Şimşek, 2006). In this research, the descriptive role of metaphors was used in determining the facts, conceptual structure and also in collecting data . The research aimed to reveal and interpret the views of primary school students on the concept of "music". Starting from this point, in the research, what music, which is frequently used in daily life, means from the perspective of primary school students was analyzed in detail. In the research, it was desired to conceptualize the data and reveal themes that could describe the phenomenon , that is, music . The results are given with a descriptive narrative .

### 3.2. Population and Sample

The population of this research consists of 224 students at Değirmenlik primary school affiliated with TRNC Ministry of Education . The sample of the research consists of 224 Değirmenlik Primary School students studying in the 2021-2022 academic year under the TRNC Ministry of Education . The participants in the research were determined according to the "purposive sampling" method and "easily accessible situation sampling" (purposive sampling). Oath convenient case Based on sampling). For this reason, it is aimed to describe the metaphors used by primary school students regarding the concept of music.

The sample used for the research was made in accordance with the "purposive sampling" approach. Purposive sampling; It allows the desired situations to be examined in detail to obtain rich data (Yıldırım and Şimşek, 2018). The students selected in the research in accordance with purposeful sampling are suitable for "easily accessible case sampling". Easily accessible case sampling, or "convenience sampling", is based on items that are quickly and easily accessible (Patton, 2014). In the research, easily accessible situation sampling (convenient) case sampling was chosen to add speed and practicality to the research. In addition, since the researcher's area of expertise is music teaching, he preferred to conduct the research with a group that was close and easy to reach (at the primary school where he worked). Thus, the participants of the study were Değirmenlik Primary School students studying in the 2021-2022 academic year . The total number of participants in the research was 224 students; However, the answers of 9 students could not be evaluated because they were careless and incomplete, and they were eliminated and the research was conducted with 215 students.

### 3.3. Data collection tool

In the research, data was collected through metaphors . Metaphor; what is meant by concepts such as analogy, metaphor, metaphor, metaphor, mental image is the explanation of a concept, phenomenon or event by

comparing it to another concept, phenomenon or event (Oxford et al., 1998). Are expressing a concept or phenomenon in the way people perceive it, that is, by using analogies (Aydın , 2010.) It can also be defined as transforming information from one form to another (Koro- Ljungberg , 2001). The similarity of two similar concepts may be rare, but the more we know one concept, the more it allows us to understand the second one better (Tamimi, 2005).

In this research, an interview form with two parts was created depending on the problem. The first part is personal information, the second part is the opinions of the students who participated in the research about the concept of music . to determine from them; “ If you were to compare music to anything, living or inanimate, what would it be? where? They were asked to answer the question. For this; “Music is similar to; Because, They were asked to complete the sentence by writing in the blank spaces. Students were given approximately 40 minutes of class time to write their own metaphors. Necessary precautions have been taken to ensure that students are not influenced by each other while transferring their thoughts to paper . The main data source of this research consists of interview forms in which primary school students explain their views on the concept of music using metaphors. These statements, written by the participants in their own handwriting, constituted the main data source of the research (Çetinkaya 2019).

### 3.4. Analysis of Data

During the analysis of the data in the research, it was analyzed based on 4 stages (Saban, 2008; 2009). According to this;

1. Coding and debugging phase
2. Sample metaphor compilation phase
3. Category development phase
4. Stage of ensuring validity and reliability

*1. Coding and Extraction Phase :* Five conditions were considered in order to decide whether the interview forms in which the participants expressed their opinions would be included in the scope of the research. It was checked whether the students clearly stated a certain metaphor in their writings. If the name of the metaphor is not clearly stated, the participant His opinion was not taken into consideration. Attention was paid to whether a single metaphor or more than one metaphor was used in the same answer. If more than one metaphor was specified, the participant's opinion was not taken into consideration. It was examined whether the students' writings answered the question "why" or not. If the question "why" was not answered, the participant's opinion was not taken into consideration. Attention was paid to whether each metaphor developed by the students explained the concept of music meaningfully. If the reason for comparing the metaphor to music was not explained logically, the participant's opinion was not taken into consideration. If the metaphor used by the students indicates more than one meaning (category), the opinion in question was not included in the scope of the research. The opinions of 9 primary school students were eliminated considering the above conditions and the study was conducted with 215 participants.

*2. Sample Metaphor Compilation Stage :* By eliminating 9 participants in the study, 215 valid data were obtained. 215 participants used 132 different metaphors. 61 of these metaphors were used only once by one participant; The other 154 metaphors were repeated at least twice. 154 repeated metaphors were arranged from highest frequency to lowest and a list of sample metaphors was created. The list was created to determine whether metaphors could be grouped under a certain category and to validate the data analysis process of the research. An important situation was encountered at this stage of the research. Repetitive metaphors had to be classified under different categories. For example, when the opinions of the participants who used the quilt metaphor were examined and the explanations they gave to the question "why" were analyzed, it was seen that the same metaphor could be placed under different categories. For example; In one explanation, it is stated that music is like a quilt because it is warm, and in another explanation it is stated that music is like a quilt because it is soft.

*3. Category Development Stage :* The data in the research were evaluated through content analysis (Yıldırım and Şimşek, 2006). Content analysis is defined as expressing and associating data with explainable concepts (Yıldırım and Şimşek, 2006). This research; A qualitative method with an inductive approach was applied to reveal students' perceptions (Yıldırım and Şimşek, 2018). Qualitative research method is a method of obtaining information that provides the opportunity to reach a small number of participants on detailed information and situations ( Patton , 2014). At this stage, the mental images produced by the participants are music They were examined in terms of their common features regarding the phenomenon. This sample metaphors created specifically about 215 metaphors during the process , based on the musical meaning of each metaphor image. How do you conceptualize the phenomenon? has been looked after. For this purpose, each metaphor image produced by the students is the subject of the metaphor. music, source of metaphor and subject of metaphor It was analyzed in terms of the relationship between the source and (Forceville , 2002). Then every metaphor image has a certain theme in terms of its perspective on music. When considered from a perspective such as the

meaning of music , the value of music, the way music makes you feel, concrete and abstract concept headings and living and inanimate subheadings have been reached.

**4. Ensuring Validity and Reliability Phase :** The data collected for validity were written in detail and how the results were reached was explained in a clear and understandable manner. The participants' thoughts were frequently included through direct quotations; The results of the research are explained based on these. For internal validity, care was taken to ensure that the research findings were consistent and meaningful within themselves and that the categories revealed formed a whole. For external validity, the research contains necessary explanations so that the findings can be tested in other studies. In order to ensure the internal reliability of the analysis in the research, 50 of the 215 data were randomly selected and evaluated separately twice by the researcher and a person who helped confirm the research from a different perspective; The consistency between the two analyzes (in the context of creating categories) was examined. According to the formula (Reliability = Consensus / Consensus + Disagreement) (Miles and Huberman, 1994), as a result of the calculation (38/38 + 12) consistency between data processors (76%) was found. Having a consensus of at least (70%) among the coders shows the reliability of the research (Yıldırım and Şimşek, 2006), and when the results in this research are examined, it is concluded that the data is measured reliably in terms of the determined categories, as this value is exceeded with (76%). has come out. Regarding external reliability , researchers defined the characteristics of the data source participants, such as gender, age and grade. Thus, other researchers conducting similar research can take these definitions into consideration when creating a sample. Additionally, the data is stored in a way that can be examined by others.

In short; The analysis method used in this study was the determination of metaphors, classification of metaphors, determination of categories, percentage and frequency calculations. During the process of metaphor analysis, research in the literature was discussed and it was decided to process the analysis processes as stated above (Öztürk, 2007).

In determining the metaphors, firstly, the metaphors applied to different classes were arranged separately and the metaphor examples stated by the participants were listed. In the classification of metaphors, the forms filled out by the participants and accepted as valid as a result of the examinations were grouped and a table was created in three separate categories. In Table 1, gender, age and class are listed, in Table 2, the distribution of metaphors and their percentages are determined, and in Table 3, the subheadings of the metaphors are determined and brought together .

#### 4. FINDINGS AND COMMENTS

##### 4.1. Results

**Table 1. Demographic Information of Değirmenlik Primary School Students**

| Class        | Age  | K %        | %            | F          | %                  |
|--------------|------|------------|--------------|------------|--------------------|
| one          | 7    | 13         | 6.04         | 15         | 6.97               |
| 2            | 8    | 34         | 15.81        | 29         | 13.48              |
| 3            | 9    | 26         | 12.09        | 27         | 12.55              |
| 4            | 10   | 24         | 11.16        | 21         | 9.76               |
| 5            | 11th | 15         | 5.97         | 11         | 5.11               |
| <b>Total</b> |      | <b>112</b> | <b>52.09</b> | <b>103</b> | <b>47.90</b>       |
|              |      |            |              | <b>215</b> | <b>one hundred</b> |

As seen in Table 1, according to the demographic information of Değirmenlik Primary School students; The participation of 112 female students (52.09%) and 103 male students (47.90%) was determined in line with the data.

**Table 2. Değirmenlik Primary School Students' Metaphors Regarding Music Lessons**

| metaphor      | f    | %    | metaphor   | f | %    |

| <b>Abstract</b> Rainbow, Star, Wave   |   |            |                    |
| <b>Feelings:</b> Peace, Beautiful, Family, Cold, Angel,<br>hot, sound, wonderland,<br><b>Verb:</b> Fun, Dance, Play, Picnic, Sleep,<br>Cartoon, Joy, Painting |   | <b>83</b>  | <b>38.60</b>       |
| <b>Total</b>  |   | <b>215</b> | <b>one hundred</b> |

Among the 215 primary school students who participated in the research, 132 different metaphors were used concretely and 83 abstractly related to the concept of music lesson. Of the concrete metaphors, 111 represent inanimate concepts and 21 represent living concepts. The most used concrete metaphor; In inanimate concepts, it is the 'food' metaphor with 67 people, and in living concepts, it is the 'beings' metaphor with 21 people. Of the 215 metaphors, there are 61 once-said, 36 repeated and 110 different-said metaphors. When we look at the data in Table1, Table2, Table3; Primary school students appear to have a positive perception of music.

## 4. 2. Discussion

Music education at the primary school level, especially the basic music knowledge acquired during the primary school period, which is considered as childhood, has a great impact on their lives in the following years. Considered this way, music teaching should be addressed with its complementary, supportive and progressive functions (Sun, 1969; Yıldız,2006). When the development of primary school students in cognitive, affective and psychomotor areas is handled meticulously, music education contributes greatly to the development of the child (Şentürk and Çilingir, 2012). Students' attitudes towards music lessons (Nacakçı, 2006; Otacıoğlu, 2007), teacher effectiveness and material use (Göğüş, 2008), music lesson teaching programs (Ataman and Okay, 2009; Albuz and Demirci, 2018; Gök and Tufan, 2016; Nacakçı). There are studies on music lessons and their implementation (Kocabaş and Selçioğlu, 2006; Şahin and Toraman, 2014; Uumuzş, 2017; Ustaoglu and Barış, 2017; Yazıcı, 2009). In educational sciences, metaphors are a frequently used method to obtain qualitative data (Umuzdaş and Umdanş, 2013). Primary school students' positive attitudes towards music lessons Nacakçı (2006); It was determined that similar results were obtained regarding these data in the studies conducted by Umdanş and Uumuzş (2013) and Tez (2016).

It can be said that it is important to present results and suggestions in terms of attitudes towards the implementation of the music lesson, the efficiency of the lesson, the music teacher's approach to making the students love the lesson, and most importantly, the positive determination of the music lesson and their implementation.

## 5. CONCLUSION AND RECOMMENDATIONS

In this study, where the metaphorical perceptions of primary school students regarding the concept of music lesson were examined, the students produced 110 metaphors. According to the data obtained, the majority of the metaphors used; It has been seen that it has positive qualities with categories such as loved, admired, peaceful, relaxing, appetizing, arousing a sense of confidence, giving happiness and love, entertaining, instructive and educational, and the words used are predominantly metaphors containing positive emotions. The most repeated of these metaphors are; It has been identified as games, flowers, cotton, clouds and fun. As a result of the analysis of these metaphors; It consists of two separate categories, concrete and abstract, and two separate subcategories, living and inanimate.

In the research conducted; It is thought that Değirmenlik Primary School students generally have a positive attitude towards music lessons, and they enjoy music lessons to a great extent because the metaphors they use consist mainly of positive expressions. In the light of the answers given by the students participating in the research, it is seen that they like music lessons, It can be concluded that it has something to do with their liking for their teacher. It is also thought that the music teacher's ability to make students love the lesson may be related to the teacher's role in the classroom. Thus, when the concept of music lesson is viewed metaphorically, it can be said that it creates a positive perception for primary school students.

It can be said that students generally tend to learn by having fun and games, and that education and training will be easier since they will feel comfortable and peaceful in such an environment, and at the same time, the educator can achieve his/her program as he/she aims. In addition, by using various interesting materials while implementing in-class activities, it will be possible for students to be more motivated in music lessons. For the positive impact that the music teacher's teaching method will have on the student, adopting student-centered education and supporting it with technology will ensure that the student has more permanent knowledge and a willing student profile.

This study is limited to Değirmenlik primary school students. By expanding the study to include TRNC primary schools, the perception of music in TRNC can be determined in a positive or negative sense, and the perception results of students in different primary schools with positive and negative metaphorical perceptions regarding music lessons can be compared with each other. In another study, the applicability of the curriculum of schools with different metaphorical perceptions of music lessons and its comparison can be made. By determining the positive and negative perceptions of students regarding the music lesson, solutions can be produced on the negative results. Additionally, studies can be conducted to investigate to what extent the perceptions of the music lesson are related to the perceptions of the music teacher and to determine what effect the teacher's role in the classroom has on the student. That the active role of the music teacher in the classroom will be important in terms of seeing the effect of making students love the lesson, and it will contribute to the literature by opening a new window in terms of suggestions, methods and practices in studies to increase the efficiency in music lessons.

# PROBLEMS FACED BY BANK EMPLOYEES IN ELECTRONIC BANKING APPLICATIONS EXAMPLE OF TRNC BANK EMPLOYEES

Ünsal BEKTAŞI

Yrd. Doç. Azmiye YINAL  
azmiye.yinal@akun.edu.tr

## ABSTRACT

The purpose of this study is to identify the problems faced by bank employees in electronic banking applications in TRNC. The research was conducted using the survey technique and the sample consists of 248 bank employees. The scale used was created by Kılıç (2015) inspired by Keklikoğlu's (2010) study and the data were analyzed using SPSS 28 program. The study examined the relationship between bank employees' perceptions of E-commerce payment instruments and outsourcing and the problems faced by banks. According to the findings, the majority of bank employees believe that increasing outsourcing will increase the potential to become a preferred bank in E-commerce payment instruments. However, there is low agreement on the relationship between outsourcing and fraud affecting reputation. No relationship was found between demographic variables and the problems faced by banks. In conclusion, although there are differences between bank employees' perceptions of E-commerce and outsourcing, demographic factors have no effect on these perceptions. These findings can be considered as an important source of information to better understand and improve banks' strategic decisions and operational practices.

**Keywords:** Banking, Electronic Banking, E-Commerce.

## 1. INTRODUCTION

### 1.1. Problem Status

The banking sector, like other sectors, has been greatly affected by the rapid technological developments we witness in today's world. Electronic banking services have provided customers with the highest level of convenience in performing their banking transactions over the internet. Electronic banking has been accepted as a new revolution in traditional banking services and has brought about significant changes in working systems in various institutions (Kaya, 2001).

The increasing interest in the quality of electronic banking services is an effective tool for improving and knowing the level of services provided and expected from customers, whether for the bank or the customer. Until the beginning of the 20th century, technology products used in banking transactions mostly consisted of pen, paper and ink (Ulusoy and Özbilge, 2023). However, over time, as in many areas, banking services have been exposed to the influence of technological innovations that have developed and become widespread with great acceleration. In the banking sector, where no significant change has been observed in its activities, in the face of technological competition and the demands of the information society, it has gone further than being an institution that only exchanges money and has become a financial business that requires the use of technological products (Sümer, 2016).

In our contemporary world, banks play an important role in the investment process and have a significant impact on the development and management of the economy at local, regional and global levels and in various areas of development and investment at various levels and areas. The system and electronic banking service, which aims to transform the world into a small investment village, is considered one of the most important banking activities in this sector, as its impact does not depend only on the level of the bank but is directly related to the banking sector, and customers perceive banks through the impressions they form about the services they offer. The implementation of quality culture contributes to the achievement of goals of banking service organizations in establishing bonds of trust and loyalty between banks and customers, and this creates a customer satisfaction curve with an actual increase and improvement in the performance of the service. Therefore, quality is the responsibility of all elements of the organization. It started with the top management, represented at the top of the pyramid, and the employees, who represent the base of the hierarchy, and each of them was given responsibilities (Souad and Matawa, 2020).

In light of these developments, electronic banking services that have emerged through many electronic channels such as automatic teller machines (ATMs), electronic banks, internet banks and electronic messages over the phone have made it easier for customers to complete their transactions. Over the last decade, the banking industry in Djibouti has witnessed a number of developments in the field of electronic services, as public and private banks in Djibouti have sought to develop some electronic banking services in their efforts to meet customers' needs and increase their competitiveness. The importance of electronic banking services stems from the fact that it provides the opportunity to provide banking services to customers at the lowest cost, in the fastest time and with the least effort, and to offer new banking services. The electronic banking sector plays an important and diverse role in country economies. Banks aim to ensure customer satisfaction, which aims to stay

in the market and stand out against competition. Quality has become a distinguishing feature and the most important element in achieving the goals of productive or service institutions in the twenty-first century (Sattar, 2017).

### 1.2. Purpose and Importance of the Research

The aim of this study is to identify the problems faced by bank employees in electronic banking applications. This research is of great importance in understanding the problems that bank employees encounter during electronic banking applications. Electronic banking is the general name of the technological applications used by banks and customers to carry out financial transactions. Such practices are becoming increasingly common as an alternative to traditional banking methods. This research can be seen as an important step for the development and improvement of these applications by identifying the problems that bank employees encounter during electronic banking applications. Difficulties and problems experienced by bank employees reveal potential errors or deficiencies in this area. This information can guide banks, financial institutions, and software developers in developing and improving electronic banking systems.

Research results can provide a broad perspective to understand the technology-related challenges and development areas of the banking sector. Electronic banking applications are an important part of the digital transformation in the financial sector, and such research can help make this transformation process more effective and seamless. Therefore, this type of research is of great importance for the development of the industry and customer satisfaction.

### 1.3. Hypotheses

The hypotheses of this research are given below:

- H1: There is a significant difference between gender and the problems faced by bank employees and banks in electronic commerce.
- H2: There is a significant difference between age and the problems faced by bank employees and banks in electronic commerce.
- H3 : There is a significant difference between the educational level of bank employees and the problems faced by banks in electronic commerce.
- H<sub>4</sub>: There is a significant difference between professional seniority and the problems faced by banks in electronic commerce.

### 1.4. Assumptions

It is assumed that research participants give their answers to the survey questions sincerely.

### 1.5. Limitations

Research;

- With the bank participants participating in the research,
- With the scale questions used in the research,
- It is limited to the sources used in the research.

### 1.6. Definitions

**Bank:** It is an institution that provides financial services (Akkılıç, 2005).

**Electronic banking :** It provides access to bank accounts, money transfers, bill payments, investment transactions, loan applications, control of account balances and generally financial transactions online (Bakkal and Aksüt, 2011).

**E-commerce (electronic commerce):** refers to digital commerce transactions where products and services are bought and sold over the internet (Pala and Kartal, 2010).

## 2. THEORETICAL FRAMEWORK

### 2.1. Electronic Banking Definition

Electronic banking is a financial service model in which traditional banking services are provided with the use of digital technologies. These services allow bank customers to carry out their financial transactions without visiting bank branches, using ATMs or making phone calls. Electronic banking enables banking transactions via the internet, mobile applications and other digital platforms (Kaya and Arslan, 2016). Electronic banking services include providing customers with access to bank accounts, money transfers, bill payments, investment transactions, loan applications and more. It also offers customers the ability to check their account balances, view their transaction history, and perform financial analysis. Thanks to electronic banking, banking transactions become faster and easier, and it reduces time and transaction costs for customers by eliminating the need to

physically go to bank branches (Özdemir, 2010). Electronic banking is supported by security measures and authentication systems so that customers' personal and financial information is kept safe. With developing technology, electronic banking services are constantly renewed and improved, offering customers a better and more user-friendly experience. Therefore, today, many people carry out their banking transactions on electronic platforms, and these services represent an important transformation in the financial world (Vural, 2019).

## **2.2. Electronic Banking Purposes**

It is possible to evaluate the purposes and benefits of electronic banking under the following headings (Kahneh, 2017):

### **accessibility**

The opportunity to carry out banking transactions at any time and from anywhere. It eliminates dependence on the working hours of bank branches. One of the main goals of electronic banking is to increase accessibility. Accessibility means facilitating access to financial services. Electronic banking offers customers the opportunity to carry out banking transactions at any time and from anywhere. In traditional banking, customers are required to physically go to the branch during the working hours of the bank branches in order to carry out their banking transactions. This situation can sometimes create difficulties due to workload, traffic or remote location (Yıldız, 2017). Electronic banking eliminates these limitations and provides access to financial services at any time. Customers can easily carry out their banking transactions online or via mobile applications. This provides a great advantage, especially when there is an urgent financial need or the need to make transactions outside business hours (Özkan and İpekten, 2017).

### **Ease of Transaction**

Electronic banking makes it possible to carry out financial transactions such as account balance inquiries, money transfers, bill payments and investment transactions more easily and quickly. One of the main purposes of electronic banking is to provide ease of transactions. This aims to make financial transactions faster, simpler and more user-friendly for customers. While in traditional banking, many transactions require physical visits to bank branches, waiting in lines, and filling out documents manually, electronic banking greatly simplifies these processes. Electronic banking platforms offer the opportunity to quickly carry out a number of financial transactions, from inquiring account balances to money transfers, bill payments and investment transactions, via the internet or using mobile applications. This allows customers to use their time more efficiently (Özdemir, 2010).

### **Saving**

It reduces transaction costs for both customers and financial institutions. It minimizes the need for physical bank branches and personnel. One of the main purposes of electronic banking is to save costs. Traditional banking requires operating physical locations of bank branches, employing staff, and printing paper documents and other materials, which means significant operating costs. Electronic banking minimizes these traditional costs and provides significant savings for financial institutions. Cost savings include several different aspects of electronic banking. Firstly, operating costs such as operating physical bank branches and staff salaries are reduced. Since electronic banking platforms can provide 24/7 service, banks do not have to keep their branches open for long hours (Sattar, 2017).

### **Account Tracking**

Electronic banking offers customers the ability to monitor their account balances, view their transaction history, and track their spending. One of the main purposes of electronic banking is to provide customers with more effective and easy account tracking. In traditional banking, account balances and transaction histories are typically inquired through bank branches or ATMs. This process requires customers to physically go to a location, which can waste time and effort. Electronic banking offers account holders the opportunity to easily and quickly monitor their accounts. Customers can instantly check their account balances, review their transaction history, and view previous transactions in detail via the internet or mobile applications. This provides the opportunity to monitor their personal finances more closely and plan their budget more effectively (Kadir, 2011).

### **Access to Various Financial Products and Services**

Electronic banking platforms provide access to a variety of financial products and services, such as loan applications, investment accounts, and insurance policies. One of the main purposes of electronic banking is to offer customers broader access to a variety of financial products and services. Traditional banking relied on limited services offered through bank branches, and customers might have to visit different banks to meet their different financial needs. Electronic banking has changed this paradigm and offers customers access to a wide range of financial products and services through a single platform. Electronic banking platforms provide

customers with access to loan applications, investment accounts, insurance policies, credit cards, loans, deposit accounts and many other financial products and services. This provides customers with greater flexibility in choosing and managing products that suit their different financial needs (Kaya and Arslan, 2016).

### **Security**

Electronic banking protects customers' personal and financial information with strong security measures and authentication systems. One of the main purposes of electronic banking is to enable customers to carry out their financial transactions securely. Security is a key focus of electronic banking because personal and sensitive information must be shared online during financial transactions. Electronic banking platforms protect customers' information and transactions using a range of security measures and technologies (Sattar, 2017).

### **Quick Transactions**

Money transfers and payments can often be made instantly. One of the main goals of electronic banking is to enable fast transactions. Traditional banking methods can often be time consuming to process financial transactions. It may be necessary to physically go to bank branches, wait in long queues and comply with bank hours. However, electronic banking accelerates transactions by eliminating such time and space restrictions (Seddik, 2012).

### **Financial Literacy**

It offers customers the opportunity to gain financial awareness and better manage their personal finances. One of the main goals of electronic banking is to increase financial literacy. Financial literacy refers to the ability of individuals to understand and manage financial matters and make sound financial decisions. Electronic banking offers customers the opportunity to have easier and faster access to financial information, make financial transactions more visible and become more conscious about them (Al Moussawi, 2014).

### **Innovation and Continuous Improvement**

With technological developments, electronic banking is constantly renewed and new features are added. One of the main goals of electronic banking is to promote innovation and continuous improvement. The financial sector changes rapidly with technological advances, and electronic banking has been developed to keep up with this change and constantly offer innovative solutions (Özdemir, 2010).

### **Ease**

It makes shopping faster and easier. Consumers can order products online and make payments quickly. Electronic commerce (e-commerce) represents a commerce model that offers greater convenience and accessibility to consumers. Compared to traditional store shopping, the advantages offered by e-commerce create a significant attraction for consumers. Electronic commerce makes shopping easier and more accessible to consumers. Now people can buy the products and services they want online, at any time and on almost any device (Özkan and İpekten, 2017). This eliminates the need for a physical store trip and saves consumers more time. Additionally, thanks to e-commerce platforms, consumers can easily compare products and prices, access user reviews and choose the most suitable options. E-commerce also breaks down geographic boundaries, giving consumers more choices around the world. Options to receive products at their doorstep and fast delivery services also strengthen the convenience and accessibility advantages of e-commerce. Offering more choices, more control and more convenience for consumers, e-commerce offers a shopping experience that suits the modern lifestyle (Sattar, 2017).

## **3. METHOD**

### **3.1. Research Method**

This study was conducted using the survey technique, one of the quantitative research methods. With these methods, information is obtained about the general tendencies of the participants on topics such as their general opinions, attitudes or interests. These studies are used to provide information about general characteristics or trends of the population, usually without going into more in-depth detail. Survey research is conducted to understand the general situation of the population on a subject and to reveal certain trends or general characteristics. These generally provide an overview rather than a more in-depth analysis and therefore differ from other research methods (Karasar, 2008)

### **3.2. Population and Sample**

The population of the research consists of bank employees in TRNC. The sample of the study was selected using the purposeful sampling method. Purposeful sampling refers to a sample selected for a specific purpose in a research or investigation. This sample selection occurs when the researcher carefully selects the sample

necessary to understand a particular hypothesis or issue (Karasar, 2008). In this context, 248 people were included in the sample.

### 3.3. Data Collection Tools

In the research, data were collected with a scale. The scale used was created by Kılıç (2015) using Keklikoğlu's (2010) study. There are two sections in the survey. The first section contains questions regarding the demographic information of the participants and includes gender, age, educational status and professional seniority. The second part contains questions for bank employees to express their opinions about the problems banks face in electronic commerce. While answering the questions in the survey, a 5-point Likert scale was used. The values on the scale are as follows: 1 - Strongly agree, 2 - Agree, 3 - Neither agree nor disagree, 4 - Disagree, 5 - Strongly disagree. In the study conducted by Kılıç (2015), Cronbach's Alpha value was found to be 0.763. This value generally indicates an acceptable level of internal consistency. However, when considered as a stand-alone measure, this coefficient alone does not convey the overall reliability of the survey. Other factors should also be taken into account, such as the content of the survey, the measurements made, the nature of the subject being measured, and the relationships between the questions that make up the survey. That is, to determine whether 0.763 is "reliable," the structure, purpose, and content of the survey must also be considered. Additionally, Cronbach's Alpha value alone does not provide a complete picture of the reliability of the survey. It is an important measure that should be evaluated together with other factors. In this study, the Cronbach's Alpha value of the scale was found to be 0.764.

**Table 1.** Reliability Analysis of the Scale

| Cronbach's Alpha | Article |
|------------------|---------|
| 0.764            | 23      |

### 3.4. Analysis of Data

The research process was carried out using the SPSS 28 program to analyze the collected data. In the first stage, data collection was completed and these data were stored in the SPSS 28 program for statistical analysis. Then, the reliability level of the collected data was examined; This stage was carried out to evaluate the consistency, stability and accuracy levels of the scales and tests. Descriptive analysis was primarily used during the data analysis phase. In this analysis, general characteristics of the data, statistical summaries such as the mean, standard deviation and distribution of the measurements were reviewed. Then, T-Test and ANOVA tests were applied to determine whether the scale scores differ according to socio-demographic characteristics. T-Tests are statistical tests used to examine differences between two groups, while ANOVAs are used to examine differences between three or more groups.

## 4. FINDINGS

### 4.1. Demographic features

Demographic variables of bank employees are given in Table 2.

**Table 2.** Demographic Information

|                        |                 | N   | %    |
|------------------------|-----------------|-----|------|
| Gender                 | Woman           | 122 | 49.2 |
|                        | Male            | 126 | 50.8 |
| Age                    | 18-24 years old | 46  | 18.5 |
|                        | 25-30 years old | 53  | 21.4 |
|                        | 31-35 years old | 49  | 19.8 |
|                        | 36-45 years old | 84  | 33.9 |
|                        | 46-55 years old | 16  | 6.5  |
| education level        | High school     | 20  | 8.1  |
|                        | College         | 47  | 19.0 |
|                        | University      | 164 | 66.1 |
|                        | Master's / PhD  | 17  | 6.9  |
| professional seniority | 1-5 years       | 43  | 17.3 |

|             |     |       |
|-------------|-----|-------|
| 6-10 years  | 48  | 19.4  |
| 11-15 years | 64  | 25.8  |
| 16-20 years | 79  | 31.9  |
| 21-25 years | 14  | 5.6   |
| Total       | 248 | 100.0 |

When Table 2 is examined, 50.8% of the participants are male; 49.2% were women; 33.9% are 36-45 years old, 21.4% are 25-30 years old, 19.8% are 31-45 years old, 18.5% are 18-24 years old and 6.9% are It is seen that they are between the ages of 46-55. 66.1% of the participants were university graduates, 19% were college graduates, 8.1% were high school graduates and 6.9% were postgraduate /doctoral graduates; 31.9% have 16-20 years, 25.8% have 11-15 years, 19.4% have 6-10 years, 17.3% have 1-5 years and 5.6% have It is seen that he has professional seniority in the range of 21-25 years.

#### 4.2. Thoughts of Bank Employees on the Problems Banks Encounter in E-commerce

Table 3 shows the average and standard milking values for the Problems Facing Banks in e-commerce.

**Table 3.** Findings Regarding Bank Employees' Thoughts About the Problems Banks Encounter in E-commerce

|                     | Minimum     | Maximum     | Average       | ss             |

| Statement 19        | 1.00        | 5.00        | 3.7460        | 1.27097        |
| expression 20       | 1.00        | 5.00        | 3.8105        | 1.28852        |
| Statement 21        | 1.00        | 3.00        | <b>1.5685</b> | 0.69943        |
| Statement 22        | 1.00        | 5.00        | 2.6694        | 1.57007        |
| Statement 23        | 1.00        | 5.00        | 2.9556        | 1.49291        |

When we look at the findings, the statement with the highest score of 3.9476 belongs to the statement "I think our bank is increasing the use of outsourcing in order to be the preferred bank in e-commerce payment instruments." In this case, it can be said that bank employees agree with this statement the least. However, it should be noted that the expression corresponding to the average value neither agrees nor disagrees. When the findings were examined, it was determined that the statement "I think that the decrease in auditing due to the

increase in outsourcing and fraud in e-commerce has damaged the reputation of our bank" with the lowest score of 1.5685 . It is seen that the participants expressed their opinion as "strongly disagree" with this statement.

#### 4.3. Comparison of Demographic Variables and Problems Encountered by Banks in E-Commerce

The results of the analysis conducted to test the hypotheses in the study are given in Table 4.

**Table 4. Findings on Demographic Variables and Problems Encountered by Banks in E-Commerce**

|                        |                 | N   | mean    | Ss .    | f     | p.    |
|------------------------|-----------------|-----|---------|---------|-------|-------|
| Gender                 | Woman           | 122 | 63.3689 | 6.77160 | 0.114 | 0.735 |
|                        | Male            | 126 | 63.5397 | 7.16173 |       |       |

|                        | 16-20 years     | 79  | 63.2658 | 6.66931 |       |       |
|                        | 21-25 years     | 14  | 66.7143 | 7.28991 |       |       |

$p > 0.05$

When Table 4 is examined, no relationship was found between demographic variables and the problems faced by banks in e-commerce. In this case, it is possible to say that the problems encountered in the bank are similar to each other in terms of demographic variables.

"H<sub>1</sub> : There is a significant difference between gender and the problems faced by bank employees and banks in e-commerce"; "H<sub>2</sub> : There is a significant difference between age and the problems faced by bank employees and banks in E-commerce, H<sub>3</sub> : There is a significant difference between educational status and the problems faced by bank employees and banks in E-commerce, H<sub>4</sub> : Professional seniority and the problems faced by banks in E-commerce. The hypotheses "There is a significant difference between the problems faced" were rejected.

#### CONCLUSION AND RECOMMENDATIONS

The research examined the relationship between bank employees' perceptions of E-commerce payment tools and outsourcing and the problems faced by banks. According to the findings, the majority of bank employees believe that increasing the bank's outsourcing will increase its potential to become a preferred bank in E-commerce payment instruments. The highest agreement was observed for this statement. On the other hand, agreement with the idea that the increase in outsourcing causes a decrease in supervision regarding fraud affecting the bank's reputation is low. The "strongly disagree" response to this statement is the most common. No relationship was found between demographic variables and the problems faced by banks in e-commerce. This supports the conclusion that the problems in banks are similar in terms of demographic variables. As a result, there are differences between the perceptions of bank employees regarding E-commerce and outsourcing. However, demographic factors have no effect on these perceptions. These findings provide an important source of information to better understand and improve banks' strategic decisions and operational practices. At the end of the research, the following recommendations were developed:

- It can be considered that increasing the use of outsourcing has a positive effect in order for the bank to be in a preferred position in E-commerce payment instruments. However, the management and effects of this process must be carefully monitored and controlled.
- The idea that outsourcing may damage reputation in the fight against fraud is an important point. The bank can develop transparent communication strategies to increase customer trust and protect its reputation.

- The research shows that employees show low participation in some statements. The bank can develop communication strategies that will give more value to employees' opinions and thoughts. It could strengthen feedback collection processes, perhaps through regular meetings or surveys.
- Although the study did not find a relationship between demographic variables and problems, perhaps you can better understand this relationship with a more detailed analysis. Uncovering potential differences among specific demographic groups can help you develop specific strategies.
- The bank must constantly review and improve its strategies and practices regarding E-commerce and outsourcing. By closely monitoring customer feedback and industry changes, it must maintain a competitive advantage and detect potential problems in advance.

## ÖZET

Psiko-Semiyotik İletişim, Etkileşim, buluşum olan ALGÜL Dijital Reel Manuel Dil Kullanımı Ayırıştırıcıları ve başlı başına bir bilim dalı olması gereken Dijital Reel Psiko-Semiyotik Dil Kullanımlarını topladığım üst başlıktır.

İnsanlar 'şeffaf İletişim' kararı almadıkça ve bu kararı 'şeffaf İletişim' ilkelerine bağlamadıkça, her iletişim 'Psiko Etkileşim' hedefini taşır mı? Evet, içinde bulunulan dijital çağda semiyotik dil kullanımlarının psikolojik hedefler doğrultusunda düzenlenmesi, tasarlanması, benim söylemimle psiko olması kaçınılmaz bir gerçeklik olarak ortaya çıkmaktadır.

Semantik, semiyolojik, kısaca semiyotik en küçük gösterge birimlerinin ya da en yoğun gösterge öbeklerinin tasarımında 'Karşılıklılık İlkesi' başattır. Makalede Psiko-Semiyotik İletişim, Etkileşimin ne olduğu en önemli yönleriyle ele alınırken; 'Karşılıklılık İlkesi!' açıklanmakta ve nasıl çalışabildiği bana ait bir sav olarak sunulmaktadır. İlkenin anlam ve önemi legal görünümü dijital alanlar, illegal dijital alanlar ve onların bir devamı, yansıması niteliğinde olabilecek olan ( sanal evrenlerle gerçek evrenlerin çarpıştırıldığı ve gerçeğin çarpıtıldığı en etkili ve en önemli alan olan reel yaşam alanları) reel alanlarla ilişkisi AI üzerinden ele alınıp, çalışılmıştır.

**Anahtar Sözcükler:** Psiko-Semiyotik İletişim, ALGÜL Karşılıklılık İlkesi, AI, Dijital Reel, Legal Görünüm, Psiko Etkileşim

## GİRİŞ

"Kızım sana söylüyorum, gelinim sen işit!" Anonim/ Türk Halk Edebiyatı

Yukarıda yer alan deyiş, psiko-semiyotik bir dil kullanımı örneğidir. IT, Bilgi Teknolojileri üretilmeden de her kültürel dokunun ortak sosyo-kültürel tarihinde psiko-semiyotik dil kullanımları vardır. *Bu makalede konu edinilmemiş olsa da önümüzdeki çalışma listemde yerini, küresel boyuttaki kapsamıyla çoktan almış olması heyecan verici bir unsurdur.* Psiko bir başka söylemle hedefin psikolojisini etkileyip, hedefteki kişiyi eylemsel ve düşünsel boyutta istendik doğrultuda değiştirip dönüştürmek, manipüle etmek amacıyla kasıtlı, bilinçli düşünce ya da eylemlerle bir araya getirilen semiyolojik veya semantik anlamlı dil kullanımlarıdır. Tüm bu semiyolojik ve semantik dil birimlerinin kasıtlı bir bilinçle bir araya getirildiği alanın oyun sahası bilinçdışı, açıklayıcı bilgisiyse deneyimler, yaşantılar sonucu elde edilen kazanımlar (Mlodinov, 2013) olsa da ileri düzey tasarımlarda hedefin ( birey, topluluk, toplum, tün dünya, çeşitli bölgeler.....) genetik kültürel kodları mutlaka tasarım çalışma kapsamı içinde yerlerini alacaktır. Buradaki 'dil' sözcüğü dilsel ve görsel göstergelerin tümünü kapsamakla kalmaz, hedef için psikolojik bir anlamı temsil edebilecek, dolayısıyla o anlamın yerine geçebilecek nitelikte ( Rıfat, 2009) olan her çeşit, aksesuar, beden dili, ses, koku, renk, (Algül, 2020-2023) doku ve duygu durum biçimlerinden; hatta önsezi, içgörü, öngörü, altıncı his alanlarına yayılır ve alan hiçbir zaman kalıcı olamaz, esnek, gelecek zamanların teknolojisine endeksli olarak değişken hatta geleceğin teknolojisini zorlayacak bir yapının tüm özelliklerini bünyesinde barındırır. Bu devingenlik tanımlamış olduğum bu bilim dalımı sürekli ilgi çekici kılar. Asla durağan olmaması bir yanı sıra düşünce oluşumu ve iç konuşmaların nasıl gerçekleştiğiyle de ilgilidir. Bu yönleriyle bile çoklu araştırmanın gerekliliği değişken yapının heyecan verici özelliklerinden bir bölümünü ortaya koyabilir ki, tüm dil kullanımları, tüm yaşayan ya da ölü doğal dillerin de doğal birer kaynak olmaları durumu, işin içinde yaşayan ya da ölü dilsel göstergeler bir başka söylemle semiyotiğin olması, özetlenirse insana dair, insanlık tarihine hatta kutuplardan eliptik kürenin, evrenin tarihinin dahil edilmesi araştırma ve incelemeye sonsuzluğu katar ki, bu da heyecanın daimi olacağı öngörüsünü yaratabilir. İlâve olarak bu yaratımlardaki kapsayıcılığın hem tasarım hem de inşanın sökülmesi aşamalarını da içerdiği bilgisi unutulmamalıdır.

## Dijital Reel Psiko-Semiyotik Dil Kullanımı Ne Demektir?

Öncelikle 'gösterge' sözcüğünün tanımlanmasının yapılması gerekir. Bilimin üretilmediği toplumlarda 'gösterge' sözcüğünün çağrışım anlamlarının görsel olması çok şaşırtıcı olmamalıdır. Her sene ölçümlediğim alandaki gelişmeye katkımı yadsıyamayacağım ortadadır. Nedenini Fransızca'dan çevirisiyle alınan Göstergibilimin bünyesinde semantik anlamı da barındırıyor olmasına ama Türkçe olarak saptanan karşılığında bunun için önce bir ön çalışma yapılması gerekliliğine bağlıyorum. O halde:

### Gösterge Ne demektir?

Kendi dışında bir şeyi temsil eden; dolayısıyla temsil ettiği şeyin yerini alabilecek özellikte olan her tür biçim, nesne, olgu (Rıfat, 2009). Tahmin edilebileceği üzere gösterge alanı çok kaygan ve teknolojik gelişmeler de dahil olmak üzere, tıpkı göstergebilim gibi, tüm bilimsel alanlara da endekslidir çünkü anda olmayan ama zamanla var olacak yeni bilim dalları, var olan bilim dallarındaki yeni tanımlamalar, yeni yeni teknolojik gelişmeler, bireylerin dijital çağla beraber sahip olabilecekleri yeni özellikler, hali hazırda koku, doku, ses, hatta, ön görü, iç görü, 6. his dahi birer gösterge niteliği olarak ortaya çıkabilirler. Göstergebilimin alanları ne kadar genişse göstergenin alanları da o kadar genişir(Algül, 2020-2023).

Diğer bileşenlerden:

### Semiyotik Ne Demektir?

Tanımını yapmadan önce daha iyi anlaşılması için dilsel ve görsel göstergelerin tanımını yapmak gerekir: Dilsel göstergeler, semantik alana ait tüm doğal dilleri kapsar. Bunlara yaşayan yaşamayan, yani ölü dilleri de dahil edebilir miyiz? Yapılacak tasarıma göre: Evet edebiliriz, ayrıca dilsel göstergelere alanında yapılacak her türlü yaratıcı fikirlere de açıktır. Görsel göstergeler ise resim, fotoğraf, çizim, simge, logo, imgeler dünyası(zihinsel iz düşümlerinin tasarıma malzeme edilmesi) vb. gibi türü türevleri olan alanların kümesi. Semiyotik hem dilsel hem de görsel göstergeleri içine alan bir sözcüktür. Başka bir deyişle bünyesinde anlam bilimiyle aynı zamanda semiyoloji anlamını da taşır ve etimolojik olarak Fransızca'dan gelir.

Tüm bu basite indirgenmiş tanımlamalardan sonra Psiko-Semiyotik sözcük öbeğinin anlamı açıklanabilir. Bu bana ait bir dizge, bilim dalımla yaratımın olup; hedefteki bireyin ve/veya kitlenin veya kitlelerin istedik doğrultuda harekete geçmeleri için manipüle etme aracı olarak kullanılabilir, hedeftekilerin duyu durum biçimlerine istedik doğrultuda yön verebilmek, duyularını ele geçirmek ve güdülemek amacıyla üzerlerinde egemenlik kurmak üzere dilsel ve görsel göstergelerin tasarlanması demektir.

Bu tasarım iyicil de olabilir, kitlelerin gelişmesini sağlamayı kendine erek edinebilir hatta bu küresel boyutta yapılabilir ama bu makalenin konusu kötücül kullanımıdır(Algül, 2020-2023).

### Dijital Reel Psiko-Semiyotik Dil Kullanımının Açıklayıcı Bilgisi

Ne zamandır söyleyip yazdığım gibi, 21. yüzyıl insanının artık tüm anlamlar evreni dijitaldir. Evdeki akıllı beyaz eşya grubu, TV'niz, saatiniz, telefonunuz, akıllı klimalar, dijital lan üzerinden hedefe yönelik, legal görünümü illegal ya da külliyen illegal elde edilen bilgiler üzerinden ki, ben bunu mahrem bilgi olarak niteliyorum, kişiyi istedik doğrultuda manipüle etmek için dijital ortamlarda ve bununla birlikte psiko etkiyi artırmak için reel yaşam ortamlarında dilsel görsel göstergeler sürdürmek anlamını taşımaktadır. Tüm bu bilimsel alan benim buluşum olup, ilk yazdığım makalelerden faydalanılmıştır( Algül, 2020-2023). Tüm bu tasarımlar insan varsa varlar ama bu hayvanlar için uygulanmıyor ya da uygulanamaz anlamını taşımazlar. (Algül, 2021) İnsanın bilinçdışı kazanımlarını ( Mlodinow, 2013) başka bir söylemle yaşantıları boyunca edindikleri yaşantılardan elde edilen alanı manipüle etmeyi hedeflerler, bazen hiç yoktan psiko-semiyotik bir kullanım yaratılabilir; bunun bir şekilde bireysel ya da kitlesel özelliklere de dayandırılması gerebilir. Bir şekilde düşün, zihin dünyasını tasarlayarak da manipüle etmek denebilir. Genel olarak, bireyin veya kitlenin bilinçdışına dahil olup unuttukları dahil, kapsama alanı içinde olup, duyuşsal anlamda aynı eski etkiyi taşıdıkları bilinir. İnsan zor değişebilen, yaşantılarından zor iyileşebilen, bunun için farkında olup çalışması gereken bir varlıktır. Böyle olsa da manipülasyonun tek kaynağı değildir. Tasarım alanı istenirse herkeste insan türü olmalarından kaynaklanan nedenlerle aynı olan bilinçaltı duyuları, temel içgüdüleri hedef alabilir, anda yoksa yaratabilir(savaş, salgın, yokluk, ölüm, açlık, kıtlık, cinsellik) ) ve istedik doğrultuda kitlesel boyutta bile yeni bir düzen tasarımına yardımcı araçlar olarak kullanılabilir.

Özetlenirse dijital reel psiko-semiyotik dil kullanımları **tasarımı hem bilinçaltına** ki, asırlardır yapılagelmiştir. Cinsellik, giderek çeşitlense de hâlâ başat bilinçaltı psiko-semiyotik dil kullanımı, bu bağlamda gerçek ile satışa yönelik her çeşitlendirmeyi, satışa araç edilenleri kritik edebilecek bir bilinç seviyesini küresel boyuta yaymak, giderek artık bir ütopya halini alabilir çünkü 21. yüzyıl insanı ( diğer makalelerimi okuyunuz) artık hiç olmadığı kadar görsel, nitelikli düşünebilmek, onun bir parçası olan kritik edebilme yetisinden giderek kopartılmış bir durumdadır.

**Bilinçdışı (Algül, 2021) alanından Dijital Reel Psiko-Semiyotik Dil Kullanımı tasarımları çıkarmak bilinçaltı alanından çıkarmaktan çok daha zor, grift ve komplike bir işlemdir.** Bu yüzden bugüne kadar en çok kullanılan bilinçaltına yönelik olanlardı. Fakat AI ile beraber küresel veri madenciliğiyle bireysel ve toplumsal özelliklere, hatta mahrem bilgilere ulaşmak çok kolaylaştı ve yine AI ile beraber elde edilen bilgiyi işlemek ve bu bilginin psiko-semiyotik versiyonunu çıkarmak artık sorun olmaktan çıktı. Şu soru akla gelebilir: 21. yüzyıl, genel çoğunluğa lütfedilen profille buna gerek var mı? Evet, var. Örneğin: Vaka tasarımı örneğimde olduğu gibi veya politik arenada vb. gibi pek çok yeni makale konusu alanlarında: Örneğin (Algül, 2023) ve yayım aşamasında olan, ilgili konulardaki makalelerim tabip edilebilir.

### Psiko-Semiyotik Etkileşim, İletişim Nedir?

Psiko-Semiyotik İletişim, ALGÜL Dijital, Reel, Manuel Psiko-Semiyotik Dil Kullanımları Ayırıştırıcıları, Dijital Reel Psiko-Semiyotik Dil Kullanımları buluşlarını topladığım üst başlıktır. Psiko-Semiyotik Etkileşim, İletişim hedefin psikolojisini etkilemek, istedik doğrultuda düşünsel veya eylemsel olarak manipüle etmek üzere kasıtlı bir bilinçle kurgulanmış, tasarlanmış dilsel ya da görsel göstergeleri araç olarak kullanan bir iletişim modelidir.

Bu tanımlamam hâlâ üzerinde çalıştığım bir tanımlamadır ve çalışmalarım a endeksli olarak gelişecektir.

Bu kasıtlı bilinç bünyesinde toplumsal ve bireysel psikolojik çözümlenmeleri barındırır. Bu yüzden içinde yaşanılan dijital çağ, bireylerden elde edilecek legal görünümü veya illegal( özel mahrem dijital alanların talanımları ( ALGÜL, 2023)özel, mahrem bilgilerin onların psikolojisini etkileyerek düşünsel ya da eylemsel boyutta manipüle etme kaynağı olarak kullanılmaktadır, kullanılacaktır, kötücül yapılanmaların hep var olabileceğini düşünerek hareket edilmesi gerekmektedir. Bu konuda akıllı tabletlerin tüm orta hatta ilköğretim öğrencilerine dağıtılma önerisinin, isteğinin tehlikelerini anlatan makalemin okunması fayda sağlayacaktır(Algül, 2014).

İletişimin bel kemiği 'etkileşimdir' bir başka söylemle iletişim dendiği anda etkileşimin gerçekleştiğini anlamalıyız. Etkileşimse bünyesinde karşılıklılık ilkesini barındırmak zorundadır.

### ALGÜLPsiko-Karşılıklılık İlkesi Nedir?

“.....Hansel ve Gretel, fakir bir oduncunun çocuklarıdır. Oduncunun karısı (bazen çocukların annesi, bazen de üvey annesi olarak anlatılır) aç kalmaktan korktuğu için eşini çocukları ormana götürüp bırakmaya razı eder. Planı duyan Hansel ve Gretel, eve dönüş yolunu bulabilmek için beyaz çakıl taşları biriktirir. Çocuklar geri dönünce anneleri babayı bir kez daha aynı şeyi yapmaya razı eder. Ama bu kez çocukların yol işaretlemek için ellerinde sadece ekme kırıntıları vardır. Maalesef orman hayvanları kırıntıları yer, böylece Hansel ve Gretel kaybolurlar. (Hikâye buraya kadar Perrault'nun Le Petit Poucet'siyle aynıdır.”([wikipedia./Hansel ve Gretel](https://tr.wikipedia.org/wiki/Hansel_ve_Gretel)).

Yemleme sözcüğünü şimdilik 'Karşılıklılık İlkesinde' de de kullanıyorum çünkü aynı zamanda psiko-semiyotik tetikleyiciler dediğim (Algül, 2024 Potansiyel Emsal) olgularıyla diğer çalışmalarım da var olacaklar.

Bu hepimizin bildiği çocuk edebiyatının klasikler bölümünde yer alan Hansel ve Gretel'in zorunluluktan ufaladıkları ekme kırıntıları yenmeseydi( yenmeme ihtimali de yok denecek kadar azdı) eğer, hikâye hiç doğmayacaktı. Ekme kırıntıları 'gönderen' diye düşünülürse, 'gönderilen' Bu Hikâyede Hansel'le Gretel'in potansiyel alıcıları, mesajı almış, havada kapmış ve yemişler demektir. İyi kurgulanmış bir psiko-semiyotik dil kullanımı tasarımı işte tam da böyledir: Adrese teslim edilir. Toplumun ya da bireyin açlığı, duygu durum biçimleri, özlemleri hatta yüzlerce yıllık hasletleri(özlemleri), toplumsal ve bireysel çözülmüş duygu durum biçimlerinin tümü iyi birer 'Karşılıklılık İlkesi' ni tam kapsayacak bilgi kaynaklarıdır. Hansel ve Gretel tam tersini dilemiş olsalar da aynı Hansel ve Gretel'in ekme kırıntıları gibi hedefi tam on ikiden vururlar ve istedik yönde duygusal ya da eylemsel tutum ve tavrı gerçekleştirir, manipülasyonu, değiştirip dönüştürmeyi sağlarlar.

Gönderenle gönderilen arasındaki mesajın alınması durumunda ancak *etkileşimin* gerçekleştiği söylenebilir. Eğer gönderenle gönderilen arasındaki bağ kopmuşsa ya da gönderenin mesajı 'karşılıklılık' ilkesine sahip değilse etkileşim gerçekleşmez ve mesaj yerini bulmaz. Bir başka deyişle iletişim gerçekleşti denebilmesi için, etkileşim şarttır ve bunun da yolu gönderilen tarafından gönderenin istediği doğrultuda mesajın anlaşılması olmasında yatar. Karşılıklılık İlkesi de bana ait bir tanımlardır. Dijital Reel Psiko-Semiyotik Dil Kullanımlarında hedefi etkileyecek vurucu dil kullanımlarının karşılıklılık İlkesini çokça yapılarında bulundurmaları gerekir. Bu yüzden gözlemleri, içgörülerini, öngörülerini, altıncı hisleri, dilbilgisi ileri düzeyde olan bireyler bu çağda tehlike altındadırlar çünkü bu bireylerde karşılıklılık ilkesini çok iyi çalışır. Potansiyel dijital köle adayları olabilirler: Bknz. (Algül, 2022, 2023).

Algül Psiko-Karşılıklılık İlkesini bir örnekle anlatmak gerekirse: Öncelikle hedefin duygu durum biçimlerini yakalamak ve duygu durum biçimlerini manipüle etmek, istedik doğrultuda güdümlenmek ve manipüle etmek üzerine olduğu düşünülmelidir.

### Yapay Zekâ Nedir?

Yapay zekâ kurgulanan ve yapılandırılan algoritmalarla ilgilidir. Makinenin onu çevreleyen anlamlar evreninin algılaması bağlı ve bağlı olmayan noktaları deşifre edip ayırabilmesi insan faktörünün yapılandırdığı algoritmalarla ilişkilidir. Bu bağlamda Dijital Reel Psiko-Semiyotik Dil Kullanımlarında yapılandırılacak algoritmalar yapay zekâ teknolojisini zorlayacak ve yeni teknolojiler geliştirilmesini sağlayacak niteliktedir. Makine öğrenmesinde çığır bile açabilir. ALGÜL Dijital Reel Psiko-Semiyotik Dil Kullanımları Ayırıştırıcıları için tasarladığım böyle bir gelecektir ve eliptik küremizin geleceğiyle de yakından ilişkilidir. Kaptırılmaması gereken bir film veya dizi senaryosuyla sınırlı kalamayacak kadar bilimsel anlam ve öneme sahip olabileceği öngörülebilir.

Program, bilgisayarın bir veya daha fazla görevi yerine getirmesini sağlayan kodla yazılmış, talimatlar dizisidir(Alfa Yayınları, 2024); bir sıfır mantığına dayanır. Algoritmalar ve yapay nöronlarla ki, hepsi de insan

faktörüyle gerçekleşir, makine öğrenmesi dediğimiz olay yaşanır (Alfa Yayınları, 2024), bir başka söylemle makine öğrenmesini de zorlayacak insan beyninin algoritmaları, yeni keşifleri, bilimsel buluşları olacaktır.

## SONUÇ

Bu makalede yer alan ve alanında ilkleri temsil eden açıklayıcı bilgiler, gündelik yaşamlarında başlarına gelen, yaşadıkları ama çözümleyici bilgi olarak ancak tuhaf buldukları aslında Dijital- Reel Psiko-Semiyotik Dil Kullanımlarının 7/24 21. yüzyıl insanının nicedir yeni gerçeği, çözmesi gerçeğine ermesi gerekli olan anlamlar evreni olduğunu insana insanlığa anlatmak üzerine kuruludur ki, bu bilimsel tanımlamaları da birebir yaşadıklarından ürettim. Gerçeğe ulaşmanın artık hiç olmadığı kadar karmaşık olduğu 21. yüzyılda insanların elinde neler yaşatıldığına, yaşadıklarına dair açıklayıcı bilgiler olsun ve bu bilinçle bakıp kendilerini koruyabilsinler diye çünkü öyle bir çağ ki, yalan, talan, hile, düzenbazlık, tezgâh, dümen üzerine kurulu bir gerçekliği yaratabilen, talan ettiği kaynağı Dijital Reel Psiko-Semiyotik Dil Kullanımları baskı cenderesinde tutarken, beslediği yaşam kaynaklarını ailesi, sevdikleri vb. gibi Dijital Köleyi baskılamak üzere birebir Dijital-Reel Psiko-Semiyotik baskı uğraşlarına dahil etmekten çekinmemektedirler. Buradaki tutum ve tavır talan edilen kaynak belirleyecektir. Kimler üzerinden manipüle edilebiliyorsa hiç çekinmeden bunu yapabilen artık açıkça görünmesi bilinmesi gereken yapılanmalara sahip olabilir toplumlar; bu tür yapılanmaların mafya ilişkileri de olmakta ve bunun üzerinden tüm hayatlarını refah içinde sürdürebilenlerin olduğu bilincini yaratmak ve yaymak amaçlıdır.

Unutulmamalıdır ki, örgüt diye nitelendirilenlerin dönemini yaşayan bir toplumun yarattığı bilim dahıdır. Erzurum'un köyünden çıkan birinin tüm o işleri başarabileceğini ve fikirlere sahip olabileceğini sorgulamalı ve hepsinin en azından gitmiş olduğu düşüncesine ya da asla kötülük yapamayacakları düşüncesine kapılmamalıdır. Aktarılan kötücül özellikleri Dijital Reel Psiko-Semiyotik Dil Kullanımlarının ta kendileridir ve ayrıca dijital alan hakimiyetleri de açığa çıkmıştır; tüm bu bilgilere bu insanların erebilmelerini sorgulamalı ve uyanık olmamalıdır ya da aynı yolu modelleyecek yeni yapılanmalara karşı bilinçli bakmamalıdır hatta üretebilecekleri yeni ağlara karşı da tedbirlerini bireysel anlamda almalarını sağlamaya yönelik çalışmalardır. Her şeyden önce bireysel bilinçlenmeye, toplumsal bilinçlenmeye önem veren, bunun gerekliliğini gören çalışmalardır ve hep öyle olacaktır. Veri kaçakçılığı, Ver madenciliği her türlü MTA ürününden elde edilen kazanç yasa dışı işlerden elde edileni kat kat geçmiştir. Mafya düzeneğinin buraya kayması legal görünümle içiçe olması, illegal talanın yapanların yanına kâr kalma ihtimali, zaten öyle bir yapılanma ki, tiyatro oyuncuları gibi oldukları bir kısmıyla deşifre oldu, bu alanı çok cazip kılmaktadır.

Bu makalenin amacı genele açılmak, dijital çağın zararlarını bilimsel olarak ortaya çıkan bu açıklayıcı bilgiler silsilesini haftalık etkinlikler, seminerler ve konferanslarla halka açmak. Buluştan bu yana onca zaman geçmesine rağmen akademik alanda tek yapabildiğim makalelere devam edebilmek ve kitaplaştırma çabam oldu. Bu kaçınıcı proje başvurum, beklemedeyim. Bu çağda sağlıklı koşullar altında yücelmesi gereken bir buluşlar serisini ürettim ve her şeyden önemlisi çaldırılmayı başardım bu da içinde bulunduğum koşulları çok iyi anlatmalıdır.

Öğretimin yani aktarılan bilginin eğitime dönmesi bir gereklilik olarak açıkça ortada durmaktadır. Ayrıca psikoloji öğretimi, insan profilleri, kötücül insan karakterleri, nasıl kamufle edebildikleri, içinde doğdukları toplumların demografik yapıları ve yapılanmaları bilgisi, duygu durum biçimlerine anlama çözme, daha anında karşılaştıkları Dijital- Reel Psiko-Semiyotik Dil Kullanımlarının avcı kimliklerini deşifre edebilme yeteneği kazandırma; yani avcı Dijital- Reel Psiko-Semiyotik Dil Kullanımlarını ki, artık 21. yüzyılın hareket noktası avlamak üzerine kurulu, kimse en küçük parmağını bile bir av amacı taşımadan hareket ettirmemektedir. İçinde bulunan yüzyıl böyle bir yüzyıldır ve yöneticilerine karşı uyanık olmalıdırlar. Dijital çağda legal görünümü veya özel mahrem dijital alanların talanı (Algül, 2020-2023 elde edilen verilerin ulusal ve küresel satışından elde edilen büyük kâr ve kazançların olduğu, bu türdeki illegal verilerin üzerinden kurumsal kimliklerin yapılandırıldığı ve kazanıldığı bir dünyada böyle bir yapılanmayla uzlaşanların iktidar ve güç için destek alabilecekleri görüsünü geniş kalabalıklara içsel bir kazanım olarak yerleştirme çabası bir gerekliliktir ve böyle bir ortamda tüm çok başarılı diye sunulan insanlara sorgulayarak bakmak gerekmektedir çünkü açığa çıkan kötülük olarak sunulan yapılanma modeli bu tür kötülüklerde bileşik kaplar olarak hareket etmektedirler, bu da bir gerekliliktir. İktidara gelecek olan kişilerden dijital alanların, elektronik alanların ulusal ve küresel tam güvencesi talep edilmelidir. Özellikle Türkiye gibi toplumlarda devlet baba, evin reisi, gibi duygular üzerinden hareket edebilen, reaya kültüründen ve genetik kültürel kodundan gelen toplumlarda, Cumhuriyet'le gelen modern yönetim biçimlerine, kısaca devlete güven vardır, genel çoğunluk için kendini devlete bırakmak vardır ve öncelikli olabilir. Yeni dünya düzeneğiyle beraber devletin sosyal kimliğinin yönetimden giderek azalırken tam tersi Dijital-Reel Psiko-Semiyotik Dil Kullanımları bireyin kendini koruma bilincine bir katkı sağlamayabilir. Bu konuda aldatici, gerçekleri yansıtmayan, kendi siyasi geleceklerini ve günü kurtarma amaçlı tasarlanan Dijital-Reel Psiko-Semiyotik dil kullanan siyasilerin kullandıkları Dijital-reel Psiko-Semiyotik iletişimin dilinin tüm sorumluluklarını almaları istenebilir, istenmelidir. Halkın bilinç seviyesini, vatan sevgisini, devletine duyduğu güveni hiçbir şekilde ona karşı avlayıcı olarak kullanabilecek Psiko-Semiyotik dil kullanımlarına avlanamayacak duygu durum biçimine ve içselleştirilmiş açıklayıcı bilgi seviyesine çıkarmak

gerekir. Doğru insanların eleştirel ve sorgulayıcı bir düşün dünyasından korkması, çekinmesi düşünülemez. sorgulama ve eleştirel bakışları sağlıklı öğretim metotlarıyla sekteye uğramış geniş kitlelerin bu yönlerini avlamak üzere Dijital-Reel Psiko-Semiyotik Dil tasarımları suç sayılmalıdır. ( Algül, 2018) Bknz. Matematik ve Türkçe Öğretim Metotları Üzerine ALGÜL teoremleri; **düşünce gelişimi, düşün dünyası iyileştirmelerini bir gereklilik olarak gören ama tüm bunları siyasi, politik çıkarı ve başarısı için yüzeysel boyutta kullanmama garantisi veren bu garantiyi de yüzeysel, kasıtlı çıkar amaçlı yapmayacak olan; siyasi partilere öncelik vermek, ulusal ve küresel dijital köleliğe hayır diyecek olan ve sözünü tutabilecek olan partilere oy vermek çözümlerden olabilir.**

İktidara gelip muktedir olacak siyasi partilerin halkın yaşadığı gerçeklerle aslında hiç örtüşmeyene, Dijital Reel Psiko-Semiyotik Dil Kullanımlarıyla halkı sanal bir gerçeklik içinde tutan ve halkın duygu durum biçimlerine yönelik kasıtlı dil, benim tanımlamamla Psiko-Semiyotik İletişimi Dilini kasıtlı, aldatici, duyguları manipüle edip üzerinden çıkar sağlayıcı dil kullanımlarını tercih edip bu güçle hareket eden siyasi partilerin kullandıkları Psiko-Semiyotik İletişim Dilinden sorumlu tutulmaları istenmelidir.

Önerilerin asli amacının özeti aslında hiçbir partiye bu işi bırakmamak ve geniş halk kitlelerini avcı, Dijital-Reel Psiko-Semiyotik dil kullanımlarını havada yakalayacak konuma yükseltebilecek çözümler üretmektir. Bu makaleden sonra kopyalanacak çözümlerden biri dernek ve vakıflar olabilir ki, bu da işin vehâmetidir. Bu yüzden yaratımın olan bilim dalı, bilim dalı alanları tanımlamaları ve bilimsel çalışmalarımın da amacı bireye topluma geniş kitlelere ulaşmak. Herhalde dijital mecraları bu bağlamda kullanmak zorunda kalacağım. Düşünün tanımladığı bilim alanını, yarattığı bilim dalını ve buluşlarını nihayet çaldırmamayı başaran önce insan, sonra bilim insanı olmaya çabalayan uzun seneler boyunca Dijital Köle olarak kullanılan birinin makalesini okumaktasınız. Bu insanlığa meselenin boyutu hakkında çok şey anlatmalıdır, anlamak isteyene anlatacaktır.

## ABSTRACT

Among all the contemporary digital ecosystems, endpoint devices, including computers, servers, and IoT gadgets, represent at once the most important and the most vulnerable part of the infrastructure of any organization. Traditional security solutions very often cannot identify subtle and sophisticated threats that reveal their presence only through deviations from normal behavior. This paper presents the application of unsupervised machine learning methods-namely, Isolation Forest and One-Class Support Vector Machines-for real-time anomaly detection in endpoint devices. The efficacy, for this purpose, is shown in this paper using comprehensive telemetry data such as CPU usage, memory consumption, and network traffic, whether anomalies due to security breaches or system malfunction can be detected using these techniques.

**Keywords:** Anomaly Detection, Endpoint Security, Unsupervised Machine Learning

## INTRODUCTION

Nowadays, information systems are becoming more complex, and thus the level of related security risks, including monitoring of network events and endpoint health, is correspondingly growing. An endpoint is a remote computing device that communicates back and forth with a network to which it is connected. Some examples of endpoints are desktops, laptops, smartphones, servers, workstations and Internet-of-things (IoT) devices - like security cameras, smart thermostats and smart home assistants. For a long time, monitoring of endpoint health has been done using signature-based antivirus systems. However, these methods have begun to lose their effectiveness [7]. Firstly, they become helpless against zero-day threats because there is no known signature; secondly, systems based on these methods require regular updates to maintain an up-to-date database of malware signatures; and most importantly it is very difficult for such systems to recognize the signature of a malware if it has been modified using obfuscation techniques

Malwares are constantly evolving and creating new threats. It is important to have security solutions that can recognize these new threats without the need of regular updates. One of the most effective methods that can be helpful to solve this problem is machine learning methods. These methods can monitor the endpoint and many of its systems, including network activity, or the activity of different hardware devices and learn the behaviour of the endpoint.

An anomaly is anything that deviates from what is standard or expected [5]. The process of finding such unexpected and non-standard behaviours in an endpoint we call anomaly detection. There are many anomaly detection algorithms, such as: statistical methods, rule-based methods, supervised and unsupervised machine learning methods, deep learning methods etc. However not all these methods can be useful in endpoint anomaly detection, the main criterias for the effectiveness of an algorithm are its performance, memory and CPU consumption, detection accuracy and possibility of continuous learning. The objective of this paper is to provide a comprehensive review and analysis of unsupervised machine learning methods. The main reason for choosing unsupervised machine learning methods is that they can be trained with unlabelled data, which is important because it is very difficult to find labelled data for anomalies.

## Background

This section delves into key definitions, concepts and terminologies that form the basis of our study.

*Definition* (Endpoint). An *endpoint* is a computing device or node that is connected to a network and communicates back and forth with the network to which it is connected.

*Definition* (Anomaly). Given a dataset  $\mathcal{X} = \{x_1, x_2, \dots, x_N\}$ , an *anomaly*  $x_i \in \mathcal{X}$  is a data point that significantly differs from the majority of the data according to a defined metric or model.

In endpoint security, anomalies may indicate unusual system behaviour caused by malicious activities, hardware failures, software bugs or any other unexpected events. Anomalies aren't necessarily malicious, but they can also be related to endpoint behaviour not seen before.

*Definition (Anomaly Detection).* Anomaly detection is the process of identifying anomaly data points in a dataset.

*Definition (Real-Time Anomaly Detection).* Real-time anomaly detection is the process of identifying anomaly data points in a dataset as they occur, with minimal delay.

In the context of endpoint security, this entails the continuous monitoring of the status of the endpoint, coupled with the analysis of new data for any anomalies that may be identified.

*Definition (Endpoint Telemetry).* Endpoint Telemetry is data that is continuously collected from the endpoint. This data can include logs, metrics and other types of information that reflects the state of the endpoint.

In this paper, the most basic endpoint metrics were taken as telemetry. At the same time, these basic indicators are the most important ones on monitoring endpoints:

- CPU usage ( $x_1$ ): The percentage of CPU resources utilized by the endpoint.
- Memory usage ( $x_2$ ): The amount of memory (RAM) consumed by the endpoint.
- Video memory usage ( $x_3$ ): The memory used by the graphics processing unit (GPU).
- Disk read/write rate ( $x_4, x_5$ ): The rate of data read from or written to the disk.
- Network traffic ( $x_6, x_7$ ): The volume of data transmitted over the network.
- Process count ( $x_8$ ): The number of active processes running on the endpoint.
- Average process CPU usage ( $x_9$ ): The average CPU usage of active processes.
- Average process memory usage ( $x_{10}$ ): The average memory usage of active processes.
- Total active connections ( $x_{11}$ ): The number of active network connections.
- Count of unique IPs ( $x_{12}$ ): The count of unique IP addresses connected to the endpoint.

These indicators form a multidimensional data point  $\mathbf{x} = [x_1, x_2, \dots, x_{12}]^T \in R^{12}$  for each time interval. The data is stored in a structured format and preprocessed to handle missing values and normalise scales [4].

**Unsupervised Machine Learning for Real-Time Anomaly Detection.**

In real world scenarios, endpoint telemetry data is not labelled, making it difficult to use supervised machine learning for anomaly detection. Unsupervised machine learning is an optimal approach for anomaly detection due to the fact that it does not require labeled data for training. Unsupervised methods analyse the entire dataset and identify patterns in it, then based on these patterns determines the data points that least fit the pattern and labels these data points as anomalies.

*Definition 2.6 (Unsupervised Learning).* Unsupervised machine learning is a type of machine learning that learns from data without human supervision. Unlike supervised learning unsupervised machine learning models are given unlabeled data and allowed to discover patterns and insights without any explicit guidance or instruction.

Unsupervised machine learning methods are also optimal for real-time anomaly detection due to their working principle [10]. After continuous training of a model for a certain period of time (e.g 1 month), the model establishes a baseline pattern of normal behaviour [3]. Subsequently, as new data is occurred, the model can compare it against its learned patterns, efficiently identifying deviations that suggest potential anomalies.

**Continuous Anomaly Detection Methodology.**

This paper puts forth a methodology for the continuous detection of anomalies, as illustrated in Figure 1. The methodology comprises two principal phases, delineated by a dashed line.

Figure 1: Timeline of anomaly detection methodology.

The first phase consists of two periods: data collection period, which includes the collection of endpoint telemetry data from the system monitoring module followed by preprocessing of collected data, and the model training period (Figure 2).

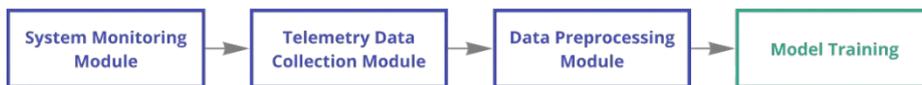

Figure 2: Training period.

Following initial training phase, the model has already developed patterns based on the data collection period data. These patterns enable the model to recognise anomalies in preprocessed data points as new data occur in telemetry collection module. Each new data point is not only analysed by the anomaly detection module, but also stored for the upcoming retraining phase of the model (Figure 3).

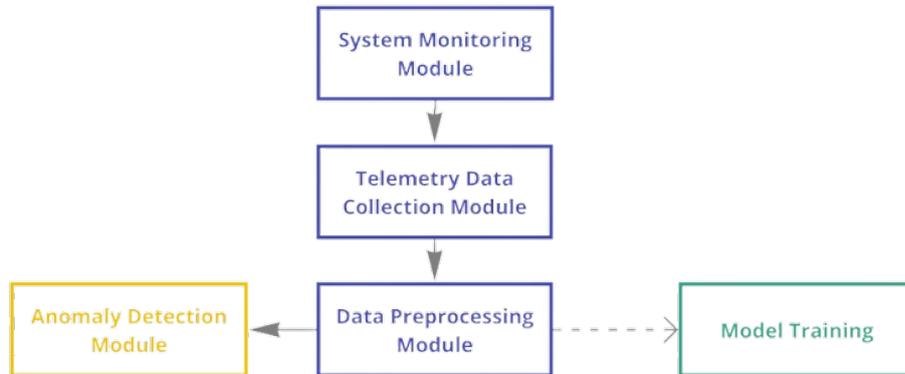

Figure 3: Detection period.

It is important to note that the data collection time in the first period of the paper's anomaly detection methodology can be called a hyperparameter of the whole methodology, as it can be customised depending on the endpoint's requirements. In dynamic endpoints such as laptops and personal computers, which may have a lot of different behaviours, this time can be long (4-7 weeks), because for successful analysis it is necessary to collect data on all possible behaviours of the endpoint before starting the analysis for anomalies. In the case of less dynamic endpoints, such as those represented by the IoT devices, the data collection period can be reduced to a shorter timeframe (3-12 days). This is due to the fact that such endpoints exhibit a limited range of behavioural patterns, which can be more efficiently captured within a shorter data collection window.

Another hyperparameter of the methodology is the data collection time in the anomaly detection period. All stored data points after a certain period of time are passed to the model for retraining. This time should be shorter than the initial time for the main training phase of the model. Furthermore, it is advisable to consider the level of dynamism of the endpoint on training model.

Model training time in Figure 1 shown large than it will be in real world application. This was done for the purpose of good and clear illustration. In real applications this time will be longer in the first period when the model is trained on a large amount of data from first main data collection period, and shorter when it is retrained on a smaller amount of data. It is important to note that this time strongly depends on the training model. Training time will different significantly on different models. Therefore, it is very important to chose the right models for the training.

## Methods

In this section of the paper, different unsupervised machine learning methods are discussed and their suitability for the endpoint anomaly detection is analysed. The methods described in this section were tested on real data that was collected from an endpoint within one hour. During this period, telemetry from the endpoint was collected at 10-seconds intervals, then it was preprocessed and stored for model training. Some of the collected telemetry was modified to simulate anomalies and then tested in the described method to verify their effectiveness.

The use of simulated anomaly data in the test dataset allows for the evaluation of the method's efficacy through the analysis of a confusion matrix.

*Definition (Confusion Matrix).* A confusion matrix is a table that summarizes the performance of a classification model by showing the counts of actual versus predicted classifications. For a binary classification problem, the confusion matrix is a  $2 \times 2$  matrix with the following structure:

$$\begin{array}{cc} TN & FP \\ FN & TP \end{array}$$

where:

- True Positive (TP): The number of data points that are correctly predicted as the positive class.
- False Positive (FP): The number of data points that are incorrectly predicted as the positive class (but are actually negative).

- False Negative (FN): The number of data points that are incorrectly predicted as the negative class (but are actually positive).
- True Negative (TN): The number of data points that are correctly predicted as the negative class.

### Isolation Forest.

Isolation Forest is an ensemble anomaly detection algorithm that isolates anomalies instead of profiling normal data points [6]. By recursively partitioning the data using random feature selection and split values, it efficiently identifies anomalies as data points that require fewer splits to isolate. We formally define the Isolation Forest as follows.

*Definition* (Isolation Forest). An Isolation Forest consists of  $t$  isolation trees built from subsamples of the data. Each isolation tree  $T$  is constructed by recursively partitioning a dataset  $X$  using randomly selected features and split values until each data point is isolated. The anomaly score for an  $\mathbf{x}$  is calculated based on the average path length  $E[h(\mathbf{x})]$  across all trees:

$$s(\mathbf{x}, n) = 2^{-\frac{E[h(\mathbf{x})]}{c(n)}}$$

where  $c(n)$  is the average path length of searches in a Binary Search Tree:

$$c(n) = 2H(n-1) - \frac{2(n-1)}{n}$$

and  $H(i)$  is the harmonic number defined as  $H(i) = \ln(i) + \gamma$  with  $\gamma \approx 0.57721 \dots$  being the Euler- Mascheroni constant [1].

The anomaly score  $s(\mathbf{x}, n)$  quantifies the degree of abnormality of  $\mathbf{x}$ , with higher scores indicating higher likelihoods of being anomalies.

### Algorithm Details.

Isolation Forest operates under the principle that anomalies are “few and different” and thus more susceptible to isolation through random partitioning. The algorithm comprises two main processes: building the isolation trees and calculating anomaly scores.

Each isolation tree is constructed by recursively partitioning the data. Starting with a subsample  $X'$  of size  $\psi$  randomly selected from the dataset  $X$ , the tree is built as follows. At each node, a feature  $q$  is randomly selected from the set of features. A split value  $p$  is then randomly chosen between the minimum and maximum values of feature  $q$  in the data at that node. The data is partitioned into two child nodes based on whether the feature value is less than or greater than or equal to  $p$ . This process continues recursively for each child node until one of the termination conditions is met: either the node contains only one data point, or the tree reaches a predefined maximum depth.

The anomaly score for an  $\mathbf{x}$  is calculated using the average path length  $E[h(\mathbf{x})]$  across all trees. The path length  $h_j(\mathbf{x})$  is the number of edges traversed from the root node to the terminating node in tree  $T_j$ . The average path length is computed as  $E[h(\mathbf{x})] = \frac{1}{t} \sum_{j=1}^t h_j(\mathbf{x})$ . The anomaly score is then determined using the formula for  $s(\mathbf{x}, n)$ .

### Experimental Results.

Method was tested using python library scikit-learn [8] with the data discussed at the beginning of the methods section. To visualise results a pair plot was constructed (Figure 4). The pair plot highlights how specific pairs of features interact. For instance, there is a notable separation between normal and anomalous data when comparing CPU usage with RAM usage, suggesting that anomalies affect both CPU and RAM usage in a distinguishable way.

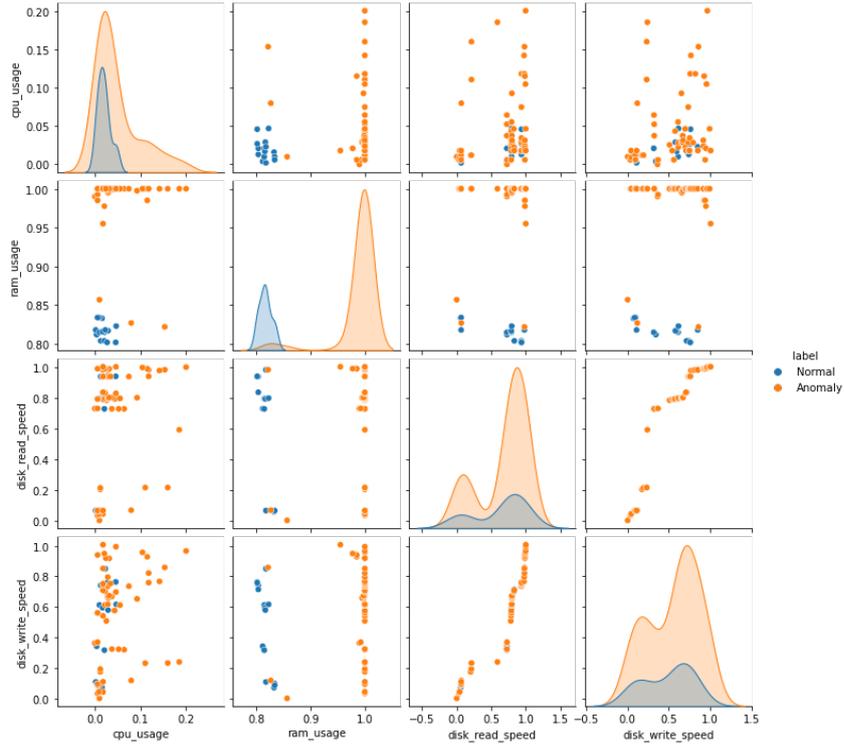

Figure 4: Isolation Forest Pair Plot Visualisation.

The confusion matrix of the method’s results is as follows:

|    |    |
|----|----|
| 53 | 0  |
| 3  | 15 |

The confusion matrix shows that the model correctly identified 53 anomalies (True Negatives) and 15 normal points (True Positives). It produced 3 false negatives (missed anomalies) and no false positives (normal points classified as anomalies). This demonstrates excellent precision for normal data and a high specificity for anomalies, although the model has a slightly lower recall for anomalies due to the missed cases. Overall, the Isolation Forest method shows strong performance with minimal misclassifications.

**One-Class Support Vector Machines.**

The One-Class Support Vector Machine (One-Class SVM) is an unsupervised learning algorithm derived from the Support Vector Machine framework, designed specifically for anomaly detection tasks. It aims to learn a decision function that identifies regions in the input space where the probability density of the data resides, thereby enabling the detection of outliers or anomalies that fall outside this region.

*Definition (One-Class SVM).* Given a set of training data  $\{x_i\}_{i=1}^N$ , where  $x_i \in R^D$ , the One-Class SVM seeks a hyperplane in the feature space  $F$ , induced by the mapping  $\phi: R^D \rightarrow \mathcal{F}$  that best separates the data from the origin with maximum margin. This is formulated as the following optimization problem:

$$\min_{\mathbf{w}, \rho, \xi_i} \frac{1}{2} \|\mathbf{w}\|^2 + \frac{1}{\nu N} \sum_{i=1}^N \xi_i - \rho \text{ subject to } (\mathbf{w}^\top \phi(\mathbf{x}_i)) \geq \rho - \xi_i, \xi_i \geq 0, i = 1, \dots, N,$$

where  $\mathbf{w} \in F$  is the normal vector to the hyperplane,  $\rho \in R$  is the offset from the origin,  $\xi_i \geq 0$  are slack variables allowing for some errors, and  $\nu \in (0, 1]$  is a parameter controlling the trade-off between the fraction of outliers and the margin of the hyperplane.

The One-Class SVM constructs a decision function  $f(\mathbf{x})$  that indicates whether a new data point  $\mathbf{x}$  is similar to the training data (normal) or not (anomalous). The decision function is given by:

$$f(\mathbf{x}) = \text{sgn}\left(\sum_{i=1}^N \alpha_i K(\mathbf{x}_i, \mathbf{x}) - \rho\right),$$

where  $K(\mathbf{x}_i, \mathbf{x}_j)$  is the kernel function, and  $\alpha_i$  are the solution to the dual optimization problem.

**Algorithm Details.** The One-Class SVM algorithm involves solving an optimization problem to find the hyperplane that best separates the data from the origin in the feature space. By introducing Lagrange multipliers  $\alpha_i$ , the problem can be transformed into its dual form.

$$\max_{\alpha_i} -\frac{1}{2} \sum_{i,j=1}^N \alpha_i \alpha_j K(\mathbf{x}_i, \mathbf{x}_j) \text{ subject to } 0 \leq \alpha_i \leq \frac{1}{vN}, \sum_{i=1}^N \alpha_i = 1.$$

The kernel function  $K(\mathbf{x}_i, \mathbf{x}_j)$  computes the inner product in the feature space, allowing the algorithm to handle non-linear separations without explicitly mapping the data to a higher-dimensional space.

**Experimental Results.** Method was tested using python library scikit-learn with the data discussed at the beginning of the methods section. To visualise results a pair plot was constructed (Figure 5).

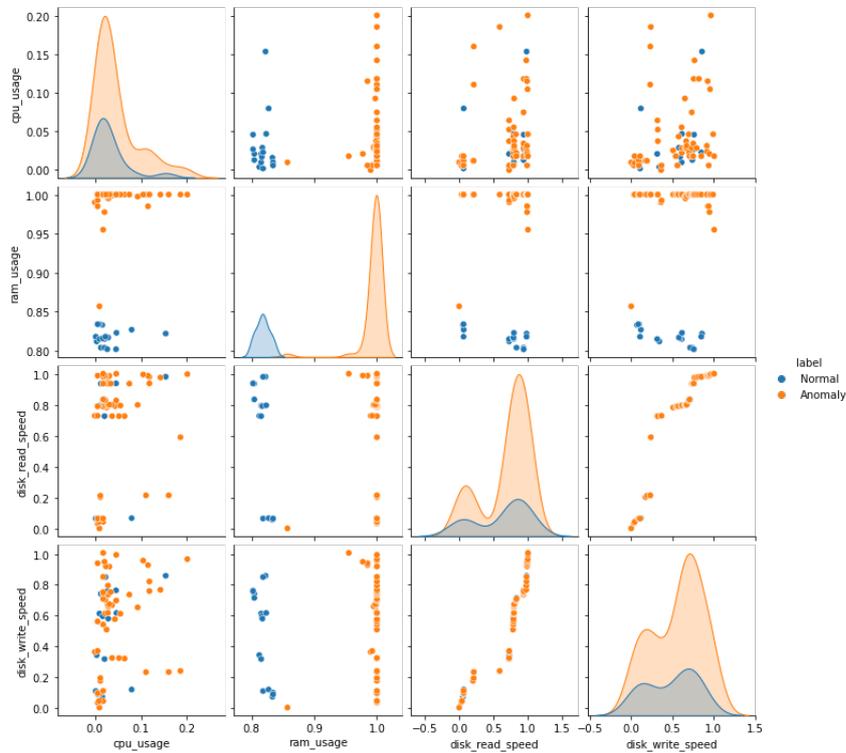

Figure 5: One-Class SVM Pair Plot Visualisation.

The confusion matrix of the method’s results is as follows:

|    |    |
|----|----|
| 53 | 0  |
| 1  | 17 |

The confusion matrix for this method shows 53 anomalies correctly identified (True Negatives), 17 normal points correctly classified (True Positives), 1 false negatives (missed anomalies) and 0 false positive (normal point classified as an anomaly). Compared to the Isolation Forest method, One-Class SVM demonstrates a slight improvement in precision with fewer false negatives.

**Conclusion**

This paper investigated unsupervised machine learning techniques for real-time anomaly detection in endpoints using novel continuous anomaly detection methodology. Was given a description of the continuous anomaly detection methodology and its core working principles. Two unsupervised machine learning methods have been considered as the part detection methods: isolation forest and one-class support vector machines. Both methods

have been trained using real endpoint telemetry data of 1 hour time period. Part of this telemetry was modified to simulate anomalies and used as test data. Pair plot visualisation was used to show separation between anomalies and normal data on different

# RESEARCH ON INNOVATION IN DIGITAL MEDIA ART IN THE AGE OF ARTIFICIAL INTELLIGENCE

Yi-Fei ZHU

Communication University of China

zhuyifei@tm.hzc.edu.cn

## ABSTRACT

This article provides a comprehensive examination of the application and profound impact of Artificial Intelligence (AI) technology in the field of digital media creative design. The introduction of AI has revolutionized the approach to creative design, enabling designers to work more efficiently and innovatively. Specifically, AI has achieved significant advancements in areas such as image processing, video editing, and audio production, enhancing both the quality and efficiency of design work. Through case studies, it is demonstrated that AI design not only surpasses traditional methods in boosting user engagement and customer satisfaction but also unlocks tremendous potential for innovation and personalized design. The influence of AI technology on digital media creative design will continue to expand, indicating its future significance and vast potential.

**Keywords:** digital media creative design, artificial intelligence, design quality and efficiency, innovation, personalized design

## INTRODUCTION

In today's digital era, digital media creative design has become central to communication, marketing, and artistic expression. This field has evolved from basic graphics and text layouts to highly interactive and visually impactful works, reflecting the advancements in technology and shifting market demands. Artificial intelligence (AI), particularly machine learning and deep learning, is fundamentally transforming the scope of creative design. AI enables designers to optimize and personalize their work through data-driven insights, creating unprecedented visual effects and user experiences.

The application of AI in design goes beyond automating repetitive and technical tasks; it introduces new tools and methods that significantly enhance designers' creativity. In image processing, AI can automatically recognize and intelligently edit elements within images, greatly improving efficiency and accuracy. In video production, AI aids in automating editing and color grading, and even generates realistic animation effects. Audio design also benefits from AI advancements, including sound synthesis, automatic adjustment of pitch and rhythm, and the generation of natural-sounding speech. Moreover, AI plays a crucial role in user experience design, such as automatically adjusting interface layouts and content displays based on user behavior and preferences.

As AI technology continues to develop and mature, its impact on digital media creative design is expanding. AI not only provides designers with new tools and techniques but also brings new challenges and opportunities to the entire industry. Its application enhances design quality and efficiency, while also pioneering new styles and forms of expression. AI is set to play an increasingly important role in the creative process of the future, reshaping not only how designers work but also our perceptions of aesthetics and creative expression. The potential of AI in digital media creative design is vast, with promising prospects for future development.

### 1. The Applicability of AI Technology in Creative Design

In the realm of digital media creative design, AI technology not only enhances the efficiency and quality of design work but also opens up new avenues for creativity. AI allows designers to quickly execute tedious tasks such as image classification, editing, and color correction, enabling them to focus more time and energy on

creative and innovative endeavors. Additionally, the data-driven nature of AI makes the design process more objective and scientific, allowing designers to adjust strategies based on data analysis to better meet market demands and user preferences.

AI also introduces new elements and methods into creative design. For instance, the use of deep learning for style transfer allows designers to explore and experiment with different visual styles without manually crafting every detail. AI-generated art and images offer entirely new sources of inspiration for creativity. Moreover, AI can play a crucial role in interactive design and user experience, optimizing interface design based on user behavior data to make it more intuitive and engaging.

## **2. The Application of Artificial Intelligence in Digital Media Creative Design**

### **2.1 AI in Image Processing, Video Editing, and Audio Production**

Artificial intelligence has become a transformative force in the fields of image processing, video editing, and audio production within digital media creative design. In image processing, AI can efficiently classify, recognize, and edit images. Leveraging deep learning algorithms, AI can identify objects and patterns within images, automatically performing tasks such as color correction, image enhancement, and style transfer. For example, AI can transform a regular photograph into a piece of art resembling the styles of Van Gogh or Picasso. Additionally, AI can perform intelligent cropping and content-aware fill, adjusting and repairing images without altering their primary visual elements.

In video editing, AI technology has advanced to assist or even automate many tedious editing tasks. AI can automatically cut videos, switch scenes, adjust colors, and mix sound based on preset parameters or learned styles. Furthermore, AI can analyze video content to generate subtitles and provide summaries of the video. AI technology can also create realistic animations and special effects, such as adding virtual objects or changing backgrounds in existing videos.

Audio production is another area where AI technology is being applied. AI can edit and mix sounds, automatically adjust volume and quality, and eliminate noise. Its use in music production is particularly notable, as AI can compose music or generate melodies and rhythms based on specific styles and parameters. Moreover, AI's speech synthesis technology is becoming increasingly sophisticated, capable of producing human-like voices for broadcasts, podcasts, and other audio products.

### **2.2. Enhancing the Quality and Efficiency of Creative Design**

Artificial intelligence has played a crucial role in enhancing the quality and efficiency of digital media creative design. Firstly, AI's automation capabilities have significantly increased work efficiency. By automating repetitive and technical tasks, AI frees up designers' time, allowing them to focus on more creative aspects of their work. For instance, in video production, AI's automatic editing and color adjustment features can save a considerable amount of manual editing time. In image processing, AI's automatic color correction and content-aware fill reduce the need for designers to make fine-tuned adjustments.

AI not only boosts efficiency but also improves design quality through its advanced analytical and learning capabilities. AI can learn from vast amounts of data and identify design trends, providing designers with insights into popular elements and styles. Moreover, AI's experimental and innovative abilities bring new perspectives to creative design. For example, AI's style transfer function can help designers explore different combinations of artistic styles, leading to the creation of unique and compelling works.

## **3. AI-Driven Creative Design Case Analysis**

### **3.1 Case Studies of AI-Driven Creative Design in China**

#### **3.1.1 AI-Assisted Advertising Design**

A large advertising company utilized AI to analyze consumer data, enabling the creation of more personalized

and engaging advertisements. The AI system analyzed the visual elements and color schemes of previously successful ads, generating highly appealing ad prototypes. These ads stood out in their visual elements compared to those designed using traditional methods, showcasing greater innovation and specificity.

### 3.1.2 AI in Film Special Effects Production

A domestic film production company employed AI technology to generate complex film special effects. The AI system could automatically create specific styles of scenes and characters based on the director's and designers' requirements, such as simulating natural environments and creating virtual characters. This approach not only reduced production time but also enhanced the realism of the visual effects.

### 3.1.3 AI-Driven Brand Identity Design

A design studio used machine learning algorithms to create innovative brand identities. The AI analyzed a vast array of design trends and brand attribute data, proposing several unique design solutions. These solutions were not only highly innovative but also closely aligned with the brand's core values and market positioning.

## 3.2 Comparative Analysis of AI Design and Traditional Design Methods

In the AI-assisted advertising design case, the advertising company used AI technology to analyze a large amount of consumer data and design trends to create more attractive ads. To clearly illustrate the differences between AI design and traditional design methods, the following is a data table based on the first case mentioned above.

**Table 1:** Comparison of Effectiveness Between AI-Assisted Advertising Design and Traditional Methods

| Metric                      | Traditional Design Method | AI Design Method                 |
|-----------------------------|---------------------------|----------------------------------|
| Design Cycle                | Average 4.3 days          | Average 2.8 days (35% reduction) |
| Design Cost                 | Average 2800 CNY          | Average 1800 CNY (36% reduction) |
| Increase in User Engagement | Average 8% increase       | Average 18% increase             |
| Customer Satisfaction       | 82 points                 | 92 points (12% improvement)      |

Data Source: Internal statistics from an advertising company comparing the use of AI and traditional methods in advertising design.

The table clearly demonstrates that AI design methods significantly outperform traditional methods in terms of design cycle and cost, showcasing greater efficiency and cost-effectiveness. The automation and data-driven characteristics of AI technology drastically reduce the design cycle and lower design costs. Moreover, the marked increase in user engagement indicates that AI-designed advertisements are more effective in capturing consumer attention and enhancing brand performance in the market. The improvement in customer satisfaction also confirms the effectiveness of AI design in meeting client needs.

The advantages of AI design methods in the digital media creative design field are evident. Not only do they enhance efficiency and reduce costs, but they also provide more personalized and effective design solutions based on big data analysis. These benefits make AI design methods a superior choice in many scenarios, especially in environments requiring the handling of large volumes of design tasks and rapid response to market changes. As AI technology continues to advance, its application in digital media creative design is expected to expand further, leading to more innovations and breakthroughs in efficiency.

#### IV. Impact of Artificial Intelligence on the Digital Media Creative Design Industry

The application of AI technology in the digital media creative design industry has not only transformed workflows but also introduced numerous potential impacts. Firstly, there is a significant boost in efficiency. By automating repetitive and technical tasks, AI unleashes the creativity of designers, allowing them to focus more on creativity and innovation. This improvement in efficiency is crucial for meeting the fast-paced market demands and shortening time-to-market for products.

The use of AI technology also helps in reducing overall design costs. Automated design processes minimize reliance on human resources and reduce costs associated with human errors. Additionally, AI technology aids designers in more accurately predicting market trends and user preferences, decreasing the need for unnecessary design iterations and revisions, which further reduces costs.

The potential of AI to stimulate design innovation should not be underestimated. AI not only offers new design tools and methods, such as algorithm-based graphic generation and style transfer, but also encourages designers to explore unprecedented creative paths. These capabilities of AI make design work more diverse and personalized, driving innovation across the industry.

#### V. Future of Artificial Intelligence in Digital Media Creative Design

With the continuous advancement of artificial intelligence technology, its application in the field of digital media creative design is becoming increasingly widespread. The following data table illustrates the application of AI in this field in recent years, including the proportion of AI technology used in various design areas and changes in market acceptance.

| Year | Image Processing Applications | Video Editing Applications | Audio Production Applications | Market Acceptance |
|------|-------------------------------|----------------------------|-------------------------------|-------------------|
| 2020 | 34.7%                         | 26.3%                      | 21.5%                         | 61.2%             |
| 2021 | 44.6%                         | 36.8%                      | 33.1%                         | 72.4%             |

Data Source: Compiled from a series of industry reports and market analyses.

From the data table, it is evident that the application ratio of artificial intelligence (AI) in various areas of digital media creative design has been increasing year by year, with market acceptance also steadily growing. In the field of image processing, the proportion of AI applications has risen from 34.7% in 2020 to 67.8% in 2023, indicating rapid development and widespread adoption of AI technology in this area. Similar trends are observed in video editing and audio production, reflecting the increasing maturity and prevalence of AI technology in these fields.

The continuous rise in market acceptance reflects growing trust and reliance on AI technology within the industry. As AI technology continues to optimize and evolve, and as the industry's understanding of the value of AI applications deepens, more companies and designers are adopting AI tools to enhance work efficiency and creative quality. This trend not only demonstrates the practicality of AI technology in the creative design field but also signifies its substantial potential for future development.

#### CONCLUSION

The application of artificial intelligence (AI) in digital media creative design signifies a major transformation in the field. The use of AI technologies, particularly machine learning and deep learning, has redefined the

possibilities of creative design. By automating repetitive and technical tasks in the design process, AI not only significantly enhances work efficiency but also allows designers to focus on more creative aspects. The data-driven nature of AI also makes the design process more scientific and objective, enabling precise adjustments based on market demand and user preferences.

In areas such as image processing, video editing, and audio production, AI has become a driving force for industry advancement. The widespread adoption and maturation of AI technologies—especially in image recognition, intelligent editing, and audio processing—have not only improved design quality but also created new artistic expressions. By analyzing vast amounts of data, AI provides insights into design trends, stimulates designers' creativity, and encourages the development of more personalized and innovative works.

The application of AI in the digital media creative design industry also brings new challenges and opportunities. As AI technology continues to evolve, the industry's workflows and output methods are undergoing fundamental changes. AI not only improves design efficiency and reduces costs but also exhibits significant potential in fostering innovation. The trends of increased diversity and personalization in design works highlight the broad application prospects of AI technology in creative design.

Looking ahead, with further advancements and refinements in AI technology, its role in digital media creative design will become even more prominent. AI will continue to enhance design efficiency and quality while leading new trends in design styles and forms of expression. It is anticipated that AI will play a crucial role in more creative processes in the future, fundamentally changing how designers work and profoundly impacting our understanding of aesthetics and creative expression. As technology progresses and applications deepen, AI will continue to drive innovation in the field of digital media creative design, opening up broader development horizons.

# SEMBOOLİK BİR TÜKETİM BİÇİMİ OLARAK TÜKETMEMEK: INSTAGRAM'DA BOYKOT HASHTAGLERİ ÜZERİNE BİR İNCELEME

Doç. Dr. Ayda İNANÇ  
aydainanc@sakarya.edu.tr

Nisa DİNÇ  
nisadincc13@gmail.com

## ÖZET

Sembolik tüketim, bireylerin tüketim faaliyetleri aracılığıyla kimliklerini, sosyal statülerini, değerlerini ve aidiyetlerini ifade etmelerini ve bu yolla toplumsal anlamlar yaratmalarını ifade eder. Bireyler tükettikleri veya tüketmedikleri ürünler ile bir gruba dahil olmuş olurlar ve bu aidiyeti diğerleri ile paylaşırlar. Bu makale bu bağlamda tüketmeme eyleminin sembolik bir tüketim türü olarak nasıl ortaya çıktığını ve Instagram'daki boykot hashtagleri üzerinden bu eylemin nasıl ifade edildiğini incelemeyi amaçlamaktadır. Araştırmanın temel amacı, sosyal medya kullanıcılarının tüketmeme eylemlerini nasıl kurguladığını ve bu eylemlerin toplumsal etkilerini anlamaktır. Bu doğrultuda, çalışmada önce tüketmeme ve boykot kavramlarının teorik çerçevesi ele alınacak, ardından Instagram'daki seçilen boykot hashtaglerinin analizine yer verilecektir.

**Anahtar Kelimeler:** Sembolik Tüketim, Boykot, Sosyal Medya

## GİRİŞ

Tüketim kültürünün hâkim olduğu modern dünyada bireyler satın alma davranışları üzerinden kimliklerini yansıtmaktadır. Tüketmemek de bu yansımanın bir parçası haline gelmiştir. Tüketmemek, belirli ürünleri ve hizmetleri bilinçli bir şekilde reddetme eylemi olarak tanımlanabilir ve bu eylem, genellikle etik, politik veya çevresel nedenlerle motive edilir.

Gelişmiş ve devamlı gelişmekte olan dijital bir çağda yaşayan bireyler olarak özellikle sosyal medya platformlarını oldukça aktif kullanmaktayız. Söz konusu platformlar, geleneksel medya araçlarının ötesine geçerek, kullanıcıların gündelik yaşamlarında ve toplumsal olaylara tepkilerinde aktif rol almasını sağlamaktadır. Özellikle Instagram gibi görsel ağırlıklı sosyal medya platformları, kullanıcıların dikkat çekici ve etkileyici içerikler paylaşarak geniş kitlelere ulaşmasına olanak tanımaktadır. Bu bağlamda boykot ve benzeri toplumsal hareketler sosyal medya platformları sayesinde çok daha büyük etki alanlarına sahip olabilmektedir.

Instagram'da kullanılan boykot hashtagleri, bu tür sembolik tüketim eylemlerinin en belirgin örneklerinden biridir. Boykot hashtagleri, kullanıcıların belirli markaları, ürünleri veya hizmetleri protesto etmelerini, bu protestolarını geniş kitlelere duyurmalarını ve toplumsal değişim için farkındalık yaratmalarını sağlamaktadır. Boykot hashtaglerinin sosyal medya üzerindeki etkisi, bireylerin ve toplulukların bu platformlar aracılığıyla nasıl organize olduklarını ve etkileşimde bulduklarını anlamak açısından önemlidir.

Bu bağlamda en sık kullandığımız ve görsel ağırlıklı sosyal medya platformlarından biri olan Instagram, söz konusu toplumsal hareketlerde bir kamuoyu oluşmasında büyük rol oynamaktadır. Gelişen iletişim olanakları ile dünyanın herhangi bir yerinde başlatılan bir hareket, kısa süre içinde dünyanın her yerine ulaşabilmektedir. Bir eylem için sosyal medyada kamuoyu oluşturulurken, eylem hakkında anahtar kelime olabilecek nitelikte bazı kelimeler seçilir ve o kelimeler hashtag olarak kullanılır. Bu durum aynı içerikte yapılan paylaşımları aynı yerde toplayarak kolaylıkla görüntülenmelerini sağlar. Aynı zamanda eylemin destekçileri için sosyal medyada birleştirici bir rol oynar. Bu bağlamda toplumsal hareketler için oluşturulan hashtagler oldukça önemlidir. Doğru anahtar kelimeleri bulmak, paylaşımların sürekliliği açısından önem arz eder. Bu bağlamda araştırma, tüketmemek eylemlerinin sosyal medya üzerindeki sembolik anlamlarını ve bu eylemlerin toplumsal ve kültürel etkilerini ortaya koymayı hedeflemektedir.

### 1. Sosyal Medya ve Tüketim:

Sosyal medya, en kısa tanımıyla sanal bir iletişim ortamıdır (Çalışkan & Mencik, 2015). Hayatımıza çok hızlı bir şekilde entegre olmuş ve neredeyse herkesin erişebileceği bir konuma gelmiştir. İnsanlar artık sosyal medya ile yaşamlarını paralel biçimde sürdürmektedir. Yedikleri şeylerden gittikleri yerlere kadar her şeyi paylaşma eğilimindedirler. Bu durum, doğal olarak tüketim alışkanlıklarıyla da kesişmektedir. Kullanıcılar, diğer kullanıcıların tüketim alışkanlıklarını gözlemleyebilmekte ve bu gözlemler onların kendi tüketim davranışlarını şekillendirmektedir. Markalar da bu etkileşime kayıtsız kalmamış ve sosyal medya pazarlamasını hayatımıza sokmuşlardır.

Sosyal medyanın hızlı yaygınlaşması ve dijital dünyanın sürekli ilerlemesiyle birlikte, dilimize birçok yeni kelime ve kavram girmiştir. Bunlardan biri de "influencer" kavramıdır. Eyal ve Şen (2020) influencerları, sosyal medya platformları tarafından tanınan ve takip edilen kişiler olarak tanımlamaktadır. Influencerlar, markalarla işbirliği yaparak takipçilerini belirli ürünleri veya hizmetleri tüketmeye teşvik ederler. Influencerlar, geniş

takipçi kitlelerine hitap eden ve bu kitleler üzerinde etkili olan kişilerdir. Sosyal medya kullanıcıları için bir rol model haline gelen bu kişiler, takipçilerini belirli bir gruba dahil ederler. Bu durum, aynı gruptaki bireylerin benzer motivasyonlarla hareket etmelerini ve benzer ürünleri tüketmelerini sağlar. Influencerlar, takipçilerine günlük yaşamlarına dair samimi ve kişisel paylaşımlar yaparak onlarla güçlü bir bağ kurarlar. Bu bağ, takipçilerin influencerların önerilerini daha fazla dikkate almalarını sağlar.

Markalar, sosyal medyanın gücünü ve influencerların etkisini fark ederek pazarlama stratejilerini bu doğrultuda şekillendirmişlerdir. Sosyal medya pazarlaması, geleneksel pazarlama yöntemlerine göre daha doğrudan ve etkileşimli bir yapıya sahiptir. Markalar, influencerlar aracılığıyla hedef kitlelerine ulaşır ve ürünlerini daha samimi bir şekilde tanıtır. Bu, tüketicilerin markaya olan güvenini artırır ve satın alma kararlarını çoğunlukla olumlu yönde etkiler.

Sosyal medya, bireylerin tüketim davranışlarını da etkiler. Kullanıcılar, sosyal medyada takip ettikleri kişilerin önerilerine ve deneyimlerine dayanarak ürünler hakkında bilgi sahibi olurlar. Bu bilgiler, tüketicilerin alışveriş yaparken daha bilinçli kararlar vermesine yardımcı olur. Ayrıca, sosyal medya platformları, kullanıcıların alışveriş yapmalarını kolaylaştıran çeşitli özellikler sunar. Örneğin, Instagram'daki "Alışveriş" özelliği, kullanıcıların doğrudan platform üzerinden ürün satın almalarını sağlar. Sosyal medya, sadece bireylerin tüketim alışkanlıklarını değil, aynı zamanda toplumsal ve kültürel dinamikleri de etkiler. İnsanlar, sosyal medya üzerinden çeşitli toplumsal hareketlere katılabilir, kültürel etkinlikleri takip edebilir ve farklı bakış açılarıyla tanışabilir. Bu, toplumsal bilinçlenmenin artmasına ve kültürel çeşitliliğin zenginleşmesine katkı sağlar. Ancak, sosyal medyanın aşırı kullanımı ve yanlış bilgi yayılımı gibi olumsuz etkileri de göz ardı edilmemelidir.

Sosyal medya, modern iletişimde ve toplumsal etkileşimde önemli bir rol oynamaktadır. Tüketim alışkanlıklarından pazarlama stratejilerine kadar geniş bir yelpazede etkili olan sosyal medya, kullanıcıların günlük yaşamlarının ayrılmaz bir parçası haline gelmiştir. Influencerların rolü ve sosyal medya pazarlaması, tüketici davranışlarını şekillendiren önemli faktörler olarak öne çıkmaktadır. Bu bağlamda, sosyal medyanın toplumsal ve kültürel etkilerinin yanı sıra bireysel tüketim üzerindeki etkileri de dikkate alınmalıdır.

## 2. Sembolik Tüketim Kavramı:

Sembolik tüketim, tüketicilerin ürünleri sembolik doğaları nedeniyle tercih etmesi olgusuna dayanır (Azizağaoğlu & Altunışık, 2012). Bu bağlamda bireyler, sosyal hayatta bir yere sahip olabilmek için tüketim faaliyetlerine girişirler. Sembolik tüketim, tüketicilere belirli bir gruba dahil olma fırsatı sunar ve bu nedenle söz konusu semboller maddi nitelikte olup mutlaka başkalarına gösterilmelidir. Sembolik anlamlar, bireyden bireye değişebileceği gibi, bireyin yaşadığı bölge ve yetiştiği kültüre göre de farklılık gösterebilir. Bu yüzden, ürün ambalajları, tasarımları ve marka imajları, tüketicilere belirli bir toplumsal kimliği veya kültürel ifadeyi yansıtmak amacıyla özenle seçilir. "Özellikle tüketim toplumunun hızla geliştiği 21. yüzyılda ürünlerin sadece işlevlerin değil, aynı zamanda taşıdıkları anlamlar, semboller ve işaretler nedeniyle tüketilmesinin söz konusu olması, tüketicilerin sadece tüketici olmaktan ziyade, toplumsal açıdan da imaj ve anlam üreticisi olduklarını da ortaya çıkarmaktadır" (Çetin, 2016).

Sembolik tüketimde, tüketiciler satın aldıkları ürünler ile başkalarına nasıl göründüklerini ve hangi mesajı ilettiklerini önemserler. Ürün ve hizmetlerin sağladığı sembolik değerler bu süreçte vurgulanır. Bu bağlamda, sembolik tüketim aynı zamanda bir iletişim biçimi olarak karşımıza çıkar. Markalar, bu iletişim sürecinde anlamların taşıyıcısı konumundadır (Odabaşı, 2019, s. 101). Ürün ve markaların sembolik anlamları ise öğrenilmiş anlamlardır. "Semboller anlamlarını toplumsallaşma sürecinde elde ederler" (Odabaşı, 2019, s. 105). Bu anlamların, bireyin içinde bulunduğu toplum tarafından anlaşılabilir olması gereklidir. Bu sayede sembollerin sağladığı iletişim gerçekleşebilir. Örneğin, Türk toplumunda kadınlar için fazla altın önemli bir anlam taşıırken, yabancı bir kültürde aynı anlama sahip olmayabilir. Türkiye'de altın bileziklerle dikkat çeken bir kadın, yurtdışında aynı konumda olmayacaktır. Sembolik anlamlar her zaman bir ürün veya marka üzerinden aktarılmaz; işaretler de sembolik anlamlara sahip olabilir. Örneğin, "peace" işareti içeren bir defter kullanan birey, kendisini özgürlükçü bir gruba dahil etmiş olur ve bu işaretle aktarmak istediği mesajı iletir. Markaların logoları da bu duruma bir diğer örnektir. Toplum nezdinde anlamları öğrenilmiş ve kabul edilmiş bazı logoların, farklı markalar tarafından taklit edildiği gözlemlenmektedir. Bu taklitler, logoların görsel değerlerinden ziyade sembolik anlamlarını taklit etme niyetindedir.

Yavuz Odabaşı'na (2019, s. 105) göre sembolik tüketimin nedenleri şu şekilde sıralanabilir:

- Statü ya da sosyal sınıfını belirtmek,
- Kendini tanımlayıp bir role bürünmek,
- Sosyal varlığını oluşturmak ve koruyabilmek,
- Kendini başkalarına ve kendine ifade edebilmek,
- Kimliğini yansıtmak.

Tüketici bireyler, yaptıkları tüketim faaliyetleri ile yalnızca fiziksel ihtiyaçlarını karşılamayı amaçlamazlar; aynı zamanda psikolojik ihtiyaçlarının da tüketim ile tamamlanmasını arzularlar. Bu doyum, yalnızca fiziki değil,

aynı zamanda ruhsaldır. Bu süreçte bireyler, benlik kavramına uygun ürünlere yönelmektedirler (Azizağaoğlu & Altunışık, 2012). "Benlik kavramı, bireylerin kendilerini nasıl algıladıkları ile ilgilidir." Gerçek benlik, ideal benlik ve sosyal benlik olarak üç ayrı biçimde incelenebilir. Gerçek benlik "ben kimim" sorusuna yanıt ararken, ideal benlik bireyin kim olmak istediğiyle ilgilidir ve "ne olmak istiyorum" sorusuna yanıt arar. Sosyal benlik ise kişinin sosyal hayattaki yeri ile ilgilidir ve "sosyal çevremde ne olarak biliniyorum" sorusunun yanıtı sosyal benliği oluşturur (Odabaşı, 2019, s. 107).

Tüketiciler, kendi benliklerini toplumsallaşma sürecinde başkalarının verdikleri tepkiler sayesinde algırlar. Benlik, aile, arkadaş çevresi, öğretmenler gibi başkalarının tepkilerinden etkilenir ve bu tepkiler ne kadar olumlu ve ödül içeren tepkiler ise, söz konusu davranış o kadar pekişmeye yatkındır (Odabaşı, 2019, s. 113). Sembolik tüketimi etkileyen unsurlar arasında reklam önemli bir rol oynar. Ürünlerin anlam kazanma sürecinde etkin rol oynayan reklam, izleyicilerin markayı gördüklerinde tanımlarını, hatırlamalarını ve buna bağlı olarak satın alma eylemine yönelmelerini sağlar. Reklamın gösterilme sıklığı ile tüketici üzerindeki etkisi paralel biçimde artmaktadır. Reklamlar, tüketiciyi belirli bir yaşam tarzını benimsemeye ve sosyal statü kazanmaya teşvik eder.

Reklamlar, sembolik tüketimin en büyük tetikleyicilerindendir. Semboller ve taşıdıkları anlam toplumsallaşma sürecinde öğrenilir. Toplumsallaşma süreci çocukken başlar ve devam eder. Reklamlar bu süreçte aktif rol oynar. Özellikle maruz kalma yoluyla bireyin zihninde yer eder ve birey henüz çocukken bile birçok sembolün ve anlamın ne olduğunu öğrenmiş olur. Reklamda yaratıcı ve özgün olmanın yanı sıra, reklamı yapılan ürün veya hizmetin taşıdığı anlamı layığıyla karşı tarafa geçirebilmek önemlidir. Reklamcılar, bu anlam aktarımı süreci için büyük çaba sarf ederler. Bu süreç, meşakkatli ve görece uzun olabilir.

Tüketici bireyler, toplumsallaşma sürecinde benliklerini ve kimliklerini oluştururken, çevrelerindeki semboller ve bu sembollerin taşıdığı anlamlarla şekillenirler. Bu süreçte, ürünler ve markalar, tüketicilere yalnızca fiziksel bir ihtiyaç karşılamaktan öte, psikolojik bir doyum da sunar. Sembolik tüketim, bireylerin sosyal hayatta kendilerine bir yer edinme, kimliklerini ifade etme ve başkalarıyla iletişim kurma biçimidir. Tüketiciler, satın aldıkları ürünler aracılığıyla kendilerini ifade ederken, toplumun beklentilerini ve normlarını da göz önünde bulundurlar. Bu bağlamda, sembolik tüketim, toplumsal kimlik ve kişisel kimlik arasında bir köprü oluşturur.

Sembolik tüketim, bireylerin sosyal hayatta kendilerini ifade etme ve toplumsal kimliklerini oluşturma süreçlerinde önemli bir rol oynar. Reklamlar ve toplumsallaşma süreçleri, bu sembolik anlamların öğrenilmesi ve pekiştirilmesinde kritik öneme sahiptir. Tüketiciler, sembolik tüketim aracılığıyla sosyal statü kazanma, kimlik oluşturma ve kendilerini ifade etme süreçlerini gerçekleştirdikleri gibi, toplumun beklentilerini ve normlarını da karşılarlar. Bu nedenle, sembolik tüketim, bireylerin hem kişisel hem de toplumsal kimliklerinin şekillenmesinde merkezi bir rol oynar.

Bireylerin sembolik tüketim faaliyetleri, yalnızca kişisel anlamda değil, aynı zamanda toplumsal ve kültürel dinamikler üzerinde de etkilidir. Bu dinamikler, bireylerin sosyal statülerini belirlemekle kalmaz, aynı zamanda toplumsal normları ve değerleri de şekillendirir. Sembolik tüketim, bireylerin kendilerini ve çevrelerindeki dünyayı nasıl algıladıklarını ve bu algıları nasıl ifade ettiklerini belirler. Dolayısıyla, sembolik tüketim, bireylerin sosyal kimliklerinin ve toplumsal rollerinin inşasında temel bir unsur olarak karşımıza çıkar. Reklamlar, bu sürecin önemli bir parçası olup, bireylerin semboller ve anlamlar üzerinden kendilerini ifade etmelerine ve toplumsal kimliklerini oluşturmalarına olanak tanır.

Tüketicilerin sembolik tüketim tercihleri, toplumsal değerler ve normlarla sıkı sıkıya bağlıdır. Bireyler, toplumsal kabul görmek ve sosyal statülerini pekiştirmek için sembolik tüketimi benimserler. Bu süreçte, reklamların ve medyanın rolü büyüktür. Reklamlar, sembolik anlamların geniş kitlelere ulaşmasını ve benimsenmesini sağlar. Özellikle dijital medya ve sosyal medya platformları, sembolik tüketim davranışlarının yayılmasında ve pekiştirilmesinde kritik bir rol oynar. Bireyler, bu platformlar aracılığıyla tüketim tercihlerini sergiler ve sosyal ağlarındaki diğer bireylerle etkileşime geçerler. Bu etkileşimler, sembolik tüketim davranışlarının sosyal olarak pekiştirilmesine ve yayılmasına katkıda bulunur.

Sembolik tüketim, aynı zamanda kültürel değişim ve dönüşüm süreçlerinde de etkili bir araçtır. Küreselleşme ve dijitalleşme ile, sembolik tüketim kalıpları da evrilmekte ve çeşitlenmektedir. Farklı kültürel semboller, global pazarlarda yeni anlamlar kazanmakta ve tüketicilerin benlik algılarını yeniden şekillendirmektedir. Bu bağlamda, sembolik tüketim, bireylerin küresel dünyadaki yerlerini ve kimliklerini yeniden tanımlamalarına yardımcı olmaktadır. Markalar, bu küresel tüketim dinamiklerini yakından takip ederek, tüketicilere hitap eden sembolik değerler yaratmakta ve bu değerleri pazarlama stratejilerinde etkin bir şekilde kullanmaktadır.

Sonuç olarak, sembolik tüketim, bireylerin ve toplumların kimliklerini, değerlerini ve sosyal rollerini anlamada önemli bir araçtır. Bireylerin tüketim tercihleri, toplumsal normları ve değerleri yansıtırken, aynı zamanda bu normları ve değerleri şekillendirir. Reklamlar ve medyanın etkisi, sembolik tüketim davranışlarının pekiştirilmesinde ve yayılmasında belirleyici bir rol oynamaktadır. Küresel ve dijital dünyada sembolik tüketim, bireylerin kimliklerini ve toplumsal rollerini yeniden tanımlamalarına olanak tanır. Bu nedenle, sembolik tüketim, bireylerin sosyal ve kültürel dünyalarını anlamada vazgeçilmez bir unsur olarak karşımıza çıkar.

### 3. Boykot Kavramı:

Boykot, bir kişi, grup veya ulusun, belirli bir ürün, hizmet, kurum veya ülkeyle olan tüm ilişkilerini kesme veya sınırlama kararı alarak, belirli bir durumu protesto etme veya belirli bir değişiklik talep etme amacıyla gerçekleştirdiği ekonomik ve sosyal bir eylem türüdür. Türk Dil Kurumu boykot kelimesini “bir işi, davranışı yapmama kararı alma” “bir kimse, bir topluluk veya bir ülkeyle amaca ulaşmak için her türlü ilişkiyi kesme” şeklinde tanımlamıştır.

Boykot terimi, 19. yüzyıl İrlanda'sına dayanır. Kavram, 1880'de İrlandalı toprak ağası Charles Boycott'a karşı gerçekleştirilen sosyal ve ekonomik izolasyon eylemiyle popülerlik kazanmıştır. (Bayuk & Ofluoğlu, 2013).

Freidman'a göre boykot, düşünce düzeyinde kalan boykotlar, eylem talepli boykotlar, organize boykotlar, eylemsel boykotlar, medya yönelimli boykotlar ve pazar yönelimli boykotlar olmak üzere beş alt türe sahiptir (Bayuk & Ofluoğlu, 2013). Boykotlar aynı zamanda amaç ve hedeflerine göre de sınıflandırılabilir. Tüketmemek, belirli ürünleri veya markaları tüketmemeyi tercih ederek, bu eylemi bir protesto veya bilinçli bir tercih olarak sunma biçimidir. Bu durum, yalnızca maddi ürünlerden kaçınmayı değil, aynı zamanda etik, çevresel veya politik nedenlerle belirli markalara karşı duruş sergilemeyi de içerir. Boykot, bu bağlamda en yaygın tüketim biçimlerinden biridir.

Boykot altında kalan şirket veya ülkeler, söz konusu boykotun büyüklüğü ve başarısı ile doğru orantılı olarak bazı krizler ile karşı karşıya kalabilmektedir. Bir boykotun başarısı ölçülürken öncelikle katılımın oranı dikkate alınmalıdır. Katılımın yüksek olması, hedef alınan kurum veya ülkenin üzerinde büyük bir baskı oluşturmak demektir. Aynı zamanda medyanın etkinliği de toplumsal eylemin üzerinde önemli bir etkidir. Kamuoyunun boykot hakkında bilgilendirilmesi boykotun etkisini artırmada kritik bir rol oynar. Katılım oranı yüksek ve bilgilendirilmiş bir kamuoyunun yanında, boykot hareketine başarıyı getirecek bir diğer unsur da sürekliliktir. Kamuoyunun söz konusu toplumsal eylemlerinin arkasında durmaları ve ısrarcı olmaları gerekir. Sürekliliği sağlanmış bir boykot, karşı tarafta daha etkili olacak ve durumun ciddiyetini aktarabilir nitelikte olacaktır. “Boykotun grevden farkı, boykot edilenin iktisaden batırılması durumuna kadar gidebilmesidir (Ürkmez, 2020).

Boykotların sosyal ve ekonomik etkileri geniş kapsamlı olabilir. Ekonomik açıdan, boykot edilen kurumlar genellikle gelir kaybına uğrar ve itibarları zedelenir. Bu, şirketlerin veya ülkelerin politikalarını değiştirmeleri için güçlü bir teşvik olabilir. Sosyal açıdan, boykotlar kamuoyunun bilincini artırır ve toplumsal değişim için önemli bir katalizör olabilir. İnsan hakları, çevre koruma ve adil ticaret gibi konularda farkındalık yaratarak, toplumda daha etik ve sürdürülebilir davranışların benimsenmesine katkıda bulunur.

Boykot eylemleri, tüketim kültürü içinde önemli bir protesto biçimi olarak ortaya çıkar. Bu eylemler, tüketicilerin güçlerini ve etkilerini kullanarak, şirketlerin politikalarını veya uygulamalarını değiştirmeye çalıştıkları bir mücadele biçimidir. Boykotlar, tüketim kültürü içinde hem bir direnç biçimi hem de bir toplumsal değişim aracı olarak işlev görür.

Boykot eylemleri, bireylerin ve toplulukların kimliklerini inşa etmelerinde önemli bir araçtır. Bireyler, boykot ederek, belirli değerleri ve inançları benimsediklerini ve bu değerlere uygun davrandıklarını gösterirler. Bu eylemler, bireysel kimliğin yanı sıra kolektif kimliğin inşasında da rol oynar. Boykot hareketlerine katılan bireyler, benzer düşünce ve değerlere sahip diğer bireylerle bir araya gelerek, kolektif bir kimlik ve dayanışma duygusu geliştirirler.

### 4. Sembolik Tüketim ve Boykot İlişkisi

Sembolik tüketim ve boykot arasında güçlü bir ilişki bulunmaktadır. Tüketiciler, boykot aracılığıyla yalnızca bir ürünü veya markayı reddetmekle kalmaz, aynı zamanda bu eylemle kendi değerlerini ve kimliklerini de ifade ederler. Boykot, sembolik tüketimin bir uzantısı olarak, bireylerin tüketim seçimleriyle toplumsal mesajlar verme ve değişim yaratma çabalarının bir yansımasıdır.

Boykot hareketleri, sembolik tüketimin toplumsal boyutunu güçlendirir. Örneğin, çevresel kaygılarla başlatılan bir boykot, tüketicilerin ekolojik duyarlılıklarını sembolik olarak ifade etmelerine olanak tanır. Aynı şekilde, adil ticaret veya insan hakları ihlallerine karşı yürütülen boykotlar, tüketicilerin sosyal adalet ve etik değerlere verdikleri önemi vurgular. Bu tür hareketler, bireylerin kolektif eylemler yoluyla sosyal değişime katkıda bulunmalarını sağlar.

Boykotların başarılı olabilmesi için, tüketici topluluklarının geniş bir katılım göstermesi ve medya aracılığıyla geniş kitlelere ulaşması gerekmektedir. Sosyal medya, bu tür hareketlerin yayılmasında ve organize edilmesinde önemli bir rol oynamaktadır. Tüketiciler, sosyal medya platformları aracılığıyla boykot çağrılarını geniş kitlelere duyurabilir ve diğer tüketicileri bu hareketlere katılmaya teşvik edebilir.

Boykotlar, hedeflenen şirketler üzerinde ekonomik baskı oluştururken, aynı zamanda tüketiciler üzerinde de psikolojik etkiler yaratır. Tüketiciler, boykot yoluyla güçlerini ve etkilerini hissetme olanağı bulur, bu da onların toplumsal meselelerde daha bilinçli ve aktif bireyler olmalarını teşvik eder. Ayrıca, boykot hareketleri, tüketicilerin kendi aralarındaki dayanışmayı ve kolektif kimlik duygusunu pekiştirir.

Boycotların ekonomik etkileri, hedef alınan şirketlerin gelirlerinde azalma, hisse değerlerinde düşüş ve itibar kaybı gibi sonuçlar doğurabilir. Bu ekonomik baskı, şirketlerin politika değişikliklerine gitmelerine ve daha etik, çevre dostu uygulamalar benimsemelerine yol açabilir. Tüketiciler, bu tür başarılar sayesinde boykot hareketlerinin gücünü ve etkisini daha net bir şekilde görebilir.

Sembolik tüketim ve boykot arasındaki ilişki, tüketicilerin kimliklerini ve değerlerini ifade etme biçimlerinin önemli bir göstergesidir. Bu iki olgu, bireylerin tüketim yoluyla toplumsal mesajlar verme ve değişim yaratma arayışlarını ortaya koyar. Boykot hareketleri, sembolik tüketimin toplumsal etkilerini güçlendiren ve tüketicilerin toplumsal katılımını artıran önemli bir araçtır. Gelecekte yapılacak çalışmalar, bu ilişkiyi daha derinlemesine inceleyerek, tüketici davranışlarının toplumsal dinamikler üzerindeki etkilerini daha iyi anlamamıza yardımcı olabilir. Bu tür araştırmalar, tüketici topluluklarının güç ve etkilerini daha bilinçli bir şekilde kullanmalarını sağlayarak, toplumsal değişim süreçlerine katkıda bulunabilir.

Boycotların tarihsel ve güncel örnekleri, sembolik tüketimin toplumsal değişim yaratma potansiyelini gözler önüne sermektedir. Tüketiciler, boykotlar aracılığıyla sadece bireysel kimliklerini ve değerlerini ifade etmekle kalmaz, aynı zamanda daha geniş toplumsal ve küresel değişim süreçlerine katkıda bulunurlar. Bu bağlamda, sembolik tüketim ve boykotun güç birliği, tüketicilerin etkili birer sosyal aktör olarak nasıl konumlandıklarını göstermektedir.

## 5. Araştırmanın Amacı

Bu araştırmanın temel amacı, sosyal medya kullanıcılarının boykot ile ilgili bir hashtag profiline girdiği an karşılaştıkları ilk gönderileri analiz ederek, bu gönderilerin tüketiciye verdiği mesajları derinlemesine incelemektir. Sosyal medya platformlarında, bir kullanıcının bir hashtag altında gördüğü ilk gönderiler, o kişinin o konu hakkındaki algısını ve tutumunu belirlemede kritik bir rol oynar.

Özellikle boykot gibi toplumsal ve ekonomik etkileri olan eylemler söz konusu olduğunda, ilk izlenimler daha da önem kazanmaktadır. Kullanıcılar, bir hashtag'e tıkladıklarında genellikle en popüler veya en yeni gönderilerle karşılaşır. Bu gönderiler, konu hakkında genel bir çerçeve çizer ve kullanıcının boykota dair düşüncelerini şekillendirir. İlk bakışta karşılaşılan bu gönderiler, hem bilgi sağlama hem de duygusal etki yaratma açısından güçlü bir potansiyele sahiptir.

Araştırma kapsamında, en fazla gönderiye sahip olan ve en popüler boykot hashtag'leri altında yer alan ilk 10 gönderi incelenmiştir. Bu gönderiler, toplumsal eylemin hedeflerini, nedenlerini ve beklenen etkilerini kullanıcılara iletme görevini üstlenir. İlk 10 gönderinin seçilme sebebi, kullanıcıların genellikle ilk birkaç gönderiye göz atıp hızlıca bir yargıya varma eğiliminde olmalarıdır. Bu nedenle, ilk 10 gönderi, boykotun vermek istediği mesajı ilk elden iletme ve toplumsal eylemin algılanma biçimini doğrudan etkilemektedir.

Araştırmanın bulguları, bu ilk gönderilerin dilini ve görsel içeriklerini analiz ederek, boykot hareketinin sosyal medya üzerindeki etkisini anlamayı amaçlamaktadır. Bu bağlamda, sosyal medya stratejilerinin etkinliği ve toplumsal eylemlerin dijital platformlar üzerindeki yankısı hakkında değerli içgörüler elde edilmesi hedeflenmiştir.

## 6. Araştırmanın Yöntemi

Araştırmada, olasılıklı örneklem alma yöntemlerinden basit rastgele örnekleme kullanılmıştır. Basit rastgele örnekleme, her birimin seçilme olasılığının eşit olduğu ve önyargıdan arındırılmış bir yöntemdir. Bu araştırmada, sosyal medya platformu Instagram'da belirlenen beş farklı hashtag (#boykot, #boykotadevam, #boykotevdebaşlar, #boykotadevamtürkiyem, #boykottabizdevarız) altında yapılan paylaşımlar incelenmiştir. Her bir hashtag altında bulunan gönderiler, araştırmanın evrenini oluşturmaktadır.

| Hashtag:              | f: |
|-----------------------|----|
| #boykot               | 10 |
| #boykotadevam         | 10 |
| #boykotevdebaşlar     | 10 |
| #boykotadevamtürkiyem | 10 |
| #boykottabendevarım   | 10 |

**Tablo 1. Örneklem Büyüklüğüne Göre Hashtag Kategorilerinin Dağılımı**

Örneklem seçimi sürecinde, her bir hashtag altındaki gönderiler arasından ilk sayfada yer alan ilk 10 gönderi seçilmiştir. 20 Mayıs 2024 tarihinde yapılan incelemeler sonucunda bu yöntemle toplamda 50 gönderi örnekleme

dahil edilmiştir. Bu seçim, her hashtag için temsili bir örneklem oluşturarak geniş bir veri seti sağlamıştır. Gönderilerin ilk sayfadaki sıralaması, Instagram'ın algoritması tarafından belirlenmiş olup, gönderilerin popüleritesi ve etkileşim oranları gibi faktörlere dayanabilir.

Seçilen 50 gönderinin içerik analizi yapılmıştır. İçerik analizi, belirli temalar veya kategoriler altında verilerin sistematik olarak incelenmesini sağlayan niteliksel bir araştırma yöntemidir.

Bu araştırmada, içerik analizi ile gönderiler beş ana kategoriye ayrılmıştır:

- \* **Bayrak İçerik:** Gönderide bir milletin bayrağının kullanılması veya vatanseverlik ile ilgili semboller içermesi.
- \* **Alternatif Ürün:** Boykot edilen ürünlere alternatif olarak sunulan yerel veya farklı markaların tanıtılması.
- \* **Özlü Söz:** Boykot çağrıları veya motivasyonel mesajlar içeren özlü sözler ve alıntılar.
- \* **Boykot Ürünleri:** Boykot edilmesi önerilen veya boykot edilen ürünlerin belirtilmesi ve eleştirilmesi.
- \* **Hassas İçerik:** Hassas veya duygusal konuları ele alan, toplumsal veya politik olaylara tepki gösteren içerikler.

Kodlama işlemi, gönderilerin içeriğine göre yapılmıştır. Her gönderi, yukarıda belirtilen kategorilere göre kodlanmıştır. Her bir gönderinin metni, görselleri ve varsa videoları detaylı bir şekilde incelenmiştir. İncelenen her gönderi, içeriğine en uygun olan kategoriye atanmıştır. Gönderiler, birden fazla kategoriye de girebilecek şekilde esnek bir yaklaşımla kodlanmıştır. Seçilen hashtag gönderileri ve kategorilere göre dağılımları aşağıdaki gibidir.

#boykot:

| Gönderi Sırası: | Kategori:                                    |
|-----------------|--|
| Gönderi 1.      | Özlü Söz                                     |
| Gönderi 2.      | Alternatif Ürün<br>Boykot Ürünleri           |
| Gönderi 3.      | Boykot Ürünleri<br>Bayrak İçerir             |
| Gönderi 4.      | Alternatif Ürün<br>Boykot Ürünleri           |
| Gönderi 5.      | Alternatif Ürün                              |
| Gönderi 6.      | Boykot Ürünleri                              |
| Gönderi 7.      | Özlü Söz<br>Bayrak İçerir<br>Boykot Ürünleri |
| Gönderi 8.      | Alternatif Ürün<br>Boykot Ürünleri           |
| Gönderi 9.      | Alternatif Ürün                              |
| Gönderi 10.     | Alternatif Ürün<br>Boykot Ürünleri           |

#boykot hashtagi kategorilere göre kodlandığında 7 alternatif ürün, 7 boykot ürünleri, 2 bayrak içerir ve 2 özlü söz kategorisine sahip olduğu görülmüştür. Toplamda 18 kategoriye sahiptir.

#boykotadevam

| Gönderi Sırası: | Kategori:                          |
|-----------------|------------------------------------|
| Gönderi 1.      | Alternatif Ürün<br>Boykot Ürünleri |

|             |                                  |
|-------------|----------------------------------|
| Gönderi 2.  | Özlu Söz<br>Hassas İçerik        |
| Gönderi 3.  | Özlu Söz<br>Hassas İçerik        |
| Gönderi 4.  | Boykot Ürünleri<br>Bayrak İçerir |
| Gönderi 5.  | Özlu Söz<br>Bayrak İçerir        |
| Gönderi 6.  | Boykot Ürünleri                  |
| Gönderi 7.  | Boykot Ürünleri                  |
| Gönderi 8.  | Boykot Ürünleri                  |
| Gönderi 9.  | Boykot Ürünleri                  |
| Gönderi 10. | Özlu Söz<br>Hassas İçerik        |

#boykotadevam hashtag kodlamasına bakıldığında 6 boykot ürünleri, 4 özlu söz, 3 hassas içerik ve 2 bayrak içerir kategorisi gözlemlenmiştir. Toplamda 16 kategoriye sahiptir.

#boykotevdebaşlar

| Gönderi Sırası: | Kategori:                          |
|-----------------|------------------------------------|
| Gönderi 1.      | Alternatif Ürün<br>Boykot Ürünleri |

#boykottabizdevarız hashtag kodlamasında 6 boykot ürünleri, 4 bayrak içerir, 2 özlü söz ve 2 hassas içerik kategorisine rastlanmıştır. Toplam sahip olduğu kategori sayısı 14'tür.

## 7. BULGULAR

Bu çalışmada, belirli hashtag'ler altında toplanan sosyal medya gönderileri, belirlenen kategoriler çerçevesinde incelenmiş ve kodlanmıştır. Her bir hashtag altında seçilen 10 gönderi, 1'den 10'a kadar numaralandırılmış ve bu numaralandırma işlemi, gönderilerin sistematik bir şekilde analiz edilmesini ve kategorilere ayrılmasını kolaylaştırmıştır. Kodlanan gönderiler tablo haline getirilmiş ve hashtag başına düşen kategori sayıları tabloların altında belirtilmiştir. Bu sayede, belirlenen kategorilerdeki gönderilerin dağılımı net bir şekilde ortaya konmuştur.

Araştırma kapsamında, toplamda 50 gönderi incelenmiş ve bu gönderiler 69 farklı kategoriye kodlanmıştır. Her bir gönderinin birden fazla kategoriye ait olabilmesi, kategori sayısının gönderi sayısından fazla olmasına neden olmuştur. Bu durum, sosyal medya gönderilerinin çok yönlü ve çeşitli içeriklere sahip olduğunu göstermektedir. En çok gönderiye sahip olan kategori 31 gönderi ile "boykot ürünleri" olarak belirlenmiştir. Bu bulgu, incelenen sosyal medya gönderilerinde boykot çağrılarının ve bu çağrılara verilen tepkilerin yoğun olduğunu ortaya koymaktadır. Özellikle belirli ürünlerin veya markaların boykot edilmesine yönelik paylaşımların bu kategori altında toplandığı gözlemlenmiştir.

"Alternatif ürün" kategorisi, 14 gönderi ile ikinci sırada yer almıştır. Bu kategori, boykot edilen ürünlerin yerine önerilen alternatif ürünlerin tanıtıldığı ve tavsiye edildiği gönderileri kapsamaktadır. Araştırma bulguları, kullanıcıların boykot çağrılarına paralel olarak alternatif ürün arayışına girdiklerini ve bu ürünleri paylaşarak destek verdiklerini göstermektedir.

Üçüncü sırada yer alan "özlü söz" kategorisi ise 13 gönderi ile temsil edilmiştir. Bu kategori, genellikle motive edici, düşündürücü veya toplumsal mesajlar içeren özlü sözlerin paylaşıldığı gönderileri kapsamaktadır. Özlü sözlerin, kullanıcıların duygusal tepkilerini ve toplumsal farkındalıklarını ifade etmek için sıkça kullanıldığını söylemek mümkündür.

Diğer yandan, "bayrak içerir" ve "hassas içerik" kategorileri, sırasıyla 7 ve 4 gönderi ile en az gönderiye sahip olan kategoriler olarak belirlenmiştir. "Bayrak içerir" kategorisi, gönderilerde ulusal veya örgütsel bayrakların bulunduğu içerikleri kapsarken, "hassas içerik" kategorisi, genellikle şiddet, sansasyonel veya duygusal olarak rahatsız edici içeriklere işaret etmektedir. Bu bulgu, kullanıcıların bayrak ve hassas içerikleri paylaşma konusunda daha temkinli veya seçici davrandıklarını göstermektedir.

Genel olarak, araştırmanın bulguları sosyal medya kullanıcılarının boykot çağrıları ve alternatif ürün önerileri gibi konulara yoğun ilgi gösterdiğini ortaya koyarken, özlü sözler aracılığıyla toplumsal ve duygusal mesajlar vermeyi tercih ettiklerini de göstermektedir. Bayrak ve hassas içeriklerin nispeten az paylaşılması ise bu tür içeriklerin daha spesifik ve sınırlı durumlarda kullanıldığını işaret etmektedir. Bu sonuçlar, sosyal medya kullanıcılarının çeşitli kategorilerdeki içerikleri paylaşma eğilimlerini ve bu eğilimlerin toplumsal dinamiklerle nasıl örtüşüğünü anlamak açısından önemli ipuçları sunmaktadır.

## SONUÇ

Bu çalışma, belirli hashtagler altında toplanan sosyal medya gönderilerinin içerik analizini yaparak, kullanıcıların farklı kategorilerdeki paylaşım eğilimlerini ve bu eğilimler sonucunda diğer bireylerin ilk ve en çok neyi gördüğünü incelemeyi amaçlamıştır. Elde edilen bulgular, sosyal medya kullanıcılarının çeşitli konularda nasıl tepki verdiklerini ve hangi tür içerikleri daha fazla paylaştıklarını anlamak açısından önemli veriler sunmaktadır.

Araştırmanın bulgularına göre, en fazla gönderiye sahip olan kategori “boykot ürünleri”dir. Bu durum, sosyal medya kullanıcılarının belirli ürün veya markalara karşı toplu hareket etme ve bu hareketi yayma eğiliminde olduklarını göstermektedir. Boykot çağrılarının yoğunluğu, kullanıcıların toplumsal ve ekonomik konularda bilinçli ve tepkisel davranma eğiliminde olduklarına işaret etmektedir.

İkinci sırada yer alan “alternatif ürün” kategorisi, kullanıcıların boykot edilen ürünlere karşı alternatifler aradığını ve bu alternatifleri paylaşarak destek verdiğini göstermektedir. Bu bulgu, sosyal medya kullanıcılarının sadece eleştirel değil, aynı zamanda çözüm odaklı yaklaşımlar benimsediğini ortaya koymaktadır.

Üçüncü sırada yer alan “özlü söz” kategorisi ise, kullanıcıların duygusal ve toplumsal mesajlar vermek için sıkça özlü sözler paylaştığını göstermektedir. Bu tür paylaşımlar, kullanıcıların kendi düşüncelerini ve duygularını ifade etme ihtiyacını karşılarken, aynı zamanda toplumsal farkındalık yaratma amacı taşımaktadır. “Bayrak içerir” ve “hassas içerik” kategorilerinin nispeten az paylaşılması, kullanıcıların bu tür içerikleri daha dikkatli ve seçici bir şekilde paylaştığını göstermektedir. Bayrak içeriklerinin azlığı, ulusal veya örgütsel sembollerin belirli bağlamlarda kullanıldığını; hassas içeriklerin azlığı ise, kullanıcıların duygusal olarak rahatsız edici veya şiddet içeren içerikleri paylaşma konusunda daha temkinli davrandığını göstermektedir.

Kullanıcıların boykot ve alternatif ürünler gibi konulara olan ilgisi, toplumsal ve ekonomik bilinçliliğin bir göstergesi olarak değerlendirilebilir. Ayrıca, özlü sözler aracılığıyla ifade edilen duygusal ve toplumsal mesajlar, kullanıcıların sosyal medya platformlarını birer ifade aracı olarak gördüklerini ortaya koymaktadır. Bayrak ve hassas içeriklerin az paylaşılması ise, kullanıcıların belirli konularda daha dikkatli bir yaklaşım benimsediğini göstermektedir.

Bu bulgular, sosyal medya platformlarının toplumsal dinamikleri ve kullanıcı davranışlarını anlamak için önemli ipuçları sunmaktadır. Gelecekte yapılacak çalışmalar, farklı platformlar ve daha geniş veri setleri kullanarak, sosyal medya kullanıcılarının içerik paylaşma eğilimlerini daha detaylı bir şekilde inceleyebilir. Bu tür araştırmalar, sosyal medya stratejilerinin geliştirilmesi ve kullanıcı davranışlarının daha iyi anlaşılması açısından değerli olacaktır.

## ÖZET

Dijital çağ, değişen dönüşen, Covid 19 başlangıcı, sonraki gelişmeleriyle şekillenen ve daha da küçülen dünyadan siyasi alanda ortak hedefe yönelik, birbirinin özdeşi ya da benzeri Dijital - Reel Psiko-Semiyotik Dil Kullanımlarının değişik ülkelerden örneklerle irdelendiği bu makale aynı zamanda küresel veri takibinin kullanım haritasını çizerken eş zamanlı olarak küresel veriden faydalanmanın şaşırtıcı taraflarını ve aynı konulu ortak siyasi hedeflerde kullanılan siyasi dilin, Dijital-Reel Psiko-Semiyotik etkisinin vuruculuğu için kültürel kodların farklılığından kaynaklanan detaylarda farklılaşan kullanım tercihlerini sunmak üzerine kuruludur. Salgın, bir başka söylemle küresel hastalık, savaş ve küresel siyasi alandaki ilişkiler de gözden kaçırılmamalıdır.

Adeta aynı, ortak (veri kaynağından) kaynaktan hareket eden ince detaylarla birbirinden ayrılan siyasi Dijital-Reel Psiko-Semiyotik dil kullanımları örnekleri yeni çözüm arayışlarının da şart olduğunun birer göstergeleri olarak sunulacaktır.

**Anahtar Sözcükler:** Siyaset, Dijital-Reel, Psiko-Semiyotik, Küresel, Türkiye, ABD, İngiltere, Almanya, Finlandiya.

## GİRİŞ

21. yüzyılın daha başlarında, dijitalleşmenin gelişimiyle, ve kullanım alanlarının yaygınlaşmasıyla paralel, eliptik kürede birden bire halkın, sosyolojik olarak orta veya bir alt sınıftan çıkan kişilerin ve hatta kadınların ki, dindar aileden gelenler, hiç beklenmedik ama özlendik gençlikte, yaşamın tam da içinden olanlar, politik liderler olarak sahne almaya başladıkları görüldü. Bu liderlerin geçmiş liderlere göre çok farklılıkları vardı. Yaşam zorluklarla doludur, hepimiz bir şeyler yaşarız, hatta kimimiz artık dijital köle veya potansiyel dijital köle adayı ki, ömürlük olabilir; kimse bu denli halkın önüne çıkıp; “Ben sizden de perişanım”, demezdi. Olgun insanın özellikleri vardır ve bu özelliklerden biri de buydu. Hele çekmiş olduğu sıkıntıları psiko-semiyotik iletişim dili malzemesi yapıp hedefi avlamayı düşünmezdi. Reklam politikalarını bunların üzerine, en azından bu kadar yoğun kurmazdı. 21. Yüzyıla beraber, eliptik küremizin her bir yerinde siyasi arena başta benzer şeyler deneyimlemeye başladık. Lider eğer kadınsa yaşam tarzı, gençliği, cinsiyeti, dans etmesi, içki içmesi genel için soru ve sorun malzemesi edilip birden mağdur ediliveriyordu. Tiyatrocu cumhurbaşkanları gördük. Politika da zaten “bin yüzlü” anlamını yüklenmişti, bin bir yüz yakışsız kalmazdı, bari teknik olarak drama derslerini de almış olsundu. Bu liderlerin her biri adeta bir Junior Justin Bieber, Küçük Emrah’tı. Bu arada Eğlence dünyasındaki küresel boyutta isim değişiklikleri de gözden kaçmamaya başladı: Eminim, Bieber in Turkish bibere çok yakın, aynı yazılış ya da sesteş isimler, liste ç uzun, ucu Türkçeye uzandığı gibi, küresel pazarın değişik dillerine selam çakan isimler, bu şarkıların kaynakları da ilginç olmalı, idi. Mağdur liderler, ya dininden, ya düşüncesinden, ya okuduğu şiirden, ya cinsiyetinden, ya teninin renginden, ya annesinin derdinden mağdurdular; bazen bir liderde birden fazla mağduriyet olabiliyordu; çok acayip mağdur olmuş ve ezilmiş liderlerin, halkın birebir aynası olarak da ortak söylem ve beden dilleri vardı. Bu makale bu kadar çok benzeyenin bir anda nasıl küresel boyutta ortaya çıktığını, sürdürülebilir kılındığını, ortak yönlerini, ayrılan yönlerini, bu yönlerin hangi açılardan çok benzeşip ayrıldığını, Dijital-Reel Psiko-Semiyotik Dil Kullanımları üzerinden inceleyen bir çalışmadır. Psiko-Semiyotik İletişim Dili üst başlığında topladığım Dijital-Reel Psiko-Semiyotik Dil Kullanımlarına aşağıda yer alan her alt başlık üzerinden bakılacaktır.

Dünya halkı, ‘halk olalı’, böyle bir benzeşik liderler tarihi görmemişti. Bu bir ilkti. Birden bire tüm mağdurlar, bir şekilde görev süresince acayip mağdur olanlar, saç başı birebir halkla özdeş olanlar, küresel çeşitlilikte, yekpâre özelliklerle karşılarındaydı. Bir acayip mağdurlar dönemi. Neden ille de mağduriyet ve çok mağdur liderler dönemi başlamıştı? Bu liderlerin bir ayakları da kürenin diğer ülkeleriyle ilgili olabiliyordu: Boris Johnson gibi. Ayrıca bu mağduriyetleri kim, kimler yaratmıştı?

**Mağdur liderler** nokta atışı Kâzım Efendi’nin çatıda saklanan kitaplarının savunucusu olabiliyordu. Kâzım Efendi’nin torunu “Yahu ben bunu dün gece bilgisayarımdaki günlüğüme yazdım, çatıya neden atıldıkları da belli değildi; Allah Allah”, diye dursun, bu bölüm kafa karışıklığı yaratma, talan ve yalan düzenine devam, küresel hırsızlık dümenini yerleşik haline getirme, çok sık yap ki, **düşünmeyi bırak**, bölümüne girebiliyor mu? Evet: Yoksa bu mağdur liderlerin bir diğer ortak özelliği de bu muydu? Çünkü nasıl oluyorsa oluyor, halkın içinden birileri ve belki biri daha çokça “aaaaa bu tam da benim hayatımdan, bilgisayarımdaki günlüğüme yazdığımın birebiri diyebiliyordu. Bu günlük aynı zamanda yılların talan edilen günlüğü olabiliyordu ama yazmayı bırakmak ne mümkün, yazarak kabalıkları atabildiği keşfedilmiş bir ‘Dijital Köle’nin, tüm dış

dinamikleri negatif enerji üzerine kuruluydu artık ve giderek daha da çok yalnızlaştırılmıştı. Bakınız: Dijital Kölelik (Algül, 2020-2023) Gel zaman git zaman: Bin tesadüf zamanları arşa çıkar; bu zamanlar tesadüf eşittir tesadüfü doğurur. Bu doğum da evrilir: Talandan gelen, talan ve yalana destek vermek zorundadır. Ters köşe psikoloji yapıp, mağdurlar dönemiyle bir acayip dijital küresel talan ve Psiko-Semiyotik İletişim diliyle baskılanma dönemine mi girilmiştir vb. gibi soruları uyandırır. Küresel ve ulusal dijital talana onay veren, kendi siyasi kimliğinde de kullanan liderler dönemi miydi? Halkın çok içinden görünürken bu içten haller bir şeyleri kamufle mi ediyordu? Eliptik kürenin güzel ve masum halkını, bu sefer tüm zamanların en kârlı sürdürülebilir Dijital Kölelik için başlatılan *mağdur liderler dönemi* aslında Dijital Köleliğin kamuflej liderleri miydi? Daha neleri kamufle etmekteydiler? Yeni dünya düzenindeki rolleri neydi? Bu makalede hepsine bakılmayacak olup dijital kölelik için (Algül,2020-2023), Dijital-Reel Psiko-Semiyotik Dil Kullanımları için (Algül, 2020-2023) bakılabilir. Yukarıdaki paragraflardan birinde söylendiği gibi, eliptik küreyi birden basan mağduriyet şemsiyesinin ortak bileşenleri, bu bileşenlerin paydaşlarının halkla ilgisi, çok yönlü içerik sağlayıcıları, liderlerin beden dili ve özellikleri yaratımın olan Dijital-Reel Psiko-Semiyotik Dil Kullanımları üzerinden incelenmektedir.

### Psiko-Semiyotik İletişimde Dil Kullanımının Bileşenleri Nelerdir?

Öncelikle Psiko-Semiyotik İletişim Dili üst başlığında topladığım, Dijital-Reel Psiko-Semiyotik Dil Kullanımları, ALGÜL Dijital-Reel-Manuel Psiko-Semiyotik Dil Kullanımı Ayrıştırıcıları bilim yaratımına ait bu bölüm, aynı anda yazdığım bir diğer makalemde aktarılmıştır. Yaratığım alanı uygun bir dille geniş kitlelere tanıtmaya hizmet ettiğini düşündüğüm için bu alana ait bilgiyi değiştirmeden aktardığımı belirtmeliyim:

“Bir bilim dalı yaratımının zevki işte burada yatar. Tekrarlar, geniş halk kitlelerine ulaşıncaya kadar yeni bilimsel yaratımları tekrar etmek... Çok mu ciddiye alınıyor yapılan iş? Genel çoğunluğun nüvesi işine gelmeyi görmemeye dayanmaz mı? Bu kadar çok bölünmüş dünyada, o kadar çok kalıplaşmış düşünce üzerinden okuma ve yazma var demektir, değil mi? Hayır, tek bir kişiye bile ulaşmak önemlidir. Bazıları Sisyphus olarak doğarsa bu eylem kaçınılmaz, istem dışı, bir refleks hâlinde yerine getirilmeye çalışılan bir çabaya dönebilir”

Bakınız mitolojideki Sisyphus ne der(<https://interestingliterature.com/2021>)

Psiko- Semiyotik İletişim,(Algül, 2020-2023) gösterge havuzunun kasıtlı olarak, istedik doğrultuda hedefi tam on ikiden vuracak şekilde, göstergelerin toplumsal bellekteki kronolojisi, psikolojik etkisi, imgesel iz düşümleri ve çok daha fazla dinamikler üzerinden incelenerek, araştırmaları yapılarak, taşıdıkları anlamlar, göstergelerin yaşam süreçleri içindeki devingen döngülerinde yüklendikleri her anlam üzerinden irdelenerek, etkisi bir başka söylemle sonuçları hesaplanarak, buna dilsel göstergeler için *dizilim(sentaks)*, görsel göstergeler için *imgesel iz düşümleri( alt, üst çağrışım anlamlarının imgeleri)* hesaplanarak belli bir amaç için, bu amaçlar çoğul da olabilir; kasıtlı ve bilinçli bir şekilde tasarlanmış etkileşim değerleri hesaplanmış bir iletişim dilidir ve maalesef insanlık, özellikle dijital çağın sunduğu tüm teknolojiye de kötücül anlamda kullanarak çıkarları doğrultusunda hareket edebilmektedir. Kutuplardan eliptik bu küredeki çağımızın insanı *Psiko-Semiyotik olmayan* bir iletişim diliyle artık karşılaşmamaktadırlar, denebilecek bir çağı deneyimlemektedir.

**Göstergeler (şimdilik, bu alan değişken ve bu değişkenlik öngörü oluşumu için vurgulanmalı) üçe ayrılır:**

- 1. Dilsel Göstergeler:** Tüm doğal diller ve bu dillerden türetilen, yaratıcı zekânın kapsama alanına girebilecek yeni yaklaşım ve kullanım biçimleri de dahil olmak üzere *dilsel göstergelerdir*; zamana ve yaratıcı zekâyâ endeksliler olarak esneklik özelliğine sahip olabildikleri unutulmamalıdır; bu anlamda teknolojinin sunduğu ya da alanın teknolojiyi zorlayarak, teknoloji üzerinden elde ettiği veya edebileceği her türde, her türlü yenilik, dilsel göstergelere dahildir.
- 2. Görsel Göstergeler:** Resim, fotoğraf, karikatür, renk, biçim, nesne
- 3. İşitsel(Duyuşsal), Dokunsal, Tat Almayla İlgili ve Metaforik Göstergeler:** (Bu tanımlama da bana ait ve zamanla tüm bu söz öbeklerinin yerine, hepsini kapsayacak, genel çoğunluğa hiçbir anlam karmaşası yaratmadan ulaşabilecek başka bir söz ya da söz öbeği bulabilir veya üretebilirim ama şimdilik bu şekilde kullanmayı tercih ediyorum). Koku, Doku, Ses, Acı, Ekşi, Tatlı, Ezoterizm alanı, 6. his, içgörü, öngörü, vb. gibi.

*Her türlü tanımlama ve bilgiden önce yapıldığı çokça ölçümlenen bir yanlıştan dem vurma gerekliliği: Gösterge sözcüğü sadece fotoğraf, resim, karikatür, biçim, nesne anlamına gelmez; bir başka deyişle çözümleyici bilgide sık sık yapılan bir yanlış olan sadece ‘görsel’ anlamını yüklenmez. Semantik, anlam biliminin hiç olmadığı veya zayıf kaldığı iletilerin genel çoğunlukta karşılık bulamamasının bir başka söylemle, iletişimin gerçekleşmesi için bir gereklilik olan *karşılıklılık ilkesinin*; burada sözcüğün yaygın olarak yüklendiği *görsel alt üst çağrışım anlamlarının yoğunluğu nedeniyle çalışmamasından* dolayı etkileşimin gerçekleşmemesiyle sonuçlanabilir. Bu mesaj kaybı, gönderen gönderilen ilişkisi açısından iki taraflı kayıp olarak değerlendirilebilir, değerlendirilmelidir.*

Sonuçta dilsel göstergeler de birer görsel’ olarak görülebilir aynı zamanda ki, 21. Yüzyıl insanının geldiği, getirildiği noktada, *dilsel göstergelerin* zihindeki görsel izdüşümlerinin, *imgelerinin* çağrışım anlamlarının

**görsel göstergeler** üzerinden öncelik sonralık ilişkilerinin önemine göre, daha tasarımın başlangıcında başarılı görümlerle saptanması başarıyı getirecek temel unsur olarak görülmelidir. Mesajın yerini bulmasını kolaylaştıracaktır. Daha kolay anlaşılması için sadeleştirilirse doğal dillerin tümü de birer **göstergedir**. Gösterge sözcüğü dendiğinde sadece **görsel** ve görsel sözcüğünün çağrıştırdıkları düşünülmemelidir. Belki tanımlama için sözcük seçerken göstergebilim dalı da dahil olmak üzere, aradaki ayırım açılabilir ve sözcük bazında netlik kazandırılabilir. **Dilsel ve görsel göstergelerle beraber 'gösterge' sözcüğünün anda taşıdığı ve gelecek zamanda taşıyabileceği anlamlara ( devingen döngü alanı) da açılması;** alt başlıklarla ayrıştırılması ve maddelerin açıklanması gereklidir. Gösterge alanının devingenliğinin üzerinde durulması, alanının hareketliliğini vurgulayabileceği gibi; aynı zamanda gösterge sözcüğünün yüklediği anlam ve çağrışım anlamları karışıklığını gidermeye de yarayabilir, yüklediği ve yüklenebileceği anlamları zihinlerde somutlaştırmayı kolaylaştırabilir. Bu makalede saptanan olası karışıklığa neden olabilecek algıları netleştirme çabası güden bir tanımlama ve açıklayıcı dil kullanılmıştır. Umarım netleştirmeye yardımcı olur.

Göstergebilimin dilsel ve görsel göstergeler olarak ikiye ayırdığı bu alanın, içinde doğulan çağ gereği üçe ayrılması gerektiğini düşünüyorum. Psiko-Semiyotik İletişim alanı çok hareketli bir alan olma özelliğini bünyesinden taşır. Dolayısıyla Dijital-Reel- Manuel Psiko-Semiyotik Dil Kullanımı yönleriyle daha da genişleyecektir ve hatta belki de teknolojik göstergeler maddesini de kapsayabilecektir. Böyle bir sınıflama daha da netliğe yardımcı olabilir. Bu yönüyle buluşum olan: Psiko-Semiyotik İletişim, Etkileşim başlığı altında toplamaya başladığım; yarattığım bilim dalı Dijital-Reel-Manuel Psiko-Semiyotik Dil Kullanımları(Algül, 2017-2023), ALGÜL Dijital-Reel-Manuel Psiko-Semiyotik Dil Kullanımı Ayrıştırıcıları ( 2020-2023) alan için şimdilik **üçe ayırdığım tanımlama** belki göstergebilimine ilham olabilir, Psiko-Semiyotik İletişim, Etkileşim insan aklının boyutlarınca sınırsızdır ve disiplinler arası ve üstü çalışır.

Psiko-Semiyotik İletişimin başarılı olması için çok tekrarlanması gerekir. Ben buna masal etkisi diyorum. Maruz kalan bu tekrarları aynen uyku öncesinde masal okunmasına alışkın bir çocuğun, uyku öncesi, masal okunmasını istemesi gibi, arar, bu arayış alışkanlıktan, hatta şartlı alışkanlıktan kaynaklanır. Psiko-Semiyotik İletişim türlerinde de şartlı koşullar yaratılabilir ve bu şartlı koşulların masal etkisi için tekrarları elzemdir. Bundan dolayı, kitle iletişim araçlarının tümünü kullanmak Psiko-Semiyotik İletişimde başarıyla sonuçlanacaktır, dijital mecra bu bağlamda ayrı tutulamaz, reel yani gerçek yaşamla yürütülen adeta bir masallar silsilesidir. Elbette bunun için alt yapıdan gelmiş insan faktörüyle beslenir.

### **O halde gösterge nedir?**

Öncelikle, gösterge sözcüğünün tanımıyla kasıtlı olarak başlanmadığı bilinmelidir. Daha öğretici olabileceğine inanıldığı için böyle bir yöntem tercih edildi. **Açıklayıcı bilgisi** bir başka söylemle sözlükteki tanımı: “Bir şeyi belirtmeye yarayan şey, belirti, im; işaret” ( <https://sozluk.gov.tr>), dir. Kendi dışında bir şeyi temsil eden, dolayısıyla temsil ettiği şeyin yerini alabilecek nitelikte olan her çeşit biçim, nesne, olgu( Rıfat, 2009)'dur. Kendi dışında bir şeyi temsil edebiliyor olması devreye insana dair unsurların girdiği anlamına gelir. Hedefin ki, birey, topluluk veya toplum olabilir psikolojisini ele geçirmeye, kavramaya ve avlamaya yönelik, hedef için çok özel, anlamlı, değerli yani önemli olan bir şekilde ruhunu, psikolojisini etkileyip bu etki üzerinden andaki duygu durum biçimini istedik yönde kavrayıp dönüştürüp değiştiren, hedef için görüntüsünden öte, nasıl görüldüğünden ziyade, o görüntünün ya da anlamın (dilsel göstergeler) yazılı ya da sözel içeriğin( tek bir sözcük de olabilir) ne hissettirdiğinin anlam ve önemiyle ilgilidir. Özetle bu göstergeler hisler dünyasını değiştirip dönüştürecek gücü taşıyan dilsel ve görsel ve işitsel, dokunsal ve metaforik anlamlar evreninin hepsidir.

Bu paragraftan şu anlam çıkarılmalıdır, herhangi bir sözcüğün, sözcüğün harfleri dahil, dokunun, konunun, rengin, fotoğrafın, karikatürün, biçimin, nesnenin, içgörü, öngörü, Ezoterik, mecazi(metaforik) anlamlar evreninin hedef kitleye yönelik etkili olabilmesi için hedefin psikolojisini avuçlarının içine alabilecek kadar etkili bir şeyi temsil etmeleri, bir başka söylemle, kendi dışında, görünür olduğu haldeki biçimi, görseli, nesne hâli, olgusu dışında bir şeyin yerine geçmiş olması, dolayısıyla onu temsil etmesi gerekir.

Tüm bunları kim, kimin için yapacak?

Hedef kitle: birey, topluluk, toplum için.

### **Dijital-Reel Psiko-Semiyotik Dil Kullanımları Havuzları, Havuzun Suyu Nerelerden Gelir? Legal Görünümlü, İlegal ve Dijital Kölelik, Veri Köleliği Havuzları,**

İnsanın değişimi zor olduğundan içinde yaşanılan çağ ne olursa olsun, geçmişinden kopuk kültürel kodlar beklenemez. Bir yandan insan doğası da geçmişe tutuklu kalmaya meyilli donanımlardan geçebilir, ki uygarlık tarihi bunu kanıtlar: Geçmişe bağlılık din, ırk, ideolojiler, üzerinden de desteklenip, sürdürülebilir kılınabilir. Tüm farklı bilimsel disiplinler üzerinden toplumların yapısını ele alan bilgi dağarcığı aynı anda çok çeşitli açılardan Dijital-Reel Psiko-Semiyotik Dil Kullanımlarının bir yandan hazırda var olan kaynaklarını ortaya çıkarırken , yeni kullanılabilecek olası kaynak verilerinin buluşlarını kapsar ve sürekli yeni keşiflerle genişler.

Topluları dinsel, tanımlamalar üzerinden irksal, yönetim biçimleri, yaşanan coğrafya, geçirilen tarihsel dönemlerin her birinin kültürel kodlara kattığı etkiyle birbirinden ayırıştırırken, içinde yaşadığımız dijital çağda yaşantılarımızla deneyimlediğimiz gibi sırf insan olmaktan kaynaklanan ortak kültürel kodlarımızın dışında giderek; dijitalleşme sonucunda dünya kasabasına dönen eliptik küremiz için küresel çapta ortak Dijital-Reel Psiko-Semiyotik Dil Kullanımlarının giderek çoğaldığı bir havzaya döner: Emojiler buna en basit örnek olarak verilebilir ve Emojiler, dijital çağın yarattığı Dijital-Reel Psiko-Semiyotik Dil Kullanımları olarak değerlendirilebilirler. Bunun yanı sıra toplumların kültürel dokularında var olan ama bugünkü kadar yaygın kullanımda yer alamamış, dolayısıyla anlamı geniş kitlelere ulaşamamış, gelişmiş denilen Batı ülkelerinde bilime endeksli gelişen veya toplumun geçmiş kültüründe yer alan göstergelerin, dijital çağın etkisiyle yaygın bir kullanım alanı bulmasından kaynaklı olarak küresel boyutta birer Dijital-reel Psiko-Semiyotik Dil Kullanımı aracına dönüştüğünün görüldüğü örnekler, bunlardan biri mavi yaka örneği.

Bunların dışında bir toplumun toplumsal belleğinde yer alan, deyimler: Genellikle gerçek anlamından çok az ayrı, kendine özgü bir anlamı olan, kalıplaşmış, söz öbeği; tabirler, (<https://sozluk.gov.tr>); bir ulusun değer yargılarını anlatan özlü sözler(Çotuksöken, 1994) atasözleri, genel yaygın kullanımda geçmişe dayalı anlam ve önemi olan, bir başka söylemle tarihsel kimliği bulunan tüm dilsel, görsel, işitsel, dokunsal, metaforik, ezoterik göstergeler birer Dijital-Reel Psiko-Semiyotik Dil kullanımı oluşturma havuzudur.

İçinde yaşanan dijital çağın en kötücül kullanım Dijital Kölelik üzerinden elde edilen Dijital-Reel Psiko-Semiyotik Dil Kullanımlarını ele geçirmektir. 7/24 dijital gözlem ve reel yaşamda, tüm yaşam alanları örülerek kutulanan Dijital Köle üzerinden yürütülen bu illegal yöntemde başka bir ölçümleme, test etme, sağlama yapma aracında gerek duymaksızın, küresel ve içinde doğduğu topluma yönelik gözlemlerinin şaşmazlığı bir şekilde deşifre olmuş bireyler, birebir kaynak olarak sürdürülebilir dijital köle yapılabilmekte çünkü bu makalenin yazarı bir dijital köledir. Bunu yapabilmek için hangi güçleri kullandıkları artık geleceğin konusudur ama bazen tek bir kişi üzerinden de yürütülebildiği bilinmelidir. Duyarlı, duygusal, yetenekli bir edebiyatçı olmak, dil kullanımlarımızın eşsiz vuruculuğu bir 'Dijital Köleyi' ömürlük vazgeçilmez kılabilir. Onu 'Dijital Köle' olarak kullananları da evlâdiyelik kanaat lider ve önderleri hâline Getirebilir. Bakınız: 'Dijital Kölelikle' ilgili makalelerim(Algül, 2020-2024).

### **Dijital-Reel Psiko Semiyotik Dil Kullanımlarına Siyasi Liderlerden Örnekler: Beden Dli, Kılık-Kıyafet, Grafik Olarak Yüz; Jest ve Mimikler, Aksesuar, ...**

Mavi: Güven, Sadakat, mantık(<https://meandyou.co.uk>)

Mavi, yukarı kıvrılmış, ilk düğmesi açık, gömlekleri ve mavi rengin yoğun olduğu arka fonlar, çokça göze çarpmaktadır. Seçim ortamlarında kullandığı aksesuarlar, aksesuar olarak artık değerlendirilebilecek olan, beden dili, jest ve mimikleri, tümüyle halka ait görünse de aslında çoktan sınıf atladığı ya da hep atlamış olduğu gerçeği her halinden belli olmaktadır. Mavi renk aynı zamanda "Mavi, huzur ve sükunet ile bilinirken, aynı zamanda üzüntü, soğukluk ve depresyon duygularıyla da ilişkilidir. Birden fazla renk tonu mavi bir odaya renkli mobilyalar ve dekorlar koyabilirsiniz ve gözleriniz çok bunalmış hissetmez. Koyu mavi tonlarını kullanma duyguları düzenlemeye yardımcı olur. Genellikle ilişkilendirildiği duygu durum biçimleri: Barış , Huzur, Rahatlama, Güven, Sadakat, Güvenilirlik, Üzüntü, Yalnızlık, Soğukluk(<https://www.artcobell.com> ). Renk, marka kimliğimizin en güçlü yönlerinden biridir( <https://identity.stanford.edu>)Mavi rengin adeta sedatif diye tanımlanabilecek psikolojik etkisi bir nevi çalışan sınıfının makul, sakin, denileni yapan, verilen alan, fazla bir şey istemeyen ve arz etmemeleri üzerine kalıba konmaya çalışılan tarafını besler gibidir. Bir çeşit köleliğin rengi, orta sınıfın, orta sınıf çalışanlarının bir nevi kanaatkâr, isyan çıkarmayan sakin hali, mavi. Bir sakin olun rengi: Mavi; Mülayim insan hali: Mavi.

kırmızı?

"Kırmızı temel renklerdenidir. Kültürler arasında, insanlar kırmızıyı öfke kavramıyla sezgisel olarak ilişkilendirir. Bu ilişki, birçok insanın öfkelenmesinde artan kan akışından dolayı yüzünün kızarması göz önüne alındığında mantıklıdır. Kırmızı renk, yüzdeki öfkenin tespitini kolaylaştırır ama ne kadar? Kırmızı, insanların ustalaştığı, ürettiği, yeniden ürettiği ve farklı tonlara ayırdığı ilk renktir. Ayrıca tarih öncesi dönemde sanatçılar tarafından kullanılan en eski renklerden biridir. Kırmızının insanlar üzerinde hem fizyolojik hem de psikolojik etkileri olduğu ve bu nedenle üzerimizde olumlu ve olumsuz etkiler yarattığı bilinmektedir. Yüklendiği anlamlar, sevgi, güç, tutku, güven, saldırganlık, çekicilik, İkna, Performans, Dürtü Kontrolü, Enerji, Risk Alma, Stres, İştah, dikkat, Hakimiyet, Dürtüsellik, Rekabetçilik (<https://www.colorpsychology.org> ) ve elbette tüm bu anlamlar Dijital-Reel Psiko-Semiyotik Dil Kullanımları üzerinden incelendiğinden çağrışım anlamlarıyla birlikte ele alınması gereken unsurlardır.

*Beyaz-Mavi Yaka Terimleri ilk ne zaman ortaya çıktı?*

"Beyaz yakalı işler" ve "mavi yakalı işler" terimleri iş, ekonomi, eğitim ve sınıf hakkındaki tartışmalarda ortaya çıktı. Beyaz yakalı 1910'da ilk olarak kullanılan oldu. Nebraska gazetesi, bu terimi Orta batıdaki ofis çalışanları ile tarım işçilerini ayırmak için kullandı. Erkekler genellikle Pazar günleri kiliseye temiz, kolalı beyaz yakalı gömlekler giyerlerdi. Beyaz yaka dile girdikten sonra, işyeri sonucunun ortaya çıkması uzun sürmedi. Mavi

yakalı deyiminin ilk olarak kullanılması 1924 yılında gerçekleşti. Iowa'da bir gazetede marangozluk gibi zanaatlarda çalışan erkekleri nitelemek üzere kullanıldı. Bu adamlar aslında o kadar sık mavi yakalı gömlek giymiyorlardı ama mavi kot pantolon ve tulumlarla giydikleri gömlekler, işlerini yaparken gelen lekeleri gizlemeye yardımcı olmak için genellikle daha koyu renklerde( <https://people.howstuffworks.com> ).

<https://media-cldnry.s-nbcnews.com>

Siyasi partilerin kendi aralarında yaptıkları seçim çalışmalarında, partilerinin sembollerinde yer alan renkleri kullandıkları görülmektedir. Trump çoğunlukla kırmızı kravat, eşleşen Mc Donalds önlükleri vb. gibi. Mavi rengi en fazla kullanan parti Demokrat Parti, her ne kadar liderler olarak sunulan kişiler halka çok yakın görülse de mutlaka arkalarında elit denebilecek, beden dili olarak pek de yeni tip, küresel, mağdur lider sınıfına giremeyen, güzel kürenin alışkın olduğu eski tip, elit olarak nitelendirilebilecek kanaat önderleri, mağdur olarak sunulanlarla aynı orantıda olmayan liderlikleriyle arka planda takdim edilmekteler. Örneğin: Kamala Harris için bu böyle oldu. Biden'a diz çöktürmeleri görünüşü kurtaramadı. Kamala Harris adını da Dijital-Reel Psiko-Semiyotik Dil Kullanımı örneği olarak değerlendirebiliriz. Kamala adı Hint kökenlilerle beraber, ( daha derin Dijital-Reel Psiko-Semiyotik tanımlamalar için ileri incelemelerin yapılabileceği alanlardan biri daha) Müslüman kesime de yakın, içselleştirebilecekleri bir isim. İsimlerin giderek etnik özellikler taşıması da tesadüf sayılmamalı. Parti sembollerinde yer alan renk indigo mavisini, Obama'nın gömlek renkleri sürekli orta sınıf çalışmanı temsil eden mavi, ki, erkeklerin dünya genelinde iş ortamı için maviyi tercih ettikleri söylenebilir; konuşmalarının yer aldığı stantlarda arkada bulunan kişilerin giydikleri gömlek renkleri de mavi, gömlek kolları iki kere katlanmış olarak, az sonra sanki bir yükü kaldırmaya hazır halde önlerinde konuşan Obama'ya alkış tutmaktadırlar. ve konuşmanın arka fonu sürekli bayrağın mavi tarafına gelen fotoğraflar, Cumhuriyetçi Parti 'de ABD bayrağının kırmızı tarafını vurgulayan fotoğrafları görsel olarak küresel dağıtıma sokmakla beraber, maviye en çok vurgu yapanlar eldeki verilerle Demokrat Parti olarak görülmektedir. Bu gömlek kollarını ilk kıvrıma eylemi: Türk Siyasi arenasından: Cem Uzan, Cem Boyner, işe gömlek kollarını sıvayarak başladılar. Gömlek kollarını yukarı katlama, halk tabiriyle sıvama görüsünün kaynağı 'Dijital Kölelik'ten elde edilmiş verilerden olabilir çünkü 'Dijital Köle' otuz küsur seneden fazla bir süreçte sürekli talan edenlerin izini sürme çabası içinde olmuştur ama elbette dağıtımın nasıl yapıldığı geleceğin konusu olacaktır. Bu sıvama işlerine kareli gömlek, kareli ceket de eklenir çünkü kareli her şey halkı temsil eder, hatta küresel Dijital-Reel Psiko-Semiyotik anlam da yüklenerek. Kareli ceketin ham maddesi çok lüks, doğal ve pahalı da olsa, hey hat! Halk için, giyeni, 'bu bizden' gösteren karesi, içselleştirmesi için yeterli ölçüt olacaktır.

*Biriyle konuşurken diz çökme hali*, sıradan insan için oldukça etkileyici, hele bir devlet adamının önünde diz çökmesi, ilk kullananlardan geçmiş dönemlerde İç İşleri Bakanı olan Soylu, oturan annelerle konuşmak üzere çömelmişti, bu denklik, eşitlik, halden anlama, dertle hemhal olma psikosunu taşıyordu. Küresel boyutta örnekleri, Biden'ın İsrail siyasi liderlerinden birinin bir görüşme sırasında özel yaşamına dair söylediği sözdü ve Biden adeta bu itiraftaki yoğunluğa, şövalye gibi diz çökerek karşılık vermişti. Sonra bunların çoğaldığı görüldü.

Kamala çok renkli giyinmemesi gözlerden kaçmamaktadır. Geldiği kökenin çok renkli olmasına rağmen genelde mavi, lacivert, toprak tonlarını kullandığı gözlerden kaçmamaktadır. Kılık-Kıyafette partisinin renklerine öncelik verdiği gözden kaçmamaktadır. Seçim konuşmalarındaki arka fon erkek liderlerle aynı özelliği taşımaktadır fakat özel bir markanın misafiri iseler, elbette sponsor marka arka fonu ele almaktadır. Genellikle seçim konuşmalarında ABD bayrağının partileriyle bütünleşen renksel bölümü, mavinin hakim olduğu bir Dijital-Reel Psiko-Semiyotik Dil Kullanımıyla seçmenin karşısına çıkmaktadırlar.

Biden'ı normalde takım kıyafetsiz ve kravatsız görmek güç, yukarıdaki fotoğraf nadir fotoğraflarından biri, ne kadar da halkın içinden, demokrat görünmeye çabalasa da başta estetik operasyonları olmak üzere her hali, halktan kopuğum demekte. Bu deyim ne derece doğru, tartışma konusu; eski tip, alışlagelen lider örneği, genç ve dinamik görünme doğal isteklerini, insani olarak değerlendirmek daha doğru olacaktır. Estetik sektörünün genele yayılmayı başarmış hali onu bir lüks olmaktan çıkarıp adeta ihtiyaç duyulan bir sağlık sektörüne dönüştürmüştür.

<https://www.wabe.org/>

<https://d.newsweek.com>

<https://www.wabe.org/>

Kamala Harris'in gülmediği bir fotoğrafı bulmak oldukça zor. En çok gülen ikili, hatta üçlü, Sanna Marin, Obama, Kamala, Bu üçlüden Kamala Harris'i yakalayan biri henüz çıkmadı ama Obama, onunla yarışabilir. Kamala Harris'e bir Türk danışmanlık yapıyor olabilir, benzeri Hülya Avşar'a yapıldı: Gülmek ona yakışıyor, üzerine kurulu, koca bir kampanya, bir şey yapamayınca gülsün bari mi? Gülmek her şeyi, çoğu şeyi kapatabilir, Dijital-Reel Psiko-Semiyotik anlamı genel kitleler için taşır mı? Evet, taşıyabilir. ABD seçim işlerini çok araştırmadım ama Biden ve başarısız darbe kalkışmasından sonra, bir dijital köle olarak hak aramaya

kalkıştığında çok defa fena baskıldım, rencide edildim, kumpaslarla karşılaştım. Böyle bir durum kürenin geldiği noktada artık tesadüf olamaz.

Obama'nın yüzü ve mimikleri, beden dili, şimdiye kadar gördüğüm en içselleştirilmiş, kişiliğiyle uyumlu çünkü yüzü böyle söylüyor: "Aşağı eğilimli kaşlar, burun kemerine yakın bölgenin yukarisından kaşlar, gözlerin dış kenarlarına doğru alçalarak, uzanırlar. Bu tür kaşlara sahip çocuklar, genellikle nazik, zarif ve müşfik arkadaşlar olarak yetişirler. Erişkin dönemlerinde güçlü ve dayanıklı olmalarına rağmen, kendi başarıları için başkalarını kullanmaktan ziyade onları planlarına dahil etmeyi tercih ederler. Yin özellikleri gösterir ve grup çalışmalarında iyidirler" (Brown, 2002). Gözlemlerim Obama'nın ileride mutlaka aktörlüğü de deneyebileceği doğrultusunda henüz yapmadıysa, zaten tüm, son dönem dünya liderlerinin yer aldığı bir Netflix projesi büyük bir başarı getirecektir: Bu yüzyıla yakışır mı? Kesinlikle evet.

<https://www.hot97.com>

Bu el işareti tüm homolara bir onay aynı zamanda. Avrupa için geçerli olan her şey yolun Türkiye ve bazı doğu ülkelerinde amiyâne ve argo tabirlerle: Top, tekerlek, homo, eşcinsel anlamlarını taşır ve bu anlamları Obama bilebilir. Eğer biliyorsa bu işaret o kesime sevgi işareti, sizi görüyorum, tanıyorum, biliyorum, hissediyorum selamlarını gönderebilir mi?

Evet.

Halk arasında, sevdiğiyle(eşiyle öpüşen) dondurmayı tabii ki yalayarak yiyen Obama, Kamala Harris için tekrar indiği siyaset arenasında, seçim için de çekimlerde zarfı yalayacaktı ve bu halkın da yaptığı bir şeydir. Obama Harris için çıktığı sahalarda daha da halktan, gömlek açıklığı daha fazla, kollar yukarıda ve beden dilini çok daha fazla kullanıyor gibi bir izlenim yaratmıştır. Beden dili hem Akdeniz, hem Karadeniz, hem Ege, tüm okyanuslar, tam ABD'li ve çok küresel durmaktadır: Tam yeni dönem liderleri gibi, bir çok yönleriyle tüm diğer kültürlerle göndermeler yaptıkları, bir başka söylemle Dijital-Reel Psiko-Semiyotik Dil Kullandıkları gözlerden kaçmamaktadır. Dondurmayı en çok seven başkan, doğduğum topraklarda dondurmayı yalayarak yemek kızlar ve kadınlar için bazı kültürler için çok ayıp, bazıları için görgüsüzlüktü, yeni tür başkanlarla toplumun ayıp saydığı tutum ve tavırlarında sahiplenildiğini gözlemledik. Sanki saçma kuralları delerken, aslında genel çoğunluğun da çok istedikleri, bazılarının yaptıkları, şeyleri yapıyor gibiydiler; hem yol açıyor hem özlemleri oya dönüştürüyorlardı; hem de bazı tutum ve tavırlarla toplumun LGBTI gibi kesimlerine de öpücük gönderiyorlardı. Büyük bir olasılıkla insanlar dünyanın çivisi mi çıktı gibi bir hisse kapılmış olabilirler çünkü eski küreye acayip yeni adetler gelmişti.

<https://www.usnews.com>

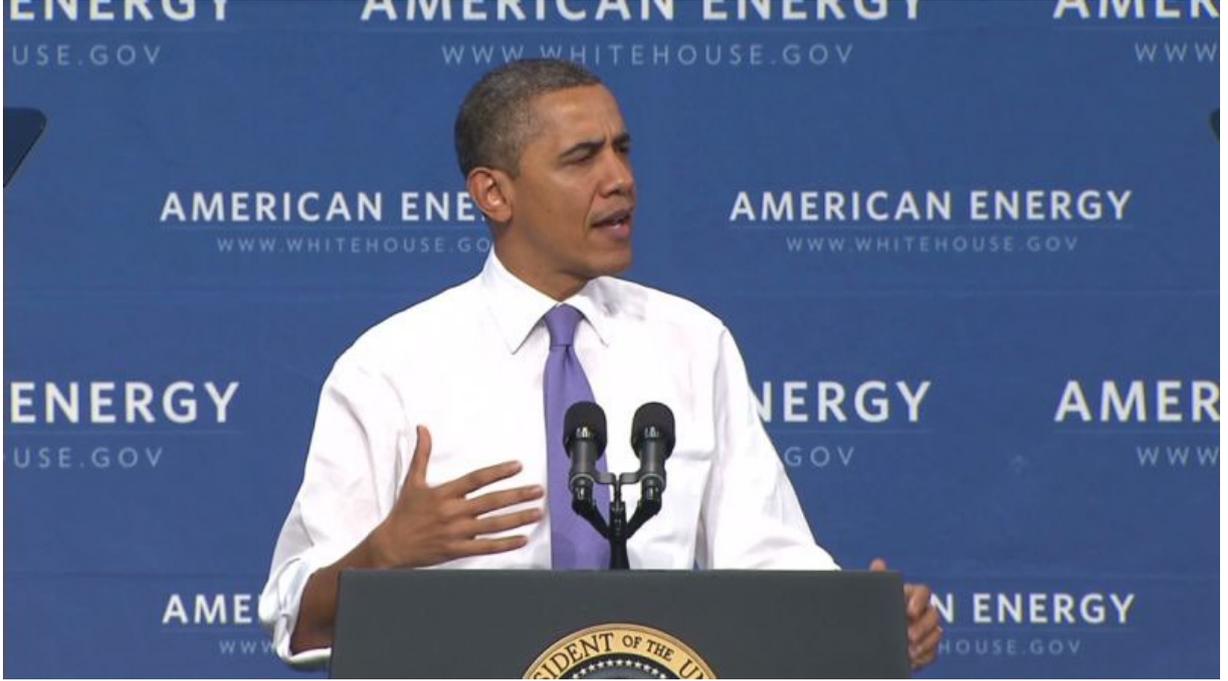

Doğu toplumlarında yapsaydı olmazdı ama Batı toplumlarında mükemmel anlamını yüklenmiş bir beden dili işareti, Doğu toplumlarında kullanılan anlamını olumlu bir selamlamaya çevirebilir.

Obama olgunluk dönemlerinde adetâ şarap gibi demlenmiş, iyi pişmiş bir ekmeğe gibi, sahaya ve insana çok daha hakim ki, Brown'ın söylediklerine yani kaşlarının yüzüne kattığı anlamlara, şunları da eklemek gerekir, 'Ufak, küçük yüz, etkisi', mahzun, hüzünlü ve hatta mağrur etkisi. Ufak yüzlerin, ağlayan çocuk tasvirinin, çokça çerçevelenip, dükkanlara asıldığı küçük çocuk tasvirinin, Obama'nın çok benzediği çizgi roman karakteri küçük çocuğun tasvirinin etkisiyle mi bilinmez ama ufak yüzlerin, Dijital-Reel Psiko-Semiyotik bir etkisi olduğu saptanamaz ki, yüzünü simetrisini de buna katmak lazım. Bu bağlamda yüzünü tam yerinde kullanan bir örnek oluşturmaktadır Obama. Ufak yüzler ve aşağıya doğru kaşlar insanlarda bir sempati ön kabulü yaratabilmektedir.

<https://il.wp.com/blackdoctor.org>

Yemeđi bu kadar ok seven bařka bařkan var mıdır? Bakan grg kurallarını yıkmaya ve ne kadar halktan olduđunu gstermeye devam etmekte. Bu Dijital-Reel Psiko-Semiyotik grsel gstergeyle krsel bir n sempati kabul grr m, bulur mu? Evet.

ok renkli, hatta en renkli giyinen liderden biri Merkel, kırmızıyı oka tercih etmesinin dinsel Dijital-Reel Psiko-Semiyotik anlam tařıyıp tařımadıđı ileri arařtırmalarla belli olur. Bu makalem iin bu kadar zamanım yok.

Dolayısıyla bir gelecek zaman işi olarak bırakıyorum fakat gözlemim çok renkli giyinen bir insan, kırmızı baskın renk olarak en azından baktıklarım üzerinden durmamaktadır.

<https://media.npr.org>

<https://img-s-msn-com>

Kamala, Kamala'ya destek için sahaya inen Obama ve eşinin Dijital-Reel Psiko-Semiyotik Dil Kullanma oranları, Trump'a kıyasla çok daha fazladır. Obama'nın siyasete girmesi de oldukça enteresan bir durumdu. Bir çizgi karaktere benzeyen Obama birden ABD, başkanı oluvermişti, peşi sıra Boris gelir ki, İngiltere başbakanları arasında üstelik Türkiye'de akrabaları olan, Türkiye'yle bağı olan bir ilkti. Saçı başı o zamana kadar İngiltere halkının alışkın olduklarından bambaşkaydı. Hatta sürekli lacivert de giymiyordu. Alman Şansölyesi Merkel ki, bindiğim Berlin'deki Alman Taksi şoförü onu çok seviyordu, "Neden diye" sorduğumda halk için iyi şeyler yaptığımı söyledi ama herhalde içselleştirdiği çok daha farklı özellikleri vardı, halka benzeyen yönleri, halk

farkında olmasa dahi sempati yaratıp, ön kabulle yaklaşımı sağlıyordu. Finlandiya'ya da genç ve güzel bir kadın yakışır. Kürenin böyle özelemleri de vardı. Bu genç başbakanın söylemlerine dayanarak ülkesine katkısı yadsınamaz, üstelik, gelecek nesilleri kölelikten kurtarmak, yeni dünya düzeninde büyük bir başarıdır; Sürdürülebilir 'Dijital Köleliği' yaratan, varlığını bu kölelikten alan, almaya devam eden ve küreye satan liderlerin var olabilecekleri, oldukları düşünülürse, cidden, alkışlanması gereken büyük bir başarıdır. Genç, güzel bir kadın başbakanın adetâ Sibel Can gibi, şortunun bir paçasını yukarı çekmesi güzel küremizin tam olarak küreselleştiğinin, en azından küresel veri madenciliği üzerinden ve bu veri elde etmenin henüz açığa çıkmamış olması konusu gelecek günlerin hukuk vakaları olacak üst düzey illegal boyutu, 'Dijital Kölelik' üzerinden, olduğu gerçeğine göz kırpar gibidir çünkü bu karedeki poz aynı zamanda Dijital-Reel Psiko-Semiyotik bir göstergedir ve kaynağı da 'Dijital Kölelik' üzerinden elde edilen verilerden sağlanmış olabileceği gelecek günlerin konusudur. Küreselleşmeye bu pozun Psiko-Semiyotik katkısı her iki cinsi, her dini, her kültürü kapsayacak şekilde var mıdır? Evet, vardır.

Obama'yla ilgili birkaç söz daha etmek gereği duyulursa, bedenlerini taşıma üzerinden eşiyile kıyaslandığında eş çok daha fazla halkı etkileyebilecek beden diline sahip. Belki Bundan kaynaklı olarak Sayın Obama zarfi yalamak, çok fazla jest ve mimik kullanarak, el hareketleri yaparak, sözde tesadüfi sokak konuşmalarıyla arayı kapatmaya çalışıyor gibi görünmektedir.

## SONUÇ

Toplumları birbirinden farklı kılan kültürün dijital çağla beraber giderek benzeşmesi, Psiko-Semiyotik İletişim araçlarının da giderek aynılaşması sonucunu doğurabilmektedir. İçinde doğduğum toplumda yazılı görsel basın araçlarının temeli nereden geliyorsa, o temele uygun tutum ve tavırları yaşam sürecimde deneyimlemiş, hatta bu koya unsurlara, halkı aşağıda tutacak sürekli maruz kaldığım görsel basındaki yayınlara yaptığım eleştiriler ve önerilerle dolu olan, içinde doğduğum toplumda maruz kaldığım gündelik yaşam unsurlarını yazarak atabildiğim, bilgisayarına taşıdığım günlük tutma alışkanlığım başıma çok dertler açtı ve çözüm için son aşamasındayım artık. Sözü nüvesi içinde doğduğum toplum adeta bu anlamda küçük bir USA'di. Kopyalama geleneği köklerinde var ve dijitalle gelen dijital mahrem alanları talana varacak kadar olan: İlegal ya da legal görünümü mahrem dijital alanlardan elde edilen dil kullanımları belli toplulukları derinden etkileyebilir ki, dijital veri kaynaklarının en korkucu 'Dijital Kölelik' üzerinden elde edilen verilerdir. Bir başka söylemle dijital çağla beraber bir de Psiko-Semiyotik İletişimde etkin olacak dil kullanımlarının üretimlerinin incelenmesi söz konusu olacaktır. Kaç tesadüf sonrası artık tesadüf sayılmamalı ve 'Dijital Köle' olarak seçilen ve kullanılan kaynaklar ortaya çıkacaktır. 7/24 dijital gözlem altında tutulup sömürülen, fiziksel çevreleri bu amaçla örülen dijital alanların sahipleri ; yerinde bir söylemle 'Dijital Köleler' özgürlüklerine kavuşacaklardır.

Bu kültürel kodlardan belirleyici, baskın olanların cemaat kazanma, birlikte hareket etme üstünlüklerinden yola çıkarak dinsel de olabileceği çıkarımını da yapabiliriz. Tek tek bakıldığından dinsel, etnik köken, din, dil, toplumsal belleğin söz hafızasını, kültürel çeşitlilikle oluştururken aynı zamanda aynı unsurlar toplumsal belleği baskın veya çekinik olarak biçimlendirebilir. Bir de tüm bunların üzerinde devletlerin yürüttüğü politikalar, toplum adına, toplum için almış oldukları kararlar toplumsal belleğin birer parçası olurlar ve tüm bunların hepsi artık tanımladığım şekliyle Dijital-Reel Psiko-Semiyotik Dil Kullanımları havuzunu oluştururlar.

## SOME ASPECTS OF THE RESEARCH OF APPLIED OIL AND GAS PROJECTS OF THE REPUBLIC OF KAZAKHSTAN

**Zhaniya NURSULTANOVA**  
Azerbaijan Technical University  
nursultanova.zhaniya@gmail.com

### ABSTRACT

In modern conditions of economic development of the country the purpose of economic and structural policy of the industry of Kazakhstan is: improving the efficiency of mineral resource sector, reforming the current system of development of the natural source industry, the emergence of incentives for a significant increase in the flow of investment in the oil and gas industry, as well as research and implementation of research projects. The paper analyzes some indicators that contribute to the effective use of various resources in the implementation of applied works. At the same time, new forms of state participation in the development of science, including innovation and technical direction are shown. One of the indicators of innovative development of science is the creation of modern laboratories, as well as qualitative improvement of project financing. The hydrocarbon raw material industry of Kazakhstan has very significant proven reserves of oil and gas of industrial categories, as well as promising and forecast resources that provide a reliable basis for further progress of the phosgene complex. The main features of the country's current industry should be considered that, first, it is one of the main components of the country's economic security, and secondly, the growth of the useful fuel complex is largely associated with the further expansion and deepening of foreign economic relations of the Republic. And, finally, third, the evolution of irrigation projects directly and through tax revenues to the budget allows us to increase the pace and volume of implementation of important social programs, including environmental rehabilitation of many territories of the country.

**Keywords:** Kazakhstan, oil and gas industry, research and applied projects, oil, investment, program, economy

The article "Development of the market of oil products of Kazakhstan in SCO" is devoted to the organization of the market of oil products and cooperation of Kazakhstan for integration with the Shanghai cooperation Organization (SCO). The author substantiates the reality of SCO integration cooperation and their effectiveness. The article Muhamediev B. M. Kocianova T. I., "modeling the impact of oil revenues on the dynamics of the main macroeconomic indicators of Kazakhstan" model of the dynamic stochastic General equilibrium for the economy of Kazakhstan, which produces oil and accumulating a part of the oil revenues in a special Fund. Along with the final goods sector, the model includes the oil production sector, which plays an important role in the economy and provides a significant share of revenues to the state budget of the country. The principal feature of dynamic stochastic General equilibrium models is the inclusion of equations with expectations of future values of variables. These are the equations of the new Keynesian Phillips curve and the dynamic is curve. Ignoring, for example, inflation expectations can lead to unreliable results regarding the behavior of the economy in response to various internal and external shocks [1].

Thus, a brief review of Kazakhstan's works confirms the relevance and necessity of research projects in the oil sector of Kazakhstan.

Main part

For the implementation of scientific and applied works, certain conditions are necessary, which include:

- Project organization. At this stage, you need to determine the composition of the project team, make a work plan, set deadlines, appoint responsible executors. Each stage of the project should bring concrete results. The project team should have specialists who are responsible for certain areas of the strategy.
- Development of strategic objectives. The first task is to identify strategic goals, which are usually grouped into four projections: Finance, market, processes, potential.
- The strategy map reflects the strategic objectives and the relationships between them. The creators of Balanced Scorecard methodology D. Norton and R. Kaplan gave a new definition of corporate strategy as a chain of cause-and-effect relationships. In accordance with this strategy map clearly represents the strategy of the company.
- Development of indicators. The following recommendations should guide the selection of indicators:
  1. indicators konkretisiert content targets.
  2. quantitative and qualitative indicators should be used.
- The establishment of target values. Once the methods for measuring indicators have been defined, targets should be set for each year of the period for which the strategy is developed.
- Development of strategic activities. At this stage, it is necessary to appoint project managers, form project teams, develop a plan and define the main "milestones" for each project, develop and agree on project budgets.
- Check the MTP. At this stage, it makes sense to assess the completeness, integrity and consistency of the indicator system.

- Implementation of the balanced scorecard. The project does not end with the development of the MTSP. Now it is necessary to carry out the implementation to turn the designed system into a working mechanism [2].

Innovation is traditionally considered as an activity related to research and development, and the transformation of the results obtained at these stages into a new or improved product, process, approach (method) of organization and management.

As shown by market research of the domestic labor market, today there is an acute shortage of highly qualified specialists in the field of oil and ozone industry. This fact confirms the need to create a system of internal training and retraining of personnel, which should be executed in accordance with the key competencies of the vertically integrated oil company. In the management of human resources the main goal is to maximize the potential of people, creative opportunities. Human resources management in the oil and helium industries covers the following complex tasks: determining the requirements for the workforce corresponding to the specific strategy of the oil and xenon industries, labor market assessment and analysis of employment factors, career planning, their development, labor productivity management, regulation of labor income, stimulation of creative work, improving professional and technical training of the staff, creating a social psychological environment.

JSC "NC "KazMunaiGas"( KMG) has started to create an innovative cluster – a group of innovative organizations, the purpose of which is to strengthen scientific and applied research, development and implementation of new technologies to solve current production problems.

The development plan of KMG until 2015 provides for the development of innovative projects totaling 45 billion tenge. At the same time, it is expected to use low-margin fields as test sites for testing new technologies.

Such studies make it possible to conduct industrial testing of new technologies, to conduct their own scientific, technical and experimental design work (R&D).

The widespread introduction of positive R&D results in production is a contribution to commercialization.

As part of the innovative technological policy adopted by company, a radical increase in R&D expenditures is planned up to 8.9 billion tenge in 2015 and 11.5 billion tenge in 2020.

The practical application of research results will ultimately affect the increase in labor productivity. Specifically, in the ethylene complex, it is lightening the work of oil workers, increasing production and improving the quality of products.

Summarizing all of the above, we can say that, in order to ensure competitive advantages and maximize profit, enterprises in the mineral resources industry should use, above all, the strategy of innovative development. This strategy is able to ensure the sustainability of organization in external environment and the preservation of its potential in case of any changes. At the heart of the implementation of this strategy is a personnel potential of the organization. Its provision is an main part of the effective functioning of any organization [3].

The requirements of the modern market force us to perform tasks with each passing day as efficiently as possible, faster and with minimal costs. All the diversity of small and large projects, research and business projects, projects to start the application of innovative technologies or standard projects, projects related to the launch of a new product line or improve the efficiency of existing systems and business processes, the most important is to the correct and timely performance of all parts of the project in under budget and launch on time or earlier. Thus, the project manager will ensure the success of the company and the development of the country's economy.

When analyzing the results of the projects, it is possible to conclude that the reasons for the failure of projects or their low effectiveness relate to a lack of requirements definition ( 34%), 20% is the lack of skilled workers, 17% is bad risk management, 15% is insufficient monitoring of project work, 14% is poor communication.

The lack of qualified personnel is closely coupled with the system of vocational education in this area. Increase the number of experts in the field of project management, it is necessary to improve the level of interaction between educational institutions and the area of production.

Employees, including managers and executives should speak the same language of project management. Each participant in a project should understand and be able to apply the necessary tools and methods of project management. In addition to their expertise, the employees need to know and be able to manage project work - this means that they should be properly structured and integrated into one system to achieve the objectives.

The next important stage is related to the analysis of project performance. Method used the volume it is possible to see not only the effectiveness of the use of invested funds, but also to predict the time and cost, taking into account the prices, which are characteristic for the present moment.

The main cause of inefficiency of the project (34%) is linked to the lack of definition of requirements, and that the contents of the project (what needs to be done), time, and budget. With proper preparation of the project charter and the description of the content of the project reduces the risk of inefficiency of the project.

Communication problems in the project account for 14% of the reasons for the failure. To create the collection, distribution and storage of information in the project, it is necessary to manage communication.

In 17% of cases, these were unforeseen risks that triggered the project's failure. The ability to manage risks, allows to increase the efficiency of all results and does not allow the spread of project risks associated with timing, money, suppliers, etc.

In the course of the project, control is required. According to the results of the analysis, poor control led to inefficiency of 15% of projects. It is necessary to create an effective system of administration, given on a regular basis, whether orally or in writing, conveniently reflects the performance of work and tasks [4].

One example of a new approach to field development is an activity of the Caspimunaigas Research Institute, one of the leading and competitive on the oil market among domestic design and scientific organizations. Evidence of this is a visit to the Institute by Prime Minister of the Republic of Kazakhstan K.K. Massimov in August 8, 2016

Having received the status of a legal entity at the end of 2005, Caspimunaigas Research and Development Institute LLP successfully progresses from year to year in the provision of engineering services in the oil industry. This company is successfully developing, expanding two areas - design and laboratory. For a developing project institute, where the development of a strategy for the efficient development of hydrocarbon deposits is decisive, the lack of scientific laboratory studies that meet international standards was a pressing and important problem.

In 2008-2014 two specialized laboratory complexes were built. The first laboratory complex includes a full-scale study of reservoir fluid in surface and reservoir conditions. The reservoir study laboratory is equipped with modern equipments at the international level. These are the Chandler and FLUID EVAL units, which allow to conduct research of reservoir fluids at high pressure (up to 1000 bar) and high temperatures (up to 204°C), with hydrogen sulfide content up to 27 mole. %, i.e. creation of thermobaric conditions of nitrogen condensate fields at different depths - from 300 m to 5 km.

The second laboratory complex includes two areas - petrophysical studies of rocks and geochemical studies of the reservoir mixture and rock. Unique modern devices and installations were purchased, where experiments on the selection of different agents to increase extraction of hydrocarbons from the depths are carried out. The current state of the laboratory allows laboratory studies and experiments to determine the industrial potential of deposits and the maximum extraction of hydrocarbons.

Opening in 2015 of a new laboratory in the Atyrau region within the framework of Roadmap implementation of the scientific and technological development of mining sector of the oil industry until 2025 suggests that the state places great hopes on this region and at the same time is largely responsible for real progress of the Republic of Kazakhstan. With activities of this laboratory, questions on the study of geochemical properties of rocks and petroleum will be understood and resolved in scientific community of the oil industry. In the near future, this direction will become an additional tool in the study of oil generation issues. Today, the Laboratory Center conducts scientific studies of reservoir fluids and core material of almost all fields in Kazakhstan, with the exception of Kaarchaganak, Tengiz, Korolevsky, Kashagan. For these deposits, analysis are carried out by foreign companies, i.e. outside the country [5].

Kazakhstan is part of the international academic community, and in the last 5 years it has qualitatively changed the forms of state administration of science and education. In 2014, in the framework of grant financing of the MES Science Committee of the Republic of Kazakhstan, 1,933 scientific and scientific-technical projects were implemented for KZT 16.4 billion.

There has been a significant increase in scientific articles of Kazakhstani scientists in international rating publications. In 2017, the number of publications by Kazakhstani scientists according to the Web of Core Collection (Clarivate Analytics) was 2321 (in 2016 - 2066 units), according to Scopus data Elsevier contains 3282 units (in 2016 - 3232 units).

The necessary organizational measures of state have stabilized the situation with personnel potential. The total number of workers engaged in research and development work in 2017 was 22,081 thousand people (2015 - 27,7 thousand people, 2016 - 22.9 thousand people) of which 17205 were research specialists.

Investment of private capital, in particular the foreign ones, in Kazakhstan knowledge-intensive technology are small, in spite of the activities of 8 technoparks, 4 industry design bureau, 21 office and 4 regional centers of commercialization, 4 international technology transfer centers created for the 2010-2013. For this period the innovative activity of country has increased from 4,3% to 8% [6].

At the present stage, the economic development of the Republic of Kazakhstan is implemented mainly through the government programs and projects. The adoption of ISO21500 "Project Management Guide" as a national standard encourages the state to take a new step for a more accurate and in-depth study of the tools and methods of project management. Government programs - a large-scale projects, designed to solve the problem with which can cope only the state. The world experience of implementation of the government programs said that they can be really successful only when the management will be held on principles of project management. Due to strict financial constraints, the experience of project management experts is becoming more and more in demand than ever before. The use of tools for project management In the development and implementation of government programmes and projects will provide a unique result in a timely manner and take into account the limited resources.

Management of state programs and projects includes integrated planning, taking into account the current situation at the time in question; placing orders, continuous monitoring of implementation of the program,

monitoring of performed work, costs of funds and resources, as well as other indicators of projects; regulation of the implementation of projects through re-planning, taking into account the current situation.

Today, the economy is developing precisely through the implementation of state programs and projects. World practice shows us that this is the most profitable and effective way to develop the country's economy. And to achieve these goals it is necessary to solve a number of tasks:

- to constantly increase the level of competence of civil servants engaged in implementation of state programs in the field of project and program management
- pay special attention and time to project planning processes, with fixation for each stage of the project of an intermediate result (milestone);
- to create a project office for each state program, being part of the "additional" management system, the project offices fully justify their existence, since they make it possible to avoid problems that are typical to government bodies (insufficient development of horizontal communications, functional separation of units, complexity of procedures for coordinating and taking management decisions, etc.).

## CONCLUSION

Today, the development of the economy occurs precisely through the implementation of state programs and projects. World practice shows us that this is the most profitable and effective way to develop the country's economy. A constant increase in the level of competence of specialists improves this process and contributes to the intermediate result. Research projects solve theoretical and practical problems in the real economy.

# ŞARTLI EĞİTİM YARDIMI (ŞEY) PROGRAMININ HEDEFİNE ULAŞMA DURUMUNUN İNCELENMESİ

**Nermin KARABACAK**

Recep Tayyip Erdoğan Üniversitesi, Eğitim Fakültesi, Türkiye  
nermin.karabacak@erdogan.edu.tr

## ÖZET

Şartlı Eğitim Yardımı Programı dünyada ve Türkiye’de uzun yıllardır uygulanmaktadır. Dünyada, özellikle yoksulluğun kuşaklar arası aktarımını önlemek ve beşeri sermayeye katkı sunmak amacıyla uygulanan Program’ın diğer sosyal yardımlardan ayrılan özelliği şartlılık ilkesidir. Çocuk, okula devam ettiği sürece yardımdan yararlanabilmektedir. Şartlı Eğitim Yardımı Programı, Türkiye’de 2003 yılında dezavantajlı grupta olan ailelere eğitim desteği sağlanmasıyla başlamıştır. Altı pilot ilde başlamış olup günümüzde tüm illerde ulusal düzeyde uygulanmaktadır. Türkiye’de Aile ve Sosyal Hizmetler Bakanlığı bünyesinde ve Sosyal Yardımlaşma Dayanışma Vakıfları aracılığı ile ulusal düzeyde Türkiye Cumhuriyeti vatandaşlarına uygulanmaktadır. 2017 yılında göçmen çocuklara da yaygınlaştırılması kararı verilen Yaygınlaştırılan Şartlı Eğitim Yardımı Programı’nda yer alan nakit bileşeninin çocuklar üzerindeki etkisinin sürekliliği amaçlanmıştır. Sosyal politika alanı içinde Yaygınlaştırılan Şartlı Eğitim Yardımı Programı’nın çocukların okullaşmaları üzerindeki etkisini anlamaya yönelik bir çalışma ile karşılaşılmamıştır. Okul terki, yoksul çocukların okullaşması, göç, göçmen çocuklar ve eğitim güncel sosyal politika konuları olmasına rağmen alanyazında bu konu kapsamında sınırlılıklar bulunmaktadır. Bu kapsamda Yaygınlaştırılan Şartlı Eğitim Yardımı Programı’nın nakit desteğinden yararlanan çocukların okullaşmaları üzerindeki etkisinin ortaya konulması amaçlanmıştır. Araştırma nitel araştırma desenlerinden doküman incelemesiyle gerçekleştirilmiştir. Verilerin toplanmasında küresel bağlamda ve Türkiye’de yoksulluğu desteklemek amacıyla Şartlı Nakit Transferleri programlarının uygulanışı, gelişimi, sonuçları ve sürdürülebilirliği incelemesi yapılmıştır. Kapsamlı bir alanyazın taraması yapılarak konuyla ilgili kitaplar, yüksek lisans ve doktora tezleri, makaleler, araştırmalar ve ilgili kurum ve kuruluşlara ait yayımlanan alanla ilgili raporlar incelenmiştir. Araştırmada Şartlı Eğitim Yardımı Programı’nın ilgili tüm yayınlar toplanmıştır. Daha sonra da Türkiye’de Şartlı Eğitim Yardımı Programı’yla ilgili yapılan tüm yayınlar incelenmiştir. Bu araştırma kapsamında incelenen konuyla ilgili tüm yayınlar derinlemesine inceleme sonucu araştırma sorusu kapsamında değerlendirilmiştir. Elde edilen tespit bağlamda Türkiye’de Şartlı Eğitim Yardımı Programı’ndan faydalanan yerli ve göçmen çocukların okullaşmaları ve okullaşmalarının sürekliliğini sağlamada Programı’nın amacına ulaşamadığı, ulaşamaması nedeniyle Program’ın iyileştirilmesi yönünde yerli ve göçmen çocukların refah düzeylerinin yükseltilerek okullaşmalarının sürekliliğini sağlamaya yönelik öneriler geliştirilmiştir.

**Araştırmanın Amacı:** Türkiye’de Şartlı Eğitim Yardımı Programı’ndan faydalanan çocukların okullaşmaları üzerindeki etkisinin ortaya konulması amaçlanmıştır.

**Anahtar Kelimeler:** Şartlı Eğitim Yardımı, çocuk, okullaşma, refah, yoksulluk, göçmen çocuklar

## GİRİŞ

Şartlı Eğitim Yardımı Programı dünyada ve Türkiye’de uzun yıllardır uygulanmaktadır. Dünyada, özellikle yoksulluğun kuşaklar arası aktarımını önlemek ve beşeri sermayeye katkı sunmak amacıyla uygulanan Program’ın diğer sosyal yardımlardan ayrılan özelliği şartlılık ilkesidir. Çocuk, okula devam ettiği sürece yardımdan yararlanabilmektedir. Şartlı Eğitim Yardımı Programı, Türkiye’de 2003 yılında dezavantajlı grupta olan ailelere eğitim desteği sağlanmasıyla başlamıştır. Altı pilot ilde başlamış olup günümüzde tüm illerde ulusal düzeyde uygulanmaktadır. Türkiye’de Aile ve Sosyal Hizmetler Bakanlığı bünyesinde ve Sosyal Yardımlaşma Dayanışma Vakıfları aracılığı ile ulusal düzeyde Türkiye Cumhuriyeti vatandaşlarına uygulanmaktadır. Şartlı Eğitim Yardımı Programı, 2017 yılından itibaren ulusal düzeyde, uluslararası kuruluşların finans desteği ile göçmen çocuklara da yaygınlaştırılması kararı alınmıştır.

Türkiye, mülteci çocukların okullaşma oranının artırılması amacıyla, çoğunluğu Suriyeli olan mültecilerin ekonomik kırılganlık faktörünü de göz önünde bulundurarak ulusal Şartlı Eğitim için Nakit Transferi Programını AB’nin mali desteği ile mülteci çocuklara da genişletilmiştir. Türkiye’de bulunan yaklaşık 4 milyon mülteci nüfusunun %50’sini çocukların oluşturduğu ve okul çağındaki mülteci çocukların da %40’ının okul dışı kaldığı düşünüldüğünde, mülteci çocukların eğitimi sosyal politika bağlamında özel çalışma gerektirmektedir.

Mülteci çocukların eğitimi kapsamında Türkiye’nin çabaları yadsınamaz. Ancak, eğitim sisteminin kapasitesi sınırlarını zorlamaya başlamış ve AB mali desteği Türkiye’deki mülteci çocukların eğitiminin iyileştirilmesi için açık bir şekilde tartışma konusu haline gelmiştir. Bu bağlamda, 2016 yılından itibaren Milli Eğitim Bakanlığı (MEB) ile işbirliği içinde başlayan projeler, hem okulların fiziksel kapasitesine hem de Suriyeli çocukların Türkiye’ye entegrasyonunu teşvik etmek için ek dil kursları ve kursların gözden geçirilmesi de dâhil olmak üzere mülteci çocuklar için eşit fırsatlara odaklanmıştır. Suriyeli ve diğer göçmen Çocuklara Yönelik Şartlı Eğitim

Nakit Transferi (ŞEY) Programı, 2017 yılında AB'nin eğitim kapsamındaki katkısının açık ve özgün parçalarından biri olarak hayata geçirilmiştir.

Nakdi desteklerle yoksullukla mücadele ederek sosyal koruma sağlayan bu programlar, ek bileşenlerle birlikte toplumsal refahı sürdürülebilir bir şekilde artırmayı amaçlamışlardır. Bu ek bileşenler arasında, aynı-nakdi desteklerin sağlanması ile okula devamlılığı güçlendirmek, aynı zamanda çocuk koruma bileşeni ile eğitime devamlılığın olumlu etkilerini artırmak bulunmaktadır. Bu bağlamda Türkiye'ye baktığımızda 2001 yılında yaşanan ekonomik krizle birlikte Şartlı Eğitim Yardımı 2003 yılında Türkiye'de ulusal bir yardım olarak hayata geçirilmiştir. ŞEY programı, öncelikle çocuklara insan sermayesi biriktirme fırsatı sunarak geleceğe yönelik yatırımları teşvik etmeyi ve nesiller boyu süren yoksulluk döngüsünü engellemeyi amaçlamaktadır (Aile ve Sosyal Hizmetler Bakanlığı (ASHB), 2015). Bu ana hedefin yanı sıra, program aynı zamanda ailelerin çocuklarının okul masraflarını azaltarak, çocukların okula gönderme konusundaki isteksizliklerini ortadan kaldırmayı amaçlayarak yoksulluk riski altındaki çocukların okula kayıt oranlarını ve eğitimlerine devam sürelerini artırmayı hedeflemektedir (Aca ve Özdemir, 2020). İncinebilir gruplar arasında yer alan çocukların eğitime devamlılıklarını destekleyerek ekonomik yoksunluğun sürüklediği çocuk işçiliği, erken yaşta evlilik vb. gibi risklerle karşılaşmalarını önlemeyi hedefleyen bu nakit destek programı ulusal bir program olarak hala Aile ve Sosyal Hizmetler Bakanlığı'na bağlı Sosyal Yardımlar Genel Müdürlüğü liderliğinde yürütülmektedir. Bu kapsamda yürütülen desteğe dair detaylar Bakanlık internet sitesinde yer almaktadır. Desteğin temel şartları aşağıda 2 madde ile özetlenmiştir (ASHB, 2023).

3294 sayılı Kanun kapsamında sosyal güvencesi bulunmayan ve ihtiyaç sahibi ailelere, çocukların okulun açık olduğu aylarda düzenli örgün eğitime devam etmeleri koşulu ile "Şartlı Eğitim Yardımı" yapılmaktadır. Bu yardıma başvurular, Sosyal Yardımlar Genel Müdürlüğü'ne bağlı taşra birimleri olan Sosyal Yardımlaşma ve Dayanışma Vakıfları aracılığıyla gerçekleştirilmektedir.

Şartlı eğitim yardımdan faydalanan çocuğun;

1. Örgün eğitim dışına çıkması,
2. Bir ay içerisindeki okul devamsızlık süresinin 4 günden fazla olması,
3. Yardım kaydının bulunduğu Sosyal Yardımlaşma ve Dayanışma Vakfına (SYDV) haber verilmeksizin ikamet adresinin değişmesi,
4. Hanesinin Mütevelli Heyeti tarafından muhtaçlık durumunun ortadan kalktığına tespit edilmesi,
5. Vefat etmesi,
6. Hak sahibi ebeveynin vefat etmesi, halinde yardım durdurulur.
7. Bütün bunların yanında ŞEY başvurusu sırasında imzalanan sözleşmeye aykırılıkların tespiti halinde yardım ödemeleri geçici bir süreliğine durdurulabilir ya da tamamen kesilebilir (Aile ve Sosyal Hizmetler Bakanlığı, 2023).

Göçmen çocuk okula kayıt işlemi tamamlandıktan sonra Şartlı Eğitim Yardımı Programından faydalanma kriterlerine göre aşağıdaki gereklilikleri yerine getiren çocukların başvurusu Kızılay Hizmet Merkezleri veya bulunduğu ilçede yer alan Sosyal Yardımlaşma ve Dayanışma Vakıflarında alınır. Programın kriterleri ise aşağıdaki gibidir.

1. Aile üyeleri Türkiye'de ve nüfus sistemine kayıtlı olması,
2. Ailede Sosyal Güvenlik Kurumuna kayıtlı kimse bulunmamalı,
3. Hiçbir aile üyesinin sosyal güvenlik kaydı bulunmamalı,
4. Çocuk okula kayıtlı olması

Ulusal Şartlı Eğitim Yardımı Türkiye'de uygulanmaya devam etmekte ve Şartlı Eğitim Yardımı kapsamındaki ödemeler, anaokulu seviyesinden başlayarak 8. sınıfa kadar olan kız çocuklarına aylık 100 TL, erkek çocuklarına aylık 90 TL olarak; lise (9. – 12. sınıf arası) düzeyindeki kız çocuklarına aylık 150 TL, erkek çocuklarına ise aylık 130 TL olarak düzenlenmiştir. (Eğitim Sektörü Çalışma Grubu, 2023). Ulusal Şartlı Eğitim Yardımı nakit transferleri ile çocukların okula devamlılığını teşvik etmekte ancak program, çocukların yardımı aldıkları/alamadıkları duruma dair bir takip mekanizması içermemektedir.

Yaygınlaştırılmış Şartlı Eğitim Yardımı Programı (YŞEY), 2003 yılından beridir Türkiye'de ulusal düzeyde uygulanan Program'dan şu şekilde farklılık göstermektedir: Nakit bileşenine ek olarak çocuk koruma bileşeni bulunmaktadır. Çocuk koruma bileşeni ile okula devam etmediği gerekçesiyle yardımı durdurulan göçmen çocuklara Türk Kızılay Toplum Merkezleri'nde bulunan çocuk koruma ekipleri tarafından ziyaretler düzenlenmekte ve çocuk koruma alanında sosyal çalışmalar yürütülmektedir (UNICEF, 2022). Şartlı Eğitim Yardımı kapsamında, 2023-2024 Eğitim Öğretim Yılında; ilköğretim (1-8. Sınıflar) öğrencileri için 450 TL, ortaöğretim (9-11. Sınıflar) öğrencileri için 550 TL, Lise (12. Sınıf) öğrencileri için 650 TL ve yükseköğretim öğrencileri için 1274 TL tutarında eğitim ve öğretim yardımı ödenmektedir.

Şartlı eğitim yardımlarına yönelik Türkiye’de yapılan araştırmalar incelendiğinde yapılan araştırmaların ve çalışmaların çok kısıtlı olduğu görülmüştür. 2003 yılından itibaren ulusal düzeyde uygulanan Şartlı Eğitim Yardımı Programı ile ilgili bazı çalışmalar (Dama ve Sundaram, 2018; Sarıipek 2017; Işık, 2019) bulunmaktadır. 2017 yılından itibaren uygulanan Konuyla ilgili alanyazında Yaygınlaştırılan Şartlı Eğitim Yardımı Programı ile ilgili yeterli araştırma ve çalışmaya rastlanmamıştır. Türkiye’deki ulusal düzeyde uygulanan Şartlı Eğitim Yardımı Programı ile ilgili olarak sınırlı sayıda nicel araştırmalar bulunmasına karşın nitel yöntemle derinlemesine ve konunun çok boyutlu incelendiği araştırmalar bulunmamaktadır.

## YÖNTEM

Araştırma, nitel araştırma deseninde tasarlanmış olup betimsel bir nitelik taşımaktadır. Araştırma nitel araştırma desenlerinden doküman incelemesiyle gerçekleştirilmiştir. Bu araştırmada, Türkiye’de Şartlı Eğitim Yardımı Programı’ndan faydalanan çocukların okullaşmaları üzerindeki etkisinin ortaya konulması amaçlandığından (betimsel içerik analizi yöntemi) bu amaca en uygun yöntemlerden biri olan doküman incelemesi kullanılmıştır. Araştırma, çalışma konusuyla ilgili içeriğin incelenmesine, çözümlenmesine ve yorumlanmasına dayanmaktadır.

## Veri Toplama Süreci ve Analizi

Araştırmada, verilerin toplanmasında küresel bağlamda ve Türkiye’de yoksulluğu desteklemek amacıyla Şartlı Nakit Transferleri programlarının uygulanışı, gelişimi, sonuçları ve sürdürülebilirliği incelemesine yönelik kapsamlı bir alanyazın taraması yapılmıştır. Araştırma konusuyla ilgili kitaplar, yüksek lisans ve doktora tezleri, makaleler, araştırmalar ve ilgili kurum ve kuruluşlara ait yayımlanan alanla ilgili raporlar taranarak doküman incelemesi tekniğiyle incelenmiştir. İngilizce dilinde ve Türkiye’de eğitim bilimleri alanındaki araştırmaları yayımlayan ve uluslararası indekslerde (ERIC, Web of Science, Scopus, SSCI), YÖK Tez tarama ve ulusal alanda TR Ulakbim dizininde taranan dergilerin veritabanında sistematik bir araştırma yapılmıştır. Google Scholar ve ScienceOpen veri tabanları aracılığıyla literatür taraması yapılmıştır. Araştırmada Şartlı Eğitim Yardımı Programı’nın ilgili tüm yayınlar toplanmıştır. Daha sonra da Türkiye’de Şartlı Eğitim Yardımı Programı’yla ilgili yapılan tüm yayınlar incelenmiştir. Bu araştırma kapsamında incelenen konuyla ilgili tüm yayınlar derinlemesine inceleme sonucu araştırma sorusu kapsamında değerlendirilmiştir.

## BULGULAR

Dünya genelinde yapılan etki çalışmaları Şartlı Eğitim Yardımı Programının işlevselliği tespit edilmiştir. Okula devam ederken okulu terk etme sayılarının Program ile birlikte Brezilya ve Meksika’da azaldığı, dolaylı yoldan ise çalışan çocuk sayısına, aile içerisindeki toplumsal cinsiyet normlarına, kız çocuklarının okula kazandırılmasına etki ettiği belirtilmektedir (Dama ve Sundaram, 2018). ASPB ve UNICEF’in (2012) raporlarında, Bolsa Familia Programı ile beraber 2004-2006 yılları içerisinde eğitimini yarıda bırakma verilerinin azaldığı ve okullaşma oranının arttığı yönünde çalışma bulgularına erişildiği aktarılmıştır. Chaudhury ve Parajuli (2008) tarafından yapılan araştırmada, Pakistan ülkesindeki şartlı nakit yardımları ile kız çocuklarının okula kayıt oranlarının artmış olduğu tespit edilmiştir. Borraz ve Gonzales (2009) tarafından yapılan araştırmada, Uruguay ülkesindeki şartlı eğitim yardımlarının etkisinin anlamlı olmadığını belirtmiştir (ASPB, 2012). Şili’de, uygulanan Şartlı Eğitim Yardımı Programının sadece ekonomik bileşeni ile yeterli kalmamakta aynı zamanda uygulama içerisinde çeşitli sosyal çalışmaların da yürütülmesi gerekliliği vurgulanmıştır (ASPB ve UNICEF, 2012).

Alanyazında yapılan araştırmaların sonuçlarının ortaya koyduğu tespitler bağlamında Şartlı Eğitim Yardımı Programının her ülkenin ve katılımcıların kendi dinamiğine göre etki değerlendirmelerinin farklılık gösterdiği söylenebilir. Türkiye’de ulusal düzeyde uygulanan Şartlı Eğitim Yardımı Programı özelinde yapılan etki değerlendirmelerinin ortak paydasının; özellikle kız çocuklarında okula gitmeme gün sayısının azaldığı, çalışan çocuk sayısında azalmanın olduğu, annenin güçlendirildiği tespit edilen sınırlı sayıda araştırma bulunmaktadır. Nakit desteği miktarlarının iyileştirilmesi yönelik tespitler mevcuttur (Işık, 2019). 2010 ve 2012 yılları arasında Türkiye’de ulusal düzeyde uygulanan Şartlı Eğitim Yardımı Programının çıktılara yönelik yapılan araştırmanın sonucu özellikle taşrada okula devam etmeme günlerinin azaldığını ve kız çocuklarındaki etkinin erkek çocuklarına göre daha etkili olduğunu ortaya koymaktadır (ASPB ve UNICEF, 2012). Kurnaz (2010) tarafından yapılan bir araştırmada, Türkiye’de uygulanan ulusal program ile ilgili katılımcıların %65 oranının şartlı eğitim yardım miktarını az bulduğu ve okula erişim kısıtlılığının yarıdan fazla payının ekonomik olduğu belirtilmiştir. Kurnaz (2010) tarafından yapılan bir araştırmada, Şartlı Eğitim Yardımı Programının özellikle kız çocukları ve kadınlar için toplumsal cinsiyet eşitliğini sağlanabilmede nakit bileşeninin oldukça yetersiz olduğu tespit edilmiştir.

Kayam (2014) tarafından yapılan bir araştırmada, nakit desteğinin eğitime devam farkındalığına olan katkısının ileri kademelerdeki sınıflarda daha küçük kademedeki sınıflara görece daha belirgin olduğu ve aynı kademedeki kız çocuklarındaki farkındalığın ise erkek çocuklarına göre daha belirgin olduğu tespit edilmiştir. ASPB (2012) tarafından yapılan bir araştırmada, Türkiye’de uygulanan ulusal şartlı nakit transferi uygulaması ile ilgili olarak, nakit desteğinin en çok mutfak alanında daha sonra sırasıyla; çocuklara gıda, çocuklar için kıyafet, çocuklar için

okul gereçleri, tıbbi ve internet harcamaları cevaplarının alındığı görülmüştür. Aynı araştırmada, Program'da okul yöneticilerinin daha fazla rol alması gerektiğini belirten okul yöneticilerinin olduğu gibi muhtarların da aktif görev almasını savunan okul yöneticileri olmuştur. Bu bağlamda, okul dışındaki mekanizmalarının olması gerektiği,

Öcal (2012) tarafından yapılan bir araştırmada, sosyo-ekonomik sebeplere bağlı olduğu belirtilen aile içerisinde anlaşmazlıkların ve şiddetin şartlı nakit transferleri ile azaldığı ve nakit desteğinin anneye sağlanmasıyla kadınlarda güçlenmenin yaşandığı durumlar tespit edilmiştir. Tüzün (2017) tarafından Program'dan yararlanan tüm çocukların eğitime devamlarının araştırılıp kamuoyu ile paylaşılmamasının ve Program'ın etki değerlendirmesinin yeterli olmaması sebebiyle Program etki analizlerinin, araştırmaların ve çalışmaların önemli olduğu ifade edilmiştir.

Demirel (2022) tarafından yapılan bir araştırmada, şartlı eğitim yardımının zorunlu okul çağındaki çocukların okula devamsızlıkları üzerinde herhangi bir etkisinin olmadığı tespit edilmiştir. Eğitim yardımının devam şartı olmasına rağmen devamsızlık ile olumlu anlamda bir etkinin görülmediği belirlenmiştir. Demirel bu durumu, sebebi şartlı eğitim yardım miktarının devamsızlığı etkileyecek yeterlilikte olmaması ya da ailelerin şartlı eğitim yardım etkisiyle devamsızlık yönünde karar almamaları olarak ifade etmiştir.

Türkiye'de yerli ve göçmen çocukların okullaşmalarının sürekliliğini sağlama sosyal, hukuki, psikolojik, sosyal, ekonomik, hukuki, koruma gibi çok boyutlu riskler yer alabilmektedir. Sosyal koruma bağlamında yardımların ulaşabilir ve kapsayıcı olması gerektiği ile ilgili Dama ve Sundaram (2018) tarafından talep olmaksızın desteğin sağlanması gerektiği ifade edilmiştir. Başvuru yapılmadan da dezavantajlı bireylerin programa dahil edilmesi, başvuru yapılmadığı için kapsam dışı olan çocuklara da erişebilmek demektir. Bu Yaygınlaştırılan Şartlı Eğitim Yardımı Programı açısından şu şekilde önemlidir: Ekonomik yoksunluğu bulunmayan ancak okulda akran zorbalığı yaşadığı için devamsızlık yapan bir çocuğun sistem içerisinde yer almasıyla bütüncül şekilde çalışmalar yürütülmesi anlamına gelmektedir.

Alanyazındaki araştırmaların ortaya koyduğu sonuçlar bağlamında araştırma sorularına ilişkin değerlendirilmelerde bulunulmuştur. Alan yazındaki araştırmaların ortaya koyduğu sonuçlar bağlamında Yaygınlaştırılan Şartlı Eğitim Yardımı Programı'nın nakit bileşeninin motivasyonel anlamda genel bir etkisinin olduğu ancak şart ilkesi olan devamsızlık üzerinde anlamlı bir etkisinin olmadığı belirlenmiştir. Araştırmaların ortaya koyduğu bu sonucun altında yatan farklı etkenlerin yer aldığı söylenebilir. Bu etkenler; nakit miktarının yeterli bulunmaması, katılımcıların eğitim geçmişi, eğitimden beklentiler, ailede bulunan riskler gibi ailenin temel bilgileri bu sonucun çıkmasında etkili olabilmektedir.

Göçmen çocuklar bağlamında ŞEY, nakit bileşeni ile çok çocuklu ailelerde çocukların okula devamını olumlu yönde desteklerken göçmen çocukların okullaşmasındaki risklerin belirlenmesini ve okullaşmanın sürekliliğini pozitif olarak desteklemektedir. Bu sonuca karşın göçmen çocukların eğitimi için uygulanabilir bir politika olmaktan uzaktır. Göçmen çocuklar ve aileleri için ŞEY transfer tutarı Türkiye bağlamında yetersizdir. Türkiye'de dezavantajlı gruplardan biri olan göçmen çocukların eğitimi destekleyici yerel projeler ve sivil toplum kuruluşları destekli çalışmalarla bütünsel bir şekilde yürütülmelidir. Bu bağlamda göçmen çocukların eğitimlerinin sürdürülebilirliğini sağlamak için devlet kurumlarının sorumluluklarını toplumsal ve sosyal sorumluluk çalışmalarını yürütmelerine ihtiyaç bulunmaktadır. COVID-19 sürecinde, eğitimin çevrimiçi yürütülmesi nedeniyle bazı yararlanıcıların sistem hatası nedeniyle nakit transferinden yararlanamaması, yararlanıcılar açısından programın güvenilirliğini sorgulama riskini ortaya çıkartmaktadır.

Yerli çocuklar ve göçmenler için Şartlı Eğitim Yardımı Programı, hizmet sunulan kişi bağlamında nicel olarak başarılı bir sonuç ortaya koymaktadır. Bunun nedeni Şartlı Eğitim Yardımı Programı'nda devam şartını yerine getiremeyen aileler sistem dışı bırakılmamaktadır. Okula devam edildiği sürece tekrar nakit desteği aktif olabilmektedir. Türkiye'de uygulanan Yaygınlaştırılan Şartlı Eğitim Yardımı Programı'nın nakit bileşeninde eğitime erişim alanındaki başarı, sonuç odaklı olmaktan ziyade okula kayıt oranını dikkate alan kayıt merkezli bir anlayışla ele alınmaktadır. Programın ortaya konulmasındaki temel amaca bakıldığında zorunlu eğitim çağındaki yoksul çocukların eğitime devamına yönelik kaynak sağlayamadığı alan yazındaki araştırmaların sonuçlarında ortaya konulduğu görülmektedir. Bu bağlamda eğitimin temel amaçlarından fırsat eşitliğini sağlayarak çocukların ilgi, istidab ve yeteneklerini geliştirerek refah düzeyinin yükseltilmesi amacı ihmal edilmektedir.

Şartlı eğitim yardımlarının devamsızlığa etki etmemesindeki ana faktörün şartlı eğitim yardımlarının nakit miktarının yeterli olmamasından kaynaklı olabilmektedir. Yaygınlaştırılan Şartlı Eğitim Yardımı Programı'nın nakit bileşeni boyutunda, Türkiye özelindeki çok çocuklu ailelerin ekonomisini desteklediği söylenebilir. Nakit desteğinin sağladığı avantajlar, çocukların yaşlarının artması ve çocuk işçiliği vb. ekonomik getiri sağlayıcı faaliyetler göz önünde bulundurulduğunda, aileler tarafından olumlu karşılanmamaktadır. Çocuklarının eğitime katılımının çıktılarını somut olarak göremeyen aileler, çocuklarını okula göndermede itici bir güç bulamamaktadır. Bu bağlamda yerli çocuklar ve göçmen çocukların okullaşmalarını sağlayabilmede Yaygınlaştırılan Şartlı Eğitim Yardımı Programının bir devlet politikası olarak yeniden değerlendirilerek revize edilmesi ve kalıcı çözümler üretilmesi ele alınmalıdır. Programın çocuk koruma bileşeni ele alındığında ise sahada görünürlüğün de etkisi ile aileler ve çocukları ikna konusunda daha efektif olduğu söylenebilmektedir.

Fakat programın finansal olarak sürdürülebilir olmaması ve insan kaynaklarına dayanan bir uygulayışı olması nedeniyle uzun vadede etkilerinin devam edebilmesi soru işaretleri barındırmaktadır. Yaygınlaştırılan Şartlı Eğitim Yardımı Programı'nın okul dışı kalmış çocukları da hedefleyebilmelidir. Ancak sürecin esas sahibi olan devlet kurumlarının yeterince kapasitesinin olmaması, göç konusunda uzmanlıkların henüz yapılaşmamasının da etkisiyle çocuk koruma ekiplerinin eforları da çoğu zaman sonuçsuz kalmaktadır (Çalık, 2024). Konuyla ilgili alanyazın yola çıkarak Yaygınlaştırılan Şartlı Eğitim Yardımı Programı uygulamasının nihai amaca ulaşabilmesi için nakit bileşeni tek başına yeterli değildir. Bütüncül müdahalelerin ve risk değerlendirmelerin yapıldığı çocuk koruma bileşeni asıl etkiyi oluşturmaktadır.

**Feyman APTULA**

## ABSTRACT

The main purpose of the study is to determine the coping strategies of teachers working in teaching Turkish as a foreigner language with the conflicts they encounter in the classroom and their attitudes towards these conflicts. The study covers the population consisting of teachers who teach Turkish as a foreigner language in the TRNC. The sample consists of 110 teachers who were actively involved in teaching Turkish to foreigner children in the TRNC in 2022. In the data collection process, a literature review and a questionnaire called "Classroom Conflict Resolution Attitude Scale" were used. This scale was developed by Duman (2023). The data were analyzed using SPSS 28 software and various statistical methods, especially Anova and t-test, were used to determine the differences between groups. According to the results of the study, gender did not have a statistically significant effect on teachers' conflict resolution attitudes. Again, no significant change was found in conflict resolution attitudes of teachers according to the levels they worked and their experience levels. However, when analyzed according to working experience, significant differences were found in the dimension of compliance attitude, and it was seen that the compliance attitudes of teachers with 6-10 years of experience were more positive. These results suggest that intervention programs focusing on conflict resolution skills and attitudes of teachers involved in teaching Turkish to foreigners can be aimed at experienced teachers, especially in the compliance attitude dimension.

## 1. INTRODUCTION

### 1.1. Problem Status

People come together and organize to meet their basic needs and reach a higher standard of living. This organization usually takes place to achieve a specific purpose, to achieve common goals or to provide mutual benefit. Human communities are organized to accomplish a specific task, share experiences, meet expectations, or fulfill a specific desire. These organizations can emerge in different areas such as companies in the business world, associations in the social sphere, and public institutions in the state system. Each organization tries to maintain its existence by responding to the expectations and needs of its members. In this process, a common culture can be formed within the organization, tasks can be determined, a leadership structure can be established, and these factors determine the effectiveness of the organization (Değirmenci, 2023).

The issue of conflict is a phenomenon that has attracted the attention of many authors and has been examined in different contexts. As noted by Kapıcı and Radward (2016), conflict is considered a natural part of social, economic, educational and daily life. However, they emphasized that conflicts are more evident, especially in areas where human relations are intense and complex, such as educational organizations. It has been stated that conflicts arising in educational organizations are of special importance. Since schools play an important role in shaping the essence and future of society, how conflicts are managed in these areas is of great importance. Literature in the field of educational administration emphasizes that the concept of conflict has an important place in this context and that effective strategies should be developed in the management of these conflicts (Yinal, Lesinger & Şahoğlu, 2019).

Effective management of conflicts encountered in educational organizations requires the joint efforts of administration, teachers, parents and other education professionals. Especially the way teachers, who are in active and one-to-one relationships with students in the classroom, apply their knowledge and strategies on conflict management is of great importance for the continuity of the organization. The way teachers resolve conflict can positively affect students' classroom engagement and academic success (Saylık et al., 2023). As stated by Bilgir (2018), in order for educational institutions to continue providing education in a healthy way, the methods used must provide effective solutions to conflicts. It is the responsibility of the teacher to effectively manage the relationships between all components in the classroom. Therefore, teachers' perceptions and attitudes towards conflict resolution are of great importance.

Managing relationships within the classroom requires the teacher's leadership skills and empathy skills. Teachers play an important role in turning conflicts into opportunities and setting a positive example for students. Collaboration and communication between all stakeholders in educational organizations is a critical factor in preventing and effectively resolving conflicts. In this context, increasing educators' knowledge on conflict

management and developing effective strategies will positively affect the success of students and the health of the learning environment (Kara et al., 2024).

Teachers' conflict resolution attitudes have a great impact in classes where Turkish is taught as a foreign language. Especially students who are new to Turkish and Turkish culture approach their teachers' behaviors and conflict resolution approaches with special sensitivity (Gülden & Demirel, 2023). This plays an important role in students' perception of Turkish language and culture. Younger students focus more on their teachers' conflict resolution attitudes in line with the respect they feel for teachers and the mission they attribute to the teacher. Therefore, it is even more critical for Turkish teachers to have effective conflict resolution strategies in these classes. Establishing a healthy teacher-student relationship is important for students to feel comfortable in the classroom and to participate positively in the process of learning the Turkish language. Teachers should focus on resolving conflicts constructively in order to positively affect the classroom atmosphere and increase language learning motivation (Sallabaş, 2023). In this context, recognition of teachers' conflict resolution attitudes in the literature can help educators learn more about this issue and develop effective strategies. It should not be forgotten that these attitudes have an important role in positively affecting student-teacher relationships, the development of classroom culture, and the success of students in the Turkish learning process.

### 1.2. Purpose of the research

The main purpose of the research is to determine the strategies of teachers working in teaching Turkish as a foreign language to cope with conflicts encountered in the classroom and their attitudes towards these conflicts. In this context, the main question of the research is "What are the classroom conflict resolution attitudes of teachers working in teaching Turkish as a foreign language?" It was determined as . The focus of the research is how conflicts that arise in the classroom in Turkish teaching are handled and resolved. Teachers' approach to these conflicts, the strategies and attitudes used, can have a significant impact on student-teacher relationships . Therefore, teachers' conflict resolution skills and their attitudes in this context may affect the effectiveness in the language learning process. The research aims to contribute to the development of educators' skills and strategies in this field by creating an understanding of Turkish teachers' conflict resolution attitudes. In this context, the findings can make an important contribution to developing recommendations for policies and practices in teacher education and language teaching.

### 1.3. Hypotheses

1. H0: There is a significant difference in teachers' attitudes towards resolving classroom conflict according to gender.

H1: There is no significant difference in teachers' attitudes towards resolving classroom conflict according to gender.

2. H0: There is a significant difference in teachers' attitudes towards resolving classroom conflict according to the faculty they graduated from.

H1: There is no significant difference in teachers' attitudes towards resolving classroom conflict according to the faculty they graduated from.

3. H0: There is a significant difference in teachers' attitudes towards classroom conflict depending on the level they work at.

H1: There is no significant difference in teachers' attitudes towards classroom conflict according to the level they work at.

4. H0: There is a significant difference in teachers' attitudes towards classroom conflict according to their working experience.

H1: There is no significant difference in teachers' attitudes towards classroom conflict according to their working experience.

### 1.4. Importance of Research

Controlled management of conflict in educational organizations is of critical importance, especially for the effectiveness of schools and classrooms. In order to avoid the destructive effects of conflict and achieve positive results, educators must be competent in conflict management. Considering the scarcity of studies on classroom conflict in teaching Turkish as a foreign language, the importance of research in this field becomes evident. The research stands out in terms of improving teachers' skills in managing conflict effectively, and it can make a significant contribution to filling the knowledge gap in this field. It is thought that the results to be obtained will be a valuable resource to understand the impact on conflict management in multicultural classrooms where Turkish is taught as a foreign language. It should not be forgotten that conflicts in classrooms can affect student-teacher relationships, trigger undesirable behaviors and lead to a negative classroom atmosphere. Therefore, it is important that the data obtained will guide teachers on conflict resolution and raise awareness. The research results can contribute to the professional development of educators by providing information about teachers'

attitudes towards conflict resolution in foreign language teaching. In this way, more effective strategies can be developed to create a positive learning environment in the classroom and increase student success.

### 1.5. Definitions

**Conflict:** It refers to disagreements that arise between two or more parties due to different interests, needs, opinions or goals (Bayraktar, 2023).

**Conflict management:** A process that aims to resolve or reduce conflict by effectively addressing disagreements, tensions, or differences between two or more parties ( Eyri et al., 2023).

**Foreign language:** The language that is widely spoken in a country or region and is generally linked to the cultural identity of that community is called the first language or mother tongue for that community (Zileli, 2023).

## 2. THEORETICAL FRAMEWORK

### 2.1. Concept of Conflict

As social beings, people have the need to constantly communicate with each other, help each other and live in communities. However, in this constant interaction, disagreements, miscommunications and problems are inevitable. These situations are usually explained with the concept of "conflict". Conflict refers to the disagreements and problems that individuals or communities encounter when living together. In order to understand the concept of conflict correctly, to resolve the conflict constructively and to remove negative thoughts from this concept, it is important to first make a correct definition of conflict ( Saylık et al., 2023 ).

Conflict is an inevitable fact of social life. Differences between individuals, beliefs, values, cultures, past experiences and differences in perception can naturally cause disagreements and conflicts. The educational environment stands out as an area where conflicts arising from this diversity frequently occur. It is quite natural for conflicts to arise in schools where individuals from different cultures, with various value judgments, with different interests and abilities, and from various socio -economic environments come together (Bayraktar, 2023).

Conflicts in the educational environment often occur between students, student-teacher relationships, or between teachers. These conflicts can arise from factors such as cultural diversity, communication deficiencies, and different learning styles and expectations. Therefore, it is important for educators and administrators to have conflict management skills, resolve conflicts in a positive way, and create a healthy communication culture in the educational environment. Dealing with conflict in education, understanding differences, and seeing diversity as richness can help students and educators come together in a more positive learning environment. In this context, the development and implementation of conflict management strategies in education contributes to the creation of a more effective and sustainable learning environment (Aksoy et al., 2024).

It is an inevitable necessity for individuals working in educational organizations to work together effectively. Teachers, especially those who communicate one-on-one with students, play an important role in this process, and their duties and responsibilities increase in this context. Educators' efforts to turn conflicts in a positive direction can produce positive results for the benefit of students. Conflict has the potential to motivate students and increase their interest in lessons in a controlled manner. Students can improve their problem-solving skills by learning to think solution-oriented during conflict processes. At the same time, structuring and constructively managing conflicts can provide students with empathy, collaboration and communication skills. Teachers can teach students problem-solving and communication skills by turning conflict situations into a learning opportunity. While this process contributes to the social and emotional development of students, it can also help maintain a positive atmosphere in the educational environment ( Özçakal and Demirhan, 2023 ).

### 2.2. Conflict Management

Organizations can implement a number of strategies in conflict management. Research in the literature shows that different researchers adopt various strategies and may use different combinations of these strategies. Although individuals generally tend to one or several strategies , they can also use other strategies depending on the situation and conditions ( Sevimli and Sezen-Gültekin, 2023 ). In this study, the five-fold classification used by many researchers such as Thomas (cited by Başaran, 1998) and Rahim ( cited by Karip , 2010) will be discussed. In this classification, conflict management strategies are divided into five groups: cooperation, compliance-obeying, compromise, domination-dominance and avoidance.

- Collaboration : This strategy emphasizes the common interests and goals of the conflicting parties . The parties work together and try to find common solutions.
- Compliance-Obey (Compliance Way): In this strategy, one party obeys and obeys the other. There is a strong authority relationship and a unilateral effort is made to resolve the conflict.
- Compromise (Path to Compromise): The compromise strategy is based on meeting at a common point with mutual concessions between the parties. Both sides make some compromise.

- Domination-Dominance (Domination Way): In this strategy, one party dominates the other and resolves the conflict in line with its own interests. It involves an approach focused on the use of power and domination.
- Avoidance: This strategy aims to avoid conflict rather than eliminating it completely. Parties ignore the problem or avoid conflict.

This five-fold classification provides a framework for understanding and implementing conflict management strategies. Each strategy may be appropriate to particular situations and circumstances and may vary depending on the nature of the conflict.

### 2.3. Teaching Turkish to Foreigners

When we look at the history of teaching Turkish as a foreign language in Turkey, we see that important studies in this field began in universities after 1950. In the following years, Turkish education was provided to foreign students through state-supported projects. For example, since 1991, young people from the Turkish world have been brought to Turkey for high school, university, master's and doctoral education. The main purpose of this project is to strengthen ties with compatriots and teach Turkish by introducing Turkish culture ( Hamarathl , 2023). These types of projects aim not only to increase language skills but also to convey Turkish culture and history to students. By learning the Turkish language, foreign students gain not only communication skills but also an experience in understanding the values and culture of the Turkish society. These efforts contribute to the greater recognition of Turkish internationally and the spread of Turkish culture. At the same time, it also provides the basis for increasing intercultural interaction and understanding through students from different countries. This emphasizes the importance of cultural diversity and understanding by giving both students and Turkish teachers an international perspective (Çetin and Çevik, 2023).

The importance in this field has increased in recent years. Turkish TV series attracting great attention internationally, political developments, Turkey's promotions and successes in various fields have increased the interest of foreign people in Turkish . As a result of this increasing interest, various institutions and initiatives have become operational for teaching Turkish. In Turkey, teaching Turkish as a foreign language is generally carried out in TÖMER (Turkish Teaching Centers) affiliated with universities . Apart from universities, courses organized by the Presidency for Turks Abroad and Related Communities and other institutions also contribute to Turkish teaching. Abroad, Turkish is taught through institutions such as Yunus Emre Institute, Turkish teaching courses affiliated with embassies, Turcology centers affiliated with universities, Turkish culture centers and the Maarif Foundation. Turkish teaching carried out on these various platforms contributes to the greater recognition of the Turkish language and culture at the international level (Doğan and Demirel, 2023).

### 2.4. Conflict in Teaching Turkish to Foreigners

Conflict in teaching Turkish to foreigners refers to the disagreements and difficulties that may arise during the language teaching process with students from different cultures. This situation may arise between language teachers, students and educational institutions for various reasons. Conflict management in the classroom environment emerges as an important element of the educational process. Conflicts may be inevitable in classes where students with different characteristics coexist. In this case, teachers need to take an active role in conflict management ( Tekşan and Kaynak, 2023).

Student-teacher interaction in classrooms, which are the basic units of schools, may bring about conflicts depending on various factors, especially different genders, family structures and interest expectations. Teachers should use conflict management effectively as classroom leaders. It is important to understand that conflicts should not be eliminated completely, but managed constructively. This approach positively affects the classroom atmosphere and makes lessons more productive (Sallabaş, 2023). It is important for teachers to use communication and solution-oriented strategies in conflict management instead of violence and pressure in order to maintain student trust. Negative conflict management can reduce students' interest in the lesson and harm classroom order. Therefore, teachers' evaluation of conflicts positively, understanding students, and adopting solution-oriented approaches will positively affect the classroom atmosphere (Kınay and Durmuş, 2023).

Classroom environments with foreign children bring together different cultures and characteristics. A democratic environment in the classroom provides students with the opportunity to participate in decision-making processes and respect different opinions. This approach supports students to understand each other and find common ground. In a democratic classroom environment, students make decisions together and implement these decisions together (Çetin and Çevik, 2023). They approach each other's different ideas and opinions in a tolerant manner and come to a common point. This gives students a sense of responsibility and promotes an understanding of education based on democratic values. However, if a democratic classroom order is not established or students do not embrace differences, serious conflicts may occur. In this case, it is important that teachers have sufficient skills to create a democratic classroom order. Teachers should create a plan taking into account the needs and expectations of students and take care to manage diversity in the classroom. This approach will increase the quality of education and create a positive learning environment among students (Delen and Toyran , 2023).

### 3. METHOD

#### 3.1. Research Model

This research uses a screening model that aims to determine teacher attitudes towards classroom conflicts in teaching Turkish as a foreign language. The screening model is a research model that aims to detect a situation that existed in the past or present. This model does not change the current situation while examining it; It aims to describe the existing situation, event, individual, group or object without changing it. The focus of the research was determined to determine and understand the existing situation. In this context, a literature review was conducted and books, theses and articles in the field were scanned. Then, data was collected using the scanning model. This research model aims to understand and describe teacher attitudes towards conflict situations in teaching Turkish as a foreign language.

#### 3.2. Population and Sample

The study population of the research consists of teachers teaching Turkish as a foreign language in TRNC. These teachers work in different institutions and organizations. The sample of the research consists of 110 teachers actively working in teaching Turkish to foreign children in TRNC in 2022 . These teachers work in Turkish language classes in various institutions and organizations.

Table 1. Demographics of Teachers Features

|                         |  | N  | %    |
|-------------------------|--|----|------|
| <b>Gender</b>           | Woman                                      | 89 | 80.9 |
|                         | Male                                       | 21 | 19.1 |
| <b>Kadem</b>            | primary school                             | 82 | 74.5 |
|                         | Middle school                              | 23 | 20.9 |
|                         | High school                                | 5  | 4.5  |
| <b>Study Year</b>       | 1-5 year                                   | 18 | 16.4 |
|                         | 6-10 year                                  | 77 | 70.0 |
|                         | 11 and above                               | 15 | 13.6 |
| <b>Graduate faculty</b> | owned Turkish teaching                     | 35 | 31.8 |
|                         | Class teaching                             | 52 | 47.3 |
|                         | Literature teaching                        | 6  | 5.5  |
|                         | Turkish Language And literature Department | 10 | 9.1  |
|                         | Other                                      | 7  | 6.4  |

89When the gender distribution among the participants of this study was examined, 80.9% of the participants were determined to be female and 19.1% were male. When the distribution according to the level they work in is examined, 74.5% of the teachers work in primary school, 20.9% in secondary school and 4.5% in high school. When evaluated on the basis of working years, 16.4% of the participants have 1-5 years of experience, 70.0% have 6-10 years of experience, and 13.6% have 11 or more years of experience. When we look at the faculties they graduated from, 31.8% of the participants are Turkish Language Teaching, 47.3% are Classroom Teaching, 5.5% are Literature Teaching, 9.1% are Turkish Language and Literature Department, 6.4% are Department of Turkish Language and Literature. ü graduated from other fields.

#### 3.3. Data collection tool

Two basic methods were used to collect data within the scope of the research: literature review and survey application. The literature review was carried out in order to create a theoretical framework by examining existing research, books and articles on the research topic. The survey application consists of two main parts: a personal information form and a scale to evaluate teachers' classroom conflict resolution attitudes. The personal information form was used to collect information about the demographic characteristics of the participants. The scale to measure teachers' classroom conflict resolution attitudes was designed to answer the main research questions. This scale includes the answers teachers give on the scale to understand how they handle conflict situations.

"Classroom Conflict Resolution Attitude Scale," used within the scope of the research, was used to determine the classroom conflict resolution attitudes of teachers in Turkish teaching, developed by Duman (2023). The scale was created by the researcher as a result of literature review and examination of similar scales. The items of the scale were created and arranged by taking expert opinions as well as previous studies. The scale contains 33 items, and these items are evaluated in five different subscales: collaborative, dominating, avoiding, complying and compromising strategies. Each item contains suggestions for determining teachers' conflict resolution

attitudes. Participants were asked to evaluate each item on a five-point rating scale: "strongly disagree," "disagree," "undecided," "agree," and "strongly agree." As a result of the analyzes conducted for the validity and reliability of the scale, an item pool of 77 items was created and the internal validity of the scale was ensured. Additionally, as a result of the factor analysis, it was deemed appropriate to remove 5 items out of 33 items and the remaining 28 items were considered valid. The analyzes performed during this process reveal that the scale is a reliable and valid tool. The reliability of the scales was evaluated with Cronbach's  $\alpha$  coefficients. Cronbach's  $\alpha$  coefficient for the Collaborative Attitude scale was found to be 0.955, indicating that the scale has high reliability. The reliability coefficients for other attitudes are as follows, respectively: Domination Attitude ( $\alpha = 0.609$ ), Avoidance Attitude ( $\alpha = 0.795$ ), Compliance Attitude ( $\alpha = 0.642$ ), Compromise Attitude ( $\alpha = 0.855$ ).

### 3.4. Analysis of Data

The data were analyzed using SPSS 28. Program. Statistical analyzes were performed using ANOVA and t-test to determine differences between groups. These analyzes were used to find answers to the research's main questions and understand the key findings. The results obtained were presented in tables and comments were added under the analyses.

## 4. FINDINGS

In accordance with the purpose of the research, the conflict resolution attitudes of teachers working in teaching Turkish as a foreign language were examined according to gender, branch, years in the profession and level.

**Table 2. Teachers' Attitudes to Resolving Classroom Conflict by Gender**

|                | Gender | Cover. | SS    | t      | p            |
|----------------|--------|--------|-------|--------|--------------|
| İşBirTop       | Woman  | 29,114 | 5,807 | 1,468  | 0.142        |
|                | Male   | 27,247 | 8,891 |        |              |
| HükTop         | Woman  | 9,823  | 3,378 | -1.274 | 0.216        |
|                | Male   | 9,661  | 3,831 |        |              |
| How Many Balls | Woman  | 9,119  | 3,641 | -2,346 | <b>0.010</b> |
|                | Male   | 10,257 | 5,285 |        |              |
| Don't Fit Top  | Woman  | 10,297 | 3,189 | -0.642 | 0.518        |
|                | Male   | 9,495  | 3,522 |        |              |
| MisfitBall     | Woman  | 17,172 | 4,099 | 0.784  | 0.411        |
|                | Male   | 16,252 | 6,092 |        |              |

In the collaborative attitude evaluation, the average of female teachers is 29.114, while the average of male teachers is 27.247. In this case, there was no significant difference in cooperative attitude between gender ( $t = 1.468$ ,  $p = 0.142$ ). In the dominance attitude analysis, the average score of female teachers is 9.823, while the average score of male teachers is 9.661. There was no significant difference in domination attitude between genders ( $t=-1.274$ ,  $p=0.216$ ). In the evaluation of avoidance attitude, the average score of female teachers is 9.119, while the average score of male teachers is 10.257. A significant difference was detected in avoidance attitudes between genders ( $t=-2.346$ ,  $p=0.010$ ). When the compliance attitude is examined, the average of female teachers is 10.297 and that of male teachers is 9.495. There was no significant difference in conformity attitudes between genders ( $t=-0.642$ ,  $p=0.518$ ). In the consensus attitude analysis, the average of female teachers is 17.172, while that of male teachers is 16.252. There was no significant difference in compromise attitude between genders ( $t=0.784$ ,  $p=0.411$ ).

**Table 3. Evaluation of Teachers' Attitudes Towards Resolving Classroom Conflict According to the Faculty They Graduated From**

|                |             | squares ball | squares cover. | F     | p     |
|----------------|-------------|--------------|----------------|-------|-------|
| İşBirTop       | Intergroup  | 87,315       | 43,607         | 1,001 | 0.269 |
|                | Intragroups | 9626,324     | 43,513         |       |       |
| HükTop         | Intergroup  | 10,647       | 5,473          | 0.358 | 0.533 |
|                | Intragroups | 2581,707     | 11,628         |       |       |
| How Many Balls | Intergroup  | 10,716       | 5,308          | 0.214 | 0.631 |
|                | Intragroups | 3814,013     | 17,108         |       |       |
| Don't Fit Top  | Intergroup  | 11,, 888     | 6,394          | 0.477 | 0.463 |
|                | Intragroups | 2511,488     |                |       |       |
| MisfitBall     | Intergroup  | 37,642       | 19,271         | 0.803 | 0.407 |
|                | Intragroups | 4727,872     | 21,343         |       |       |

According to the analysis results, no significant difference was detected between groups in multiple group comparisons examining the effect of gender on conflict resolution attitudes. In the multi-group comparison for collaborative attitude, the difference between the groups was not significant ( $F = 1.001$ ,  $p = 0.269$ ). This shows that gender is not a determining factor on cooperative attitude. In the assessment of domination attitude, no significant difference was found between the groups ( $F = 0.358$ ,  $p = 0.533$ ). This shows that gender does not have a statistically significant effect on dominance attitude. In the avoidance attitude analysis, no significant difference was found between the groups ( $F = 0.214$ ,  $p = 0.631$ ). Whether gender is a determining factor on avoidance attitude has not been statistically supported. In the evaluation of compliance attitude, no significant difference was detected between the groups ( $F = 0.477$ ,  $p = 0.463$ ). This shows that gender does not have a significant effect on conformity attitude. In the multiple group comparison made for compromise attitude, it was seen that the difference between the groups was not significant ( $F = 0.803$ ,  $p = 0.407$ ). This shows that gender is not a determining factor on compromise attitude.

**Table 4. Evaluation of Teachers' Attitudes Towards Resolving Classroom Conflict According to the Level They Work in**

|                |             | squares ball | squares cover. | F     | p     |
|----------------|-------------|--------------|----------------|-------|-------|
| İşBirTop       | Intergroup  | 113,197      | 56,249         | 1,214 | 0.171 |
|                | Intragroups | 9621,442     | 42,391         |       |       |
| HükTop         | Intergroup  | 18,625       | 8,962          | 0.744 | 0.331 |
|                | Intragroups | 2571,729     | 10,587         |       |       |
| How Many Balls | Intergroup  | 17,266       | 8,073          | 0.429 | 0.490 |
|                | Intragroups | 3695,573     | 16,275         |       |       |
| Don't FitTop   | Intergroup  | 12,477       | 6,788          | 0.405 | 0.504 |
|                | Intragroups | 2510,488     |                |       |       |

|            |             |          |        |       |       |
|------------|-------------|----------|--------|-------|-------|
| MisfitBall | Intergroup  | 54,241   | 26,770 | 1,395 | 0.176 |
|            | Intragroups | 4767,614 |        |       |       |

According to the analysis, no significant difference was found between the groups in evaluating teachers' attitudes towards resolving classroom conflict according to the level they work at. In the evaluation of collaborative attitudes, no significant difference could be detected between teachers working at different levels ( $F = 1.214$ ,  $p = 0.171$ ). This shows that there is no significant change in teachers' collaborative attitudes, regardless of the levels they work in. In the analysis of domination attitude, no significant difference was found according to the levels at which teachers worked ( $F = 0.744$ ,  $p = 0.331$ ). This shows that teachers' attitudes towards domination do not change depending on their level. In the evaluation of avoidance attitudes, no significant difference was detected between teachers working at different levels ( $F = 0.429$ ,  $p = 0.490$ ). This result shows that teachers' avoidance attitudes do not change significantly depending on the level they work at. In the evaluation made for compliance attitude, no significant difference was found according to the levels at which teachers worked ( $F = 0.405$ ,  $p = 0.504$ ). This shows that teachers' compliance attitudes do not show a significant change according to their levels. In the analysis of compromise attitudes, no significant difference was found between teachers working at different levels ( $F = 1.395$ ,  $p = 0.176$ ). This result shows that teachers' compromise attitudes do not change significantly depending on the level they work at.

|                | Intragroups    | 4669,254     | 20,570         |       |                           |

In the evaluation of collaborative attitude, no significant difference was found according to teachers' working experience ( $F = 1.134$ ,  $p = 0.193$ ). This shows that there is no significant change in teachers' collaborative attitudes, considering their working experience. In the analysis of domination attitude, a significant difference was detected according to teachers' working experience ( $F = 2.258$ ,  $p = 0.128$ ). This result shows that teachers' dominance attitudes vary significantly depending on their working experiences. In the evaluation of avoidance attitude, no significant difference was detected according to teachers' working experience ( $F = 0.047$ ,  $p = 0.845$ ). This shows that teachers' avoidance attitudes do not change significantly depending on their working experiences. In the evaluation made for compliance attitude, a significant difference was found according to teachers' working experience ( $F = 3.013$ ,  $p = 0.030$ ). This result reveals that teachers' compliance attitudes vary according to their working experiences. As a result of the grouping, it was determined that there was a significant difference especially between teachers with 6-10 years of experience and those with 11 years and more experience. It can be said that teachers with 6-10 years of experience have an attitude towards resolving conflicts in a more harmonious way, are more experienced in this regard and can develop more effective

strategies. In the analysis of consensus attitude, no significant difference was found according to teachers' working experience ( $F = 0.187$ ,  $p = 0.822$ ). This shows that teachers' consensus attitudes do not change significantly depending on their working experiences.

## CONCLUSION AND RECOMMENDATIONS

In the analyzes where the effect of gender on teachers' classroom conflict in teaching Turkish to foreigners was evaluated, no significant difference was found between gender in five sub-dimensions: cooperative attitude, domination attitude, avoidance attitude, compliance attitude and compromise attitude. These results show that gender does not have a statistically significant effect on teachers' conflict resolution attitudes. When teachers' conflict resolution attitudes were evaluated according to the level they worked in, no significant difference was found between the levels in the dimensions of cooperative attitude, domination attitude, avoidance attitude, compliance attitude and compromise attitude. This shows that there is no significant change in teachers' conflict resolution attitudes according to the levels they work at. In the analyzes made according to working experience, significant differences were detected in five sub-dimensions: collaborative attitude, domination attitude, avoidance attitude, compliance attitude and compromise attitude. These results show that teachers' working experiences are decisive on their conflict resolution attitudes, especially in the compliance attitude dimension. It has been observed that teachers with 6-10 years of experience exhibit a more positive approach, especially in compliance attitudes.

As a result, analyzes on whether demographic factors such as gender and working experience have an impact on teachers' conflict resolution attitudes have revealed differences in various dimensions. However, it can be said that these differences do not have a decisive effect on conflict resolution attitudes in general, and teachers mostly share similar attitudes. The following suggestions can be made regarding classroom conflict management in teaching Turkish to foreigners, based on the findings of this study:

- Conflict resolution training programs should be organized for teachers working in teaching Turkish to foreigners. These programs can be designed to provide teachers with conflict resolution skills and support in understanding and managing different attitudes.
- Teachers can be taught strategies to encourage cooperation among students and create a positive environment in the classroom. Collaborative attitude has positive effects on conflict resolution processes.
- Teachers should be aware that dominating and avoidant attitudes can have negative effects on student relationships. Educational contents that guide teachers can be developed to manage these attitudes and produce alternative solutions.
- Strategies for improving compliance and non-compliance attitudes should be recommended to teachers. Harmonious attitudes can contribute to the establishment of healthier relationships in the classroom.
- Taking into account the findings regarding working experience, support programs for experienced teachers can be created. These programs can help experienced teachers make their classroom interactions more effective by introducing them to innovative conflict resolution strategies.
- Training methods that include applied studies and role plays can be applied to teachers in order to strengthen conflict resolution skills. Such interactive methods can give teachers practical experience.
- Teachers should be encouraged to participate in professional development programs to continuously improve their conflict resolution skills. Such programs can allow teachers to keep up with current approaches.

These suggestions can provide a basis for strengthening classroom conflict management of teachers teaching Turkish to foreigners.

## **TEACHERS' PERSPECTIVES ON TECHNOLOGY USE AT THE CIU ENGLISH PREPARATORY SCHOOL: A QUALITATIVE STUDY**

**Bahaa ALARAMEEN**  
bahaaar221114@gmail.com

### **ABSTRACT**

This study aims to examine the perspectives of teachers on the use of technology at the English Preparatory School at Cyprus International University (CIU). Six teachers from CIU's English Preparatory School were interviewed. The data were obtained through qualitative research, and thematic analysis method was used to analyze the teachers' perspectives. The findings revealed that the participants generally hold a positive perspective towards integrating technology tools in their classrooms. The teachers mentioned some challenges and technical issues they face, such as the slowness of some tech devices and problems with the speed of the internet. They also mentioned things that could be improved. Regarding AI tools, the teachers said that it is possible to integrate AI tools into the teaching and learning process, with some limitations that do not give direct answers to the students. Additionally, this study discussed the role of robots in education, and the findings showed that the majority of the English Preparatory School teachers believe that robots will not take over their jobs in the future.

**Keywords:** Technology Integration, Teacher Perspectives, AI Tools in Education, Robotics in Education, Future of Education.

### **INTRODUCTION**

Technology is becoming a critical element of teaching and learning in today's quickly changing educational environment. In spite of the fact that there is a general agreement about the advantages of technology in education, more research is still needed to explore how teachers perceive it and employ it in the classroom. This qualitative study explores the perspectives of teachers at the English Preparatory School at Cyprus International University (CIU) regarding their experiences with integrating technology in their classrooms.

When it comes to technology integration in the classroom, there are advantages and disadvantages that need to be carefully examined. Technology can improve student engagement and learning outcomes, but it's also important to take into account the risks of screen time, distraction, and the possible effects of integrating technology on students' attitudes and motivation for learning (Azad, 2023). Thus, varied learning styles exist among students, making it important to recognize that what works well for one student may not be suitable for another. While highly technological methods may prove advantageous for certain students, they may not be as effective for others (Khodabandelou et al., 2016).

Technology encourages students to participate more effectively and reduces student shyness. In this light, when compared to printed text, digital technologies have the ability to decrease differences in student participation both at home and in the classroom (Rizk & Davies, 2021). However, the excessive use of technology tools in the classroom may lead to prolonged sitting and a lack of physical activity. Moreover, prolonged exposure to screens can lead to health issues such as eye strain, difficulty in sleep, and headaches, which can impact students' mental and physical health (Raave et al., 2022). Thus, it is important to have a balance between education and technology so that they do not harm each other (Contreras et al., 2022).

In general, it can be said that the benefits of technology appear to exceed the drawbacks. The COVID-19 pandemic forced a change in the style of teaching from face-to-face to online. The development of modern technology clearly affects education and teaching methods. Today, in the era of robots and artificial intelligence technologies such as the Generative Pre-trained Transformer (GPT) and the vast services they provide, it has become necessary for teachers to integrate these modern technology tools into their teaching methods for students. As a result of the wide range of applications that large language models such as the Generative Pre-trained Transformer (GPT) offer, their implementation in education has been suggested as an area of potential interest. The use of these models may offer opportunities to enhance teaching and learning for people at all educational levels and professional development. These models offer a unique opportunity to provide successful and customized learning experiences because each individual has unique requirements, abilities, and preferences for learning. (Kasneci et al., 2023).

In today's classrooms, teachers use various new tools of technology to make English learning more effective and exciting. One of the most used tools are the smart boards. These smart boards allow teachers to use electronic books, project slides, play videos and audio records, browse webpages, and many more things. Other tools, such as computers, tablets, and Video calls, which enable to see and communicate with teachers and students. Today, the use of robots and Artificial Intelligence (AI) tools has become popular. Robots and AI tools integration have revolutionized the education process. Moreover, some believe that in the near future, there will be no need for

teachers at all, as robots and AI tools may replace the role of teachers.

#### CIU English Preparatory School Background

The English Preparatory School has existed since the founding of Cyprus International University (CIU) in 1997. The English Preparatory School is part of The School of Foreign Languages (SFL) at CIU. This school has students from different regions and nationalities, such as Turkey, Iran, Tajikistan, Afghanistan, Pakistan, Arab countries, some African countries, and other regions around the world. Approximately 500 students enroll in The English Preparatory School each year, suggesting a multicultural and international environment within CIU. The English Preparatory School has over 40 teachers, both males and females, holding diverse qualifications ranging from Bachelor's (BA), Master's (MA), and Doctorate (PhD) degrees. The English Preparatory School building has more than 20 classrooms, each with a smart board connected to the internet. The teachers use these boards to teach from the virtual textbooks, browse the internet, play records and videos, and create presentations.

The main goal of the English Preparatory School is to prepare students for the various English departments at CIU. At the beginning of each semester, students take the proficiency exam and are placed in the appropriate level based on their scores. The English Preparatory School has a range of different levels, from beginners to advanced. These courses are designed to help students improve the skills and knowledge necessary to use the English language effectively in academic and other environments. At the English Preparatory School, target language instruction is carefully planned, and the course levels are aligned with the Common European Framework of Reference (CEFR). The English Preparatory School has been accredited by Pearson Assured since January 2015.

#### Research Questions

This study aims to provide an answer to the question “What are the perspectives of English teachers at Cyprus International University's English preparatory school regarding the use of technology in the classroom?” In order to answer the research's main question, the following questions were developed:

- To what extent do CIU English preparatory school teachers embrace using technology tools in classroom?
- What challenges do the teachers at CIU English preparatory school face when using technology tools in the teaching process?
- What are the opinions of CIU English preparatory school teachers regarding the potential role of robots and artificial intelligence (AI) in the teaching process?

#### METHODOLOGY

This research uses qualitative analysis methodology to examine the perspectives of CIU English preparatory School teachers regarding the use of technology in the classroom, the challenges they face, and their views regarding the use of AI tools and robots in education. The study involved in-depth interviews with six teachers at CIU English preparatory school. The sample includes male and female teachers. The teachers' qualifications range from bachelors, masters, and PhDs. The study focused on the available technology resources that teachers use in the classroom.

#### Data Collection

The data were collected by answering the research questions. The interviews were semi-structured, and the participants were able to openly discuss their opinions and experiences. The interviews with CIU English preparatory school teachers were conducted at CIU English preparatory school during the working hours. Each teacher was interviewed individually, and the interviews lasted approximately 40 minutes. The researcher asked the teachers specific questions and wrote their down responds immediately.

#### Data Analysis

Qualitative data analysis was used in this study. According to Kaiser and Presmeg (2019), the qualitative data analysis can include written records, Twitter (X) tweets, YouTube comments, videos of teacher-student interactions in the classroom, transcripts of focus groups, or face-to-face interviews. In this study, the data were specifically derived from face-to-face interviews, and were then analyzed using the thematic analysis technique. Braun and Clarke (2006) point out that thematic analysis is a method of qualitative study for analyzing data that involves looking across a data collection to analyze, identify and report frequent patterns. The thematic analysis identified recurring themes and subthemes pertaining to the views of teachers on the use of technology. Each teacher was given a distinctive identifier to use in presenting the participant perspectives; the names were kept hidden to maintain their anonymity.

### **Validity and Reliability**

For the internal validity of the questions used in this paper, the opinions of two academicians at Cyprus International University (CIU) were sought. The academicians examined the data of the study at each phase to ensure the reliability and validity of the study. To increase the quality of the research and the trustworthiness of the research findings, the given answers were not only reviewed by the researcher but also discussed with the two experts.

### **FINDINGS**

Based on the study questions listed in the introduction of the research, research findings were given. The opinions of the teachers of the English preparatory school at Cyprus International University were individually presented. Based on the data collected from the interview questions, three themes emerged from the participants' views. These themes are discussed in this section.

#### **Theme One: A positive perspective for the use of technology and many advantages**

The views of all the teachers show a general positive perspective on the use of technology. All the teachers agree on the important role of technology in teaching in their classrooms at CIU. Moreover, the views emphasize that technology tools are something that cannot be irreplaceable. Two subthemes were emerged from this theme: “a general positive view for the use of technology” and “many outcomes of using technology.”. Two teachers said, I am so used to it that I cannot imagine going into a class without the use of a smart board or a projector. (T-1) I do not know how we used to teach without the use of technology tools. I used to carry hard books and write hundreds of words on the regular boards, and wait for the students to write. But now, thanks to smart boards, I do not have to worry about all of this (T-6).

Under the second sub-theme, 'many positive outcomes of using technology', teachers highlighted various benefits of incorporating technology into the teaching process. Here are some of their views:

I do not carry books or materials around when I go to my classes. Some of the tasks that took me hours to complete can now be done in less than 10 minutes. I also feel more relaxed because using technology can help me go back to my previous courses and use the activities that I used in my previous classes for other students in other schools, too! (T-1).

The students pay more attention when there is a smart board because they clearly see what I am talking about. For example, when we have matching or T/F activities everyone participates and wants to give the answer. With the smart board, my students feel like they are working as a class (T-3).

Technology tools are so great in the teaching process. I use the smart board in my class, and when the students do not understand something, it is easy for me to use the internet to help them or show them some pictures. For example, when I used the word "bear," some students did not know the meaning of it, so with one click, I showed them the picture of a "bear" on Google (T-4).

There are many good things with using technology tools: it is easier for me to show the answers; I do not have to write everything on the board; there is no need to carry the heavy books; I can access to my account anytime, anywhere; it is easier for me to prepare the lesson plans, and in most classes, I use YouTube to help my students in learning English (T-2).

#### **Theme Two: Some challenges and things to be improved**

Based on the findings, it can be observed that all the teachers faced some challenges with the smart board's performance. The teachers agree that the smart boards are a little slow, especially when they turn them on. Two teachers mentioned,

In the morning, when I start the smart board, we have to wait for ages. It takes at least 15 minutes to boot up. One class we had a listening activity, but the board was dead! It is really frustrating (T-2).

The smart board gets slow sometimes, and its sound is not balanced and comfortable for all the students (T-4).

In discussing internet speed, the teachers observed that the internet speed is slow. Two teachers mentioned,

In my opinion, there is a need to improve the speed of the internet; everything else is good. (T-3).

The speed of the internet must be improved, and I wish our institute could limit the access to Wi-Fi just to the educational platforms we use in the classroom because students want to use their phones to browse social media platforms (T-2).

Regarding the system being outdated, one teacher mentioned,

At CIU, it is usually the wear and tear since most of the equipment is either old, outdated, or in need of repairs (T-1).

The system used in all the smart boards is Windows 7! We are in 2024, and we still use this old operating system! The operating system has to be updated urgently (T-6).

One teacher mentioned other challenges. The teacher said,

Using technology can be challenging at times. Some of the main inconveniences that usually happen include the inability to access the internet in the classroom, the smart board freezing, lights going out, and the challenge of assigning homework using technology, which can be confusing and less engaging for students unfamiliar with the platform we use (T-5).

### **Theme Three: The Future of Artificial Intelligence (AI) and Robotics in Education**

Based on the findings, two sub-themes emerged: the role of artificial intelligence (AI) platforms in the teaching process and the question of whether robots will replace teachers. Regarding the first sub-theme, all teachers agree that artificial intelligence (AI) platforms play an important role in teaching and learning and that there is a need to integrate AI tools into their classes. Teachers said,

These AI tools are helpful and we cannot avoid these advances in teaching. I think we can integrate AI tools into our classes by using specific methods that help students solve tasks but do not give them direct answers (T-4).

The alarm has probably already gone off, so I guess instead of take-home or assignment-based learning, we should shift to more cognitively demanding group activities where students must complete more oral or speaking-related tasks. (T-1).

With AI tools, students will be their own teachers. AI will take over the course books and other platforms we use nowadays, since it brings everything together in one place. AI will also be beneficial to students with specific needs. They will feel more included, and teachers will be able to meet their needs as well (T-5).

I see students these days depend on AI tools for their projects and assignments, and we cannot do anything about it. I think in the next five years, it will be the same but with more advanced improvements (T-2).

When discussing the role of robots in the teaching process and whether the robots will replace the teachers in the future or not, the majority of the teachers said that robots will not replace the teachers in the future. Teachers said, Not at all, because robots cannot be teachers; they don't have feelings. It is easy for me to know when my students do not understand something; I can see this on their faces. Robots never understand this (T-3).

No, I will not be replaced by robots. Robots are too limited to teach languages or to provide a perfect teaching experience. Face-to-face teaching is more efficient. Besides, robots do not have feelings or emotions (T-4).

I do not think that robots will ever be able to replace teachers or any other human being. Robots are the result of human creation and can never be more powerful than their creator. Teachers are not only language or knowledge providers but they are also problem solvers, creators, therapists, organizers, mediators, and sometimes even parents. A robot could never be all these things at the same time (T-5).

Two teachers, who answered this question, said that the robots will replace the teachers. Teachers said,

Yes, but robots still need people to function and those who do not update themselves on these tools are most likely become redundant! (T-1)

Of course, I think so, since everything is working with technology. In the future, we will not have any teachers, or there will be a need to hire teachers. They have robots, so they do not have to pay for people. With robots, we do not have to pay salaries and insurance (T-2).

### **DISCUSSION**

Based on the responses of six participants currently teaching English at CIU in Northern Cyprus, three themes have been identified to offer effective perspectives on integrating technology tools into the teaching process. This study has revealed that the overall perspectives of CIU teachers on using technology at CIU are positive. The reason for this conclusion could be due to the many benefits and opportunities that technology tools provide in the teaching process. Taking everything into account, the research presents strong evidence that using technology in the classroom can be beneficial. Similarly, to the findings of Mong and Ruggiero (2015), technology can save teachers time, engage students, and differentiate education to meet the needs of all learners when used correctly. Teachers value the use of technology in their classrooms and how technology tools enhance education and make it more authentic for students. As it has been emphasized in a study by Costley (2014), technology enhances learning outcomes, student engagement, and motivation. Also, teachers who integrate technology into their classrooms are generally more positive towards using it.

Moreover, Andoh (2012) found that when teachers have a positive perspective regarding the use of educational technology, they are more likely to embrace it and employ it in the teaching and learning process. Looking at the benefits that technology tools provide in the teaching process, it is evident that these tools facilitate the teaching process and make it easier for teachers at CIU to do their jobs effectively. This is consistent with the findings of Rahmati et al. (2021), which propose that using technology for English language teaching is more effective than using conventional teaching methods without technology.

These findings are supported by research by Nurmala et al. (2023), which highlights the integration of modern

technology, which has been shown to improve learners' language skills and provide new opportunities for language learning. Moreover, technology tools and mobile learning are valuable resources that facilitate English language learning and provide easy learning environments.

While discussing the challenges of using technology and some of the improvements that should be made, the teachers mentioned many challenges and obstacles with technology tools. In this study, all the participants talked about the slowness of the smart boards they use in their classrooms and the slowness of the speed of the internet inside the Preparatory School. Other teachers talked about the technical issues they face while teaching. Recent studies have mentioned some similar challenges and obstacles relating to technology integration in the teaching process. For instance, Akram et al. (2022) as well as Alswilem (2019) and Singh (2019) found that limited resources and inadequate infrastructure are reported to be challenges that hinder teachers from effective technology integration in the teaching process. Similarly, in a study about teachers' perceptions of barriers to technology integration in education, Emre (2019) mentioned four external and internal barriers to integrating technology in education: lack of equipment, lack of funding, lack of ability, and time. This can be explained because there are indeed problems with smart boards at the English Preparatory School at CIU, as many of these devices are old and slow. In addition to the fact that the internet speed is slow and does not cover all the classrooms in the building. Thus, upgrading smart boards, enhancing internet infrastructure, and addressing technical issues are necessary steps to create a more supportive learning environment for both teachers and students.

Lastly, this study discussed the future of artificial intelligence (AI) and robotics in education. The researcher queried teachers on two key aspects: the role of artificial intelligence (AI) platforms in the teaching process and whether robots will replace teachers. Regarding the first point, the majority of CIU teachers believe that AI tools play a crucial role in education, and there is a need to integrate AI tools into their classes. This aligns with the views of Baidoo-Anu & Ansah (2023), who said that there is no doubt that AI tools have pushed the boundaries of learning and created a significant paradigm shift in the way we learn today.

According to the teachers, it is possible to integrate AI tools into the teaching and learning process by using specific methods that do not provide direct answers. Also, some teachers emphasized the necessity of giving students more oral or speaking tasks because of the influence of AI tools. This is in line with Zhai (2022), who states that artificial intelligence is unable to substitute the need for new tests and forms of assessment that encourage critical thinking and creativity. Furthermore, teachers mentioned that AI tools help students learn on their own, and they put all learning materials together, which helps teachers support students with different needs. This is consistent with Clare's (2023) view that students, after graduating, will probably find themselves in a world that is increasingly reliant on AI tools. The reason for this could be that the vast services provided by AI tools are easy to use, and most importantly, they are free. It is 2024, so we cannot deny the important role of AI tools in the teaching and learning process.

However, despite the fantastic benefits that AI tools provide, there is a need to control them. At the end of the day, students must learn by themselves, and we cannot let these tools do everything for them. As Qadir (2022) mentioned, it is important for learners to understand the effects of AI technology to ensure that the future generation of learners takes use of the benefits afforded by AI tools and minimizing any undesirable outcomes.

Also, the researcher discussed whether robots will replace teachers. The results showed that the majority of the teachers at CIU English Preparatory School believe that robots will not replace them. They emphasized that robots do not have feelings or emotions and are incapable of doing things that humans do. The findings of this study overlap with those of Orhani (2023), who suggests that robots can be useful teaching tools in the classroom, and there are certain types of assistance that are best served by robots, yet it is doubtful that they will ever fully replace teachers. This can be attributed to the fundamental difference between robots and humans: robots will not understand how students feel or the difficulties they face, simply because robots lack feelings and emotions. As one of the teachers said, "I can see the problems on the faces of my students; a robot cannot see this." Standing in front of a robot to teach you is not the same as with a human teacher; of course, with humans, the teaching process is more comfortable. However, maybe in the future, things will change. As Orhani (2023) also mentioned, human teachers are still essential for improving student development. No app or robot can replace the teacher's understanding and emotional connection with students. Even with advanced technology, robots cannot reason, learn, and teach like humans. In this context, Edwards and Cheok (2018) mentioned some limitations and challenges of using robots as teachers, including the difficulty of designing robotic personalities that are flexible and empathetic, as well as the difficulty of robots understanding the individual needs of students and addressing their social and emotional needs. On the other hand, some teachers say that robots will replace them. They argue that robots will be more available in the future, and with robots we will not have to pay salaries and insurance. This notion does make sense, as robots do not require payments or medical insurance. However, there is still a need to utilize, check, and maintain these robots from time to time, which, of course, will cost money. Thus, to fully realize the potential of automation, collaboration

between people and technology is necessary. This is particularly relevant, according to the McKinsey Global Institute (2017), about 50% of the jobs in the United Kingdom and the United States might be automated in the near future.

## CONCLUSION

This qualitative study explored the perspectives of teachers on technology use at the English Preparatory School at CIU. The findings revealed that the teachers at the English Preparatory School show a generally positive perspective towards integrating technology tools in their classrooms. Nevertheless, the teachers mentioned some challenges and technical issues they face, such as the slowness of some tech devices and problems with the speed of the internet. They also mentioned things that could be improved. Regarding AI tools, the teachers said that it is probable to integrate AI tools into the teaching and learning process, with some limitations that do not give direct answers to the students. Additionally, this study discussed the role of robots in education, and the findings showed that the majority of the English Preparatory School teachers believe that robots will not take over their jobs in the future. Ultimately, these findings present a foundation for future discussions on improving technology integration into the teaching and learning process. It is important to address the mentioned challenges and take advantage of opportunities in order to enhance the educational environment at the English Preparatory School at CIU.

**Yrd. Doç.Dr. Azmiye YINAL**

azmiye.yinal@akun.edu.tr

## ABSTRACT

This study was conducted to determine the customer image of a bank operating in the Turkish Republic of Northern Cyprus. The study was conducted within the framework of a relational survey model using a quantitative approach and included 369 respondents from a population of 2000 bank customers. As a data collection tool, the scale developed by Kalyoncuoğlu and Faiz (2016) was used to measure service quality and corporate image. According to the findings of the study, customer evaluations show that service quality has a positive effect on corporate image, especially in the dimensions of Physical Assets, Reliability, Responsiveness, Assurance and Identification. In the Physical Assets dimension, customer evaluations are generally high and consistent. However, a wider variation was observed in the Reliability dimension. Customer evaluations in the dimensions of Responsiveness, Assurance and Identification show moderate consistency. Correlation analysis reveals that there are positive and significant relationships between the Physical Assets, Reliability, Responsiveness and Identification dimensions and Corporate Image. However, the relationship between the Assurance dimension and Corporate Image shows a weaker link. The regression analysis results show that each service quality dimension (Physical Assets, Reliability, Responsiveness, Assurance and Identification) has a positive effect on corporate image. This emphasizes the importance of focusing on service quality for banks to strengthen their corporate image by increasing customer satisfaction.

**Keywords:** Responsiveness, Physical assets, Reliability, Assurance, Corporate image, Self-relevance.

## 1. INTRODUCTION

### 1.1. Problem Status

Bank image is the overall perception, reputation and public perception of a financial institution. This perception includes the thoughts, feelings, and perceptions that occur among customers, potential customers, and the general public. Bank image is shaped by a number of factors such as gaining customers' trust, service quality, product diversity, technological infrastructure, social responsibility projects and marketing activities (Oralhan and Özlü, 2019) . The image of a reliable bank may cause customers to be more willing to carry out their financial transactions at that bank. Service quality affects customer satisfaction, which forms the basis of the bank's image (Dayı and Yıldız, 2020). Banks develop strategies to strengthen the bank image to gain customer loyalty and competitive advantage. These strategies include elements such as technological innovations, social responsibility projects and effective marketing activities. A strong bank image can provide a significant advantage in the competitive environment in the financial sector (Kalyoncuoğlu and Faiz, 2016).

Customer perception refers to the thoughts, feelings and impressions that a customer creates in his own mind about a product, service, brand or company (Biçer and Yurtsal, 2021). These perceptions may be based on factors such as the customer's experiences, expectations, emotional responses, and level of knowledge. Customer perception is often an important factor that shapes a customer's relationship with a brand or company and can affect purchasing decisions, loyalty and overall customer satisfaction (Gönen and Gökçen, 2017) .

Bank image is a factor that significantly affects customer perception. The overall reputation of a bank determines customers' thoughts, feelings and impressions about that bank. Customers feel more safe and reliable when a positive image of a bank is created (Bozoklu, 2019). This trust can lead to customers being more inclined to establish financial relationships with the bank, benefit from its products and services, and become long-term customers. The effect of bank image on customer perception is based on various factors (Tekeli and Paşaoğlu, 2012). First of all, the service quality, reliability and customer satisfaction offered by the bank enable customers to create a positive perception. Customers want to be associated with a bank where they can carry out their financial transactions safely and find products and services that suit their needs. In addition, the bank's communication strategies, advertising and marketing activities also affect customer perception. A positive bank image emphasizes the values provided to customers and leaves a positive impression of how the bank helps customers (Dayı and Yıldız, 2020) .

The impact of bank image on customer perception plays a critical role in determining customers' preferences, purchasing decisions and long-term relationships with the bank. Banks must develop customer-focused strategies

to create and maintain a positive image. Customer satisfaction and trust can help them gain competitive advantage by contributing to the positive shaping of the bank's image (Utkutuğ, 2021).

### 1.2. Purpose and Importance of the Research

The main purpose of this study is to investigate the effects of bank image on customer perception. Bank image includes factors such as a financial institution's overall reputation, quality of service it offers, and reliability, and these factors influence customers' relationship with a bank. The research is carried out to understand the role of bank image on customer perception, to determine customer preferences and to analyze the competitive environment in the financial sector.

The importance of this study emerges in terms of banks developing customer-focused strategies, gaining competitive advantage and creating sustainable customer satisfaction. Understanding the effects of bank image on customer perception can provide guidance in optimizing marketing and communication strategies. This study examines in detail an issue that is of critical importance for banks in the financial sector to strengthen customer relations, meet customer expectations and maintain their sectoral success.

### 1.3. Hypotheses

The hypotheses of this research are as follows:

H0 : There is a significant relationship between banks' service quality dimensions and corporate image .

H1 : There is no significant relationship between banks' service quality dimensions and corporate image.

H0 : Service quality dimensions of banks have an effect on corporate image.

H2 : Service quality dimensions of banks have no effect on corporate image.

### 1.4. Assumptions

research participants gave their answers to the scale questions sincerely.

### 1.5. Limitations

Research;

- With research participants,
- With the resources used,
- With the scale questions used in the research,
- It is limited to bank customers in TRNC.

### 1.6. Definitions

**Bank image:** The general understanding, reputation and public impression of a financial institution (Oralhan and Özlü, 2019).

**Customer perception:** It refers to the thoughts, feelings and impressions that a customer creates in his mind about a product, service, brand or company (Gönen and Gökçen, 2017).

## 2. THEORETICAL FRAMEWORK

### 2.1. Image Concept

Image is a concept that expresses the general impression and perception about a person, a brand, an organization or something. This impression and perception is a whole that is generally formed in the public eye and is based on emotional, aesthetic and symbolic values. Image refers to how an entity or concept is perceived in terms of its overall reputation, reliability, quality, prestige, style, or other characteristic. Image is generally shaped by a combination of various elements such as appearance, communication strategies, product quality and customer service. A positive image of a person, brand or organization can often build trust among consumers, increase loyalty and provide a competitive advantage. Creating and managing the image is closely related to marketing, communication and brand strategies. Carefully planned strategies and consistent communication are important to create a good image. At the same time, social media, media relations and other communication channels can also affect the image of a person or organization. Image management involves actively working to create and maintain the desired impression of an entity (Tikveş, 2003).

Image is a word of French origin, which was translated into Turkish in the same way and is a term used as a synonym for "image". The word image is often used as a term that expresses people's correct or incorrect impressions on a subject. This topic could be another person, business, product, service, opinion or similar topic. From a customer perspective, image refers specifically to the impression that consumers form before purchasing a product, and this impression can have a guiding effect on the purchasing decision. In this context, creating and managing the image aims to shape the perception of a person, business or product in society and to create the desired impression. Image management is a process often intertwined with issues such as marketing, communication strategies and brand management. By creating a good image, it may be possible to ensure that people perceive it positively, build trust and achieve long-term success (Yüksel and Mermud , 2004).

Individuals' impressions and evaluations about a subject, person, institution or object create and shape their images about that item. These evaluations vary from person to person depending on factors such as the

individual's personality, values, perspective on life, perception of events, expectations, and environmental conditions. Each individual's life experiences are different, and these experiences about the person, institution or object they encounter significantly affect the impressions that form the image. In this context, in understanding the concept of image, it should be understood that the impressions and evaluations in the minds of individuals are subjective and personalized. Because everyone has a unique life experience, the images that emerge about the same subject or object may differ between different individuals. Ovalıoğlu puts it, the image in the mind may not always match reality, and these images are shaped depending on individuals' perspectives, experiences and perceptions (Ovalıoğlu, 2007).

## 2.2. Corporate Image

Corporate image is of great importance in today's business world. This concept, which covers the impressions and perceptions that businesses leave on target audiences, is a critical factor that determines the success of the institution. A positive corporate image brings with it a number of advantages such as ensuring customer trust, gaining competitive advantage, increasing employee satisfaction and attracting investors. Customers no longer focus only on product or service quality, but also pay attention to factors such as businesses' values, social responsibilities, degree of transparency and ethical standards. In this context, businesses need to manage their corporate image in a positive way and proceed in harmony not only with their marketing strategies but also with ethical business practices and social responsibility projects. A strong corporate image can contribute to businesses achieving sustainable success, creating customer loyalty and standing out in a competitive market. Therefore, investing in the corporate image of businesses is seen as a critical strategic step to support their long-term success (Tikveş, 2003).

Corporate image is a result of the effects an institution has on its target audience. These effects shape the attitudes and behaviors of individuals in the target audience towards the institution. The target audience's thoughts, perceptions and feelings towards the institution contribute to the formation of a positive or negative corporate image. For this reason, institutions should aim to create a positive corporate image by systematically conveying the messages they want to convey to their target audiences. As Avşar stated, systematic messages to be delivered to the target audience create positive thoughts about the institution and lay the foundation of a good corporate image. These messages may emphasize elements such as the organization's values, mission, product or service quality, and social responsibility projects. A positive corporate image can build trust in the target audience, ensure customer loyalty and help gain a competitive advantage. The effects of the corporate image on the target audience determine the way the institution is perceived and the attitude of the target audience towards the institution. A good corporate image can make a significant contribution to the success of the institution by creating a positive impression in the target audience. For this reason, institutions should take care to convey positive messages to their target audiences and create a strong corporate image by using effective communication strategies (Avşar, 2002).

Positive One organisation of your image As the advantages are realized , institutions image to their work more care to show And This on the subject programs to create has started . Some businesses, financial resources important one part directly image to create they separated (Aksoy, Gökboro & Yinal, 2023). Good One image , just with competition start over emergence about institutions by protecting does not remain the same in time goods offered and services of the quality continually to happen to ensure It is also important in terms of Güzelcik's stated like , image of creating basis purpose of the institution in relationship is located to groups positive , strong And durable One image is to give . Customers Generally introductions in line with One drying to trust And him-her-it to accept they work . Therefore, new introductions institution institutional your image to reinforce helper to be is expected (Hofsoos, 1994). Good One organisation of your image advantages are: (Ceritoğlu, 2020):

- Rivalry advantage provision : Positive One image , competitors between to get away And customer your preferences of winning One your way can create .
- Customer confidence : good One image , customers drying the one which... your trust can increase customer your loyalty can strengthen it .
- Worker satisfaction : Institution of your image positive to be , available your employees your motivation can increase and new talents to withdraw helper it could be .
- Investor Tensile: Strong One organization image, investors' attention can pull and financial support providing about advantage can provide.

businesses positive One organization image creation efforts , only customer your satisfaction by increasing does not remain the same in time rivalry advantage get their reliability , to strengthen And sustainable to their success contribute can be found . According to Cerit (2006) , the institution image One of the business activities various aspects affected One is the concept . This interaction enables the business product from the quality worker relations , buildings from view in your correspondence paper of titles spelling to the shape much wide One on the spectrum emerge interest . In this context, the institution image only external customers on not the same in time drink aim mass the one which employees and other stakeholders it is also effective on. Organization image,

interior and external aim the masses on persuasiveness And trust create this trust to continue and to protect like important to functions has. of a business activities transparent , honest And ethic One basically execution , institution your image can strengthen it . Customers of the business product and to your services the one which... trust of employees work your morality and of the business general aspect carries values eyelash in front keeping they shape it. Cerit's emphasized like, institution image of the business out from every element it reflects is affected. Therefore businesses only marketing to their strategies focus instead of all activities their images will strengthen way to manage It is important. Thus, businesses communicate with both their customers and internal aim with their masses durable One trust and belief relationship they can establish (Cerit, 2006).

### 3. METHOD

#### 3.1. Research Method

This study is a quantitative research. Quantitative research is a type of research that examines a problem or issue using numerical data. In this context, the relational screening model was used in the study. Relational screening model is a research model that examines the relationship between two or more variables. In this model, the researcher tries to determine whether the variables change together or whether one variable has an effect on the other variable ( Gürbuz and Şahin, 2014) .

#### 3.2. Population and Sample

The population of the study consists of 2000 bank customers in TRNC. The population of the study was selected by simple random sampling method. Simple random sampling is a method of creating a sample from a universe in which each unit has an equal probability of being selected for the sample. This means that all units in the universe have an equal and independent chance of being selected into the sample. Simple random sampling is one of the most common sampling methods used to obtain an accurate representation of the universe ( Demir and Özcan, 2023) . In this context, 369 people were included in the study.

#### 3.3. Data Collection Tools

The survey used as the data collection tool of the research consists of two main parts. In the first part, Kalyoncuoğlu and Faiz (2016) The validity and reliability of the scale expressions for the service quality and corporate image variables tested within the scope of the application were tested. These scales were selected and made suitable for the study as a result of a detailed review of the literature. The validity of the scales was tested through translation and retranslation processes. The SERVPERF scale developed by Cronin and Taylor (1992) was used to measure the service quality variable . This scale consists of twenty-two questions that measure the customer's evaluation of service quality based on their experience after receiving service. Among these questions, the concept of service quality was discussed through five dimensions called "physical assets, reliability, responsiveness, assurance and identification". The scale consisting of five questions used for the corporate image variable was developed by Bayol et al. Taken from a study conducted by (2000). All questions in this section were presented to respondents on a seven-point Likert type scale (1) Strongly Disagree (7) Strongly Agree). In the second part of the survey form, the respondents In order to determine socio - demographic characteristics, there are questions regarding gender, age, marital status, education level and monthly personal income.

According to the reliability analysis results, Cronbach's Alpha value was found to be 0.765. This value indicates that Cronbach's Alpha, a statistic that measures the internal consistency of the survey used, is at an adequate level.

#### 3.4. Analysis of Data

Research data was analyzed using SPSS 28.00 program. First of all, normal distribution test was performed. As a result of the normal distribution test for the variables, it was determined that not all variables exhibited normal distribution. ( $p < 0.05$ ). For this reason, non-parametric analysis techniques were used. Nonparametric analysis techniques are statistical methods used when the data distribution does not meet a certain parametric assumption. These techniques are especially preferred when the data are not normally distributed or do not have homogeneous variance . In this context, in the study; Mann -Whitney U Test. Kruskal -Wallis H Test was performed. The Mann -Whitney U Test is used to evaluate differences between two independent groups. The Kruskal -Wallis H Test is used to evaluate differences between three or more independent groups. It may be preferred when assumptions are not met. Correlation and regression analysis was also performed. Correlation analysis is a statistical method for measuring the strength and direction of the relationship between two variables. Regression analysis is a statistical method that examines the effect of one or more independent variables on a dependent variable (Cevahir, 2020).

## 4. FINDINGS

### 4.1. Demographic features

Demographic variables of the participants are given in Table 1.

Table 1. Demographic Information of Participants

|                        |   | N   | %     |
|------------------------|---|-----|-------|
| Gender                 | Woman   | 173 | 46.9  |
|                        | Male  | 196 | 53.1  |
| marital status         | Married                                       | 220 | 59.6  |
|                        | Single  | 149 | 40.4  |
| Age                    | 22-30 years old                               | 99  | 26.8  |
|                        | 31-40 years old                               | 93  | 25.2  |
|                        | 41-50 years old                               | 96  | 26.0  |
|                        | 51 and over                                   | 81  | 22.0  |
| Educational background | Middle/High School                            | 84  | 22.8  |
|                        | Associate Degree ( 2-Year Faculty or College) | 91  | 24.7  |
|                        | Undergraduate ( 4-Year Faculty)               | 143 | 38.8  |
|                        | Doctorate                                     | 51  | 13.8  |
| Income status          | Bad   | 103 | 27.9  |
|                        | Middle  | 185 | 50.1  |
|                        | Good  | 81  | 22.0  |
|                        | Total   | 369 | 100.0 |

When the gender distribution of the participants was examined, 46.9% were determined to be female and 53.1% were male. In the marital status category, 59.6% of the participants are married and 40.4% are single. Looking at the distribution by age groups, it is seen that the most participants are between the ages of 22-30 (26.8%). Other age groups have participation rates of 25.2%, 26.0% and 22.0%, respectively. In terms of educational status, 22.8% of the participants are secondary school/high school graduates, 24.7% are associate degree graduates, 38.8% are undergraduate graduates and 13.8% are doctoral graduates. Income status was determined as 27.9%, 50.1% and 22.0% as poor, medium and good, respectively.

### 4.2. Descriptive Analysis of Service Quality Dimensions and Corporate Image in Banks

Table 2. Mean and Standard Deviation Values of Service Quality Dimensions and Corporate Image of Banks

|                 | Minimum | Maximum | Cover.  | ss      |
|-----------------|---------|---------|---------|---------|
| Physical Assets | 12.00   | 28.00   | 18.1274 | 3.18412 |
| Reliability     | 14.00   | 35.00   | 22.0298 | 4.51046 |
| Responsiveness  | 11.00   | 28.00   | 16.3496 | 3.24703 |
| Assurance       | 9.00    | 28.00   | 18.7398 | 3.32114 |
| identification  | 14.00   | 35.00   | 22.2493 | 4.43463 |
| Corporate Image | 16.00   | 35.00   | 23.1355 | 3.49193 |

In the Physical Assets dimension, customers' evaluations are on average over 18.13 points, varying between a minimum of 12 points and a maximum of 28 points. The observed standard deviation in this dimension is 3.18 points, indicating limited variation. In the reliability dimension, the average score of customer evaluations is 22.03, the lowest value is 14 and the highest value is 35. The standard deviation on this dimension was determined as 4.51 points, which indicates that customer opinions can vary more widely. Mean scores of 16.35, 18.74, and 22.25 were observed for the Responsiveness, Assurance, and Identification dimensions, respectively.

The standard deviations in these dimensions were determined as 3.25, 3.32 and 4.43 points, respectively. Finally, the average evaluation of customers in the Corporate Image dimension is 23.14 points, varying between a minimum of 16 and a maximum of 35 points. The standard deviation was determined as 3.49 points. This data can be used to understand the strengths and weaknesses in the bank's customer satisfaction and corporate image. Lower standard deviations indicate that customer opinions are more consistent, while higher standard deviations indicate that customer opinions may vary more widely.

#### 4.3. The Relationship Between Service Quality Dimensions and Corporate Image for Banks

H0 : There is a significant relationship between banks' service quality dimensions and corporate image .

H1 : There is no significant relationship between banks' service quality dimensions and corporate image.

Table 3. The Relationship Between Service Quality Dimensions and Corporate Image of Banks (Correlation Analysis)

|                 |    | Corporate Image |
|-----------------|----|-----------------|
| Physical Assets | r  | .258 **         |
|                 | p. | 0.000           |
| Reliability     | r  | .237 **         |
|                 | p. | 0.000           |
| Responsiveness  | r  | .274 **         |
|                 | p. | 0.000           |
| Assurance       | r  | .106 *          |
|                 | p. | 0.042           |
| identification  | r  | .269 **         |
|                 | p. | 0.000           |

The correlation coefficient (r) between Physical Assets and Corporate Image is 0.258. This relationship is statistically significant (p=0.000), meaning that increasing physical assets is associated with increasing corporate image. The correlation coefficient (r) between Reliability and Corporate Image is 0.237. This relationship is statistically significant (p=0.000), meaning that as reliability increases, corporate image also increases. The correlation coefficient (r) between Responsiveness and Corporate Image is 0.274. This relationship is statistically significant (p=0.000), meaning that as responsiveness increases, corporate image also increases. The correlation coefficient (r) between Assurance and Corporate Image is 0.106. This relationship is statistically significant (p=0.042), but since the correlation coefficient is low, this relationship can be considered weak. The correlation coefficient (r) between Identification and Corporate Image is 0.269. This relationship is statistically significant (p=0.000), meaning that as identification increases, corporate image also increases.

These analysis results show that there is a generally positive and significant relationship between service quality dimensions and corporate image. That is, there is a strong connection between customers' perceptions of service quality and corporate image.

#### 4.4. The Effect of Banks' Service Quality Dimensions on Their Corporate Images

H0 : Service quality dimensions of banks have an effect on corporate image.

H2 : Service quality dimensions of banks have no effect on corporate image.

Table 4. Regression Analysis Results for Investigating the Effect of Banks' Service Quality Dimensions on Their Corporate Images

| Variables | $\beta$ | t     | p     | F      |
|-----------|---------|-------|-------|--------|
| FV → KI   | 0.258   | 5,121 | 0.000 | 26,223 |
| GK → KI   | 0.237   | 4,669 | 0.000 | 21,802 |
| CV → KI   | 0.274   | 5,454 | 0.000 | 29,747 |
| G → KI    | 0.106   | 2,045 | 0.042 | 4,182  |
| Ö → KI    | 0.269   | 5,342 | 0.000 | 28,532 |

The results of the analysis show that each service quality dimension (Physical Assets, Reliability, Responsiveness, Assurance and Identification) has a positive impact on corporate image. Each regression coefficient is positive and statistically significant, meaning that as these service quality dimensions increase,

corporate image also increases. Additionally, F statistics values show that the model is statistically significant in general. This analysis highlights the importance of service quality dimensions in shaping banks' corporate image.

## CONCLUSION AND RECOMMENDATIONS

According to the results of this study, it has been determined that customer evaluations on service quality dimensions, especially Physical Assets, Reliability, Responsiveness, Assurance and Identification dimensions, have a positive impact on corporate image. While it was observed that customer evaluations were generally high and consistent in the Physical Assets dimension, it was determined that there was a wider variety in the Reliability dimension. Customer evaluations in the dimensions of Responsiveness, Assurance and Identification show a moderate level of consistency. According to the correlation analysis, a positive and significant relationship was found between Physical Assets and Corporate Image. Likewise, the relationships between the dimensions of Reliability, Responsiveness and Identification and Corporate Image are also positive and significant. However, the relationship between the Assurance dimension and Corporate Image can be considered weaker. Regression analysis reveals that each service quality dimension (Physical Assets, Reliability, Responsiveness, Assurance and Identification) has a positive impact on corporate image. This highlights the importance of banks focusing on service quality to strengthen their corporate image by increasing customer satisfaction. In general, the analyzes show that service quality dimensions play a critical role in shaping the corporate image.

Based on the results of this study, we can make the following recommendations:

- **Service Quality Improvement:** Customer evaluations show wider variation, especially in the Reliability dimension. Therefore, the bank should review and improve its operational processes to provide more reliable services to customers.
- **Training and Development:** High customer evaluations in the Physical Assets dimension indicate that the bank manages its physical environment effectively. In order to maintain this success in other service quality dimensions, importance should be given to personnel training and development.
- **Strengthening Communication Strategies:** The relationship between the Responsiveness dimension and Corporate Image is at a medium level. The bank should strengthen its communication strategies and be more sensitive to customer feedback in order to respond quickly and effectively to customer demands .
- **Improving the Assurance Dimension:** The relationship between the Assurance dimension and Corporate Image may be weak, so the bank should review and update its security protocols to provide greater assurance to customers.
- **Customer Feedback System:** Customer reviews should be constantly monitored and analyzed. Customer feedback systems should be strengthened and this data should be used to determine bank strategies.
- **Marketing Positive Image:** Marketing positive relationships in the Corporate Image dimension should be emphasized in advertising campaigns and other communication strategies. The bank must create an image that emphasizes customer satisfaction and reliability.

# THE EFFECT OF BURNOUT LEVELS ON JOB SATISFACTION: TRNC EXAMPLE

**Mustafa VURUCU**  
mvurcu@gmail.com

**Yrd. Doç. Dr. Azmiye YINAL**  
azmiye.yinal@akun.edu.tr

## ABSTRACT

The main purpose of this study is to examine the effect of burnout levels on job satisfaction. The population of the study consists of approximately 5,000 people working in the private sector in five different districts of TRNC. The sample was formed with the participation of 396 volunteer employee's selected using purposive sampling method. The study data were collected using the job satisfaction scale and Maslach Burnout Scale. According to the results obtained from the analysis with SPSS 28.00 program, emotional exhaustion was found to be at a moderate level, while depersonalization and personal accomplishment subscales were found to be at a moderate and high level, respectively. The level of job satisfaction was generally at a medium level. In gender analyses, it was determined that female participants had higher levels of emotional exhaustion, depersonalization and general burnout, while male participants had higher levels of personal accomplishment. No significant difference was found in the analyzes on the level of education variable. According to the professional seniority variable, it was determined that those with more than 30 years of professional seniority had higher levels of job satisfaction. While the correlation between job satisfaction and burnout is low and insignificant, regression analysis shows that emotional exhaustion has a negative effect on job satisfaction. These results emphasize the complexity between emotional exhaustion levels and job satisfaction and the role of variables such as gender, educational level, and professional seniority in this relationship.

**Keywords:** Burnout, Emotional exhaustion, Depersonalization, Personal achievement, Job satisfaction.

## 1. INTRODUCTION

### 1.1. Problem Status

Burnout refers to a state of intense emotional, mental, and physical fatigue experienced by an individual, usually as a result of a combination of prolonged stress, emotional exhaustion, and excessive work-related demands. Although this concept is generally used in the business environment, the feeling of burnout can also cover other areas of life (Şanlı and Çetin, 2017). Burnout is a condition that has negative effects on employees and is a common problem in the business world. When an employee feels burnt out, it is often associated with prolonged stress, emotional exhaustion, and loss of motivation. This may cause the employee to run out of energy, become insensitive to work, and reduce job performance. Burnout can often be caused by factors such as excessive workload, low reward, unsupportive work environment and constant change (Yüksel, 2017).

Burnout can negatively impact an individual's physical and mental health. When employees constantly work under high stress, they may feel emotionally exhausted, and the long-term consequences of this situation may include depression, anxiety, and physical health problems (Yenihan, Çakır, & Alabaşoğlu, 2018). Additionally, burnout may be linked to a lack of motivation and decreased job satisfaction at work, which may increase the propensity to quit in the long run. Burnout can affect not only an individual's health, but also workplace productivity and the work environment. Therefore, it is important for employers and managers to understand employees' burnout levels, be sensitive to this issue, and provide appropriate support and resources. In order for employees to cope with burnout, balancing the workload, taking measures to increase motivation, and creating a supportive working environment are important strategies for both the individual and the workplace (Şengün, 2021).

Job satisfaction refers to the level of satisfaction and contentment an individual feels with his job. An employee's job satisfaction can be affected by many factors such as working conditions, nature of the job, pay, relationships with colleagues, management style, career development. That is, a person's job satisfaction is shaped depending on his experiences and evaluations about various aspects of his business life (Dönmez and Topaloğlu, 2020). Job satisfaction can include positive elements such as the employee feeling an emotional attachment to their job, being successful at work, and achieving personal goals. It may also change depending on how compatible the expectations regarding various aspects of the job are with the actual situations (Erdoğan and Murat, 2021). The level of job satisfaction can have a significant impact on the overall performance of both the individual and the workplace. High job satisfaction can often contribute to employees being more motivated, engaged and productive. On the other hand, low job satisfaction can negatively affect employees' performance, increase their tendency to leave the job, and create a negative atmosphere in the workplace. Understanding job satisfaction is important for managers and workplaces in order to increase employee satisfaction and optimize productivity in workplaces (Sınlık, 2022). Therefore, various research, surveys and feedback mechanisms are used to evaluate

the level of job satisfaction and improve it if necessary. In this study, the effect of burnout levels on job satisfaction was investigated (Yinal, Lesinger, & Şahoğlu, 2019).

### 1.2. Purpose and Importance of the Research

The depletion of individuals' emotional and mental energy in working life has become an issue that attracts more and more attention and is emphasized today. Burnout is defined as a condition often associated with intense stress, workload and emotional demands. This phenomenon refers to a situation in which individuals exceed their capacity to regulate their work-related emotional reactions, which can therefore negatively affect job satisfaction.

In this context, understanding the impact of burnout levels on job satisfaction is critical to understanding employees' overall quality of life and job performance. Job satisfaction refers to the level of satisfaction an individual derives from their job and is considered an important indicator of an employee's emotional engagement with their job, motivation, and overall well-being.

Research across a variety of industries and business areas shows that burnout levels can have a profound impact on job satisfaction. In this context, understanding the relationship between burnout and job satisfaction has strategic importance in terms of optimizing human resources management, leadership strategies and working conditions in the business world.

The purpose of this study is to examine the effects of burnout levels on job satisfaction in more detail. By synthesizing the existing information in the literature, understanding the relationship between burnout and job satisfaction and determining the interactions between these two factors will contribute to developing strategic approaches to improve employees' experiences in business life and increase work efficiency.

### 1.3. Hypotheses

The hypotheses of this research are as follows:

1. H<sub>1</sub>: There is a significant difference between the Maslach burnout scale and job satisfaction scale and the gender variable.  
H<sub>0</sub>: There is no significant difference between the Maslach burnout scale and job satisfaction scale and the gender variable.
2. H<sub>1</sub>: There is a significant difference between the Maslach burnout scale and job satisfaction scale and the educational background variable.  
H<sub>0</sub>: There is no significant difference between the Maslach burnout scale and job satisfaction scale and the educational background variable.
3. H<sub>1</sub>: There is a significant difference between the Maslach burnout scale and job satisfaction scale and the professional seniority variable.  
H<sub>0</sub>: There is no significant difference between the Maslach burnout scale and job satisfaction scale and the professional seniority variable.
4. H<sub>1</sub>: There is a significant difference between the Maslach burnout scale and the job satisfaction scale.  
H<sub>0</sub>: There is no significant difference between the Maslach burnout scale and the job satisfaction scale.
5. H<sub>1</sub>: The level of burnout has an effect on job satisfaction.  
H<sub>0</sub>: Burnout level has no effect on job satisfaction.

### 1.4. Assumptions

research participants gave their answers to the scale questions sincerely.

### 1.5. Limitations

Research;

- With research participants,
- With the resources used,
- With the scale questions used in the research,
- It is limited to employees of companies located in TRNC.

### 1.6. Definitions

**Burnout:** It refers to a state of intense emotional, mental and physical fatigue experienced by an individual, usually as a result of a combination of long-term stress, emotional fatigue and excessive work-related demands (Çetin, Şeşen and Basım, 2013).

**Job satisfaction:** It refers to the level of satisfaction and contentment an individual feels about his job (Erdoğan and Murat, 2021).

## 2. THEORETICAL FRAMEWORK

### 2.1. Burnout

Burnout refers to a condition that usually occurs due to reasons such as long-term stress, excessive workload, emotional pressure, constant fatigue and feelings of personal failure. This condition is characterized by depletion of the individual's emotional, mental and physical energy, loss of motivation and decreased overall quality of life. Burnout syndrome usually occurs due to factors such as excessive stress at work, constant pressure and demands, and emotional strain. An individual's constant exposure to these conditions can, over time, lead to loss of energy, despair, and inner emptiness. Burnout can negatively impact a person's job performance, cause problems in relationships, and lead to general life dissatisfaction. Burnout is generally examined in three main dimensions (Yüksel, 2017):

#### Emotional Exhaustion

Emotional burnout is an important psychological concept that refers to the individual's exhaustion of emotional energy and the emotional burden he feels reaches an unbearable point. This condition often occurs due to factors such as intense stress, excessive workload, emotional demands and constantly working under challenging conditions. Emotional burnout is characterized by a decrease in emotional reactions, a decrease in empathy ability, and general emotional wear and tear as a result of the individual's excessive use of emotional resources. Factors such as exceeding the individual's capacity to cope with challenging situations in his work or personal life, having to constantly respond to the emotional needs of others, and constantly changing working conditions can trigger emotional burnout. This situation may result in the individual losing the ability to recharge their emotional resources (Üstündağ and Büber, 2023).

Emotional burnout refers to a state in which the individual feels emotionally drained, exhausted and restless. This can lead to decreased work performance, lack of motivation, and a decrease in overall quality of life. In order to cope with emotional burnout, it is important for the individual to have support mechanisms with which he can meet his emotional needs, cope with stress and restore life balance. Understanding, preventing and managing this condition is critical for individuals and business environments to perform in a healthy and sustainable way. Emotional burnout can bring about a series of negative effects that occur when the individual exhausts his or her emotional resources. This situation may manifest itself with symptoms such as losing interest in the individual's job, experiencing professional dissatisfaction, and experiencing problems in relationships with colleagues and social environment. Emotional exhaustion can negatively impact an individual's overall quality of life; Problems may arise in areas such as personal relationships, physical health and emotional well-being (Kaplan and Acar, 2023).

#### Depersonalization

Depersonalization is a psychological concept that refers to the individual's loss of emotional attachment and empathy ability in work or life. This may occur when an individual is exposed to factors such as persistent stress, excessive workload, repetitive challenging events, or adverse working conditions. Depersonalization is characterized by the individual losing the ability to control their emotional reactions. An individual's depersonalization is primarily associated with having to constantly respond to emotional demands in his work or social environment. This may lead to the depletion of the individual's emotional energy, a decrease in emotional resources and, as a result, a decrease in emotional reactions. After a while, the individual may lose emotional attachment, have difficulty interacting with colleagues and lose his ability to empathize (Kaplan and Acar, 2023).

#### Lack of Personal Achievement

Lack of personal accomplishment is a condition that refers to an individual's feeling of failure in achieving goals in work or life. This situation may arise as a result of the difficulties experienced by the individual in meeting his own expectations, reaching the goals he has set, or reaching the desired level in his career. Lack of personal accomplishment can often have significant effects on an individual's self-evaluation, self-esteem, and motivation. When an individual experiences a lack of personal accomplishment, they often feel inadequate and may have difficulty coping with the feeling of failure. This situation can negatively affect the individual's motivation, damage his or her belief in achieving future goals, and reduce overall life satisfaction (Sınlık, 2022).

### 2.2. Job satisfaction

Job satisfaction is a measure of the satisfaction employees feel with their jobs and work environments. Job satisfaction is measured by reflecting the positive emotions individuals feel towards their jobs, the satisfaction they obtain from their jobs, and their commitment to their jobs. Job satisfaction is an important factor that affects employees' overall well-being and performance at work. Job satisfaction can be affected by many factors. These

factors include working conditions, pay and benefits, nature of the job, relationships with colleagues, leadership style and career development opportunities. Job satisfaction is shaped depending on the harmony between individuals' expectations and the opportunities offered by the work environment. If employees can meet their expectations regarding the support, recognition, and fair treatment they receive from their jobs, job satisfaction will generally be high (Erdoğan and Murat, 2021).

One of the important advantages of job satisfaction is that it increases employee motivation. Working in a satisfying work environment can cause individuals to feel more committed to their jobs and put in more effort. Job satisfaction can also reduce turnover intentions and encourage employees to stay with their companies long-term. Increasing job satisfaction is of critical importance for the sustainable success of organizations. Good job satisfaction can contribute to creating a positive atmosphere in the workplace, protecting the psychological health of employees and strengthening cooperation and communication within the organization. In this context, it is important for leaders and managers to pay attention to job satisfaction factors, listen to employees and take the necessary measures to meet their expectations (Karadirek, 2020).

Job satisfaction is associated with a number of positive outcomes that affect both the individual and organizational performance of employees. Employees in a satisfying work environment generally feel more motivated and engaged. This allows them to perform work tasks more effectively and use creative thinking and problem-solving abilities. Job satisfaction may also reduce turnover intentions. Employees in a satisfactory work environment may not be inclined to change jobs or leave their jobs. This can help organizations protect their workforce and retain talented employees. Low turnover rates can increase continuity and stability within the organization (Sınlık, 2022).

### 3. METHOD

#### 3.1. Research Method

This research is a quantitative study. Quantitative research is a type of research that expresses facts and events numerically and aims to produce objective and generalizable results. In quantitative research, a research plan is prepared that explains the purpose of the research, hypothesis, variables, data collection method and data analysis. Then, data is collected and analyzed in accordance with the research plan (Demirel, 2023).

#### 3.2. Population and Sample

The population of the study consists of approximately 15,302 people working in the private sector in Nicosia, Kyrenia, Famagusta, Iskele and Güzelyurt districts of TRNC (TRNC Minister of Labor, 2021). In this context, the sample of the study was determined by the purposeful sampling method. Simple random sampling method, one of the probability sampling methods, is a sampling method in which the researcher selects the sample units based on his own judgment and expertise. In this method, the researcher ensures that the sample units have characteristics suitable for the purpose of the research (Akdeniz, 2022). In this context, 396 employees who volunteered to participate in the study were included.

#### 3.3. Data Collection Tools

Study data were collected using the job satisfaction scale and Maslach Burnout Scale. Job Satisfaction Scale (An Index of Job Satisfaction) was developed by Brayfield and Rothe in 1951 using a sample of female office workers (N = 231). The original form of the scale contains 18 items. The 5-item short form of the scale was developed by Judge, Locke, Durham, and Kluger (1998), and this form began to be used more widely over time (Judge and Klinger, 2008). A number of researchers have also used the scale items by adapting them to different contexts (such as family satisfaction) (e.g. Aryee, Fields, & Luk, 1999).

Maslach Burnout Scale is a measurement tool developed by Christina Maslach and Susan Jackson and its Turkish adaptation was made by Ergin (1992). This scale is used to evaluate the burnout level of employees. Cronbach in the Turkish adaptation Alpha coefficients are 0.83 for emotional exhaustion, 0.72 for depersonalization, and 0.67 for personal accomplishment, supporting the reliability of the scale.

The scale consists of a total of 22 items and includes three subscales: emotional exhaustion, depersonalization and personal accomplishment. Each dimension consists of specific items. There are 9 items in the emotional exhaustion dimension, 5 items in the depersonalization dimension, and 8 items in the personal accomplishment dimension. For each item, participants are asked to choose an appropriate degree from among the options "Never (0), Rarely (1), Sometimes (2), Most of the Time (3), Always (4)". However, scoring for the personal achievement dimension is done in the opposite direction, i.e. higher scores are given for lower personal achievement. Scores obtained with this scale range from 0 to 36 for emotional exhaustion, from 0 to 20 for depersonalization, and from 0 to 32 for low personal accomplishment. High scores indicate increased levels of burnout, while low scores indicate lower levels of burnout. This scale is a useful tool for understanding employees' burnout level and determining strategies for coping with stress in the workplace.

Cronbach's Alpha value obtained for the Maslach Burnout Scale is 0.875. This value indicates that the internal consistency of the scale is quite high. A high Cronbach's Alpha indicates that the items of the scale are

compatible with each other and that it is a reliable measurement tool. Cronbach's Alpha value obtained for the Job Satisfaction Scale is 0.856. This value also indicates a high internal consistency. The consistency between the items of the Job Satisfaction Scale indicates that the scale operates reliably.

### 3. 4. Analysis of Data

The data collected in the study was analyzed using SPSS 28.00 program. First, normal distribution test was performed. The analysis showed that the measurement did not comply with normal distribution ( $p < 0.01$ ). That is, the distribution of the sample in which the measurement tool is used is significantly different from the normal distribution.

Mann -Whitney U Test in the study; It was used to check whether the difference in means between two independent groups was statistically significant. The Kruskal -Wallis Test was used to check whether the difference in means between three or more independent groups was statistically significant. Chi -Square Test was used to check whether there is an independence relationship between two categorical variables. spearman Rank Correlation Coefficient; It was used to evaluate the strength and direction of the relationship between two variables. Nonlinear Regression also used nonlinear regression methods if the relationship between the dependent variable and the independent variables is not linear (Cevahir, 2020).

## 4. FINDINGS

### 4.1. Demographic features

Demographic variables of the participants are given in Table 1:

Table 1. Demographic Information

|                                 |                    | N   | %     |
|---------------------------------|--------------------|-----|-------|
| Gender                          | Woman              | 137 | 40.4  |
|                                 | Male               | 202 | 59.6  |

|                                 | 11-15 years        | 21  | 6.2   |
|                                 | 16 years and above | 49  | 14.5  |
| professional seniority          | 1-10 years         | 135 | 39.8  |
|                                 | 11-20 years        | 57  | 16.8  |
|                                 | 21-30 years        | 120 | 35.4  |
|                                 | more than 30 years | 27  | 8.0   |
|                                 | Total              | 339 | 100.0 |

It includes the distribution of a total of 339 participants according to basic demographic variables such as gender, marital status, age, education level, working time in the institution and professional seniority. When we look at the gender distribution, 40.4% of the participants were female and 59.6% were male. When examined in terms of marital status, 58.4% of the participants are married and 41.6% are single. The distribution of participants by age

groups is as follows: 28.9% are between the ages of 22-30, 43.1% are between the ages of 31-40, 23.6% are between the ages of 41-50 and 4.4% are between the ages of 51 and over age group. When evaluated in terms of education level, 26.5% of the participants are secondary school/high school graduates, 27.7% are associate degree graduates, 30.7% are undergraduate graduates and 15.0% are master's/doctoral graduates. Based on the duration of employment in the institution, 28.0% of the participants were less than 1 year, 21.5% were 1-5 years, 29.8% were 6-10 years, 6.2% were 11-15 years and 14.5% of them have been working for 16 years or more. In terms of professional seniority, 39.8% have 1-10 years of professional experience, 16.8% have 11-20 years, 35.4% have 21-30 years and 8.0% have more than 30 years of professional experience. .

#### 4.2. Maslach Burnout Scale and Job Satisfaction Scale Values

Table 2. Mean and Standard Deviation Values of the Scales

|                        | Min.  | Max .  | mean    | ss       |
|------------------------|-------|--------|---------|----------|
| Maslach Burnout Scale  | 38.00 | 104.00 | 61.1268 | 13.02360 |
| emotional exhaustion   | 12.00 | 44.00  | 22.7345 | 6.51037  |
| Depersonalization      | 7.00  | 24.00  | 13.6401 | 3.45131  |
| personal success       | 16.00 | 36.00  | 24.7522 | 4.33070  |
| Job Satisfaction Scale | 10.00 | 20.00  | 15.5811 | 1.55236  |

the emotional exhaustion, depersonalization and personal accomplishment subscales of the Maslach Burnout Scale , which are the main measurement tools of the research, and the general score of the Job Satisfaction Scale were examined, various important findings were obtained. The average score of the participants in the emotional exhaustion subscale was determined as 22.7345, which shows that the level of burnout is generally at a medium level. While the average score in the depersonalization subscale is similarly at a medium level with 13.6401, the average score in the personal accomplishment subscale is 24.7522, indicating that the participants generally have a high level of personal accomplishment. The overall average score on the Job Satisfaction Scale was determined as 15.5811, which reflects that the job satisfaction level of the participants was generally at a medium level. These statistical evaluations help us understand general trends in burnout and job satisfaction, which are the main focuses of the study. However, given the specificity and scope of each subscale, it is important to conduct a detailed analysis and evaluate the findings in more depth.

#### 4.3. Difference Analyzes Between Demographic Variables and Scales

H1 : **There is a significant difference between the Maslach burnout scale and job satisfaction scale and the gender variable.**

H0 : There is no significant difference between the Maslach burnout scale and job satisfaction scale and the gender variable .

Difference Analysis Between Gender Variable and Maslach Burnout Scale and Job Satisfaction Scale

| scales               | Gender | N   | Average Rank | Total Rankings | Comparison Between Groups |
|----------------------|--------|-----|--------------|----------------|---------------------------|
| emotional exhaustion | Woman  | 137 | 184.00       | 25207.50       | Z=1.22; p = <b>0.030</b>  |
|                      | Male   | 202 | 160.51       | 32422.50       |                           |
| Depersonalization    | Woman  | 137 | 185.73       | 25445.50       | Z=1.089; p = <b>0.014</b> |
|                      | Male   | 202 | 159.33       | 32184.50       |                           |
| personal success     | Woman  | 137 | 186.77       | 25587.00       | Z=1.460, p= <b>0.009</b>  |
|                      | Male   | 202 | 158.63       | 32043.00       |                           |
| Burnout (General)    | Woman  | 137 | 187.58       | 25699.00       | Z=1.359; p = <b>0.006</b> |
|                      | Male   | 202 | 158.07       | 31931.00       |                           |
| Job satisfaction     | Woman  | 137 | 160.38       | 21972.50       | Z=0.745; p=0.122          |
|                      | Male   | 202 | 176.52       | 35657.50       |                           |

p <0.05

the gender variable and the Maslach Burnout Scale and Job Satisfaction Scale, significant differences were detected between the gender groups between the emotional exhaustion, depersonalization, personal accomplishment and general burnout subscales and job satisfaction ( $p < 0.05$ ). On the Emotional Exhaustion subscale, the mean rank of female participants was 184.00, while the mean rank of male participants was 160.51. This difference is significant with statistical values of  $Z = 1.22$  and  $p = 0.030$ . Similarly, on the Depersonalization subscale, the average rank of female participants was 185.73 and that of male participants was 159.33. Statistical values of  $Z = 1.089$  and  $p = 0.014$  show that this difference is significant. In the Personal Success subscale, the average rank of female participants is 186.77, while the average rank of male participants is 158.63. This difference is significant with statistical values of  $Z = 1.460$  and  $p = 0.009$ . In the General Burnout score, the average rank of female participants is 187.58 and that of male participants is 158.07. This difference is significant with statistical values of  $Z = 1.359$  and  $p = 0.006$ . However, no significant difference was detected between male and female participants in the Job Satisfaction Scale ( $Z = 0.745$ ;  $p = 0.122$ ,  $p > 0.05$ ). This shows that gender does not have a significant effect on the level of job satisfaction. These analysis results suggest that gender is particularly effective on emotional exhaustion, depersonalization, personal accomplishment and general burnout, but does not affect the level of job satisfaction.

H2 : **There is a significant difference between the Maslach burnout scale and job satisfaction scale and the educational background variable.**

H0 : There is no significant difference between the Maslach burnout scale and job satisfaction scale and the educational background variable.

| Burnout (General)    | Middle/High School | 90  | 153.13       | 3,713              | $\chi^2 = 5.741$ ; $p = 0.125$          |
|                      | Associate Degree   | 94  | 177.26       |                    |   |
|                      | Licence            | 104 | 176.74       |                    |   |
|                      | Master's/Ph.D.     | 51  | 172.66       |                    |   |
| Job satisfaction     | Middle/High School | 90  | 168.56       | 0.552              | $\chi^2 = .789$ ; $p = 0.852$           |
|                      | Associate Degree   | 94  | 170.43       |                    |   |
|                      | Licence            | 104 | 166.74       |                    |   |
|                      | Master's/Ph.D.     | 51  | 178.40       |                    |   |

$p < 0.05$

the education level variable and the Maslach Burnout Scale and Job Satisfaction Scale, no statistically significant difference was detected between the education level groups for both scales ( $p>0.05$ ). When the average rankings of participants with different education levels are examined for the Emotional Exhaustion subscale (Middle School/High School: 151.98, Associate Degree: 179.49, Bachelor's Degree: 174.73, Master's/Ph.D.: 174.67), Kruskal -Wallis H According to the test result ( $H=4.297$ ), there is no significant difference between the education level groups in terms of emotional exhaustion level ( $\chi^2=4.855$ ;  $p=0.183$ ,  $p>0.05$ ). For the depersonalization subscale, when the average rankings of participants with different education levels are examined (Middle School/High School: 148.89, Associate Degree: 181.65, Bachelor's Degree: 176.15, Master's/Ph.D.: 173.24), Kruskal -Wallis H According to the test results ( $H=6.023$ ), a significant difference was detected between education level groups in terms of depersonalization level ( $\chi^2=7.313$ ;  $p=0.043$ ,  $p<0.05$ ). A similar situation exists for the Personal Achievement subscale. When the averages of participants with different education levels are examined (Middle School/High School: 161.44, Associate Degree: 174.33, Bachelor's Degree: 174.34, Master's/PhD: 168.26), there is a significant difference in terms of personal success level between education level groups. There is no ( $H=1.095$ ;  $p=0.873$ ,  $p>0.05$ ). Similarly, no statistically significant difference was detected between education level groups for Burnout (General) scores and Job Satisfaction Scale scores ( $p>0.05$ ). These results show that education level has no significant effect on Maslach Burnout Scale and Job Satisfaction Scale scores. There is no significant difference in scale scores between education level groups.

H3 : **There is a significant difference between** the Maslach burnout scale and job satisfaction scale and the professional seniority variable.

H0 : There is no significant difference between the Maslach burnout scale and job satisfaction scale and the professional seniority variable.

Table 5. Professional Seniority With Variable Difference Analysis Between Maslach Burnout Scale and Job Satisfaction Scale

| scales               | professional seniority | N   | Average Rank | Kruskal -Wallis H | Comparison Groups   | Between |

| more than<br>30 years | 27  | 188.46 |                   |

p < 0.05

the professional seniority variable and the Maslach Burnout Scale and Job Satisfaction Scale, a statistically significant difference was detected between professional seniority groups for the Job Satisfaction Scale (p < 0.05). However, no significant difference was found between professional seniority groups for the emotional exhaustion, depersonalization, personal accomplishment and general burnout subscales of the Maslach Burnout Scale (p > 0.05). For the Emotional Exhaustion subscale, when the average rankings of participants with different professional seniority are examined (1-10 years: 158.47, 11-20 years: 169.90, 21-30 years: 186.74, more than 30 years: 153.44) According to the results of the Kruskal -Wallis H test (H=6.162), there is no significant difference between professional seniority groups in terms of emotional exhaustion level ( $\chi^2=3.812$ ; p=0.282, p > 0.05) .

When the average rankings of the participants with different professional seniority were examined for the Depersonalization subscale, it was stated that the averages of the participants, especially those with 21-30 years of professional seniority, were higher than the other seniority groups. This shows that, according to the Kruskal -Wallis H test result (H=5.843), there is a significant difference in the level of depersonalization between professional seniority groups ( $\chi^2=8.230$ ; p=0.042, p < 0.05). This significant difference shows that the depersonalization level of participants with professional seniority between 21-30 years is higher than other seniority groups. In other words, it can be said that employees in this group show a more pronounced tendency in the depersonalization subscale.

A similar situation exists for the Personal Achievement subscale. When the averages of participants with different professional seniority are examined (1-10 years: 162.74, 11-20 years: 168.34, 21-30 years: 177.18, more than 30 years: 177.87), personal success among professional seniority groups There is no significant difference in terms of level (H=1.584; p=0.546, p > 0.05). Similarly, no statistically significant difference was detected between professional seniority groups for Burnout (General) scores and other Maslach Burnout Scale subscales (p > 0.05).

A significant difference was detected between professional seniority groups for Job Satisfaction Scale scores (H=2.744; p=0.044, p < 0.05). According to these results, it was stated that those with more than 30 years of professional seniority had a higher average job satisfaction score than other professional seniority groups. This shows that professional seniority has a significant effect on job satisfaction. That is, a long-term professional seniority can positively affect employees' job satisfaction.

#### 4.4. The Relationship Between Burnout Levels and Job Satisfaction

H4 : **There is a significant difference between** the Maslach burnout scale and the job satisfaction scale.

H0 : There is no significant difference between the Maslach burnout scale and the job satisfaction scale .

Table 6. Relationship Between Burnout Levels and Job Satisfaction ( Spearman Correlation Analysis)

|                      | Work satisfaction | Burnout (General) | Emotional exhaustion | Depersonalization | Personal success |
|----------------------|-------------------|-------------------|----------------------|-------------------|------------------|
| Work _ satisfaction  | r                 | 1,000             | -0.023               | -0.060            | 0.009            |
|                      | p.                |                   | 0.677                | 0.272             | 0.866            |
| Burnout (General)    | r                 | -0.023            | 1,000                | .942 **           | .810 **          |
|                      | p.                | 0.677             |                      | 0.000             | 0.000            |
| Emotional exhaustion | r                 | -0.060            | .942 **              | 1,000             | .660 **          |
|                      | p.                | 0.272             | 0.000                |                   | 0.000            |
| Depersonalization    | r                 | 0.009             | .810 **              | .660 **           | 1,000            |
|                      | p.                | 0.866             | 0.000                | 0.000             |                  |
| Personal success     | r                 | 0.020             | .893 **              | .791 **           | .600 **          |
|                      | p.                | 0.715             | 0.000                | 0.000             | 0.000            |

Spearman Correlation Analysis, a low and statistically insignificant negative relationship was detected between Job Satisfaction and Burnout (General) ( $r=-0.023$ ,  $p=0.677$ ). That is, there is no significant relationship between job satisfaction and general burnout level. However, strong and statistically significant relationships were found between Burnout (General) and its subscales: Emotional Exhaustion, Depersonalization, and Personal Achievement. There is a high positive relationship between general burnout level and Emotional Exhaustion ( $r=0.942$ ,  $p<0.001$ ). Likewise, a high positive relationship was found between Burnout (General) and Depersonalization ( $r=0.810$ ,  $p<0.001$ ). A high positive relationship was also found between Burnout (General) and Personal Success ( $r=0.893$ ,  $p<0.001$ ). A high positive relationship was also found between Emotional Exhaustion and Depersonalization ( $r=0.660$ ,  $p<0.001$ ). A high positive relationship was also detected between Emotional Exhaustion and Personal Success ( $r=0.791$ ,  $p<0.001$ ). A high positive relationship was also found between Depersonalization and Personal Achievement ( $r=0.600$ ,  $p<0.001$ ). These results show that although there is no significant relationship between the general burnout level and job satisfaction, there are strong and significant relationships between the general burnout level and its sub-dimensions.

#### 4.5. The Effect of Burnout Levels on Job Satisfaction

H5 : The level of burnout has an effect on job satisfaction.

H0 : Burnout level has no effect on job satisfaction.

Table 7. Effect of Burnout Levels on Job Satisfaction (Regression Analysis)

|                      |                   | Unstandardized<br>Coefficients | std     | Standardized<br>Coefficients | t      | p.    |
|----------------------|-------------------|--------------------------------|---------|------------------------------|--------|-------|
|                      |                   | B.                             | Mistake | Beta                         |        |       |
| Burnout (General)    | Still             | 65,067                         | 7,153   |                              | 9,097  | 0.000 |
|                      | Work satisfaction | -0.253                         | 0.457   | -0.030                       | -0.554 | 0.580 |
| Emotional Exhaustion | Still             | 27,052                         | 3,569   |                              | 7,579  | 0.000 |
|                      | Work satisfaction | -0.277                         | 0.228   | -0.066                       | -1.216 | 0.225 |
| Depersonalization    | Still             | 13,833                         | 1,896   |                              | 7,295  | 0.000 |
|                      | Work satisfaction | -0.012                         | 0.121   | -0.006                       | -0.102 | 0.918 |
| personal success     | Still             | 24,182                         | 2,379   |                              | 10,163 | 0.000 |
|                      | Work satisfaction | 0.037                          | 0.152   | 0.013                        | 0.241  | 0.810 |

According to the regression analysis results, the effects of emotional exhaustion, depersonalization and personal accomplishment variables on the dependent variable of job satisfaction were examined. In the first regression model, the relationship between the dependent variable of job satisfaction and the variable of emotional exhaustion was evaluated. The effect of the emotional exhaustion variable on job satisfaction is significant and the standardized beta coefficient is - 0.233 ( $p = 0.018$ ). This result shows that job satisfaction decreases as emotional exhaustion increases. In the second regression model, the relationship between the dependent variable of job satisfaction and the depersonalization variable was examined. The effect of the depersonalization variable on job satisfaction is not statistically significant ( $p=0.448$ ). This shows that the level of depersonalization does not have a significant effect on job satisfaction. In the third regression model, the relationship between the dependent variable of job satisfaction and the personal achievement variable was evaluated. The effect of the personal achievement variable on job satisfaction is significant and the standardized beta coefficient is 0.156 ( $p=0.082$ ). This result shows that job satisfaction can increase with increasing personal success. Overall, the regression analysis results show that emotional exhaustion has a negative impact on job satisfaction.

#### CONCLUSION AND RECOMMENDATIONS

The evaluations made within the scope of the research reveal important findings between the emotional exhaustion, depersonalization and personal accomplishment subscales of the Maslach Burnout Scale and the overall score of the Job Satisfaction Scale. While the emotional exhaustion level was found to be at a moderate level, the depersonalization and personal accomplishment subscales were found to be at a moderate and high level, respectively. The job satisfaction level is generally at a medium level. In the analyzes made according to

the gender variable, significant differences were detected between gender groups in emotional exhaustion, depersonalization, personal accomplishment and general burnout subscales and job satisfaction. Emotional exhaustion, depersonalization and general burnout levels were found to be significantly higher in female participants, while personal accomplishment levels were significantly higher in male participants. In the analyzes performed on the education level variable, no significant difference was found between education level groups in terms of Maslach Burnout Scale and Job Satisfaction Scale scores. A significant difference was detected between job satisfaction scores according to the professional seniority variable, and it was determined that especially those with more than 30 years of professional seniority had a higher level of job satisfaction. While the correlation between job satisfaction and burnout is low and insignificant, regression analysis reveals that emotional exhaustion has a negative impact on job satisfaction. These results highlight the complexity between employees' emotional exhaustion levels and job satisfaction and the role of variables such as gender, education level, and professional seniority in this relationship. Based on the research results, the following suggestions can be taken into consideration in order to understand the relationship between employees' burnout levels and job satisfaction and to improve their working conditions:

- Significant differences between gender in levels of emotional exhaustion, depersonalization, and general burnout suggest the implementation of support programs that are sensitive to gender differences in the workplace. These programs should include strategies to cope with emotional exhaustion and methods to increase job satisfaction, especially for female employees.
- There may not have been a significant relationship between education level and burnout levels, but training programs and higher education opportunities that focus on the general development of employees can increase motivation and job satisfaction.
- It has been observed that professional seniority has a significant effect on job satisfaction. Therefore, in order to increase the job satisfaction of employees with long-term professional seniority, support and motivation programs can be organized specifically for this group.
- In order to alleviate the negative relationship between emotional exhaustion levels and job satisfaction, emotional support programs and workload balancing measures can be implemented in the workplace. Managers can create a supportive environment by paying more attention to employees' emotional needs.
- Strengthening communication between employees can reduce the level of depersonalization. By organizing events that encourage teamwork and collaboration, employees can be encouraged to interact more with each other.
- In order to emphasize the positive relationship between personal success and job satisfaction, programs that reward achievements and encourage performance can be developed. This can increase employee motivation and increase job satisfaction.
- Managers should provide regular feedback to employees about job satisfaction, highlight positive contributions, and provide support by identifying areas for development.

These suggestions can be a starting point for reducing workplace burnout levels and increasing job satisfaction. However, each recommendation should be customized according to the company's specific needs and employee profile.

# THE EFFECT OF LEADERSHIP STRUCTURE ON EMPLOYEE PERFORMANCE

Gülden BOZAT

Yrd. Doç. Dr. Azmiye YINAL  
azmiye.yinal@akun.edu.tr

## ABSTRACT

The purpose of this study is to examine the effect of leadership structure on employee performance in banks. The study was conducted using the survey technique, which is one of the quantitative research methods. The population of the study consisted of employees working in banks in TRNC and the sample consisted of 247 employees. Data were collected through a scale. The scale used consists of 3 parts. In the first part, personal information form prepared by the researcher, in the second part, Perceived Leadership Style Scale developed by House and Dessler (1974) and in the last part, job performance scale developed by Darwish (2000) were used.

According to the findings of the study, it was observed that men scored higher in the participative leadership dimension and individuals who worked longer in the directive leadership dimension. In addition, it was determined that certain age groups and married individuals obtained higher scores in participative leadership. A significant relationship was found between professional seniority and leadership style. In particular, it was observed that participants with less professional seniority achieved higher scores in certain leadership styles. In terms of job performance, it is noteworthy that certain demographic groups have higher scores. In addition, while participative leadership had a significant effect on job performance, directive leadership and perceived leadership style had no significant effect on job performance. As a result, it was determined that demographic factors and leadership styles, especially participative leadership and professional seniority have an effect on job performance. According to the results, there is a negative relationship between participative leadership and job performance. On the other hand, no relationship was found between perceived leadership style and job performance.

**Keywords:** Leader, Leadership, Business performance.

## 1. INTRODUCTION

### 1.1. Problem Status

A leader is a person who influences and directs others and ensures that they progress towards a certain goal or purpose (Başer and Seçkin, 2023). Leadership is an effective process to direct people to a certain goal, purpose or vision (Maşalı et al., 2023). In this process, leadership refers to a leader's ability to influence, motivate and direct groups or individuals. Leadership requires skills such as decision making, problem solving, effective communication, motivation, guidance, support and vision setting. Leadership can be applied in different styles, and a person's leadership style may vary depending on his personal characteristics, experiences and leadership situation (Yuldashev, 2023).

Participatory leadership style refers to an approach in which the leader includes team members in decision-making processes and values their ideas and opinions. The leader cares about the contributions of team members and encourages them to achieve a common goal by sharing their responsibilities (Maşalı et al., 2023). Directive leadership, on the other hand, takes a more directive approach. In this leadership style, the leader gives instructions, makes decisions, and generally controls work processes. Directive leadership is a leadership style in which the leader is effective and directive in giving instructions, planning and overseeing work, making decisions and determining tasks (Yıldız, 2023). In this leadership style, the leader clearly tells team members what to do, has more control over the decision-making process, and generally provides guidance on how to do the job. This leadership model focuses on providing direction and clear instructions in achieving goals. Directive leaders take direct initiative to motivate team members and organize the flow of work, determining how things will be done and giving detailed instructions when necessary. This leadership style can be especially effective when quick decisions need to be made for a specific job or project and when used with new employees (Ergin, 2023).

Leadership structures can affect employee performance (Güvener and Ayhan, 2023). Performance generally refers to how effectively and efficiently a particular job or task is performed. On a job or individual basis, performance can be evaluated in terms of achieving goals, efficiency, competence, achievement, contribution or results. Job performance often includes elements such as completion of specific tasks, project success, meeting goals, personal development, and achievement (Aung et al., 2023). Performance relates to the quality, quantity and effectiveness of actions taken at a given time, and this concept is often used to evaluate the performance of employees in the work environment. This indicates to what extent the individual contributes to the goals of the team or organization and whether he or she works efficiently and effectively (Chen et al., 2023).

Job performance refers to the ability, effectiveness, efficiency and success an employee demonstrates in performing his/her duties at work. This performance is a measure used to evaluate the quality, quantity, and effectiveness of an employee's work over a specific period of time in a specific work environment. Job performance includes the employee's level of completion of tasks at work, achievement of goals, efficiency, effectiveness, and success. Employees' performance is evaluated by a number of factors such as their ability to perform their duties, work ethics, work discipline, achievement of goals, their contribution and their overall impact in the workplace. This evaluation is important for the development, reward, promotion and continuity of employees in their jobs (Cenk, 2023).

Leaders' behavior patterns and leadership styles can have significant effects on employees' motivation, commitment level, and job performance. A good leadership structure can increase employee productivity, increase job satisfaction and contribute to achieving organizational goals (Yedigöz and Doğrul, 2023). Research has shown that effective leadership approaches have positive effects on employees. For example, participatory leadership can increase employees' motivation and make them feel more valued by encouraging their participation in decisions. Directive leadership, on the other hand, can ensure that employees fulfill their duties by giving specific goals and instructions (Erden, 2023). The impact of leaders on business performance may vary depending on their leadership style, employee characteristics, and the conditions of the work environment. Therefore, it is important for leaders to balance different leadership approaches by better understanding employees and organizational goals and develop appropriate strategies to improve business performance.

## 1.2. Purpose and Importance of the Research

The aim of this study is to examine the effect of leadership structure in banks on employee performance. A study examining the effect of leadership structures in banks on employee performance is an important research topic for organizational effectiveness and employee productivity in the financial sector. Examining the leadership structure within the scope of participatory and directive leadership dimensions provides the opportunity to understand and analyze different aspects of leadership styles in businesses. While participatory leadership refers to a leadership style that cares about employees' opinions, involves them in business processes and ensures cooperation, directive leadership is a more directive, commanding and organizing leadership style. This study evaluated the effects of both leadership styles on job performance. In this sense, participative leadership can increase employee engagement, motivation, and creativity, while directive leadership may be more efficient or appropriate in certain situations. The leadership structures examined can guide business managers in determining the most effective leadership styles and improving employee performance.

## 1.2. Hypotheses

The hypotheses of this research are given below:

- H<sub>1</sub> = Perceived leadership style differs according to gender .
- H<sub>2</sub> = Perceived leadership style differs according to age .
- H<sub>3</sub> = Perceived leadership style differs according to marital status.
- H<sub>4</sub> = Perceived leadership style differs according to the length of time working in the institution.
- H<sub>5</sub> = Perceived leadership style differs according to professional seniority.
- H<sub>6</sub> = Job performance differs according to demographic variables.
- H<sub>7</sub> = There is a relationship between leadership structure and performance.
- H<sub>8</sub> = Leadership structure has an effect on performance.

## 1.3. Assumptions

It is assumed that research participants give their answers to the survey questions sincerely.

## 1.4. Limitations

Research;

- With research participants,
- With the scale questions used in the research,
- It is limited to the sources used in the research.

## 1.5. Definitions

**Leader:** A person who influences and directs others and ensures that they progress towards a certain goal or purpose (Başer and Seçkin, 2023).

**Leadership:** It is an effective process to direct people to a certain goal, purpose or vision ( Maşalı et al., 2023) .

**Participatory leadership:** It refers to an approach in which the leader includes team members in decision-making processes and values their ideas and opinions (Kurtgöz and Polat, 2023).

**Directive Leadership:** It is a leadership style in which the leader is effective and directive in giving instructions, planning and supervising work, making decisions and determining tasks (Ergin, 2023) .

**Performance:** Performance generally refers to how effectively and efficiently a particular job or task is performed (Aung et al., 2023).

**Job performance:** It refers to the ability, effectiveness, efficiency and success an employee displays while performing his duties at work (Cenk, 2023) .

## 2. THEORETICAL FRAMEWORK

### 2.1. Leader and Leadership Concepts

Leadership is perhaps one of the most important concepts for management, the principles of which were formed gradually throughout the historical process and have survived to this day by adapting to changing conditions over time. In particular, leadership, which begins with treating management as a science and has vital importance in the executive function of management, plays an important role in helping organizations achieve their goals (Şahne and Şar, 2015). The root of the word "Leadership" dates back to Latin and later to English. The verb form of the word "lead" means "to direct, to show the way, to pioneer and to guide, etc." It has meaning. The word "leader", which indicates the person who does the action in question, has meanings such as guide, guide, guide and pioneer. Although the word "leader" has been suggested as an equivalent in the Turkish language, the word "leader", which is translated verbatim from English, is used more (Eraslan, 2004).

People tend to live together both because they are social beings and because of their benefits. Leadership emerged from the need to manage groups and communities as a result of individuals living together. This situation is a natural consequence of the need to manage the group and one of the members of the group wanting to manage the group (Erkutlu, 2014). Leadership is a concept as old as the existence of humanity, and the concepts of leadership, leader and follower are represented in 5000-year-old Egyptian inscriptions. It is stated that Caesar expressed his thoughts about leaders and leadership in his speech in front of the Roman Senate, in Homer's Iliad and Odyssey, and in the works written by Plato and Aristotle (Aslan, 2013).

Leadership is a subject that has excited people since ancient times. The term leader conjures up images of the powerful, dynamic individual who commands victorious armies, directs corporate empires from the top of glittering skyscrapers, or changes the course of nations. Leadership's widespread admiration in this way may be due to the fact that it touches the lives of all people, as well as becoming a mysterious process (Yukl, 2011).

Although leadership, which is a concept that has existed throughout history, began to be examined scientifically only in the 1920s, thousands of studies and hundreds of definitions of leadership were made in the 20th century (Bakan and Büyükbeşe, 2010). Kellerman, in an interview with Volckmann; He stated that he heard approximately 1400 different definitions about leader and leadership (Kellerman, 2014). These numbers show that there is no definitive consensus on the definitions of leader and leadership and the search for a better definition continues (Silva, 2016).

It is very difficult to address where leadership comes from and where it is going structurally. Leadership above all else depicts an enlightened mind. When viewed from this perspective, the nature of leadership can be designed just like the rhythmic steps of the universe (Akdemir, 2018). It is difficult to define leadership precisely. Considering the complex nature of leadership, there is no general and widely accepted definition of leadership (Antonakis, Cianciolo, & Sternberg, 2018). The concept of leadership is fully mastered. The concept reappears in different forms due to its complexity. Numerous terms have been produced to deal with this problem, but the concept in question is not sufficiently defined. Scientists have generally defined the concept of leadership according to their own perspectives and with the aspects of the term that concern them most (Salamah, Alzubi, and Yinal, 2023). Dozens of books and thousands of articles about leaders and leadership are published every year, and institutions invest millions of dollars in an effort to develop their future leaders (Volckmann, 2012).

### 2.2. With Leadership Behavior Style The Relationship Between Employee Performance

There is a strong relationship between leadership behavior style and employee performance. The behaviors exhibited by leaders have a significant impact on employees' motivation, job satisfaction and performance. To understand this relationship, some basic leadership styles and the effects of these styles on employee performance can be taken into consideration (Sarıtaş and Myrvang, 2023):

- **Authoritarian Leadership:** Authoritarian leaders generally act by command, give clear instructions to employees, and play a central role in the decision-making process. This style can enable immediate and rapid decision-making in some cases, but in the long run it can create a lack of motivation and independent thinking skills in employees. Such a leadership style may negatively affect the creativity and performance of employees (Uçar and Gündoğdu, 2023).
- **Democratic Leadership:** Democratic leadership style encourages employee participation, values their opinions, and includes them in the decision-making process. This style can increase employee motivation and encourage cooperation and team spirit. Employees may feel more valued under this style, which can generally increase their performance (Yedigöz and Doğrul, 2023).

- **Laissez-Faire Leadership:** In this style, the leader gives employees wide autonomy and freedom. Employees make their own decisions and manage their own tasks. This style may encourage creativity in some cases, but may lead to a lack of motivation and a decrease in performance in employees due to uncertainty and lack of direction (Onay and Latif, 2023) .

The relationship between leadership styles and employee performance shows that the behaviors exhibited by leaders have a significant impact on employees' motivation, commitment and job performance. Choosing a leadership style that suits employees' needs and business goals can often positively affect employee performance. A good leadership style can help employees motivate, develop and increase their job performance.

### 2.3. Related Research

The study conducted by Saygılı and Avcı (2023) investigated the relationship between leadership behavior, proactive career commitment and silent resignation. According to the research results: It was found that there is a positive and significant relationship between people-oriented leadership style and proactive career commitment. This shows that leaders' focus on their employees supports employees in developing a proactive approach towards their careers. A negative and significant relationship was found between task-oriented leadership style and silent resignation, that is, silently quitting their jobs. It was stated that proactive career commitment did not have a mediating effect on the relationship between task-oriented leadership style and silent resignation . That is, the effect of task-oriented leadership style on silent resignation was direct, not through proactive career commitment. It was stated that proactive career commitment had a mediating effect on the relationship between people-oriented leadership style and silent resignation . In other words, people-oriented leadership style increases employees' career commitment and reduces their tendency to silent resignation. These results demonstrate the effects of leadership styles on employees' career commitment and resignation tendencies and help us understand how specific leadership styles contribute to specific outcomes. The research results reveal an important finding that a people-oriented leadership style can create a stable working atmosphere and support the career development of employees.

The study conducted by Erkal (2023) concluded that inclusive leadership affects the level of job embeddedness of employees. Additionally, it was determined that leader-member interaction had a significant effect on job embeddedness . According to the results of the study, it was determined that leader-member interaction played a mediating role in the effect of inclusive leadership on job embeddedness . The results of this research show that leaders in organizations being inclusive, that is, being open, accessible and interacting with employees, can contribute to employees' levels of job embeddedness . Leaders interacting with their employees and being open and communicative can increase employees' commitment to their jobs and the organization. Additionally, the finding that leader-member interaction plays a mediating role in the effect of inclusive leadership on job embeddedness emphasizes the importance of leaders' effective communication and interaction skills.

Günaydın et al. (2023) showed that perceived transformational leadership has a positive effect on job performance and that this effect plays a full mediating role through flow at work. However, the study also found that the positive effect of perceived transformational leadership on job performance disappeared when academics experienced flow at work. Research results highlight the importance of experiencing flow at work. In other words, the flow experience at work has obscured the positive impact of perceived transformational leadership on job performance among academics. This suggests that the effect of flow experience on job performance overshadows the effect of transformational leadership.

According to the results of Taşkın's (2023) research, it was determined that there is a strong and positive relationship between the perception of authentic leadership and trust in the manager. It has been stated that the perception of authentic leadership explains the level of trust in the manager by 53%. This result is consistent with other studies in the literature. In the analysis conducted across institution types, it was determined that association employees with more flexible legal regulations had a higher level of authentic leadership perception compared to employees with foundation status. Another finding of the research is that the perceptions of volunteer employees in the dimensions of authentic leadership, trust in the manager and job performance are significantly higher than those of full-time employees. However, research results indicate that there is no significant relationship between the perception of authentic leadership, trust in the manager and job performance.

## 3. METHOD

### 3.1. Research Method

This study is carried out using the survey technique, which is one of the quantitative research methods. Survey research is usually conducted with larger samples and provides a broad perspective on the general views, interests, skills, abilities or attitudes of participants. This type of research usually aims to collect information about a large population and generally uses techniques such as surveys or interviews in the data collection process. Participants are generally selected to create a representative sample that allows generalizations to be made about the population. Survey studies are a useful research method to understand general trends and the

general situation on a subject. Such studies generally aim to obtain large data sets and make generalizations ( Karasar , 2008).

### 3.2. Population and Sample

The population of the research consists of employees in banks in TRNC. The sample of the study was selected by quota sampling method. Quota sampling is a sampling technique in which the researcher includes a certain proportion of individuals or items that must meet a certain criterion. In this method, a certain quota in sample selection is determined based on demographic or certain characteristics such as gender, age, professional seniority ( Karasar , 2008). The scales distributed and collected via Google Forms between 01.09.2023 and 02.10.2022 were delivered to 350 employees. On the other hand, the forms were received back from 298 people; Due to missing data, 247 of these forms could be included in the study. In this context, the sample of the study consisted of 247 employees.

### 3.3. Data Collection Tools

In the research, data was collected through a scale. The scale used consists of 3 parts. In the first part, there are questions prepared by the researcher to determine the socio -demographic characteristics of the participants .

To evaluate leadership styles, the Perceived Leadership Style Scale, a 15-item Likert- type scale developed by House and Dessler (1974), was used. This scale is designed to examine participatory and directive leadership styles emphasized in the Path-Goal Model of leadership . In the scale, statements are scored between "1: I never agree" and "5: I always agree". The overall  $\alpha$  reliability value of this 15-item scale was calculated as 0.90 by Sari (2022). A scale with a total of 13 items was created, including 8 statements to examine the participatory leadership dimension and 5 statements to evaluate the directive leadership dimension. The  $\alpha$  reliability value of this new 13-item scale was calculated as 0.89. The obtained  $\alpha$  reliability value is higher than 0.70, indicating that the reliability level of the scale is acceptable (Sari, 2022).

In the third section, there are five questions to determine employees' job performance. The self- appraisal method developed by Darwish (2000) (The job performance of employees was measured using approach ). Questions were ranked using a scale from "Strongly Disagree" (1) to "Strongly Agree" (5). In the first scale, the reliability coefficient alpha value was calculated as 0.60. However, after removing the third question, which reduced the reliability of the scale, the reliability level of the scale consisting of four questions was calculated as alpha 0.70 (Tutar, 2008) .

**Table 1.** Reliability Analyzes for Scales

|                                  | Cronbach's Alpha | Article |
|----------------------------------|------------------|---------|
| Perceived Leadership Style Scale | 0.80             | 15      |
| Job Performance Scale            | 0.77             | 5       |

the Cronbach's Alpha value of the perceived leadership style scale is .80; Cronbach's Alpha value of the job performance scale was determined as .77.

### 3.4. Analysis of Data

SPSS 28 program was used to analyze the data collected in the study and was examined at the reliability level. T -Test, ANOVA and ANOVA Tukey tests were used to examine whether the scale scores differ according to socio -demographic characteristics . T-Test is used to compare means between two groups, while ANOVA is used to compare multiple group means, and the ANOVA Tukey test specifically identifies differences between these group means. These statistical methods are widely used to identify significant differences between groups in research or survey data.

## 4. RESULTS

### 4.1. Demographic features

Demographic variables of the participants are given in Table 2:

**Table 2.** Demographic Information of Participants

|        |                    | N   | %    |
|--------|--------------------|-----|------|
| Gender | Woman              | 141 | 57.1 |
|        | Male               | 106 | 42.9 |
| Age    | 30 years and under | 35  | 14.2 |
|        | 31-40 years old    | 131 | 53.0 |

|                                 |                  |     |       |
|---------------------------------|------------------|-----|-------|
|                                 | 41-50 years old  | 81  | 32.8  |
| marital status                  | Married          | 140 | 56.7  |
|                                 | Single           | 107 | 43.3  |
| Working time in the institution | less than 1 year | 47  | 19.0  |
|                                 | 1-5 years        | 106 | 42.9  |
|                                 | 6-10 years       | 70  | 28.3  |
|                                 | 11-15 years      | 24  | 9.7   |
| professional seniority          | less than 1 year | 35  | 14.2  |
|                                 | 1-5 years        | 92  | 37.2  |
|                                 | 6-10 years       | 84  | 34.0  |
|                                 | 11-15 years      | 36  | 14.6  |
|                                 | Total            | 247 | 100.0 |

Looking at Table 2, 57.1% of the participants are female and 42.9% are male; 53% were 31-40 years old, 32.8% were 41-50 years old and 14.2% were 30 years old and under; 56.7% were married and 43.3% were single; The working period in the institution is 42.9% between 1-5 years, 28.3% between 6-10 years, 19% less than 1 year and 9.7% between 11-15 years and the distribution of professional seniority is also It is seen that 37.2% are 1-5 years, 34% are 6-10 years, 14.6% are 11-15 years and 14.2% are less than 1 year.

#### 4.2. Findings Regarding the Descriptive Analysis of the Scales

Table 3 shows the descriptive analysis results of the scales.

**Table 3.** Descriptive Analysis of Scales

|                                | Minimum | Maximum | $\bar{X}$ | SS    |
|--------------------------------|---------|---------|-----------|-------|
| participatory leadership       | 28.00   | 36.00   | 31,42     | 2,008 |
| Directive leadership           | 12.00   | 18.00   | 15.63     | 1,835 |
| Leadership style scale general | 50.00   | 61.00   | 55.87     | 3,403 |
| Performance                    | 19.00   | 21.00   | 20.00     | 0.624 |

According to the results of the analysis, the general average of the leadership style scale ( $\bar{X}$ ) is 55.87 ( Sd . 3.40 ); The average performance scale ( $\bar{X}$ ) was found to be 20 ( Sd . 0, 62). Participative leadership ( $\bar{X}$ =31.42; Sd . 2.00) has the highest mean among the sub-dimensions of the leadership style scale . This shows that participative leadership is more prominent and higher than directive leadership in the leadership style scale. Measurements indicate that leadership style is high but performance is lower. This may indicate that although the leadership style is effective, performance is below expectations.

#### 4.3. Descriptive Analyzes Between Demographic Variables and Perceived Leadership Style Scale

The T-Test results conducted in the study to test the hypothesis "  $H_1$  = Perceived leadership style differs according to gender " are given below.

**Table 4.** Comparison of Perceived Leadership Style Scale Sub-Dimension Scores by Gender

|  | N     | $\bar{X}$ | SS    | f     | p.     |              |
|--|-------|-----------|-------|-------|--------|--------------|
| participatory leadership                 | Woman | 141       | 31,41 | 1,817 | 7,201  | <b>0.008</b> |
|  | Male  | 106       | 31.44 | 2,247 |        |              |
| Directive leadership                     | Woman | 141       | 15.43 | 2,061 | 29,028 | <b>0.000</b> |
|  | Male  | 106       | 15.89 | 1,453 |        |              |
| Perceived leadership style scale general | Woman | 141       | 55.53 | 3,723 | 10,491 | <b>0.001</b> |
|  | Male  | 106       | 56.33 | 2,878 |        |              |

p <0.05

When Table 4 is examined, it is seen that perceived leadership style differs significantly according to gender (p <0.05). Accordingly, it was determined that male participants received higher scores than female participants in

the participatory, directive dimensions and the perceived leadership scale. The finding of a difference in the measurements shows that gender is effective in the perception of leadership style. This indicates that gender may be a determining factor in the way one perceives leadership style.

of the ANOVA conducted to test the hypothesis "H<sub>2</sub> = Perceived leadership style differs according to age" and the ANOVA Tukey test results to determine which groups the differences are between are given below.

**Table 5.** Comparison of Perceived Leadership Style Scale Sub-Dimension Scores by Age

|  |                    | N   | $\bar{X}$ | SS    | f      | p.           | Difference  |
|--|--------------------|-----|-----------|-------|--------|--------------|---|
| participatory leadership                 | 30 years and under | 35  | 32.65     | 0.481 | 20,877 | <b>0.000</b> | 30 years and below > 31-40 years<br>41-50 years old > 31-40 years old |
|  | 31-40 years old    | 131 | 30.73     | 1,722 |        |              |   |
|  | 41-50 years old    | 81  | 32.02     | 2,382 |        |              |   |
| Directive leadership                     | 30 years and under | 35  | 15.28     | 2,407 | 5,649  | <b>0.004</b> | 41-50 years old > 30 years old and below, 31-40 years old             |
|  | 31-40 years old    | 131 | 15.38     | 1,761 |        |              |   |
|  | 41-50 years old    | 81  | 16,18     | 1,550 |        |              |   |
| Perceived leadership style scale general | 30 years and under | 35  | 57.31     | 2,564 | 14,147 | <b>0.000</b> | 30 years and below > 31-40 years<br>41-50 years old > 31-40 years old |
|  | 31-40 years old    | 131 | 54.85     | 3,565 |        |              |   |
|  | 41-50 years old    | 81  | 56.91     | 2,912 |        |              |   |

p < 0.05

When Table 5 is examined, it is seen that there are significant differences between perceived leadership style and age (p < 0.05). Accordingly, the general scores of the participatory leadership dimension and the perceived leadership scale were found to be higher for participants aged 30 and under than for participants aged 31-40, and for participants aged 41-50 than for participants aged 31-40. In the directive leadership dimension, it was determined that participants between the ages of 41-50 received higher scores than both participants aged 30 and under and participants between the ages of 31-40.

The results of the T-Test conducted in the research to test the hypothesis "H<sub>3</sub> = Perceived leadership style differs according to marital status" are given below.

**Table 6.** Comparison of Perceived Leadership Style Scale Sub-Dimension Scores According to Marital Status

|  |         | N   | $\bar{X}$ | SS    | f      | p.           | Difference |
|--|---------|-----|-----------|-------|--------|--------------|------------|
| participatory leadership                 | Married | 140 | 31.49     | 1,732 | 14,917 | <b>0.000</b> |            |
|  | Single  | 107 | 31,34     | 2,327 |        |              |            |
| Directive leadership                     | Married | 140 | 15.75     | 1,798 | 3,335  | <b>0.069</b> |            |
|  | Single  | 107 | 15.47     | 1,880 |        |              |            |
| Perceived leadership style scale general | Married | 140 | 56.25     | 2,968 | 14,698 | <b>0.000</b> |            |
|  | Single  | 107 | 55.38     | 3,859 |        |              |            |

p < 0.05

When Table 6 is examined, it is seen that there are significant differences between perceived leadership style and marital status (p < 0.05). Accordingly, married participants received higher scores than single participants in the participatory and directive leadership dimensions and the perceived leadership style scale. In this case, it seems that marriage status affects the perception of leadership style.

, the ANOVA performed to test the hypothesis "H<sub>4</sub> = Perceived leadership style differs according to the duration of employment in the institution" and the ANOVA Tukey test results to determine which groups the differences are between are given below.

**Table 7.** Comparison of Perceived Leadership Style Scale Sub-Dimension Scores According to Duration of Working in the Institution

|                          |                  | N   | $\bar{X}$ | SS      | f     | p.    | Difference    |
|--------------------------|------------------|-----|-----------|---------|-------|-------|---------------|
| participatory leadership | less than 1 year | 47  | 31.7660   | 0.42798 | 1,934 | 0.125 | No difference |
|                          | 1-5 years        | 106 | 31.0849   | 2.09815 |       |       |               |

|  |                  |     |         |         |       |              |                                |
|--|------------------|-----|---------|---------|-------|--------------|--------------------------------|
|  | 6-10 years       | 70  | 31.7000 | 2.53869 |       |              |                                |
|  | 11-15 years      | 24  | 31.5000 | 1.53226 |       |              |                                |
|  | less than 1 year | 47  | 15.2766 | 2.42901 |       |              |                                |
| Directive leadership                     | 1-5 years        | 106 | 15.7547 | 1.63189 | 2,975 | <b>0.032</b> | 11-15 years > Less than 1 year |

|  | 11-15 years      | 24  | 16.5000 | 0.51075 |       |              |                                |
|  | less than 1 year | 47  | 56.0426 | 2.14636 |       |              |                                |
| Perceived leadership style scale general | 1-5 years        | 106 | 55.7264 | 4.11625 | 1,118 | 0.343        | No difference                  |
|  | 6-10 years       | 70  | 55.6143 | 3.39775 |       |              |                                |
|  | 11-15 years      | 24  | 57.0000 | 1.02151 |       |              |                                |
|  | less than 1 year | 47  | 56.0426 | 2.14636 |       |              |                                |

p < 0.05

When Table 7 is examined, no relationship was found between participatory leadership and the overall perceived leadership scale and the length of time working in the institution (p > 0.05). On the other hand, it was observed that there was a significant relationship between directive leadership and working time in the institution (p < 0.05). Participants who have worked in the organization for 11-15 years have higher directive leadership scores than those who have worked for less than 1 year.

The results of the ANOVA Test conducted in the research to test the hypothesis "H<sub>5</sub> = Perceived leadership style differs according to professional seniority" are given below.

**Table 8.** Comparison of Perceived Leadership Style Scale Sub-Dimension Scores According to Professional Seniority

|                                |                  | N  | $\bar{X}$ | SS    | f      | p.           | Difference          |
|--------------------------------|------------------|----|-----------|-------|--------|--------------|---------------------|
| participatory _ leadership     | less than 1 year | 35 | 31.71     | 1,250 | 22,788 | <b>0.000</b> | 1 year > 6-10 years |

|                                | 6-10 years       | 84 | 14.42     | 1,507 |        |              |                     |
|                                | 11-15 years      | 36 | 17.00     | 0.828 |        |              |                     |
| Leadership style scale general | less than 1 year | 35 | 56.17     | 4,239 | 34,360 | <b>0.000</b> | 1 year > 6-10 years |
|                                | 1-5 years        | 92 | 57.04     | 2,449 |        |              |                     |
|                                | 6-10 years       | 84 | 53.42     | 2,786 |        |              |                     |
|                                | 11-15 years      | 36 | 58.33     | 2,390 |        |              |                     |

p < 0.05

When Table 8 is examined, it is seen that there is a significant difference between participatory leadership, directive leadership dimensions and perceived leadership style between general and professional seniority (p < 0.05). Accordingly, it was determined that, in terms of participatory leadership and perceived leadership style, those with less than 1 year of professional seniority received higher scores than those with 6-10 years of professional seniority, and those with 1-5 years of professional seniority than those with 6-10 years of professional seniority. Similarly, in the directive leadership dimension, it was determined that those with less than 1 year of professional seniority received higher scores than those with 6-10 years of professional seniority, and those with 1-5 years of professional seniority scored higher than those with both less than 1 year and 6-10 years of professional seniority.

#### 4.4. Descriptive Analyzes Between Demographic Variables and Performance Scale

The results of the analysis conducted to test the hypothesis "H<sub>6</sub> = Job performance differs according to demographic variables" are given below.

**Table 9.** Comparison of Performance Scale Scores According to Demographic Variables

|  | N   | $\bar{X}$ | SS    | f      | p.           | Difference  |
|--|-----|-----------|-------|--------|--------------|---|
| <b>Gender</b>                          |     |           |       |        |              |   |
| Woman                                  | 141 | 20.08     | 0.499 | 30,241 | <b>0.000</b> | Female > Male   |
| Male                                   | 106 | 19.88     | 0.747 |        |              |   |
| <b>Age</b>                             |     |           |       |        |              |   |
| 30 years and under                     | 35  | 20.34     | 0.481 | 7,006  | <b>0.001</b> | 30 years old > 31-40 years old; 41 -50 years old      |
| 31-40 years old                        | 131 | 19.9      | 0.673 |        |              |   |
| 41-50 years old                        | 81  | 20        | 0.547 |        |              |   |
| <b>marital status</b>                  |     |           |       |        |              |   |
| Married                                | 140 | 20.25     | 0.604 | 3,462  | 0.64         | No difference   |
| Single                                 | 107 | 19.66     | 0.474 |        |              |   |
| <b>Working time in the institution</b> |     |           |       |        |              |   |
| less than 1 year                       | 47  | 20        | 0     | 15,701 | <b>0.000</b> | 1 year > 11-15  |
| 1-5 years                              | 106 | 19.88     | 0.747 |        |              | 1-5 years > 11-15 years                               |
| 6-10 years                             | 70  | 20.34     | 0.478 |        |              | 6-10 years > less than 1 year; 1-5 years; 11-15 years |
| 11-15 years                            | 24  | 19.5      | 0.51  |        |              |   |
| <b>professional seniority</b>          |     |           |       |        |              |   |
| less than 1 year                       | 35  | 20.34     | 0.481 | 34,263 | <b>0.000</b> | 1 year > 1-5 years, 6- 10 years                       |
| 1-5 years                              | 92  | 19.86     | 0.338 |        |              | 11-15 years > less than 1 year; 1-5 years; 6-10 years |
| 6-10 years                             | 84  | 19.71     | 0.704 |        |              |   |
| 11-15 years                            | 36  | 20.66     | 0.478 |        |              |   |

p < 0.05

When Table 9 is examined, it is seen that there is a significant difference between performance and gender, age, working time in the institution and professional seniority (p < 0.05). Accordingly, in terms of job performance;

- Female participants differ from men;
- Participants under the age of 30 are divided into participants between the ages of 31-40 and 41-50;
- Those who have worked in the institution for less than 1 year are those who have worked between 11-15 years; Those who have been working in the institution for 1-5 years are separated from those who have been working in the institution for 11-15 years, and those who have been working in the institution for 6-10 years are less than 1 year;
- one year of professional seniority are those with 1-5 years of professional seniority and those with 6-10 years of professional seniority; Those with 11-15 years of professional seniority are less than 1 year, 1-5 years and 6-10 years of professional seniority.

higher scores.

#### 4.5. The Relationship Between Leadership Structure and Performance

The results of the correlation analysis conducted to test the hypothesis "H<sub>7</sub> = There is a relationship between leadership structure and performance" are given below.

**Table 10.** Correlation Analysis on the Relationship Between Leadership Structure and Employee Performance

|                                |    | Performance Scale |
|--------------------------------|----|-------------------|
| participatory leadership       | r  | -.194 **          |
|                                | p. | 0.002             |
| Directive leadership           | r  | .128 *            |
|                                | p. | 0.045             |
| Leadership style scale general | r  | -0.023            |
|                                | p. | 0.720             |

\*\* . The correlation is significant at the 0.01 level.

\* . The correlation is significant at the 0.05 level.

When Table 10 is examined, there is a weak and negative relationship between participatory leadership and performance ( $r=-.194$ ;  $p=0.002$ ); While there was a weak and positive relationship ( $r=.128$ ;  $p=0.045$ ) between directive leadership and performance ; It was observed that there was no relationship between perceived leadership style and job performance.

#### 4.6. The Effect of Leadership Structure on Employee Performance

the regression analysis conducted to test the hypothesis "H<sub>8</sub> = Leadership structure has an effect on performance" are given below.

**Table 11.** Regression Analysis on the Effect of Leadership Structure on Employee Performance

|                                | Unstandardized Coefficients |          | Standardized Coefficients |        |              |
|--------------------------------|-----------------------------|----------|---------------------------|--------|--------------|
|                                | $\beta$                     | S. Error | $\beta$                   | t      | p.           |
| (Still)                        | 20,876                      | 0.687    |                           | 30,395 | 0.000        |
| participatory leadership       | -0.184                      | 0.055    | -0.591                    | -3.315 | <b>0.001</b> |
| Directive leadership           | -0.021                      | 0.055    | -0.061                    | -0.377 | 0.706        |
| Leadership style scale general | 0.094                       | 0.049    | 0.510                     | 1,914  | 0.057        |

a. Dependent variable: Performance Scale

When Table 11 is examined, it is seen that participatory leadership has an effect on business performance ( $\beta=-0.591$ ;  $p<0.01$ ). In other words, participative leadership has been identified as an important factor on business performance. On the other hand, it was observed that directive leadership and perceived leadership style had no effect on job performance .

#### 4. CONCLUSIONS AND RECOMMENDATIONS

examining the effect of leadership structure in banks on employee performance are summarized below.

As a result of the analysis, it was found that the leadership style among the participants varied depending on gender. When the participatory and directive leadership dimensions and the general leadership scale were examined, it was observed that male participants received higher scores than female participants.

It has also been determined that there are certain differences between age and perceived leadership style. Significant differences were determined in the participatory leadership dimension and general leadership scale scores between participants aged 30 and under, 31-40 years and 41-50 years of age. Similarly, participants between the ages of 41-50 received higher scores in the directive leadership dimension than participants in other age groups.

Married individuals received higher scores than single individuals in the participatory and directive leadership dimensions. In this case, it seems that marriage status affects the perception of leadership style. Marriage can lead to an increase in individuals' life experience and responsibilities, which can lead to differences in their perception of leadership style. The fact that married individuals score higher may indicate that leadership style may change in relation to marital status.

In the study, it was determined that there was a relationship between directive leadership and working time. Participants who worked in the organization for 11-15 years received higher directive leadership scores compared to those who worked for less than 1 year. This may indicate that working time has an impact, especially on directive leadership.

A significant relationship was found between participatory leadership, directive leadership dimensions, general leadership perception and professional seniority. The findings showed that individuals with less than 1 year of seniority had higher scores on both participatory leadership and general leadership perception than those with a tenure of 6-10 years. In the directive leadership dimension, individuals with less than 1 year of seniority have higher scores than those with 6-10 years of seniority, and individuals with 1-5 years of seniority have higher scores than individuals with less than 1 year of seniority but also have 6-10 years of seniority. It was determined that he got points.

Significant differences are observed between job performance and gender, age, working time in the institution and professional seniority. In terms of business performance; female participants received higher scores than men, participants under the age of 30 received higher scores than participants between the ages of 31-40 and 41-50, those who worked in the institution for less than 1 year than those who worked in the institution for 11-15 years, and those who worked in the institution for 1-5 years than those who worked in the institution for 11-15 years. In addition, those who have worked in the institution for 6-10 years are less than 1 year, those who have worked for 1-5 years and 11-15 years; those with less than 1.5 years of professional seniority are compared to those with 1-5 years and 6-10 years of professional seniority; Those with 11-15 years of professional seniority also received higher scores than those with less than 1 year, 1-5 years and 6-10 years of professional seniority.

In the study, a negative and weak relationship was found between participatory leadership and performance, and a positive and weak relationship was observed between directive leadership and performance. However, no relationship has been identified between perceived leadership style and job performance. It has also been observed that participatory leadership has a significant effect on business performance. On the other hand, it was determined that directive leadership and perceived leadership style had no effect on job performance.

At the end of the study, the following recommendations were developed.

- Giving More Weight to Leadership Training in Training Programs: More emphasis can be given to training programs aimed at improving leadership skills, especially in the participatory leadership dimension. Training can help effectively develop leadership styles by emphasizing participatory leadership competencies.
- Opportunities for Employee Development: Longer working hours are associated with higher scores on the directive leadership dimension. This indicates that employees can develop directive leadership skills later in their careers. In this context, training and opportunities that support the leadership skills of employees can be offered in parallel with their professional seniority.
- Greater Sensitivity to Diversity and Equity: The impact of demographic factors such as gender and age on leadership styles should be considered. For example, special support programs can be created to improve the participatory leadership skills of women leaders. Diversity and equality can be achieved by organizing trainings focusing on different leadership skills across age groups.
- In-Depth Investigations to Understand the Relationship between Leadership and Performance: A more comprehensive analysis of the research can be done to understand the relationship between job performance and leadership styles. More detailed studies that consider other factors affecting performance may be important in order to understand the relationship between leadership and performance in a more holistic way.

These suggestions can be basic steps for developing leadership skills, providing supports appropriate to employees' needs, and establishing an equitable environment in terms of diversity.

The following suggestions are offered for future studies :

- Studies Examining the Relationship between Leadership and Performance in Depth: Studies using a combination of qualitative and quantitative methods can be conducted in order to understand the relationship between leadership styles and job performance in more detail. More comprehensive results can be obtained by conducting these studies in different sectors and leadership models.
- Diversity and Leadership: Studies focusing on the different leadership styles of leaders with different demographic characteristics can help us better understand the relationship between diversity and leadership. It is especially important to examine female leaders, especially in terms of participatory leadership.
- Studies in Different Industries: Comparative studies in different industries and organizations can be valuable to understand how leadership styles vary in different sectors. For example, comparative research on leadership styles can be conducted between the service sector, the technology sector and the manufacturing sector.

These recommendations can guide future research to better understand the relationship between leadership and performance, examine the relationship between diversity and leadership, understand long-term effects, and understand leadership practices in different sectors.

azmiye.yinal@akun.edu.tr

## ABSTRACT

The aim of this study is to examine the effect of mobbing on employee performance. In this context, the study was conducted using the survey technique from quantitative research methods. The population of the study consisted of bank employees in TRNC and the sample consisted of 247 bank employees. The data were collected using the Psychological Violence Inventory (LIPT) developed by Davenport et al. (2003) and the Performance Scale used by Çorbacıoğlu (2018) and analyzed using SPSS 28 software.

The study showed that male respondents generally scored higher than female respondents on certain dimensions of psychological violence. This suggests that men may be more likely to experience psychological violence in dimensions such as self-expression, restriction of communication opportunities, attack on social reputation and attack on professional status. Analyses between different age groups at the end of the study showed that there were significant differences in certain dimensions of psychological violence. For example, while 20-30 year olds may be affected in a different dimension than 31-42 year olds, the 31-42 age range was more affected than other age groups. Also, participants aged 43 years and older were more affected than those aged 31-42 years. Differences between married and single participants are particularly evident in the dimension of "Restriction of self-expression and communication opportunities". Single participants scored higher in this dimension, while married participants scored higher in other specific dimensions. The study showed that mobbing differs in various dimensions of psychological violence according to professional seniority. The study reveals that there is no direct relationship between employee performance and gender, age and marital status, but professional seniority has a significant impact on performance.

The research shows that there is a certain relationship between employee performance and psychological violence inventory and its sub-dimensions. "Restriction of opportunities for self-expression and communication", "Attack on social reputation" and "Psychological Violence Inventory (General)" dimensions have a positive and strong relationship with performance, while "Attack on quality of life and professional status", "Attack on social relationships" and "Direct attack on health" dimensions have a moderate positive relationship with performance. Research results show that different psychological violence sub-dimensions have varying effects on employee performance. The dimension of "Assault in social relationships" was found to negatively affect performance, suggesting that aggressive behaviors that employees are exposed to in their social relationships may negatively affect their performance. Another finding is that the "Psychological Violence Inventory" has a positive effect on performance. It is suggested that individuals who experience general psychological violence may show higher performance.

**Keywords:** Mobbing, Performance, Job performance.

## 1. INTRODUCTION

### 1.1. Problem Status

Mobbing refers to systematic, continuous and repetitive aggressive behavior towards individuals in a work environment (Çavuş, 2009). Such behavior damages people's reputation, creates psychological stress and can negatively affect work performance. People exposed to mobbing may experience intense stress. Constant exposure to aggressive behavior can lead to psychological problems such as anxiety, depression, and sleep problems. This situation may reduce people's concentration and motivation, they may have difficulty in performing work-related tasks, and productivity may decrease (Yıldız et al., 2018).

Mobbing can damage an individual's self-confidence. A person who is exposed to aggressive behavior may lose faith in his own abilities. This loss of self-confidence can negatively impact job performance and lead a person to be less entrepreneurial, avoid taking risks, and act out of fear of failure. Mobbing may lead the person to move away from the work environment (Mercanlıoğlu, 2010). The individual may exhibit behaviors such as changing jobs, not asking for promotions, or not fulfilling their duties in order to escape aggressive behavior. This situation can reduce work performance and create job dissatisfaction (Göymen, 2020).

Mobbing is common, communication and cooperation between people may become difficult. Victims of mobbing may avoid interacting with other employees or have trust issues. This situation can negatively affect teamwork, reduce information sharing, and lead to failure in projects that require collaboration (Cevher and Öztürk, 2015). This shows that mobbing can negatively affect work performance (Aslan and Yinal, 2023).

Effects such as psychological stress, loss of self-confidence, thoughts of withdrawal from work and communication problems can reduce a person's productivity and cause a decrease in work performance. Therefore, it is very important to prevent mobbing in work environments and provide support to victims (Karcioğlu and Çelik, 2012).

### 1.2. Purpose and Importance of the Research

The purpose of this research is to examine the effect of mobbing on employee performance. This study is very important in terms of understanding and evaluating the effects of mobbing on employees. The research reveals that mobbing can have an impact on the overall performance of employees. It will contribute to the literature, especially in terms of investigating the direct relationship of gender, age, marital status and professional seniority with performance.

This study is an important step in determining the effects of different dimensions of psychological violence in workplaces on employee performance. The findings provide valuable clues to improve the working environment in workplaces and increase employee performance. Therefore, the results of such research are important for creating a healthier and more productive working environment in workplaces and can contribute to the revision of workplace policies and management strategies in the light of this information.

### 1.3. Hypotheses

The hypotheses of this research are as follows:

H<sub>1</sub> : Exposure to mobbing differs according to gender.

H<sub>2</sub> : Exposure to mobbing varies according to age.

H<sub>3</sub> : Exposure to mobbing varies according to marital status.

H<sub>4</sub> : Exposure to mobbing varies according to professional seniority.

H<sub>5</sub> : Employee performance varies according to demographic characteristics.

H<sub>6</sub> : There is a relationship between exposure to bullying and performance.

H<sub>7</sub> : Mobbing has an effect on employee performance.

### 1.4. Assumptions

It is assumed that research participants give their answers to the survey questions sincerely.

### 1.5. Limitations

Research;

- With research participants,
- With the scale questions used in the research,
- It is limited to the sources used in the research.

### 1.6. Definitions

**Mobbing:** It is a set of aggressive behaviors that are constantly and systematically applied against a person in a business or working environment (Çavuş, 2009).

**Performance:** It refers to the extent to which a person or an organization effectively performs or completes a certain job (Tunçer, 2013).

## 2. THEORETICAL FRAMEWORK

### 2.1. Definition and Scope of the Concept of Mobbing

Mobbing is one of the concepts that has had a significant negative impact on working life in recent years. In simpler terms, it can be defined as a systematic and deliberate emotional attack, psychological violence and attrition targeting one or more employees in the workplace. Mobbing is defined as repeated humiliation, slander, persistent criticism, exclusion from the work environment and regular aggression. It is considered a case that at least one person in the institution is constantly exposed to negative situations for a minimum of six months (Vaclavíkova and Kozakova, 2022). The main aim of the perpetrators in these attacks is to ensure that the targeted person leaves the workplace. However, it is observed that those who are exposed to mobbing attacks leave the workplace at the end of the process and sometimes experience serious negative consequences such as suicide. Mobbing, work in your life often encountered one person sources problem the one which... psychological abuse or psychological violence also called one is the concept. Mobbing, a person at the workplace continually aspect aim taking, discrimination to be attacked, to be attacked to suffer or psychological aspect uncomfortable to be status expression it does. These situations generally at work other employees, managers or employer by is applied.

Mobbing events have negative effects on employees at the family, organizational and social levels as well as at the individual level. Negative effects that may occur at the family level due to mobbing include loss of family income, separation and divorce due to domestic unrest, and risks to children's mental and physical health. For

organizations, economic losses caused by compensation cases filed due to mobbing, increased employee turnover rate, and productivity costs caused by significant loss of motivation in the workplace come to the fore ( Dutour et al., 2022 ). At the social level, a social structure in which health expenses imposed on the social security system due to health problems, tax losses due to unemployment and working below capacity, increases in social aid demands and the financial burden of the social security system, early or disabled retirement and unhappy individuals increases can be considered ( Ghiasee, 2022). For this reason, mobbing needs to be carefully considered and the necessary steps must be taken to analyze it. Mobbing is also considered as repeated attack or psychological pressure/terror by the employee or employer in the workplace. Mobbing in the workplace is implemented systematically and with bad intentions, through pressure elements such as unfair accusations, humiliation, and harassment, to force a person to leave the institution where he/she works (Çınar, Korkmaz, & Yılmaz, 2016).

## 2.2. Definition and Scope of Performance

Performance is a concept used to evaluate how effectively a person or organization achieves certain goals or objectives. Performance can be used in a variety of contexts, such as the performance of employees in the workplace, the performance of athletes, or the performance of an organization. The scope of performance is quite broad and includes the degree of achievement of objectives, quality, efficiency and effectiveness. Performance evaluation is frequently used in workplaces to determine how effectively employees are performing their duties. This is important to increase business efficiency, reduce costs, improve service quality or achieve the overall goals of the organization (Ertaş and Atalay, 2016) .

At the organizational level, performance is evaluated based on factors such as the financial results of a business or organization, customer satisfaction, market share and the effectiveness of business processes. Performance management is used to help organizations achieve their goals and direct them in line with strategic goals. The concept of performance has a wide range of applications for measuring, improving and guiding success and can be defined and evaluated in different ways in different contexts. In the broad field of Management, the use of terminology is a sensitive material because each term defines a specific concept and concepts can be developed according to their definitions and used in other fields (Öztaş and Gürcüoğlu, 2018) .

Samsonowa (2012) argues that all the different definitions he had to examine in the performance measurement literature have a common feature; they are all related to two terms. These terms are effectiveness and efficiency. Achieving a level of activities and achievements that will be an indication of the level of attainment of a goal is efficiency, which is an indicator of the resources spent. In his study, he uses the term “performance” as the level/degree of achieving goals of an organization/department rather than individuals. Andersen and Fagerhaug (2002) acknowledge that it is sufficient to have reached a point where performance replaces productivity and that it generally covers a wide range of aspects of an organization, from legacy productivity to the ability to innovate. According to Krause (2005), performance means the degree to which an organization achieves or potentially achieves goals regarding its important characteristics for its relevant stakeholders.

## 3. METHOD

### 3.1. Research Method

This study was conducted using the scanning technique, one of the quantitative research methods. Survey research is usually conducted with larger samples and provides a broad perspective to understand the general views, interests, skills, abilities or attitudes of the participants. This research method generally aims to collect information about a broad population, and data is often collected through techniques such as surveys or interviews. Participants are usually selected to be representative of the population so that generalizations can be made. Survey studies are useful for understanding general trends and the general situation on a topic. This type of research generally aims to obtain large data sets and make generalizations. (Karasar , 2008).

### 3.2. Population and Sample

The population of the research consists of bank employees in TRNC. The sample of the study was selected by purposeful sampling method. Purposeful sampling method is the sampling of participants selected for a specific purpose during a research or investigation. This method allows researchers to focus their work on a specific goal or purpose. Depending on the particular goal or topic of study, researchers may focus on specific qualities, characteristics, or a specific sample group. For example, if a researcher wants to study employees in a certain sector, he can select a certain group of people who represent employees in this sector as a purposeful sample (Karasar , 2008). In this context, bank employees were included in the study. Between 01.09.2023 and 02.10.2022, 400 scale forms were distributed via Google Forms and feedback was received from 300 employees. Of the forms returned, the forms of 247 people were determined as the sample.

### 3.3. Data Collection Tools

in the research consists of three parts. The first part includes questions prepared by the researcher to determine the demographic characteristics of the participants. In the second part, the Psychological Violence Inventory (LIPT) was used. In the study conducted by Çorbacioğlu (2018), two different surveys were used as mobbing and performance scales. Leymann's "Psychological Violence Inventory (LIPT)", which includes 45 different mobbing behaviors, was preferred as the mobbing scale. In this scale, mobbing is examined in five different dimensions: "Restriction of self-expression and communication opportunities", "Attack on social relations", "Attack on social reputation", "Attack on quality of life and professional status" and "Direct attack on health". The original source of the survey is German, and its Turkish translation was taken from the book "Mobbing Emotional Harassment in the Workplace" by ÖnerToy (Davenport et al., 2003).

In the third part, Performance Scale was used. A 7-question scale was used to measure performance. A 5-point Likert scale was used for the statements in the survey form and participants were asked to determine their judgments. In this scale, evaluation was made between 1 "Strongly Disagree" and 5 "Strongly Agree". In previous studies, the internal consistency coefficient of the mobbing scale was found to be Cronbach's The alpha value was found to be 0.93 and the performance scale was found to be 0.80, and both scales were determined to be reliable.

Table 1. Reliability Analyzes for Scales

|  | Cronbach's Alpha | Article |
|--|------------------|---------|
| Inventory of Psychological Severity (LIPT) | 0.938            | 45      |
| Performance scale                          | 0.746            | 7       |

In this study, the Inventory of Psychological Severity (LIPT) Cronbach's Alpha value of 0.938 is quite reliable; The Cronbach's Alpha value of the performance scale was found to be reliable at 0.746.

### 3.4. Analysis of Data

In the research, the reliability of the data obtained using SPSS 28 software was examined. T-Test, ANOVA and ANOVA Tukey tests were used to understand whether the scale scores differ according to demographic characteristics. T-Test was used to compare mean scores between two different groups, while ANOVA was used to compare means of more than one group. ANOVA Tukey test was used specifically to determine the differences between these groups. These statistical methods are frequently used to identify significant differences between groups in research or survey data.

## 4. FINDINGS

### 4.1. Demographic features

Demographic variables of the participants are given in Table 2.

Table 2. Percentage and Frequency Values of Demographic Information of Participants

|                        |                    | N   | %     |
|------------------------|--------------------|-----|-------|
| Gender                 | Woman              | 90  | 36.4  |
|                        | Male               | 157 | 63.6  |
| Age                    | 20-30 years old    | 101 | 40.9  |
|                        | 31-42 years old    | 95  | 38.5  |
|                        | age 43 and over    | 51  | 20.6  |
| marital status         | Married            | 175 | 70.9  |
|                        | Single             | 72  | 29.1  |
| professional seniority | Less than 1 year   | 21  | 8.5   |
|                        | 1-5 Years          | 80  | 32.4  |
|                        | 6-10 Years         | 62  | 25.1  |
|                        | 11-15 Years        | 44  | 17.8  |
|                        | more than 15 years | 40  | 16.2  |
|                        | Total              | 247 | 100.0 |

When Table 2 is examined, it is seen that 63.6% of the participants are male and 36.4% are female. Considering the age distribution, 40.9% of the participants are 20-30 years old; It is seen that 38.5% are between the ages of 31-42 and 20.6% are between the ages of 43 and over. While 70.9% of the participants were married and 29.1% were single, 32.4% of the professional seniority distributions were 1-5 years, 25.1% were 6-10 years, and 17.8% were 11 years. -15 years, 16.2% are more than 15 years and 8.5% are less than 1 year.

#### 4.2. Participants' Exposure to Mobbing and Performance Levels

the participants' exposure to mobbing and their performance perceptions is given in Table 3.

**Table 3. Distribution of Participants' Exposure to Mobbing and Performance Perceptions**

|  | Minimum | Maximum | $\bar{X}$ | Ss .   |
|--|---------|---------|-----------|--------|
| Restriction of self-expression and communication opportunities | 40.00   | 54.00   | 48.54     | 3,736  |
| Attack on social relations                                     | 10.00   | 21.00   | 16.47     | 2,625  |
| Attack on social reputation                                    | 45.00   | 66.00   | 53.50     | 5,221  |
| Attack on quality of life and occupational status              | 32.00   | 43.00   | 38.16     | 3,157  |
| Direct attack on health  | 10.00   | 20.00   | 16,19     | 2,239  |
| Psychological Violence Inventory (General)                     | 148.00  | 201.00  | 172.87    | 14,085 |
| Performance Scale  | 19.00   | 28.00   | 23.54     | 2,457  |

When Table 3 is examined, it is seen that the Performance Scale total score is 23.54, while the Psychological Violence Inventory (General) score is 172.87. In this case, it can be said that the person's performance is low but the level of psychological violence is quite high. It was determined that the highest score among the sub-dimensions of the Psychological Violence Inventory belonged to the Attack on Social Reputation ( $\bar{X} = 53.50$ ;  $SD = 5.221$ ) and the lowest score belonged to the Direct Attack on Health dimension. This may indicate that aggressive behavior towards the person's social reputation is evident. It means that the person may have aggressive or harmful behavior in social relations, in society or in relationships with people around him. Additionally, the lowest score was found to belong to the Direct Attack on Health dimension. This may indicate that the person has fewer aggressive behaviors directly related to health or that the factors measured in this dimension are less decisive for the person.

#### 4.3. The Relationship Between Demographic Variables and Exposure to Mobbing

In the study to test the hypothesis " $H_1$ : Exposure to mobbing differs according to gender" are given in Table 4.

**Table 4. Comparison of Exposure to Mobbing by Gender**

|  | N     | $\bar{X}$ | Ss .  | f      | p.     |              |
|--|-------|-----------|-------|--------|--------|--------------|
| Restriction of self-expression and communication opportunities | Woman | 90        | 46,40 | 4,315  | 44,028 | <b>0.000</b> |
|  | Male  | 157       | 49.77 | 2,688  |        |              |
| Attack on social relations                                     | Woman | 90        | 14.31 | 2,175  | 0.051  | 0.821        |
|  | Male  | 157       | 17.71 | 1,980  |        |              |
| Attack on social reputation                                    | Woman | 90        | 50.96 | 5,0267 | 5,222  | <b>0.023</b> |
|  | Male  | 157       | 54.95 | 4,768  |        |              |
| Attack on quality of life and occupational status              | Woman | 90        | 35.81 | 3,408  | 42,967 | <b>0.000</b> |
|  | Male  | 157       | 39.51 | 2,014  |        |              |
| Direct attack on health  | Woman | 90        | 14.66 | 2,049  | 0.007  | 0.932        |
|  | Male  | 157       | 17.06 | 1,845  |        |              |

|                                      |          |       |     |        |        |        |              |
|--------------------------------------|----------|-------|-----|--------|--------|--------|--------------|
| Psychological<br>Inventory (General) | Violence | Woman | 90  | 162.15 | 13,146 | 13,877 | <b>0.000</b> |
|                                      |          | Male  | 157 | 179.01 | 10,487 |        |              |

p<0.05

When Table 4 is examined, it was determined that the dimensions of restriction of self-expression and communication opportunities, attack on social reputation, attack on quality of life and professional status, and Psychological Violence Inventory (General) showed significant differences according to gender (p <0.05). Accordingly, male participants received higher scores than females in the dimensions of restriction of self-expression and communication opportunities, attack on social reputation, attack on quality of life and professional status, and Psychological Violence Inventory (General). This may indicate that men may be more exposed to or are more exposed to the effects of such violence in dimensions such as restriction of self-expression and communication opportunities, attack on social reputation, attack on quality of life and professional status.

In the study, the results of the ANOVA test performed to test the hypothesis "H<sub>2</sub> : Exposure to mobbing varies according to age" and the ANOVA Tukey test results performed to determine which groups the difference is between are given in Table 5.

**Table 5.** Comparison of Exposure to Mobbing by Age

|  |                 | N   | $\bar{X}$ | ss     | f      | p.           | Difference  |
|--|-----------------|-----|-----------|--------|--------|--------------|---|
| Restriction of self-expression and communication opportunities | 20-30 years old | 101 | 49.10     | 3,376  | 5,327  | <b>0.005</b> | 20-30 years old > 31-42 years old                 |
|  | 31-42 years old | 95  | 47.57     | 3,998  |        |              |   |
|  | age 43 and over | 51  | 49.21     | 3,601  |        |              |   |
| Attack on social relations                                     | 20-30 years old | 101 | 15.30     | 2,918  | 20,421 | <b>0.000</b> | 31-42 years old > 20-30 years old                 |
|  | 31-42 years old | 95  | 17.08     | 2,171  |        |              |   |
|  | age 43 and over | 51  | 17.64     | 1,775  |        |              |   |
| Attack on social reputation                                    | 20-30 years old | 101 | 51.17     | 4,271  | 46,846 | <b>0.000</b> | 31-42 years old > 20-30 years old                 |
|  | 31-42 years old | 95  | 53.25     | 4,397  |        |              |   |
|  | age 43 and over | 51  | 58.56     | 4,904  |        |              |   |
| Attack on quality of life and occupational status              | 20-30 years old | 101 | 38,36     | 3,071  | 4,661  | <b>0.010</b> | 43 and over > 31-42 years old                     |
|  | 31-42 years old | 95  | 37.47     | 2,988  |        |              |   |
|  | age 43 and over | 51  | 39.05     | 3,402  |        |              |   |
| Direct attack on health  | 20-30 years old | 101 | 15,12     | 2,500  | 23,900 | <b>0.000</b> | 31-42 years old > 20-30 years old                 |
|  | 31-42 years old | 95  | 16.73     | 1,769  |        |              |   |
|  | age 43 and over | 51  | 17.27     | 1,497  |        |              |   |

p<0.05

When Table 5 is examined, it is seen that exposure to mobbing varies significantly according to age (p <0.05). According to this

- In the dimension of restricting self-expression and communication opportunities, participants between the ages of 20-30 are more likely than those between the ages of 31-42;
- In terms of attack on social relations, participants aged 31-42 are more likely than those aged 20-30, and participants aged 43 and over are more likely than those aged 20-30;
- In terms of attacks on social reputation, participants between the ages of 31-42 are more likely than those between the ages of 20-30, and participants aged 43 and over are more likely than those between the ages of 20-30 and 31-42;
- In terms of attack on quality of life and occupational status, participants aged 43 and over are more likely than those aged 31-42;
- In terms of direct attack on health, participants aged 31-42 are more likely than those aged 20-30, and participants aged 43 and over are more likely than those aged 20-30;
- In the Psychological Violence Inventory (General), it was observed that participants aged 43 and over scored higher than those aged 20-30 and 31-42.

The T-test results conducted in the study to test the hypothesis "H<sub>3</sub> : Exposure to mobbing varies according to marital status" are given in Table 6.

**Table 6. Comparison of Exposure to Mobbing by Marital Status**

|  |         | N   | $\bar{X}$ | Ss .   | f      | p.           |
|--|---------|-----|-----------|--------|--------|--------------|
| Restriction of self-expression and communication opportunities | Married | 175 | 47.81     | 3,938  | 11,484 | <b>0.001</b> |
|  | Single  | 72  | 50,31     | 2,419  |        |              |
| Attack on social relations                                     | Married | 175 | 17.09     | 2,015  | 26,433 | <b>0.000</b> |
|  | Single  | 72  | 14.97     | 3,271  |        |              |
| Attack on social reputation                                    | Married | 175 | 53.66     | 5,105  | 2,005  | 0.158        |
|  | Single  | 72  | 53.09     | 5,508  |        |              |
| Attack on quality of life and occupational status              | Married | 175 | 37.90     | 3,241  | 0.548  | 0.460        |
|  | Single  | 72  | 38.79     | 2,867  |        |              |
| Direct attack on health  | Married | 175 | 16.76     | 1,638  | 39,313 | <b>0.000</b> |
|  | Single  | 72  | 14.79     | 2,828  |        |              |
| Psychological Violence Inventory (General)                     | Married | 175 | 173.24    | 13,607 | 5,430  | <b>0.021</b> |
|  | Single  | 72  | 171.97    | 15,247 |        |              |

p<0.05

When Table 6 is examined, it is seen that the dimensions of Restriction of self-expression and communication opportunities, Attack on social relations, Direct attack on health and Psychological Violence Inventory (General) differ significantly according to marital status ( $p < 0.05$ ). Accordingly, while it was seen that single participants scored higher than married participants in the dimension of self-expression and restriction of communication opportunities; It was determined that married participants scored higher than single participants in the dimensions of attack on social relations, direct attack on health and Psychological Violence Inventory (General).

In the study, the results of the ANOVA test performed to test the hypothesis "H<sub>4</sub> : Exposure to mobbing varies according to professional seniority" and the ANOVA Tukey test results performed to determine which groups the difference is between are given in Table 7.

**Table 7.** Comparison of Exposure to Mobbing According to Professional Seniority

|  |                    | N  | $\bar{X}$ | ss     | f      | p.           | Difference   |

p<0.05

When Table 7 is examined, it is seen that exposure to mobbing differs significantly according to professional seniority (p<0.05). According to this;

- In the dimension of limitation of self-expression and communication opportunities, those with 1-5 years of professional seniority are more likely than those with 11-15 years of professional seniority;

- In terms of attack on social relations, those with 1-5 years of professional seniority are more likely than those with less than 1 year; Those with 6-10 years of professional seniority are those with less than 1 year, and those with more than 15 years of professional seniority are those with less than 1 year;
- In terms of attack on social reputation, those with 6-10 years, 11-15 years and more than 15 years of professional seniority are more likely to have a seniority than those with less than 1 year, and those with more than 15 years of professional seniority are more likely to have a professional seniority of 1-5 years, 6-10 years and 11-15 years. from those with professional seniority;
- Of quality of life and attack on occupational status, direct attack on health and Psychological Violence Inventory (General).

#### 4.4. The Relationship Between Demographic Variables and Employee Performance

The results of the analysis conducted to test the hypothesis "H<sub>5</sub> : Employee performance varies according to demographic characteristics" are given in Table 8.

**Table 8.** Comparison of Demographic Variables and Employee Performance

|                        |                    | N   | $\bar{X}$ | ss    | f     | p.    | Difference   |
|------------------------|--------------------|-----|-----------|-------|-------|-------|--|
| Gender                 | Woman              | 90  | 22.41     | 2,485 | 6,159 | 0.014 | No difference  |
|                        | Male               | 157 | 24.19     | 2,198 |       |       |  |
| Age                    | 20-30 years old    | 101 | 23,28     | 2,006 | 1,444 | 0.239 | No difference  |
|                        | 31-42 years old    | 95  | 23.56     | 2,628 |       |       |  |
|                        | age 43 and over    | 51  | 24.00     | 2,884 |       |       |  |
| marital status         | Married            | 175 | 23.48     | 2,456 | 0.052 | 0.819 | No difference  |
|                        | Single             | 72  | 23.68     | 2,471 |       |       |  |
| professional seniority | Less than 1 year   | 21  | 20.57     | 1,535 | 11.62 | 0.000 | 1-5 years, 6, 10 years, 11-15 years, more than 15 years > Less than 1 year |
|                        | 1-5 Years          | 80  | 24.00     | 1,423 |       |       |  |
|                        | 6-10 Years         | 62  | 24.04     | 2,019 |       |       |  |
|                        | 11-15 Years        | 44  | 23.00     | 2,949 |       |       |  |
|                        | more than 15 years | 40  | 24.00     | 3,265 |       |       |  |

$p < 0.05$

When Table 8 is examined, it is seen that there is no relationship between employee performance and gender, age and marital status; There is a significant difference according to professional seniority ( $p < 0.05$ ). Accordingly, it was determined that the performance scores of those with 1-5 years, 6, 10 years, 11-15 years and more than 15 years of professional seniority were higher than those with less than 1 year of professional seniority.

#### 4.5. The Relationship Between Exposure to Mobbing and Performance

"H<sub>6</sub> : There is a relationship between exposure to mobbing and performance" are given in Table 9.

**Table 9.** Correlation Analysis for the Relationship Between Exposure to Mobbing and Performance

|                | Restriction of self-expression and communication opportunities | Attack on social relations | Attack on social reputation | Attack on life and occupational status | Direct attack on health | Psychological Violence Inventory (General) |
|----------------|--|----------------------------|-----------------------------|--|-------------------------|--|
| r.             | .615 **  | .481 **                    | .798 **                     | .618 **                                | .517 **                 | .769 **                                    |
| Performance p. | 0.000  | 0.000                      | 0.000                       | 0.000                                  | 0.000                   | 0.000                                      |

\*\* . Correlation is significant at the 0.01 level

When Table 9 is examined, it is seen that there is a relationship between performance and the Psychological Violence Inventory and all its sub-dimensions. Accordingly, your performance; Restriction of self-expression and communication opportunities ( $r = .615$ ;  $p = 0.000$ ), Attack on social reputation ( $r = .798$ ;  $p = 0.000$ ); and Psychological Violence Inventory (General) ( $r = .769$ ;  $p = 0.000$ ) dimensions are positive and strong; In the dimensions of quality of life and attack on professional status ( $r = .618$ ;  $p = 0.000$ ), attack on social relations ( $r =$

.481;  $p = 0.000$ ) and direct attack on health ( $r = .571$ ;  $p = 0.000$ ), positive and moderate levels were observed. There is a relationship.

### 3.2.6. The Effect of Mobbing on Employee Performance

The results of the regression analysis conducted to test the hypothesis "H<sub>7</sub>: Mobbing has an effect on employee performance" are given in Table 10.

**Table 10.** Regression Analysis on the Effect of Mobbing on Employee Performance

|   | Unstandardized Coefficients |          | Standardized Coefficients |        |              |
|---|-----------------------------|----------|---------------------------|--------|--------------|
|   | $\beta$                     | Q. Error | $\beta$                   | t      | p.           |
| (Still)   | -1,370                      | 1,384    |                           | -0.990 | 0.323        |
| Attack on social relations                        | -0.544                      | 0.183    | -0.581                    | -2.963 | <b>0.003</b> |
| Attack on social reputation                       | -0.033                      | 0.124    | -0.070                    | -0.266 | 0.790        |
| Attack on quality of life and occupational status | -0.470                      | 0.235    | -0.603                    | -2,000 | 0.047        |
| Direct attack on health                           | 0.207                       | 0.189    | 0.188                     | 1,094  | 0.275        |
| Psychological Violence Inventory (General)        | 0.291                       | 0.107    | 1,665                     | 2,705  | <b>0.007</b> |

a. Dependent Variable: performance

When Table 10 is examined, aggression in social relations has a negative effect on performance ( $\beta = -0.581$ ); It appears that the Psychological Violence Inventory has a positive effect on performance ( $\beta = 1.665$ ). It was observed that other sub-dimensions had no effect on performance. This shows that the aggressive behavior that employees are exposed to in their social relationships may negatively affect their performance and that individuals who experience general psychological violence may show higher performance.

## 4. CONCLUSION AND RECOMMENDATIONS

As a result of the analysis, male participants generally received higher scores than females in these specific psychological violence dimensions. This situation shows that men may be more exposed to or are more exposed to the effects of such violence in dimensions such as restriction of self-expression and communication opportunities, attack on social reputation, attack on quality of life and professional status.

According to the research results, there are significant differences in various psychological violence dimensions between different age groups. It was determined that participants between the ages of 20-30 were more exposed to the dimension of restricting self-expression and communication opportunities than those between the ages of 31-42. It was observed that participants between the ages of 31-42 were more affected than those in other age groups in terms of attack on social relations and attack on social reputation. It was determined that participants aged 43 and over were more exposed to attacks on quality of life and occupational status than those aged 31-42.

In the study, it was observed that the dimensions of psychological violence differed according to marital status and that there were significant differences between married and single participants. In particular, it is seen that single participants received higher scores than married participants in the "Restriction of self-expression and communication opportunities" dimension, which means that single participants feel more restricted or their communication opportunities are more blocked. On the other hand, it was stated that married participants scored higher than single participants in the dimensions of "Attack on social relations", "Direct attack on health" and "Psychological Violence Inventory (General)". This may indicate that married individuals are more affected by these specific psychological violence dimensions or are exposed to higher levels of violence.

The research reveals that exposure to mobbing varies according to professional seniority. This difference shows that there are clear differences between groups with professional seniority in various dimensions of psychological violence. In the "restriction of self-expression and communication opportunities" dimension, it was observed that those with 1-5 years of professional seniority were more affected than those with 11-15 years of professional seniority. In the "attack on social relations" dimension, those with 1-5 years of professional

seniority were more affected than those with less than 1 year of seniority, while those with 6-10 years of professional seniority and more than 15 years of seniority were more affected than those with less than 1 year of seniority. has been found to be highly affected.

In the dimension of "attack on social reputation", those with 6-10 years, 11-15 years and more than 15 years of professional seniority are more likely to have professional seniority than those with less than 1 year of seniority and those with more than 15 years of seniority are more likely to have 1-5 years, 6-10 years of seniority. and it was observed that those with 11-15 years of professional seniority were more affected. In other dimensions, namely "Attack on quality of life and occupational status", "Direct attack on health" and "Psychological Violence Inventory (General)", professional seniority of 1-5 years, 6-10 years, 11-15 years and more than 15 years was also evaluated. It was determined that those with less than 1 year of seniority received higher scores than those with less than 1 year of seniority.

The study found that there was no relationship between employee performance and gender, age and marital status, but professional seniority was a significant difference. In particular, it is stated that performance is not directly related to gender, age and marital status, while it is emphasized that professional seniority has a significant effect on performance. It has been stated that the performance scores of employees with 1-5 years, 6-10 years, 11-15 years and more than 15 years of professional seniority are higher than those with lower seniority, that is, those who have been at work for less than 1 year.

In the study, it was observed that there was a relationship between performance and the Psychological Violence Inventory and its sub-dimensions. There is a positive and strong relationship between performance and the dimensions of "Restriction of self-expression and communication opportunities", "Attack on social reputation" and "Psychological Violence Inventory (General)"; It has been determined that there is a positive and moderate relationship with performance in the dimensions of "Attack on quality of life and professional status", "Attack on social relations" and "Direct attack on health".

The research results show that different sub-dimensions of psychological violence have varying effects on employee performance. It has been determined that the "attack in social relations" dimension negatively affects performance. This shows that the aggressive behavior that employees are exposed to in their social relationships may negatively affect their performance. Another finding is that the "Psychological Severity Inventory" has a positive effect on performance. This indicates that general psychological violence has a positive relationship with employee performance. This result suggests that individuals who experience general psychological violence may show higher performance.

The following recommendations have been prepared in the light of the research findings:

- It is understood that psychological violence in the workplace varies depending on gender and age. In this context, gender and age-based training programs should be organized and awareness-raising activities should be carried out. Especially for male employees, programs to strengthen their communication skills and improve their emotional intelligence can be recommended.
- Significant differences have been observed in different dimensions of psychological violence between married and single individuals. This shows that marital status has an impact on the experience of psychological violence. Emotional support mechanisms should be established in workplaces, especially for married employees, and strategies for coping with marriage-related stress should be offered.
- It has been understood that exposure to mobbing varies according to professional seniority. In this regard, training should be organized for new employees and less senior employees to improve the work adaptation process and strengthen their stress coping and communication skills. At the same time, programs that will develop leadership skills for senior employees are important.
- Research results have shown that psychological violence dimensions affect performance at different levels. In this context, when developing strategies to increase performance in workplaces, the effects of assault and general psychological violence dimensions, especially in social relations, on job performance should be taken into consideration. Supporting policies should be created by taking these factors into account in performance management processes.
- In light of all these findings, comprehensive training and awareness-raising activities should be carried out to prevent psychological violence in workplaces. These trainings should raise awareness of the workforce about the symptoms of psychological violence and contribute to taking precautions to create a positive work environment.

These recommendations aim to help create a healthier and more supportive environment in workplaces by taking into account the effects of different dimensions of psychological violence on working life.

### ABSTRACT

Social media has revolutionized communication among students, instructors, and institutions in higher education. This study explores how social media enhances communication while addressing communication challenges in higher education. Employing a quantitative approach, the study gathered data from 136 participants, including academic staff, administrators, and students from higher education institutions. Both descriptive and correlational analyses were conducted. The findings reveal a positive correlation between the frequency of social media use for academic purposes and concerns related to language interpretation, information overload, privacy, and security. However, no significant association was found between social media usage frequency and technical issues. It is crucial to consider the complex interplay of variables contributing to communication challenges across various contexts, including workplaces and educational settings. Institutions must strive to establish effective communication channels in learning environments. This entails developing strategies that foster transparent, inclusive, and empathetic interactions. Moreover, institutions need to recognize and address the diverse challenges associated with communication in order to facilitate a conducive learning environment.

**Keywords:** social media, Communication, Higher Education.

### INTRODUCTION

This research investigates the impact of social media on communication challenges in higher education, with a focus on Cyprus International University (CIU). As social media platforms become increasingly integrated into the academic environment, they offer unique opportunities for enhanced connectivity and collaboration among students, teachers, and institutions. However, these digital platforms also pose potential drawbacks, including information overload, privacy and security concerns, and difficulties with language interpretation.

Through quantitative analysis of data collected from 136 participants comprising administrators, students, and academic staff—this study aims to elucidate the intricate relationship between academic social media usage and its influence on the communication dynamics in higher education. By doing so, it seeks to facilitate the development of more effective communication strategies within educational institutions that leverage the benefits of social media while addressing its challenges.

Higher education has recently experienced a significant shift, principally driven by the extensive integration of social media platforms. The dramatic movement described here goes beyond the conventional boundaries of academia, fundamentally altering the nature of communication among students, teachers, and educational institutions. The teaching and learning process is effective when communication is passed from the teacher to the students who understand the message fully (Harran,2014).

### Media

Media refers to a vehicle or means of message delivery system to carry and message to a target audience. Media such as TV, Radio, Print, Out-of-Home, and Internet are instruments to convey the advertising message to the public (Pantograph Support, 2020).

The term "media" refers to a wide range of platforms and tools utilized for the entertainment, information dissemination, and communication. It encompasses various media platforms, including digital and social media such as websites, blogs, and social networking sites, as well as traditional forms like radio, television, newspapers, and magazines. Acting as a conduit for news, information, advertising, and cultural expressions, the media serves to connect individuals with the broader world. In today's globalized society, the media plays a crucial role in shaping social norms, influencing public opinion, and catalysing social and political change. It serves as a powerful tool for the transmission and reception of information, both reflecting and shaping the realities of the modern world due to its ability to quickly reach a vast audience.

### Social media

Social media are therefore associated with an increased tendency for young people to multitask, to rely on a 'digital juggling' of daily activities and commitments (Subrahmanyam & Šmahel, 2011).

The term "social media" refers to a set of online programs and services that allow users to create, share, and engage with information, as well as participate in social networking. These platforms build upon the conceptual and technological foundations of Web 2.0, facilitating online collaboration, interoperability, and interactive information exchange. Social networking platforms enable users to perform various activities, such as creating and joining groups based on shared interests, sharing links, photos, and videos, and posting updates.

As online tools and technologies have developed, social media has become regarded as a key tool for supporting applied learning activities. Social media technologies provide tutors with the means to engage learners with valuable time-on-task learning (Purvis, 2016). The main significance of social media for higher education lies in the noticeable shift in the demographics of university students. Social media platforms are thought to mirror and sometimes even enhance more adaptable, dynamic, and effective ways of living due to their collaborative, interconnected, and creative nature.

### **Communication**

Communication involves the exchange of information, ideas, emotions, and feelings among individuals and groups. It enables the expression and understanding of intentions and emotions through various methods, including written messages, non-verbal cues, vocal exchanges, and digital communications. Effective communication is essential for building relationships, fostering learning and teamwork, resolving conflicts, and excelling in professional settings. It relies on clear communication between a sender and a receiver, where comprehension is achieved through active listening, providing feedback, and interpreting both verbal and nonverbal signals. The capacity to communicate effectively across various channels and cultural contexts is essential for both individual and social advancement in today's globalized society. Communication shapes interactions among individuals, and several factors can affect the transmission of a message from the sender to the recipient.

These include the location, medium used to communicate, the cultural situation, and the emotions involved. However, communication helps people to interact and share various aspects of life (Ntara, 2023). The general view of communication is that it is an interaction within a social context. Communication usually involves a sender (source) and a receiver. It involves the interlocutors' exchanging signals. These signals could be verbal or graphic, it could be gestural or visual photographic (Fatimayin, 2018).

### **Barrier**

It's crucial to consider the complex interplay of factors that lead to challenges across various contexts, including professional and educational settings. Beyond linguistic, psychological, emotional, physical, and cultural barriers, advancements in technology and social media have introduced new opportunities and challenges for communication. The digital divide, information overload, and nuances in online engagement styles can complicate communication processes further. In educational settings like distance learning, an institution's maturity and capability in utilizing digital platforms are critical in overcoming these barriers. Achieving effective communication in these environments requires not just an awareness of the diverse obstacles but also a commitment to developing strategies that promote clear, inclusive, and empathetic interactions. This involves enhancing digital literacy, fostering a culture of active listening and feedback, and creating environments that support diverse communication needs and styles.

The process of communication has multiple barriers. The intended communicate will often be disturbed and distorted leading to a condition of misunderstanding and failure of communication. The Barriers to effective communication could be of many types like linguistic, psychological, emotional, physical, and cultural etc (Toppr, n.d). Effective communication is hindered by different barriers, which can be classified into four main types: psychological, process, physical, and semantic barriers. Communication impacts how people interact, and the conveyance of a message from sender to receiver is influenced by multiple elements that can impact its delivery.

To improve the effectiveness of communications, schools must develop an awareness of the importance of sender's and receiver's responsibilities and adhere to active listening skills (Lunenburg, 2010). This is true of distance education, and it is especially true when the individual's organization is at a low stage of maturity or capabilities regarding distance education (Berge, 2007)

### **Communication barrier**

Communication barriers are factors that hinder people from engaging in productive interpersonal conversations. To comprehend these obstacles properly, one must grasp the elements that facilitate effective communication. Effective communication occurs when the recipient accurately understands the sender's intended message. Achieving effective communication necessitates strong listening skills from both the sender and the recipient. This is because feedback is integral to communication, rendering the roles of sender and recipient interchangeable.

The literature is replete with discussion of the various barriers to distance education. These can be categorized several ways such as psychological, pedagogical, technical, social, cultural and so forth. (Berge, 1998) Likewise, as increased communication allows for collaborative activities within the distance education course, more complex communication barriers come into existence, too (Berge, 2013).

Education-related communication barriers impact students, teachers, and institutions. They can be caused by various psychological, pedagogical, technological, social, cultural, emotional, temporal, and feedback-related problems. These barriers exacerbate the complex communication dynamics that exist in educational environments. Psychological barriers include things like disparate attitudes and perspectives. Pedagogical obstacles are a result of curriculum

design and instructional strategies. Technical barriers to smooth communication arise from difficulties utilizing tools or technology. Power relations and cultural differences produce social obstacles. Cultural barriers can lead to miscommunication due to differences in cultural backgrounds. Temporal barriers are time problems that affect real-time communication, particularly in online learning. Emotional walls draw attention to the lack of emotional ties, essential in a few in-person encounters. The absence of prompt feedback is associated with feedback-related hurdles, which can impact the quality of communication. To create inclusive and productive learning environments, it is imperative to remove these obstacles. This calls for the development of clear, culturally aware, and technologically advanced communication tools in the classroom, particularly in the context of online and digital learning.

A communication barrier is anything that prevents us from receiving and understanding the messages others use to convey their information, ideas and thoughts. (Rani,2016). difficulties communicating with others in online classes can happened because of time zone variations, the absence of a sense of emotional connection with each other, or the lack of the kind of real-time feedback that happens in an in-person classroom (Kim, Liu, & Bonk, 2005)

### **Higher education**

Higher education has now become a part of the wider globalization process. Due to globalization, the internationalization of higher education is regarded as one of the leading trends that determine the value foundations of the functioning of modern universities (Sharipov, 2020). The term "higher education" refers to the level of schooling provided by colleges, universities, and other institutions that confer degrees and certificates upon students who have completed secondary education. It encompasses a wide array of subjects and fields of study, including arts, sciences, engineering, humanities, business, and health sciences, among others. Higher education leads to the attainment of certifications, certificates, and academic degrees such as bachelor's, master's, and doctorate degrees.

Higher education serves various purposes, including fostering personal growth, cultivating critical thinking skills, promoting research and innovation, and preparing students for professional careers. It provides students with specialized knowledge and skills, encourages lifelong learning and intellectual curiosity, and plays a crucial role in both individual advancement and societal development.

The term "modern higher education" refers to organized educational activities and institutions beyond secondary schooling, encompassing specialized universities in areas such as agriculture, engineering, science, and technology, as well as traditional universities offering programs in arts, humanities, and sciences.

The concept of higher education also includes such post-secondary institutions like polytechnics, colleges of education, and "grandees école." Under the umbrella of higher education come all forms of professional institutions. Even this wide spectrum does not exhaust the possibilities of forms of higher education (AssiéLumumba, 2007).

### **Importance of study**

In light of current educational practices, this research is highly noteworthy. In light of the increasing use of social media, it tackles the urgent need to comprehend the changing communication dynamics within academic institutions. provide educators and institutions with a lens to view the evolving communication patterns between professors and students in the digital age, where social media platforms are integral to daily interactions. Comprehending this is essential to modify instructional strategies, student engagement tactics, and general educational procedures to conform to the tastes and actions influenced by social media.

The study explores social media's opportunities and problems in higher education. It tackles possible obstacles, including information, overload and privacy concerns, allowing instructors to take these challenges head-on. The research also identifies positive effects, including dismantling conventional barriers and encouraging international collaboration, which enable educators to use social media to provide students with richer educational experiences. Assessing how social media affects student-teacher interactions includes information about upholding moral principles and academic integrity in an online learning environment. The study's overall importance rests in providing a comprehensive understanding of how social media affects communication dynamics in higher education, enabling institutions and teachers to meet obstacles and seize possibilities in the digital era of learning.

### **Research goal**

The study titled "The Effect of Social Media on Communication Barriers in Higher Education" aims to investigate the influence of social media on communication dynamics within higher education institutions. By examining traditional modes of communication among students, professors, and academic institutions, the research seeks to uncover the nuanced impacts of social media integration. Its objective is to identify and categorize potential communication obstacles arising from the increasing use of social media platforms. Additionally, the paper suggests that clarifying the definition of education, which is fundamental for a well-organized society, could enhance the quality of communication and its impact on individuals' lives.

Clarifying the significance of education, the central idea supporting an organised society, would also help enhance the standard of communication and its impact on people's lives. Communication barriers come in the form of linear, interactive, and transactional viewpoints from various angles (Işman,2004).

The research's ultimate objective is to recognize and comprehend the communication difficulties brought on by social media and offer insightful analysis and helpful suggestions.

**Problem statement**

This study's problem statement is based on how higher education is changing and how social media is becoming increasingly common. While using social media in academic settings has many advantages—such as improved connectivity and opportunities for collaboration—it has also raised some possible issues that should be carefully considered. A thorough grasp of the complex effects of social media on communication dynamics in higher education is lacking in the body of current knowledge in higher education, communication barriers can be broadly classified based on issues that affect students, faculty, and institutions. This is especially true in light of the rise in social media usage.

**Theoretical framework and hypotheses development**

To comprehend how social media affects communication dynamics in higher education, the theoretical framework for this study incorporates elements of both communication accommodation theory and social presence theory.

The Social Presence Theory, first put forth by Short, Williams, and Christie in 1976, asserts that the level of social presence in a mediated setting affects the effectiveness of communication.

Short et al. (1976) formulated the social presence hypothesis to elucidate interpersonal communication and relationship development within corporate environments utilizing telecommunication media. This hypothesis explores how such communication mediums influence the social influence exerted by communication partners on each other. According to them, each telecommunication medium is characterized by the degree to which it can communicate verbal and nonverbal cues conveying socio-emotional information in such a way that the other persons involved in the communication are perceived as physical “real” and present. Accordingly, they defined social presence as the “degree of salience of the other person in the interaction and the consequent salience of the interpersonal relationships” (Kreijns,2022).

Social presence is associated with the use of computer-mediated communication (CMC) tools and electronic platforms for OGL in terms of the degree to which these CMC tools and electronic platforms can transfer the same face-to-face interpersonal communication, group learning, and group dynamics when learning and working together in an online setting. Social presence influences the way how the social interaction in OGL groups unfolds online, which, in turn, affects the learning outcomes (Zhao, 2014).

In Communication Accommodation Theory (CAT) the main focus is based on three types of adjustments, convergence, divergence and maintenance. (Gallois,2005). Communication Accommodation Theory (CAT) provides a wide-ranging framework aimed at predicting and explaining many of the adjustments individuals make to create, maintain, or decrease social distance in interaction. It explores the different ways in which we accommodate our communication, our motivations for doing so, and the consequences. CAT addresses interpersonal communication issues, yet also links it with the larger context of the intergroup stakes of an encounter (Giles, 2007).

The proposition by Short, Williams, and Christie (1976) that social media platforms create a virtual presence aligns seamlessly with the exploration of global collaboration and intergenerational relationships in higher education. This theory serves as a foundation for understanding how social media transcends physical barriers, fostering a sense of presence in the digital realm (Short, 1976).

This theory, when applied to the context of higher education, aids in understanding how the incorporation of social media may cause changes in the ways that institutions, teachers, and students communicate with one another. The study's examination of the advantages and disadvantages of social media use and its possible effects on face-to-face communication abilities is pertinent, given the theory's emphasis on convergence and divergence in communication behaviours.

The combination of CAT and Social Presence Theory offers a thorough framework for comprehending the intricate relationship between communication dynamics and social media in higher education. They cover social media's virtual presence and people's adaptable communication techniques in reaction to technological advancements.

Scholars have devoted considerable attention to the integration of social media in higher education, resulting in extensive research aimed at identifying potential benefits and challenges. Several notable studies have examined the intricate relationship between academic communication dynamics and social media, contributing to a deeper understanding of this evolving landscape.

Research by Muilenburg and Berge (2003) highlights organizational, technological, and expertise barriers in educational contexts. These findings are relevant to comprehending comparable barriers in higher education's usage of social media for communication. This link emphasizes the wider effects of obstacles to technology adoption at all educational levels. This research offers a fundamental understanding of the challenges faced in educational settings while implementing new technology, which makes it directly relevant to the current study. Insights into the possible difficulties and factors to be taken into account for higher education institutions utilizing social media as a strategy for overcoming communication barriers can be obtained by looking at the barriers found in the K–12 setting.

Berge's (2013) extensive research scrutinized education as a communication process, with a focal point on distance education. The study provided insights into the nuanced communication processes within both traditional in-person and remote teaching and learning settings, shedding light on the unique dynamics facilitated by technology. Providing a comparison of communication across traditional and remote learning environments, this study sheds light on the intricacies of communication in education, highlighting the revolutionary impact of technology on the dynamics of teaching and learning. It is understanding of the subtle communication facilitated by technology in remote learning offers a strong basis for comprehending how social media can affect communication barriers in higher education.

Bash (2009) explored the problematic aspects of intercultural communication within the internationalized higher education market. The research delved into the impact of globalization on knowledge dissemination, the compatibility of distinct national higher education cultures, and the potential for successful cross-cultural cooperation. Providing a comparison of communication across traditional and remote learning environments, this study sheds light on the intricacies of communication in education, highlighting the revolutionary impact of technology on the dynamics of teaching and learning. Its understanding of the subtle communication facilitated by technology in remote learning offers a strong basis for comprehending how social media can affect communication barriers in higher education.

Rani (2016) investigated the intricacies of communication barriers, underscoring the fundamental concept that effective communication necessitates shared meaning. The study emphasized the critical role of shared understanding in overcoming communication challenges within an academic context. The necessity of effective communication through shared meaning and comprehension of the communication environment is emphasized in this essay. It lists and examines the five main obstacles that prevent effective message transmission: behavioural, cultural, linguistic, attitude, and environmental barriers. The essay emphasizes how disparities in beliefs, attitudes, and discrimination lead to breakdowns in workplace communication and emphasizes the significance of appreciating diversity for a more comprehensive understanding.

Gikas & Grant (2013) Examine the effects of using mobile computers, smartphones and cell phones—in higher education. The study offers findings from student focus group interviews, focusing on students from three US institutions where teachers integrated these devices into courses for at least two semesters. Two main themes came to light: (a) the benefits of mobile computing devices for education, emphasizing the chances for social media and Web 2.0 tools to foster interaction, collaboration, content creation, and communication, and (b) the difficulties students encountered when using these devices to further their education. Their study, which focuses on the integration of cell phones and smartphones into coursework, demonstrates that these devices can enhance learning environments by fostering communication, teamwork, and content development through Web 2.0 and social media platforms. However, the report also underscores the challenges students face in using these gadgets for educational purposes. This study provides valuable insights into how social media can either alleviate or exacerbate communication obstacles in higher education environments. Hence, the following hypotheses were developed:

**H1:** Technical problems that users experience is positively correlated with how often they use social media for educational purposes.

**H2:** There is a positive correlation between the frequency of social media use for learning and experiencing information overload.

**H3:** There is a positive correlation between the frequency of social media use for educational purposes and concerns regarding privacy and security.

**H4:** There is a positive correlation between the frequency of social media use for educational purposes and experiencing language and interpretation issues.

## METHODOLOGY

This survey was conducted in two phases. the first phase was termed the 'pilot study' and the second phase was designated as the 'main study'. The objective of the pilot study conducted for our research, titled "The Effect of Social Media on Communication Barriers in Higher Education: A Case Study of Cyprus International University (CIU)", was to test and validate our research instruments and methodology. To achieve this, students present in the university library were provided access to an online survey comprising 33 Likert-scale questions via a designated link. Subsequently, insights gained from this pilot study were instrumental in refining our survey questionnaire to better capture the nuances of social media's influence on facilitating or hindering communication between students and professors within a higher education context.

### Measurement

The research measurement includes frequency of using social media for education purposes 13 items, technical issue 5 items, privacy and security 4 items, language interpretation issues 5 items and information overload 3 items. The completion of the online questionnaire by the participants enabled the researchers to gather the data utilized in this study. The questionnaire was randomly distributed to 30 individuals for the pilot study and 137 individuals for the final study, comprising students and professors.

### Analysis

SPSS was employed to analyse the data. Exploratory Factor Analysis (EFA) was utilized to uncover the underlying structures within the dataset and determine the factors contributing to characteristics associated with social media use and communication barriers. This approach facilitates a structured analysis of the data and helps identify the significant variables pertinent to our study.

A questionnaire with 33 standard questions was used to gather data. The lowest level of agreement, or negative valuation, is represented by 1 in this instance, and the maximum level of agreement, or positive valuation, is represented by 5. By using the Likert scale, researchers can more accurately gauge participant attitudes, assessments, and reactions. They can then utilize this data for statistical analysis and gain a deeper comprehension of the topic being studied.

In evaluating the internal consistency of our questionnaire, we employed Cronbach's alpha, a widely used measure of scale reliability. This statistic gauges the extent to which a set of items are inter-related and thus collectively measure an underlying construct (Cronbach, 1951). A Cronbach's alpha coefficient of 0.70 or above is traditionally deemed acceptable, indicating that the scale items have a reasonable level of consistency (Nunnally, 1978).

**RESULT**

Information about gender, age and academic status, was obtained and reported. The male respondents were the majority, representing 69 (50.7%), while the female respondents represent 65 (47.8%), Not listed 2 (1.5%). Most of the respondents were within the age group of 18-25 67(49.3%), while 48 (35.3%) were within the age group 25–35, also, 17 (12.5%) were within 36–45, and 4 (2.9%) were above 45 years. As regards the Academic status of the respondents, the result indicates that the majority were students 95 (69.9%), graduates 30 (22.1%), professor 9 (6.6%), and University staff 2 (1.5%).

**Table 1: Demographic Information**

|                 |                  | Frequency | Percent |
|-----------------|------------------|-----------|---------|
| Gender          | female           | 65        | 47.8    |
|                 | Male             | 69        | 50.7    |
|                 | Not listed       | 2         | 1.5     |
| Age             | 18-25years       | 67        | 49.3    |
|                 | 26-35years       | 48        | 35.3    |
|                 | 36-45years       | 17        | 12.5    |
|                 | More than 45     | 4         | 2.9     |
| Academic status | student          | 95        | 69.9    |
|                 | professor        | 9         | 6.6     |
|                 | University staff | 2         | 1.5     |
|                 | graduate         | 30        | 22.1    |

Table 2 shows the descriptive statistics and correlation matrix. The Frequency of using social media for education purposes variable has mean value 4.5158, Technical issues, 4.5368, and privacy and security 4.7040, Language and Interpretation issues 4.5515, and information overload 4.4951 standard deviation .86797, .55868, .57991, .59752 and .53516 respectively.

**Table 2: Descriptive Statistics**

|  | Minimum | Maximum | Mean   | Std. Deviation |
|--|---------|---------|--------|----------------|
| Frequency of using social media for Education purposes | 1.92    | 5.92    | 4.5158 | .86797         |
| Technical Issues                                       | 4.00    | 6.00    | 4.5368 | .55868         |
| Privacy and Security                                   | 4.00    | 6.00    | 4.7040 | .57991         |
| Language and Interpretation Issues                     | 4.00    | 6.00    | 4.5515 | .59752         |
| Information Overload                                   | 4.00    | 6.00    | 4.4951 | .53516         |

Exploratory factor analysis (EFA) was employed to uncover the factorial structure of the study instrument. Given that the data did not follow a normal distribution, primary axis factoring with varimax rotation was utilized as the extraction technique. Items with a loading  $\geq 0.5$  were retained based on this criterion. Additionally, confirmatory factor analysis (CFA) was conducted to assess the factorial structure of the research tool utilized in this thesis, which was adopted from prior research. The results of this analysis are presented in Table 3.

Table 3. Factor Loading

| Component |      |
|-----------|------|
| FSME1     | .538 |
| FSME2     | .741 |
| FSME3     | .695 |

**Reliability and validity**

When measuring a phenomenon, reliability refers to the extent to which the results are consistent and dependable, indicating repeatability. Cronbach's alpha value is commonly utilized to assess or confirm the reliability of a test. Cronbach's alpha is a measure of internal consistency that tells us how closely related a set of items are as a group. The general rule is that a Cronbach's alpha of 0.70 and above is good, 80 and above is better, and .90 and above is best (Jacobs & Richardson, 2017). From the reliability test results, the Cronbach's alpha ranges from .797 to .934 which shows that the data is reliable as shown in Table 4 below.

Table 4: Reliability

| Variable  | Item | Cronbach |
|---|------|----------|
| Frequency of using social media for academic purposes | 13   | .934     |
| Technical Issue                                       | 5    | .870     |
| Privacy and security                                  | 4    | .797     |
| Language Interpretation Issues                        | 5    | .901     |
| Information Overload                                  | 3    | .760     |

**Correlation analysis**

Correlation is a statistical tool for quantifying the link between two or more variables (Akoglu, 2018). It explains how variations in one variable impact variations in another. The measurement of correlation is frequently used to determine the strength and direction of a link between variables, showing if they are correlated in any way, or not at all associated (Schober et al., 2018).

The correlation coefficient, commonly denoted as "r," is a number that indicates the degree and direction of the association between two variables. The correlation coefficient lies within the -1 to +1 range (Coccia, 2020).

A perfect positive correlation occurs when all variables move in the same direction, resulting in a correlation coefficient of +1. The second variable increases in direct proportion to the first variable. A perfect negative correlation is indicated by a correlation coefficient of -1, where the variables move in opposing directions. The second variable decreases proportionally as the first variable increases. There is no association between the variables, as shown by a

correlation coefficient of 0. There is no consistent correlation between changes in one variable and changes in the other.

The correlations values are positively and significantly associated which indicates that the values are significant at  $p < 0.05$  (2-tailed) except for variable technical issues. Frequency of using social media for Education purposes has a positive correlation with Privacy and security  $r = .174^*$ , Language and interpretation issues  $r = .349^{**}$  and Information overload with  $r = .231^{**}$ . However, the association between Frequency of using social media for Education purposes and technical issues was insignificant  $r = .167, p > 0.05$ . See Table 5.

**Table 5:** Correlations

|                                |                     | Social media for Education | Technical Issues | Privacy and Security | Language and Interpretation Issues | Information Overload |
|--------------------------------|---------------------|----------------------------|------------------|----------------------|------------------------------------|----------------------|
| Social media for Education     | Pearson Correlation | 1                          |                  |                      |                                    |                      |
|                                | Sig. (2-tailed)     |                            |                  |                      |                                    |                      |

| Information Overload           | Pearson Correlation | .231**                     | .451**           | .498**               | .604**                             | 1                    |
|                                | Sig. (2-tailed)     | .007                       | .000             | .000                 | .000                               |                      |

\*\* . Correlation is significant at the 0.01 level (2-tailed).

\* . Correlation is significant at the 0.05 level (2-tailed).

An analysis of which social media platforms are used for academic purposes across female and male was conducted and result indicates that Facebook observed to be the most used social media platform across gender. The result is presented in Table 6.

**Table 6:** Which social media platforms do you regularly use for educational purposes?

|              | telegram | Facebook  | WhatsApp  | YouTube   | Instagram | google meet | LinkedIn  | Pinterest | Total      |
|--------------|----------|-----------|-----------|-----------|-----------|-------------|-----------|-----------|------------|
| Female       | 4        | 20        | 12        | 8         | 7         | 5           | 7         | 2         | 65         |
| Male         | 3        | 20        | 15        | 7         | 7         | 8           | 7         | 2         | 69         |
| Not listed   | 0        | 0         | 1         | 0         | 0         | 1           | 0         | 0         | 2          |
| <b>Total</b> | <b>7</b> | <b>40</b> | <b>28</b> | <b>15</b> | <b>14</b> | <b>14</b>   | <b>14</b> | <b>4</b>  | <b>136</b> |

An analysis of social media features considered most effective in terms of academic communication was conducted. The result shows that discussion forums were observed to be the most effective social media features used across gender. See Table 7.

**Table 7:** For academic communication, which social media features do you find most effective?

|            |                    | Integration       |                   |                       |                                    |                     |              |                          | Total |
|------------|--------------------|-------------------|-------------------|-----------------------|------------------------------------|---------------------|--------------|--------------------------|-------|
|            | Groups/Communities | Polls and Surveys | Discussion Forums | Collaborative Editing | Messaging and Direct Communication | with Research Tools | File Sharing | Notifications and Alerts |       |
| female     | 3                  | 4                 | 30                | 15                    | 5                                  | 5                   | 2            | 1                        | 65    |
| Male       | 7                  | 8                 | 29                | 16                    | 6                                  | 2                   | 0            | 1                        | 69    |
| Not listed | 0                  | 1                 | 1                 | 0                     | 0                                  | 0                   | 0            | 0                        | 2     |
| Total      | 10                 | 13                | 60                | 31                    | 11                                 | 7                   | 2            | 2                        | 136   |

An analysis of the most effective mode of communication for academic discussion and collaboration was conducted. The result shows that face-face meeting was observed to be the most effective mode of communication across gender. See Table 8.

**Table 8:** In your opinion, what is the most effective mode of communication for academic discussions and collaborations?

|            | Face-to-face meetings | Online collaboration tools (e.g., Slack, Microsoft Teams) | Email communication | Video conferencing (e.g., Zoom, Skype) | Messaging and Direct Communication | Social media platforms (e.g., Facebook, Twitter) | Total |
|------------|-----------------------|---|---------------------|--|------------------------------------|--|-------|
| female     | 48                    | 4   | 1                   | 3                                      | 6                                  | 3  | 65    |
| Male       | 47                    | 8   | 4                   | 2                                      | 2                                  | 6  | 69    |
| Not listed | 2                     | 0   | 0                   | 0                                      | 0                                  | 0  | 2     |
| Total      | 97                    | 12  | 5                   | 5                                      | 8                                  | 9  | 136   |

**DISCUSSION**

The study examined the association between frequency of using social media for academic purpose and technical issues. The result shows that there is no correlation between using social media for education purposes and encountering technical issues  $r = 167$ . This suggests that as students use social media more for educational purposes, they may occasionally face technical challenges related to the platform but it will not demotivate their academic activities. Social presence is associated with the use of computer-mediated communication (CMC) tools and

ISTEC & INTE & ITEC & IETC & ITICAM & IWSC & IQC 2024  
electronic platforms in online group learning (OGL), particularly in terms of their ability to replicate face-to-face interpersonal communication, group learning, and dynamics in an online setting.

Social presence influences the way how the social interaction in OGL groups unfolds online, which, in turn, affects the learning outcomes. (Briones,2018), which found that Integrating ICT in teaching and learning process at present remains a challenging task which includes lack of confidence and competence in ICT, lack of technical support and lack of accessibility to ICT resources.

Similarly, there is a weak positive correlation between social media use for education purposes and privacy/security concerns  $r = .174$ . As students engage in educational activities on social media, they might become more aware of privacy risks and security measures. The CAT explores the different ways in which we accommodate our communication, our motivations for doing so, and the consequences. This finding is inline with Staddon et al (2012) they argued that risks of privacy and security may lead to poor social media engagement. A moderate positive correlation between using social media for education purposes and encountering language or interpretation issues was observed  $r = .349$ . Students who actively participate in educational discussions on social media may encounter language barriers or struggle with interpreting content. Lastly, there is a moderate positive correlation between social media use for education purposes and information overload  $r = .231$ . As students consume educational content on social media, they may sometimes feel overwhelmed by the sheer volume of information available. according to social presence theory in the context of social media, the platforms used in the of higher education can, while being digital, help create a sense of presence and meaningful relationships between students, teachers, and institutions.

## CONCLUSION

This research examines the various ways that social media affects communication obstacles in higher education, with a focus on Cyprus International University. The study finds that social media use is positively correlated with concerns about privacy, security, and information overload. However, it is not significantly correlated with technological problems, according to the data. These results underscore the importance of educational institutions in properly balancing the dual effects of social media. They must harness its potential to enhance academic collaboration while also addressing the challenges it poses. The study advocates for a thoughtful strategy for integrating social media into learning environments, emphasizing the importance of digital literacy, as well as privacy and security precautions, to enhance teaching and learning in higher education.

## RECOMMENDATION

It is advisable for educational institutions, especially Cyprus International University, to adopt a proactive approach to integrating social media into their curricula based on the study's findings. To ensure that both teachers and students are equipped to navigate the complexities of social media use, including understanding privacy settings, implementing security measures, and managing information effectively to mitigate overload, comprehensive digital literacy classes should be implemented. Furthermore, offering specialized workshops or courses on the best practices for social media communication can address language and interpretation issues, thereby enhancing the overall academic experience. Additionally, institutions should consider establishing explicit policies and procedures for social media use in educational settings to foster a secure, welcoming, and efficient virtual learning environment. By implementing these measures, universities can minimize communication obstacles associated with social media while maximizing its potential as an educational tool.

### ABSTRACT

Businesses often need leaders who will contribute to their development in order to maintain significant existence and make profits. In this contemporary era where technological developments increase, change and transformation becomes necessary, there is the need for visionary and future-oriented leaders who can manage the group they work with. In this article, the concept of leadership, the importance of leadership and its purpose are expounded, also leadership approaches are duly emphasized. Transformational leadership characteristics and their sub-dimensions are emphasized alongside their effects on business performance. In this study, the effects of transformational leadership characteristics on business performance were investigated through the lens of 5-star hotels operating in the the tourism sector of Kyrenia region TRNC. The data of 311 questionnaires collected within the scope of the research were analyzed and their details were surveyed.

**Keywords:** Leadership, Transformational Leadership, Business Performance.

### INTRODUCTION

In the detailed literature study on transformational leadership, many studies have been carried out by transferring the personnel to the tourism sector in areas such as turnover intention, organizational commitment, organizational silence, job satisfaction, employee performance and psychological well-being. However, there has not been very much research as to the effects of transformational leadership characteristics on business performance. Business performance is the criterion that measures how well the organizations are compared to their competitors in the market. Businesses measure their performance with both financial and non-financial methods. Financial performances includes profit, efficiency, effectiveness etc. These are the criteria that enable the enterprises to be evaluated financially. Non-financial performances has to do with the quality of the products produced as well as delivering them to the customer in an appropriate way and responding to the wishes and demands of the customers at the desired level. Today, businesses have to wholly consider both the financial and non-financial aspects while evaluating their performance (Yukl, 2018). Transformational leadership characteristics can have positive effects on the tourism sector performance in the Turkish Republic of Northern Cyprus (TRNC). Here are some of the effects of transformational leadership characteristics on performance in the tourism sector:

**Inspire:** Transformational leaders inspire team members with vision and goals. This increases employee motivation and improves business performance. Inspirational leaders help employees discover their potential and drive them to higher performance levels( Yılmaz, 2016).

**Supporting individual development:** Transformational leaders encourage and support the individual development of employees. Performance in businesses is directly related to development of talent and skill of employees. Transformational leaders reveal the talent and potentials of team members and enable them to constantly improve themselves (Yakışır, 2020).

**Build trust:** Transformational leaders build trust and confidence in their team members. Trust is critical to a business because it fosters transparency, collaboration and effective communication among team members. An environment of trust helps employees take risks and produce creative solutions, which increases business performance ( Ünal, 2012).

**Managing change:** Transformational leaders have the ability to manage change effectively. Businesses operate in a constantly changing environment, and transformational leaders encourage team members to adapt to this change and take advantage of opportunities. The ability to manage change helps the business maintain its competitive advantage and increase its performance ( Baykara and Yinal, 2023).

**Encourage collaboration and teamwork:** Transformational leaders encourage teamwork and collaboration. Business performance increases with effective communication and harmonious performance among team members. Transformational leaders bring team members together, combine their strengths and allowing them to focus on their goals. Thus, the performance of the business increases and better results are achieved.

**Communication and effective feedback:** Transformational leaders have communication skills and communicate effectively with team members. Open and honest communication is essential for improving the performance of the business. Transformational leaders provide feedback to team members and encourage them to improve. This increases the performance of employees and contributes positively to business performance (Tuncer, 2008).

**Encourage innovation:** Transformational leaders encourage and support innovation. Business performance is enhanced by the development of innovative ideas and solutions. Transformational leaders provide an environment for team members to think creatively, encourage risk-taking, and encourage new ideas. This strengthens the competitive advantage of the enterprise and increases its performance (Yakışır, 2020).

As a result, transformational leadership characteristics can positively affect business performance. Features such as inspiring, supporting individual development, building trust, managing change, encouraging cooperation and teamwork, communication, encouraging innovation, and feedback increase the motivation of employees, develop their skills, create an environment of trust, adapt to change, strengthen cooperation. Also communication encourages innovation and ultimately improves business performance.

Kyrenia is an important region in the tourism sector in the Turkish Republic of Northern Cyprus and is home to many tourism businesses. Transformational leadership is an approach in which the leadership role in these businesses varies. This approach involves different leaders assuming the leadership role for a period of time and then taking over by other leaders. In this way, leadership responsibility and competencies are shared and different perspectives are utilized. Rotational leadership can be applied in tourism businesses in Kyrenia in the following ways: (Atar, 2018).

**Rotational leadership:** Different leaders take the leadership position alternately over a period of time. For example, in a tourism business, department managers or project leaders take over the leadership role for a certain period of time and then another leader takes over. In this way, the experiences and abilities of different leaders can affect different aspects of the business.

**Team-based leadership:** Transformational leadership can also be applied as a team-based leadership approach. A leadership role in a tourism business can shift from one leader to another and share leadership responsibility among team members. In this way, leaders with different skills and expertise can increase the performance of the business by using the strengths of everyone in the team (Bakan, 2004).

**Project-based leadership:** In tourism businesses, rotational leadership can also be associated with a project-based leadership approach. Different leaders may take part in different stages of a project or in different projects. In this way, each leader can have the appropriate skills and experience for the project and bring different perspectives for project success (Santora, 2001).

Rotational leadership is an approach that has the potential to share leadership responsibility and increase the performance of the business in tourism businesses in Kyrenia. The different experiences and skills of different leaders can add value to different aspects of the business and provide a broader leadership perspective (Bakan, 2004).

Transformational leaders act in line with everyone's shared expectations and always look ahead. These leaders include others in decision-making processes within the organization and will give the people around them the opportunity to develop and learn as individuals. They have the ability to develop different perspectives and instill self-respect in their subordinates while trying to solve an emerging problem. Transformational leaders take time to train their employees (Stralser, 2015).

One of the important features for transformational leaders is that their employees have the ability to think innovatively, have a vision, and adapt to changes. Because transformational leaders expect their employees to adapt to these situations easily during the changes and innovations in the organization and to maintain organizational continuity by evaluating and solving the problems with a creative perspective. In this respect, they are different from transformational leaders and they are more preferred leaders in the functioning of the organization. In addition to having the characteristics of transformational leaders, the fact that they act as a bridge between the present and the future, and their focus on innovation and change is another factor in their preference. Also, leaders can have both transformational leadership traits at the same time; these are not mutually exclusive systems, they are systems that complement each other (Koçel, 2018).

### **Purpose of the research**

The aim of this study is to investigate the effects of leaders with Transformational Leadership characteristics on business performance. In the study; Hotels in the Kyrenia region operating in the Tourism Sector in the TRNC were examined; how the transformational leadership characteristics are perceived by the business employees and how the transformational leadership characteristics affect the business performance were examined. In this

direction; As a result of the scales determined, the data obtained as a result of the questions given to the participants will be analyzed through the SPSS statistical program. As a result of the analysis; The effect of transformational leadership characteristics on business performance will be explained.

### **Importance of Research**

For businesses, leadership and business performance are two important issues. Successful managers and employees with the same vision as the business are needed in order for business performance to reach the goals set by the business. Businesses have to continue their activities in an increasingly competitive environment, adapt to innovations and achieve the targeted profit. In the age we live in, where change and transformation are necessary, businesses need visionary, innovative leaders who will keep them up with the transformation. As a result of this study; In order to increase the performance of the enterprises, it will be researched whether they prefer leaders who are innovative leaders who will develop them, who have transformational characteristics.

### **Scope, Population and Sample of the Research**

This research covers the managers and staff working in five-star hotels operating in the tourism sector in the TRNC under the title of "The Effects of Transformational Leadership on Business Performance and a Research in the Tourism Sector". The universe of the research consists of five-star hotels in Kyrenia. However, the exact number of personnel working in hotels is not known. However, in the study of Ertaş and Unur (2017), the number of employees per room in five-star hotels operating all year was calculated as 0.9. In this research, the number of rooms has been reached by searching the hotels in which this method has been applied to reach the number of employees and checking their websites. As a result, it was concluded that the number of hotels operating all year in the TRNC is 128, and the total number of rooms is 902. Based on the equation of 0.9 personnel per room, it can be said that there are 811 employees.

### **The Problem of Research**

The main problem of the research; Do transformational leadership characteristics affect business performance?

### **Research Limitations**

1. This research is limited to the title of 'The Effects of Transformational Leadership Traits on Business Performance and a Study in the Tourism Sector'.
2. The research is limited to the data obtained from the Transformational Leadership Scale and the Business Performance Scales.
3. The research is limited to Five Star Hotels operating in the tourism sector in the Kyrenia region of TRNC.

### **Hypothesis**

H1: Support motivation, idealized influence, leadership allowing full freedom, management by exceptions (active/passive), non-financial performance, financial performance do not differ by gender.

H2: Support motivation, idealized influence, leadership allowing full freedom, management by exceptions (active/passive), non-financial performance, financial performance do not differ according to age.

H3: Support motivation, idealized influence, leadership allowing full freedom, management with exceptions (active/passive), non-financial performance, financial performance do not differ according to education level.

H4: Support motivation, idealized influence, leadership allowing full freedom, management with exceptions (active/passive), non-financial performance, financial performance do not differ according to occupation status.

### **Data Collection Tool and Method**

In order to obtain and analyze the research data, the data obtained from the determined scales and 311 questionnaires applied to the personnel working in the five-star hotels operating in the tourism sector in Istanbul were transferred to an excel table and analyzed with the SPSS.

### **Transformational and Transactional Leadership Scale**

In this study, 'Multifactor Leadership Questionnaire - MLQ', which determines interactionist and transformational leadership behaviors developed by Bass and Reggio in 2006, was used. The scale is a scale that has been used in many studies in the world and in Turkey and its validity has been proven. In his study, Cinnioğlu (2018) calculated the Cronbach alpha value of 0.78 in the expressions determining transformational leadership, and the Cronbach's alpha value of 0.76 that determines transactional leadership. There are 36 statements in total in the scale. 20 of these statements determine transformational leadership, while 16 statements determine transactional leadership. Transformational leadership within itself; It consists of four sub-dimensions: ideal effect, intellectual stimulation, inspiring motivation and individual level. Transactional leadership is; conditional reward, management with exceptions (active-passive), leadership with full freedom consists of four sub-dimensions (Cinnioğlu, 2008, p. 83-84).

### Business Performance Scale

In the research, the business performance scale prepared by Özer (2011, p.105) by using the article of Haktanır and Harris (2005, p. 41) was used to measure business performance. The scale consists of ten items, five of which are 'occupancy rate, sales, market share, costs and profits of the hotel' and non-financial performance five items are 'customer satisfaction, customer loyalty, workforce satisfaction in the hotel, corporate image of the hotel and employee turnover'. consists of. The reliability coefficient of the enterprise performance scale was calculated as 0.86.

## RESULTS

### Demographic Findings

In the study, frequency analysis was used to examine the distribution of the answers given by the participants to the survey questions. Demographic findings of the participants; gender, age, education level, marital status, occupation, working years in the sector, working years in the institution and monthly income.

**Table 1. Demographic Findings of Individuals**

| Variable                          | N   | %    |
|-----------------------------------|-----|------|
| <b>Gender</b>                     |     |      |
| Male                              | 145 | 40.4 |
| Female                            | 166 | 59.6 |
| <b>Age</b>                        |     |      |
| 18-25                             | 43  | 17.0 |
| 26-35                             | 127 | 43.1 |
| 36-45                             | 101 | 29.4 |
| 46 And above                      | 40  | 10.5 |
| <b>Education level</b>            |     |      |
| Primary education                 | 26  | 6.3  |
| High school                       | 78  | 19.0 |
| University                        | 92  | 46.7 |
| High Licence                      | 85  | 20.7 |
| Doctorate                         | 30  | 7.3  |
| <b>Civil status</b>               |     |      |
| Divorced                          | 9   | 0.2  |
| Single                            | 168 | 58.9 |
| Married                           | 134 | 40.9 |
| <b>Job</b>                        |     |      |
| Advice officer                    | 52  | 17.5 |
| Security                          | 47  | 14.4 |
| Manager                           | 34  | 13.1 |
| Manager assistant                 | 66  | 18.2 |
| Office officer                    | 112 | 36.7 |
| <b>In the industry study year</b> |     |      |
| one from year Little              | 2   | 0.5  |
| 1-2 Year                          | 21  | 2.7  |
| 3-5 Year                          | 67  | 20.9 |
| 6-10                              | 108 | 40.9 |
| 11-16                             | 77  | 26.3 |
| 16 And over                       | 36  | 8.8  |

Table 1. shows the frequency analysis results according to the demographic findings of the individuals. According to the frequency analysis findings, 40.4% of the individuals are male and 59.6% are female. When the age levels of these individuals are examined; It is seen that 17.0% are 18-25 years old, 43.1% are 26-35 years old, 29.4% are 36-45 years old, 10.5% are 46 and over. According to their education level, 6.3% of the individuals are primary school graduates, 19.0% are high school graduates, 46.7% are university graduates, 20.7% are graduates, and 7.3% are doctoral graduates. According to their marital status, 0.2% of the individuals were separated, 58.9% were single and 40.9% were married. 17.5% of these individuals are consulting officers, 14.4% are security officers, 13.1% are managers, 18.2% are assistant managers, and 36.7% are office clerks. When the working years of individuals in the sector are examined; 0.5% less than 1 year, 2.7% 1-2 years, 20.9% 3-5 years, 40.9% 6-10 years, 26.3% 11-16 years, 8.8% 16 years and more years of work were determined.

According to the years of service in the institution, 59.9% of the individuals worked for 1-5 years, 28.7% for 6-10 years, 6.3% for 11-15 years, and 5.1% for 16-20 years.

Table 2. Result of Reliability Analysis of Individuals' Business Performance Scale

| Dimension                 | Article | Cover | SS    | DK    | MSA   | Alpha |
|---------------------------|---------|-------|-------|-------|-------|-------|
| Financial non-performance | PE1     | 3.443 | 1,534 | 0.793 | 0.893 | 0.914 |
|                           | PE2     | 3,465 | 1.712 | 0.820 | 0.887 |       |
|                           | PE3     | 3.238 | 1.604 | 0.817 | 0.888 |       |
|                           | PE4     | 3.207 | 1,523 | 0.629 | 0.924 |       |
|                           | PE5     | 3.173 | 1,680 | 0.854 | 0.880 |       |

|                           | PE10    | 3.012 | 1,694 | 0.889 | 0.910 |       |

Cover: Average, SS: Standard deflection, DK: adjusted correlation, MSA: Article when deleted Alpha

Table 2. shows the descriptive statistics and Cronbach Alpha reliability analysis results obtained from the subscales of the business performance scale of the individuals participating in the research. When the results of the reliability analysis are examined, it is seen that there is no significant increase in the reliability coefficient when the items are removed from the subscales of the business performance scale of the individuals. In addition, the corrected correlation values of the subscale items of the individuals' business performance scale are positive. In the light of these findings, the Cronbach's Alpha coefficients for the general and sub-dimensions of the individuals' business performance scale are 0.962, 0.914 and 0.936, respectively .

Table 3. Comparison of Individuals' Total Scores and Sub-Dimension Scores of Transformational Leadership and Business Performance Scales by Gender

| Dimension | Gender | Cover   | SS     | t      | P            |
|-----------|--------|---------|--------|--------|--------------|
| DM        | Male   | 53,645  | 9,668  | 0.851  | 0.395        |

( $p < 0.05$ )

Table 3. shows the t-test results of the total scores of the transformational leadership and business performance scales and sub-dimension scores of the individuals participating in the research by gender. When the test results are examined, it is seen that the idealized effect sub-dimension scores of individuals differ statistically significantly according to gender ( $p < 0.05$ ). In the light of this finding, the idealized effect subscale scores of men are higher than women. In addition, it was determined that the total scores of the individuals' business performance scale and sub-dimension scores differed statistically significantly according to gender ( $p < 0.05$ ). H1: Support motivation, idealized influence, leadership allowing full freedom, management by exceptions (active/passive), non-financial performance, financial performance do not differ by gender.

Table 4. Comparison of Individuals' Total Scores and Sub-Dimension Scores of Transformational and Business Performance Scales by Age Levels

Cover: Average, SS: Standard deflection, DM: Support, motivation, IE: idealized effect, TSTL: Full freedom recognizing leadership, IRP: with exceptions management (passive), IA: with exceptions management (active), DLO: transformative And interactionist leadership scale, FOP: Financial non- performance, FP: financial performance,

IPO: Business performance scale, EU: Same letter owner groups between significant One differenceno

Table 4. shows the total scores of the transformational leadership and business performance scales of the individuals participating in the research and the Anova test results according to the age levels of the sub-dimension scores. When the test results are examined, it is seen that the total scores of the individuals' transformational leadership scale differ statistically according to their age levels ( $p < 0.05$ ). When the post hoc test results are examined, the total scores of the transformational leadership scale of the individuals aged 36-45 are higher than the individuals aged 18-25. Although there is a significant difference in the business performance scale, the absence of differences in the scale sub-dimensions supports the H2 hypothesis. Support motivation, idealized influence, leadership with full freedom, management by exceptions (active/passive), non-financial performance, financial performance differ according to age. When the other analysis findings were examined, it was determined that there was no statistically significant difference between individuals' transformational leadership scale sub-dimension scores and business performance scale total scores and sub-dimension scores according to age levels ( $p > 0.05$ ). Although there is a significant difference in the business performance scale, the absence of differences in the scale sub-dimensions supports the H1 hypothesis and the averages should be examined. H2 : Support motivation, idealized influence, leadership allowing full freedom, management by exceptions (active/passive), non-financial performance, financial performance do not differ according to age.

Table 5. Comparison of Individuals' Total Scores and Sub-Dimension Scores of Transformational Leadership and Business Performance Scales by Educational Levels

| Dimension | Education level                 | Median  | min    | Max     | chi-square | P            |
|-----------|---------------------------------|---------|--------|---------|------------|--------------|

|           | Doctorate                       | 7,500   | 4,000  | 12,000  |            |              |
| DLO       | Primary education               | 115,000 | 74,000 | 131,000 | 3.335      | 0.503        |
|           | High school                     | 112,500 | 65,000 | 145,000 |            |              |

In Table 5. the Kruskal-Wallis H test results of the individuals participating in the research according to the total scores of the transformational leadership and business performance scales and the education levels of the sub-dimension scores are shown. When the test results were examined, it was determined that the individuals' management with exceptions (passive) sub-dimension scores differed statistically significantly according to their education level ( $p < 0.05$ ). When the post hoc test results are examined, the management (passive) sub-dimension scores of high school graduates are lower than those with a master's degree. When the other analysis findings were examined, it was determined that there was no statistically significant difference between the total scores of the enterprise performance scale and the sub-dimension scores of the individuals according to their education level ( $p > 0.05$ ). In addition, it is seen that there is no statistically significant difference in the transformational leadership total scores of individuals and sub-dimension scores of support, motivation, idealized influence, leadership with complete freedom and management with exceptions (active) according to their education levels ( $p > 0.05$ ). Hypothesis H3 cannot be rejected. Support motivation, idealized influence, leadership with full freedom, management with exceptions (active/passive), non-financial performance, financial performance do not differ according to education level.

Table 6. Comparison of Individuals' Total Scores and Sub-Dimension Scores of Transformational Leadership and Business Performance Scales by Occupation

| Dimension | Job                            | Cover   | SS     | F     | P            |

Table 6. shows the total scores of the transformational leadership and business performance scales and the sub-dimension scores of the individuals participating in the research according to their occupations in the Anova test. When the test results were examined, it was determined that the support and motivation sub-dimension scores of the individuals differed statistically significantly according to their occupations ( $p < 0.05$ ). When the results of the post hoc test are examined, the support and motivation sub-dimension scores of the individuals who are managers are higher than those who are office clerks.

## CONCLUSION AND RECOMMENDATION

When the research is compared according to gender, 166 (40.4%) of the participants are male and 245 (59.6%) are female. People's reactions to the events they encounter and their emotional approaches differ according to their gender. Employees react differently to the same events because they use different brain cells. While men are more business-oriented individuals who act with their logic, women are more human-oriented and have developed empathy skills. The fact that women are in business life will cause them to compete with men and increase productivity in the business. The fact that transformational leaders act by treating all employees equally, regardless of gender, will also increase business efficiency. When compared according to age, 70 of the participants (17,0%) were in the range of 18-28, 177 (43,10%) were in the range of 26-35, 121 (29.4%) were in the range of 36-45, 43 (10,5) 46 and above. When compared by education level, 26 (6.3) of the participants are primary school, 78 (19.0%) high school, 192 (46.7) university, 85 (20.7%) graduate, 30' u (7.3%) have a doctorate degree. Employees' expectations from business life are directly proportional to their education levels. As the level of education increases, the expectation and income level of the job also increases. The financial and social conditions of people with higher education levels increase compared to other people.

When compared by occupation, 72 (17.5%) of the participants were advisory officers, 59 (14.40%) security, 54 (13.10%) managers, 75 (18.20%) assistant managers. , 151 ( 36.70 ) of them are office clerks. Expectations and needs differ according to the occupation status of the enterprises. Different professions have different expectations and requirements. When hiring employees, suitable personnel should be recruited according to the conditions and expectations of the work, appropriate training should be given in case of deficiencies detected, and employees should be encouraged to be more productive. When compared according to the years of employment in the sector, 2 (0.5%) of the participants are less than 1 year, 11 (2.7%) 1-2 years, 86 (20.09) 3-5 years, 168 (40.9%) 6-10 years, 108 (26.30%) 11-16 years, 36 (8.8%) work in 16 or more sectors. Employees who are more senior than working years in the enterprises have more information about the internal functioning of the enterprise and the structure of the sector. Their expertise in this field brings them to higher positions and causes a positive increase in their income. In addition, the opportunities offered to the employees according to the years of service (premium, private health insurance, nutrition applications, vacation, etc.) motivate them more and increase operational efficiency.

It is suggested that the relationship between transformational leadership characteristics and business performance in the field of tourism should be examined in different tourism enterprises. Thus, the obtained data can be compared with other results and different results can be obtained. Transformational leadership characteristics; organizational silence, organizational cynicism, psychological well-being, etc. Researching them by associating them with the subjects will provide different findings.

## ABSTRACT

This study was conducted using the relational survey technique, which is one of the quantitative research methods. The population of the study consists of employees working in banks operating in the Turkish Republic of Northern Cyprus. The sample group consisted of 312 participants in total and these participants were included in the study. In the data collection process, a set of questionnaires including demographic information, the Job Stress Scale, which assesses job stress perceptions, and the Performance Scale, which measures performance, were used. The data obtained were subjected to statistical analysis using SPSS 28.00 program. According to the results of the study, demographic factors such as gender, age groups, marital status, educational level and length of service do not have a significant effect on the participants' perceptions of job stress. However, a significant difference was found between married and single participants in the area of decision latitude. The performance analysis shows that while there is no significant difference between gender and age groups in the task and contextual performance categories, there is a significant difference between genders in the total performance category. This indicates that male participants have higher total performance scores than female participants. In the analysis evaluating the relationship between job stress and performance, a negative relationship was found between workload and task performance, while a positive relationship was found between decision latitude and task performance. However, it was observed that the effect of job stress on overall performance is limited and other factors may also be effective in this relationship.

**Keywords:** Performance, Stress, Work stress.

## 1. INTRODUCTION

### 1.1. Problem Status

Stress can be defined as a response that occurs physically, mentally or emotionally in an individual. Stress often occurs in the process of coping with various challenges, pressures or changes a person faces. These challenging factors may be work-related, but they may also be personal, family or social factors. Stress can trigger a biological reaction known as the body's "fight or flight" response, which is often manifested by symptoms such as increased heart rate, increased breathing, and tense muscles (Özgen and Aydın, 1999).

Work stress is the type of stress specifically associated with the work environment. Work stress can be caused by factors such as intensity of tasks at work, time pressure, work relationships, role ambiguity, concern about job security and balance between work and family life. Work stress can affect an individual's performance, reduce his motivation, and have negative effects on his general health (Şahin, 2005). Coping with work stress can be improved depending on factors such as effective management strategies, workload balance and the creation of a supportive work environment. In order to reduce the effects of work stress and maintain a healthy work life, it is important for individuals and organizations to make a conscious effort on this issue (İştar, 2012).

Performance is an important concept that often evaluates how effectively individuals, groups or organizations achieve certain goals. Individual performance measures how effectively an employee performs his duties at work and is often evaluated with criteria such as achieving certain goals, completing tasks on time, and complying with quality standards (Karaman, 2009). Group performance represents the achievements of a team as a result of working together and coordinating (Bayram, 2006). Performance at the organizational level is often measured based on a variety of factors such as financial results, customer satisfaction, market share and sustainability. Performance evaluation is an important management tool used to ensure the continuous development of individuals, groups and organizations, highlight strengths and identify areas of development. These evaluation processes are applied regularly to determine strategies to achieve goals and improve performance (Aslan and Doğan, 2020).

Work stress includes the emotional and physical reactions employees feel to various pressures and challenges in their work environments. These stress factors may include various elements such as intensity of demands at work, time pressure, role ambiguity, work relationships, competitive environment and job security concerns (Turunç and Çelik, 2010). The impact of job stress on performance is often considered in a complex relationship. Increased work stress can reduce employees' motivation and negatively affect their performance at work. An intense workload, constantly changing work conditions or job-related uncertainty can challenge employees' ability to focus and reduce their productivity (Dülgeroğlu and Başol, 2017). Additionally, if work stress continues for a long time, it can have negative effects on individuals' physical and mental health, which can

further negatively impact their performance. However, the impact of job stress on performance may vary depending on personal and organizational factors. Establishing appropriate support mechanisms in the workplace can help employees improve their ability to cope with stress. Additionally, open communication in the workplace, fair management practices, and respect for employees' emotional needs can reduce the negative effects of job stress and positively affect performance ( Önbıçak et al., 2016) .

In conclusion, the impact of job stress on performance is a complex issue and varies depending on a variety of factors. A well-managed work stress environment can allow employees to perform more effectively, but excessive and persistent stress can negatively impact performance. Therefore, it is important to develop effective strategies to understand, manage and reduce job stress in workplaces.

### 1.2. Purpose and Importance of the Research

Today, the business world is constantly evolving in parallel with rapidly changing economic, technological and social dynamics. This evolution brings job stress to the fore by increasing the challenges faced by employees. Especially the financial sector is one of the areas where work stress is felt intensely. Banks operating in the Turkish Republic of Northern Cyprus are at the center of economic activities and the personnel working in this sector have to cope with work stress.

In this context, this study aims to examine the potential effects of job stress on the performance of personnel working in banks in the Turkish Republic of Northern Cyprus. Understanding the coping mechanisms of personnel in the financial sector with work stress and the possible effects of this stress on performance will be an important step both in improving practices in the business world and in increasing employees' job satisfaction and performance.

The focus of the study is to explain the relationships between job stress perceptions of employees working in banks and task performance, contextual performance and total performance. In this context, the findings will contribute to our understanding of how job stress affects the performance of employees in the financial sector and will bring a new perspective to the literature in this field.

### 1.3. Hypotheses

In this research, answers were sought to the following questions:

H1 : There is a significant difference between the demographic information of the participants and their perception of job stress.

H2 : There is a significant difference between the demographic information of the participants and their performance perceptions.

H3 : Work stress has an effect on performance.

### 1.4. Assumptions

research participants gave their answers to the scale questions sincerely.

### 1.5. Limitations

Research;

- With research participants,
- With the scale questions used in the research,
- It is limited to bank employees in TRNC.

### 1.6. Definitions

**Stress:** . It is a physical and mental reaction that occurs when an individual feels the need to adapt to changes or events in his or her environment (Güçlü, 2001).

**Performance:** It is a concept that shows how effectively an individual, a group or an organization performs a certain task (Işığışok , 2008).

## 2. THEORETICAL FRAMEWORK

### 2.1. Concept of Stress and Work Stress

Stress is a result of physical, emotional and mental reactions that occur in the process of coping with challenging situations or demands that an individual encounters. This is usually related to environmental pressures, expectations or changes perceived by the individual. Work stress is the type of stress that arises from factors such as uncertainty, time pressure, performance expectations, relational problems and workload that the individual is exposed to in the work environment . Work stress is a frequently encountered phenomenon in the competitive, fast-changing and demanding environment of the modern business world. Work stress is associated with situations that challenge an employee's ability to cope with work tasks. This can affect the employee's performance, reduce motivation and negatively affect his or her physical health (Ishtar, 2012). Sources of job stress may include workload, low autonomy, uncertainty, constant change, low levels of support, and interpersonal relationships. Work stress can affect not only an individual's health but also workplace productivity

and employee satisfaction. Therefore, it is important to develop stress coping strategies and provide a supportive work environment in the workplace. Policies and resources to reduce the effects of work stress can increase the overall well-being of both employees and workplaces (Bakan, et al. 2015).

Work stress is an inevitable reality of today's modern working life. Stress levels may increase as employees face challenges such as coping with workplace demands, meeting performance expectations, and adapting to an ever-changing work environment. This stress can negatively impact an individual's physical, mental and emotional health. Factors such as busy work schedules, a competitive environment, high expectations, low autonomy, managerial pressures and disruption of work-life balance may contribute to increased work stress (Güçlü, 2001) . Work stress is a condition that can often become chronic and can cause a number of health problems in the long term. Therefore, it is important to effectively deal with stress at work. Employers providing policies and support systems to help employees manage their stress levels can help employees reduce work stress. In this part of this study, starting from the concept of stress, we focus on the definition and effects of stress, work stress and its symptoms, factors affecting work stress, and finally the possible consequences of work stress. This information can serve as an important basis for raising awareness and developing effective strategies to combat stress in the workplace ( Efeoğlu , 2006).

## 2.2. Performance Concept

Performance generally refers to how effectively an individual or a system performs a certain task or function. This concept is a metric that measures the degree to which a person, an organization or a process achieves certain goals. Performance is often used to evaluate results achieved over a specific period of time. At the individual level, performance is based on factors such as a person's ability to perform job duties, success at work, abilities, and contributions (Işığışok, 2008) . This performance plays a fundamental role in the processes of evaluating, rewarding and developing employees by reflecting how effective an individual is in a particular job role . At the organizational level, performance indicates how successfully a company achieves certain goals, strategies, or industry standards. Financial performance can be evaluated by various measures such as customer satisfaction, innovation capacity and employee engagement. The concept of performance is also used in fields such as arts, sports and entertainment. It is used in a variety of contexts, such as a stage performance by an artist, a competition by an athlete, a concert by a band, or a film performance by an actor. In summary, the concept of performance is a multifaceted concept that evaluates the ability of individuals, organizations and systems to achieve certain goals. Performance, which is of critical importance for success and effectiveness, forms part of continuous evaluation, feedback and development processes (Nabiyeva , 2021).

Performance evaluation Generally set your goals , your expectations or What are your criteria ? has been achieved after being evaluated later makes . This evaluation is based on the employees' strong aspects determination , development areas describing And reward or performance improvement processes manage your purpose carries . Your performance measurement, specific of indicators and performance of metrics to use Contains. These metrics are usually of the business to their goals and strategic to your priorities connected aspect determines. For example, a of the company financial performance to evaluate for income increase, profit margin and cost control like financial indicators can be used (Oğrak, Ataman and Ataman, 2019).

Individual performance evaluation Generally work duties , responsibilities , work success , team study And personal development areas Contains . Employees Generally designated how much to the goals contribution how much they provide , how much effective One way in its place what they brought And organization general goals in line with How One role they played about are evaluated . Performance management processes Generally organised back notification , performance evaluations , target determination , development plans And reward like elements Contains . These processes allow employees to continually aspect their development to ensure And organization to their success contribute to be found incentive to do for It is designed . Performance the concept of a of an individual organization or One of the system set to goals access your ability measuring And evaluator One process Contains . Performance management , success measure , constantly development incentive to do And strategic to goals to reach for important One management It is an intermediary (Oğrak , Ataman and Ataman, 2019).

## 3. METHOD

### 3.1. Research Method

This study was conducted using the relational screening technique, which is one of the quantitative research methods. Relational scanning technique is a research method used to understand and discover the relationships between a topic or topics. This technique aims to gain in-depth understanding by examining the connections between concepts, themes, or factors found around a particular topic. Relational scanning technique is generally included in qualitative research methods and is used to understand complex relationships (Karasar, 2008).

### 3.2. Population and Sample

The population of the study consists of bank employees in TRNC. The sample was determined by the quota sampling method. Quota sampling is a sampling method used to ensure balanced representation of subgroups with a certain characteristic or qualifications in a research. It is used to maintain the proportions of individuals with certain characteristics within the research population. This method is useful for representing different groups in the population and making generalizations ( Yagar and Dökme, 2008) . In this context, a sample group was created without questioning the study participants' duties in the bank and 312 people were included in the study.

### 3.3. Data Collection Tools

Data demographic information form, Work stress scale and Performance scale were used in the study.

The Work Stress Scale is a measure that covers three main subsections. The workload, job control, and social support subsections contain 5, 6, and 6 questions, respectively. Cronbach's alpha coefficients reported for the workload, control and social support subsections of the scale vary between 0.51 and 0.72 (26). Four of the 6 questions used in job control measurement consist of skill use subheadings and two of them consist of decision freedom subheadings (Table 1). Response options for the workload, skill use and decision freedom subsections consist of "often, sometimes, rarely and never" responses. For social support, there are options such as "completely agree, partially agree, partially disagree and completely disagree". In evaluating the scale, response options are coded between 1-4 and the total score of the relevant subsection is obtained by summing the scores of each subsection. The job control total score is obtained by summing the scores obtained for skill use and decision freedom. High scores indicate high workload, high job control, and high levels of social support . Job stress has been evaluated as the ratio of workload to job control (8, 16, 17, 26-29).

In this study, employee performance was evaluated in two dimensions, namely task and contextual performance. Performance Scale developed by Karakurum (2005) was used to measure performance . Task performance includes six questions, four of which were taken from the Turkish translated version of the task performance scale developed by Beffort and Hatturp . The remaining two questions were added originally by Karakurum ( Karakurum , 2005). Contextual performance was measured with a scale containing five questions developed by Borman and Motowidlo (1993). In total, the performance scale includes nine questions.

The reliability analysis results of the scales used in this study are given in Table 1:

Table 1. Reliability Analysis

|                   | Cronbach's Alpha | Article |
|-------------------|------------------|---------|
| Work Stress Scale | 0.750            | 17      |
| Performance Scale | 0.956            | 7       |

Cronbach's Alpha coefficient is a statistical measure that evaluates the internal consistency of a measurement instrument. This coefficient measures whether the items in a scale are compatible with each other. Cronbach's Alpha coefficient calculated for the Job Stress Scale was found to be 0.750, while for the Performance Scale this value was calculated to be 0.956. The high Cronbach's Alpha values of both scales indicate that the measurement tools are reliable and robust in terms of internal consistency. This indicates that the items contained in the scales are compatible with each other and suitable for the measurement purpose. High Cronbach's Alpha values indicate that the scales perform reliably and consistently.

### 3.4. Analysis of Data

In this study, the data obtained was analyzed using SPSS 28.00 program. Analyzes performed include T-Test, Anova Test, ANOVA Tukey test, correlation and regression analysis. T-Test was used to evaluate the differences in means between two groups, and ANOVA Test was used to evaluate the differences between three or more groups. Group average differences were determined with the ANOVA Tukey test, relationships between variables were examined with correlation analysis, and relationships between the dependent variable and independent variables were modeled with regression analysis. These analyzes show that the study was conducted on statistical grounds and the results were examined in depth.

## 4. FINDINGS

### 4.1. Demographic features

Demographic variables of the participants are given in Table 1.

|                        |                    | N   | %           |
|------------------------|--------------------|-----|-------------|
| Gender                 | Woman              | 191 | 61.2        |
|                        | Male               | 121 | 38.8        |
| Age                    | 21-29 years old    | 29  | 9.3         |
|                        | 30-39 years old    | 125 | 40.1        |
|                        | 40-49 years old    | 129 | 41.3        |
|                        | 50 and above       | 29  | 9.3         |
| marital status         | Married            | 241 | 77.2        |
|                        | Single             | 71  | 22.8        |
| Educational background | Primary education  | 25  | 8.0         |
|                        | High school        | 71  | 22.8        |
|                        | associate degree   | 41  | 13.1        |
|                        | Licence            | 155 | 49.7        |
|                        | Degree             | 20  | 6.4         |
| Service time           | less than 1 year   | 22  | 7.1         |
|                        | 1-3 years          | 15  | 4.8         |
|                        | 4-6 years          | 46  | 14.7        |
|                        | 7-9 years          | 52  | 16.7        |
|                        | 10 years and above | 177 | 56.7        |
| Total                  |                    | 312 | one hundred |

According to the table, it is seen that women are the majority in the gender distribution of the participants with a rate of 61.2%. According to age distribution, most of the participants are between the ages of 30-49, and people in this age range constitute 81.7% of the total participants. In terms of marital status, it is observed that the majority of participants are married; married participants constitute 77.2% of the total. When we focus on length of service, it becomes clear that the majority of participants have served for a long period of time. In particular, participants who have been serving for 10 years or more constitute 56.7% of the total. This shows that employees often establish a long-term bond or gain experience with their organizations. As a result, this group of participants generally consists of individuals who are married, middle-aged, and have long-term service periods.

### 4.2. Work Stress and Performance Perceptions of Participants

Table 3. Participants' Job Stress and Performance Perception Levels

|                          | Min.  | Max . | Cover.  | ss      |
|--------------------------|-------|-------|---------|---------|
| Task Performance         | 4.00  | 16.00 | 10.3718 | 3.44403 |
| Contextual Performance   | 5.00  | 20.00 | 13.5353 | 4.43300 |
| <b>Performance total</b> | 9.00  | 36.00 | 23.9071 | 7.62681 |
| Workload                 | 8.00  | 20.00 | 15.3333 | 2.62766 |
| Skill Usage              | 6.00  | 16.00 | 11.5737 | 2.30636 |
| Freedom of Decision      | 2.00  | 8.00  | 5.9519  | 1.87579 |
| Social support           | 10.00 | 24.00 | 18.4519 | 3.60211 |
| <b>Work Stress Total</b> | 35.00 | 68.00 | 51.3109 | 6.07479 |

The average score for task performance was 10.3718, while for contextual performance it was 13.5353. The total performance score is the sum of these two components and the average score is 23.9071. Contextual performance has a higher mean score than task performance. **When** the "Workload" ( isyuku ) factor is examined, it is seen that the participants' workload scores are minimum 8.00, maximum 20.00, average 15.3333 and standard deviation 2.62766. Workload scores generally have a moderate distribution. Secondly, when the "Skill Usage" factor is evaluated, it is seen that the minimum is 6.00, the maximum is 16.00, the average is 11.5737 and the standard deviation is 2.30636. Scores on this factor generally reflect a moderate level of variability. Third, considering the "Freedom of Decision" factor, it has minimum values of 2.00, maximum of 8.00, mean of 5.9519, and standard deviation of 1.87579. Decision freedom scores generally have a lower mean and less variability. Fourthly, when the "Social Support" factor is evaluated, it is seen that the minimum is 10.00, the maximum is 24.00, the mean is 18.4519 and the standard deviation is 3.60211. Social support scores generally indicate a higher mean and lower variability. Finally, when the "Total Stress" factor is examined, it has a minimum of 35.00, a maximum of 68.00, a mean of 51.3109 and a standard deviation of 6.07479. Total stress scores generally have a wider distribution and a moderate mean.

#### 4.3. Comparison of Participants' Demographic Information and Perceptions of Work Stress

Table 4. By Gender Comparison of Job Stress Perceptions

|                     |       | N   | Cover.  | Ss .    | f     | p.    |
|---------------------|-------|-----|---------|---------|-------|-------|
| Workload            | Woman | 191 | 15.2775 | 2.57753 | 0.222 | 0.638 |
|                     | Male  | 121 | 15.4215 | 2.71340 |       |       |
| Skill Usage         | Woman | 191 | 11.5026 | 2.35277 | 0.244 | 0.621 |
|                     | Male  | 121 | 11.6860 | 2.23619 |       |       |
| Freedom of Decision | Woman | 191 | 5.8743  | 1.92078 | 1,474 | 0.226 |
|                     | Male  | 121 | 6.0744  | 1.80354 |       |       |
| Social support      | Woman | 191 | 18.4450 | 3.69578 | 0.830 | 0.363 |
|                     | Male  | 121 | 18.4628 | 3.46420 |       |       |
| stress total        | Woman | 191 | 51.0995 | 6.11689 | 0.013 | 0.911 |
|                     | Male  | 121 | 51.6446 | 6.01783 |       |       |

$p > 0.05$

According to the results of the analysis, no significant difference was detected between genders in terms of job stress perceptions ( $p > 0.05$ ). This shows that there is no statistically significant difference between male and female participants in terms of workload, skill use, decision freedom, social support and total stress perceptions.

Table 5. By Age Comparison of Job Stress Perceptions

p > 0.05

According to the analysis results, no significant difference was detected between age groups in terms of job stress perceptions (p > 0.05). This shows that there is no statistically significant difference between individuals in different age groups in terms of workload, skill use, decision freedom, social support and total stress perceptions.

Table 6. By Marital Status Comparison of Job Stress Perceptions

|                     |         | N   | Cover.  | ss      | f     | p.    |

| stress total        | Married | 241 | 51.4564 | 5.86152 | 1,185 | 0.277 |
|                     | Single  | 71  | 50.8169 | 6.77033 |       |       |

p > 0.05

According to the analysis results, no significant difference was detected between marital status and job stress perceptions (p > 0.05). However, since the p value in the area of decision freedom is below the 0.05 significance level, it can be said that there is a significant difference between married and single participants in this area.

p <0.05

According to the results of the analysis, no significant difference was detected between educational status and the sub-dimensions of workload, skill use, freedom of decision and social support (p>0.05). In the analysis carried out to evaluate the significant differences in the total stress between primary school, high school, associate degree, undergraduate and master's degree groups, it was concluded that the differences between the groups were statistically significant. Especially since the p value between the Primary and High School groups and the Master's degree group is below the 0.05 significance level, it can be said that there is a significant difference in the total stress levels between these two groups. This may be an indication that the perception of stress decreases or increases as the level of education increases.

p <0.05

In this analysis, the relationship between length of service and perceptions of job stress was examined. When the participants were grouped according to their service period, no statistically significant difference was found between different service periods in terms of workload, decision -making freedom and social support dimensions . However, a different result was obtained in the analysis made in terms of skill use. Participants' perceptions on skill use showed a significant difference according to their length of service ( $F=3.665$ ,  $p=0.006$ ). This shows that the participants' level of perception of skill use at work varies depending on the length of service. When the effects on the total stress were evaluated, a significant difference was detected between the groups according to the length of service ( $F = 2.536$ ,  $p = 0.040$ ). This shows that there is a significant change in participants' stress perceptions as their length of service increases.

#### 4.4. Comparison of Participants' Demographic Information and Performance Perceptions

Table 9. By Gender Comparison of Performance Perceptions

|                        |       | N   | Cover.  | ss      | f     | p            |
|------------------------|-------|-----|---------|---------|-------|--------------|
| Task Performance       | Woman | 191 | 10.3298 | 3.59694 |       |              |
|                        | Male  | 121 | 10.4380 | 3.20128 | 3,325 | 0.069        |
| Contextual Performance | Woman | 191 | 13.4136 | 4.62278 |       |              |
|                        | Male  | 121 | 13.7273 | 4.12715 | 3,757 | 0.054        |
| Performance total      | Woman | 191 | 23.7435 | 8.00869 |       |              |
|                        | Male  | 121 | 24.1653 | 7.00636 | 4,271 | <b>0.040</b> |

p <0.05

According to the statistical analysis based on the data, no significant difference could be detected between gender in the task performance category ( $F$  value: 3.325,  $p$  value: 0.069). This shows that there is no statistically significant difference between the task performance scores of male and female participants. Similarly, no significant difference was detected between gender in the contextual performance category ( $F$  value: 3.757,  $p$  value: 0.054). This indicates that there is no statistically significant difference between the contextual performance scores of male and female participants . However, in the analysis made in the total performance category, a significant difference was detected between gender ( $F$  value: 4.271,  $p$  value: 0.040). This shows that there is a statistically significant difference between the total performance scores of male and female participants. Accordingly, it is seen that the total performance averages of male participants are higher than

female participants. As a result, while there is no significant difference between gender in the task performance and contextual performance categories, there is a statistically significant difference in the total performance category.

Table 10. By Age Comparison of Performance Perceptions

|                        | 40-49 years old | 129 | 10.4806 | 3.24302 |       |       |
|                        | 50 and above    | 29  | 10.9310 | 2.85271 |       |       |
| Contextual Performance | 21-29 years old | 29  | 13.4138 | 4.84412 | 0.521 | 0.668 |
|                        | 30-39 years old | 125 | 13,1920 | 4.62583 |       |       |
|                        | 40-49 years old | 129 | 13.7752 | 4.27610 |       |       |
|                        | 50 and over     | 29  | 14.0690 | 3.91819 |       |       |
| Performance total      | 21-29 years old | 29  | 24,0000 | 8.12404 | 0.576 | 0.631 |
|                        | 30-39 years old | 125 | 23.2720 | 8.13037 |       |       |
|                        | 40-49 years old | 129 | 24.2558 | 7.24168 |       |       |
|                        | 50 and above    | 29  | 25,0000 | 6.63325 |       |       |

$p > 0.05$

According to the analysis results, no significant difference was detected between age groups in all three performance categories ( $p > 0.05$ ). This may indicate that there is no significant difference in performance perceptions between individuals in different age groups.

#### By Marital Status Comparison of Performance Perceptions

|                        |         | N   | Cover.  | ss      | f     | p.    |
|------------------------|---------|-----|---------|---------|-------|-------|
| Task Performance       | Married | 241 | 10.4108 | 3.41829 | 0.070 | 0.791 |
|                        | Single  | 71  | 10.2394 | 3.55152 |       |       |
| Contextual Performance | Married | 241 | 13.5519 | 4.42606 | 0.003 | 0.954 |
|                        | Single  | 71  | 13.4789 | 4.48763 |       |       |
| Performance total      | Married | 241 | 23.9627 | 7.58635 | 0.080 | 0.778 |
|                        | Single  | 71  | 23.7183 | 7.81424 |       |       |

$p > 0.05$

According to the analysis results, no significant difference was detected between married and single participants in terms of task performance, contextual performance and total performance perceptions ( $p > 0.05$ ). This indicates that marital status does not have a statistically significant effect on performance perceptions.

#### Table 12. By Educational Status Comparison of Performance Perceptions

|                        |                   | N   | Cover.  | Ss .    | f     | p.    |
|------------------------|-------------------|-----|---------|---------|-------|-------|
| Task Performance       | Primary education | 25  | 10.8400 | 2.99555 | 0.619 | 0.649 |
|                        | High school       | 71  | 10.3239 | 3.48783 |       |       |
|                        | associate degree  | 41  | 10.4634 | 2.74861 |       |       |

|-------------------|-------------------|-----|---------|---------|-------|-------|
|                   | High school       | 71  | 13.4648 | 4.28229 |       |       |
|                   | associate degree  | 41  | 13.4878 | 4.02568 |       |       |
|                   | Licence           | 155 | 13.6000 | 4.76132 |       |       |
|                   | Degree            | 20  | 12.5500 | 4.31003 |       |       |
|                   | Primary education | 25  | 25.0400 | 6.30132 |       |       |
|                   | High school       | 71  | 23.7887 | 7.52124 |       |       |
| Performance total | associate degree  | 41  | 23.9512 | 6.54198 | 0.513 | 0.726 |
|                   | Licence           | 155 | 24.0323 | 8.18727 |       |       |
|                   | Degree            | 20  | 21.8500 | 7.33610 |       |       |

p > 0.05

According to the results of the analysis, no significant difference was detected between participants with different education levels in terms of task performance, contextual performance and total performance perceptions (p > 0.05). This shows that education level does not have a statistically significant effect on performance perceptions.

Table 13. By Service Duration Comparison of Performance Perceptions

|                        |                    | N   | Cover.  | Ss .    | f     | p.    |
|------------------------|--------------------|-----|---------|---------|-------|-------|
|                        | less than 1 year   | 22  | 10.6364 | 3.10982 |       |       |
|                        | 1-3 years          | 15  | 10.2000 | 4.36218 |       |       |
| Task Performance       | 4-6 years          | 46  | 10.4783 | 3.55740 | 0.346 | 0.847 |
|                        | 7-9 years          | 52  | 10.7885 | 3.13948 |       |       |
|                        | 10 years and above | 177 | 10,2034 | 3.47939 |       |       |
|                        | less than 1 year   | 22  | 13.2273 | 4.25309 |       |       |
|                        | 1-3 years          | 15  | 13.8000 | 4.91644 |       |       |
| Contextual Performance | 4-6 years          | 46  | 13.9565 | 3.93252 | 0.337 | 0.853 |
|                        | 7-9 years          | 52  | 13.9231 | 4.35145 |       |       |
|                        | 10 years and above | 177 | 13.3277 | 4.58815 |       |       |
|                        | less than 1 year   | 22  | 23.8636 | 7.03931 |       |       |
|                        | 1-3 years          | 15  | 24,0000 | 9.10259 |       |       |
| Performance total      | 4-6 years          | 46  | 24.4348 | 7.10447 | 0.305 | 0.874 |
|                        | 7-9 years          | 52  | 24.7115 | 7.25539 |       |       |
|                        | 10 years and above | 177 | 23.5311 | 7.85598 |       |       |

p > 0.05

According to the results of the analysis, no significant difference was detected in terms of task performance, contextual performance and total performance perceptions among participants with different lengths of service (p > 0.05). This shows that length of service does not have a statistically significant effect on performance perceptions.

#### 4.5. The Relationship Between Job Stress and Performance

Table 14. Relationship Between Job Stress and Performance (Correlation Analysis)

|                  |    | Workload | Skill Usage | Freedom of Decision | Social support | stress total |
|------------------|----|----------|-------------|---------------------|----------------|--------------|
| Task Performance | r. | -.121 *  | 0.001       | .144 *              | 0.098          | 0.051        |

|                        |    |        |        |        |       |       |
|------------------------|----|--------|--------|--------|-------|-------|
|                        | p. | 0.032  | 0.986  | 0.011  | 0.083 | 0.372 |
|                        | r. | -0.094 | -0.037 | .133 * | 0.073 | 0.030 |
| Contextual Performance |    |        |        |        |       |       |
|                        | p. | 0.098  | 0.518  | 0.019  | 0.200 | 0.602 |
|                        | r. | -0.109 | -0.021 | .142 * | 0.087 | 0.040 |
| Performance total      |    |        |        |        |       |       |
|                        | p. | 0.054  | 0.713  | 0.012  | 0.126 | 0.480 |

This correlation analysis was conducted to understand the relationship between job stress factors and performance. First of all, when we look at the relationships between task performance and job stress factors, a negative correlation was detected with workload ( $r = 0.0121$ ;  $p = 0.032$ ), meaning that as workload increased, task performance decreased. However, this relationship is not statistically significant. Decision freedom showed a positive correlation ( $r=.144$ ;  $p=0.011$ ), meaning that as participants' decision freedom increased, their task performance increased, and this relationship was statistically significant. In the analyzes conducted in terms of contextual performance and performance total, no statistically significant relationship was detected with workload and skill use. However, a positive correlation was found with decision latitude, indicating that as participants' perceptions of decision latitude increased, their contextual performance and overall performance also increased.

#### 4.6. Effects of Work Stress on Performance

Table 15. Effects of Job Stress on Performance (Regression Analysis)

|             | Unstandardized Coefficients |               | Standardized Coefficients |       |       |
|-------------|-----------------------------|---------------|---------------------------|-------|-------|
|             | B.                          | std . Mistake | Beta                      | t     | p     |
| Still       | 21,323                      | 3,681         |                           | 5,792 | 0.000 |
| stresstotal | 0.050                       | 0.071         | 0.040                     | 0.707 | 0.480 |

R=0.040 F=500

This regression analysis was conducted to evaluate the potential effects of job stress on performance. According to the results of the analysis, the constant value representing the main impact on performance is 21.323. This constant expresses the expected impact of factors other than job stress on performance. The prominent independent variable in the analysis is stresstotal, which measures job stress. However, the standardized coefficient (Beta) of the stresstotal variable on performance was found to be 0.040 and the p value was 0.707. This indicates that there is no strong evidence of a significant relationship between job stress and performance. The overall result of the analysis shows that the effects of job stress on performance are limited and other factors may also have an impact on this relationship. The R value was found to be 0.040 and the F statistic was 500, indicating that the overall explanatory power of the model was low. Therefore, more comprehensive analyzes that consider additional factors may be needed to gain a more comprehensive understanding of the relationship between job stress and performance.

#### 4. CONCLUSION AND RECOMMENDATIONS

According to the results of the study, the effects of demographic factors on job stress perceptions and performance were examined. Demographic variables such as gender, age groups, marital status, education level and length of service generally do not have a significant effect on the participants' perceptions of job stress. However, a significant difference was detected between married and single participants in the area of decision freedom, indicating that marital status may have a certain impact on perceptions of work stress.

In terms of performance, no significant differences were detected between gender and age groups in task and contextual performance categories. However, a significant difference was detected between gender in the total performance category, and the total performance scores of male participants were higher than female participants. This suggests that gender has a certain effect on overall performance.

In the analysis evaluating the relationship between job stress and performance, a negative relationship was found between workload and task performance. That is, it has been observed that task performance decreases as workload increases, but this relationship is not statistically significant. On the other hand, a positive relationship was found between decision freedom and task performance. This shows that as participants' perception of decision freedom increases, their task performance also increases, and this relationship is statistically significant. In conclusion, the study evaluates the effects of demographic factors on job stress perceptions and performance, revealing that variables such as gender and marital status lead to significant differences in certain areas. However, it indicates that further analyzes are needed to provide a more in-depth understanding of the relationship between job stress and performance.

Based on the research results, it is possible to make various suggestions to understand the interactions between bank employees' job stress perceptions and performance:

- Organizing regular stress management training for bank employees can increase their ability to cope with work stress. These trainings can help them understand and apply stress coping strategies.
- Improving the work environment can be effective in reducing work stress. For example, applicable policies and practices can be developed to balance workload, strengthen social support systems, and increase decision freedom.
- Fair, transparent and measurable performance evaluation systems can increase employee motivation. Promoting a sense of fairness among employees can increase the overall level of performance.
- In recruitment processes and position placements, more effective policies can be created by taking into account individuals' abilities, experiences and their capacity to cope with work stress.
- : Initiatives can be taken to increase employees' participation in decision-making processes. Participation makes employees feel more involved in work processes and can increase their motivation.

These suggestions may positively affect the relationship between job stress and performance of bank employees and make the working environment more sustainable. However, each recommendation should be customized to the needs and dynamics of the organization.

## ABSTRACT

Nowadays, with the progress of society, especially in recent years with the emergence and development of artificial intelligence, technology and the Internet have been integrated into every aspect of people's lives. In the education industry, there are also the emergence of products combining these technologies, such as webcasting classes, e-libraries, e-learning videos, e-learning APPs and so on, and E-learning system is the collective name of these products.

Since the COVID-19 outbreak, students across the globe have had to be quarantined at home, which has resulted in no way for them to get to the classroom and learn as they used to. However, it is this situation that has led to the rapid development of e-learning systems. Teachers are using live webcasts to deliver lessons to their students, schools are developing apps specifically designed to aid learning, posting e-learning videos on the web, simulating experiments on the web, and so on. Undoubtedly, e-learning systems are a good solution to the problem of geographical restrictions. However, because there is no way for teachers to grasp the learning status of students in real time as they can in the classroom, e-learning systems have still aroused the concern of many people.

Therefore, this project was to investigate the perceptions of university students who have been exposed to e-learning systems about e-learning systems. The project was able to examine the perceptions of e-learning systems among different groups of students by gender, age, year of study and study mode. At the same time, the project categorized the factors affecting e-learning systems into five factors: Autonomy Factor, Problem-solving Factor, Multimedia Factor, Teacher Factor and Student Factor. In this study, questionnaire was used to collect data. 120 questionnaires were received. Based on the results of the survey, the project will analyze the correlation between these factors and the relationship between these factors and demographic information. These results will be useful for educational institutions or individuals to improve e-learning systems in the future.

**Keywords:** e-learning; Autonomy Factor; Problem-solving Factor; Multimedia Factor; Teacher Factor; Student Factor.

## INTRODUCTION

Nowadays, with the development of technologies such as Internet and artificial intelligence, our lives have been raised to a new level. The technology has affected perspective of our society, and one of the most important perspectives is the field of education. Moreover, after the COVID 19 pandemic, online learning has grown tremendously. The students under higher education at this time are the first bench of students who can benefit

from the convenient of technology in our study since we are in our early stage of education. During our educational period, we will encounter different educational technologies, such as educational software, course management software, the Internet and video, which we call E-learning system. This E-learning system can provide an effective learning environment for students. In E-learning system, learning activities are based on learner autonomy and interactive learning actions; in addition, learning instruction is based on multiple media. Furthermore, E-learning also offers cooperative learning opportunities. Based on activity theory, the purpose of this study is to examine learners' attitudes toward E-learning systems. Indeed, understanding learners' attitudes toward E-learning systems is necessary to ensure that E-learning stands the best possible chance to succeed.

The objective of this study is to examine the cognitive characteristic of the university students, as well as to investigate the relationship among autonomy factors, problem-solving factors, multimedia learning factors, teacher factors and student factors, in order to find out students' perception towards E-learning in higher education.

## LITERATURE REVIEW

### 1 Concept of E-learning

E-learning refers to the delivery of educational content and experiences through electronic devices such as computers, tablets, or smartphones over the internet. It can take various forms, including online courses, video lectures, interactive simulations, and virtual classrooms (Rosenberg, 2003).

E-learning has the following advantages in modern education. E-learning provides access to education for people who may not have been able to attend traditional classes due to geographical, physical, or time constraints. Learners can study at their own pace and at times that are convenient for them, allowing for a more personalized learning experience. E-learning often reduces the need for physical resources, making it a cost-effective alternative to traditional education. With advancements in technology, E-learning platforms can offer immersive and interactive learning experiences, enhancing engagement and retention (Moore, 2006). E-learning allows educators to reach a global audience, breaking down geographical barriers and enabling collaboration across borders. E-learning supports the concept of lifelong learning by providing opportunities for continuous skill development and updating knowledge.

### 2 Evolution of E-learning

The roots of E-learning can be traced back to the early development of computer-based training and instructional design theories in 1960s-1970s (Bakhouyi, 2017). In 1980s-1990s, the emergence of personal computers and the internet laid the groundwork for the delivery of educational content electronically. In the 1990s, CD-ROMs allowed for interactive multimedia learning experiences, paving the way for more engaging educational materials (Smothers et al, 2009). Also, LMS software such as Blackboard and Moodle began to streamline the administration and delivery of online courses. With the popularity of smartphones and tablets, E-learning has been extended to mobile devices, enabling mobile learning. MOOC platforms have democratized access to high-quality education from top institutions. Nowadays, advanced algorithms and AI are being used to personalize learning paths based on individual student performance and preferences. Virtual Reality and Augmented Reality are being integrated into E-learning to create immersive and interactive learning experiences (Cui et al, 2008).

### 3 Effectiveness of E-learning

There are a lot of studies and research exploring the effectiveness of E-learning compared to traditional classroom instruction. Here are some key findings:

1. A study published in the Journal of Educational Psychology found that students in online courses performed better than those in face-to-face classes, with higher test scores and retention rates (Whitman et al, 2005).
2. The U.S. Department of Education conducted a meta-analysis of 51 independent studies and found that on average, students who engaged in online learning outperformed those receiving face-to-face instruction.
3. Research published in the Journal of Computer Assisted Learning revealed that E-learning can lead to improved student satisfaction and engagement compared to traditional classroom methods (Tirziu & Vrabie, 2015).
4. The American Journal of Distance Education published a review indicating that E-learning is particularly beneficial for learners who are self-directed and motivated, as it allows them to take control of their learning journey (Miller et al, 2017).

While these studies highlight the benefits of E-learning, it is important to note that the effectiveness of any instructional method depends on various factors. Here are some key factors influencing the effectiveness of E-learning:

1. **Learner Characteristics:** Self-directed learners who are able to manage their time effectively tend to reap the benefits of e-learning environments. Learners' comfort and proficiency with technology affects their engagement and success in e-learning.
2. **Instructional Design:** Clear learning objectives help guide the design of e-learning materials and assessments and contribute to effective learning outcomes. Interactive and multimedia content can increase learner engagement and promote understanding of complex concepts. Providing timely and constructive feedback and designing effective assessment methods are essential to measuring and enhancing learning.
3. **Technological Aspects:** Ensuring that e-learning platforms are accessible from a variety of devices and have user-friendly interfaces will promote a positive learning experience. A stable internet connection and reliable hardware are key to E-learning delivery. Protecting learners' data and maintaining secure communication channels are key to building trust in E-learning environments.
4. **Social and Collaborative Elements:** Opportunities for peer co-operation and discussion can enrich the learning experience by facilitating knowledge sharing and the exchange of different perspectives. Active participation and feedback from the instructor contribute to a sense of community and support in the E-learning environment.
5. **Support Systems:** Access to timely technical assistance and troubleshooting resources can minimize disruption and frustration for learners. Providing instruction in learning strategies, time management, and self-directed learning skills can empower learners to succeed in e-learning.

#### 4 Technology Integration in E-Learning

With the growth of the Internet, more and more technology is being used in e-learning systems. These technological tools and platforms play a crucial role in facilitating e-learning by offering diverse content delivery models, facilitating interactive and immersive learning experiences, and enabling personalized teaching and learning, ultimately increasing the effectiveness and accessibility of online education. Here are some key technologies:

1. **Learning Management Systems (LMS):** The LMS platform simplifies the management of online courses, including content delivery, student enrolment and assessment tracking. The LMS provides a centralized hub for hosting and delivering course materials, making them easily accessible to learners wherever they have an internet connection. Forum, chat and messaging features in the LMS can facilitate interaction between students and teachers (Konstantina et al, 2015).
2. **VR and AR:** VR and AR technologies provide immersive simulations and visualizations to deepen

understanding of complex disciplines such as science, engineering and medical training. VR and AR can provide hands-on training experiences in virtual environments, allowing learners to practice their skills in realistic scenarios.

3. AI: Artificial intelligence algorithms can analyze learners' performance data and provide personalized learning paths based on their strengths, weaknesses and learning preferences. Artificial intelligence-powered chatbots and virtual assistants can provide instant support to learners, answering questions and guiding them through course material.

4. Video Conferencing and Webinars: Platforms for video conferencing and webinars enable live lectures, discussions, and Q&A sessions, fostering real-time interaction between instructors and students. Through these platforms, guest speakers and experts can contribute to the learning experience regardless of geographical constraints.

5. Mobile Learning Apps: Mobile apps provide learners with the flexibility to access course materials and engage in learning activities from smartphones and tablets, supporting mobility and accessibility.

## 5 Challenges and Barriers in E-Learning Implementation

Common challenges and barriers in implementing e-learning (Goyal, 2012) include:

1. Access to technology and internet connectivity: Many learners may not have access to reliable technology or high-speed internet, limiting their ability to fully participate in E-learning.
2. Lack of technical skills: Some learners and educators may struggle with using the necessary E-learning platforms and tools effectively, leading to frustration and disengagement.
3. Motivation and engagement: Without face-to-face interaction, some learners may struggle to stay motivated and engaged in E-learning environments.
4. Quality of content and instructional design: Ensuring that E-learning materials are engaging, effective, and well-organized can be a challenge for educators and content creators.

Potential solutions to address these challenges include:

1. Providing access to technology and internet: Schools and organizations could consider providing equipment and subsidizing the cost of access to the Internet for learners who do not have access to the Internet. They could also explore offline learning programs and distribute educational materials in physical form.
2. Offering technical support and training: Providing training sessions and resources to help learners and educators become proficient in using E-learning platforms and tools can improve their confidence and effectiveness.
3. Implementing interactive and personalized learning experiences: Incorporating interactive elements such as quizzes, discussions and multimedia content can increase learner engagement. In addition, personalized learning paths based on individual interests and abilities can help to maintain motivation.
4. Investing in professional instructional design: Employing skilled instructional designers and educators to create high-quality E-learning content ensures that materials are well-structured, engaging and aligned with learning objectives.

## 6 Future Directions and Emerging Trends in E-Learning

AI in E-learning: Integrating AI technologies such as personalized recommendations, adaptive learning algorithms and natural language processing has great potential to improve the efficiency and effectiveness of E-learning experiences (Elizabeth et al, 2003).

Immersive Technologies: VR and AR hold the promise of transforming e-learning by providing immersive and

interactive learning environments. Future research may delve into the pedagogical implications and best practices of integrating these technologies into E-learning programs.

**Data-Driven Instructional Design:** Leveraging learning analytics and big data, future E-learning research could focus on using data-driven insights to inform instructional design, personalize learning pathways, and predict student performance (Verbert et al, 2012).

**Workforce Development and Lifelong Learning:** Research into the role of E-learning in meeting the needs of adult learners, upskilling and re-skilling the labor force and supporting lifelong learning initiatives can contribute to the development of E-learning with wider societal impact.

These future directions and emerging trends in e-learning have the potential to shape the next generation of educational technology and pedagogy, ultimately redefining the way we learn and teach in the digital age.

## RESEARCH METHODOLOGY

In this project, a questionnaire survey has been conducted to collect the data in order to evaluate students' perception of E-learning in higher education. Previous studies have also used questionnaire survey to collect users' perception on technology with different scales, which were found to be effective, whereas the measurement scale used in this project has been adopted in previous research to measure students' perception on E-learning. Moreover, the method of using survey is very effective because of being widely distributed to the students and spending less time to distribute and collect data. Thus, questionnaire survey has been chosen to collect data in this project.

### 1 Designing a questionnaire

The questionnaire was divided into 3 parts. For the first part, it contained the questions inquiring the personal information of the respondents, including their age, gender, the universities they attended, their current grade level and major, their mode of study and their GPA. This information was required as comparison between different age, and study mode in their perception in E-learning.

In the second part, there were questions inquiring the previous experience of using technology for learning of the respondents. This information was required as comparison between the respondents with different experience in using computer. There were 5 items in total, 1 of which was about the computer accessibility and 4 were about the quantity of their prior experience on using computer for both educational and non-educational purpose.

The third part contained the questions inquiring university students' perceptions to E-learning. There were 25 questions in this part, 6 of which are related to the Autonomy Factors (AF), 3 of which are for the Problem-solving Factors (PF), 3 for the Multimedia learning Factors (MF), 3 for the Teacher Factors (TF), and the last 10 for the Students' Attitude Factors (SF). Those items were rated from a 5-point Likert type scale, ranging from 1 "strongly disagree" to 5 "strongly agree".

### 2 Distribution and collection of questionnaires

After the questionnaire has been finalized, a pilot study has been done before distribution in a large scale. 5 questionnaires were distributed out to my friends from various universities, for a pilot study. Piloting the questions on a small group of people could certainly save time in the case that any problems about the questions, wording and design of the questionnaire should be discovered at this stage. They were asked to complete the questionnaires without any explanation or assistance in order to find out whether they could understand the questions by themselves. After the questionnaires have been completed and collected, they were asked to give feedback about the questionnaire individually. It was found that the questionnaire could be understood by all of the participants in this pilot study and the length of the questionnaire was found to be moderate as well.

As soon as the pilot study finished, distribution of questionnaires started. The targets of this survey were

university students. They have all experienced with different extent of E-learning systems in university or in high school. So, the information about university students' perception on E-learning and the factors affecting their perception can be collected for this target group. Finally, 120 questionnaires were collected.

### 3 Data Preparation

After the completion of the distribution and collection of the questionnaires, questionnaire checking has to be done so as to ensure all the questionnaires were fully completed without any missing items.

All the questionnaires collected were only the raw data in this stage. The raw data will be inputted into the data-sheet so as to facilitate data analysis process. Once there was any missing item in any questionnaire, that questionnaire would be discarded.

### 4 Data Analysis

The statistical tool used in this project was the "Statistical Package for the Social Science" (SPSS). SPSS is a sophisticated piece of software used by many scientists and related professionals for statistical analysis. Moreover, it is user-friendly and basically capable to provide every information output we needed.

Items included in the questionnaire must be valid and reliable in order to collect useful and relevant data. The validation of the measurement scales would be evaluated so as to confirm the psychometric property of this scale is reliable and valid.

Factor analysis is used to identify groups of similar and related items, create and validate scales, ensure that items are associated with the scales, and reduce the number of variables so as to facilitate further analysis. Items should be eliminated if the factor loading or corrected item-total correlation value of the item was lower than 0.3.

The reliability of the scales would be evaluated by the Cronbach's alpha which is a measure of internal consistency indicated how close do the items related to each other. All the scales should exceed the recommended cutoff criteria, i.e. Cronbach's alpha > 0.7, then all the scales could say to be reliable.

After validating the measurement scales, the independent t-test were used for testing the differences between the means of two independent groups while one-way analysis of variance (ANOVA) was used for testing the differences between the means of several groups (more than two groups). In this study, comparison would be made between gender; full-time students and part-time students, more experience and less experience, among different age groups and among grade level.

### 5 Validation of Measurement Scale

As mention in last section, the validation of the measurement scale would be evaluated in order to confirm its psychometric property. Factor loading and item-total correlations of the items were found out to test for their validity. Table 1 shows the result of factor analysis.

#### 5.1 Factor Analysis

| Item | Factor Loading |
|------|----------------|
| AF1  | .802           |
| AF2  | .817           |
| AF3  | .813           |
| AF4  | .723           |
| AF5  | .773           |
| AF6  | .510           |
| PF1  | .825           |
| PF2  | .732           |
| PF3  | .851           |
| MF1  | .834           |

|      |      |
|------|------|
| MF2  | .880 |
| MF3  | .824 |
| TF1  | .695 |
| TF2  | .788 |
| TF3  | .776 |
| SF1  | .720 |
| SF2  | .680 |
| SF3  | .765 |
| SF4  | .425 |
| SF5  | .564 |
| SF6  | .642 |
| SF7  | .708 |
| SF8  | .602 |
| SF9  | .763 |
| SF10 | .656 |

**Table 1: Factor Loading of the Measurement Scale**

The general accepted values of the factor loading and item-total correlation was 0.3. According to Table 3.0, the factor loading of all the 25 items in the questionnaire were larger than 0.3. Thus, this scale was reliable and all the items above had large variance for factor analysis.

#### 5.2 Reliability Analysis

| Item | Cronbach's Alpha | N of Items |
|------|------------------|------------|
| AF   | .929             | 6          |
| PF   | .877             | 3          |
| MF   | .909             | 3          |
| TF   | .836             | 3          |
| SF   | .940             | 10         |

**Table 2: Reliability Statistics for Factors**

The Cronbach's Alphas for each Factor are 0.929, 0.877, 0.909, 0.836, 0.940, which are all higher than the acceptable value 0.7, means that the scale was reliable. Table 2 shows the reliability of factors.

## ANALYSIS OF RESULT & DISCUSSION

### 1 Introduction

This section analyzes the results of the survey. The demographics of the respondents are first discussed to provide some background information about the respondents such as gender, age, university attended, grade attended, major, mode of study, use of computers, and previous experiences. Based on personal information, respondents will be divided into groups for comparison purposes. Then, the descriptive statistics of the scale would be presented and gives the summary of each motivational factor. Independent samples t-test would be presented to give the comparison between gender, mode of study and prior experience. One-way ANOVA would be presented to compare between age, grade levels and access to computer.

### 2 Demographic Information of Respondents

A total of 120 questionnaires were collected. Among the respondents, 57.5% of the respondents are male and

42.5% are female (Table 3). Participants were with 1.7% aged <18, with 45.0% aged 18-22, with 37.5% aged 23-27, with 15% aged 28-31, and with 0.8% aged >31 (Table 4). Also, 36.7% were CityU students, 14.2% were HKU students, 20.8% were CU students, 16.7% were PolyU students, and 11.7% were from other universities (Table 5). 13.3% were Year 1 students, 17.5% were year 2 students, 15.0% were year 3 students, 34.2% was year 4 or above students, 19.2% were postgraduates, and 0.8% are under other level (Table 6). 27.5% were majored in Art/Social Science/Education, 15.0% were majored in Business, 32.5% were majored in Engineering, 9.2% were majored in Law, 14.2% were majored in Pharmacy/Medicine and another 1.7% were majored in others (Table 7). About the respondents' mode of study, 80.8% were full time students and 19.2% were part time students (Table 8). Finally, 46.6% were more experienced students and 53.4% were less experienced students. The respondent's background was summarized below.

### Gender

|        | Frequency | Percent | Valid Percent | Cumulative Percent |
|--------|-----------|---------|---------------|--------------------|
| Male   | 69        | 57.5    | 57.5          | 57.5               |
| Female | 51        | 42.5    | 42.5          | 100.0              |
| Total  | 120       | 100.0   | 100.0         |                    |

**Table 3: Percentage of Respondents' Gender**

### Age

|       | Frequency | Percent | Valid Percent | Cumulative Percent |
|-------|-----------|---------|---------------|--------------------|
| <18   | 2         | 1.7     | 1.7           | 1.7                |
| 18-22 | 54        | 45.0    | 45.0          | 46.7               |
| 23-27 | 45        | 37.5    | 37.5          | 84.2               |
| 28-31 | 18        | 15.0    | 15.0          | 99.2               |
| >31   | 1         | 0.8     | 0.8           | 100.0              |
| Total | 120       | 100.0   | 100.0         |                    |

**Table 4: Percentage of Respondents' Age**

### University

|        | Frequency | Percent | Valid Percent | Cumulative Percent |
|--------|-----------|---------|---------------|--------------------|
| CityU  | 44        | 36.7    | 36.7          | 36.7               |
| HKU    | 17        | 14.2    | 14.2          | 50.8               |
| CU     | 25        | 20.8    | 20.8          | 71.7               |
| PolyU  | 20        | 16.7    | 16.7          | 88.3               |
| Others | 14        | 11.7    | 11.7          | 100.0              |
| Total  | 120       | 100.0   | 100.0         |                    |

**Table 5 Percentage of Respondents' Studying University**

**Grade**

|                 | Frequency | Percent | Valid Percent | Cumulative Percent |
|-----------------|-----------|---------|---------------|--------------------|
| Year 1          | 16        | 13.3    | 13.3          | 13.3               |
| Year 2          | 21        | 17.5    | 17.5          | 30.8               |
| Year 3          | 18        | 15.0    | 15.0          | 45.8               |
| Year 4 or above | 41        | 34.2    | 34.2          | 80.0               |
| Postgraduate    | 23        | 19.2    | 19.2          | 99.2               |
| Others          | 1         | 0.8     | 0.8           | 100.0              |
| Total           | 120       | 100.0   | 100.0         |                    |

**Table 6 Percentage of Respondents' Grade Level****Major**

|                              | Frequency | Percent | Valid Percent | Cumulative Percent |
|------------------------------|-----------|---------|---------------|--------------------|
| Art/Social Science/Education | 33        | 27.5    | 27.5          | 27.5               |
| Business                     | 18        | 15.0    | 15.0          | 42.5               |
| Engineering                  | 39        | 32.5    | 32.5          | 75.0               |
| Law                          | 11        | 9.2     | 9.2           | 84.2               |
| Pharmacy/Medicine            | 17        | 14.2    | 14.2          | 98.3               |
| Others                       | 2         | 1.7     | 1.7           | 100.0              |
| Total                        | 120       | 100.0   | 100.0         |                    |

**Table 7 Percentage of Respondents' Major****Mode of Study**

|           | Frequency | Percent | Valid Percent | Cumulative Percent |
|-----------|-----------|---------|---------------|--------------------|
| Full time | 97        | 80.8    | 80.8          | 80.8               |
| Part time | 23        | 19.2    | 19.2          | 100.0              |
| Total     | 120       | 100.0   | 100.0         |                    |

**Table 8 Percentage of Respondents' Mode of Study****3 Descriptive Statistics****3.1 Autonomy Factors**

The overall mean of Autonomy Factors (AF) was around 3.25. It means that the respondents rated AF positively. From the five-point scale in the questions of AF, point 3 indicated "NEUTRAL", therefore the respondents tend to agree that they are well able to make active use of e-learning systems to assist their learning. They rated item AF6 "I can find information actively in the e-learning system." the highest. It indicated that university students were confident that make fully use of E-learning systems to search the information they need.

**3.2 Problem-solving Factors**

The overall mean of Problem-solving Factors (PF) was around 3.17. It means that the respondents rated PF positively. From the five-point scale in the questions of PF, point 3 indicated "NEUTRAL", therefore the

respondents tend to agree that E-learning systems are really effective in helping them solve problems. They rated item PF2 “The e-learning system enhances my problem-solving skills.” the highest. It indicated that university students were confident that E-learning system can enhance their problem-solving skills.

### 3.3 Multimedia Factors

The overall mean of Multimedia Factors (MF) was around 3.15. It means that the respondents rated MF positively. From the five-point scale in the questions of MF, point 3 indicated “NEUTRAL”, therefore the respondents tend to agree that the multimedia elements of the current E-learning system are welcome. They rated item MF1 “I like colorful pictures in e-learning instruction.” the highest. It indicated that university students found the colorful pictures in the e-learning system very useful.

### 3.4 Teacher Factors

The overall mean of Teacher Factors (TF) was 3.2. It means that the respondents rated TF positively. From the five-point scale in the questions of TF, point 3 indicated “NEUTRAL”, therefore the respondents tend to agree that teachers’ guidance and advice in E-learning systems went a long way. They rated item TF1 “I like the teacher’s help and suggestions in the e-learning system.” the highest. It indicated that university students were very willing to get guidance and advice from teachers in the E-learning systems.

### 4.3.5 Student Factors

The overall mean of Student Factors (SF) was around 3.25. It means that the respondents rated SF positively. From the five-point scale in the questions of SF, point 3 indicated “NEUTRAL”, therefore the respondents tend to agree that the E-learning system has been very helpful and they would recommend it to others. They rated item SF4 “Time flies when I am using educational technologies.” the highest. It indicated that university students were well immersed in the use of E-learning systems.

## 5. Independent Samples T-test

The independent samples T-test is designed to find out whether two groups of factors are statistically different. The test consists of two parts which are “Levene’s Test for Equality of Variances” and “t-test for Equality of Means”. The Levene test is used to test whether the variances of the two groups are the same and to determine which t-value is more appropriate. If the significance level of the Levene test is greater than 0.05, i.e., the variances of the two groups are equal, the result assuming that the variances of the two groups are equal is used. Otherwise, use results that do not assume that the two groups have equal variances. Meanwhile, “t-test for Equality of Means” can be used to determine whether there is a significant difference between the two groups. If the level of significance (two-tailed) is equal to or less than 0.05, there is a significant difference between the mean scores of the two groups. Otherwise, there is no significant difference between the two groups.

### 5.1 Comparison of Distribution of Computer Usage between Gender

The significance value under Levene’s Test was 0.877, which was greater than 0.05. It means that we can assume that male and female had equal variances and thus the results in the row of “Equal variances assumed” was used. Hence, the value of significance (2-tailed) under “t-test for Equality of Mean” was <0.001, which was less than 0.05. Therefore, there was statistically significant gender difference about Computer Usage Experience.

The mean value for male students was 2.5362 while the mean value for females was 3.8382, which means females had more computer experience than males did.

The above phenomenon may be attributed to the fact that men use computers more for recreational activities such as video games, whereas women use computers more for solving practical problems, and in the process,

women accumulate more experience in using computers than men.

### 5.2 Comparison of Autonomy Factors between Genders

The significance value under Levene's Test was  $<0.001$ , which was less than 0.05. It means that we can assume that male and female had no equal variances and thus the values in the row of "Equal variances not assumed" was used. Hence, the value of significance (2-tailed) under "t-test for Equality of Mean" was  $<0.001$ , which was less than 0.05. Therefore, there was statistically significant gender difference about Autonomy Factors.

The mean value for male students was 2.7005 while the mean value for females was 3.9967, which means females were more self-directed learners than males in E-learning systems.

The above phenomenon may be attributed to the fact that women are naturally more stable and down-to-earth than men, and are able to immerse themselves in e-learning systems and actively explore knowledge more readily than men.

### 5.3 Comparison of Student Factors between Genders

The significance value under Levene's Test was  $<0.001$ , which was less than 0.05. It means that we can assume that male and female had no equal variances and thus the values in the row of "Equal variances not assumed" was used. Hence, the value of significance (2-tailed) under "t-test for Equality of Mean" was  $<0.001$ , which was less than 0.05. Therefore, there was statistically significant gender difference about Student Factors.

The mean value for male students was 2.7058 while the mean value for females was 3.9843, which means female students were more suited to learning with E-learning systems than their male counterparts.

### 5.4 Comparison of Students' Prior Experience between Study Modes

The significance value under Levene's Test was  $<0.001$ , which was less than 0.05. It means that we can assume that full-time and part-time students had no equal variances and thus the values in the row of "Equal variances not assumed" was used. Hence, the value of significance (2-tailed) under "t-test for Equality of Mean" was  $<0.001$ , which was less than 0.05. Therefore, there was statistically significant study mode difference about Prior Experience.

The mean value for full-time students was 3.3763 while the mean value for part-time students was 1.8804, which means full-time students had more experience with computers than part-time students.

The reason for this may be that full-time students have more computer time than part-time students and can spend more energy researching computer use.

## 6 One-way ANOVA

One-way ANOVA is used to find out if there is a significant difference between the means of two or more independent groups. If the ANOVA significance level is equal to or less than 0.05, then there is a significant difference between the mean scores of the different groups. Otherwise, there is no significant difference between the mean scores of different groups.

### 6.1 Comparison of Students' Prior Experience between Ages

The significance level under ANOVA was  $<0.001$  ( $F=11.154$ ,  $p<0.05$ ). This indicated that the age groups had significant difference in Students' Prior Experience of computer. From Table 4.25, it showed the mean values for five age groups, which were 1.5000 for aged  $<18$ , 3.0926 for aged 18-22, 3.6556 for aged 23-27, 1.7917 for 28-31, and 4.0000 for aged  $>31$ . It implied that students aged 18-27 had more experience with computers than any other age group. This is because most undergraduate and postgraduate students are in this age group and

will have more opportunities to utilize computers in their academic lives to aid their learning. Therefore, students in this age group are naturally more experienced in computer use than students in other age groups.

## 6.2 Comparison of Autonomy Factors between Study Years

The significance level under ANOVA was  $<0.001$  ( $F=53.001$ ,  $p<0.05$ ). This indicated that the study years had significant difference in Autonomy Factors. From Table 4.27, it showed the mean values for six study year groups, which were 1.8646 for Year 1, 1.9841 for Year 2, 2.3796 for Year 3, 4.2114 for Year 4, 4.2681 for Postgraduates, and 5.0000 for Others. The mean values increased while the study year increased. It implied that students in the upper grades were able to learn more consciously and actively in the E-learning system than those in the lower grades. This may be due to the fact that more emphasis is placed on student autonomy in acquiring knowledge at the university level than passively receiving knowledge output from teachers. As a result, as the academic year progresses, students become more capable of independent learning.

## 7. Pearson Correlation among Motivational Components

Pearson Correlation measures the strength of the relationship between two variables and the direction of the relationship between two variables, i.e., positive and negative correlations. If the Pearson's correlation coefficient ( $r$ ) is positive (+), it means that the value of one variable increases as the value of the other increases and vice versa. If the Pearson correlation coefficient ( $r$ ) is negative (-), it means that as the value of one variable increases, the value of the other variable decreases. The Pearson correlation coefficient ( $r$ ) ranges from -1 to +1. If the Pearson's correlation coefficient ( $r$ ) is close to +1 or -1, the relationship between the two variables is strong and changes in one variable are closely related to changes in the second variable. If the Pearson's correlation coefficient ( $r$ ) is close to 0, the relationship between the two variables is weak and changes in one variable are not correlated with changes in the second variable. If the significance (2-tailed) value is less than or equal to 0.05, there is a statistically significant correlation between the two variables. If the significance (2-tailed) value is greater than 0.05, there is no significant correlation between the two variables.

### 7.1 Relationship between Exp and AF

For the relationship between Students' Experience of Computers (Exp) and Autonomy Factors (AF), the Pearson correlation coefficient was 0.782 ( $p<0.01$ ) and the impact of Exp and AF was positive and significant as predicted. Since the Pearson correlation coefficient between Exp and AF was +0.782, the relationship between them was positive and significant. As mentioned by Cohen, the value of  $r$  ranging above 0.5 would be classified as a strong correlation. There was a strong positive correlation between Exp and AF. The reason for the above phenomenon may be that proficiency in operating electronic devices such as computers and mobile phones may affect the students' experience of using the e-learning system for learning. Students who are proficient in operating computers will have a better learning experience in the process of e-learning, which will stimulate their enthusiasm for active learning. On the contrary, if they are not proficient in the operation of electronic devices, students need to spend more energy on learning to use the e-learning system, which will weaken their enthusiasm for learning.

### 7.2 Relationship between AF and PF

For the relationship between Autonomy Factors (AF) and Problem-solving Factors (PF), the Pearson correlation coefficient was 0.893 ( $p<0.01$ ) and the impact of AF and PF was positive and significant as predicted. Since the Pearson correlation coefficient between AF and PF was +0.893, the relationship between them was positive and significant. As mentioned by Cohen, the value of  $r$  ranging above 0.5 would be classified as a strong correlation.

There was a strong positive correlation between AF and PF. This is because for students who are more proactive in using e-learning systems, they are more adept at utilizing e-learning systems to help them when solving problems. This virtuous circle makes these proactive students perceive the e-learning system as a powerful tool for solving problems encountered in their daily studies and vice versa.

### 7.3 Relationship between PF and TF

For the relationship between Problem-solving Factors (PF) and Teacher Factors (TF), the Pearson correlation coefficient was 0.842 ( $p < 0.01$ ) and the impact of PF and TF was positive and significant as predicted. Since the Pearson correlation coefficient between AF and PF was +0.842, the relationship between them was positive and significant. As mentioned by Cohen, the value of  $r$  ranging above 0.5 would be classified as a strong correlation. There was a strong positive correlation between PF and TF.

## CONCLUSION

This project has gathered the perceptions of students from different universities on E-learning systems. All collected data were imported into SPSS software for data collation and analysis. This report is a study of students' perceptions of E-learning systems based on the results of data analysis.

The study found that respondents' gender, age, study year, and study mode had an impact on students' perceptions of e-learning systems. This is demonstrated by the following:

1. Female respondents were more favorable to E-learning systems than Male.
2. Respondents aged 18-27 had the best perceptions of E-learning systems.
3. The more advanced the college student, the more favorably he or she viewed the e-learning system.
4. Full-time students were more favorable to E-learning systems than part-time students.

Also, this project has examined the relationship between some of the factors that influence the E-learning systems and demographic information. The following are the conclusions reached:

1. Female respondents had more experience with computers than male respondents.
2. Females were more self-directed learners than males in E-learning systems.
3. Full-time students had more experience with computers than part-time students.
4. Students in the upper grades were able to learn more consciously and actively in the E-learning system than those in the lower grades.

Finally, the study found that there is also a correlation between the different factors affecting the E-learning system. Here are the conclusions:

1. There was a strong positive correlation between students' experience of computers and autonomy factors.
2. There was a strong positive correlation between autonomy factors and problem-solving factors.
3. There was a strong positive correlation between problem-solving factors and teacher factors.

These are all the conclusions drawn from this project. This information is very useful for organizations or individuals who want to use E-learning systems to aid teaching and learning. This is because they can use this information to optimize the e-learning system and the way it is used to get the most out of the e-learning system.

# THE INFLUENCE OF VIDEO LESSONS IN AN ONLINE INTRODUCTORY PROGRAMMING MODULE: COMPARING PASSING STUDENTS WITH THOSE THAT FAIL

**Dalize VAN HEERDEN**

University of South Africa, Pretoria, South Africa

**Jeanne KRIEK**

University of South Africa, Pretoria, South Africa

## ABSTRACT

Researchers and educators are concerned about student success in tertiary programming courses, a situation that is even more pronounced in open and distance e-learning institutions. The aim of this study was to integrate 60 video lessons and compare passing and failing student in terms of their performance in JavaScript with three broad online learning factors: course clarity, student connectedness, and task relevance. For example, student connectedness includes, accessibility, self-directed learning, communication and active engagement. In the quantitative survey research, a closed-ended questionnaire with 13 questions, was distributed to 534 students, yielding a response rate of 26%. Among the respondents, 76 passed the module, while 63 failed. The cognitive theory of multimedia learning is used as theoretical framework. The findings reveal that students who passed the online introductory programming modules interacted more with the video lectures, indicating a noticeable impact on their learning experience, consistent with previous research.

**Keywords:** Video lessons, Programming, Online Learning, Learning outcomes, Active Engagement, Self-directed Learning

## INTRODUCTION

Research on the poor throughput and high dropout rates in programming courses has been conducted for many years, particularly at the first-year level (Bennedsen & Caspersen, 2019). This has led to the publication of studies on various approaches to teaching, learning, and assessment that may be applied to programming courses (Scherer et al., 2020). However, there are challenges associated with implementing these recommended strategies into practice in the Open Distance e-Learning space (Goosen & van Heerden, 2019).

Video lessons are a supplemental resource that helps struggling students, and they were incorporated into the module under discussion in this study in order to address some of the challenges in an online context (Insorio et al., 2023). Studies indicate that the integration of video classes enhances students' comprehension and involvement, especially in complex disciplines like programming (Timbreza, 2022).

The aim of the module under discussion in this study, Introduction to Interactive Programming, is to equip students with the skills to develop an operational computer-based program using object-oriented programming language. Among the resources available to the students are 60 video lessons that cover both theoretical concepts and practical applications. The initial videos outline the module's content, including learning outcomes, required software, prescribed textbook, assessment criteria and more. Various teaching approaches are employed such as online simulations, multimedia presentations, and discussion forums, to engage students in the learning process. The strategies aim to foster collaboration and interaction among students, even in the virtual learning environment.

Every chapter in the prescribed book has a lesson plan that includes quick tests, open educational resources for further reading, and video lessons that address the theoretical and practical parts of the chapter. The lecturer used Camtasia to create a total of sixty video lessons. Every lesson begins with a video that outlines the specific chapter's goals before going on to talk about some of the chapter's theoretical concepts. Students can see how to write the sample code in the prescribed book by watching the next video. In these videos, the lecturer explains what is being done, where it is being done, and why it is being done while providing a live demonstration of practical principles. The code's structure, operation, and interactions with other software components are all visible to the students. To help students who have hearing impairments, the videos additionally include a speech bubble with text that replicates the spoken words.

## Aim of the Study

The study reported on in this paper is aimed at investigating perceptions of video lessons in a programming module presented online by seeking to answer the following research question:

- Do video lessons in an online introductory programming module have an influence when comparing students who pass the module with those who fail?

## LITERATURE REVIEW

Research has indicated that the appropriate integration of video classes can enhance students' performance, knowledge, self-worth and autonomy (Karaca, 2023). Multimedia learning tools, like video lectures, modules, and other resources, increase the efficiency of online course delivery and facilitate students' access to learning resources whenever they need them (Arranz et al., 2022). Video lectures are crucial for promoting social presence and course satisfaction in online learning environments. Research has demonstrated that integrating video discussion posts into fully online, asynchronous courses improves students' sense of social presence and overall course satisfaction (Xiu & Thompson, 2020). In order to improve learning outcomes in online courses, Ou et al. (2019) stressed the significance of creating video lessons based on instructional design theories. This is particularly relevant to the teaching of programming languages. Research has shown that the integration of peer coaching and video-based lesson study enhances lecturers' understanding of successful teaching strategies and promotes their professional development (Suh et al., 2021).

Including video lessons in online programming courses is also in keeping with how education is changing. Researchers are looking into innovative teaching methods to enhance training across disciplinary boundaries as a result of the shift to fully online models, such as scaffolding, just-in-time instruction, and streaming video content (Larson et al., 2021). According to Reina et al. (2021), video courses can be used as additional learning resources. This is especially helpful for students who struggle to understand ideas related to difficult programming languages. According to Hadijah et al. (2022), learning programming languages requires the ability to solve problems and comprehend concepts, both of which are greatly enhanced by watching instructional YouTube channels.

Videos help improve language abilities by offering simultaneous visual and auditory stimuli, which can help in understanding and applying the syntax and rules of programming languages (Ilesanmi, 2023). Timbreza (2022) emphasized the usefulness of instructional videos for teaching language and culture, videos may successfully communicate subtle details, which are essential for understanding the complexities of programming languages. A comparison of the two shows that students usually choose recorded video lectures over live online ones due to their convenience and flexibility (Aulakh et al., 2022).

Despite their accessibility and adaptability, employing video lessons has disadvantages. Research has shown that one of the main factors affecting the success of video lectures is how motivated students are to study (Islam et al., 2020). A reliance on video-based learning could lead to problems such as students being less engaged and focused. (Pi et al., 2022). Studies have also indicated that the planning and production of instructional video classes significantly impact students' performance (Rickleby & Kemp, 2021). Unprofessionally made videos have been shown to reduce student interest and satisfaction (Kurzweil et al., 2020). The absence of best practices in video design concepts raises the question of whether videos can effectively replace traditional lectures in educational contexts (Yiu et al., 2019).

## THEORETICAL FRAMEWORK

The theoretical framework used in this study is the cognitive theory of multimedia learning, developed by Mayer (2014), which is grounded in cognitive processes and the ways in which individuals learn from multimedia presentations. The theory focuses on how the human mind processes information through various modalities (Muller et al., 2008; Plass et al., 2009; Liu et al., 2008).

Firstly, visual and auditory information is processed in different channels. Although there are two different coding systems, that is, verbal and visual, they operate independently yet are interconnected. When information is presented both through text and words or images and narration, multiple cognitive processes are used potentially leading to improved learning outcomes. Secondly, the processing capacity of each channel is limited, allowing only a small part of the information to be processed at a time. However, using both visual and verbal modalities can enhance processing efficiency, although it may lead to overloading the cognitive system. Finally, learning is an active process, involving the construction of mental representations and the integration into existing knowledge structures. Therefore, it is important that when presenting the same content using different modalities (verbal and visual), the elements need to complement each other to foster coherence and reduce cognitive load.

## METHODOLOGY

In a case study method, a quantitative survey research design was used (Gable, 1994) to get deeper insights into a specific group of students, namely those enrolled in the introductory programming module at an open and distance learning institution. The participants were students who had registered for a module, Introduction to Interactive Programming, in 2023. A research instrument was distributed to 534 students, yet only 139 students responded. Among these respondents, 76 successfully passed the module, while 63 students did not meet the passing criteria.

The students enrolled in this module come from diverse backgrounds, comprising individuals employed full-time, part-time, or not all, and representing rural, urban and township areas. Furthermore, they speak eleven different languages. English, the language used for presenting videos and study materials, is often their second, third or even fourth language. Given the high failure rate observed in this module, it becomes imperative to explore the influence of videos on a module introducing them to JavaScript.

The research instrument uses a questionnaire comprising closed-ended questions as a survey tool. The questionnaire is structured into four sections: effectiveness (three questions), visual and verbal communication (three questions), processing time (three questions), and active process (three questions).

Data was collected following the release of the module results to the students. Each student's answer to a particular question was documented, clearly stating whether they were part of the passing or failing group. The average response for each question for the passing and failing groups was determined separately. The performance of both groups was compared directly as a result of the average response to each question. The use of visual representations helps draw attention to any notable variations between the groups.

## RESULTS

The students were asked how many of the provided videos they watched. From the feedback, it is apparent that those students who passed the module watched more of the videos.

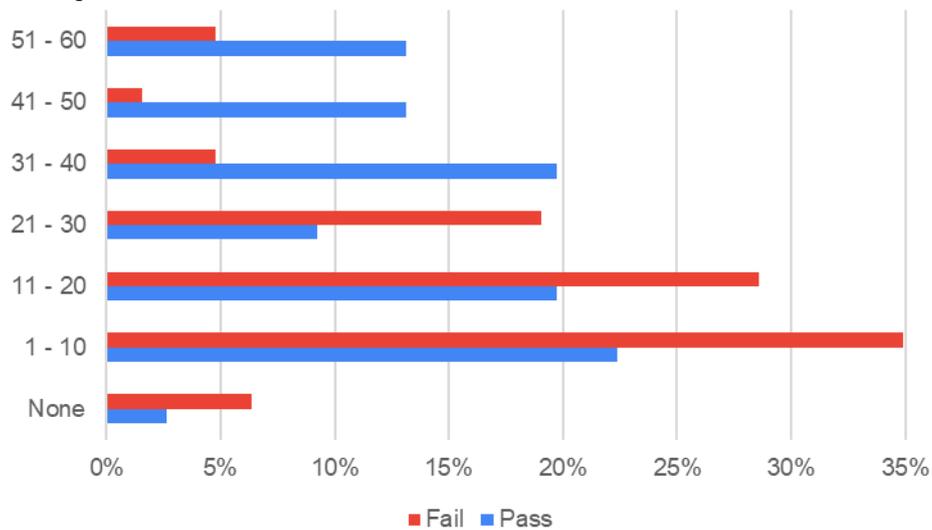

Figure 1: Number of video lessons viewed

### Effectiveness

Students who passed had a higher level of confidence in the thoroughness and worth of the video courses than did those who failed. Although both groups' general opinion is favorable, a somewhat smaller proportion of students in the "Fail" group than in the "Pass" group think that the video classes offered a thorough and worthwhile learning experience. This may suggest that the two groups' perceptions or experiences differ in some way.

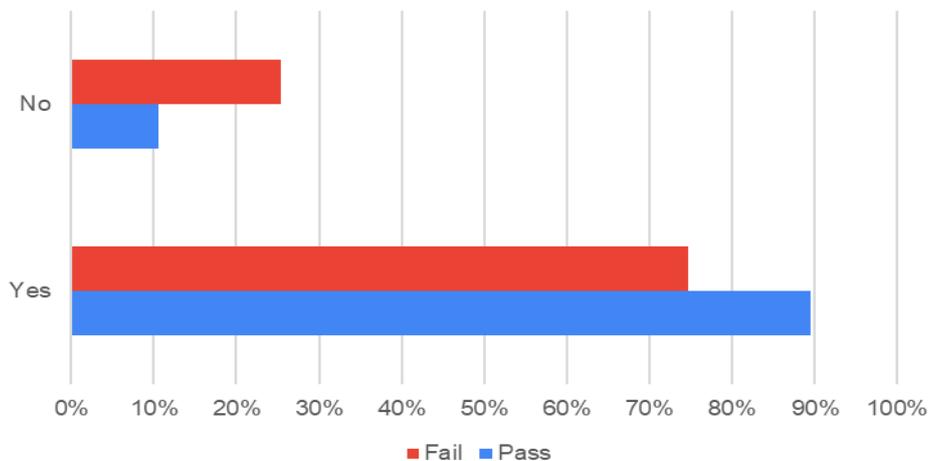

Figure 2: Overall, do you believe that the video lessons provided a comprehensive and valuable learning experience for acquiring JavaScript skills?

In comparison to students who failed, those who passed generally thought the video lectures covered a wider range of JavaScript topics more effectively. Although both groups' general opinion is good, there are more neutral comments (37%) in the "Fail" group than in the "Pass" group (22%). This suggests that students who did not pass felt uncertain or conflicted about the value of the video courses.

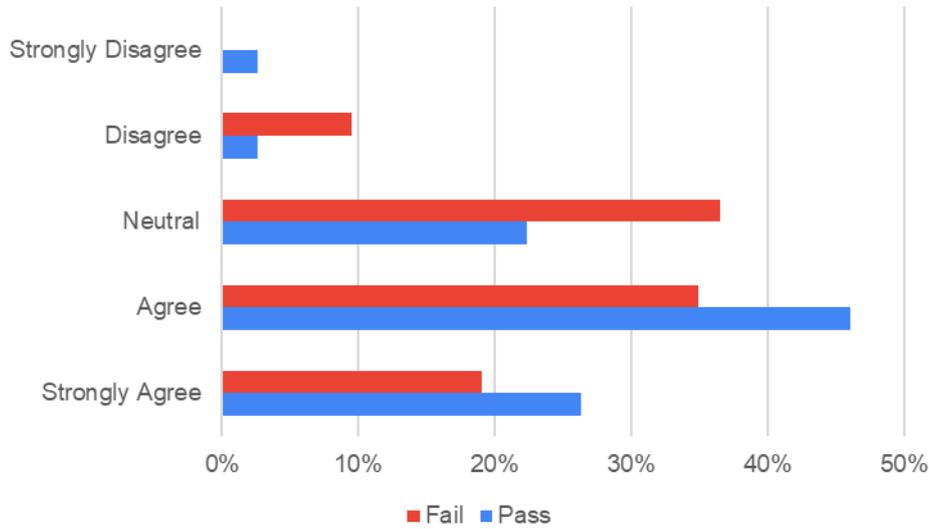

Figure 3: The video lessons effectively covered a wide range of JavaScript topics.

Students who passed had a higher level of confidence than those who failed that the video lectures met expectations. The "Fail" group had a higher number of neutral and negative replies (Disagree and Strongly Disagree) than the "Pass" group, despite the fact that both groups' overall attitude is positive. This shows that students who did not pass had more doubts or discontent about whether the video lectures lived up to their expectations.

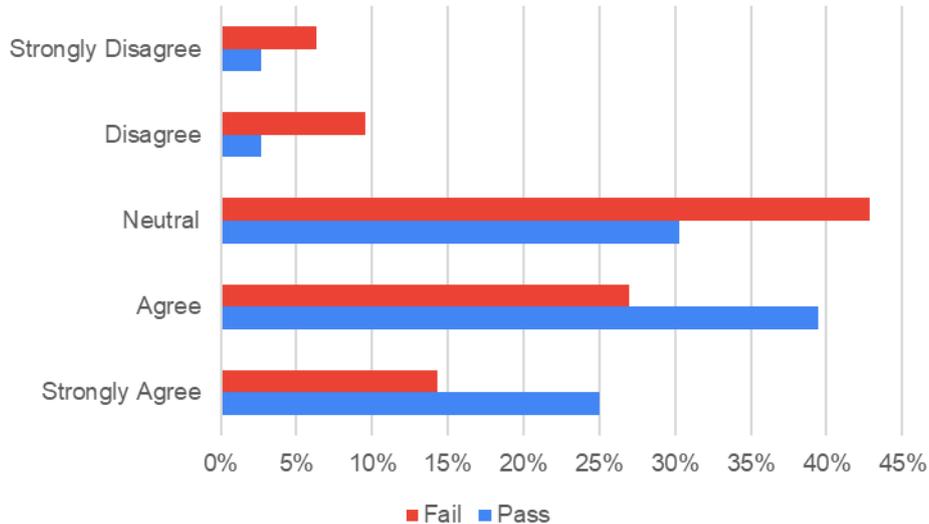

Figure 4: The video lessons met my expectations for effectively learning JavaScript.

#### *Visual and verbal communication*

Students who passed believed the instructions were more detailed and clear than those who failed. Although both groups' general opinion is good, a somewhat smaller proportion of students in the "Fail" group than in the "Pass" group think that the instructions were clear and detailed. This can point to certain perception or experience gaps between the two groups.

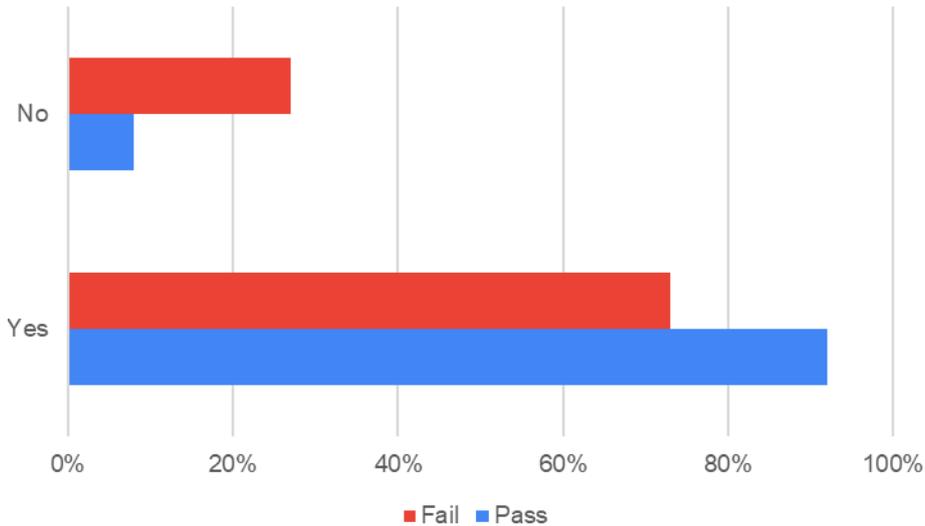

Figure 5: Did the video lessons provide clear and detailed instructions on how to set up the development environment for practicing JavaScript coding?

Students who passed had more confidence in the lessons' organization and simplicity of application than did those who failed. Although both groups' sentiments are generally positive, the "Fail" group had a marginally higher number of neutral comments than the "Pass" group. This implies that students who did not pass had more doubts or conflicting emotions about the organization and simplicity of the teachings.

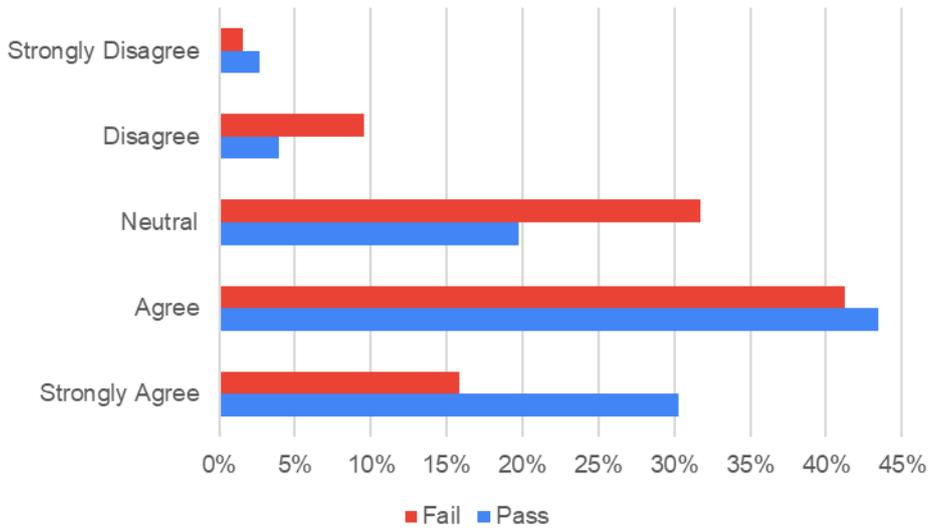

Figure 6: The video lessons were well-structured and easy to follow.

A rather positive attitude on the improvement of communication skills in JavaScript development through the video lectures is indicated by the computed average answer for the "Pass" group. Most of the passing students agreed, or strongly agreed, that they had improved their communication skills. The "Fail" group points to a generally positive attitude, with most failing students claiming some improvement in their communication abilities.

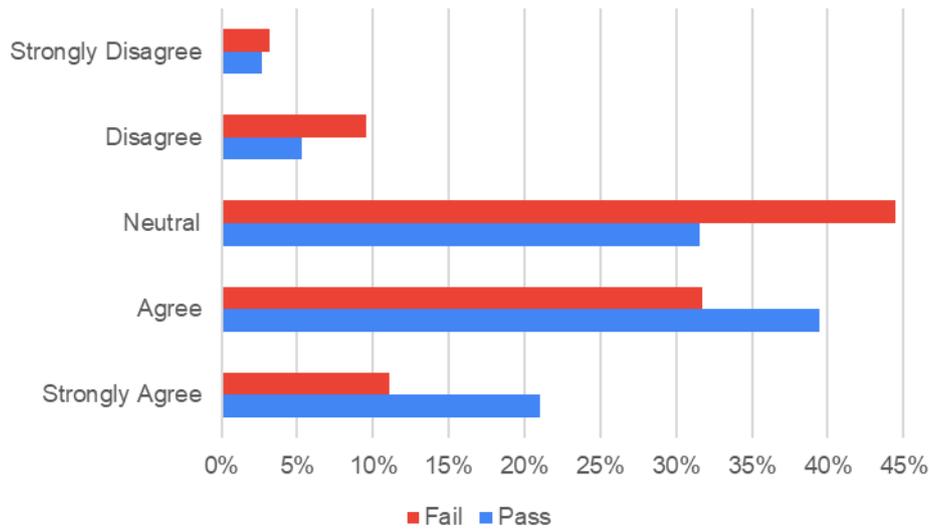

Figure 7: The video lessons enhanced my communication skills in JavaScript development.

#### Processing time

The "Fail" group had a higher number of neutral and negative replies than the "Pass" group, suggesting more uncertainty or disagreement even though the majority of both groups agree or somewhat agree with that they found it more difficult to focus during recorded sessions. Additionally, compared to the "Pass" group, a larger percentage of respondents in the "Fail" group chose "Disagree" and "Strongly Disagree," indicating that a higher proportion of failing students found it more difficult to focus during recorded sessions.

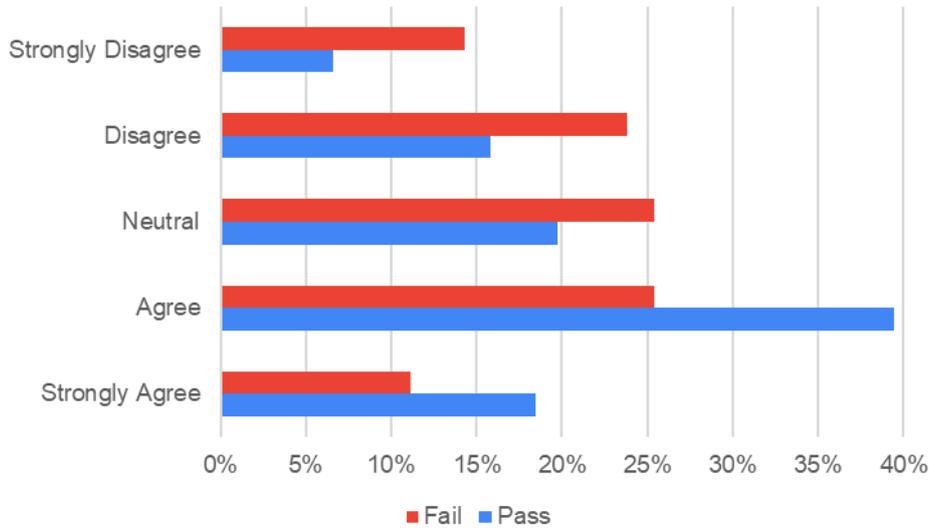

Figure 8: I find it easier to concentrate for long periods when I am watching recorded lessons.

The "Pass" group had a much higher favourable response than the "Fail" group when comparing the averages. This suggests that, in contrast to students who failed, those who passed are more likely to believe that the instructor's pace is suitable for learning JavaScript. Additionally, compared to the "Pass" group, a larger percentage of respondents in the "Fail" group chose "Disagree" and "Strongly Disagree," suggesting that a bigger percentage of students who failed thought the instructor's speed was unsuitable for learning JavaScript.

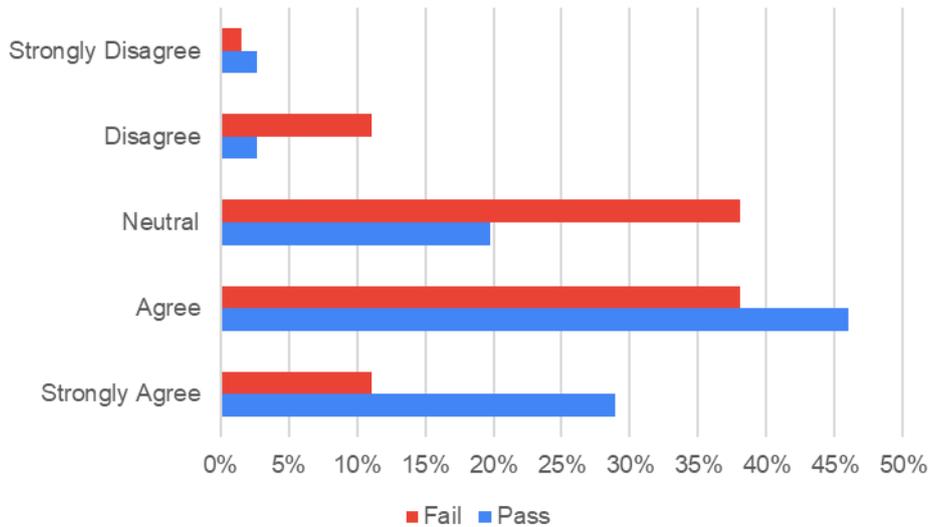

Figure 9: The instructor's pace in the video lessons was appropriate for learning JavaScript.

In comparison to students who failed, those who passed are more likely to recognize that the video lectures are inclusive and accessible for learners with different backgrounds or skill levels. The majority of respondents in both groups agree or partly agree with the statement, but the "Fail" group has a higher proportion of neutral and negative comments than the "Pass" group.

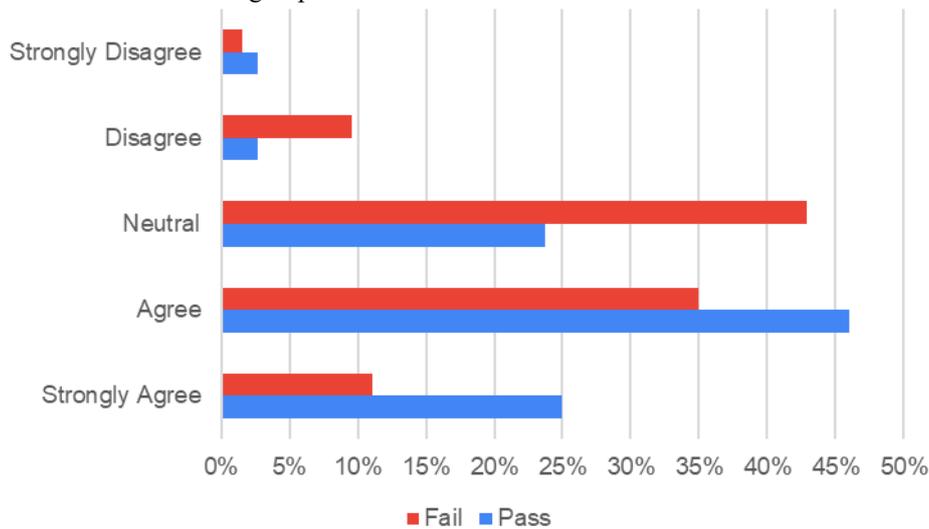

Figure 10: The video lessons were accessible and inclusive for learners with diverse backgrounds or abilities.

#### Active process

When it comes to the video classes' promotion of active engagement through exercises or practice opportunities, the average response for the "Pass" group reflects a favorable opinion. The majority of respondents in both groups agree or partially agree with the statement, but the "Fail" group had more neutral and negative comments than the "Pass" group, suggesting greater uncertainty or disagreement.

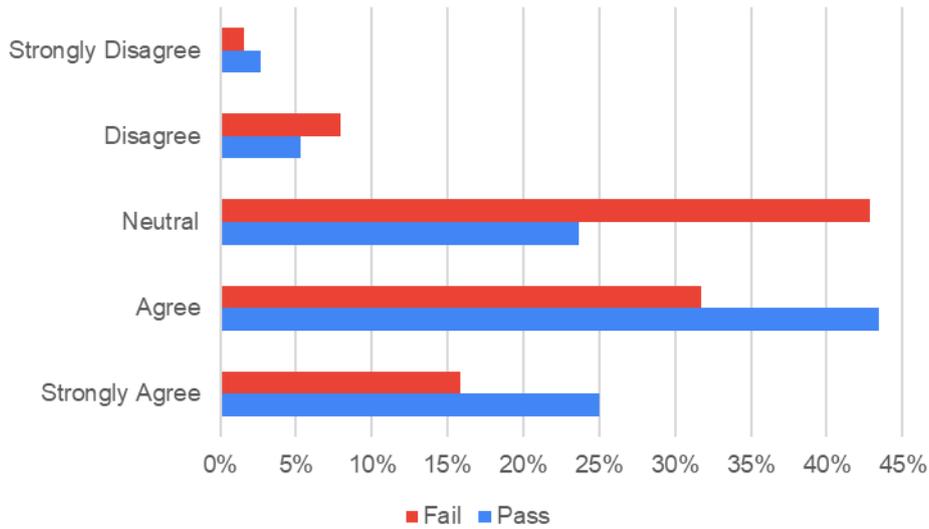

Figure 11: The video lessons encouraged active engagement through exercises or practice opportunities.

Students who succeeded (86%) see more real-world examples or projects in the video courses than those who failed (70%), according to the comparison of the "Pass" and "Fail" groups. The majority of pupils in both groups choose "Yes," although the "Fail" group's proportion is lower. This could mean that even while projects or examples from the real world were given, they weren't necessarily as thorough or useful for students who didn't pass.

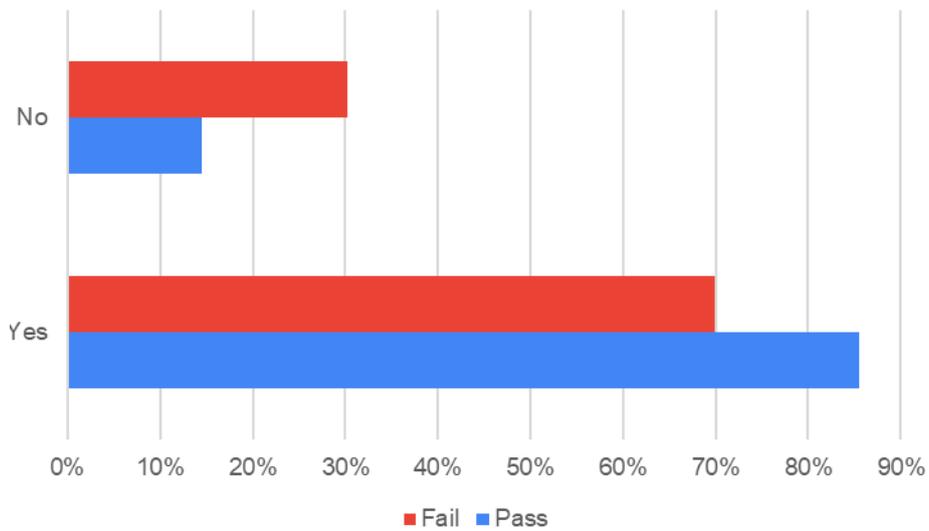

Figure 12: Did the video lessons include real-world examples or projects that helped you apply the JavaScript concepts you learned?

Compared to students who failed, those who passed are more likely to believe that the video lessons promote problem-solving and self-directed learning. While the majority of respondents in both groups agree or partly agree with the statement, there is a greater proportion of neutral and negative responses in the "Fail" group.

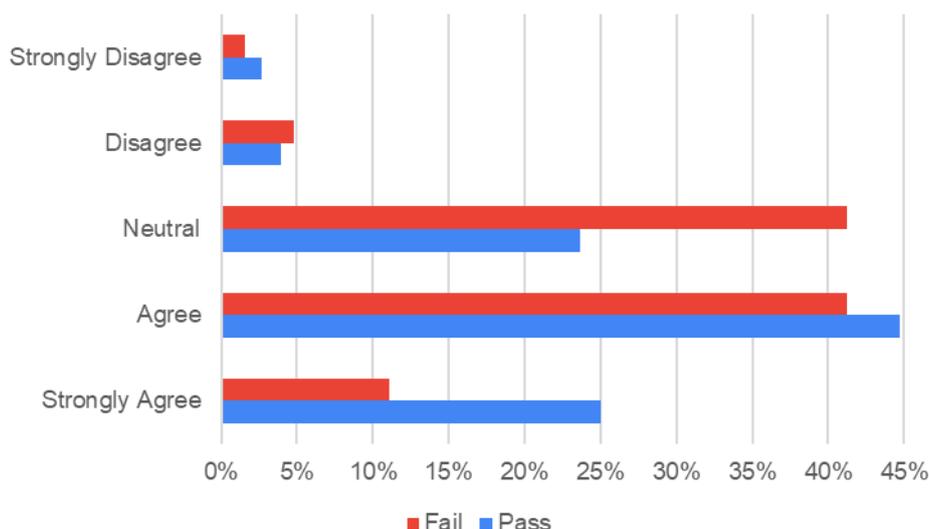

Figure 13: The video lessons encouraged self-directed learning and independent problem-solving.

## DISCUSSION

This case study employed a survey research design to explore the influence of video lessons on a specific module within an online environment, using a questionnaire. Notably, passing students tended to watch the videos more frequently compared to failing students.

The impact of video lessons on student performance in JavaScript topics can vary between students who passed and those who failed, with the "Pass" group generally exhibiting a more positive sentiment (Lo & Hew, 2017). However, it's important to interpret these results with caution and take into account other variables that affect student performance, like past knowledge, learning preferences, and outside influences. One aspect of the total learning process is represented by the attitude toward video tutorials. The study by Bellini & Akullian (2007) on video modelling interventions for skill acquisition suggests that such techniques increase skill acquisition and maintenance over time, taking into account the variations in perception between students who passed and those who failed. This shows that the skill acquisition that the video lessons fostered may have benefited passing students more than failing students. Students who passed and those who failed have different opinions about how well the video lessons taught JavaScript; the "Pass" group appears to believe in the lessons' efficacy slightly more. The effectiveness of video lessons in supporting JavaScript learning can be improved by understanding the intricacies of video-based learning and implementing best practices in video creation and delivery (Ou et al., 2019).

The impact of the clarity and detail of video lessons on setting up a development environment for practicing JavaScript coding varied among students who passed and those who failed. The "Pass" group generally had a stronger belief in the clarity and detail of the instructions. This finding is consistent with existing research on the effectiveness of video lessons in improving learning outcomes (Teo et al., 2014). The effectiveness of video lessons as a learning tool has been supported by several studies. Bevilacqua et al. (2019) discovered that, in comparison to other lesson styles, students who favoured video lessons reported increased daily engagement and performed better on quizzes evaluating information retention. This implies that the way in which the video lectures were viewed as effective by students who passed might have been influenced by their format. The effect of video lessons on improving communication abilities in JavaScript programming differed for students passing and failing. The students who passed showed a marginally stronger conviction in the video lessons' effectiveness (Fukkink et al., 2010). Research has indicated that the use of video lessons can improve a variety of abilities, such as peer collaboration, communication, and creativity (Indrawati, 2021).

While Levenberg & Reesh (2023) support the idea that watching recorded lessons can help people concentrate, studies by Lepp et al. (2022) also highlight the importance of acknowledging the diverse experiences and perceptions among students. While students' perception of the instructor's pace in the JavaScript video lessons differed, most agreed that the pace was suitable. It is interesting to note that compared to those who failed the course, those who passed demonstrated a stronger consensus regarding the instructor's pace. Nonetheless, a sizeable fraction of both groups indicated neutrality or disagreement towards the remark, suggesting a range of student experiences and viewpoints (Rhode, 2009). It is crucial to take into account the differences in students' experiences and perspectives when assessing how well video lessons teach JavaScript concepts and applications. There are differences in agreement levels between students who pass and those who fail, despite the fact that video lectures are generally thought of as inclusive and accessible. This highlights the significance of accommodating individual preferences and needs for inclusive and successful learning experiences (Scagnoli et al., 2017).

The perception of active engagement through exercises or practice opportunities in video lessons for learning JavaScript programming varies among students who passed and those who failed. Students who passed tend to agree more with the notion that active engagement is encouraged, even if both groups generally agree on this point. It is noteworthy that a considerable proportion of students in both groups either maintain a neutral position or express disagreement with this assertion, suggesting a range of experiences and viewpoints among the students (Freeman et al., 2014). Both the "Pass" and "Fail" groups have reported that video lessons include real-world examples or projects. The two groups' perceptions of these cases, however, were very different from one another. Compared to students who failed the course, a greater proportion of those who passed acknowledged the inclusion of real-world applications (Dym et al., 2005). This implies that even while both groups acknowledged the existence of such examples, the different results might have been influenced by how well these real-world applications worked. Researchers in education have been interested in how well video lessons might help students become more self-directed learners capable of solving problems on their own. While both the passing and failing groups believe that video lessons encourage these skills, the passing group tends to agree more than the failing group (Insorio & Macandog, 2022).

## CONCLUSION

It is clear from the survey research design used in this case study that, when comparing students who pass with those who fail, video lectures in an online introductory programming module do, in fact, have a noticeable impact. Students who passed showed a propensity to interact with the video material more often than those who failed. This result is consistent with previous research showing that passing and failing students had different perceptions about how beneficial video tutorials are for learning JavaScript. The former group tends to feel more positively about the effectiveness of these tutorials.

**Yrd. Doç. Dr. Azmiye YINAL**  
azmiye.yinal@akun.edu.tr

## ABSTRACT

The purpose of this study is to examine the relationship between employees' burnout levels and their perceptions of organizational justice. In this context, the study was conducted with a quantitative research method called relational survey technique. The population of the study consists of employees working in any institution or organization in the TRNC between 10.08.2023 and 20.08.2023 without making any distinction between sector (private/public) and company; the sample consists of 304 employees. In the study, demographic information form, Organizational Justice Scale translated into Turkish by Yıldırım (2002) and Oldenburg Burnout Scale developed by Demerouti et al. SPSS 28 program was used to analyze the data collected in the study. The results also reveal that there is a weak positive relationship between exhaustion and process justice, a weak negative relationship between alienation and distributive justice, and a weak positive relationship between process justice and general justice. There was a weak negative relationship between general exhaustion and distributive justice and a weak positive relationship with process justice. These findings indicate that the perception of process justice increases with increasing level of exhaustion, the perception of distributive justice decreases with increasing level of alienation, and the perception of general justice increases with increasing level of process justice. However, no significant relationship was found between general justice and general exhaustion.

**Keywords:** Burnout, Exhaustion, Distancing, Organizational Justice.

## 1. INTRODUCTION

### 1.1. Problem Status

Burnout is a mood and behavioral problem that is common among individuals who are exposed to intense stress, overwork, emotional burdens and long-term pressures, especially in business life. Burnout syndrome is characterized by a decrease in a person's energy, motivation and work performance (Bostan and Cebeci, 2023). This situation can manifest itself in three main dimensions: physical, emotional and mental exhaustion. Burnout syndrome is specifically associated with factors such as overwork, work stress, emotional exhaustion, and work-family imbalance. This can negatively impact a person's work performance, health, and quality of life. Strategies such as rest, stress management, work-family balancing and professional help can be used to cope with burnout (Kaplan and Acar, 2023).

Organizational justice is a concept regarding the treatment of employees within an organization and whether their perceptions of this treatment are fair or equitable. This concept plays an important role in business and organizational psychology. Organizational justice includes employees' evaluation of their relationships with their organizations and the factors they take into account when making these evaluations (Macit and Aydoğan, 2023). The concept of organizational justice, which is an important situation affecting employees, is perceived as a person's opinion about the distribution of resources and the mechanism of the reward system. Greenberg (1987) defined organizational justice as the perception about the distribution of reward distribution, resources, interactions among people within the organization, and processes. Organizational justice is divided into three broad dimensions: fair distribution, fair transaction, and fair interaction (Niehoff and Moorman, 1993). Distribution of value and loss are considered elements of distributive justice. The level of fairness in the decision-making process is called procedural fairness, and interactional fairness relates to processes and their social aspects. Organizational justice is very important for a better socially based environment within the organization. In a way, protecting organizational justice is a policy (Aşık and Yinal, 2023). The manager must follow a policy of fair approach between himself and the employee, and between the employee and the employee. A policy of quickly spreading organizational justice within the organization should be followed. A fair approach always maintains communication between employees. It will reduce competition and jealousy among employees. This will increase employees' awareness and provide support in fulfilling their responsibilities. A fair approach will allow employees to act with a team spirit and get the job done faster and more accurately. The problem statement of the research is "Is there a relationship between employees' burnout levels and their perception of organizational justice?" It was determined as .

### 1.2. Purpose and Importance of the Research

The purpose of the study is to investigate the relationship between employees' burnout levels and their perceptions of organizational justice. The importance of the study is that it carries the potential to develop

strategies to increase the well-being and performance of employees in the workplace by helping us understand the effects of concepts such as job burnout and organizational justice in the workplace. This type of research can contribute to the creation of healthier and fairer working conditions in the business world and the development of policies and practices to increase employee job satisfaction. Therefore, the results of the study can provide guidance for creating better working conditions in workplaces. The sub-objectives of the research are as follows:

- What is the participants' perception of organizational justice?
- What are the burnout levels of the participants?
- Is there a relationship between burnout levels and perceptions of organizational justice?

### 1.3. Limitations

Research;

- With the resources used in the research,
- With the scale questions used in the research,
- The dates between 10.08.2023 and 20.08.2023 are limited to those working in any institution or organization in TRNC, without distinguishing between sectors (private/public) and companies.

### 1.3. Definitions

**Burnout:** It is a mood and behavioral problem that is frequently encountered among individuals who are exposed to intense stress, excessive workload, emotional pressures and long-term difficulties encountered in business life ( Kaplan and Acar, 2023) .

**Exhaustion :** It is a concept that expresses the depletion of the employee's work energy, usually due to factors such as intense work-related demands, stress, long working hours and excessive pressure ( Köktürk, 2023 ) .

**Detachment:** It refers to the person whose resources are depleted developing negative feelings towards all issues that he generally associates with his job ( Köktürk, 2023 ) .

**Organizational Justice:** Organizational justice is a concept regarding the treatment of employees in an organization and whether their perceptions of this treatment are fair or equitable (Macit and Aydoğan, 2023) .

**Distributive Justice :** This type of justice refers to the outcomes that employees obtain in return for the work they do in the organization (Yürür, 2008) .

**Process Fairness:** It concerns how decisions about these outcomes are made and on what principles they are based (Brockner et al., 2001) .

**Interaction Justice:** It is related to the behavior of managers towards employees in processes such as taking, implementing and communicating decisions (Yelboğa , 2012) .

## 2. THEORETICAL FRAMEWORK

### 2.1. The Concept and Scope of Burnout

Burnout concept, usually study vital or personal of life busy stress , pressure And exhaustion sentimental because of person physical, emotional and mental of energy decrease status expression it does . This concept is health, psychology and social Sciences in the fields important One Subject into has arrived (Balcioglu et al., 2008).

Burnout syndrome, consisting of three main components consists of:

- **Emotional Exhaustion:** Person's emotional aspect exhausted what he feels One is the situation. This job or personal in life difficulties because of formed continually one tiredness and energy lack status expression it does.
- **Emotional Loyalty Decrease:** This component reduces the person's to your job or other life to the fields the one which of your devotion is decreasing and to your job or to their duties the one which of interest is decreasing shows.
- **Emotional Worthlessness:** Person self worthless or insufficient to feel starts. This is your self-esteem decrease and low self-esteem of their situation with the formation is related.

burnout , long periodical stress , work pressure , business burden , human in your relationships problems , extreme working , low control sentimental like with factors is associated . Burnout, both personal and workplace at the level serious to the results path can open. Person efficiency may fall, work satisfaction may decrease and even health to your problems path can open. Burnout syndrome to prevent or treatment to do for work \_ in their place stress management, business and special life balance, work of your burden balanced distribution like measures can be obtained. Personal level whereas to rest, to yourself looking, hobby And social to spend time on activities importance to give with burnout in the fight helper it could be. Also, with stress start over emergence skills to develop and emotional support It is also important to call (Kaçmaz, 2005).

### 2.2. Organizational Justice

Human resources are the most important element that enables organizations to succeed and achieve their goals. Especially having experienced employees is the first element in carrying organizations to success. Focusing on

human resources in organizations, emphasis is placed on interpersonal communication in work areas. With the importance of interpersonal communication, the concept of social justice has begun to gain importance (Yılmaz, 2021). It is known that management and organizational management literature is used even in different fields. It is known that 'Adams' Equity Theory' is used according to the perception of organizational justice. Equality Theory believes that the contribution of employees to their organizations and the expectations they should receive should be equal (Demirel and Seçkin, 2011).

According to Equity Theory, the more the employee benefits the organization and increases his/her performance, the more the organization is expected to benefit the employee (Özdevecioğlu, 2003). The first person to mention the concept of organizational justice is Greenberg (1987) in the literature. Greenberg defined organizational justice in 1987 as follows: organizational justice addresses the events, practices and rules that will occur in the organization according to the principle of justice, and the duties of employees must be clearly expressed (Yılmaz, 2021). It is seen that studies on the concept of organizational justice have increased since the 2000s (Davarcı, 2021).

Organizational justice is a vital concept in shaping employees' behaviors and attitudes and is an intangible unifying element that allows employees to work together effectively and efficiently (Rupp et al., 2017). Organizational justice refers to people's perceptions of justice in organizations, along with behavioral, cognitive and emotional reactions (Greenberg, 2011). Organizational justice refers to the degree to which employees perceive workplace procedures, interactions, and organizational outcomes as inherently fair. There are many examples of injustice perceived by employees in workplaces. Among these, the most common injustices include applying different wages for men and women doing the same job (Yolcu, 2021).

### 2.3. Related Research

Babaoğlu, Altun, Çakan (2010) tried to determine burnout levels by conducting a survey to 204 school administrators between 2003-2004. According to the results of the research, school administrators are exposed to emotional exhaustion, personal failure and total burnout at low levels. There was a very low level of exposure to depersonalization burnout.

Yorulmaz et al. (2017), the relationship between job satisfaction and burnout was examined in the study. Meta-analysis method was used in the study. As a result of the research, it was concluded that the relationship between job satisfaction and emotional exhaustion was negative, and the relationship between job satisfaction and decrease in personal success was also negative. In the study of Özkan and Özdevecioğlu (2013), an analysis was made regarding the impact of professional accounting on burnout and the meaning of life. The study aims to measure the occupational stress of 217 accountants in Kayseri. As a result of the study, it was concluded that occupational stress is a factor in determining the life satisfaction and burnout levels of accounting professionals. Owens (2013), in the study, examined the relationship between the burnout levels of primary school teachers and the leadership effects of principals. There are 127 teachers in the sample of the study. According to the findings of the study, it was found that they felt moderate emotional exhaustion, low degree of depersonalization and high degree of personal accomplishment. The study revealed that teachers experienced greater depersonalization as they perceived their principals as less effective.

Kalliath, O'driscoll and Gillespie (1998), the link between organizational commitment and organizational burnout was examined. This study group, consisting of 197 nurses, consists of 28 hypotheses. As a result of the research findings, it was determined that organizational commitment is an indicator of organizational burnout. Vermunt and Steensma (2013), in the study, investigated the impact of unfair behavior of managers on employees. In an environment of injustice and stress, people's desire to leave the stressful environment is to seek social support or to explore behaviors related to ways to cope with stress. According to the theory of injustice and stress, reducing or even preventing stress can only be achieved by managers who behave fairly.

## 3. METHOD

### 3.1. Research Method

This study was conducted with a quantitative research method called relational screening technique. Relational survey technique is a quantitative research approach used to examine the relationship between two or more specific variables in research. This method is applied to understand and explain the relationships between variables. Researchers generally work with this technique to test hypotheses, investigate connections between variables, or reveal cause-effect relationships (Karasar, 2008).

#### 3.1.1. Population and Sample

Consists of 950 people working in any institution or organization in TRNC between 10.08.2023 and 20.08.2023, without distinguishing between sector (private/public) and company. The sample of the study was determined by the purposeful sampling method in accordance with the purpose of the research. Purposeful sampling is a sample that is specifically selected for a specific research or survey study and created for a specific goal or purpose. Researchers use these types of samples when they want to study or investigate a specific subgroup or feature of

their study. Purposive sampling is designed to address a specific problem or problems and to have a specific focus rather than representing the general characteristics of the population (Karasar , 2008) . From this information, 304 employees were included in the sample of the research.

### 3.1.2. Data Collection Tools

In the research, data are collected through scale; It was collected via Google forms . Scale forms were distributed on 10.08.2023 and collected on 20.08.2023. Although 340 of the 400 scale forms sent for the study were collected back; 38 forms were not included in the study due to incomplete questions.

Three forms were used to collect data in the study. The first form consists of the demographic information of the participants. In this form, participants were asked about their gender, age, marital status, educational status and professional seniority.

In the second form, the Organizational Justice Scale was used. In order to measure the perception of organizational justice, Niehoff and Moorman's organizational justice perception scale, whose Turkish translation and validity and reliability studies were carried out by Yıldırım (2002), was used. In general, in local and international literature, one of the two most preferred scales, along with the Colquitt Organizational Justice Scale, is Niehoff and Moorman's scale. This scale is widely accepted as a reliable tool to measure organizational justice perception. Burnout measurement results from the use of an inventory that is not very common in the local literature and is even quite new. For this reason, it was deemed appropriate to choose a proven organizational justice scale. The scale consists of three sub-dimensions: distributive justice, process justice and interaction justice, and contains a total of 20 items. The survey provides respondents with five options for each statement: (1) Strongly disagree, (2) Disagree, (3) Neutral, (4) Agree, and (5) Strongly agree. All expressions are positive, and the general perception of organizational justice is calculated by dividing the scores obtained from the sub-dimensions by 20, which is the total number of expressions in the scale. A high score indicates that the participant has a high perception of organizational justice (Köktürk, 2023).

the Oldenburg Burnout Scale developed by Demerouti et al. (1998) was used to determine the burnout levels of employees . Researchers have stated that as a result of the criticisms brought to the Maslach Burnout Scale in foreign literature , different scales began to be preferred and Oldenburg Burnout Scale began to be preferred. They state that the Scale is one of the most striking of these different scales . The scale has two subscales: exhaustion and detachment. Both dimensions contain eight statements each, four positive and four negative statements. Participants are given five options for each statement: (1) Strongly disagree, (2) Disagree, (3) Neutral, (4) Agree, and (5) Strongly agree. The original scale is in German and was translated into English in 2005 . The researchers contacted the developers of the original scale to obtain the English scale and then translated it into Turkish . This scale is a widely used tool to measure burnout (Şeker, 2011).

**Table 1.** Reliability analysis of the scales

|                              | Cronbach's Alpha | Article |
|------------------------------|------------------|---------|
| Organizational Justice Scale | 0.856            | 20      |
| Oldenburg Burnout Scale      | 0.869            | 16      |

In this study, the Cronbach's Alpha value of the organizational justice scale was 0.856; Oldenburg Burnout Scale Cronbach's Alpha value was found to be 0.869. This study shows that the scales are reliable.

### 3.1.3. Analysis of Data

SPSS 28 program was used to analyze the data collected in the study and was examined at the reliability level. Two different statistical tests were used to examine whether the scale scores differ according to socio - demographic characteristics. The T-Test is a test used to determine differences between two groups and is often used for comparisons between two groups. ANOVA test is a test used to determine differences between three or more groups. These tests were used to evaluate whether there were statistically significant differences in scale scores between groups with different socio -demographic characteristics.

## 4. FINDINGS

### 4.1. Demographic features

Demographic variables of the participants are given in Table 2.

**Table 2.** Demographic Characteristics

|        | N     | %   |      |
|--------|-------|-----|------|
| Gender | Woman | 194 | 63.8 |
|        | Male  | 110 | 36.2 |

|                        |                 |     |       |
|------------------------|-----------------|-----|-------|
| Age                    | 18-25 years old | 53  | 17.4  |
|                        | 26-34 years old | 47  | 15.5  |
|                        | 35-44 years old | 133 | 43.8  |
|                        | 45 and over     | 71  | 23.4  |
| marital status         | Married         | 116 | 38.2  |
|                        | Single          | 188 | 61.8  |
| education level        | High school     | 40  | 13.2  |
|                        | University      | 168 | 55.3  |
|                        | Degree          | 68  | 22.4  |
|                        | Doctorate       | 28  | 9.2   |
| professional seniority | 1-5 Years       | 89  | 29.3  |
|                        | 6-10 Years      | 156 | 51.3  |
|                        | 11-20 Years     | 49  | 16.1  |
|                        | 20 and above    | 10  | 3.3   |
| Total                  |                 | 304 | 100.0 |

When Table 2 is examined, it is seen that 63.8% of the participants are women and 36.2% are men. Age distribution of the participants; 43.8% are 35-44 years old; 23.4% are 45 and over; 17.4% were determined to be 18-25 years old and 15.5% were 26-34 years old. 61.8% of the participants are single and 38.2% are married. 55.3% have university degrees, 22.4% have master's degrees, 13.2% have university degrees and 9.2% have doctoral degrees . Professional seniority: 51.3% is 6-10 years; 29.3% 1-5 years; 16.1% were 11-20 years old and 3.3% were 20 and over.

#### 4.2. Findings Regarding Perceptions of Organizational Justice

The mean and standard deviation values for the perceptions of the employees participating in the research regarding justice in the work environment are shown in Table 3. To determine the level of the averages of the scales used in the research, the range value was calculated as  $5-1/3 = 1.33$ , accordingly the levels are; 1 to 2.33 is low; 2.34 to 3.66 is medium; It was determined that the range between 3.67-5.00 was high ( İrdem , 2020).

Table 3. Descriptive Statistics for the Organizational Justice Scale

|                      | mean  | Ss .  |
|----------------------|-------|-------|
| distributive justice | 1,224 | 0.679 |
| process justice      | 1,274 | 0.686 |
| interaction justice  | 1,821 | 0.768 |
| general justice      | 1.43  | 0.542 |

When Table 3 is examined, it is understood that the participants' overall perception of organizational justice is 1.43, meaning that they have a low level of justice perception. When justice types are evaluated separately, the average score of distributive justice is 1.224; The average score of process justice is 1.274; The average score of interaction justice is 1.81. In other words, employees' perceptions of distribution, process, and interaction justice are at low levels. When the values are compared among themselves , the lowest perception of justice emerged in distributive justice. The low mean score of distributive justice indicates that employees' perception of justice, especially regarding their earnings and rewards, is lacking. This reflects that employees believe the distribution of their rewards and earnings is unfair. Since the "process justice" and "interaction justice" mean scores are low, employees may think that they do not experience a perception of justice in the decision-making processes and interactions with managers in the organization.

### 4.3. Findings on Burnout Levels

The mean and standard deviation values for the burnout levels of the employees participating in the research arising from the work environment are shown in Table 4. To determine the level of the averages of the scales used in the research, the range value was calculated as  $5-1/3 = 1.33$ , accordingly the levels are; 1 to 2.33 is low; 2.34 to 3.66 is medium; It was determined that the range between 3.67-5.00 was high (İrdem , 2020).

**Table 4.** Descriptive Statistics on Burnout Levels

|                    | mean  | std . Deviation |
|--------------------|-------|-----------------|
| Exhaustion         | 3,158 | 0.552           |
| Don't go away      | 3,186 | 0.529           |
| General exhaustion | 3,172 | 0.512           |

When examined in Table 4, it is understood that the average burnout level of the participants is 3.172, meaning that the employees experience a moderate level of burnout. When the dimensions are evaluated separately, the average score of burnout is 3.158; It is seen that the average score of distance is 3.186. In other words, the degree to which employees feel that they have run out of energy to cope with the intense demands arising from their jobs is quite high. This suggests that employees feel burnt out due to job stress, work overload, or other work-related challenges. This may indicate a period when employees' physical, emotional and mental energy decreases and they feel tired. On the other hand, employees do not seem to experience the dimension of detachment as much as they experience burnout. This may indicate that although employees are depleted of energy, they do not exhibit a negative or indifferent attitude towards their work and co-workers. This may indicate that employees are emotionally committed to their jobs and co-workers, or that they care about and maintain their jobs despite burnout.

### 4.4. The Relationship Between Burnout and Perceptions of Organizational Justice

**Table 5.** Correlation Analysis for the Relationship Between Burnout and Organizational Justice Perceptions

|                    |    | distributive justice | process justice | interaction justice | General Justice |
|--------------------|----|----------------------|-----------------|---------------------|-----------------|
| Exhaustion         | r. | -0.108               | .214 **         | 0.035               | 0.067           |
|                    | p. | 0.061                | <b>0.000</b>    | 0.547               | 0.244           |
| Don't go away      | r. | -.132 *              | .295 **         | 0.09                | .122 *          |
|                    | p. | <b>0.021</b>         | <b>0.000</b>    | 0.116               | <b>0.034</b>    |
| General exhaustion | r. | -.127 *              | .269 **         | 0.066               | 0.1             |
|                    | p. | <b>0.027</b>         | <b>0.000</b>    | 0.25                | 0.082           |

\*\* . The correlation is significant at the 0.01 level.

\* . The correlation is significant at the 0.05 level.

When Table 5 is examined;

A weak positive relationship between burnout and process justice ( $r=.214$ ;  $p=0.000$ );

There is a weak negative relationship between alienation and distributive justice ( $r=-.132$ ;  $p=0.021$ ); a positive and weak relationship with process justice ( $r=.295$ ;  $p=0.000$ ); There is a weak positive relationship with general justice ( $r=.122$ ;  $p=0.034$ );

It was determined that there was a weak negative relationship between general burnout and distributive justice ( $r=-.127$ ;  $p=0.027$ ) and a weak positive relationship with process justice ( $r=.296$ ;  $p=0.000$ ).

In addition, it should be noted that there is no relationship between general justice and general exhaustion.

As a result, as burnout increases, the perception of process justice increases; It is possible to say that as distance increases, the perception of distributive justice decreases, and as process justice increases, the perception of general justice increases.

## CONCLUSION AND RECOMMENDATIONS

According to the results of the study, it appears that the participants' overall perception of organizational justice is low. Distributive justice, process justice and interaction justice score averages are low. Especially the low mean score of distributive justice indicates that employees' perception of justice towards their earnings and rewards is lacking. This situation reflects that employees believe that their rewards and earnings are not distributed fairly. In addition, the low mean scores of process justice and interactional justice may indicate that employees think that they do not experience a perception of justice in the decision-making processes and interactions with managers in the organization.

It was determined that the general burnout level of the participants was at a medium level. The average score of the burnout dimension shows that the degree to which employees feel that they have run out of energy required to cope with the intense demands arising from their jobs is high. However, the lower mean score on the detachment dimension may indicate that although employees are exhausted, they do not have a negative or indifferent attitude towards their jobs and colleagues. This may indicate that employees are emotionally committed to their jobs and co-workers, or that they care about and continue their jobs despite burnout.

The research results also reveal that there is a weak positive relationship between burnout and process justice, a weak negative relationship between detachment and distributive justice, and a weak positive relationship between process justice and general justice. A weak negative relationship was found between general burnout and distributive justice, and a weak positive relationship with process justice. These findings show that the perception of process justice increases as the level of burnout increases, the perception of distributive justice decreases as the level of detachment increases, and the perception of general justice increases as the perception of process justice increases. However, no significant relationship was found between general fairness and general exhaustion.

Based on the findings of the study, the following recommendations can be made:

- In order to increase employees' perceptions that their earnings and rewards are fairly distributed, the reward system and performance evaluations should be reviewed and a fair structure should be created.
- Decision-making processes should be supported by transparent communication and employee participation should be increased.
- Managers should communicate more effectively with employees, encourage open dialogue and strengthen relationships between employees.
- Policies should be implemented to provide support and flexibility to employees so that they can balance their work and private lives.
- Employees should be provided with training on stress management techniques and access to resources.
- The emotional needs of employees should be met by creating support systems in the workplace.
- Managers should be trained on effective communication and relationship management.
- Employees should be given the opportunity to express themselves through regular feedback and evaluation processes.
- Mechanisms that encourage participation should be developed so that employees can take more part in organizational decisions.
- Units representing employees should be established within the organization and employees should be allowed to make their voices heard.
- The organization should regularly evaluate employees' perceptions of fairness and burnout levels and take corrective measures when necessary.
- Periodic reviews should be conducted to evaluate and improve the effects of human resources policies.

These suggestions can help organizations create a positive impact on employees' perceptions of justice and burnout levels. Implementing these strategies to increase employee satisfaction and performance is important for the sustainability of the organization in the long term.

# THE RELATIONSHIP BETWEEN JOB SATISFACTION AND BURNOUT IN PRIMARY SCHOOL TEACHERS INKTC

Neriman SORALTAYFUNOĞLU

## ABSTRACT

In this study, the relationship between job satisfaction and professional burnout of primary and kindergarten teachers of public schools in the Turkish Republic of Northern Cyprus was examined. The study used a scale developed by Gençer (2002) to measure teachers' job satisfaction and the content validity of the scale was measured by an application on teachers. The measurement tool was given to 819 teachers from 56 primary schools selected by disproportionate cluster sampling method and the data of 547 teachers were analyzed. According to the results of the study, there is a moderate positive relationship between the level of teachers' job satisfaction expectation and the level of realization. In other words, teachers' job satisfaction is realized in line with their expectations and the effect of this relationship on burnout was determined as 9%. In addition, a significant difference was found in terms of teachers' burnout levels according to their preference for the same task again. It was observed that task preference affected the burnout levels of teachers. According to the results, it was determined that the burnout levels of those who did not prefer the task were higher than those who said yes and undecided, and those who said undecided were different from the other levels. In addition, it was found that there was a significant difference between the burnout levels of teachers according to the school they graduated from. This shows that teachers' burnout levels may vary according to the departments they graduated from. As a result, significant relationships were found between teachers' job satisfaction and burnout levels, and it was also observed that job preference and graduation school were effective on burnout levels.

**Keywords:** Teacher, Job satisfaction, Burnout.

## 1. INTRODUCTION

### 1.1. Problem Statement

Recently, one of the negativities faced by people working in professions that are carried out with face-to-face relations with people has been tried to be explained with the concept of burnout. Although burnout is related to stress, occupational depression, etc., it forms a complex structure separate from them. Individuals working in organizations may face a situation such as job satisfaction depending on the working conditions in organizations. The level of job satisfaction can positively or negatively affect the behavior of people in the workplace. It is often seen that employees reveal their anxieties and frustrations and their negative attitudes towards work by reflecting their negative attitudes towards work conditions through complaining. Therefore, investigating what other problems are underlying the complaints about working conditions and solving them increases the satisfaction of the employees (Başaran, 1994).

Job satisfaction is one of the issues that are carefully emphasized because it is a source of unhappiness for the employee and dissatisfaction for the organization. When the related literature is examined, it is seen that the relationship between satisfaction and success and the elements that determine satisfaction have been the subject of many studies (Canman, 1995). In developed countries, organizational analyses are conducted at certain intervals in order to find out the organizational elements that push employees to satisfaction and dissatisfaction, and thus to reveal which variables the management will focus on in order to increase organizational effectiveness (İncir, 1990). In our country, studies examining the phenomenon of employee satisfaction and the problem of dissatisfaction have been conducted (Balçı, 1993). When the research findings are analyzed, it is seen that the reasons for dissatisfaction of the employees of undeveloped countries are different from those of the employees of developed countries. For example, although the wage element has ceased to be a source of satisfaction for the employees in developed countries, it still maintains its importance for the employees in our country and is one of the leading organizational variables that cause dissatisfaction (Aytaç, 2002).

The subject examined in this study is to examine the relationship between job satisfaction and job burnout by focusing on the causes of job satisfaction and job dissatisfaction based on the assumption that job dissatisfaction causes occupational burnout. It is known that factors such as success, recognition, work itself, responsibility and progress are effective in ensuring job satisfaction. On the other hand, management, supervision, wages, working conditions and friendships are effective in the emergence of job dissatisfaction. In our country, unhappiness is observed in employees for some reasons (Balçı, 2002). This problem is also detected intensely in primary school teachers who provide basic education. For this reason, job satisfaction is a dynamic, variable and a subject that needs to be examined, with new models being put forward day by day. Teachers, who are constantly dealing with knowledge-hungry students and other people, have to show great dedication. Overload and high ideals will lead to early teacher burnout. The job dissatisfaction of teachers, who are responsible for raising future generations, and the causes of burnout syndrome should be identified and investigated. In order to be able to talk about efficiency in education, it can be said that it is of vital importance for the future of the country to ensure that teachers who will provide efficiency work efficiently.

### 1.1.1. Problem Statement

"Is there a significant relationship between teachers' job satisfaction levels and professional burnout levels? This question constitutes the problem sentence of the research.

### 1.1.2. Sub Problems

1. Is there a relationship between job satisfaction realization and professional burnout of primary school teachers?
2. Is there a relationship between job satisfaction expectation level and realization level of primary school teachers?
3. Is there a difference between the occupational burnout levels of primary school teachers according to whether they choose the profession willingly or not?
4. Is there a significant difference between primary school teachers' graduation department and burnout level?

### 1.2. Purpose of My Research

Work is an important part of human life. The satisfaction of the employee with his/her job also affects his/her life. It is observed that people generalize their feelings in an area that they find important to them by reflecting them to other areas. It is usual for an employee to generalize the feelings in his/her family life to his/her job in the organization and the feelings in his/her job to his/her family life. It is possible to say that an employee who does his/her job with pleasure will lead to a longer life span. In addition, job satisfaction has a positive effect on the physical and mental health of the employee. Job dissatisfaction also leads to burnout. The aim of this research is to analyze the relationship between job satisfaction and burnout. To put forward appropriate solutions to the results obtained and to make necessary suggestions to increase teachers' job satisfaction.

### 1.3. Importance of the Research

Today, a country's development and progress in every field seems to depend on its qualified manpower. Qualified manpower is the result of qualified education. Qualified education is closely related to the quality of the teacher. Teachers are responsible for raising new generations as professionals with constructive and creative qualities and as citizens who are aware of their duties and responsibilities towards their country (Büyükkaragöz and Çivi 1997).

Especially the increase in the importance, duties and responsibilities imposed on primary school teachers often creates tension in teachers. Primary education is the cornerstone of the education system. At this stage, children gain knowledge and skills necessary for socialization and social life as well as education. In primary schools, children are taught the most basic knowledge necessary for modern life, such as reading and writing, using their mother tongue correctly, and basic mathematical operations. The knowledge and skills that children acquire in primary schools enable them to be productive and efficient for themselves and society in their future lives. The importance and necessity of this stage will be especially noticeable when it is taken into consideration that only primary education is compulsory in our country (Girgin, 1995). The importance and value of primary school teachers is quite high for both the child and the whole society. Gates (1990) emphasized the mental health of the teacher and argued that in order for the teacher to be a successful educator, good mental health is necessary. Teachers in our country experience some problems. There are many reasons such as not choosing their profession consciously, overloaded curriculum, inadequate educational materials, misdirection of education by policies, problems in teacher training institutions and teacher transfers. Ensuring efficiency in education depends primarily on the satisfaction of teachers with their work and thus their willingness to act in line with the aims of the organization to which they belong. This is only possible by identifying and minimizing the factors that cause dissatisfaction among teachers.

### 1.4. Assumptions

The following assumptions will be made in this study.

1. The teachers who participated in the study answered the questions sincerely.
2. Teachers' responses reflect the current situation.

### 1.5. Limitations

This study is limited to the job satisfaction and burnout levels of primary school teachers working in the Turkish Republic of Northern Cyprus in the 2005-2006 academic year.

### 1.6. Definitions

Teacher: A person working in public education institutions who is a specialized profession that takes over the state's duties of education and training and related administrative duties, and who is obliged to fulfill his/her duties in accordance with the objectives and basic principles of Turkish National Education (Article 43 of the Basic Law on National Education).

Class Teachers: A teacher who fulfills the duties of education and training in any class or branch (classroom) in a school (TRNC Education Law: 9).

Occupational Burnout: It is a physical, emotional and mental exhaustion syndrome characterized by physical exhaustion, chronic fatigue, feelings of helplessness and hopelessness, development of a negative self-concept and negative attitudes towards work, life and other people (Dursun, 2000).

Job Satisfaction: Emotional reactions that are a function of the difference between the employee's desires regarding job dimensions and his/her perceptions regarding the degree to which these are achieved in his/her job (Balçı, 1985).

Stress: External and internal factors that cause the individual to be forced to exceed the limits of adaptation (Izgar, 2000).

Motivation: It means the power that mobilizes a person for a certain purpose (Köşker 2005).

## 2. CONCEPTUAL FRAMEWORK

### 2.1. Job Satisfaction

Job satisfaction was first introduced in the 1920s, but its real importance was realized in the 1930s and 40s. Since then, it has been the most studied subject of industrial and organizational psychology. The idea that the happiness of employees in their jobs affects their productivity has made the concept of job satisfaction even more current (Aksayan, 1990). Job satisfaction is the harmony between what the employee expects and what he/she receives from the organization and his/her job, it is a feeling felt by the employee when the values that the employee can obtain in the organization are found to be compatible. Job satisfaction is generally defined as employees' feelings about their jobs (Özben and Argun 2002). Job satisfaction is the pleasure that an employee feels as a result of evaluating his/her job or work life and the emotional state he/she reaches. The higher the degree of this feeling of pleasure reached by the employee, the higher his/her satisfaction with his/her job (Başaran, 1982). The higher the degree of this feeling of pleasure reached by the employee, the higher his/her satisfaction with his/her job (Başaran, 1982). The higher the degree of this feeling of pleasure reached by the employee, the higher his/her satisfaction with his/her job (Başaran, 1982). It is accepted that job satisfaction is related to life satisfaction and directly affects the physical and mental health of individuals (Ergin, 1997). Satisfaction, which refers to a subjective and emotional concept, is a concept that cannot be directly observed by another individual, and can only be defined and expressed by the individual concerned (Bölüktepe, 1993). Job satisfaction can be achieved by increasing the quality of working life, regulating working conditions and working environment, meeting the psychological, economic and social needs of employees and minimizing the problems arising from working life (Izgar, 2000).

### 2.2. Burnout

Burnout is one of the most fundamental problems in education. The decline in personal satisfaction decreases an individual's working success and performance. The concept of burnout was first defined by Freudenberger (1974) and in the last 20 years many researches have been conducted on different job opportunities. It frequently occurs in people who work face-to-face with people due to their job and is accepted as a three-dimensional situation (Izgar 2000). The most widely accepted definition of burnout today is that of Maslach et al. (1980), which perceives burnout as a three-dimensional concept. In this definition, burnout is accepted as a three-dimensional syndrome that frequently occurs in people who constantly work face-to-face with other people due to their job. These three dimensions are named as emotional exhaustion, depersonalization and a feeling of decline in personal accomplishment (Izgar, 2000).

The first dimension of burnout is emotional exhaustion. Emotional exhaustion describes the feeling of being overburdened, in other words, the feeling of being overloaded (Özer, 1998). Emotional exhaustion is accepted as the main dimension of burnout. At the psychological level, the individual feels that his/her emotional resources are gradually decreasing. A person who is in an emotionally intense work tempo strains himself/herself and people are overwhelmed by their demands. Emotional exhaustion is a reaction to this situation. Individuals caught in this situation feel themselves lacking the energy to start a new day. Their emotional resources are completely exhausted and they cannot find resources to fill them again (Dursun, 2000).

The second dimension is defined as depersonalization, which refers to the development of negative, cynical attitudes and feelings towards the people with whom the individual works (Akçamete, Kaner, Sucuoğlu, 2001). If the shell of a snail is shaken, it retreats into the shell, and if it is shaken again, it does not react, and depersonalization is like this example. The cold, indifferent, rigid and even inhuman structure that develops creates desensitization, which is the second pillar of burnout syndrome (Dursun, 2000). The person treats others cynically and rudely and ignores their requests and demands (Işıklar, 2002). Using derogatory language, categorizing people, doing business according to strict rules and assuming that evil will come from others are the first signs of depersonalization (Işıklar, 2002). Using derogatory language, categorizing people, doing business according to strict rules and assuming that evil will come from others are among the first signs of depersonalization (Torun, 1995).

The third dimension is personal failure. It shows that the person evaluates himself/herself as inadequate and unsuccessful in his/her job (Gökçakan & Özer, 1999). The negative way of thinking about others leads to negative thoughts about oneself; the person feels guilty with these thoughts and behaviors. He/she develops a feeling that no one likes him/her. He/she judges himself/herself as a failure. At this point, the third stage of burnout, low sense of personal accomplishment, emerges (Örmen, 1993). The three dimensions of burnout are interrelated; for example, for caregivers working in hospitals, depersonalization leads to both emotional exhaustion and a decrease in personal achievement, and a similar relationship is observed in teachers; a teacher's depersonalization towards his/her students, withdrawal and distancing himself/herself from students leads to more emotional exhaustion and lower levels of personal achievement (Akçamete, Kaner, Sucuoğlu, 2001).

### **2.3. Motivation and Job Satisfaction**

Depending on its usage, the word motivation can mean hundreds of things such as desire, need, motive, goal, impulse, wish, aim, love, desire (Morgan, 1995). It is quite difficult to find the exact meaning of the concept of motivation. Etymologically, motivation comes from the words motive in English and movere in Latin (Aydın, 2001). The Turkish equivalent of the term motive can be determined as motive or mobilizer. In short, motivation means the power that mobilizes a person for a specific purpose (Köşker, 2005). In terms of the individual, motivation covers many phases from the satisfaction of personal needs to the self-realization of the individual. In organizational terms, motivation means all the forces and mechanisms that enable organizational members to start working, to continue their work and to fulfill their duties willingly (İncir, 1984). Motivation is also defined as the voluntary participation of teachers and students in the teaching-learning process. Accordingly, in the process of motivation, there are behaviors such as taking responsibility, sharing, creating and enjoying learning. Motivation is a teacher and student centered concept. In order for students to be motivated, teachers should personally participate in educational activities with enthusiasm and enthusiasm (Aydın, 2001).

Research shows that interdependent groups of members are more likely to participate in the realization of goals under favorable conditions. Behaviors that jeopardize organizational goals occur especially when members' needs are not met. Behaviors such as resistance, defiance and avoidance of cooperation are in reality consequences, not causes. It is not right for a school administrator to be afraid of the groups in his/her school or to take some of them with him/her and others against him/her. Instead of trying to prevent the tendency of grouping in human nature, he/she should put these groups into action in a way that will help the realization of school goals (İncir, 1990). They argue that when certain values or needs of the employee are met by the organization, the employee will reach satisfaction. Therefore, the organization should know the needs of the individual well and prioritize motivation. Some theories have been developed regarding the satisfaction of the employee with his/her job. These theories approach job satisfaction from different perspectives.

## **3. METHOD**

### **3.1. Research Model**

In this study, relational survey model was used. The relationships between teachers' job satisfaction and professional burnout, the differences between job satisfaction expectation level and job satisfaction realization level were examined in terms of variables such as length of service, position in the school, choosing the profession willingly or unwillingly, gender, graduated school, and burnout level in terms of the same variables. Since the relationships between two different situations that can affect each other are examined within the framework of various variables, the model of this research is relational survey (Gençer, 2002).

### **3.2. Population and Sample**

The population of this study consists of primary school and kindergarten teachers in the 2005-2006 academic year in K.K.T.R. public schools. Since it was not possible to reach the whole population due to time and financial constraints, 56 primary schools were selected by disproportionate cluster sampling method. The measurement tool was given to 819 out of 1233 teachers and 547 of these were returned in a healthy way.

### **3.3. Measurement Tools**

The research focuses on a scale developed by Gençer (2002) to measure teachers' job satisfaction. The content validity of the scale was measured by Gençer through an application on 50 teachers. The analysis showed that the scale was clear, comprehensible and reflective of the situation, and the Cronbach Alpha value was found to be 0.88.

The Burnout Inventory developed by Maslach and consisting of three subscales was used in the study. Emotional Exhaustion, Depersonalization and Personal Achievement subscales of the inventory were evaluated. This scale assesses burnout status.

An information form developed by the researcher was used to determine the demographic and professional characteristics of the teachers. It includes variables such as gender, age, length of professional service, position, graduated school.

### 3.4. Analyzing the Data

The data obtained from the scales were transferred to the SPSS package program. T test, F test, correlation analysis, Scheffe and Anova were performed with the data obtained.

## 4. FINDINGS

### 4.1. Findings and Comments on the Relationship between Primary School Teachers' Job Satisfaction and Occupational Burnout Levels

The first sub-problem of the study was determined as "Is there a relationship between primary school teachers' job satisfaction and professional burnout?". Accordingly, the following findings were obtained as a result of the analysis of the data obtained and shown in Table 1.

**Table 1. The Relationship Between Job Satisfaction Realization Levels and Occupational Burnout Levels of Primary School Teachers**

| Groups            | N   | X    | SS   | sd  | R     | P     |
|-------------------|-----|------|------|-----|-------|-------|
| Realization Level | 547 | 3,30 | ,518 | 546 | -,385 | ,000* |
| Burnout Level     | 547 | 2,50 | ,673 |     |       |       |

\*p<0,01

As seen in Table 1, there is a negative correlation between teachers' job satisfaction realization and professional burnout.  $r=-,385$ , which is not very high, shows that there is a moderate negative correlation.  $p=.05$  at the significance level, this correlation is significant at .000 level, which means that burnout is affected by the explanation of job satisfaction realization level as 0.15. Based on these findings, it can be said that there is a negative correlation between job satisfaction and professional burnout. "In other words, as teachers' job satisfaction level increases, their occupational burnout level decreases. As the level of professional burnout decreases, the level of job satisfaction decreases.

### 4.2. Expectation Level and Realization Level of Job Satisfaction of Primary School Teachers Findings and Comments on the Relationships Between

The second sub-problem of the study was determined as "Is there a relationship between primary school teachers' job satisfaction expectation level and realization level?". Accordingly, the following findings were obtained as a result of the analysis of the data obtained and shown in Table 2.

**Table 2. Expectation Level of Job Satisfaction and Realization Level of Primary School Teachers Relationship Between**

| Groups            | N   | X    | SS   | sd  | R    | P     |
|-------------------|-----|------|------|-----|------|-------|
| Expectation Level | 547 | 3,97 | ,578 | 546 | ,302 | ,000* |
| Realization Level | 547 | 3,30 | ,518 |     |      |       |

\*p<0,01

As seen in Table 2, there is a positive relationship between teachers' job satisfaction expectation level and realization level.  $r=,302$ , which is not very high, but it shows that there is a positive relationship at a moderate level.  $p=.05$  significance level, this relationship is significant at the level of ,000 and  $r^2=(,302)^2= 0.09$ , so it is seen that burnout is affected by the explanation of job satisfaction realization level as 0.09. In this study, the average of job satisfaction expectation level of teachers was found to be 3.97 and the average of job satisfaction realization level was found to be 3.30. It was seen that the expectation level of job satisfaction of the teachers was high but the realization level of their expectations was medium. As a general result, it can be said that job satisfaction is at a medium level. Birlik (1999), as a result of his research on the professional satisfaction of teachers and their understanding of education, it was seen that the fact that young teachers have excessive expectations decreases their level of satisfaction when they first enter the job. Gençer (2002) found that the expectation level of job satisfaction of teachers in general was high, but the level of realization of their expectations was low.

#### 4.3. Whether Primary School Teachers Choose the Profession Voluntarily or not and Professional

The third sub-problem of the study was determined as "Is there a difference between the occupational burnout levels of primary school teachers according to whether they choose the profession willingly or not?". Accordingly, the following findings were obtained as a result of the analysis of the data obtained and shown in Table 3.

**Table 3. The Test of the Difference Between Primary School Teachers' Whether They Choose the Profession Willingly or Not and Their Occupational Burnout Levels**

| Choosing the Same Task | N   | X    | SS   | F      | P      |
|------------------------|-----|------|------|--------|--------|
| Yes                    | 417 | 2,37 | ,592 | 36,592 | 0,000* |
| No.                    | 55  | 3,05 | ,806 |        |        |
| Undecided              | 75  | 2,78 | ,704 |        |        |
| Total                  | 547 | 2,50 | ,673 |        |        |

\*p<0,01

As seen in Table 3, according to the results of the analysis, there is a significant difference between the burnout levels of teachers according to their preference to do the same task again. ( $F(2-544)=36,592$ ,  $p<.05$ ). In other words, teachers' burnout levels vary according to whether they prefer to do the same job again or not. The results of the Scheffe test conducted to find out between which groups the differences between the units are between are shown in Table 15. According to this, the burnout levels of those who said no to this task are higher than those who said yes and undecided ( $x = 3,05$ ), then it is seen that the burnout levels of those who said undecided are also different from the other levels ( $x = 2,79$ ). The burnout levels of those who said yes were lower than the others ( $x = 2,37$ ). According to the findings obtained, it can be said that the level of burnout in teachers who choose the profession willingly is lower, the level of burnout in those who choose the profession involuntarily is higher, and the level of burnout in those who answer "undecided" is at a medium level. According to the results of the research, there is a significant relationship between doing a job willingly and the level of burnout in that job. It can be said that the burnout level of teachers who do their job willingly is low, while the burnout level of teachers who do their job reluctantly is high.

#### 4.4. Findings and Comments Related to the Difference Between the Department of Graduation and Burnout Level of Primary School Teachers

The fourth sub-problem of the study was determined as "Is there a significant difference between primary school teachers' graduation department and burnout level?". Accordingly, the following findings were obtained as a result of the analysis of the data obtained and shown in Table 4.

**Table 4. The Difference Between Primary School Teachers' Department of Graduation and Occupational Burnout Level**

| Graduation   | N   | X    | SS   | F     | P     |
|--|-----|------|------|-------|-------|
| Atatürk Teachers College (Atatürk Teachers Academy)                | 408 | 2,55 | ,683 | 3,725 | 0.005 |
| Classroom Teaching Department of a University                      | 9   | 2,65 | ,476 |       |       |
| Faculty of Education of a University other than Classroom Teaching | 71  | 2,26 | ,570 |       |       |

|  |     |      |      |
|--|-----|------|------|
| Department Not Affiliated to the Faculty of Education of a University. | 37  | 2,32 | ,613 |
| Other  | 22  | 2,52 | ,779 |
| Total  | 547 | 2,50 | ,673 |

As seen in Table 4, according to the results of the analysis, there is a significant difference between the burnout levels of teachers according to the school they graduated from. ( $F=3,725$ ,  $p<.05$ ). In other words, teachers' burnout levels vary according to the department they graduated from. Scheffe test was conducted to find out between which groups the differences between the units were. Accordingly, the lowest burnout ( $x=2,26$ ) was observed in teachers who graduated from a university's faculty of education other than classroom teaching, and the highest burnout ( $x=2,65$ ) was observed in teachers who graduated from a university's department of classroom teaching. In short, it is observed that there is a difference between the groups.

### CONCLUSIONS AND RECOMMENDATIONS

According to the results of this study, there is a moderate positive relationship between teachers' job satisfaction expectation level and realization level. In other words, teachers' job satisfaction is realized in line with their expectations. The effect of this relationship on burnout was determined as 9%. In addition, a significant difference was found in terms of teachers' burnout levels according to their preference for the same job again. It was observed that task preference affected the burnout levels of teachers. According to the results, it was determined that the burnout levels of those who did not prefer the task were higher than those who said yes and undecided, and those who said undecided were different from the other levels. In addition, it was found that there was a significant difference between the burnout levels of teachers according to the school they graduated from. This shows that teachers' burnout levels may vary according to the departments they graduated from. According to the results, while the burnout level of teachers who graduated from a university's faculty of education other than classroom teaching was the lowest, the burnout level of teachers who graduated from the department of classroom teaching was the highest. As a result, significant relationships were found between teachers' job satisfaction and burnout levels, and it was also observed that job preference and school of graduation were effective on burnout levels. At the end of the research, the following suggestions were developed:

- Schools and educational institutions can develop support programs to increase teachers' job satisfaction and reduce their burnout levels. These programs should provide teachers with psychological support, professional development opportunities and strategies for coping with stress.
- A system can be established where newly graduated teachers are mentored by experienced teachers. In this way, teachers can share professional problems, share experiences and receive support for their professional development.
- Faculties of education could include teacher job satisfaction and coping with burnout in their pedagogical formation programs to provide better professional preparation for pre-service teachers. This can more effectively prepare pre-service teachers for their professional lives.
- Schools can identify the factors that affect teachers' job satisfaction and focus on improving these factors. A good school climate can increase teachers' motivation and reduce the risk of burnout.
- Schools can provide emotional support to teachers by offering psychological counseling services. These services can help with issues related to work stress, communication problems or professional development.
- School administrations can provide regular feedback to teachers to evaluate their performance and highlight positive contributions. This can increase teachers' motivation and positively affect their job satisfaction. - Teachers can be supported in balancing work and personal life. Measures such as flexible working hours, family-friendly policies and balanced distribution of workload can improve teachers' quality of life.

## ABSTRACT

This research aims to evaluate the relationship between job satisfaction and organizational commitment of employees in tourism sector enterprises. The study is based on a large population of 9,280 employees working in 138 accommodation facilities operating in different districts of TRNC. Based on a sample of 507 respondents selected through a quota sampling method, the study examined the relationship between organizational commitment and the demographic characteristics of the respondents such as gender, age, marital status, educational level and professional seniority. According to the results of the study, the relationship between marital status and organizational commitment reveals various findings. While there was a significant difference between married and single participants in the emotional commitment sub-dimension, no such difference was found in other commitment sub-dimensions. In addition, it was determined that married participants had a higher level of satisfaction in the general satisfaction sub-dimension. However, the effect of marital status on intrinsic and extrinsic satisfaction sub-dimensions is not statistically significant. The fact that married participants have higher satisfaction levels in the general satisfaction sub-dimension indicates that marital status may have an effect on the general satisfaction level. When the relationship between educational level and job satisfaction was examined, it was determined that master's/doctorate graduates had higher satisfaction levels in the general satisfaction sub-dimension. However, in the sub-dimensions of intrinsic satisfaction and extrinsic satisfaction, it was observed that the level of education did not have a significant effect on job satisfaction. The relationship between professional seniority and job satisfaction was evaluated and a significant difference was found between professional seniority groups in the external satisfaction sub-dimension. No significant difference was found between professional seniority groups for other commitment sub-dimensions. The correlation analysis of the study reveals positive and statistically significant relationships between job satisfaction and organizational commitment. There is a strong relationship between intrinsic satisfaction, extrinsic satisfaction and general satisfaction sub-dimensions and emotional commitment, continuance commitment, normative commitment and general commitment. Regression analysis results show that general satisfaction has a positive effect on organizational commitment.

**Keywords:** Job satisfaction, intrinsic satisfaction, extrinsic satisfaction, organizational commitment.

## 1. INTRODUCTION

### 1.1. Problem Status

Job satisfaction is a basic concept that expresses the satisfaction an individual obtains from his/her business life. This satisfaction includes liking the individual's job, having positive feelings towards his job, and positive experiences in this field. Job satisfaction is of great importance for both the personal development of the individual and organizational success. From an individual perspective, job satisfaction positively affects the physical and mental health of the individual (Andıç and Karaca, 2023). Individuals who are satisfied with their jobs can keep their stress levels under control, establish a better work-life balance, and increase their overall life satisfaction. This situation increases the motivation and energy of employees and increases their productivity. From an organizational perspective, it increases job satisfaction, organizational commitment and employee loyalty. Individuals who are satisfied with their jobs are more committed and loyal to their organizations. This commitment encourages cooperation and interaction by creating a positive work environment within the organization (Koç and Ertürk, 2023).

Job satisfaction is affected by various factors. These factors include elements such as job content, working conditions, colleagues, employer and organizational culture. In addition, individuals' personal characteristics and expectations also affect job satisfaction. In this context, the complexity and diversity of job satisfaction is emphasized. Therefore, job satisfaction is a critical factor for organizations that affects not only the happiness of individual employees but also the overall performance of the organization. Focusing on job satisfaction can strengthen the sustainability and competitive advantage of the organization by increasing employee motivation and commitment (Ladikli and Arslan, 2023).

Organizational commitment is a critical concept that expresses the level of loyalty and commitment an employee feels towards the organization. In this context, organizational commitment can be defined as the combination of an employee's desire to stay in the organization, his desire to exert more effort for the organization, and his belief in the goals and values of the organization. From an individual perspective, organizational commitment positively affects the physical and mental health of employees. Employees with high levels of organizational commitment can keep their stress levels lower, maintain better work-life balance, and increase their overall life satisfaction to higher levels. In addition, increasing organizational commitment positively affects the productivity and performance of employees (İşlek and Bakioğlu, 2023).

From an organizational perspective, organizational commitment strengthens the efficiency and profitability of organizations. Engaged employees contribute more to their organizations, spend more effort to achieve organizational goals, and thus contribute significantly to the success of their organizations (Ates and Tecen, 2023). Among the factors affecting organizational commitment, elements such as job content, work conditions, colleagues, employer and organizational culture play an important role. At the same time, individuals' personal characteristics and expectations also determine organizational commitment. This complex interaction requires considering organizational commitment from a broad perspective. As a result, organizational commitment is a concept that creates an important interaction area at the individual and organizational levels and stands out as a critical element for sustainable success in business life (Aslan and Terzi, 2023).

Job satisfaction and organizational commitment levels of employees in the tourism sector can generally be affected by factors such as the dynamic structure of the sector, service-oriented working conditions and interaction with customers. Within the scope of this information, the problem statement of the study is "Is there a relationship between job satisfaction and organizational commitment of employees in businesses operating in the tourism sector?" was determined as .

## 1.2. Purpose and Importance of the Research

This research aims to examine the relationship between job satisfaction and organizational commitment of employees in businesses operating in the tourism sector. Tourism is a dynamic and rapidly changing sector, and understanding the job satisfaction and organizational commitment of employees in this sector is of critical importance for the sustainability and performance of businesses. It creates significant effects on the job satisfaction levels, working conditions, intra-work relations and perceptions of career development of employees in tourism enterprises. This study aims to elucidate the potential effects of job satisfaction on organizational commitment levels of employees in businesses operating in the tourism sector. The findings of the research may contribute to tourism businesses better understanding employee satisfaction and loyalty strategies and developing effective policies in this field. Therefore, this study, which is expected to make a valuable contribution to the tourism sector, represents an important step towards an in-depth understanding of the relationship between job satisfaction and organizational commitment.

## 1.3. HYPOTHESES

The hypotheses of this research are as follows:

1. H1: There is a significant difference between marital status and organizational commitment.  
H0: There is no significant difference between marital status and organizational commitment.
2. H1: There is a significant difference between gender and job satisfaction.  
H0: There is no significant difference between gender and job satisfaction.
3. H1: There is a significant difference between marital status and job satisfaction.  
H0: There is no significant difference between marital status and job satisfaction.
4. H1: There is a significant difference between educational status and job satisfaction.  
H0: There is no significant difference between educational status and job satisfaction.
5. H1: There is a significant difference between professional seniority and job satisfaction.  
H0: There is no significant difference between professional seniority and job satisfaction.
6. H1: There is a significant relationship between job satisfaction and organizational commitment.  
H0: There is no significant relationship between job satisfaction and organizational commitment.
7. H1: Job satisfaction has an effect on organizational commitment  
H0: Job satisfaction has no effect on organizational commitment

## 1.4. Assumptions

research participants gave their answers to the scale questions sincerely.

## 1.5. Limitations

Research;

- With research participants,
- With the resources used,

- With the scale questions used in the research,
- It is limited to employees working in accommodation establishments in TRNC.

## 1.6. Definitions

**Job satisfaction:** It refers to an employee's general satisfaction with his job and working conditions ( Çakır and Öztürk, 2023) .

**Organizational commitment:** It refers to a strong level of loyalty and devotion that an employee feels towards the organization he works for ( Tamer and Bük, 2020) .

## 2. THEORETICAL FRAMEWORK

### 2.1. Job satisfaction

Job satisfaction refers to an individual's overall level of satisfaction with their job. An employee's job satisfaction can be affected by a variety of factors, including working conditions, pay, career opportunities, relationships with colleagues and management style. A healthy job satisfaction can increase employee motivation, positively affect job performance, and improve the overall atmosphere in the workplace. Job satisfaction is of critical importance not only at the individual level but also for corporate success. Businesses can adopt various strategies to increase employee satisfaction; These may include measures such as fair remuneration, career development opportunities, effective communication and encouraging employee participation. A successful job satisfaction policy can increase employee loyalty and create a positive work culture within the business. Job satisfaction refers to the level of satisfaction an employee feels with his job. This concept is shaped depending on factors such as the employee's work environment, working conditions, salary, management style, career opportunities, relationships with colleagues and general work experience. Job satisfaction is a reflection of the positive or negative feelings an individual has towards their job and can affect an employee's motivation, commitment and performance. Job satisfaction can be affected by a number of factors (Aşan and Erenler, 2008).

" job satisfaction" is a concept that focuses on the social and psychological dynamics in the business world and has attracted wider attention in this context, especially since the mid-20th century. During this period, more emphasis began to be placed on the fact that work plays an important role in an individual's life, beyond being just a source of income, and on the level of satisfaction that employees derive from their jobs. Job satisfaction has emerged as a term that expresses the individual's emotional state and satisfaction with his/her job. This term evaluates the psychological effects of a job on an individual by addressing its effects on the employee's experiences, relationships, conditions, and expectations in the work environment. Work Satisfaction is of critical importance for both the individual's own personal development and overall performance and effectiveness at work. Research on job satisfaction in the second half of the 20th century has led businesses to adopt various strategies to increase employee satisfaction and strengthen their long-term commitment. These strategies include fair remuneration, healthy working conditions, career development opportunities and effective leadership practices ( Çakır and Öztürk, 2023) .

Today, the concept of job satisfaction represents an important perspective that encourages businesses to focus not only on financial success but also on the happiness and well-being of their employees. Research and practice on job satisfaction continues to deepen the understanding of social dynamics in the business world and develop a variety of strategies to enable employees to have a more satisfying work experience. Job satisfaction in workplaces in the Turkish Republic of Northern Cyprus (TRNC) is an important concept shaped based on various factors. Employees at workplaces in TRNC generally evaluate job satisfaction by focusing on factors such as working conditions, wages and benefits, career opportunities, business relations and workplace culture (Araslı, Arıcı, & Araslı, 2016).

### 2.2. Definition of Organizational Commitment

Organizational commitment is a strong sense of commitment, loyalty and belonging that an individual feels to the organization he works for. This commitment refers to an emotional, cognitive and behavioral combination of the employee to his organization. Emotionally, the employee has strong feelings and commitment to the organization. Cognitively, it is important for the employee to internalize and adopt the goals and values of the organization. Behaviorally, the employee's positive behavior towards the organization, participation and intention to stay in the organization indicate organizational commitment ( Tamer and Bük, 2020) .

Organizational commitment refers to the level of loyalty, attitude and commitment an individual feels towards the organization of which he is a member. This concept reflects the employee's desire to ensure long-term continuity within the organization by sharing the goals and values of the organization. Organizational commitment occurs in a dimension that focuses both on the individual's job (job commitment) and on the general goals of the organization (organizational commitment). In this context, it is a factor that does not affect short-term situations and significantly affects business continuity. One of the main determinants of organizational commitment is important in understanding the behavior of people in the organizational structure. Characteristics such as employee performance, retention, job satisfaction, development and creativity are in a strong relationship

with the level of commitment to the organization. Employees with high organizational commitment generally have long tenure, low turnover and high job satisfaction (Doğan and Kılıç, 2007).

In particular, the employee's commitment to the organization can provide an advantage for the business. High commitment can increase the employee's long-term contribution within the organization and support the stability of the organization. This may also have a positive impact on the employee's job satisfaction and development. Organizational commitment is a critical concept that expresses the emotional commitment of individuals to the organization. Employees with high organizational commitment generally have the potential to create longer-term value for the organization (Tokmak, 2018).

### 3. METHOD

#### 3.1. Research Method

This research was designed as quantitative. Quantitative research is a type of research that objectifies facts and events and reveals them in an observable, measurable and numerically expressible way. Research that is repeatable and objectively revealed through observation and measurement is known as quantitative, that is, "numerical" research ( Karasar , 2008).

#### 3.2. Population and Sample

The population of the study consists of 9,280 personnel working in a total of 138 Accommodation facilities operating in the districts of Nicosia, Kyrenia, Famagusta, Iskele and Güzelyurt in TRNC (TRNC Economy Status Report, 2023). In this context, the sample of the study was determined by the quota sampling method. Quota sampling method is a sampling method in which a predetermined rate or percentage is used to include individuals in the population with certain characteristics or qualities in the sample. In this method, the researcher first determines the different groups in the universe and determines a quota for each group. Then, it selects the individuals to be included in the sample according to these quotas ( Karasar , 2008). In this context, 507 employees were included in the study.

#### 3.3. Data Collection Tools

Personal information form, Minnesota Job Satisfaction Scale and Organizational Commitment Scale were used as research data. In the personal information form, participants were asked questions about gender, age, marital status, education level and professional seniority.

the Minnesota Job Satisfaction Scale was used to evaluate job satisfaction in the study. This scale is derived from the long form of the Minnesota Satisfaction Scale developed by RV Davis , DJ Weiss , GW England , LH Lofquist . Items assessing satisfaction levels consisting of internal and external factors of the scale were used in 20 items within the scope of the research. The Minnesota Job Satisfaction Scale is a tool used to measure job satisfaction. The adaptation study of the scale in Turkey was carried out by Deniz and Güliz Gökçora from Hacettepe University . In this adaptation study, the scale was translated from English to Turkish and the translation process was checked by other linguists and found appropriate. In this way, a reliable tool was obtained to evaluate job satisfaction levels by using the Turkish version of the scale.

Meyer and Allen's Organizational Commitment Scale was used in the study to measure organizational commitment , and this scale consists of 18 questions. In order to evaluate the reliability of the scale, analysis methods applied to the job satisfaction scale were adopted. According to the results of the analysis carried out on the data of 125 employees participating in the study conducted by Urhan (2014) , the internal consistency of the organizational commitment scale was found to be Cronbach alpha coefficient was found to be  $\alpha = 0.925$ . This high internal consistency coefficient shows that the scale measures organizational commitment reliably and consistently.

Cronbach's Alpha coefficients were calculated to evaluate the reliability of the scales used in the study . Cronbach's Alpha value obtained for the Job Satisfaction Scale was found to be 0.715, and for the Organizational Commitment Scale was 0.834. These values show that both scales are at an acceptable level in terms of reliability.

#### 3.4. Analysis of Data

In the study, data were analyzed using SPSS 28.00 program. First of all, the normality test of the scales was performed. The Kolmogorov-Smirnov test for job satisfaction and organizational commitment scales revealed that the data did not show a normal distribution. However, since the skewness and kurtosis values were in the range of  $\pm 1.5$ , it was accepted that the data conformed to normal distribution, as stated by Tabachnick and Fidell (2013). Since it was assumed that the data showed normal distribution, parametric tests were used in the research. T-test was used for comparisons between two groups, ANOVA for comparisons for more than two groups, and Tukey test for further analysis. Pearson test was used for correlations between participants' scale scores . This allows the relationships between the measures to be evaluated. Additionally , multivariate

regression analysis was applied. This is used to evaluate the impact of multiple independent variables on the dependent variable.

#### 4. FINDINGS

Table 1. Demographic Information

|                        |                             | N   | %     |
|------------------------|-----------------------------|-----|-------|
| Gender                 | Male                        | 263 | 51.9  |
|                        | Woman                       | 244 | 48.1  |
| marital status         | Married                     | 293 | 57.8  |
|                        | Single                      | 214 | 42.2  |
| Age                    | 22-30 years old             | 55  | 10.8  |
|                        | 31-39 years old             | 208 | 41.0  |
|                        | 40-49 years old             | 167 | 32.9  |
|                        | 50-59 years old             | 77  | 15.2  |
| Education              | Primary/secondary education | 290 | 57.2  |
|                        | High school                 | 50  | 9.9   |
|                        | Licence                     | 149 | 29.4  |
|                        | Master's/Ph.D.              | 18  | 3.6   |
| professional seniority | 0-5 years                   | 80  | 15.8  |
|                        | 6-10 years                  | 109 | 21.5  |
|                        | 11-15 years                 | 119 | 23.5  |
|                        | 16-20 years                 | 121 | 23.9  |
|                        | 21 years and above          | 78  | 15.4  |
|                        | Total                       | 507 | 100.0 |

Considering the gender distribution of the 507 people participating in the research, 51.9% of the participants are men and 48.1% are women. In terms of marital status, 57.8% of the participants are married and 42.2% are single. When the distribution of participants by age groups is examined, 10.8% are between the ages of 22-30. Other age groups were determined as 41.0% (31-39 years), 32.9% (40-49 years) and 15.2% (50-59 years), respectively. According to education level, 57.2% of the participants are primary/secondary graduates, 9.9% are high school graduates, 29.4% are bachelor's degree holders and 3.6% are master's/doctorate holders. In terms of professional seniority, 15.8% of the participants have 0-5 years, 21.5% have 6-10 years, 23.5% have 11-15 years, 23.9% have 16-20 years, and 15.4% have professional seniority of 21 years or more.

#### 4.2. Relationship Difference Analyzes Between Demographic Variables, Job Satisfaction and Organizational Commitment

H1 : There is a significant difference between marital status and organizational commitment.

H0 : There is no significant difference between marital status and organizational commitment.

Table 2. Marital Status Difference Between and Organizational Commitment

|                        |         | N   | Cover.  | ss      | F     | p.           |
|------------------------|---------|-----|---------|---------|-------|--------------|
| Emotional Commitment   | Married | 293 | 26.4949 | 4.64465 | 9,083 | <b>0.003</b> |
|                        | Single  | 214 | 27.1589 | 3.63253 |       |              |
| Continuance Commitment | Married | 293 | 26.3720 | 3.38634 | 2,157 | 0.143        |
|                        | Single  | 214 | 27.2430 | 2.45845 |       |              |

Single 214 79.6916 6.80708

$p < 0.05$

When the relationship between marital status and organizational commitment was examined, various findings emerged according to different scale sub-dimensions. In the emotional commitment sub-dimension, a significant difference was detected between married and single participants ( $F = 9.083$ ,  $p = 0.003$ ). This shows that marriage status has an impact on the level of emotional commitment. While married participants received an average score of 26.4949, the average of single participants was determined as 27.1589. No significant relationship was found with marital status in the sub-dimensions of continuance commitment, normative commitment and general commitment. There was a statistically significant difference between married and single participants in the continuance commitment sub-dimension ( $F=2.157$ ,  $p=0.143$ ), normative commitment sub-dimension ( $F=0.351$ ,  $p=0.554$ ), and general commitment sub-dimension ( $F=0.952$ ,  $p=0.330$ ). No difference was found.

#### 4.3. Difference Analyzes Between Demographic Variables and Job Satisfaction

H1 : There is a significant difference between gender and job satisfaction.

H0 : There is no significant difference between gender and job satisfaction.

Table 3. Difference Between Gender and Job Satisfaction

|                       |       | N   | Cover.  | Ss .    | F     | p.           |
|-----------------------|-------|-----|---------|---------|-------|--------------|
| Inner Satisfaction    | Male  | 263 | 55.0837 | 6.70370 | 0.178 | 0.673        |
|                       | Woman | 244 | 55.4918 | 6.89933 |       |              |
| External Satisfaction | Male  | 263 | 19.6502 | 3.09507 | 0.004 | 0.951        |
|                       | Woman | 244 | 19.6148 | 3.07772 |       |              |
| overall satisfaction  | Male  | 263 | 74.7338 | 8.20663 | 9,741 | <b>0.030</b> |
|                       | Woman | 244 | 75.1066 | 8.63652 |       |              |

$p < 0.05$

As a result of the statistical analysis conducted within the scope of the research, findings evaluating the difference between gender and job satisfaction emerged. In the internal satisfaction sub-dimension, no significant difference was detected between male and female participants ( $F = 0.178$ ,  $p = 0.673$ ). There was no significant difference between male and female participants in the external satisfaction sub-dimension ( $F = 0.004$ ,  $p = 0.951$ ). However, a significant difference was determined between gender groups in the general satisfaction sub-dimension ( $F=9.741$ ,  $p=0.030$ ). Accordingly, it was observed that the overall satisfaction averages of female participants were higher than male participants. These results show that gender has an impact on job satisfaction at the overall satisfaction level. On the other hand, it appears that gender does not have a significant effect on job satisfaction in the internal satisfaction and external satisfaction sub-dimensions. These findings indicate that gender differences between job satisfaction dimensions may vary according to sub-dimensions.

H1 : There is a significant difference between marital status and job satisfaction.

H0 : There is no significant difference between marital status and job satisfaction.

#### Difference Between Marital Status and Job Satisfaction

|                       |         | N   | mean    | ss      | F     | p.           |
|-----------------------|---------|-----|---------|---------|-------|--------------|
| Inner Satisfaction    | Married | 293 | 55.7611 | 6.64390 | 1,467 | 0.226        |
|                       | Single  | 214 | 54.6215 | 6.95807 |       |              |
| External Satisfaction | Married | 293 | 19.7167 | 3.04391 | 0.710 | 0.400        |
|                       | Single  | 214 | 19.5187 | 3.14099 |       |              |
| overall satisfaction  | Married | 293 | 75.4778 | 8.27836 | 9,885 | <b>0.040</b> |
|                       | Single  | 214 | 74.1402 | 8.54587 |       |              |

$p < 0.05$

No significant difference was detected between married and single participants in the internal satisfaction sub-dimension ( $F=1.467$ ,  $p=0.226$ ). No significant difference was found between marital status groups in the external satisfaction sub-dimension ( $F = 0.710$ ,  $p = 0.400$ ). However, a significant difference was determined between

married and single participants in the general satisfaction sub-dimension ( $F=9.885$ ,  $p=0.040$ ). Accordingly, it was determined that the overall satisfaction average of married participants was higher than that of single participants. These findings show that marital status may have an impact on job satisfaction at the overall satisfaction level. On the other hand, it appears that marital status does not have a significant effect on job satisfaction in the internal satisfaction and external satisfaction sub-dimensions.

H1 : There is a significant difference between educational status and job satisfaction.

H0 : There is no significant difference between educational status and job satisfaction.

#### Difference Between Educational Attainment and Job Satisfaction

|                       |                             | N   | Cover.  | ss       | F     | p.                                     |

|                       | Licence                     | 149 | 19.9664 | 3.16530  |       |  |
|                       | Master's/Ph.D.              | 18  | 19.3333 | 4.28403  |       |  |
| overall satisfaction  | Primary/secondary education | 290 | 74.1483 | 8.66817  | 6,180 | <b>0.040</b><br>Master's/ PhD > others |
|                       | High school                 | 50  | 76.2400 | 7.50662  |       |  |
|                       | Licence                     | 149 | 76.0470 | 7.62671  |       |  |
|                       | Master's/Ph.D.              | 18  | 74.1667 | 11.49041 |       |  |

$p < 0.05$

As a result of the analysis, no significant difference was determined between the education groups of the internal satisfaction and external satisfaction sub-dimensions of the participants who were educated at the primary/secondary level ( $p > 0.05$ ). In the general satisfaction sub-dimension, the average of the participants with primary and secondary education was 74.1483, while the average of the participants with other education levels was 76.2400, 76.0470 and 74.1667, respectively. Statistical analysis showed that there was a significant difference between education groups in the general satisfaction sub-dimension ( $F=6.180$ ,  $p=0.040$ ). Accordingly, it was determined that the averages of Master's/PhD graduates were higher than others. These results show that the level of education may have an impact on job satisfaction at the general satisfaction level, but the level of education does not have a significant effect on the sub-dimensions of intrinsic satisfaction and external satisfaction.

H1 : There is a significant difference between professional seniority and job satisfaction.

H0 : There is no significant difference between professional seniority and job satisfaction.

#### Difference Between Professional Seniority and Job Satisfaction

p < 0.05

Within the scope of the research, the relationship between professional seniority and job satisfaction was evaluated and no significant difference was determined between professional seniority groups regarding the internal satisfaction and general satisfaction sub-dimensions ( $p > 0.05$ ). In the external satisfaction sub-dimension, the average of the participants in the 0-5 years professional seniority group was 19.0125, while the average of the participants in the other professional seniority groups was determined as 19.5505, 19.4370, 19.8595 and 20.3333, respectively. According to the statistical analysis results of the research, a significant difference was determined between professional seniority groups in the external satisfaction sub-dimension ( $F = 4.138$ ,  $p = 0.045$ ). These findings show that the external satisfaction level of individuals with over 21 years of professional seniority is higher than those with 0-5 years of professional seniority. In other words, we can conclude that individuals who have gained more experience in business life obtain more external satisfaction from their jobs. This may indicate that long-term employees accumulate more experience in their jobs, gain more satisfaction from their jobs thanks to this experience, and therefore have higher levels of external satisfaction. These results show that professional seniority can be an effective factor on job satisfaction and that this effect is especially evident in the external satisfaction sub-dimension.

#### 4.4. The Relationship Between Job Satisfaction and Organizational Commitment

H1 : There is a significant relationship between job satisfaction and organizational commitment.

H0 : There is no significant relationship between job satisfaction and organizational commitment.

Table 7. Relationship Between Job Satisfaction and Organizational Commitment (Correlation Analysis)

|                        |    | Inner Satisfaction | External Satisfaction | overall satisfaction |
|------------------------|----|--------------------|-----------------------|----------------------|
| Emotional Commitment   | r  | .123 **            | .144 **               | .152 **              |
|                        | p. | 0.006              | 0.001                 | 0.001                |
| Continuance Commitment | r  | .124 **            | .222 **               | .181 **              |
|                        | p. | 0.005              | 0.000                 | 0.000                |
| normative Loyalty      | r  | .182 **            | ,one hundred *        | .184 **              |
|                        | p. | 0.000              | 0.024                 | 0.000                |
| general commitment     | r  | ,210 **            | .217 **               | .249 **              |
|                        | p. | 0.000              | 0.000                 | 0.000                |

The correlation analysis carried out within the scope of the research revealed important findings to evaluate the relationship between job satisfaction and organizational commitment. Statistically significant positive relationships were determined between intrinsic satisfaction, extrinsic satisfaction and general satisfaction sub-dimensions and emotional commitment, continuance commitment, normative commitment and general commitment. Intrinsic satisfaction is related to emotional commitment ( $r=0.123$ ,  $p=0.006$ ), continuance commitment ( $r=0.124$ ,  $p=0.005$ ), normative commitment ( $r=0.182$ ,  $p=0.000$ ) and general commitment ( $r=0.210$ ,  $p=0.000$ ). It was found to be positively related. Similarly, external satisfaction was affected by emotional commitment ( $r=0.144$ ,  $p=0.001$ ), continuance commitment ( $r=0.222$ ,  $p=0.000$ ), normative commitment ( $r=0.100$ ,  $p=0.024$ ) and general commitment ( $r=0.217$ ,  $p=0.000$ ) was found to have a positive and statistically significant relationship. General satisfaction is emotional commitment ( $r=0.152$ ,  $p=0.001$ ), continuance commitment ( $r=0.181$ ,  $p=0.000$ ), normative commitment ( $r=0.184$ ,  $p=0.000$ ) and general commitment ( $r=0.249$ ,  $p=0.000$ ). showed a significant positive relationship with .

These findings reveal that job satisfaction has a strong and positive relationship with the level of organizational commitment. Increasing the satisfaction that participants receive from their jobs increases their emotional

commitment, continuance commitment, normative commitment and general commitment levels. It was concluded that this satisfaction at work strengthens employees' emotional, ongoing, normative and general commitment to their organizations.

#### 4.5. The Effect of Job Satisfaction on Organizational Commitment

H1 : Job satisfaction has an effect on organizational commitment .

H0 : Job satisfaction has no effect on organizational commitment .

Table 8. Effect of Job Satisfaction on Organizational Commitment (Regression Analysis)

|                        |                      | Unstandardized Coefficients |               | Standardized Coefficients Beta | t      | p .   |
|------------------------|----------------------|-----------------------------|---------------|--------------------------------|--------|-------|
|                        |                      | B.                          | std . Mistake |                                |        |       |
| general commitment     | Still                | 61,407                      | 3,037         |                                | 20,222 | 0.000 |
|                        | overall satisfaction | 0.233                       | 0.040         | 0.249                          | 5,783  | 0.000 |
| emotional attachment   | Still                | 21,016                      | 1,678         |                                | 12,526 | 0.000 |
|                        | overall satisfaction | 0.077                       | 0.022         | 0.152                          | 3,454  | 0.001 |
| continuance commitment | Still                | 21,801                      | 1,199         |                                | 18,179 | 0.000 |
|                        | overall satisfaction | 0.066                       | 0.016         | 0.181                          | 4,144  | 0.000 |
| normative commitment   | Still                | 18,590                      | 1,619         |                                | 11,483 | 0.000 |
|                        | overall satisfaction | 0.090                       | 0.021         | 0.184                          | 4,197  | 0.000 |

The regression analysis of the study examined the effects of job satisfaction on organizational commitment. The findings revealed that overall satisfaction showed a positive and significant effect for the subscales of general commitment, affective commitment, continuance commitment, and normative commitment. The effect of general satisfaction on overall loyalty was determined as regression coefficient (B) 0.233, standard error 0.040 and beta coefficient 0.249 ( $t=5.783$ ,  $p<0.001$ ). Similarly, the regression coefficient of the effect on emotional commitment was found to be 0.077, standard error 0.022 and beta coefficient 0.152 ( $t=3.454$ ,  $p=0.001$ ). For continuance commitment, the regression coefficient was 0.066, the standard error was 0.016 and the beta coefficient was 0.181 ( $t=4.144$ ,  $p<0.001$ ). In the normative commitment sub-dimension, the regression coefficient of the effect of general satisfaction was determined as 0.090, the standard error was 0.021 and the beta coefficient was 0.184 ( $t=4.197$ ,  $p<0.001$ ).

These results show that increasing employees' job satisfaction levels positively affects organizational commitment by increasing their general commitment, emotional commitment, continuance commitment and normative commitment levels. Job satisfaction appears to encourage employees to establish and maintain an emotional commitment to their organizations, develop a normative commitment, and increase their overall level of commitment. In this context, it can be emphasized that job satisfaction is a critical factor supporting organizational commitment.

#### CONCLUSION AND RECOMMENDATIONS

According to the results of the research, the relationship between marital status and organizational commitment was examined and various findings were obtained. While a significant difference was detected between married and single participants in the emotional commitment sub-dimension, no such difference was detected in the other commitment sub-dimensions. Additionally, it was found that married participants had a higher level of satisfaction in the general satisfaction sub-dimension. The effect of marital status on the internal satisfaction and external satisfaction sub-dimensions was not found to be significant. However, the fact that married participants have a higher satisfaction level in the general satisfaction sub-dimension shows that marital status may have an impact on the general satisfaction level. When the relationship between education level and job satisfaction was examined, it was determined that master's/doctoral graduates had a higher satisfaction level in the general satisfaction sub-dimension. However, it was observed that the level of education did not have a significant effect

on job satisfaction in the sub-dimensions of internal satisfaction and external satisfaction. The relationship between professional seniority and job satisfaction was evaluated and a significant difference was determined between professional seniority groups in the external satisfaction sub-dimension. This result shows that long-term working individuals obtain more external satisfaction from their jobs. No significant difference was determined between professional seniority groups for other commitment sub-dimensions. The correlation analysis of the study evaluated the relationship between job satisfaction and organizational commitment, and positive and statistically significant relationships were determined between intrinsic satisfaction, extrinsic satisfaction and general satisfaction sub-dimensions and emotional commitment, continuance commitment, normative commitment and general commitment. Regression analysis results revealed that overall satisfaction had a positive effect on organizational commitment.

In line with the findings of the research, suggestions can be developed to increase job satisfaction and organizational commitment within the company. First of all, significant differences were detected between married and single employees in the emotional commitment sub-dimension. This may require companies to help married and single employees balance their job satisfaction levels by offering special support programs to employees. Additionally, considering the impact of education level on overall satisfaction, training and personal development programs can be created within the company to provide special support to increase the overall satisfaction level of employees. The positive relationship between professional seniority and external satisfaction shows that long-term employees have higher external satisfaction. In this context, companies can evaluate the impact of professional seniority on extrinsic satisfaction by offering mentoring programs and career development opportunities for new employees. Strengthening the relationship between job satisfaction and commitment by organizing programs to strengthen communication, understanding employee satisfaction by using regular feedback mechanisms, and implementing recommended strategies within the company stand out as important steps. These recommendations can guide companies in improving employee experience and increasing organizational commitment.

# THE RELATIONSHIP BETWEEN TEACHERS' PERCEPTIONS OF EDUCATIONAL INSPECTORS' SUPERVISION STYLES AND THEIR TRUST LEVELS

Gülay YAHYAOĞLU  
gulayyahyaoglu5@gmail.com

Yrd. Doç. Dr. Azmiye YINAL  
azmiye.yinal@akun.edu.tr

## ABSTRACT

The main focus of this study is to understand the relationship between teachers' perceptions of educational supervisors' supervisory styles and their levels of trust. This quantitative study was conducted on 257 volunteer teachers selected from schools in TRNC using the Supervision Style Scale (SSS) and the Multipurpose Trust Scale. The findings of this study shed light on the relationships between teachers' preferences for supervisory styles and levels of trust depending on their experience, working hours and professional seniority. Regarding working years, it was determined that teachers with long term experience tended to adopt the non-directive style. In the analyses conducted according to professional seniority groups, it was observed that teachers with 21-30 years and 11-20 years of professional seniority adopted the cooperative style more. However, no significant relationship was found between trust levels and other supervision styles. These findings emphasize that there is no significant relationship between teachers' supervision preferences and their trust levels.

**Keywords:** Teacher, Inspector, Inspection, Trust.

## 1. INTRODUCTION

### 1.1. Problem Status

An effective supervision system and a safe cooperation with teachers are important for educational institutions to operate successfully, achieve set goals and achieve sustainable development (Öner and Türkoğlu, 2020). Audit processes are carried out by education inspectors and are implemented to improve the quality of education by contributing to the professional development of teachers (Tosun, 2021). Educational supervisors' approaches to teachers and their behaviors affect teachers' motivation, job satisfaction and cooperation skills. These interactions become more effective when educational supervisors exhibit a constructive, supportive and trust-building attitude. Supervisors' effective communication skills, establishing open communication channels and cooperation with teachers play an important role in achieving the goals of educational institutions (Tütüncü, 2021).

The existence of trust can create a positive working environment in educational institutions. It can increase teachers' levels of trust, cooperation, commitment and job satisfaction in administrators, colleagues and the educational institution. At the same time, teachers' tendency to take initiative and responsible behavior become more evident in an environment of trust (Taş and Akın, 2023). This can form the basis of an effective educational process that supports student success. High confidence levels of teachers have a positive effect on organizational variables. When the perception of trust is high, teachers' cooperation and communication skills increase, their stress levels decrease, and their conflict tendencies decrease. This strengthens communication in educational institutions, creates a healthy working environment and reduces resistance to change (Sökmen, 2019).

As a result, safe and supportive relationships that education supervisors establish with teachers are of great importance for the success of educational institutions (Degirmencioglu, Buruk, Kurt & Yinal, 2023). The existence of trust encourages effective communication, increases cooperation and increases the quality of educational processes (Uzun, 2018). This enables teachers to be more motivated, work more effectively, and create an educational environment that supports student success. In this context, the problem statement of the study is "Is there a relationship between teachers' perceptions of the supervision styles of education inspectors and their level of trust?" It was determined as.

### 1.2. Purpose and Importance of the Research

The main purpose of this study is to examine the relationship between teachers' perceptions of education inspectors' supervision styles and their trust levels. The supervision styles applied by educational inspectors may be an important factor affecting the professional development of teachers. In this context, how teachers perceive inspection processes is directly related to inspectors' methods, approaches and communication styles. The importance of the study is to understand how teachers' trust levels are shaped depending on their perceptions of supervision processes and to evaluate the effects of this relationship on cooperation, motivation, and performance in educational institutions. This research will contribute to a more in-depth understanding of the

relationship between the supervision styles of education inspectors and teachers, which is a critical issue in terms of educational management and teacher motivation.

### 1.3. Hypotheses

The hypotheses of this research are as follows:

1. H<sub>1</sub>: There is a significant difference between the variable of working time in the institution and the supervision style scale.  
H<sub>0</sub>: There is no significant difference between the variable of working time in the institution and the supervision style scale.
2. H<sub>1</sub>: There is a significant difference between the professional seniority variable and the supervision style scale.  
H<sub>0</sub>: There is no significant difference between the professional seniority variable and the supervisory style scale.
3. H<sub>1</sub>: Multi-purpose trust scale with the variable of working time in the institution there is a significant difference between.  
H<sub>0</sub>: Multi-purpose trust scale with the variable of working time in the institution there is no significant difference between them.
4. H<sub>1</sub>: Multi-purpose trust scale with professional seniority variable there is a significant difference between.  
H<sub>0</sub>: Multi - purpose trust scale with professional tenure variable there is no significant difference between them.
5. H<sub>1</sub>: There is a relationship between teachers' perceptions of education inspectors' supervision styles and their trust levels.  
H<sub>0</sub>: There is no relationship between teachers' perceptions of education inspectors' supervision styles and their trust levels.
6. H<sub>1</sub>: The effect of teachers' perceptions of education inspectors' supervision styles on their trust levels.
7. H<sub>0</sub>: The effect of teachers' perceptions of the supervision styles of education inspectors on their trust levels. There is no.

### 1.4. Assumptions

It is assumed that research participants gave their answers to the scale questions sincerely.

### 1.5. Limitations

Research;

- With the teachers who participated in the research,
- With the resources used,
- The scale used in the research is limited to the questions.

### 1.6. Definitions

**Audit:** Evaluating, controlling and reviewing the compliance of a process, an activity or an organization with established standards, rules, policies and procedures (Öner and Türkoğlu, 2020).

**Inspector:** A person who supervises, examines or controls a specific activity or process within or outside an organization or institution (Aydın, 2021).

**Trust:** It is defined as the belief, sincerity and sense of security that an individual or a group of individuals has in another or a system (Sökmen, 2019).

## 2. THEORETICAL FRAMEWORK

### 2.1. Educational Audit

Educational auditing is a process carried out to evaluate the quality, effectiveness and suitability of an educational institution or educational program. This audit generally occurs in two main categories: internal and external audit. Internal audit is an evaluation process implemented within the educational institution itself. During this process, internal factors such as the institution's educational goals, curriculum, teaching methods, student achievements and student satisfaction are reviewed. Internal audit is carried out to determine the strengths of the institution, identify its weak points and develop improvement strategies (Çetin and Konan, 2020).

External auditing is usually carried out by independent organizations or the state. External audit of educational institutions usually aims to assess their compliance with certain standards and quality assurance. These audits are important to objectively evaluate the overall performance of institutions and determine their compliance with quality standards. Educational supervision is an important tool to provide students with a better education, improve the quality of educational institutions and contribute to the development of the education system in

general. This process encourages continuous improvement and helps educational institutions respond more effectively to the needs of society (Öner and Türkoğlu, 2020).

Educational supervision also includes a number of factors such as student success, faculty performance, resource management, physical infrastructure and management processes. Rigorous evaluation of these elements plays an important role in determining the overall effectiveness and sustainability of educational institutions. The data obtained during the education audit process is used to inform decision makers and make necessary improvements. This process ensures transparent management of internal processes and creates trust among stakeholders (Hajiyev, 2021).

Thanks to external audits, educational institutions can increase their reputation in society by proving their compliance with general standards. Educational supervision is a critical mechanism for the education system to continually evolve and adapt to changing needs. This process highlights the strengths of educational institutions and directs them to sustainable success, while also helping them identify their weak points and create development opportunities. Therefore, educational supervision is one of the cornerstones of a quality education system (Çetin and Konan, 2020).

## **2.2. Organizational Trust**

Organizational trust refers to the belief of employees and stakeholders within an organization in each other, in the leadership level, and in the overall organizational goals. This trust is based on core values such as transparency, honesty, fairness and reliability. Organizational trust strengthens relationships within the organization, encourages cooperation and teamwork, and supports effective communication. Intrinsic trust includes the trust employees have in each other, in managers, and in the values of the organization. This environment of trust encourages open communication and allows conflicts to be resolved in a healthier way. The existence of trust increases employees' courage to make suggestions and creates an effective culture of collaboration within the organization. Consistency, transparency and fairness exhibited by leadership form the cornerstones of organizational trust. When managers lead with reliable and open communication, it increases employees' trust in the leadership level. This allows employees to feel more committed to the goals of the organization and establish a long-term business relationship (Sökmen, 2019).

Organizational trust covers not only relationships between employees but also customers, suppliers and external stakeholders. Trust in an organization contributes to the establishment of reputation and sustainable success towards the outside world. When trust is lacking, negative effects may occur within and outside the organization and long-term success may become difficult to achieve. Organizational trust is one of the cornerstones of an organization and contributes significantly to the creation of a healthy working environment. This atmosphere of trust increases employee motivation, strengthens business performance and supports the sustainable success of the organization. In the continuation of organizational trust, we also see factors that cause a series of positive effects to emerge within and outside the organization. Trust encourages employees to be more likely to take risks and share innovative ideas. This can increase the organization's capacity for continuous improvement and innovation (Sakalli and Örücü, 2019).

Organizational trust can help an organization manage change processes more effectively. When employees trust the leadership and the organization's strategies, they have a more positive attitude towards change. This can strengthen the organization's competitive advantage by increasing its adaptability. Organizational trust also has an economic impact. By encouraging trust, collaboration and teamwork, it can make business processes more efficient. This can lead to cost savings and increase the competitiveness of the organization. Organizational trust stands out as a critical element that positively affects the internal dynamics of an organization and strengthens its relationships with external stakeholders. An atmosphere of trust increases employee motivation, facilitates communication and creates a fundamental basis for long-term success. Therefore, leaders and managers making a conscious effort to establish and maintain organizational trust can make significant contributions to the sustainable success of the organization (Çelik and Gencer, 2019).

## **3. METHOD**

### **3.1. Research Method**

This research is a quantitative study. Quantitative research is often conducted using surveys, measurements, tests, questionnaires, databases containing numerical data, or other standardized measurements. This type of research tends to generalize over large groups of participants and aims to make sense of the findings using statistical analysis ( Büyükoztürk et al., 2008) .

### **3.2. Population and Sample**

The population of the study consists of 2000 teachers working in schools in Nicosia, Kyrenia, Famagusta, Iskele and Güzeyurt districts of TRNC. In this context, the sample of the study was determined by the simple non-elite sampling method. Simple non-elite sampling is a sampling method consisting of randomly selected individuals or units from a universe. In this method, each individual or unit has equal probability of being selected.

Therefore, since each unit has a chance to be selected, the sample is likely to be representative (Büyüköztürk et al., 2008). In this context, 257 teachers who volunteered to participate in the study were included.

### 3.3. Data Collection Tools

Research data were collected with the Control Style Scale (WHO) and the All-Purpose Trust Scale.

Supervision Style Scale (WHO) is a measurement tool developed by Balcı (2012) and is designed to determine teachers' perceptions of the supervision style used by inspectors in the supervision process. The scale consists of three different dimensions: cooperative, non-directive and directive, and contains 21 items in total. WHO uses a 5-point Likert-type rating system to evaluate participants' perceptions of the audit process. Participants are asked to choose a value between 1 (Never) and 5 (Always) for each item. This rating system allows teachers to evaluate the style used by the inspector during the supervision process. There are a total of 8 items in the WHO's collaborative style subscale. The highest score that can be obtained from this dimension is 40 and the lowest score is 8. There are 7 items in the non-directive style dimension. The highest score that can be obtained from this dimension is 35 and the lowest score is 7. The directive style subscale consists of 6 items and the highest score that can be obtained from this dimension is 30 and the lowest score is 6. The response time of the scale is stated as approximately 10 minutes. WHO is used as a tool to understand and evaluate teachers' supervision styles in the supervision process.

Multi-Purpose Trust Scale; "The Omnibus T-Scale" is a measurement tool developed by Hoy and Tschannen-Moran (2003) and was used in this study to determine the confidence levels of teachers in primary schools. The original scale consists of three different dimensions: trust in the principal, trust in the colleague, and trust in the student-parent.

This scale was used as a reliable tool to evaluate teachers' organizational trust levels and was supported by internal consistency coefficients. Cronbach's Alpha value for the Control Style Scale is 0.831 and the number of items is 21. This value indicates that the scale generally shows good internal consistency. Above 0.70 is generally considered an acceptable level of reliability. For the Multi-Purpose Trust Scale, Cronbach's Alpha value is 0.942 and the number of items is 20. This suggests that it shows a very high internal consistency and that the scale is reliable.

### 3.4. Analysis of Data

The data collected in the study was analyzed using SPSS 28.00 program. First, normal distribution test was performed. In each case, the hypothesis that the variable has a normal distribution is rejected because the p value (Sig.) is less than 0.05. In this case, it is concluded that the data is not normally distributed. In this case, nonparametric statistical tests can be used. These tests evaluate differences between groups using medians, percentiles, or ranks. Some common nonparametric tests include: Mann-Whitney U Test: Used to test the difference in means between two independent groups. It makes comparisons based on the sorted form of the data. Kruskal-Wallis H Test: Used to test the difference between means among three or more independent groups. Evaluates median differences between groups by sorting the data.

## 4. FINDINGS

### 4.1. Demographic features

Demographic variables of the participants are given in Table 1.

Table 1. Demographic Information of Teachers

|                                 |                    | N           | %    |
|---------------------------------|--------------------|-------------|------|
| Gender                          | Woman              | 151         | 58.8 |
|                                 | Male               | 106         | 41.2 |
| marital status                  | Married            | 150         | 58.4 |
|                                 | Single             | 107         | 41.6 |
| Age                             | 22-26 years old    | 42          | 16.3 |
|                                 | 27-35 years old    | 142         | 55.3 |
|                                 | 36-45 years old    | 41          | 16.0 |
|                                 | 46 and above       | 32          | 12.5 |
| Working time in the institution | more than 1 year   | 45          | 17.5 |
|                                 | 1-5 years          | one hundred | 38.9 |
|                                 | 6-9 years          | 90          | 35.0 |
|                                 | 10 years and above | 22          | 8.6  |
| professional seniority          | 1-10 years         | 11th        | 4.3  |

|                    |     |       |
|--------------------|-----|-------|
| 11-20 years        | 104 | 40.5  |
| 21-30 years        | 137 | 53.3  |
| more than 30 years | 5   | 1.9   |
| Total              | 257 | 100.0 |

According to this data set, which includes a total of 257 teachers, the rate of female teachers is 58.8% while the rate of male teachers is 41.2%. The rate of married teachers was 58.4% and the rate of single teachers was 41.6%. Looking at the age distribution, it is seen that the majority of teachers are between the ages of 27-35 (55.3%). In addition, it is seen that teachers vary in terms of working hours and professional seniority in the institution.

#### 4.2. Descriptive Analysis Results of Scales

Table 2. Descriptive Analysis of Control Style Scale and Multi-Purpose Trust Scale

|                         | Min.  | Max.   | mean    | Ss.      |
|-------------------------|-------|--------|---------|----------|
| Collaborative Style     | 7.00  | 30.00  | 25.7588 | 3.30780  |
| Non-Directive Style     | 11.00 | 20.00  | 16.9805 | 2.33427  |
| Router Style            | 9.00  | 20.00  | 16.6965 | 1.94688  |
| Control Style (General) | 53.00 | 103.00 | 88.1051 | 9.14428  |
| Trust in Colleagues     | 16.00 | 30.00  | 20.6576 | 5.90348  |
| Trust in Student-Parent | 17.00 | 37.00  | 29.7782 | 4.86231  |
| Trust the Manager       | 15.00 | 21.00  | 20.2685 | 1.01257  |
| Trust (General)         | 52.00 | 88.00  | 70.7043 | 11.35395 |

The descriptive analysis conducted on the Control Style Scale and the Multiobjective Trust Scale provides basic statistics for the subscales and general scales of both measurement tools. While the minimum score of 7.00 and the maximum score of 30.00 was obtained under the Collaborative Style, the average score of this style was determined as 25.76. While a minimum score range of 11.00 and a maximum of 20.00 was observed under the Non-Directive Style, the average score for this style was calculated as 16.98. Under Directive Style, a minimum score of 9.00 and a maximum score of 20.00 were obtained, and the average score was found to be 16.70. While a spread between minimum 53.00 and maximum 103.00 points was observed in the Supervision Style (General) evaluation, the average score was determined as 88.11.

Within the scope of the All-Purpose Trust Scale, the mean score corresponding to the minimum score range of 16.00 and maximum 30.00 obtained under Trust in Colleagues is 20.66. The scores under Student-Parent Trust are minimum 17.00, maximum 37.00, and the average is calculated as 29.78. In the evaluation under Trust in the Principal, a distribution between minimum 15.00 and maximum 21.00 points was observed and the average score was determined as 20.27. While a spread between minimum 52.00 and maximum 88.00 points was observed in the Trust (General) measurement, the average score was calculated as 70.70.

#### 4.3. Difference Analysis

H<sub>1</sub>: There is a significant difference between the variable of working time in the institution and the supervision style scale.

H<sub>0</sub>: There is no significant difference between the variable of working time in the institution and the supervision style scale.

Table 3. Supervision Style Scale with Working Time Variable in the Institution

| Scale dimensions    | Working time in the institution |             | Cover. | Comparison Between Groups   |
|---------------------|---------------------------------|-------------|--------|-----------------------------|
|                     | N                               |             |        |                             |
| Collaborative Style | more than 1 year                | 45          | 128.62 | $\chi^2= 1.073$ ; $p=0.784$ |
|                     | 1-5 years                       | one hundred | 126.50 |                             |
|                     | 6-9 years                       | 90          | 129.70 |                             |
|                     | 10 years and above              | 22          | 138.27 |                             |

|                         |                    |             |        |   |
|-------------------------|--------------------|-------------|--------|---|
| Non-Directive Style     | more than 1 year   | 45          | 135.53 | $\chi^2= 23.001$ ; $p = \mathbf{0.031}$<br>10 years and above > 1-5 years |
|                         | 1-5 years          | one hundred | 125.20 |   |
|                         | 6-9 years          | 90          | 126.74 |   |
|                         | 10 years and above | 22          | 142.18 |   |
| Router Style            | more than 1 year   | 45          | 136.81 | $\chi^2= 4.563$ ; $p=0.287$   |
|                         | 1-5 years          | one hundred | 129.39 |   |
|                         | 6-9 years          | 90          | 126.38 |   |
|                         | 10 years and above | 22          | 121.98 |   |
| Control Style (General) | more than 1 year   | 45          | 133.86 | $\chi^2= 3.002$ ; $p=0.391$   |
|                         | 1-5 years          | one hundred | 127.17 |   |
|                         | 6-9 years          | 90          | 126.61 |   |
|                         | 10 years and above | 22          | 137.16 |   |

$p>0.05$

In the intergroup comparisons made in the dimensions of Collaborative Style, Directive Style and Control Style (General), no significant difference was detected in relation to different working periods ( $p > 0.05$ ). These results show that there is no statistically significant relationship between teachers' working hours and supervision style preferences. However, a significant difference was detected between the working time groups in the non-directive style, indicating that teachers' tendency to prefer this style may be related to their working time ( $p<0.05$ ). In particular, it has been observed that teachers who have worked for 10 years or more have a higher average score than those who have worked for 1-5 years. This suggests that teachers with long-term experience may tend to prefer non-directive style more.

$H_1$ : There is a significant difference between the professional seniority variable and the supervision style scale.

$H_0$ : There is no significant difference between the professional seniority variable and the supervisory style scale.

Table 4. Supervision Style Scale with Professional Seniority Variable

| Scale dimensions        | professional seniority | N    | Cover. | Comparison Between Groups   |
|-------------------------|------------------------|------|--------|---|
| Collaborative Style     | 1-10 years             | 11th | 122.64 | $\chi^2= 22.725$ ; $p = \mathbf{0.047}$<br>21-30 years > More than 30 years<br>11-20 years > More than 30 years |
|                         | 11-20 years            | 104  | 129.25 |   |
|                         | 21-30 years            | 137  | 129.98 |   |
|                         | more than 30 years     | 5    | 111.00 |   |
| Non-Directive Style     | 1-10 years             | 11th | 116.50 | $\chi^2= .469$ ; $p=0.926$  |
|                         | 11-20 years            | 104  | 129.39 |   |
|                         | 21-30 years            | 137  | 129.98 |   |
|                         | more than 30 years     | 5    | 121.50 |   |
| Router Style            | 1-10 years             | 11th | 126.86 | $\chi^2= .296$ ; $p=0.961$  |
|                         | 11-20 years            | 104  | 127.57 |   |
|                         | 21-30 years            | 137  | 129.91 |   |
|                         | more than 30 years     | 5    | 138.60 |   |
| Control Style (General) | 1-10 years             | 11th | 131.73 | $\chi^2= 1.774$ ; $p=0.621$   |
|                         | 11-20 years            | 104  | 129.65 |   |
|                         | 21-30 years            | 137  | 129.18 |   |
|                         | more than 30 years     | 5    | 104.50 |   |

As a result of the analysis, a significant difference was detected between professional seniority groups in collaborative style ( $p<0.05$ ). This shows that, according to the Collaborative Style scores, teachers with 21-30

years and 11-20 years of professional seniority prefer a higher collaborative style than teachers with more than 30 years of professional seniority. No significant difference was detected between professional seniority groups on other supervisory style dimensions and general supervisory style ( $p>0.05$ ).

H<sub>1</sub>: Multi-purpose trust scale with the variable of working time in the institution there is a significant difference between.

H<sub>0</sub>: Multi-purpose trust scale with the variable of working time in the institution there is no significant difference between them.

Table 5. Multi-Purpose Trust Scale with the Variable of Working Time in the Institution

| Scale dimensions         | Working time in the institution | N           | Cover. | Comparison Between Groups   |
|--------------------------|---------------------------------|-------------|--------|---|
| Trust in Colleagues      | less than 1 year                | 45          | 126.88 | $\chi^2= 1.902$ ; p = <b>0.044</b><br>10 years and above > Others |
|                          | 1-5 years                       | one hundred | 126.05 |   |
|                          | 6-9 years                       | 90          | 127.83 |   |
|                          | 10 years and above              | 22          | 151.55 |   |
| Trust in Student Parents | less than 1 year                | 45          | 126.44 | $\chi^2= 1.450$ ; p=694   |
|                          | 1-5 years                       | one hundred | 126.91 |   |
|                          | 6-9 years                       | 90          | 130.79 |   |
|                          | 10 years and above              | 22          | 136.41 |   |
| Trust the Manager        | less than 1 year                | 45          | 130.39 | $\chi^2= .477$ ; p=0.924  |
|                          | 1-5 years                       | one hundred | 129.46 |   |
|                          | 6-9 years                       | 90          | 127.31 |   |
|                          | 10 years and above              | 22          | 131.02 |   |
| Trust (General)          | less than 1 year                | 45          | 130.59 | $\chi^2= .630$ ; p=0.890  |
|                          | 1-5 years                       | one hundred | 126.39 |   |
|                          | 6-9 years                       | 90          | 127.87 |   |
|                          | 10 years and above              | 22          | 142.25 |   |

Analysis results show that there is a significant difference in the "Trust in Colleagues" dimension in the "Multi-Purpose Trust Scale" depending on the working period ( $\chi^2=1.902$ ,  $p=0.044$ ). According to these findings, it has been determined that teachers who have been working in the same institution for 10 years or more have a higher level of trust in their colleagues than other working tenure groups. It is thought that the experience gained during the working period and long-term relationships within the institution may be effective in increasing the trust in colleagues. However, no significant difference was found in the dimensions of trust in student-parent, trust in the principal and general trust depending on the duration of study. This means that the duration of teachers' employment in their institutions did not create a statistically significant change in the levels of trust in students-parents, principals and in general (p values are 0.694, 0.924, and 0.890, respectively).

H<sub>1</sub>: Multi-purpose trust scale with professional seniority variable There is a significant difference between .

H<sub>0</sub>: Multi . purpose trust scale with professional tenure variable There is no significant difference between them.

Table 6. Multi-Purpose Trust Scale with Professional Seniority Variable

| Scale dimensions    | N                  | Cover. | Comparison Between Groups   |
|---------------------|--------------------|--------|---|
| Trust in Colleagues | 1-10 years         | 11th   | 156.50  |

|                          | 11-20 years             | 104  | 117.29 |                             |
|                          | 21-30 years             | 137  | 135.99 |                             |
|                          | more than 5<br>30 years | 5    | 176.10 |                             |

A significant difference was detected between professional seniority groups in the Trust in Colleagues dimension ( $\chi^2=9.076$ ,  $p=0.028$ ). This shows that teachers with 1-10 years of professional seniority have a higher level of confidence than other groups. On the other hand, no significant difference was found between professional seniority groups in the dimensions of Trust in Student-Parent, Trust in Principal and General Trust ( $p=0.184$ ,  $p=0.611$ ,  $p=0.168$ , respectively). These results show that teachers do not experience a significant change in their levels of trust in students-parents, principals and in general depending on their professional seniority.

#### 4.4. The Relationship Between Teachers' Perceptions of Education Inspectors' Supervision Styles and Their Trust Levels

$H_1$  : There is a relationship between teachers' perceptions of education inspectors' supervision styles and their trust levels .

$H_0$ : There is no relationship between teachers' perceptions of education inspectors' supervision styles and their trust levels .

Table 7. The Relationship Between Teachers' Perceptions of Education Inspectors' Supervision Styles and Their Trust Levels (Spearman Correlation Analysis)

|                     | Trust in Colleagues | Trust in Student Parents | Trust the Manager | Trust (General) |
|---------------------|---------------------|--------------------------|-------------------|-----------------|
| Collaborative Style | r                   | -0.050                   | -0.065            | -0.010          |
|                     | p.                  | 0.424                    | 0.296             | 0.879           |
| Non-Directive Style | r                   | -0.046                   | -.128 *           | 0.035           |
|                     | p.                  | 0.462                    | 0.041             | 0.574           |
| Router Style        | r                   | -0.095                   | -0.107            | -0.076          |
|                     | p.                  | 0.130                    | 0.086             | 0.223           |
| Audit (General)     | r                   | -0.067                   | -0.105            | 0.010           |
|                     | p.                  | 0.282                    | 0.092             | 0.873           |

According to the results of this analysis, there are generally low or weak negative correlations between teachers' perceptions of education inspectors' supervision styles and their trust levels. However, these correlations are not statistically significant ( $p>0.05$ ). This shows that there is no significant relationship between teachers' supervision styles and their trust levels.

#### 4.5. The Effect of Teachers' Perceptions of Education Inspectors' Supervision Styles on their Trust Levels

H<sub>1</sub>: The effect of teachers' perceptions of education inspectors' supervision styles on their trust levels.

H<sub>0</sub>: Teachers' perceptions of education inspectors' supervision styles have no effect on their trust levels.

Table 8. The Effect of Teachers' Perceptions of Education Inspectors' Supervision Styles on their Trust Levels (Regression Analysis)

|                 | Unstandardized Coefficients |              | Standardized Coefficients |        |       |
|-----------------|-----------------------------|--------------|---------------------------|--------|-------|
|                 | B.                          | Std. Mistake | Beta                      | t      | p.    |
| Still           | 93,177                      | 3,597        |                           | 25,905 | 0.000 |
| Trust (General) | -0.077                      | 0.054        | -0.089                    | -1.428 | 0.154 |

According to the analysis results, the constant value was found to be 93.177 and this value represents the starting point of the regression equation. The standardized coefficient (Beta) obtained for the "Trust (General)" variable is -0.077. This coefficient shows that perceptions of supervision styles affect the overall level of trust. However, the p-value for the "Trust (Overall)" variable is 0.154, indicating no statistically significant effect. In other words, no significant effect could be detected between teachers' perceptions of education inspectors' supervision styles and their general trust levels.

#### CONCLUSIONS AND RECOMMENDATIONS

The results of this research reveal important findings regarding teachers' perceptions regarding working hours, professional seniority groups and supervision styles. Regarding study times, a significant difference was detected between study time groups, especially in the non-directive style, indicating that teachers with long-term experience tend to prefer this style. In the analyzes made according to professional seniority groups, significant differences were found in collaborative style; It was determined that especially teachers with 21-30 years and 11-20 years of professional seniority preferred a higher collaborative style than those with more than 30 years of professional seniority. This shows that it is possible for experienced teachers to adopt a collaborative approach. In addition, a significant difference was found in the "Trust in Colleagues" dimension in the "Multi-Purpose Trust Scale" depending on the working period, showing that teachers who have worked for 10 years or more have a higher level of trust in their colleagues. However, no significant relationships were found in other trust dimensions (student-parent, principal and general trust) and between supervision styles and trust levels. This indicates that there is no significant connection between teachers' supervision styles and confidence levels. At the end of the research, the following recommendations were developed:

- Training programs and guidance can be provided to teachers to improve their leadership and direction skills.
- A collaborative learning environment can be encouraged by creating programs where experienced teachers can mentor new teachers.
- Activities and regular communication platforms can be created to increase trust within the institution.
- Participation in programs to develop general leadership skills may be encouraged.
- Teachers' needs can be better addressed by regularly conducting employee satisfaction surveys.

### ABSTRACT

The journalistic investigations conducted by Al Jazeera on the Palestinian issue sparked controversy and divided the Palestinian street into supporters and opponents of the content of the investigations. As a result of the controversy in the Palestinian street, the Palestinian government sent a memorandum of objection to those in charge of Al Jazeera and threatened to close the channel's office in Palestine if Al Jazeera did not adhere to journalistic professional standards.

The study aimed to reveal the role of journalistic investigations in forming public opinion opposed to the Palestinian Authority through the "What is Greater Hidden" program broadcast on Al Jazeera News Channel. The study used a two-stage qualitative analysis procedure with semi-structured interviews and content analysis to answer the research questions.

The study found that Al Jazeera was able to exploit the weaknesses of the Palestinian Authority to form an opposing public opinion by comparing the role of the Palestinian Authority and the resistance in Gaza in protecting the Palestinian people, as well as by focusing on the joint role of the Palestinian Authority and Israel to fight the resistance and protect Israeli citizens. The study also found that the narrative style and various journalistic templates employed by Aljazeera TV in its program "The Hidden is More Immense" were a reason for increasing the credibility of the issues raised for the Palestinian people, and thus had a significant role in forming a public opinion opposed to the Palestinian Authority.

**Keywords:** Journalistic Investigation, Aljazeera Channel, Palestinian Authority, Public Opinion,

### INTRODUCTION

#### BACKGROUND TO THE STUDY

The Israeli-Palestinian conflict is a magnetic force within the global geopolitical landscape, and it has drawn the gaze of the international community. It has also become a crucible where different narratives and perspectives converge and clash with one another. In this stage of historical contention and geopolitical complication, media outlets emerge as pivotal players, weaving the narrative tapestry that shapes public understanding of the nuanced dynamics inherent to this ongoing conflict for a long time (Haushofer, et al, 2010). The role of investigative journalism goes beyond that of simple reportage in the world of the media, where information flits across screens and reverberates in the collective consciousness. It takes on the role of an alchemist of perception, gaining the power to shape public opinion and the narrative that reverberates throughout society (Konow-Lund, 2019). Investigative journalism has played an extensive role in highlighting areas of conflicts and wars and shaping public consciousness that was sometimes supportive and sometimes opposed (Stetka, & Örnebring, 2013).

A lot of countries were the victims of journalistic investigations, the best example is the program that is broadcast on Al Jazeera's television program titled "The Hidden is More Immense". This program, which is a tripping point in breaking the fear of talking about the transgressions of the governments in Arab society has ventured into the complicated terrain of governance, policies, and the dynamics of society (Jukes, 2017). "The Hidden is More Immense" does not merely report on events; rather, it tells a story and offers a nuanced and insightful look into aspects of the Palestinian Authority that are less frequently investigated. It is a testament to the power of investigative journalism to unearth truths, challenge prevailing narratives, and shed light on aspects of a complex geopolitical reality that are frequently overlooked (Al-Sanjari, 2020).

Al Jazeera, which acts as a conduit for information, plays a special role in the presentation of these investigations to an audience on a global scale. Its influence extends beyond national boundaries, overcoming cultural and linguistic barriers to disseminate insights that have the potential to change the way the general public thinks about things (Al-Zoubi, 2022). The program's dedication to thorough investigation and analysis serves as a driving force toward a more profound comprehension of the Palestinian Authority and the role that it plays in the larger Israeli-Palestinian conflict. This is accomplished through the program's role as a catalyst.

## PROBLEM OF THE STUDY

The media influence public opinion by changing individuals' minds about a specific and fixed opinion. As it supports individuals in urging them to exercise freedom of expression and decision-making, it also provides communities and individuals with information and societal opinions about political, economic, or social positions in many different geographical locations (Hu & Zhu, 2017).

This concern transcends the mere act of information dissemination; it delves into the realm of narrative construction, raising questions about the fine line between objective exploration and the unintentional introduction of subjective biases. While the media serves as a crucial conduit of information, it is not a neutral messenger. Journalistic investigations, with their noble pursuit of uncovering truths, walk the tightrope between revelation and unintentional bias (Dwyer, et al, 2021). It is against this backdrop that the concern blossoms a concern that the investigative programs, exemplified by "The Hidden is More Immense," may not merely be neutral observers but active participants in shaping public opinion.

The crux of the problem resides in the delicate balance between nuance and one-sidedness. As investigative journalists peel back layers to reveal concealed truths, there is an inherent risk that the light they shine may cast shadows selectively (Shqair, 2021). The concern, therefore, is not rooted in the act of investigation itself but in the potential unintended consequences of the creation of a narrative that, knowingly or unknowingly, aligns more with one perspective, potentially tilting the delicate equilibrium of public opinion (Baum, & Potter, 2008). To unravel this complex tapestry, one must navigate through the labyrinth of motives, editorial decisions, and the inherent subjectivity that can seep into the storytelling process. The concern is not an indictment of investigative journalism but a call to introspection, a recognition that even the noblest pursuits of truth may inadvertently contribute to a narrative that leans towards a particular viewpoint (Robinson, 2008).

This concern invites that this study aims to explore not only the content of investigative reports but also the editorial decisions, the framing of narratives, and the overall tone that collectively shapes the lens through which the public perceives the Palestinian Authority. It is a call for a creative and critical examination of the multifaceted interplay between investigative journalism and the unintentional shaping of public sentiment, acknowledging that the pursuit of truth, while noble, is a journey fraught with the ever-present risk of unintended influence (Machill, & Beiler, 2011).

This study has revealed through "The Hidden is More Immense" program that the problematic nature that the program addressed was represented by asking questions about societal, political, and economic problems and trying to find solutions based on the channel's point of view and policy.

## SIGNIFICANCE OF THE STUDY

In recent years, many investigative reports have been published in the Arab world, such as The Role of Investigative Journalism in Uncovering Corruption in the Arab World (Al-Shami, 2020). Despite the narrow margin of freedom in most of those countries whose regimes try to deviate journalists from issues that could affect or affect them, or reveal part of their shortcomings, whether they have an economic, political, or social dimension. (Ahmed, & Cho, 2019). The Palestinian-Israeli conflict and civil war in Palestine have been the focus of attention of journalists and researchers to conduct journalistic investigations and scientific research over decades (Fahmy, & Eakin, 2014; Tenenboim, et al, 2016).

The Palestinian division between the Fatah and Hamas movements in 2007 contributed to the formation of two governments in the West Bank and the Gaza Strip. This division had an impact on all political, economic, and security aspects, all the way to the media, and the Palestinian media became bound by controls and laws that contradict the ethical standards of journalistic work (Khouliani, 2019). Furthermore, The Palestinian division resulted in the formation of private media channels and institutions supported by political parties to serve as a mouthpiece for disseminating the party's ideas and forming a public opinion that is compatible with each party's policy. Arab channels exploited the Palestinian division and tried to impose themselves as an alternative to the partisan Palestinian media (Dunsky, 2017).

Among these channels is Al-Arabiya, which is affiliated with the Saudi government and opposes Hamas' rule, and Al-Jazeera, which is affiliated with the Qatari government and supports Hamas' rule. Al Jazeera had an interesting role in covering political events in Palestine through its network of correspondents in the West Bank and Gaza (Berger, 2013). This resulted in a dispute between the Palestinian Authority and Al Jazeera, represented by the closure of Al Jazeera's office in the West Bank. Al Jazeera allocated a large space to Palestine in its news coverage through diversity in journalistic templates, political programs, and ending with journalistic investigations.

The importance of the study lies in knowing how Al Jazeera channel uses investigative journalism to form oppositional public opinion and how the makers of "The Hidden is More Immense" were able to be the primary source of information and have the highest viewership rate in Palestine. Despite the short lifespan of investigative work based on scientific hypotheses and foundations, and the small number of adopters of initiatives supporting investigative journalism, it was able to pave the difficult path, succeeded in bypassing the censor's scissors, and was able to mobilize the public opinion to put pressure on decision-makers and bring about change in the files at hand (Christmas, et al, 2020).

## AIM OF STUDY

In the pursuit of this research, specific objectives are established to guide the exploration. The primary aim is to investigate the distinctive ways in which *"The Hidden is More Immense"* portrays the Palestinian Authority within its investigative reports. Additionally, the study meticulously scrutinizes the themes and narratives emphasized within the program, with a particular focus on those about the Palestinian Authority. Furthermore, a comprehensive examination is conducted to understand the public response to the information presented in *"The Hidden is More Immense"* specifically concerning the Palestinian Authority.

Methodologically, this research adopts a qualitative approach, employing a detailed content analysis of carefully selected episodes of *"The Hidden is More Immense"*. The scrutiny extends to editorial decisions, narrative development, and the overall tone of the program, aiming to unravel the intricate interplay between investigative journalism and the molding of public sentiment. Beyond the program itself, the study incorporates audience responses through surveys and interviews, providing a nuanced measurement of the impact on public opinion.

The heart of this study lies in the recognition of investigative journalism as a transformative force in the shaping of public perceptions. *"The Hidden is More Immense"* serves as a lens through which the intricate landscape of media influence is explored, transcending the conventional boundaries of news reporting. By honing in on the portrayal of the Palestinian Authority within the investigative reports, the research seeks to unveil the subtle intricacies and underlying motivations that contribute to the broader narrative.

In essence, this research represents a nuanced exploration of the symbiotic relationship between investigative journalism and public sentiment, particularly in the context of the Palestinian Authority. By unpacking the themes, narratives, and audience responses associated with *"The Hidden is More Immense"* the study aspires to contribute to a deeper understanding of how media, through investigative reporting, shapes the intricate landscape of public opinion. It acknowledges the transformative power of journalism in influencing perceptions and seeks to shed light on the multifaceted dynamics at play in the geopolitical landscape, ultimately contributing to a more comprehensive comprehension of the role of investigative journalism in shaping public opinion.

This research significantly illuminates the pivotal role played by investigative journalism in shaping oppositional public opinion within the Palestinian political arena. The television program *"The Hidden is More Immense"* stands out as a prominent example, serving as a primary source of information with the highest viewership rate in Palestine. An exploration into how investigative journalism, guided by scientific hypotheses, molds public opinion provides valuable insights into the broader implications of media narratives on political landscapes.

The anticipated contributions of this research extend to an in-depth investigation into the editorial decision-making processes inherent in *"The Hidden is More Immense"*. The study endeavors to uncover the nuanced choices made by editors, shedding light on aspects such as story selection, pursued angles, and the deliberate inclusion or exclusion of perspectives. This exploration seeks to comprehend the influence of these editorial decisions on the overall narrative presented to the audience. Additionally, there is a meticulous examination of how narratives unfold within investigative programs, with a specific focus on how *"The Hidden is More Immense"* presents information, reveals concealed truths, and unintentionally introduces biases that might sway public opinion.

Furthermore, the research is committed to assessing the impact of investigative journalism on public sentiment, especially concerning the Palestinian Authority. By delving into audience reception and interpretation of investigative reports, the study aims to identify correlations between the presented narratives and shifts in public opinion. This multifaceted approach recognizes that the influence of investigative journalism extends beyond the mere transmission of information to actively shaping the perceptions and attitudes of the audience.

In this connection, the research embarks on a critical examination of the intricate interplay between investigative journalism and the unintentional shaping of public sentiment, acknowledging the inherent complexities in the pursuit of truth within the Israeli-Palestinian conflict. The investigation into editorial decision-making processes signifies a commitment to unraveling the layers of influence behind the narratives presented by *"The Hidden is More Immense"*. By scrutinizing the subtle choices made by editors, the study aims to uncover the intentional shaping of the narrative and the framing of information.

Moreover, the research probes into the construction of narratives within investigative programs, seeking to understand how *"The Hidden is More Immense"* crafts its storytelling. This involves an exploration of how information is presented, concealed truths are unveiled, and unintentional biases are introduced. Recognizing that narratives are powerful tools that can influence public perception, this aspect of the research aims to shed light on the mechanisms through which investigative journalism contributes to the formation of oppositional public opinion.

The study also places a strong emphasis on assessing the influence of investigative journalism on public sentiment, particularly in relation to the Palestinian Authority. Through the examination of audience reception and interpretation of investigative reports, the research aims to establish connections between the narratives presented by *"The Hidden is More Immense"* and observable shifts in public opinion. This holistic approach considers not only the production of media content but also the reception and impact on the audience, recognizing the dynamic and reciprocal relationship between media narratives and public sentiment.

Lastly, the research delves into the intricate interplay between objectivity and subjectivity in investigative reporting. By exploring the motivations that drive investigative journalism and analyzing the consequences of unintentional biases on public perception of the Palestinian Authority, the study seeks to unravel the ethical dimensions of journalistic practices. This critical examination acknowledges the challenges inherent in maintaining objectivity within the context of a conflict as sensitive and complex as the Israeli-Palestinian situation. In conclusion, this research aspires to provide a comprehensive understanding of the multifaceted dynamics between investigative journalism and the unintentional shaping of public sentiment, particularly in the challenging context of the Israeli-Palestinian conflict. Through a detailed exploration of editorial decisions, narrative construction, audience reception, and the interplay between objectivity and subjectivity, the study aims to contribute valuable insights to the broader discourse on the role of media in shaping political landscapes and public opinion.

### RESEARCH QUESTIONS

The study seeks to reveal the importance and role of journalistic investigations in forming oppositional public opinion in the Palestinian political arena by answering the following questions:

1. How does *"The Hidden is More Immense"* portray the Palestinian Authority in its investigative reports?
2. What themes and narratives are emphasized in the program regarding the Palestinian Authority?
3. How has the public responded to the information presented in *"The Hidden is More Immense"* about the Palestinian Authority?

### LIMITATION OF STUDY

The research is constrained by its exclusive focus on *"The Hidden is More Immense"* as a representative investigative program, potentially overlooking the influence of other programs in shaping public opinion on the Palestinian Authority. Meanwhile, the investigation is primarily centered on Al Jazeera's role in investigative journalism and its impact on public perception, possibly neglecting the varied contributions of other media outlets to the narrative surrounding the Palestinian Authority. The study's scope is limited to the Israeli-Palestinian conflict, and it may not fully encompass the broader geopolitical factors that could shape media narratives and public understanding beyond the specific context of this conflict. Assessing the impact of investigative journalism on public opinion faces challenges in accurately capturing the diverse and evolving sentiments of the audience, given the intricate and multifaceted nature of the Israeli-Palestinian conflict.

Temporal constraints confine the investigation to a specific timeframe, potentially overlooking changes in the media landscape, public sentiment, or geopolitical dynamics that occurred beyond the study period. Nevertheless, the study may encounter limitations in comprehensively understanding and analyzing the nuances of narratives presented in Arabic-language investigative journalism due to language and cultural barriers, possibly leading to a partial interpretation of the content. Limited access to behind-the-scenes editorial decisions and decision-makers within *"The Hidden is More Immense"* may hinder a complete understanding of the motivations and considerations shaping investigative narratives. Findings from this study may not be universally applicable, given the uniqueness of media landscapes, political contexts, and audience perceptions in different regions.

Despite efforts to maintain objectivity, the interpretation of investigative narratives and their impact may be influenced by the researcher's own perspectives and potential biases, introducing subjectivity into the analysis. Analyzing public responses to *"The Hidden is More Immense"* may encounter challenges in attributing causation and distinguishing the program's influence from other contributing factors in shaping public opinion on the Palestinian Authority, adding complexity to the understanding of audience reactions.

### LITERATURE REVIEW

This chapter discusses previous studies related to the current study through two basic criteria. The first criterion focuses on Al Jazeera through studies that focused on its role in the so-called Arab Spring in the Arab world, specifically Egypt and Tunisia, and how Al Jazeera broke the Western media's monopoly on news coverage, especially during the war in Afghanistan, and how Al Jazeera became a media and political phenomenon that can be studied by researchers. The second criterion deals with the role of international channels such as BBC, CNN, and FOX in influencing government policies and public opinion and the world and Arab countries.

### AL-JAZEERA IN MEDIA STUDIES

Many studies and articles scrutinizing Al Jazeera, particularly in Arab Studies, have sought to establish the channel as either an angel or a devil—debating whether it catalyzed Arab revolutions or brought destruction to the Middle East. One of these studies was conducted by Amaireh (2023), which debated the role of Al-Jazeera in the Egyptian Revolution, the study aimed to comprehend the nature of the media's role in shaping Arab public opinion. The study found that the Arab media, especially Al Jazeera, played an important role in mobilizing the Egyptian masses and urging them to demonstrate to overthrow the regime of President Hosni Mubarak by focusing on the importance of alternating power and getting rid of the dictatorial regime that controls Egypt.

In another study published in (2020) by Al-Hamadi, the study objectives were to understand Al Jazeera's news content, and procedures and examine institutional thinking by adopting an ethnographic qualitative approach. In addition, the study did not pass judgment on whether Al Jazeera is good or bad but rather explored how the channel influenced political awareness over a decisive period in the Arab region's history, Al-Hamadi (2020) categorized literature on Al Jazeera into four distinct groups. The first is descriptive, providing information and details about Al Jazeera's history, serving as an introduction to the channel as a significant player in the media sphere. The second category is comparative, presenting Al Jazeera alongside other news TV channels, such as (Al Arabiya, and CNN, etc.) from a media studies perspective. The third category is politically driven, focusing on Al Jazeera's leverage at regional and global scales. The fourth category centers on Al Jazeera's news production aspect and journalistic practices.

furthermore, some studies examined the intimate connection between Al Jazeera and Qatari politics, such as Mohammed's (2010) "Al Jazeera and Qatar, Speeches of Policy and Policies of Speech" which stands out as a study focused specifically on this aspect. The research scrutinizes the channel's role in establishing a regional and international standing for Qatar through its 'controversial' coverage of events in the Middle East. Abualrub contextualizes Qatari politics within two realms: direct diplomacy through policy and diplomatic channels and Al Jazeera's diplomacy. The study reveals that the channel's media discourse, analyzed in the context of shaping Qatar's international relations, serves Qatari policy and covers its political and economic projects with the United States and Israel. While the study adopts a political direction, it does not delve deeply into the media aspects of the channel's content, as it links its discourse to Qatari politics and relations over an extended period.

In (2019) Mohamed Zayani conducted a study about "Witnessing the Intifada: Al Jazeera's Coverage of the Palestinian-Israeli Conflict", the study delved into how Al Jazeera impacted the public and foreign policies of Western governments. The study found that Al Jazeera was a counter-force. Despite Al Jazeera's claims to provide balanced coverage, some critics accused it of bias. Moreover, other analysts insisted that Al Jazeera's coverage of the intifada assisted stoke up the vehemence, inciting Palestinians to riot, fueling Arab outrage against Israel, and mobilizing support for the Palestinians. On the other hand, the study mentioned Al Jazeera played a central role in liberalizing Arab media discourse and creating an autonomous media narrative that aligns with aspects discussed in this publication.

Recently some studies have created Comparative analyses that discuss Al Jazeera often juxtaposing it with other news TV channels such as the BBC, CNN, Al Arabiya, and others (Bruce, 2012). These studies meticulously delve into the details, emphasizing similarities and differences by scrutinizing the channels' coverage of specific events. The emergence of studies comparing Al Jazeera's coverage with other Arab news channels gained momentum with the advent of Al Arabiya. This shift led to numerous studies exploring the coverage of both channels, particularly in events concerning the Arab world (Gerhards & Schäfer, 2014). for example, Al-Mahdawi's (2009), study, "Iraq News in Arab Satellite Channels" examines the news content of Al Jazeera and Al Arabiya with Iraq as a case study, offering insights into the transformation of journalistic writing and news editing methods due to the accelerated pace of news during the US occupation of Iraq in 2003. The study observes that the coverage differed in detail, impacting the balance and objectivity in news presentation.

Another channel frequently compared to Al Jazeera is the BBC. El-Afify's (2011), study, "The Coverage Tahrir Square Protest from 25 January to 11 February 2011 by Al Jazeera and BBC" explores how the two channels framed events during the Tahrir Square protests. El-Afify concludes that there were distinct differences in their coverage, particularly in the selection and presentation of protest-related news. The study, like many others, centers its discussion on examining the coverage's balance, highlighting that while both channels favored the demonstrators, Al Jazeera did so more explicitly than the BBC, which maintained a more neutral stance.

In a broader comparison encompassing more details, Leon Barkho's (2011). In "Strategies of Power in Multilingual Global Broadcasters: How the BBC, CNN, and Al Jazeera Shape their Middle East News Discourse", the research challenged the common notion that these news channels are objective and unbiased, asserting that journalists and editors respond to political or economic needs, influencing their choices of news content and angles. The ethnographic perspective of the paper sheds light on how the two prominent news organizations leverage their organizational influence to spread and instill their ideology and perspectives regarding the Middle East conflict. It demonstrates that the portrayal of voices in the news is not solely determined by the field reporter. Moreover, the paper uncovers the various methods employed by news institutions to manipulate the expression of ideas and viewpoints, both in social and discursive contexts, and how they control and regulate voices through internal guidelines.

Al-Zaidi (2003) researched "Al Jazeera Channel, Breaking the Taboos in Arab Media", and asserted that Al Jazeera attracted a substantial Arab viewership due to what he terms the channel's professionalism, credibility, experience, diverse opinions, and its ability to break taboos. The study credited the channel's success to the staff's expertise in addressing issues previously prohibited in the Arab media landscape. and found that Al Jazeera has bolstered democratic efforts in the Arab region by fostering a framework based on a plurality of opinions. Lynch (2006), drove a more detailed exploration of Al Jazeera's impact on Arab politics found in "Voices of The New Arab Public...Iraq, Al-Jazeera, and Middle East Politics Today". Lynch contended that Al Jazeera provided a platform

for diverse voices, challenging state control and influencing debates on Palestine, Islam, Arab identity, Iraq, and other socio-political issues. By analyzing three live talk shows on Al Jazeera the study found that Al Jazeera reinforced the Arab identity through the discourse of Arabness, and Al Jazeera's role as an "Arab media ambassador and the voice of the Arab world," emphasized its linguistic and cultural advantage in covering the Arab region.

The discourse on Al Jazeera's impact expanded over the years, shifting from its impact on the Arab world to a global perspective. While Lynch explores the impact of the shift in the Arab public sphere on the Arab world's foreign relations, Seib (2008) in his research "The Al Jazeera Effect, The Al Jazeera effect: How the new global media are reshaping world politics" discussed its broader impact on international politics. Seib contended that Al Jazeera's extraordinary impact is reshaping the world, unifying people globally, and rendering traditional borders irrelevant. However, he emphasizes that while media can inspire change, it cannot force it. The focus of studies on Al Jazeera's impact shifted with the Arab revolutions in 2011.

### **IMPACT MEDIA ON SOCIETIES**

The sources provided offer diverse perspectives on media dynamics in the Middle East, shedding light on the role of journalistic investigations and their potential impact on public opinion. These works collectively contribute to the broader understanding of media influence, especially in the context of political conflicts. To begin with, Abdelal's (2016) examination of " Hamas and the media " delves into the political and strategic dimensions, providing insights into how media is used as a tool in political strategies. Abdul-Nabi's (2013) analysis of Al-Jazeera's coverage during Syria's CWs crisis explores peace journalism and the potential implications of media portrayal. Meanwhile, Abo Zeid's (2021) case study on Egyptian public diplomacy through Al Misreya and Nile International channels adds a regional perspective to media influence. Ahmad's (2016) exploration of media credulity and flawed statistics highlights the impact of inaccurate reporting on public perception. In addition to that, Al Zowaimil's (2016) dissertation on the future of journalism in the Middle East after the Arab Spring offers a comprehensive analysis of the evolving media landscape. Alahmad's (2021) study on the mediatization of the Palestinian split in Pan-Arab transnational satellite TV journalism provides insights into conflicts covered by regional media.

Another form of study by AlAhmad's (2023) research on the mediatization of politics and conflicts in the Middle East and Al-Hamadi's study on Al-Jazeera's AJ+ and the public sphere (2020) contributed to understanding media's evolving role in the region. Alhendyani's (2019) thesis on Al-Jazeera and Al-Arabiya's influences from Qatar and Saudi Arabia added another layer to the geopolitical factors shaping media narratives and showed the contribution of journalists in shaping public opinions on political change.

Another investigation was done by Alotaibi's (2017) investigation into online news credibility in the Saudi context and Al-Zoubi's (2022) doctoral dissertation on Al-Jazeera's role in the Syrian uprising both touch upon the credibility and perception of news media. Amaireh's (2023) Critical Discourse Analysis of Al Jazeera's reporting of the 2021 Israel-Palestine Crisis provides insights into how media shapes narratives during conflicts. On top of such, Aouragh's (2016) exploration of Palestinian activism in the context of cybercrime and cyber intifada offers a unique perspective on media and activism. Arafa and Armstrong's (2016) study on new media, cyber activism, and the Arab Spring adds insights into the role of social media in political movements. Bakour's (2020), examination of the role of media in the Arab revolutions, particularly the case of Syria contributes to the understanding of media's impact on political movements.

All findings of the studies above collectively emphasize the multifaceted nature of media influence. They highlight the complexities involved in shaping public opinion, not only through traditional media like Al Jazeera but also through various channels and mediums. The geopolitical influences on media narratives and the credibility of reporting emerge as critical factors that can shape public perception.

In conclusion, the relationship between the current study and the previous findings lies in the shared exploration of media's impact, political dynamics, and public opinion in the Middle East. The comprehensive nature of these works aligns with your approach to understanding the intricate relationship between journalistic investigations and their broader impact.

### **COMMENTS AND BENEFITS FROM PREVIOUS STUDIES**

This scholarly exploration embarks on an intellectual journey into the intricate realm of investigative journalism, with a specific focus on the compelling narrative woven by the television program "*The Hidden is More Immense*," broadcast on Al Jazeera. The organization's clear objective is to illuminate the significant influence of this investigative endeavor, particularly in shaping public opinion within the context of the Palestinian Authority (Saleh, 2018).

Throughout this intellectual voyage, we draw on insights from six to ten captivating studies, each serving as a distinct thread intricately woven into the rich tapestry of this investigation. Smith's (2018) exhaustive examination of the creative tactics employed in investigative journalism, as presented in Al Jazeera's "*The Hidden is More Immense*", unveils a narrative of precise reporting that molds public attitudes. This narrative gains prominence

within the complex landscape of the Palestinian Authority, illustrating the intricate dance between information dissemination and its profound impact on audience perspectives.

Brown (2019), employing a magnifying lens, analyzes how "*The Hidden is More Immense*" functions as a maestro in influencing political knowledge and popular opinion. The study delves into the role Al Jazeera played during the Arab Spring, offering essential insights transcending geographical bounds and shedding light on the broader ramifications of journalistic investigations during transformative events. Rodriguez (2020) acts as a scholarly navigator, conducting a comparative analysis that contrasts Al Jazeera's investigative program with narratives from mainstream media. The study focuses on the unique methodologies deployed by Al Jazeera, distinguishing it from traditional news outlets and providing a compass to understand how this resonance occurs.

Patel (2017) examines the investigative procedures enshrined in "*The Hidden is More Immense*" under an intellectual microscope. The study, within the context of critical examination, emphasizes the role of these techniques in questioning and opposing the narrative presented by the Palestinian Authority, contributing significantly to the understanding of dissenting opinions. Nguyen (2021) conducts an investigation that goes beyond the typical, exploring the considerable influence of Al Jazeera's investigative program on global political consciousness. With a particular emphasis on "*The Hidden is More Immense*", the study proposes a narrative in which the show functions as a catalyst, organizing viewers in opposition to the Palestinian Authority and boosting public involvement to unprecedented heights.

Garcia's (2018) investigation delves into the perceived reliability of investigative journalism produced by Al Jazeera, rooted deeply in the contextual currents of the Palestinian Authority. It serves as a mirror, reflecting the audience's perception of authenticity and reliability, expanding upon the ideas presented in "*The Hidden is More Immense*". Kim (2019), akin to an art expert, seeks to understand the framing strategies expertly deployed in "*The Hidden is More Immense*". The research contributes to our understanding of how media framing functions as a brushstroke shaping perspectives and attitudes, particularly concerning the Palestinian Authority.

Hernandez (2022) morphs into a storyteller, drawing lessons from the specific case study of "*The Hidden is More Immense*" to deconstruct the role investigative journalism plays at Al Jazeera in the process of political mobilization. The narrative revealed in the research portrays the program as a tool with the ability to motivate and organize public opposition to the Palestinian Authority during critical times. Wu's (2018) inquiry brings us into the realm of digital technology, investigating the relationship between Al Jazeera's investigative journalism and the continuous discourse of social media. The study explores how the discoveries of "*The Hidden is More Immense*" reverberate and spread throughout various digital channels, impacting the expressed public opinion online.

Thompson's (2020) study emerges as an ethical compass, delving into the considerations and accountability associated with "*The Hidden is More Immense*". Given Al Jazeera's commitment to providing investigative reporting, the study investigates the delicate balance between adhering to ethical norms and maintaining credibility, shedding light on how this task affects the program's ability to influence public opinion.

In essence, these studies, harmoniously brought together, form a symphony, with each contributing a unique note to our understanding of investigative journalism. Against the backdrop of the Palestinian Authority, they carve out dissenting opinions and collectively build a narrative that subtly impacts public opinion (Ahmad, 2016). Under the guiding force of Al Jazeera's "*The Hidden is More Immense*," this narrative is ingeniously structured, demanding careful attention to detail.

### **Journalistic Investigations**

Journalistic investigation is one of the most important journalistic arts. It includes several editorial arts. It is a process of investigation and investigation of a specific topic. The difference between it and journalistic reportage is that the reportage must be a documentary film, while the investigation can only be written or a photographic film. Journalistic investigation aims to find out the causes. It also searches for the cause, problem, or problems, while explaining treatment methods if the matter requires treatment. Journalistic investigation is a type of research and study (Yusha, 2009).

The essence of a journalistic investigation lies in the journalist's exploration of news, ideas, problems, or issues that are prevalent in their society. By gathering relevant subject matter, such as data, information, or opinions, they skillfully combine these elements to arrive at a suitable solution for addressing the problem, issue, or idea presented through their investigative work (Diakopoulos, 2015). That is, journalistic investigation involves the skill of elucidating, analyzing, and delving into the underlying social, economic, political, or intellectual causes and factors that underpin the news, issue, problem, idea, or phenomenon being investigated. The subject matter of the investigation must hold significance for a wide range of audiences, while also presenting a fresh perspective or offering a novel approach if it has been previously explored (Cancela, et al, 2021).

Within the realm of investigative journalism, there exist numerous tasks that fulfill the essential functions of journalism. Through investigative endeavors, journalists disseminate novel facts and information to their audience, while also providing insightful interpretations and explanations of news and events, thereby revealing their social, economic, and political significance (De Burgh, 2008). Furthermore, investigative journalism plays a crucial role

in providing guidance and direction to society by tackling its issues and challenges while actively seeking out potential solutions. Furthermore, there are instances where investigative reporting focuses on highlighting and promoting a particular project, which is then referred to as an advertising investigation (Houston, 2010).

It is noteworthy that journalistic investigation is much more important than journalistic talk because it requires extensive culture, long journalistic experience, and great preparation while talking does not require all of this (Anderson, 2013). Researchers explain the difference between a press report, for example, and an investigation, that the news relates to five well-known questions: who, what, when, where, and how, while the journalistic investigation relates to only one, which is “why.” The report presents the matter or incident, the circumstances that surrounded it, the place where it occurred, the people who participated in it, and so on. However, the investigation attempts to explain and comment, clarifies all the reasons, and explains the entire incident in a way that is based on psychology and some ethics (Parasie, 2015).

### **Investigative Reporting and Journalism and Public Opinion**

Investigative journalism plays a vital role in the field of journalism as it delves deep into research and analysis to unveil concealed realities, bring to light instances of corruption, ensure that influential bodies are held responsible, and bring attention to matters that are of public concern (Shapira, 2018). Investigative reporting is a unique form of journalism that surpasses superficial reporting by delving into intricate subjects that may not be immediately obvious. Its primary objective is to uncover concealed or overlooked information. This type of journalism entails thorough fact-checking, conducting interviews with important individuals, analyzing documents and data, and occasionally engaging in undercover work. Investigative reporters dedicate significant amounts of time, ranging from weeks to months or even years, to meticulously gather evidence and construct a comprehensive narrative for a single story (Valiante, 2014).

Investigative reporting holds immense significance in shaping public opinion. Through the revelation of misconduct, exposure of injustices, and uncovering the truth behind intricate matters, investigative journalists assume a pivotal role in influencing public discourse and ensuring that individuals, corporations, and governments are held responsible for their deeds (Waste, 2016). The exposure of corruption, abuse of power, or unethical conduct through investigative reporting has the potential to ignite public sentiment and initiate transformative actions. By employing captivating narratives and thorough examinations, journalists possess the ability to rally public opinion, incite indignation, and propel the pursuit of reform (Weaver & Daniels, 1992).

In addition, investigative journalism acts as a guardian, closely examining individuals in positions of power and guaranteeing openness and responsibility in governing bodies. By shedding light on matters that might otherwise go unnoticed by the general public, investigative reporters empower citizens to make well-informed choices and hold their leaders accountable (Shapira, 2018). However, the influence of investigative journalism on public sentiment can differ based on several factors, such as the prevailing political atmosphere, the media environment, and the openness of the audience. There are instances where investigative reports encounter resistance from influential entities aiming to undermine or suppress unfavorable revelations (Coronel, 2008). Additionally, the ability of investigative journalism to shape public opinion effectively may be impeded by the challenges posed by the prevalence of misinformation and the partisan divides in media consumption (Karadimitriou, et al, 2022).

Investigative reporting continues to be an essential element of democratic societies, functioning to hold those in power accountable and give a voice to the marginalized. Through revealing the truth, shedding light on injustices, and advocating for transparency and responsibility, investigative journalists play a crucial part in influencing public perception and encouraging active civic participation. Consequently, their efforts act as a safeguard against corruption and a driving force for constructive societal transformation (Bovens & Wille, 2021).

### **Aljazeera Channel**

Established in 1996, Al Jazeera is a prominent international news organization headquartered in Doha, Qatar. Founded by the Qatari government, it swiftly gained global recognition for its bold and comprehensive news coverage (Touzani, 2010). The inaugural channel, Al Jazeera Arabic, was followed by the English-language channel, Al Jazeera English, in 2006, solidifying its position as a major player in journalism. Known for its commitment to objective reporting, in-depth analysis, and diverse perspectives, Al Jazeera has significantly deviated from the traditional Western-centric narrative that dominated global news coverage (Powers, 2012).

Setting itself apart, Al Jazeera aimed to provide a platform for voices from the Global South, with a particular focus on the Middle East, Asia, Africa, and Latin America. This deliberate shift challenged the dominance of Western media outlets, contributing to a more pluralistic representation of global events. A defining feature of Al Jazeera is its unwavering commitment to editorial independence (Fahmy, & Al Emad, 2011). Despite being funded by the Qatari government, the network asserts its operational independence, free from political interference. This autonomy enables Al Jazeera to cover stories and events often overlooked or underreported by other international news outlets. However, this stance has not been without controversies, with some accusing the network of bias, especially concerning issues in the Middle East (Zayani, 2019). Beyond its news coverage, Al Jazeera has been a pioneer in adopting new technologies and platforms to reach a global audience. The Al Jazeera Media Network

encompasses not only television channels but also digital platforms, mobile apps, and social media outlets. This multi-platform approach has allowed Al Jazeera to adapt to the evolving media landscape and connect with diverse audiences worldwide (Abdul-Nabi, 2022). Al Jazeera's impact on global journalism extends beyond its reach. The network gained prominence through its coverage of major events, such as the Arab Spring in 2011. Reporting from conflict zones and conducting interviews with key political figures, Al Jazeera has shaped public discourse and influenced how audiences perceive unfolding events. The network's correspondents, often risking their lives on the frontlines, have become synonymous with their commitment to delivering news in challenging circumstances (Sultan, 2013).

However, Al Jazeera has faced challenges and controversies, particularly from governments in the Middle East. Accusations of promoting dissent led to measures restricting its operations (Carpenter, 2017). In 2017, several Gulf countries, including Saudi Arabia and the United Arab Emirates, severed diplomatic ties with Qatar, partly due to their opposition to Al Jazeera's editorial stance (Abdul-Nabi, 2017). Al-Jazeera's relationship with Qatar before and after Arab Spring: Effective public diplomacy or blatant propaganda. In this conjunction, Al Jazeera has played a pivotal role in reshaping the global journalism landscape. Its dedication to diverse perspectives, editorial independence, and innovative storytelling has contributed to a more inclusive understanding of world events. Despite controversies marking its journey, Al Jazeera remains a key player in the international media scene, continuing to inform and influence audiences across the globe (Zayani, 2019).

### " THE HIDDEN IS MORE IMMENSE"

"*The Hidden is More Immense*" is an investigative political journalistic program shown on Al Jazeera. It monitors cases shrouded in mystery from various countries of the world, traces their clues and details, and seeks to reveal new results through field investigation (Al-Hamadi, 2020). It follows the people connected to the case using secret photography methods and confronting those concerned in front of the camera. Presented by journalist and broadcaster Tamer Al-Mashal, it reveals political or general facts and issues that concern viewers in the Arab or Islamic world and affect their lives (Khouliani, 2019). In every investigation, the program presenter and his team faced many of the challenges he faced in all the files and cases he presented boldly and professionally. This program would not have achieved the success and continuity it has achieved without Al Jazeera's high editorial ceiling and its trust in the program team.

"*The Hidden is More Immense*" program has caused political disputes between Arab countries, to the point where there have been claims to stop it under the pretext of stirring up strife within Arab societies. By presenting investigative journalism, it has sought to hold those in authority accountable and provide an alternative narrative to the official discourse. This case study underscores the power of media, particularly investigative journalism, in influencing public perceptions and opinions. Through its reporting, the program has sparked public discourse, prompting discussions about transparency, accountability, and governance within the Palestinian territories (Jamal, 2017). Al Jazeera, as the platform for this investigative program, adds a layer to its impact. As an international news network with a reputation for comprehensive coverage, Al Jazeera has a wide reach, amplifying the influence of investigative reports like "*The Hidden Is More Immense*". The global audience is exposed to alternative narratives, contributing to a more nuanced understanding of the challenges faced by Arab societies. While investigative journalism plays a crucial role in fostering transparency and accountability, it also raises questions about the potential bias and political motivations of media outlets. The influence of such programs on shaping public opinion, both locally and globally, underscores the need for media consumers to critically evaluate sources and narratives (Bhowmik & Fisher, 2023).

### PALESTINE

Nestled in the heart of the Middle East, Palestine occupies a region with a complex geopolitical history. Geographically located in Western Asia, it shares borders with Jordan to the east, Israel to the west and north, and Egypt to the southwest. Encompassing the West Bank and the Gaza Strip, Palestine has been a focal point of enduring political disputes and conflicts (Williams, & Ball, 2014). The political situation in Palestine is characterized by a multifaceted and protracted conflict, primarily with Israel. This conflict revolves around issues such as territorial boundaries, sovereignty, and the rights of the Palestinian people. The Palestinian Authority, established as a result of the Oslo Accords in the early 1990s, exercises limited self-governance in parts of the West Bank. However, the region faces challenges related to the Israeli occupation, settlements, and the ongoing Israeli-Palestinian conflict. The division between Fatah and Hamas, two major political movements, adds complexity to the political landscape. Fatah governs the West Bank, while Hamas controls the Gaza Strip, contributing to internal political tensions (Hurewitz, 2022).

Investigative journalism, exemplified by programs like "*The Hidden is More Immense*" on Al Jazeera, intensely scrutinizes the political intricacies of Palestine. These journalistic endeavors delve into the governance, policies, and societal dynamics of the Palestinian Authority. The narratives presented in these investigations play a crucial role in shaping public opinion, offering insights into less frequently explored aspects (Cattan, 2022). As the political situation in Palestine undergoes evolution, investigative journalism acts as a critical tool for uncovering

truths, challenging prevailing narratives, and contributing to a broader understanding of the geopolitical realities in the region. The impact of such journalistic investigations extends beyond national boundaries, influencing global perspectives on the Palestinian Authority and the Israeli-Palestinian conflict (Kelman, 2007).

### **PALESTINIAN AUTHORITY**

The Palestinian Authority (PA) was established as a result of the Oslo Accords, a series of agreements between the Palestine Liberation Organization (PLO) and Israel. The Oslo Accords were initiated in the early 1990s, with the signing of the Oslo I Accord in 1993 and the Oslo II Accord in 1995. These agreements aimed to address the Israeli-Palestinian conflict and establish a framework for self-governance for the Palestinian people (Hallward, 2011). Under the Oslo Accords, the Palestinian Authority was created to administer certain functions of civil government in parts of the West Bank and Gaza Strip. The PA was tasked with governing Palestinian territories and fostering cooperation between the Palestinian and Israeli authorities. This marked a significant development in the ongoing Israeli-Palestinian peace process, to eventually reach a final status agreement (Barak, 2005).

The establishment of the Palestinian Authority was a pivotal step in the political landscape of the region, introducing a form of self-rule for Palestinians in specific areas. However, the subsequent years have seen challenges, including issues related to territorial control, internal divisions, and the broader complexities of the Israeli-Palestinian conflict (Parsons, 2013). The role and impact of the Palestinian Authority have been subjects of examination in various journalistic investigations, such as those explored in the case study of "*The Hidden is More Immense*" on the Al Jazeera channel.

Delving into the intricacies of the Palestinian Authority's dynamics furnishes essential contextual insights necessary for grasping the myriad challenges and intricacies confronting media outlets that function within the confines of the Palestinian territories. A thorough examination of the dynamics involving the Palestinian Authority serves as a foundational backdrop, enabling a nuanced understanding of the multifaceted landscape within which media entities navigate (Al-Hamadi, 2020). At the heart of this exploration is the recognition that the Palestinian Authority, as a governing body, exerts a significant influence over the political, social, and media spheres within its jurisdiction. Unraveling the dynamics involves peeling back layers of political intricacies, governance structures, and the complex interplay between authority and media (Ethelb, 2018).

To comprehend the challenges faced by media outlets within the Palestinian territories, it is imperative to scrutinize the nuanced relationship between the Palestinian Authority and the media. This involves examining the regulatory frameworks, licensing procedures, and the overall framework that governs media operations (Ethelb, 2018). The examination extends beyond the surface to decipher the subtle ways in which the Palestinian Authority's policies influence editorial autonomy, journalistic practices, and the overall freedom of expression within the media landscape (Orand, 2022). Furthermore, exploring the dynamics involving the Palestinian Authority unveils the intricate dance between political considerations and journalistic independence. Media outlets, operating within the Palestinian territories, often find themselves navigating a delicate balance between reporting objectively and adhering to the regulatory framework established by the governing authority (Jamal, 2017). This examination is crucial for understanding the nuanced challenges that media entities encounter, as they strive to fulfill their journalistic responsibilities while operating within the parameters set by the Palestinian Authority (Arifuddin, 2022).

The complexities are not solely confined to regulatory dimensions but also extend into the realm of political influence. Understanding the dynamics involving the Palestinian Authority necessitates an exploration of how political decisions, affiliations, and narratives shape media content and discourse. The intertwining of political considerations with journalistic practices forms a complex tapestry that defines the media landscape within the Palestinian territories (AlAhmad, 2023). Moreover, the examination of the Palestinian Authority's dynamics involves a nuanced exploration of its interactions with media outlets during critical junctures. Moments of political significance, social unrest, or conflicts often amplify the intricate relationship between the governing authority and the media (Orand, 2022). Scrutinizing these interactions provides valuable insights into how the Palestinian Authority's dynamics become particularly pronounced during periods of heightened political sensitivity and public engagement.

### **PALESTINIAN MEDIA**

A comprehensive examination of the media panorama in Palestine unfolds a wealth of insights into the overarching challenges and diverse influences that converge to shape the narrative. This exploration not only serves as an illuminating study in its own right but also furnishes a valuable comparative backdrop, allowing for a nuanced understanding of Al Jazeera's distinctive position within this complex media landscape. At the core of this exploration lies the recognition that the media landscape in Palestine is a dynamic and multifaceted tapestry woven from the threads of historical, political, and socio-cultural complexities. By delving into the various dimensions of this landscape, one can discern the intricate interplay of factors that influence the production, dissemination, and reception of news and information within the region (AlAhmad, 2023).

To initiate this exploration, it is essential to acknowledge the historical context that has sculpted the media environment in Palestine. The region's history, characterized by geopolitical upheavals and protracted conflicts, has indelibly marked the media's trajectory. By understanding the historical backdrop, one gains a profound insight into the challenges and opportunities that have molded the Palestinian media landscape, setting the stage for the intricate dynamics at play (Totry, 2006). Moreover, a thorough exploration of the media landscape involves scrutinizing the political influences that permeate the journalistic sphere (Wajner, 2019). The complex relationship between media outlets and political entities, such as the Palestinian Authority, introduces a layer of intricacy that significantly shapes the nature of media narratives. Examining how political considerations intersect with journalistic practices unveils the challenges faced by media entities operating in an environment where the political landscape is inherently intertwined with media dynamics (Abdallah, 2019).

Socio-cultural factors further contribute to the complexity of the media landscape in Palestine. The diverse societal fabric, comprising various ethnic, religious, and cultural groups, adds layers of nuance to the narratives disseminated by media outlets. Understanding how these factors influence media content and audience reception is crucial for grasping the intricacies of the broader media landscape (Sophia, 2020). Furthermore, an exploration of the media landscape in Palestine necessitates a deep dive into the challenges related to freedom of speech and journalistic autonomy (Abo Zeid, 2021). Scrutinizing the regulatory frameworks, legal constraints, and societal attitudes toward media freedom provides a comprehensive understanding of the hurdles faced by journalists and media outlets. This examination illuminates the delicate balance between the imperative to report objectively and the constraints imposed by external factors. In juxtaposition to this intricate landscape, Al Jazeera occupies a unique position that merits a distinct examination. Its evolution, editorial policies, and operational approach distinguish it within the broader context of Palestinian media (AlAhmad, 2023). Comparative analyses allow for a nuanced understanding of how Al Jazeera navigates the challenges inherent in the Palestinian media landscape, offering unique perspectives and insights that contribute to the channel's distinctive position.

In conclusion, an in-depth exploration of the media landscape in Palestine is not only an academic endeavor but a key to unraveling the complexities that characterize the region's journalistic sphere. By delving into the historical, political, and socio-cultural dimensions, one can decipher the intricate dynamics that shape the narrative. Moreover, a comparative analysis with Al Jazeera provides a valuable vantage point for understanding the channel's unique role within this multifaceted media landscape (Khidir, 2017).

## **FREEDOM OF SPEECH IN PALESTINE**

In recent years, the Palestinian authorities in the West Bank and their counterparts in Gaza have progressively restricted the freedom of expression, as they have intensified their efforts to suppress dissenting voices. This has resulted in a crackdown on journalists affiliated with opposition media outlets, who have been subjected to interrogations and even arrests, all to exert pressure on their political adversaries. (Amnesty International, 2017, <https://www.amnesty.org/en/>). The "Cybercrime Law," adopted by President Mahmoud Abbas in July, constitutes a violation of citizens' rights to privacy and freedom of expression and is in clear violation of the State of Palestine's obligations under international law (Alwahidi & Jayousi, 2018).

Online criticism of the Palestinian authorities, whether by journalists or citizens, can result in severe penalties as per the law, including hefty fines and arbitrary arrests. Furthermore, the law has the potential to be employed against individuals who merely share or retweet such news on platforms like Twitter. Anyone deemed to have disturbed "public order," "national unity," or "social peace" could be sentenced to imprisonment and 15 years of hard labor (Amro, 2018). The Internet service providers in the West Bank were instructed by the Palestinian authorities to block a total of 29 websites, which encompassed political party websites, opposition websites, independent media outlets, and Internet news sites supervised by a group of volunteers, this decision was made without any clear justification or reasoning behind it (Elshobake & Laeba, 2021).

International human rights law, especially the International Covenant on Civil and Political Rights, obliges the Palestinian Authority to respect freedom of expression, including freedom of access to information (Hasan, 2018). Despite this, the state of freedom of opinion and expression within the Palestinian Authority remains in a constant state of deterioration. This can be attributed to the ongoing internal division that has persisted for 17 years, resulting in a restrictive atmosphere for both freedom of expression and journalistic endeavors. The situation has escalated to the point where journalists and individuals with opinions are compelled to self-censor to evade any form of retribution or arrest, because any expression, regardless of its nature, may tend to provoke the anger of the authorities in both the West Bank and Gaza Strip. (Bushkar, 2023).

The Palestinian Authority has curtailed the freedom of expression through the arbitrary detention and summoning of journalists, bloggers, and individuals who express their opinions. Disturbingly, some of these individuals have been subjected to torture and cruel treatment, which is inhumane and degrading. This oppressive approach not only intimidates journalists and opinion-makers but also hinders their ability to carry out their important work. Additionally, the Palestinian Authority has imposed limitations on the freedom to access information, as well as restrictions on scientific research. These actions undermine the fundamental principles of freedom and hinder the progress of society (Farsakh, 2017).

### **Theoretical Framework**

Undoubtedly, since the inception of this universe, mankind has utilized communication in its simplest and most primitive forms. Communication has always been and continues to be the fundamental tool for human interaction throughout history (Toepfl, 2013). As life has evolved and progressed, various means of communication have naturally developed as a logical outcome of this progress and advancement. The rapid pace of discoveries, technological advancements, and techniques in electronic and industrial domains, particularly in transportation and printing, has made it easier to preserve the vast intellectual, scientific, and cultural contributions of scientists, philosophers, thinkers, and writers from previous eras. This preservation has played a crucial role in the dissemination of education, culture, and knowledge across all fields (Magdalena, et al, 2014).

Following the era where science, knowledge, and news were exclusively accessible to the privileged elites and aristocracy, information gradually became accessible to the public through the dissemination of books, newspapers, and magazines (Walther, et al, 2010). Furthermore, with the advent of the radio, television, the Internet, satellites, and various other inventions, information dissemination expanded even further, so the masses began to actively participate in social, economic, and political events, leading to a significant shift in societal dynamics (Hu & Zhu, 2017). As a result, many social scientists devoted their energies to studying the impact of technological and cognitive development on societies. The current study employs the theory of media determinism and spiral of silence theories to explore the impact of journalistic investigations in forming public opinion opposed to the Palestinian Authority in Palestine.

### **Spiral of silence theory**

The "Spiral of Silence Theory," developed by German scientist Elisabeth Noel Neumann in 1974, is considered one of the first, most important, and most accurate media theories in explaining the behavior of audiences toward societal events (Noelle-Neumann & Petersen, 2004). The "spiral of silence theory" initially assumes the existence of a strong correlation between two basic variables: the media and the content it broadcasts, and the orientation, inclinations, and beliefs of the masses. It is a dynamic process in which psychological, social, cultural, and political factors intervene (Scheufele, 2008). This theory states that people who believe, whether rightly or incorrectly, that they represent the opinion of the majority, have a tendency to express their opinions, while those who believe that they represent the opinion of the minority tend to be reticent to express their opinions, because people do not like to be isolated, and those who They embrace what they believe is the minority opinion, often convincing themselves that their opinion is wrong (Gearhart & Zhang, 2015).

The foundations of this theory are that the individual lives in a society and interacts with the environment of public opinion with its components and formation factors. Therefore, the individual tends to form his opinion according to the prevailing public opinion in the society in which he is present, and thus public opinion is formed in a way that is consistent with the ideas supported by the media, so public opinion is formed (Matthes, 2015). The unified public. As for those who oppose this approach or that opinion; They take a position of silence to avoid persecution of the group and for fear of social isolation. Therefore, if they believe in opinions contrary to what is presented in the media and communication; They withhold their personal opinions and refrain from participating in the conversation, and here silence is an expression of rejection, not acceptance (Clemente & Roulet, 2015).

This theory suggests that the media helps shape public opinion rather than merely reflect it. They play an important role in shaping it. What they read in the newspapers, hear on the radio, and see on the radio has an impact on what they believe to be the prevailing opinion on many different issues. People view these media as those who believe that they represent the opinion of the majority, and this means that the media reinforces certain points of view and reflects the prevailing trend that leads to reducing the opinions adopted by the minority (Schulz & Roessler, 2012). Newman believes that many factors make people keen to express their opinions and participate in them, including (1) the individual's feeling of belonging to the opinion of the majority. (2) A tendency to communicate with those who agree with us in opinions more than with those who disagree with us. (3) A feeling of self-esteem encourages the individual to express his opinion. (4) Middle-aged men from the middle class tend to dialogue and participate easily. (4) Most laws encourage individuals to express their opinions when they feel they are more numerous and represent a majority. In contrast to these solutions, individuals tend to remain silent and resort to it whenever pressure in favor of the majority opinion increases (Noelle-Neumann, 1993).

### **Media and Technological determinism theory**

The theory of media determinism asserts that the media, encompassing diverse communication technologies, have a pivotal role in molding and deciding the progress and trajectory of society and culture (Drew, 2016). media determinism proposes that the media possess substantial influence to shape individual beliefs, attitudes, behaviors, and societal norms, thereby ultimately affecting how people perceive and engage with one another (Ralon, 2009). Media determinism highlights the notion that the medium used to communicate information plays a significant role in shaping how that information is perceived, comprehended, and responded to (Ntini, 2017). It posits that various types of media, including print, television, radio, and the internet, possess distinct attributes that influence the content they deliver and how individuals interact with that content (Cavell, 2015).

Media determinism theory is often associated with Technological determinism, Marshall McLuhan, in 1962, introduced the theory of technological determinism, which is regarded as a prominent modern theory in media studies. This theory emerged as a response to the advancements in media and communication technology. (Chandler, 1995). The role of the media in the social sphere is effectively conveyed through this theory, as it emphasizes how it molds the thoughts, feelings, and actions of individuals (Drew, 2016). According to Poster, the content of media cannot be analyzed separately from the technology used to deliver it. How media organizations present information and the intended audience greatly influence the message conveyed by the media. However, McLuhan argues that the very nature of the media through which people communicate has a more profound impact on shaping societies than the actual content being communicated. (2010).

Technological determinism theory revolves around the idea that the development of communication tools shapes and influences contemporary societies (Logan, 2011). This theory is based on three basic assumptions, which are as follows: The means of communication are an extension of human senses. The viewpoint of Marshall McLuhan suggests that individuals, in every era, adapt to the environment by employing specific senses (Tilley, 2011). The content of communication is greatly influenced by various factors such as the communication channels employed, how the media portrays subjects, and the characteristics of the target audience. However, it is important to note that the predominant means of communication during a particular era have a more profound impact on shaping societies than the actual content of the messages being conveyed (McCallum, 2004).

Second: The medium is the message. technology determinism theory has given great importance to the role of the medium. the medium and the danger of the medium are increasing in dominating all dimensions of human life, as the message in the modern era, despite its importance, has become captive to the medium that He values and exaggerates it despite its triviality or nihilism, or dwarfs it and kills it despite its magnificence (Vieta & Ralon, 2013). The message as a signifier completely dissolves in the medium, which has become a message, a signifier at the same time, as McLuhan sees, "The basic message in the book is the printed matter, and the basic message in television is television." The same, the content is not important, and what is important is the means that transmit the content (Winston, 2006). Each medium has its characteristics and an audience of people whose love for this medium exceeds their interest, in terms of its content, Television, like any other medium, possesses unique qualities that attract a specific audience. Just as people love reading to enjoy the printed experience, they love television because of the screen that displays images, sound, movement, and colors, as there is a better method than another in stimulating a certain experience (Popițiu, 2011).

Third: hot means of communication and cold means of communication, The theory of technological determinism in communication outlines the progression of change, as it transitions from the oral stage to the written stage, and further evolved into the era of printing and eventually the era of mass communication (De la & Lin, 2016). The transition was from hot communication, as the relationship is direct and interactive between the sender and the receiver, which is the world of books and cinema, to cold communication, since this relationship is static and indirect, like television (Roncallo-Dow & Scolari, 2016). The necessity to offer the audience additional information increases as the medium becomes colder. This concept is exemplified by the popularity of wide cinema screens, which are considered hot, while television images are perceived as cold (Cavell, 2015).

The theory of media and technology determinism has faced criticism for its oversimplified view of the connection between media and society. It fails to acknowledge the significant influence of politics, economics, and culture in shaping social change (Harvey, 2006). Critics argue that although media undoubtedly holds sway, it does not solely determine the outcomes of society in a deterministic fashion. Rather, the relationship between media and society is intricate and diverse, with various factors intertwining to mold cultural and social dynamics (Marek, 2022).

## **METHODOLOGY**

This research delves into the intricate dynamics of media narratives, particularly within the realm of contentious geopolitical stories. The focus is on understanding the substantial influence of journalistic investigations, specifically in the context of the Palestinian Authority (Jamal, 2017). The academic journey centers around the television program "*The Hidden Is More Immense*" aired by Al Jazeera, unraveling the complexities of media narratives and their role in shaping collective awareness.

### **Research Method**

To reach a broader understanding of the objectives of the study and to achieve credibility in the study results, the study uses two-stage qualitative research procedures including semi-structured interviews and content analysis.

### **Data Collection**

The study relies on qualitative research methods to answer the study's research questions through semi-structured interviews of observers, political analysts, and journalists. The study also uses content analysis, to know the nature of the content that was used in "*The Hidden Is More Immense*" (Press reports, news, press interviews) And how Al Jazeera channel has employed them in a way that aims to form oppositional public opinion in Palestine. In addition, the study attempts to measure the extent of the Palestinian public's interaction with the program and exchange opinions about it.

A) A semi-structured interview is described as an interview in which the interviewer indicates the kind of information he or she hopes to obtain from the interviewee, and Open-ended questions are part of it (Schmidt, 2004). The interview questions are in Appendix A.

B) Content Analysis: It is an approach used to measure and quantify answers to a set of questions, by use of a variety of values to achieve a few answers (Stemler, 2000).

### **Coding Schema**

In this study, the coding scheme linked the study objectives and divided it into three main sections. In the first and second sections, 7 items are included for the participants' answers and opinions about the role of Al Jazeera in exposing corruption within the Palestinian Authority and the extent to which "*The Hidden Is More Immense*" Program contributes to forming oppositional public opinion. The third section answers the extent of the Palestinian street's interaction on YouTube and social media with the content of "*The Hidden Is More Immense*" program, which highlights and contrasts the different opinions in Palestinian society by 3 items who agree, neutral and disagree with the content of the program. The coding schema is in Appendix B.

### **Data Analysis**

After the researcher conducted interviews with participants, the content of the interviews was analyzed based on the coding schema that was categorized based on the aims and research questions of the study. The study interprets from participants' interviews the extensive role that the Aljazeera channel has played in the Palestinian community and how "*The Hidden Is More Immense*" program was the main tool to affect Palestinian public opinion. At the same time analyze the nature of the content that Aljazeera used to convert its narratives about Palestinian issues and measure how Palestinians interact with it.

### **Population**

The study community is divided into two parts. The first part consists of Palestinian political observers and analysts interested in issues of shaping public opinions and their implications for society. The second section consists of the Palestinian social pages that broadcast what is broadcast on a permanent and continuous basis. It is worth noting that "*The Hidden Is More Immense*" ranked first in terms of viewership in the Palestinian street. <https://ipoke.social/>.

### **Sampling of The Study**

The study's sampling focuses on the investigative program "*The Hidden is More Immense*" primarily aired on Al Jazeera. It involves examining specific episodes, editorial decisions, and narratives within this program to understand its role in shaping public opinion on the Palestinian Authority. The sampling also considers public responses to the program, aiming to provide insights into the broader impact of investigative journalism within the Israeli-Palestinian conflict.

"*The Hidden Is More Immense*" is known for its in-depth and critical exploration of political and social issues. The program has focused on uncovering hidden aspects of governance, corruption, and power dynamics within the Palestinian Authority. By presenting investigative journalism, it has sought to hold those in authority accountable and provide an alternative narrative to the official discourse. This case study underscores the power of media, particularly investigative journalism, in influencing public perceptions and opinions. Through its reporting, the program has sparked public discourse, prompting discussions about transparency, accountability, and governance within the Palestinian territories (Jamal, 2017).

### **Sampling Technique**

This study employs purposive sampling as one of the Non-Probability sample techniques for selecting participants who are active with political issues and look and analyze behind the news. Purposive sampling allows researchers to intentionally filtrate entrants who own particular features or have expertise that is bound to the study. Through careful selection, it is ensured that the sample contains people who can motion insightful opinions and data pertinent to the study's goals. The participants of this study are composed of 10 political observers and analysts who are concerned with political and social issues. The Participants were contacted through telephone contact with residents of Dubai, London, and Palestine, while participants located in Northern Cyprus were contacted face-to-face. Participant List is in Appendix C. Furthermore, the study analyzed the content of 10 episodes of the "*The Hidden Is More Immense*" Program, broadcast over three years from 2020 to 2023. The episodes are available on Al Jazeera's YouTube channel website <https://youtu.be/htJ10ACWQJM?si=oSCuod2AaF8dQqUB>.

### **FINDING**

Journalistic investigations play a crucial role in shaping public opinion, especially in situations characterized by geopolitical complications within the intricate fabric of media power. This study explores the complex realm of media dynamics, specifically examining the significant influence of journalistic investigations against the

Palestinian Authority. The focus is on the iconic television show, "*The Hidden Is More Immense*," aired on the Al Jazeera channel. Employing qualitative analysis, and content analysis, this research seeks to understand the complexities of how journalistic investigations, as demonstrated in the program, influence public opinion.

#### 4.1 Interview analysis

The table below answers the first question of the study How does "*The Hidden is More Immense*" portray the Palestinian Authority in its investigative reports?

**Table 1. Information on the portrayal of the Palestinian Authority**

| portray the Palestinian Authority                              | Number of participants |
|--|------------------------|
| Security cooperation between the Authority and Israel.         | 10                     |
| Arrest of Palestinian resistance fighters.                     | 6                      |
| Maintaining Israel's security.                                 | 4                      |
| Assassination of Palestinian figures opposed to the authority. | 8                      |
| Accusing the Palestinian factions of treason.                  | 2                      |
| Preventing any expression of opinion in Palestine              | 8                      |
| Financial and administrative corruption                        | 3                      |

The table above shows the opinions of the participants in clarifying the image that the Al-Jazeera channel talked about and its image of the Palestinian community regarding the Palestinian Authority. There was consensus among the participants on the role of security coordination between Israel and the Palestinian Authority. Based on the Palestinian vision, cooperation with Israel is considered a kind of betrayal. 10 of the answers also indicate that the Palestinian authority arrested and killed Palestinian resistance fighters to provide security and protection for Israel, and this is also a type of treason. The program also presented the Palestinian authority providing money to Palestinian resistance fighters in exchange for them surrendering to the Palestinian Authority and not being targeted by Israel. In addition, 8 of 10 participants also confirmed that the Al-Jazeera channel presented, through its program, "*The Hidden Is More Immense*" the lack of freedom of opinion and expression in Palestinian society, by showing clips showing Palestinian security forces assaulting citizens.

**Table 2. Information on the Perception of Corruption**

| Interviews     | Revealing corruption  |
|----------------|---|
| Participant 1  | 1- Security coordination. 2- Intelligence information exchange.                         |
| Participant 2  | 1- Exchange of arrests. 2- Pursuing the resistance.                                     |
| Participant 3  | 1- Arrest of resisters. 2- torture the resistance.                                      |
| Participant 4  | 1- Suppression of demonstrators. 2- Financial settlement.                               |
| Participant 5  | 1- The importance of resistance.2- The role of the resistance in liberating Gaza.       |
| Participant 6  | 1- Freedom of military action in Gaza.2- Developing resistance weapons.                 |
| Participant 7  | 1- Security coordination.2- Pursuing the resistance.                                    |
| Participant 8  | 1- Suppression of demonstrators.2- torture the resistance.                              |
| Participant 9  | 1- The role of the resistance in liberating Gaza. 2- Intelligence information exchange. |
| Participant 10 | 1- Achievements of the Palestinian resistance.  |

It is clear from the analysis of the interviews that Al Jazeera, and through its program "*The Hidden Is More Immense*" placed the Palestinian Authority in the place of accusation and betrayal of the Palestinian cause. It also worked to polish the role of resistance in Gaza after it was almost prohibited in the West Bank. For example, in the interview with Participant 1, he said, that "*The Hidden Is More Immense*" program was able to draw a comparison between the Authority and the Resistance. Thus, the program demonstrated the weakness of the Palestinian Authority in protecting the Palestinians. On the other side, it demonstrated the role of the Resistance in protecting us through a prisoner exchange deal and the release of thousands of Palestinian detainees in what is known as a " Shalit Deal ".<sup>1</sup>

According to Participant 2, Al Jazeera deliberately focused its coverage on aspects that reduce the importance of the Palestinian Authority in playing a major role in protecting the Palestinians. The participant confirmed that through follow-up to "The Hidden is More Immersed" program, "Al Jazeera concentrated on the weaknesses of

<sup>1</sup> "The deal was done between Hamas and Israel brokered by German and Egyptian mediators and signed in Cairo. Hamas stipulated the release of Gilad Shalit in exchange for 1,027 Israeli-held security prisoners."

the Palestinian Authority in achieving security stability within Palestinian society. In addition, the Palestinian Authority is an Israeli project that works in secret to protect the Israelis".

Furthermore, the program explained the extent of Israeli-Palestinian security cooperation in the fight against maintaining calm in the West Bank and the authority's attempts to isolate the West Bank from the Gaza Strip. Participant 3 says: "Al Jazeera revealed financial offers made by the Palestinian Authority to the resistance fighters, which constituted a turning point in the Palestinian street regarding the real role of the Authority in protecting the Palestinians. This is conclusive evidence that the authority, through money, worked to prevent any military action in the West Bank, and this is clear evidence of high treason".

On the other hand. Participant 5 claims that Al Jazeera was biased in its program by hiding the Palestinian Authority's point of view on many interwoven political issues on the Palestinian scene. For example, "In the previous two years, the program talked about security cooperation, security prosecution, and preventing freedom of expression, and did not indicate that the authority was paying huge financial costs to provide financial aid to the Gaza Strip despite the Hamas government's control over it. At the same time Although the resistance in Gaza has a mass base, some are dissatisfied with the performance of the resistance, and this is not shown by the Al-Jazeera channel".

Table three answers the second question of the study How does the hidden more immense program contribute to the rise in opposition to the Palestinian Authority?

**Table 3. Information on the rise in opposition**

| The rise in opposition     | Number of participants |
|----------------------------|------------------------|
| present the information    | 5                      |
| Credibility of information | 3                      |
| Types of guests            | 9                      |
| Sensitive issues           | 7                      |
| Source of information      | 5                      |

It's clear from the table above that Al Jazeera was able to form oppositional public opinion on the Palestinian street by focusing on issues of interest in the Palestinian street, such as government corruption. Also, the quality and nature of the guests and the journalistic context in which Al Jazeera presented its story contributed to strengthening the image of the Palestinian resistance at the expense of the Palestinian Authority. The complex and risky filming conditions also accelerated the spread of the program among the Palestinians, influencing them specifically when talking about Palestinian resistance fighters.

**Table 4. Information on Reasons for the Rising Opposition**

| Interviews     | Reasons for the rising opposition                  |
|----------------|--|
| Participant 1  | Press templates.                                   |
| Participant 2  | Guests.  |
| Participant 3  | Source of information and how it is presented.     |
| Participant 4  | Different points of view were presented            |
| Participant 5  | Exploiting resistance.                             |
| Participant 6  | Exploiting Palestinian government corruption.      |
| Participant 7  | Manipulate   |
| Participant 8  | Rhetoric   |
| Participant 9  | Weakness of the Palestinian Authority's narrative. |
| Participant 10 | Strengthening the Palestinian-Palestinian division |

The table above shows the participants' points of view on how Al Jazeera Channel influenced Palestinian public opinion. It was clear that the diversity of journalistic templates contributed to stimulating public opinion. For example, Participant 1 says, "The channel addresses the interests and needs of the audience, and this makes it easier for viewers to adapt and adopt the idea and content". In the program "The Hidden is More Immerse" Al Jazeera relied on collecting sensitive intelligence information that was shocking to the Palestinian viewer and raised many questions about the source and purpose of this information. Al Jazeera was also able to conduct interviews with Palestinian resistance fighters under complex security conditions. This is a kind of validation of the topics presented by the channel. For example, Participant 2 confirms that "some information was leaked in the Palestinian street about Palestinian-Israeli security deals to eliminate the Palestinian resistance. Al Jazeera took advantage of these leaks and interviewed a wanted Palestinian known to the citizens, who confirmed the authorities' attempts to offer money for stability.

Furthermore, Al Jazeera focused on reducing the extent of the Palestinian security role in protecting Palestinian civilians, and this is an important element in the decline in the popularity of the Palestinian Authority. Participant 7 says, "The Palestinian Authority appeared on Al Jazeera as if it were water in the hands of Israel, which it moves whenever it wants, and is trying to maintain Israeli security at the expense of the Palestinian citizen, and from here people's opinions began to change".

On the other hand, Participant 7 confirms that "Al Jazeera manipulated the opinions of the Palestinian public by focusing on the weaknesses of the Palestinian Authority, as the peace agreements obligate the Palestinian government to security cooperation with Israel as a gesture of good faith (that the Palestinians are not accepting armed action against Israeli citizens). Al Jazeera intelligently employed this point to be the seed of opposition to authority".

participant 8 says, "The Palestinian people are known for their emotional nature. Therefore, Al Jazeera used a lot of linguistic rhetoric to describe the Palestinian reality, especially when mentioning the Palestinian Authority. For example, when the Palestinian National Authority is said, it is obvious that patriotism means belonging to the homeland and not betrayal. But the Palestinian Authority instead deals with the occupation. Al Jazeera also used the term "Palestinian resistance" while the Palestinian Authority used the term "wanted security" and many other words such as (martyr, resistance, apartheid wall), while the Authority used (outlaws, aggressive attacks, separation wall). All these labels contribute to forming a public opinion opposed to the approach of the Palestinian Authority".

In addition, Participant 10 believes that Al Jazeera exploited the Palestinian-Palestinian division to fight the Palestinian Authority by working to reinforce the narrative of opposition to the authority within Palestinian society.

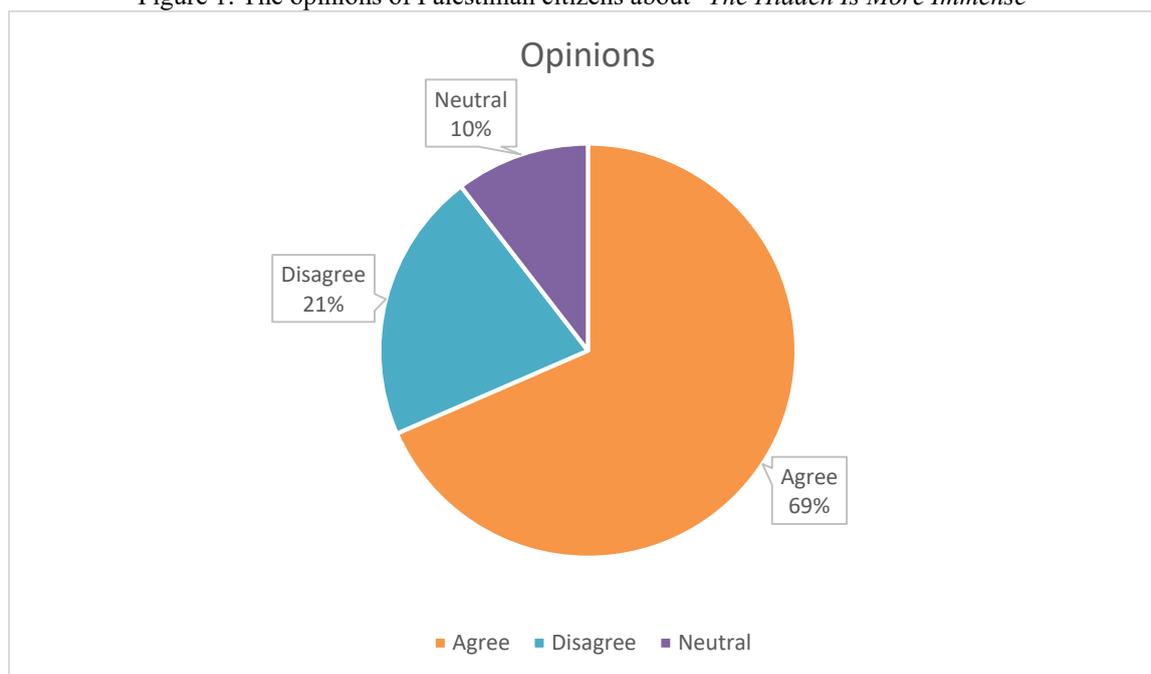

### Content Analysis

The study used content analysis to analyze the third research question How has the public responded to the information presented in "*The Hidden is More Immense*" about the Palestinian Authority? Content analysis used in this study helps to know the nature of the content that was used in Press reports, news, and press interviews And how Al Jazeera channel has employed them in "The Hidden is More Immense" program in a way that aims to form oppositional public opinion in Palestine. In addition, by content analyses, the study attempts to measure the extent of the Palestinian public's interaction with the program and exchange opinions about it. Despite the diversity of topics covered by "*The Hidden Is More Immense*" program and its lack of focus on a specific region or country, the Palestinian issue had a major role in the program's topics. Through monitoring social media platforms and YouTube, it was revealed the extent of the public's interaction with the Palestinian issue at the expense of other topics.

**Table 5: Information on Public's interaction with the program**

|              | Sharing | Comments | Views | Like |
|--------------|---------|----------|-------|------|
| YouTube      | 0       | 5000     | 5,7 m | 73k  |
| Social media | 5 m     | 100k     | 20 m  | 100k |

The table above shows the average participation and interaction with the program "*The Hidden Is More Immense*" based on the program's page on YouTube and social networking sites. It was clear that there was a very high rate of interaction, as some episodes achieved more than 5 million views on YouTube and more than 20 million on social media sites. It also turned out that the Palestinian audience watched the program more than they interacted with it, as the like rate reached approximately 73k on YouTube, while the comment rate reached only 5,000 comments, without any sharing of some episodes.

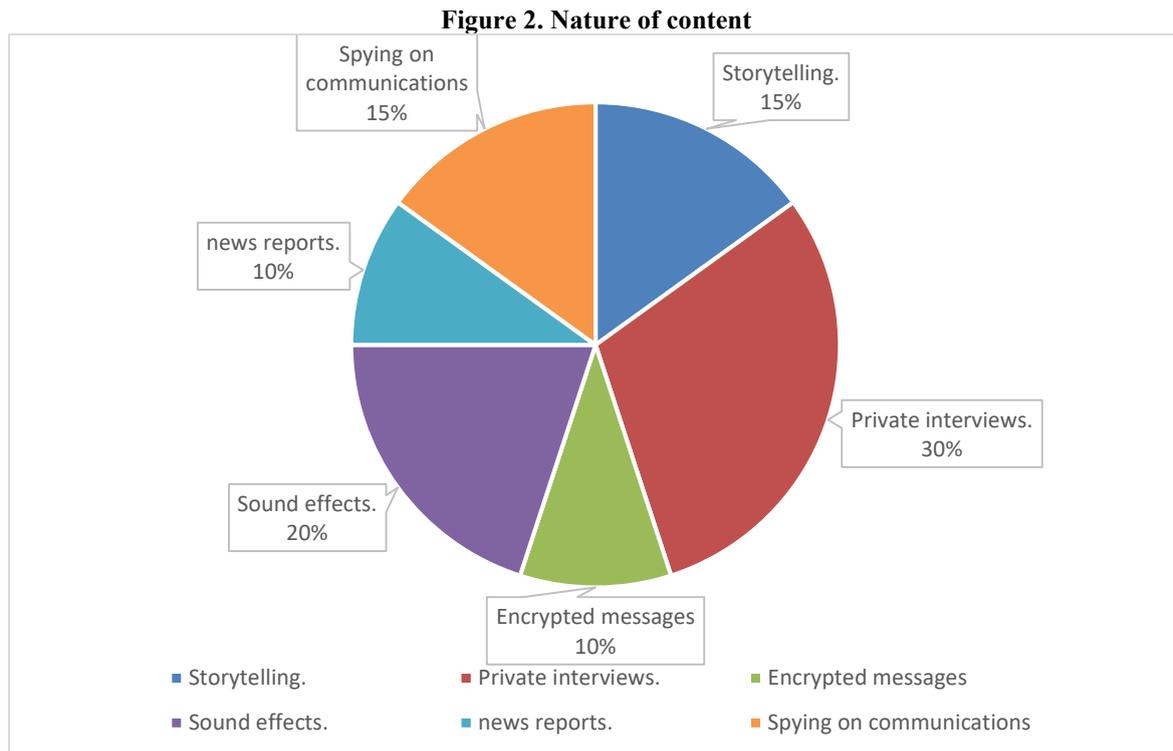

Figure 1. The opinions of Palestinian citizens about "*The Hidden Is More Immense*"

The opinions of Palestinian citizens differed regarding what was published in "*The Hidden Is More Immense*" Program was evident in the division of the Palestinian street between supporters and opponents. Some Palestinians posted videos and commented on them. While others published interviews, information, or photos and commented on them. 69 % of citizens supported the content of the program and confirmed through their comments that the approach of the Palestinian Authority does not differ from Israel's approach. 21 %of citizens attacked and opposed the content of the program. Some even insulted and ridiculed the program's presenter and Al Jazeera Channel in particular. 10 % of citizens had neutral opinions.

Some supporters wrote, "The Palestinian Authority and Israel are two sides of his work. One of them pursues the resistance and tortures them to be entrusted with our protection." Another writes: The Palestinian Authority is another occupation of the Palestinian state and must be eliminated before the Israeli occupation".

As for the opposing opinions, they focused on saying, "The Palestinian Authority is the only solution to establishing an independent Palestinian state, and that the Zionist Al Jazeera channel is working to destroy the Palestinian social fabric. The Palestinian people are more aware and the aims of the Qatari money channel (indicating that Al Jazeera is a channel ruled by money). As for the opposing opinions, they focused on saying, "The Palestinian Authority is the only solution to establishing an independent Palestinian state, and that the Zionist Al Jazeera channel is working to destroy the Palestinian social fabric. The Palestinian people are more aware and the aims of the Qatari money channel (indicating that Al Jazeera is a channel ruled by money). Another says "It seems that Al Jazeera does not read history. The Palestinian Authority is the result of the Palestinian revolution, which lasted for more than 55 years under the leadership of Yasser Arafat, and Tamer will not fake the history"(Tamer is a TV presenter).

The neutral opinions were represented by saying, "Al Jazeera conveyed a certain point of view based on information and reports. Before confirming or objecting to it, the authority must justify its point of view and respond to Al Jazeera's claim so that the citizen is aware of what is happening around him". Another says, "In light of the political events that the issue is going through, it has become better for us as Palestinians to stay at home and not listen to any point of view. Everyone is manipulating us".

Al Jazeera's type of coverage of political events is eye-catching through narrative narration that attracts the audience even if the topic is not interesting. Al Jazeera also excelled in communicating with Palestinian political and military figures whose name is known and whose face is unknown, and this is to achieve the credibility of its narrative. Al Jazeera also used music and effects. Audio enhances control over the audience's feelings. It also used the method of suspense by publishing encrypted messages obtained from private sources to leave the viewer the opportunity to predict.

Through what was mentioned above, Al Jazeera was able to control the mentality of the Palestinian youth, as he involuntarily started repeating what he heard and saw, intentionally or not. The main findings of participants' answers and content analysis are as follows:

1- It became clear through the interviews conducted with the study participants that Al Jazeera focused its program on security, political, and social issues that concern the Palestinian people in its program "*The Hidden Is More Immense*". It was also clear that there was a discrepancy in coverage standards through a comparison between the Palestinian resistance, represented by Hamas, and the Palestinian Authority, which rejects military action and tends toward a peaceful solution to Palestinian issues.

2 - It also became clear that Al Jazeera was able, through the program "*The Hidden Is More Immense*" to enter every home in Palestine, and through its style, the skill of its broadcaster, and the way it presented the Palestinian issue, it worked to influence the minds of young Palestinians and thus form a real opposition to the Palestinian Authority.

3 - The repressive measures followed by the Palestinian Authority towards the Palestinian people contributed to the ease with which Al Jazeera had an influence on the minds of Palestinian citizens by focusing on talking about freedom of opinion and expression, freedom of resistance, and that resistance is a basic condition for liberating any occupied land. also talking about the achievements and preparations of Palestinian armed factions such as Al-Qassam and Islamic Jihad in Gaza played a role in demanding that the Palestinian street demand that every Palestinian has the right to defend himself and prepare for war with Israel at any moment.

4- The Palestinian Authority's policy against Al Jazeera, closing it and preventing it from operating in the Palestinian territories helped spread the ideology of those opposing the authority, as Palestinian citizens began to say that if what Al Jazeera published was not true, the authority would not have closed it.

5- The reactions and great momentum after each episode of the program confirmed the success of the program in forming an oppositional public opinion in Palestine, and this shows that the Palestinian street needed someone who would express its problems and present them to the public.

## DISCUSSION

This research provides a clear understanding of the important role performed by journalistic investigations, with *"The Hidden Is More Immense"* providing a reliable source of guidance (Cherkaoui, 2016). By employing a rigorous combination of quantitative accuracy and qualitative expertise, we have successfully deciphered the intricate factors that shape public sentiment, specifically about the resistance against the Palestinian Authority (Bebawi & Bebawi, 2016). This investigation has shown the intricate interaction of several elements, revealing the deliberate editorial decisions that shape the shared awareness of a worldwide audience. The flawless incorporation of data, analysis, and interpretation has resulted in a splendid tapestry, revealing the intricate layers that influence perceptions on a large level (Alhendyani, 2019). The results of this study align with a demand to beyond conventional concepts of journalism, urging us to view it not just as a transmitter of information but as a powerful influence that shapes the fundamental basis of collective comprehension. Our research explores the significant influence of investigative journalism on public understanding, amidst the vast array of media influences.

Essentially, this research acts as a guiding principle, providing direction in the intricate nature of journalistic pursuits, as demonstrated by *"The Hidden Is More Immense"*. The current study carefully analyzed the complex factors that shape public opinion, particularly the negative feelings towards the Palestinian Authority, using a combination of precise quantitative methods and insightful qualitative approaches (Alhendyani, 2019). This undertaking has been characterized by a remarkable elucidation of the intricate interplay that shapes the global narrative landscape.

The media has great power in influencing societies and political systems by providing a large space for discussion about citizen rights and the role of the government in providing for the needs of citizens (Al-Hamadi 2020). Al Jazeera, through its media power, its spread in the Arab world, and its embrace of the Palestinian issue, was able to influence Arab public opinion in general and Palestinians in particular. The reasons for the influence are due to the various media materials provided by Al Jazeera that contributed to the exchange of ideas and opinions on political issues in the Arab world, as it was able to motivate viewers to tend to reject reality and adopt behaviors that oppose or support Arab governments. Al-Jazeera's influence factors shaped media narratives and showed the contribution of journalists in shaping public opinions on political change (Alhendyani, 2019).

The emergence of Al Jazeera as an out-of-the-ordinary Arab media force contributed to showing the viewers many of the disturbances and disagreements that raise controversy in the Palestinian political arena, and citizens became able to comment and express their opinions about them, as there are no longer issues that are prohibited from being talked about or circulated in the media. The diversity of information sources and their sensitivity made the Palestinian viewer enter a state of comparison between the Palestinian Authority and other Palestinian factions such as Hamas and Islamic Jihad. Media highlight the complexities involved in shaping public opinion, not only through traditional media like Al Jazeera but also through various channels and mediums, the geopolitical influences on media narratives and the credibility of reporting emerge as critical factors that can shape public perception (Bakour, 2020).

The disclosed facts not only provide opportunities but also invite audacious scholars to undertake broader explorations into the constantly changing realm of media dynamics (Abdelal, 2016). The extent of our findings surpasses the limitations of conventional television broadcasts, extending its influence to include the limitless realms of internet platforms and mobile applications (Alhendyani, 2019). This analysis explores the combined impact exerted by these platforms and applications, providing a deep understanding of how they change the way viewers perceive things.

The comparison made by Al Jazeera between the Palestinian resistance and the Palestinian Authority was the beginning of the emergence of Palestinian voices opposed to the Palestinian Authority and its politicians. At a time when the Israeli army was storming the West Bank, which is under the control of the Palestinian Authority, and arresting and killing Palestinian fighters under the protection of the Palestinian Authority, the resistance in Gaza protects fighters and provides them with weapons and money. Al Jazeera's distinctive investigative journalism reverberates throughout the delicate tapestry of public opinion. The emphasis is placed on the unusual methodologies that are utilized, which serve as a compass to illuminate how this phenomenon occurs (Rodriguez, 2020).

This comparison contributed to considering the Palestinian Authority a partner with the occupation in killing Palestinians, and some went on to accuse the leaders of the Authority and the Palestinian security services of treason and working for the benefit of Israel. Al Jazeera focused on the role of the Palestinian resistance in fighting Israel, liberating Palestinian prisoners, Israel's acquiescence to the demands of the Palestinian resistance by evacuating some settlements in the Gaza Strip, and presenting it as land liberated from the occupation, and the Israeli army cannot enter Gaza, while showed the West Bank, which is under the rule of the Palestinian Authority, as occupied Palestinian land, violated by the Israeli occupation. The significance of journalistic investigations appears particularly during transformative events that leave an indelible stamp on the collective consciousness (Brown, 2019).

Al Jazeera sparked controversy because of its editorial policy when talking about the Palestinian issue, Al Jazeera deliberately sought to form public opinion in the Palestinian street that opposed the Palestinian Authority, where

the channel's editorial policy was biased towards the resistance more than the Palestinian Authority. The Palestinian Authority and its security services are run by the Fatah movement, which is distinguished by its secular ideology that conflicts with the ideology of the Muslim Brotherhood and Hamas in particular. The Qatari authorities have strong relations with the Muslim Brotherhood and Hamas, and this was clear in their news coverage and in their program "*The Hidden Is More Immense*", despite Al Jazeera employing all its production and editorial capabilities to be neutral in talking about the Palestinian issue, however, according to many of observers and the opinions of participants Al Jazeera did not commit to neutrality.

The method used in "*The Hidden Is More Immense*" program contributed to its spread and adoption in the Palestinian street for several factors, the most important of which are factors related to the method of presentation. The media and technical methods used helped to draw the attention of the viewers. The method of narration, the style of dialogue, decoration, directing, and production left a great impact on the souls of the viewers. Moreover, excellence in the topics raised for discussion and the audacity to speak and address prohibited files left many questions for the Palestinian citizens, and this became clear in the citizens' comments and posts on social media sites. Al Jazeera adopted the principle of excitement and suspense to attract viewers through the method of promoting the program, as the title of each episode aroused the curiosity of Palestinians to know what will be shown and what is new regarding the Palestinian issue. examines the investigative methods that are enshrined in "The Hidden is More Immense," putting them under an intellectual microscope. the editorial method emphasis is placed on the role that these approaches play in questioning and contesting the narrative that has been weaved by the Palestinian Authority. This makes a substantial contribution to our knowledge of how dissenting perspectives come into existence (Patel, 2017).

Press investigations on Aljazeera played a prominent role in raising Palestinian public opinion about the Palestinian Authority and its role in providing protection and fighting rampant corruption within the ruling class in Palestine. Press investigations also showed the main role that the Palestinian Authority plays in protecting Israelis through political arrests, the prosecution of Palestinian resistance, and security coordination between Israel and the Palestinian Authority. "*The Hidden Is More Immense*" program helped break the barrier of fear among Palestinian citizens and they became able to criticize the Palestinian Authority and its policies openly and clearly by publishing and quoting what was stated in "*The Hidden Is More Immense*" program" on social media sites. Some Palestinians also demanded that the leaders of the Palestinian Authority be held accountable and forced to resign. The channel's media discourse Al Jazeera, analyzed in the context of shaping Qatar's international relations, serves Qatari policy, and covers its political and economic projects with the United States and Israel, and it links its discourse to Qatari politics and relations over an extended period (Abualrub, 2010).

The Palestinian Authority, due to Al Jazeera's policy, closed its office in the West Bank and sent a message criticizing the Qatari authorities for what was stated in the program "*The Hidden Is More Immense*" This act caused an increase in the program's viewership rate due to the state of curiosity for Palestinian citizens. The way journalistic investigations that talked about Palestinians were presented was characterized by suspense and shock to the Palestinian citizens. The method of narration, press interviews, guests, and their position in the Palestinian street contributed to the Palestinian citizen's adoption of the message broadcast by the program and its widespread spread among the Palestinians. The Palestinian Authority tried to confront the "*The Hidden Is More Immense*" program and work to discredit the narrative of the program makers, but it failed in doing so because the Palestinian Authority did not have a clear and honest counter-narrative. investigative journalism at Al Jazeera plays a role in the process of political mobilization. The narrative revealed in the program is transformed into an instrument that inspires and mobilizes public resistance to the Palestinian Authority at certain crucial periods (Hernandez, 2022).

## Conclusion

The world of Arab media witnessed a radical change after the launch of the Al Jazeera satellite channel in 1996, which is based in Doha. It is the first regional channel to provide serious news and field reports combined with controversial political and social discussions. The Palestinian issue has been considered the most important event in all of Aljazeera's news coverage, but despite this, the channel has been subjected to a lot of criticism, especially from the leaders of the Palestinian Authority and from the Fatah movement, the largest political party in Palestine, which forms the Palestinian government and most of the members of which belong to The Palestinian security services have. this study goes beyond the scope of conventional journalism, prompting us to reassess its function as something more than just a transmitter of information. Instead, it manifests as a dynamic power, shaping the fundamental basis of collective understanding. This study plays a crucial part in the complex landscape of media influence, helping to create a harmonious balance and contribute to the overall understanding of society. It resonates with the profound influence that investigative journalism has on the broad scope of world understanding. The Palestinian Authority considers Al Jazeera, and its policies are close to the Muslim Brotherhood movement. Al Jazeera always seeks to focus on the weaknesses of the Palestinian Authority and the failure of the peace processes to achieve an independent Palestinian state. So The leaders of the Palestinian Authority also consider that Al Jazeera, through its various programs, seeks to spread discord and highlight the Hamas movement and its political program that is close to the Muslim Brotherhood, the right path to achieving Palestinian independence.

This research illuminates the intricate workings of journalistic investigations and emphasizes the significance of critical analysis in navigating the ever-changing media landscape. "The Hidden Is More Immense" acts as a guiding principle, leading us through unfamiliar areas of media narratives. Qualitative analysis in this study has played a crucial role in revealing the intricate factors that influence public opinion, especially about opposition to the Palestinian Authority.

Change occurs when internal crises increase in societies, so Al Jazeera through the tense relationship between the Palestinian citizens and the ruling authority raised questions that led to a change in citizens' opinions about the role of the state and its institutions in protecting the rights of citizens within the law. In addition to respecting differences of opinion, the peaceful transfer of power, and the citizen's right to object, criticize, and demonstrate peacefully in the country. This tension and deteriorating economic situation in Palestine is a starting point for forming a real nucleus to influence public opinion in Palestine. Al Jazeera portrayed the Palestinian Authority as an authoritarian regime that deprives the Palestinian citizens of their political and economic rights. There are no presidential or parliamentary elections in Palestine, in addition to high taxes and unemployment, the Palestinian government is not committed to providing the salaries of government employees so criticizing the Palestinian Authority or its policies may cost a citizen his life, as happened with the political activist Nizar Banat. Related to the mentioned above this study acts as a balancing element that contributes to the overall understanding of society. It reflects the lasting influence that investigative journalism has on shaping the broad scope of global awareness. The results of our research serve as a harmonious pause, compelling us to carefully observe the cadence of investigative journalism and its wide-ranging consequences.

Each aspect of this research aligns with the nuanced intricacies of journalistic inquiries and their significant influence in molding public sentiment. This research provides a cohesive contribution to the overall impact of media influence.

### Recommendations

1. Al Jazeera raises the slogan of opinion and other opinions, and this slogan is a research point through which the extent of Al Jazeera's credibility in presenting different points of view can be studied.
2. Many observers believe that Al Jazeera, despite its widespread within the Arab world, is accused by some of being biased toward the policy of the Qatari government, and this point may also be a research focus that needs to be verified.
3. There is also an important question that needs to be investigated: to what extent have the parties opposing the Palestinian Authority exploited what was stated in the Greater Secret Program to increase their popularity base?

# THE ROLE OF MEDIA LITERACY ON PREVENTION OF GENDER-BASED VIOLENCE AMONG YOUTHS-A CASE STUDY OF HIGH SCHOOLS

Ebubechukwu Kelechi IHEJIRIKA

Prof. Dr. Aytakin İSMAN  
isman@sakarya.edu.tr

## ABSTRACT

This study was on the role of media literacy on prevention of gender-based violence (GBV) among youths-a case study of high schools. A total of 150 respondents were used in this study and data was collected using a well-formatted questionnaire. The socio-demographic data were as follows: gender- male (84, 56%), female (66, 44%); Age- 12-15years (30, 20%); 16-19years (96, 64%), >20years (24, 16%); Religion-Christianity (126, 84%), Islam (18, 12%), Traditional (6, 4%) and Level in high school- Junior (24, 16%), Senior (126, 84%) 84.56% of respondents were male, while 66.44% were female. Most people consume news on social media, while 13% get it from newspapers and magazines. Most respondents seek media content that challenges traditional gender norms and promotes gender quality, while 8% never do. 96% of respondents have been influenced by media content to change attitudes about gender norms or violence. 60% of respondents experienced gender-based violence in school and peers, with only 28% receiving formal media literacy education. 72% agreed that media literacy can prevent gender-based violence, while 24% disagreed. 64% agreed that schools should organize awareness campaigns to promote media literacy and prevent violence. Media exposure to violence increases aggressive behaviors among young people, with 48% agreeing that gender-based violence can desensitize them. Media representations can promote healthy relationships and gender equality, with 48% saying yes. Media exposure plays a significant role in shaping societal attitudes towards gender-based violence, with 77% saying yes, 96% saying no, and 24% saying maybe. The study found no significant differences in media literacy interventions' effectiveness on gender-based violence among male and female respondents however, significant differences were observed in media consumption habits, role of media literacy, age distribution, religion and barriers to integration. This study thus showed the complex relationship between media literacy, gender-based violence, and high school students' attitudes and emphasizes the need for tailored interventions, addressing both gender perspectives, early exposure to media literacy education, and addressing media influences in religious contexts to combat GBV driven by religious beliefs.

**Keywords:** gender-based; violence; media; literacy; prevention

## INTRODUCTION

### 1.1 Overview

Gender-based violence (GBV) is a pervasive issue that affects individuals of all ages and backgrounds, with significant consequences for the physical, psychological, and social well-being of survivors (Ajuzie, et al. 2012). Among youths, GBV has emerged as a critical concern, necessitating comprehensive strategies to address its root causes and prevent its occurrence. In recent years, there has been growing recognition of the influential role played by media in shaping attitudes, beliefs, and behaviors related to gender norms and violence (World Health Organization, 2020). Gender-based violence encompasses various forms of violence, including physical, sexual, psychological, and economic abuse, which are primarily perpetrated against individuals based on their gender (Namwese, 2014). GBV is known to occur in different cultures and regions of the world (Minerson *et al.*, 2011). Different causes of GBV have been identified including lack of physical security owing to break-down of law and order, presence of armed forces/groups, collapse of law enforcement, justice institutions and family, social or community structures, poverty, lack of education and livelihood opportunities, and inadequate access to shelter, food, water, fuel, and income generation, discriminatory social, cultural or religious laws, norms and practices that marginalize women and girls and fail to respect their rights etc (Council of Europe, 2021). Another underlying cause of GBV has been identified to be past witnessing and/or experiencing similar violence during earlier years (Murrell, et al. 2007). GBV has various forms including intimate partner violence, sexual violence, child marriage, bullying, blackmail, female genital mutilation etc (Stockman, et al. 2013). Studies indicate that IPV during adolescence is associated with witnessing or experiencing IPV during childhood, atypical family structures, multi-partnering, and substance, abuse, especially alcohol abuse (Halpern, et al. 2009; Cui, et al 2013; Catalozzi, et al. 2011). Gender-based violence has effects such as homicide and suicide, injury and shock, disability and sleeping disorders, reproduction problems, emotional and social and economic problems such as increased gender inequalities (Garcia-Moreno, et al. 2005). GBV may also cause psychological and physical adverse outcomes such as stress, anxiety, depression, unsafe abortion, unwanted pregnancy, and sexually transmitted infections (Tantu et al. 2020). According to Wanjiru (2021), GBV has far-reaching consequences which may be devastating and can have life-long repercussions for survivors and could even lead to death. GBV has a world-wide occurrence however research indicates that it is pervasive among adolescent and young adult

women in low- and middle-income countries (Decker, et al. 2015). Globally, GBV disproportionately affects women and girls, but it also impacts men and boys. Young people, particularly those in high schools, are susceptible to the perpetration and experience of GBV, making it essential to explore preventive interventions tailored to this age group (Viner, et al. 2012).

The media, including television, films, music, social media, and advertising, plays a crucial role in shaping societal attitudes and behaviors, including those related to gender. Media representations often perpetuate harmful stereotypes, reinforce unequal power dynamics, and normalize violence against women (Huesmann, et al., 2020). Such portrayals contribute to the socialization process of young individuals and can influence their understanding of gender roles, relationships, and violence.

Media literacy refers to the ability to critically analyze, evaluate, and interpret media messages. It empowers individuals to navigate media content, question its underlying messages, and develop alternative perspectives. By fostering media literacy skills among youths, it is possible to enhance their capacity to resist negative media influences, challenge harmful gender norms, and prevent gender-based violence (Mendez et al., 2017). The advent of the internet and social media has opened a new channel through which GBV occurs and increased access to media consumption has resulted in significant increase in cases thus necessitating the need for media literacy (Idongesit, 2014).

Gender-based violence (GBV) remains a significant concern in societies worldwide, particularly among youths. As technology and media consumption increase, the influence of media on shaping attitudes and behaviors becomes more pronounced. In the context of preventing GBV, media literacy has emerged as a potential protective factor, empowering individuals to critically engage with media content and challenging harmful gender norms. Gender-based violence refers to any act of physical, sexual, psychological, or economic harm inflicted on individuals based on their gender, perpetuated through power imbalances and reinforced by societal norms (World Health Organization, 2020). Youth, defined as individuals in the age range of 10 to 24 years (United Nations, 2017), are particularly vulnerable to GBV due to the formative nature of their socialization and identity development processes (Choudhary & Joshi, 2019). While various factors contribute to GBV, media plays a significant role by shaping attitudes, beliefs, and behaviors regarding gender roles and relationships (Peter & Valkenburg, 2016). Media literacy, as defined by the National Association for Media Literacy Education (2019), encompasses the ability to access, analyze, evaluate, and create media content in a critical and informed manner. Media literacy equips individuals with the skills to comprehend the persuasive techniques, biases, and stereotypes prevalent in media messages (Livingstone et al., 2019). It enables them to question and challenge representations of gender and power dynamics in media, fostering a more nuanced understanding of the social construction of gender roles (Messner et al., 2020). While studies have shown a link between exposure to media violence and increased aggression (Huesmann et al., 2020), research exploring the role of media literacy in preventing GBV is relatively limited, especially within the specific context of high schools. This research seeks to fill this gap by investigating the potential of media literacy education programs to mitigate the risk factors associated with GBV among youth populations. By focusing on high schools as the setting, this study aims to examine the efficacy of media literacy interventions in promoting healthy relationships, challenging harmful gender stereotypes, and fostering a supportive and inclusive school climate that discourages GBV.

### **1.2 Significance of The Research**

This research contributes to knowledge by exploring the intersection of media literacy and gender-based violence among youths. It examines how media literacy skills can empower young individuals to critically analyze and challenge harmful media messages that perpetuate gender stereotypes, objectification, and violence against women.

The study identifies and evaluates specific media literacy strategies that can be employed in high schools to prevent gender-based violence. It investigates the effectiveness of various educational interventions, such as media literacy programs, curriculum enhancements, and workshops, in promoting critical thinking, fostering empathy, and promoting healthy relationship norms.

By conducting a case study in high schools, the research assesses the impact of media literacy interventions on students' attitudes and behaviors regarding gender-based violence. It examines whether increased media literacy leads to a reduction in harmful beliefs, increased awareness of the consequences of gender-based violence, and improved interpersonal skills and conflict resolution strategies.

The research explores how media literacy can empower young individuals to become active agents in preventing gender-based violence. It investigates the role of media literacy in promoting critical consciousness, self-efficacy, and the ability to challenge societal norms that contribute to violence against women. Additionally, it explores the potential of media literacy to inspire youth to engage in advocacy efforts and participate in broader social change movements.

This research provides valuable insights for policymakers, educators, and practitioners working in the field of gender-based violence prevention and media literacy education. The findings can inform the development of

evidence-based policies and educational initiatives that prioritize media literacy as a key component of comprehensive prevention strategies in high schools. It highlights the importance of integrating media literacy into the curriculum and designing targeted interventions to address the specific needs of youth populations.

### 1.2.1 Research Questions/Objectives

The aim of this study is to examine the role of media literacy in preventing gender-based violence among high school students. The research aims to answer the following questions:

1. What is the level of media consumption/literacy among high school students?
2. What are some personal experiences and perceptions of high school students on gender-based violence with respect to media literacy?
3. What is the role of the media literacy on prevention of gender-based violence?
4. What is the effectiveness of media literacy interventions on GBV?
5. What are some potential barriers and facilitators of integrating media literacy education into high school curriculum?

### 1.3 Novelty of study

Literature is replete with research on media literacy and its impact on addressing gender-based violence, however, this study specifically targets high schools. High school students represent a critical age group, where attitudes and behaviors are being shaped, and they are increasingly exposed to diverse media content. By concentrating on high schools, this research recognizes the importance of early intervention and prevention efforts to foster a culture of respect and equality among youths. The study takes a comprehensive approach by analyzing the multifaceted aspects of media literacy and its impact on preventing gender-based violence. It explores not only the role of media literacy in fostering critical thinking skills but also investigates its influence on raising awareness about harmful media representations, promoting healthy relationship dynamics, and developing skills for responsible media consumption. By adopting a case study methodology, this research enables an in-depth exploration of the specific context of high schools, considering the unique challenges and opportunities they present. This approach allows for a holistic understanding of the interactions between media literacy initiatives, school environments, and students' experiences, contributing valuable insights for developing effective preventive strategies. This study recognizes the significance of youth voices and experiences in understanding the impact of media literacy on preventing gender-based violence. By incorporating qualitative research methods such as interviews, focus groups, and participant observations, it seeks to capture the lived experiences, perceptions, and challenges faced by high school students regarding media literacy and its potential in addressing gender-based violence.

This research aims to provide practical recommendations and guidelines for educators, policymakers, and other stakeholders involved in youth education. By identifying effective media literacy interventions and strategies, the study aims to inform the development and implementation of evidence-based programs that can be integrated into high school curricula to prevent gender-based violence and promote healthy relationship dynamics among students.

## LITERATURE REVIEW

### 2.1 Conceptual review

Gender-based violence (GBV) remains a significant societal issue, particularly among youths, where media consumption plays a pivotal role in shaping attitudes and behaviors. Media literacy has emerged as a crucial tool in empowering young individuals to critically engage with media messages and challenge harmful representations of gender and violence.

Media literacy is defined as the ability to access, analyze, evaluate, and create media messages critically. This skill equips youths with the tools to deconstruct media representations of gender roles and violence, thus mitigating the harmful effects that such content can have on their attitudes and behaviors (Tyner, 2014). By promoting media literacy, youths can develop a more nuanced understanding of gender dynamics, recognize stereotypes, and resist the perpetuation of violence in society.

The media, including television, movies, social media, and video games, plays a significant role in shaping youths' perceptions of gender and violence. Studies have shown that exposure to violent and sexist content in the media can desensitize individuals to GBV, perpetuate harmful stereotypes, and normalize abusive behaviors (Huesmann et al., 2016). Media literacy education is essential in helping youths navigate this landscape and develop critical thinking skills to discern the differences between reality and media portrayals.

Several studies have evaluated the effectiveness of media literacy interventions in preventing gender-based violence among youths. For instance, a study by Johnson and Johnson (2018) found that implementing a media literacy program in schools led to increased awareness of GBV issues and improved attitudes towards gender equality. Another study by Smith et al. (2020) demonstrated that participation in a media literacy intervention reduced acceptance of violence against women among male adolescents.

An essential aspect of preventing gender-based violence among youths is considering intersectionality. Media literacy programs should address the intersecting factors of gender, race, class, and sexuality, as different groups may experience media messages differently (Gill, 2016). Inclusive media literacy interventions can empower youths from diverse backgrounds to challenge stereotypes and advocate for a more equitable society.

While media literacy holds promise in preventing GBV among youths, there are challenges to its widespread implementation. Limited access to comprehensive media literacy education, varying program effectiveness, and the rapidly evolving media landscape pose obstacles (Potter, 2018). However, technological advancements, such as online media literacy resources and mobile applications, present opportunities to reach more youths with tailored educational content.

In addition to developing critical consumption skills, media literacy programs can encourage youths to become active creators of media content. By producing media that challenges GBV and promotes positive gender norms, young individuals can participate in the broader movement to combat violence and inequality (Tyner, 2014).

Media literacy is a valuable tool in preventing gender-based violence among youths by empowering them to critically engage with media messages. Existing research highlights the positive impact of media literacy interventions in challenging harmful stereotypes and fostering attitudes of respect and equality. To address the complexities of GBV, media literacy programs must adopt an intersectional approach and consider the changing media landscape. By investing in comprehensive media literacy education, society can foster a generation of media-literate youths who contribute to building a safer and more equitable world.

## 2.2 Theoretical review

It is critical to emphasize that the theoretical perspective offers a conceptual foundation for research, which involves a thorough grasp of the variable network's relationships (Morejon, 2020).

### 2.2.1 Cultivation Theory

The Cultivation Theory, developed by Gerbner (1967), posits that long-term exposure to media content cultivates viewers' perceptions and beliefs about social reality. It suggests that repeated exposure to media messages influences individuals' understanding of the world around them, particularly in terms of social norms and behaviors. In the context of this study, Cultivation Theory can be applied to examine the relationship between media exposure, media literacy, and the prevention of gender-based violence among youths in high schools.

According to Cultivation Theory, media messages can shape individuals' perceptions of social reality by presenting particular portrayals of gender roles, stereotypes, and violence. Research has indicated that media often reinforce traditional gender norms and stereotypes, portraying women as vulnerable, submissive, and objects of violence (Smith et al., 2017). These portrayals can perpetuate harmful beliefs and attitudes, contributing to the occurrence of gender-based violence among youths.

However, Cultivation Theory also suggests that media literacy can act as a mediating factor in the cultivation process. Media literacy refers to the ability to critically analyze and evaluate media messages, understand their potential effects, and develop alternative interpretations (Potter, 2014). By enhancing media literacy skills, individuals can engage in more critical thinking and resist the influence of media messages that promote harmful gender norms and violence.

To explore the role of media literacy in preventing gender-based violence among youths in high schools, a case study methodology will be employed. The study will involve a sample of high school students, and data will be collected through surveys, interviews, and focus group discussions. The surveys will assess students' media exposure, media literacy levels, attitudes towards gender-based violence, and behaviors related to gender equity. The interviews and focus group discussions will provide deeper insights into the students' experiences, perceptions, and the influence of media on their attitudes and behaviors.

By adopting Cultivation Theory as a theoretical framework, this study aims to shed light on the role of media literacy in preventing gender-based violence among youths in high schools. It recognizes the potential influence of media messages on shaping attitudes and behaviors related to gender-based violence. Moreover, the study recognizes media literacy as a crucial factor in empowering students to critically engage with media, challenge harmful gender norms, and contribute to the prevention of gender-based violence.

Application of cultivation theory to media literacy and gender-based violence

Cultivation theory, developed by George Gerbner and colleagues, posits that long-term exposure to media content can shape individuals' perceptions of reality, leading to the cultivation of beliefs and attitudes consistent with the messages conveyed in the media. In the context of preventing gender-based violence (GBV) among youths, cultivation theory offers valuable insights into understanding how media consumption influences attitudes towards gender roles and violence.

Cultivation theory suggests that media exposure, particularly television viewing, gradually shapes individuals' perceptions of the world, including their beliefs about gender and violence (Gerbner & Gross, 1976). The theory's key concepts include "mean world syndrome," where heavy viewers of violent media perceive the world

as more dangerous and hostile than it actually is, and "mainstreaming," where media content homogenizes diverse views and creates a shared cultural reality among viewers.

Media literacy is a potential counterforce to the cultivation effects of media consumption. By teaching youths critical analysis skills, media literacy can help them recognize and challenge harmful representations of gender roles and violence in media content (Tyner, 2014). Media literacy empowers youths to question the accuracy and social implications of media portrayals, reducing the likelihood of internalizing violence-supportive attitudes cultivated by media exposure.

Studies examining the application of cultivation theory in the context of media literacy interventions have shown promising results. For instance, Johnson and Johnson (2018) conducted a study implementing a media literacy program that aimed to reduce GBV attitudes among high school students. The program provided tools for critically evaluating media content, leading to a significant decrease in beliefs supportive of violence against women. The findings suggest that media literacy can mitigate the cultivation effects of media violence by encouraging youths to engage with media content more critically.

Media literacy not only addresses violence in media but also empowers youths to challenge gender stereotypes perpetuated by media portrayals (Gill, 2016). By promoting discussions about gender norms and representation, media literacy interventions encourage youths to construct more egalitarian and respectful views of gender roles.

Applying cultivation theory in the study of media literacy and GBV prevention requires considering intersectionality. Intersectional media literacy programs recognize the unique experiences of individuals based on their intersecting identities, such as race, class, and sexuality (Gill, 2016). An intersectional approach helps to tailor media literacy education to diverse groups, fostering inclusive dialogue and addressing specific challenges faced by marginalized communities.

Conclusively, Cultivation theory provides a valuable framework for understanding how media consumption can shape attitudes towards gender roles and violence among youths. By applying cultivation theory in the context of media literacy interventions, researchers and educators can examine the effectiveness of these programs in challenging GBV-supportive attitudes and promoting critical engagement with media messages. Media literacy acts as a vital buffer against the cultivation effects of media violence by empowering youths to challenge harmful representations and fostering a more egalitarian understanding of gender. Additionally, an intersectional approach in media literacy ensures inclusivity and relevance for diverse youth populations, promoting a safer and more equitable society for all.

## 2.3 Empirical review

### Attitude and Perceptions Towards Gender-Based Violence Among Youths and Adolescents

Gender-based violence (GBV) among youths and adolescents is a pressing concern that has significant social and psychological implications. Understanding the attitudes and perceptions towards GBV among this population is essential for effective prevention and intervention efforts. Attitudes and perceptions towards GBV among youths and adolescents are shaped by a complex interplay of individual, familial, societal, and cultural factors. Attitudes and perceptions towards GBV are complex and multifaceted, influenced by various individual, cultural, and social factors. Several studies have examined these attitudes and perceptions, shedding light on different dimensions of the issue and several factors have been identified.

Research indicates that attitudes towards GBV are often influenced by deeply ingrained beliefs about gender roles and power dynamics. Traditional gender norms, societal expectations, and cultural factors can perpetuate victim-blaming attitudes and reinforce the acceptability of violence against women. For example, a study by Smith and colleagues (2018) found that individuals who adhere to traditional gender norms were more likely to justify and minimize GBV incidents.

Gender socialization plays a significant role in shaping attitudes towards GBV among youths and adolescents. Research indicates that adherence to traditional gender norms, stereotypes, and expectations can perpetuate attitudes that normalize or justify violence against women. For example, studies have found that young males who hold more traditional views on masculinity are more likely to exhibit accepting attitudes towards GBV (Ackard, Neumark-Sztainer, & Hannan, 2003).

Peers and social networks exert a strong influence on the attitudes and perceptions of youths and adolescents towards GBV. Peer group dynamics, including witnessing or endorsing GBV, can shape attitudes and normalize violence. Research suggests that individuals who perceive their peers as supportive of GBV are more likely to hold accepting attitudes (Reed et al., 2011). Furthermore, exposure to media and popular culture that portray GBV can reinforce harmful attitudes and perceptions among this age group.

Knowledge and awareness about GBV have been identified as significant factors that shape attitudes towards this form of violence. Limited knowledge and awareness about GBV can contribute to misconceptions and tolerant attitudes among youths and adolescents. Studies have shown that comprehensive sex education programs that address GBV, consent, and healthy relationships can positively influence attitudes and decrease tolerance towards violence (Decker et al., 2017). Studies have shown that individuals with a higher level of knowledge about GBV are more likely to hold non-violent and non-tolerant attitudes. In contrast, limited

knowledge and misconceptions about GBV contribute to victim-blaming attitudes and hinder efforts to address the issue effectively (Doe et al., 2019). Increasing knowledge and awareness through educational initiatives can be an effective strategy for preventing GBV among this age group.

The attitudes and perceptions towards GBV among youths and adolescents are influenced by intersecting factors such as race, ethnicity, socioeconomic status, and cultural norms. Cultural factors may shape attitudes differently across diverse communities, emphasizing the importance of considering cultural specificities in interventions. For instance, research has highlighted variations in attitudes towards GBV among different ethnic groups, with some cultures exhibiting higher tolerance for violence than others (Bui, Morash, & Parker, 2018). Haque & Khan, (2021) also highlighted the influence of cultural factors on attitudes towards GBV in different contexts, emphasizing the need for culturally sensitive interventions.

Media plays a significant role in shaping attitudes and perceptions towards GBV. Research suggests that exposure to media representations of GBV can influence attitudes by normalizing or condemning such violence. For instance, studies have shown that exposure to sexist or violent content in media can lead to the acceptance and trivialization of GBV (Johnson & Adams, 2020). Additionally, social networks and peer influences contribute to the formation of attitudes towards GBV, highlighting the importance of social interactions in shaping perceptions of violence (Mendez et al., 2017).

### **Experiences of Gender-Based Violence Among Adolescents and Youths**

Gender-based violence (GBV) is a pervasive issue affecting adolescents and youths worldwide, with profound physical, emotional, and social consequences. Understanding the experiences of GBV among this population is crucial for developing effective interventions and support systems. The experiences of GBV among adolescents and youths are diverse, encompassing various forms of violence. There are different forms of GBV including intimate partner violence (IPV), sexual violence and bullying/cyberbullying.

**Intimate Partner Violence (IPV):** IPV refers to violence experienced within dating or intimate relationships. Studies reveal high rates of IPV among adolescents and youths, with females being more commonly victimized. Experiences of IPV include physical, sexual, and psychological abuse, with significant implications for mental health, self-esteem, and relationship dynamics (Ackard et al., 2003).

**Sexual Violence:** Sexual violence, including rape and sexual assault, is a prevalent form of GBV experienced by adolescents and youths. Research highlights the vulnerability of young females to sexual violence, often perpetrated by acquaintances, partners, or family members. The consequences of sexual violence include trauma, reproductive health issues, and increased risk of sexually transmitted infections (Garcia-Moreno et al., 2015).

**Bullying and Cyberbullying:** Bullying and cyberbullying are forms of GBV commonly experienced by adolescents and youths. These acts involve repeated aggression, harassment, or humiliation, which can occur in-person or through online platforms. Victims of bullying often suffer from emotional distress, social isolation, and adverse mental health outcomes (Hinduja & Patchin, 2018).

### **Measures Against Gender-Based Violence in High Schools**

Gender-based violence (GBV) in high schools is a significant concern that negatively impacts the well-being and educational attainment of students. Preventive measures are crucial in creating safe and inclusive school environments. Preventive measures against GBV in high schools encompass various strategies aimed at raising awareness, promoting positive relationships, and fostering a culture of respect.

**Comprehensive Sexuality Education (CSE):** Comprehensive sexuality education programs play a vital role in preventing GBV by promoting healthy relationships, consent, gender equality, and bystander intervention. Research suggests that students who receive CSE demonstrate improved knowledge, attitudes, and skills to prevent GBV and engage in respectful behaviors (Pettifor et al., 2018).

**Bystander Intervention Programs:** Bystander intervention programs empower students to intervene in situations of GBV by recognizing warning signs, challenging harmful behaviors, and offering support to potential victims. Such programs have shown promise in increasing students' willingness and efficacy to intervene and create safer school environments (Banyard et al., 2015).

**School Policies and Protocols:** Clear and comprehensive school policies and protocols that address GBV are essential preventive measures. These policies should outline expectations for behavior, procedures for reporting incidents, and consequences for perpetrators. Research suggests that schools with strong policies and protocols have lower rates of GBV and better support systems for survivors (Casey et al., 2017).

**Engaging Male Students:** Involving male students in GBV prevention efforts is crucial for challenging traditional gender norms and fostering positive masculinity. Programs that engage boys and young men in discussions, workshops, and mentorship opportunities promote empathy, respect, and non-violent behaviors (Fulu et al., 2017).

**Supportive School Climate:** Creating a supportive school climate that actively addresses GBV is essential. This includes promoting zero tolerance for violence, providing accessible and confidential support services, and

fostering a culture of respect, inclusion, and gender equality. A positive school climate has been associated with reduced levels of GBV and improved overall well-being (DeSouza et al., 2021).

#### **2.4 Application of review to current study**

The studies have provided insight into the attitude and perception, experiences and preventive measures of gender-based violence as it relates to media literacy. The comprehensive review of the role of media literacy in gender-based violence among youths in high schools has provided a significant knowledge on the matter within the scope of the study.

The researcher proposes the Cultivation theory to be adopted as the theoretical framework for the study, hence providing an academically accepted foundation to research the study's objectives.

Conclusively, several empirical findings have been made on the relationship between media literacy and gender-based violence among youths in high school. However, literature is scanty on the actual role of media literacy in reducing gender-based violence among youths hence this study will be very important in providing necessary research data on the true impact of media literacy on gender-based violence among high school youth.

### **METHODOOGY**

#### **3.1 Study Design**

This study was conducted as a cross-sectional and descriptive study to relate media literacy and prevention of gender-based violence among youths. According to Dooley (2007), a research design is that aspect of research which 'glues' the various sections of the research project in one united piece. Cross-sectional and descriptive research design is usually utilized in specific research topics where the researcher has identified specific problems which respondents provide answers to in order to arrive at a detail information about the problem (Kothari, 2004). Quantitative data allows the research to obtain close probability of the relationship that exists between media literacy and gender-based violence among youths in high schools in Nigeria using quantitative tools.

#### **3.2 Study population, sample size and procedure**

The study was conducted among high school students within Port Harcourt city in Rivers State Nigeria. In all, a total of 150 responses were collected from students. The inclusion criteria was high school students in the junior and senior levels who had access to smartphone and internet-enabled devices while exclusion criteria was basically students who are not in high school.

#### **3.3 Study Tools**

The Intimate Partner Violence Attitude Scale (IPVAS) was revised and adapted for use in this study to evaluate the role of media literacy in preventing gender-based violence amongst high school students.

The study tool was divided into 6 parts:

The first section of the questionnaire inquires about the socio-demographic data of respondents consisting of four items. The second section was on media consumption habits/ media literacy assessment and had six items. The third Section of the questionnaire focused on personal experiences and perceptions on media literacy and GBV and had five items. The fourth section focused on role of media literacy on GBV and had five items. The fifth section focused on effectiveness of Media Literacy Interventions on GBV (with five items) while the sixth section was focused on barriers and facilitators of integrating media literacy education having five items. Section two-six were based on 3 level Likert scale of Yes, No and Maybe. The survey had a total of 33 items. Cronbach's alpha co-efficient was calculated based on the various section and total scale. The Cronbach's alpha for the total scale was 0.857 while Cronbach's alpha were 0.683, 0.780, 0.686 0.867 and 0.907 for section two to six respectively. These values show that the scale had good internal reliability. Permission to use revise and use this tool for duly obtained.

#### **3.4 Data Collection**

Data collection using the questionnaire was done between June 2022-July 2023. The questionnaires were administered on high school students via Google form. The completion of the questionnaire took between 20 and 30minutes. A total of 150 responses were collected from the target population.

#### **3.5 Data Analysis**

Statistical Package of Social Sciences (SPSS) program was used to analyze the collected data. The methods used to analyze the data include an analysis of descriptive statistic variables such as frequency and percentages for the categorical variables.

## FINDINGS

### 4.1 Findings

**Table 4.1: Socio-demographic characteristics (n=150)**

| Descriptive statistics      | Frequency (n) | Percentage (%) |
|-----------------------------|---------------|----------------|
| <b>Gender</b>               |               |                |
| Male                        | 84            | 56             |
| Female                      | 66            | 44             |
| <b>Age</b>                  |               |                |
| 12-15years                  | 30            | 20             |
| 16-19years                  | 96            | 64             |
| >20years                    | 24            | 16             |
| <b>Religion</b>             |               |                |
| Christianity                | 126           | 84             |
| Islam                       | 18            | 12             |
| Traditional                 | 6             | 4              |
| <b>Level in high school</b> |               |                |
| Junior                      | 24            | 16             |
| Senior                      | 126           | 84             |

The socio-demographic distribution of the respondents (table 1) shows that 84 respondents (56%) were males while 66 were females (44%). The age distribution of the respondents showed the following ranges: 16-19years>12-15years> above 20years. The religions distribution of the respondents showed that a large majority of respondents (84%) were Christians while the least reported religion was traditional religion. Majority of respondents (126) were in the senior secondary section while junior secondary had 24 respondents.

**Table 4.2: Evaluation of Media Consumption Habits (n=150)**

| Statement   | Option                 | n  | %    |
|---|------------------------|----|------|
| Where do you primarily get your news from?  | Television             | 30 | 20.0 |
|   | Newspaper/magazine     | 13 | 8.7  |
|   | Social media platforms | 80 | 53.3 |
|   | online news websites   | 27 | 18.0 |
| On average, how many hours per day do you spend consuming news and media  | Less than 1 hour       | 18 | 12.0 |
|   | 1-2 hours              | 48 | 32.0 |
|   | 2-3 hours              | 16 | 10.7 |
|   | 3-4 hours              | 52 | 34.6 |
|   | More than 4 hours      | 16 | 10.7 |
| How often do you actively seek out media content that challenges traditional gender norms and promotes gender equality                      | Always                 | 24 | 16   |
|   | Often                  | 6  | 4    |
|   | Sometimes              | 72 | 48   |
|   | Rarely                 | 36 | 24   |
|   | Never                  | 12 | 8    |
| Do you feel that your media consumption habits align with your values regarding gender equality and the prevention of gender-based violence | Yes, always            | 24 | 16   |
|   | Yes, sometimes         | 90 | 60   |
|   | No, not often          | 18 | 12   |
|   | Never                  | 18 | 12   |
| Have you ever been influenced by media content to change your attitudes or behaviors related to gender norms or violence                    | Yes                    | 96 | 64   |
|   | No                     | 18 | 12   |
|   | Maybe                  | 36 | 24   |
| How frequently do you discuss the influence of media on gender norms and violence with your peers, family, or teachers                      | Frequently             | 24 | 16   |
|   | Occasionally           | 60 | 40   |
|   | Rarely                 | 60 | 40   |
|   | Never                  | 6  | 4    |

Media consumption habits of respondents (table 2) shows that a large number of respondents (80) predominantly got their news from social media platforms while 13% got their news from newspapers and magazines. Time spent per day consuming news and media were as follows: spent 3-4 hours (52, 34.6%), 1-2 hours (48, 32%), less than 1 hour (18, 12%) while 2-3 hours and more than 4 hours were 16 (10.7%) of respondents. Most respondents (72, 48%) reported that they sometimes seek media content that challenges traditional gender norms

and promotes gender quality while 8% reported that they never did. 96% of respondents reported that they had been influenced by media content to change their attitude related to gender norms or violence. Responses on how frequently respondents discuss the influence of media on gender norms and violence with peers, family or teachers were in the order: occasionally/rarely>frequently>never.

**Table 4.3: Evaluation of Personal Experiences/Perceptions on Media Literacy and GBV(n=150)**

| Statement  | Option | n   | %  |
|--|--------|-----|----|
| Have you ever witnessed or experienced gender-based violence (physical, verbal, or emotional) among your peers or in your school environment?    | Yes    | 90  | 60 |
|  | No     | 42  | 28 |
|  | Maybe  | 18  | 12 |
| Have you received any formal education or training on media literacy and its relation to gender-based violence prevention?                       | Yes    | 42  | 28 |
|  | No     | 78  | 52 |
|  | Maybe  | 30  | 20 |
| Do you think media literacy education can be effective in preventing gender-based violence among young people?                                   | Yes    | 108 | 72 |
|  | No     | 6   | 4  |
|  | Maybe  | 36  | 24 |
| Do you think high schools should organize awareness campaigns or events to promote media literacy and prevent gender-based violence?             | Yes    | 96  | 64 |
|  | No     | 24  | 16 |
|  | Maybe  | 30  | 20 |
| Do you think the inclusion of media literacy education in high schools can have long-term benefits in terms of preventing gender-based violence? | Yes    | 120 | 80 |
|  | No     | 6   | 4  |
|  | Maybe  | 24  | 16 |

Personal experiences and perceptions of respondents on media literacy on GBV (table 3) showed that 60% had experienced gender-based violence among peers and in school environment. Only 28% of respondents had received formal education on media literacy and its relation to gender-based violence prevention, 52% had no gotten any form of education while 20% were unsure. 72% of respondents (108) answered yes when asked if media literacy can be effective in preventing gender-based violence among young people whereas 24% answered no to the question. 64% of respondents (96) agreed that school should organize awareness campaigns or events to promote media literacy and prevent gender-based violence while 16% (24) disagreed and 20% (30) were unsure. 80% (120) of respondents agreed that inclusion of media literacy education in high schools can have long-term benefits in terms of preventing gender-based violence whereas 4% (6) and 16% (24) were unsure.

**Table 4.4: Evaluation of Role of Media Literacy on GBV (n=150)**

| Statement   | Option | n   | %  |
|---|--------|-----|----|
| Exposure to media violence contributes to an increase in aggressive behaviors among young people.                       | Yes    | 102 | 68 |
|   | No     | 12  | 8  |
|   | Maybe  | 36  | 24 |
| Media portrayals of gender-based violence can desensitize young people to its seriousness.                              | Yes    | 72  | 48 |
|   | No     | 30  | 20 |
|   | Maybe  | 48  | 32 |
| Media can play a positive role in promoting healthy relationships and gender equality.                                  | Yes    | 72  | 48 |
|   | No     | 24  | 16 |
|   | Maybe  | 54  | 36 |
| Media representations of healthy and respectful relationships have positively influenced my own relationship behaviors. | Yes    | 96  | 64 |
|   | No     | 6   | 4  |
|   | Maybe  | 48  | 32 |
| Media exposure plays a significant role in shaping societal attitudes towards gender-based violence.                    | Yes    | 117 | 78 |
|   | No     | 9   | 6  |
|   | Maybe  | 24  | 16 |

Table 4 shows the evaluation of the role of media literacy on GBV (table 4) shows that 68% (102) agreed that exposure to media violence contributes to an increase in aggressive behaviors among young people. 48% (72)

respondents agreed that media portrayals of gender-based violence can desensitize young people to its serious while 20% (30) and 32% (48) were unsure. The highest responses were “Yes” (48%) for the statement on media can play a positive role in promoting healthy relationships and gender equality. The range of responses were Yes>Maybe>No for the statement media representations of healthy and respectful relationships have positively influenced my own relationship behaviors. On media exposure playing a significant role in shaping societal attitudes towards gender-based violence, the responses were as follows: Yes (117, 78%), No (9, 6%) and Maybe (24, 16%).

**Table 4.5: Evaluation of Effectiveness of Media Literacy Interventions on GBV (n=150)**

| Statement  | Option | n   | %    |
|--|--------|-----|------|
| Media literacy interventions can increase knowledge about gender-based violence and its prevention among high school students  | Yes    | 100 | 66.7 |
|  | No     | 20  | 13.3 |
|  | Maybe  | 30  | 20   |
| Media literacy interventions can help high school students develop critical thinking skills to analyze and evaluate media messages related to gender-based violence. | Yes    | 72  | 48   |
|  | No     | 24  | 16   |
|  | Maybe  | 54  | 36   |
| Media literacy interventions can help high school students identify and challenge harmful gender stereotypes and portrayals in the media.                            | Yes    | 42  | 28   |
|  | No     | 78  | 52   |
|  | Maybe  | 30  | 20   |
| Media literacy interventions can improve the ability of high school students to recognize and resist media messages that promote gender-based violence.              | Yes    | 114 | 76   |
|  | No     | 6   | 4    |
|  | Maybe  | 30  | 20   |
| Media literacy interventions can positively influence the attitudes and beliefs of high school students regarding gender-based violence prevention.                  | Yes    | 120 | 80   |
|  | No     | 30  | 20   |
|  | Maybe  | 0   | 0    |

Evaluation of effectiveness of media literacy interventions on GBV is shown in table 5 above. The responses for the statements were as follows: Media literacy interventions can increase knowledge about gender-based violence and its prevention among high school students-Yes (100, 66.7%), No (20, 13.3%) and maybe (30, 20%); Media literacy interventions can help high school students develop critical thinking skills to analyze and evaluate media messages related to gender-based violence Yes (72, 48%), No (24, 16%) and Maybe (54, 36%). Media literacy interventions can help high school students identify and challenge harmful gender stereotypes and portrayals in the media-Yes (42, 28%), No (78, 52%) and Maybe (30, 20%), Media literacy interventions can improve the ability of high school students to recognize and resist media messages that promote gender-based violence-Yes (114, 76%), No (6, 4%) and Maybe (30, 20%). Media literacy interventions can positively influence the attitudes and beliefs of high school students regarding gender-based violence prevention-Yes (120, 80%), No (30, 20%) and Maybe (0, 0%).

**Table 4.6: Evaluation of Barriers/Facilitators of Integrating Media Literacy Education (n=150)**

| Statement  | Option | n   | %  |
|--|--------|-----|----|
| Limited resources (financial, technological, etc.) pose a challenge to implementing media literacy education in high schools.                    | Yes    | 90  | 60 |
|  | No     | 12  | 8  |
|  | Maybe  | 48  | 32 |
| Insufficient teacher training and professional development opportunities hinder the effective integration of media literacy education.           | Yes    | 102 | 68 |
|  | No     | 48  | 32 |
|  | Maybe  | 0   | 0  |
| Resistance or lack of support from school administration and policymakers is a barrier to implementing media literacy education in high schools. | Yes    | 96  | 64 |
|  | No     | 24  | 16 |
|  | Maybe  | 30  | 20 |
| Concerns about the controversial or sensitive nature of some media literacy topics act as a barrier to their inclusion in high school curricula. | Yes    | 96  | 12 |
|  | No     | 12  | 8  |
|  | Maybe  | 42  | 28 |

|   |       |     |      |
|---|-------|-----|------|
| Collaboration with external partners, such as media organizations or community groups, can facilitate the integration of media literacy education into high school curricula. | Yes   | 132 | 88   |
|   | No    | 6   | 4    |
|   | Maybe | 12  | 8    |
| Availability of relevant and age-appropriate media literacy resources and materials supports the successful implementation of media literacy education.                       | Yes   | 114 | 76   |
|   | No    | 12  | 8    |
|   | Maybe | 24  | 16   |
| Providing teachers with access to comprehensive media literacy curricula and lesson plans would facilitate the integration of media literacy education.                       | Yes   | 111 | 74   |
|   | No    | 32  | 21.3 |
|   | Maybe | 7   | 4.7  |

Table 6 shows the evaluation of barriers/facilitators of integrating media literacy education. Limited resources (financial, technological, etc.) pose a challenge to implementing media literacy education in high schools-Yes (90, 60%), No (12, 8%) and Maybe (48, 32%); Insufficient teacher training and professional development opportunities hinder the effective integration of media literacy education-Yes (102, 68%), No (48, 32%), and Maybe (0, 0%); Resistance or lack of support from school administration and policymakers is a barrier to implementing media literacy education in high schools- Yes (96, 64%), No (24, 16%), Maybe (30, 20%). Concerns about the controversial or sensitive nature of some media literacy topics act as a barrier to their inclusion in high school curricula-Yes (96, 12%), No (12, 8%), Maybe (42,28%); Collaboration with external partners, such as media organizations or community groups, can facilitate the integration of media literacy education into high school curricula-Yes (132, 88%), No (6, 4%), Maybe (12, 8%); Availability of relevant and age-appropriate media literacy resources and materials supports the successful implementation of media literacy education-Yes (114, 76%), No (12, 8%), Maybe (24, 16%); Providing teachers with access to comprehensive media literacy curricula and lesson plans would facilitate the integration of media literacy education-Yes (111, 74%), No (32, 21.3%), Maybe (7, 4.7%).

**Table 4.7: Comparison of scale items by socio-demographic status (n=150)**

| Factor                     | Media consumption habits (M±SD) | Personal Experiences/ Perceptions on media literacy and GBV(M±SD) | Role of media literacy on GBV (M±SD) | Effectiveness of Media Literacy Interventions on GBV (M±SD) | Barriers/ Facilitators of Integrating Media Literacy Education (M±SD) |
|----------------------------|---------------------------------|---|--------------------------------------|---|---|
| <b>Gender</b>              |                                 |   |                                      |   |   |
| Male                       | 2.26±0.63                       | 1.56±0.55   | 1.64±0.68                            | 1.44±0.75   | 1.60±0.58   |

| <b>*P-value</b>            | 0.009                           | 0.186   | 0.677                                | 0.470   | 0.687   |

\*Significant differences exist if  $p < 0.05$

Table 7 shows the comparison of scale items to responses of respondents according to socio-demographic data. The result shows that there was no significant difference between response of male and female respondents on question about personal experiences and perceptions on media literacy and GBV as well as effectiveness of

media literacy interventions on GBV while significant differences were observed between male and female respondents with respect to questions on Media consumption habits, Role of media literacy on GBV and Barriers/Facilitators of Integrating Media Literacy Education. With the exception of role of media literacy on GBV, there was significant differences in the age distribution of respondents (0.000, 0.002, 0.016 and 0.008 respectively). Similarly, there was significant mean differences in the respondents' religion with respect to questions on role of media literacy on GBV (0.117) while significant differences existed in other scale items- media consumption habits (0.000), personal experiences/perceptions on media literacy and GBV (0.000), effectiveness of media literacy interventions on GBV (0.003) and barriers/facilitators of integrating media literacy education (0.053). There was significant difference in responses towards questions on media consumption habits (0.009) with respect to year in high school, however no significant difference was observed in other scale items: personal experiences/perceptions on media literacy and GBV (0.186), role of media literacy on GBV (0.677), effectiveness of media literacy interventions on GBV (0.470) and barriers/facilitators of integrating media literacy education (0.687).

## 4.2 Discussion

The gender distribution in our study revealed that 56% of respondents were males and 44% were females. This distribution underscores the need for tailored interventions that address both genders' perspectives on GBV. According to Smith and Hamon (2020), media literacy programs should engage young men and women equally, encouraging critical discussions about media portrayals of gender roles and relationships. Such interventions can lead to a heightened awareness of how media contributes to harmful gender norms and an increased capacity to challenge and reject such narratives. The age distribution of this study spanned three categories: 16-19 years, 12-15 years, and above 20 years. This finding aligns with the literature that highlights the importance of starting media literacy interventions at an early age (UNESCO, 2019). Early exposure to media literacy education equips youths with the tools to recognize and critique instances of GBV depicted in media content, fostering a culture of respect and equality from a young age. The religious distribution indicated that 84% of respondents identified as Christians, with traditional religion being the least reported. This distribution resonates with the work of Liew and Koh (2018), who emphasize the role of media literacy in promoting religious tolerance and combating gender stereotypes perpetuated by religious narratives. Addressing how media influences perceptions of gender within religious contexts can contribute to reducing GBV driven by religious beliefs. The majority of respondents in our study were in the senior secondary section, indicative of a higher representation of individuals pursuing advanced education. This aligns with literature that suggests higher education levels correlate with increased media literacy skills (Hobbs & Jensen, 2009). Educated youths are better positioned to critically assess media messages, identify GBV themes, and challenge harmful content through informed discussions and activism.

The findings from Table 2 highlight the evolving landscape of media consumption. Social media platforms have emerged as the primary source of news for a substantial proportion of respondents (80%), signifying the increasing influence of online platforms in shaping public opinion. Traditional sources such as newspapers and magazines still hold a presence, albeit at a lower proportion (13%). These results underscore the need for interventions that address media literacy in the context of rapidly changing media consumption habits. These findings corroborate the findings of a previous research by Smith et al. (2019), which highlighted the increasing prominence of social media as a news source among youths. The dominance of social media platforms suggests that interventions targeting media literacy should address the unique challenges posed by these platforms, such as the rapid spread of misinformation and reinforcement of gender stereotypes (Jones, 2020). The time spent consuming news and media is a crucial factor in understanding exposure levels. Our study indicated that the majority of respondents spent 1-4 hours per day consuming news, with a substantial proportion dedicating 3-4 hours (34.6%). These figures emphasize the substantial role media plays in daily life and the potential for significant impact on perceptions and attitudes. This finding is consistent with research conducted by Williams and Currie (2018), which emphasized the need to engage youths in critical discussions about media content due to their significant exposure. These authors argued that the time spent consuming media necessitates a comprehensive understanding of media literacy skills to counteract potential negative influences. An encouraging finding is the willingness of a significant portion of respondents (48%) to seek out media content that challenges traditional gender norms and promotes gender equality. This demonstrates an emerging awareness and interest in content that goes beyond conventional portrayals. However, the presence of 8% who reported never seeking such content indicates the need for targeted efforts to promote critical engagement with media. This aligns with the findings of Chang et al. (2021), who argued that youths are increasingly drawn to media content that reflects diversity and challenges harmful stereotypes. Their study highlighted the role of gender norm-challenging media in promoting more positive attitudes and behaviors among young audiences. Perhaps the most striking revelation is the high percentage (96%) of respondents who reported being influenced by media content to alter their attitudes towards gender norms and violence. This statistic underscores the media's potential as a catalyst for positive change. The wide-reaching impact of media content on attitudes holds

promise for leveraging media literacy interventions to foster more equitable and non-violent societal norms. The substantial influence of media content on attitude change, as reported by 96% of our respondents, resonates with the work of Anderson et al. (2017). Their research emphasized the power of media in shaping perceptions and fostering attitude change, particularly among youths. The strong influence reported in our study underscores the importance of media literacy education as a means of equipping young individuals with critical thinking skills to navigate and evaluate media messages effectively.

The study's results reveal a concerning reality, with 60% of respondents reporting personal experiences of gender-based violence within their peer groups and school environments. This statistic underscores the urgency of addressing GBV and emphasizes the importance of effective preventive measures. Media literacy, through its ability to foster critical thinking and awareness, could play a pivotal role in countering the normalization of such violence perpetuated by media portrayals. The research highlights the existing gap in media literacy education, with only 28% of respondents having received formal education on the topic in relation to GBV prevention. This deficiency raises questions about the extent to which individuals are equipped to discern and challenge harmful media messages that contribute to gender-based violence. Addressing this gap should be a priority in educational institutions and beyond. Encouragingly, a majority (72%) of respondents acknowledged the potential effectiveness of media literacy in preventing gender-based violence among young people. This finding suggests a growing recognition of media literacy as a tool for fostering critical consciousness and promoting healthier attitudes and behaviors. However, the 24% who answered negatively underscore the need for further exploration into potential barriers or misconceptions surrounding media literacy's impact. Opinions on the role of schools in promoting media literacy were also explored. Sixty-four percent of respondents expressed agreement that schools should organize awareness campaigns or events to enhance media literacy and prevent gender-based violence. This suggests a call for educational institutions to take an active role in shaping students' media consumption habits and facilitating discussions about responsible media engagement. An overwhelming 80% of respondents believed that integrating media literacy education into high school curricula could yield long-term benefits in preventing gender-based violence. This finding reflects a growing consensus on the potential of education to equip young individuals with the tools needed to navigate the media landscape responsibly and counteract harmful messages. The literature on media literacy and GBV prevention among youths corroborates the findings of our research, emphasizing the critical role of media literacy education in addressing the root causes of GBV. Scholars such as Peter (2018) argue that media literacy equips young people with the skills to critically analyze media messages, question harmful stereotypes, and identify instances of sexism and violence. This awareness empowers youths to challenge and resist the normalization of GBV perpetuated by media representations. Furthermore, the works of Johnson and Tyner (2020) suggest that integrating media literacy into formal education, particularly in high schools, can facilitate discussions about consent, healthy relationships, and gender equality. Such discussions provide a platform for young individuals to engage critically with media portrayals and develop the capacity to reject harmful messages that contribute to GBV.

Gender-based violence (GBV) remains a deeply entrenched issue across societies, necessitating a comprehensive approach to prevention and intervention. One noteworthy finding from this research (Table 4) is that a substantial portion of respondents, 68% (102), concurred that exposure to media violence contributes to an increase in aggressive behaviors among young people. This alignment with the notion of media-induced aggression underscores the need for enhanced media literacy programs to empower individuals to decipher and critically evaluate the impact of violent content on their attitudes and behaviors. This assertion is consistent with the literature that highlights the potential for media violence to shape aggressive tendencies among its consumers (Anderson et al., 2003). Another striking observation is that 48% (72) of participants acknowledged that media portrayals of gender-based violence can desensitize young people to the severity of such acts. This finding raises concerns about the potential normalization of GBV through media representations. Media literacy interventions could play a crucial role in enabling individuals to recognize, question, and challenge distorted depictions of violence, ultimately fostering empathy and a heightened sensitivity to GBV-related issues (Kellner & Share, 2007). The assertion that media can play a positive role in promoting healthy relationships and gender equality garnered the highest agreement rate at 48%. This finding suggests an opportunity for media literacy initiatives to harness positive media content as a catalyst for encouraging respectful interactions and dismantling harmful gender stereotypes. Recognizing the potential of media to inspire positive change, it becomes imperative to incorporate media literacy strategies that empower individuals to engage critically with media messages and discern positive relationship models (L'Engle et al., 2012). The study also looked at the role of media exposure in shaping societal attitudes towards GBV. The results indicate a strong consensus, with 78% (117) of respondents affirming that media exposure plays a significant role in shaping such attitudes. This finding underscores the pivotal role media literacy can play in fostering an understanding of the interconnectedness between media representations and cultural norms. By cultivating critical thinking skills, media literacy interventions can empower individuals to challenge harmful attitudes perpetuated by media and contribute to the broader movement against GBV (Buckingham, 2003).

Gender-based violence (GBV) remains a significant and pervasive issue in societies around the world. Efforts to prevent and address GBV require a multi-faceted approach, and one such approach is through media literacy interventions. Media literacy programs aim to equip individuals, particularly high school students in this context, with the skills and knowledge necessary to critically analyze and navigate the media landscape. The results reveal a notable consensus among participants on the potential of media literacy interventions to increase knowledge about GBV and its prevention. A substantial majority (66.7%) expressed a positive inclination towards the effectiveness of these interventions in enhancing understanding of GBV. This signifies that media literacy can serve as an impactful educational tool, providing students with valuable insights into the dynamics of gender-based violence and strategies for prevention. The positive response towards media literacy interventions increasing knowledge about gender-based violence is consistent with existing literature. Media literacy programs have been shown to enhance participants' understanding of various social issues, including gender-based violence (Livingstone & Helsper, 2006). These programs provide opportunities for youths to engage critically with media content and develop a deeper awareness of societal challenges. Another crucial aspect examined is the extent to which media literacy interventions contribute to the development of critical thinking skills among high school students. Nearly half of the respondents (48%) endorsed the belief that these interventions indeed facilitate the cultivation of critical thinking abilities. This finding underscores the potential of media literacy to empower students with the tools needed to decipher, deconstruct, and critically evaluate media messages related to GBV. The finding that media literacy interventions contribute to the development of critical thinking skills aligns with the core goals of media literacy education. Literature emphasizes that media literacy empowers youths to analyze and interpret media messages, enabling them to recognize and challenge biased or harmful content (Kubey & Csikszentmihalyi, 2002). Addressing harmful gender stereotypes perpetuated by media is a vital step in GBV prevention. However, the results in this category indicate a more divided perspective. While a significant portion (28%) acknowledged the potential of media literacy interventions in aiding the identification and challenging of harmful gender stereotypes, a majority (52%) remained skeptical. This suggests the need for more targeted and robust interventions to effectively address and counter the influence of media-driven stereotypes. The divided perspective on challenging harmful gender stereotypes through media literacy interventions echoes a common challenge in media literacy education. While media literacy programs can be effective in promoting critical thinking, addressing deeply ingrained stereotypes requires ongoing and comprehensive efforts beyond the classroom (Jenkins, 2016). Perhaps one of the most promising findings lies in the participants' responses regarding the ability of media literacy interventions to empower students to recognize and resist media messages that promote gender-based violence. An overwhelming majority (76%) expressed confidence in the positive impact of these interventions, highlighting their potential in cultivating a generation of media-savvy individuals who are equipped to combat the normalization of GBV in media narratives. The strong belief in the ability of media literacy interventions to empower youths to resist media messages promoting gender-based violence is consistent with the concept of empowerment through critical media engagement (Buckingham, 2003). Such interventions can help youths become active agents in shaping media narratives and challenging harmful content. Media literacy interventions are posited to play a significant role in shaping how high school students perceive and approach gender-based violence. The data reflects an encouraging trend, with 80% of respondents endorsing the notion that media literacy interventions can foster positive attitudes and beliefs related to GBV prevention. Notably, no respondents were uncertain about this potential influence. This finding suggests that media literacy programs could be a potent tool for transforming societal attitudes towards GBV. The overwhelming agreement that media literacy interventions can positively influence attitudes and beliefs corresponds to research indicating that media literacy can impact attitudes towards social issues (Cohen, 2001). Exposure to diverse perspectives through media literacy can lead to more empathetic and informed attitudes.

The findings reveal several barriers that hinder the seamless integration of media literacy education in high schools. Limited resources, encompassing financial and technological constraints, emerge as a substantial challenge, with 60% of respondents acknowledging its impact. This highlights the need for strategic allocation of resources to ensure effective media literacy instruction. The study's findings underscore several barriers that hinder the seamless integration of media literacy education in high schools. Limited resources, comprising both financial and technological constraints, were identified by 60% of respondents. This highlights the imperative of strategic resource allocation to ensure the efficacy of media literacy instruction. Comparable research by Smith et al. (2018) supports these findings, indicating that inadequate funding often impedes comprehensive implementation of innovative educational initiatives. Insufficient teacher training and professional development opportunities are identified as a significant barrier by 68% of respondents. This underscores the importance of investing in robust training programs for educators, enabling them to confidently deliver media literacy content and equip students with the necessary skills to critically engage with media messages. This finding emphasizes the necessity of investing in robust training programs to equip teachers with the skills and confidence required to deliver effective media literacy content. Previous research by Johnson (2017) aligns with this, suggesting that well-trained educators play a pivotal role in fostering critical media literacy skills among students. Resistance or

lack of support from school administration and policymakers, identified by 64% of participants, presents a considerable challenge. Overcoming this barrier requires advocating for media literacy education at higher institutional levels and fostering a collaborative environment that recognizes its value in GBV prevention. A study by Brown and Martinez (2019) echoes this sentiment, underscoring the need for a supportive administrative framework to promote successful curriculum integration. Concerns about the controversial or sensitive nature of some media literacy topics are acknowledged by 62% of respondents. Addressing this barrier calls for a balanced approach in designing curricula that encourage open dialogue and respectful exploration of challenging subjects. Addressing sensitive or controversial media literacy topics, acknowledged by 62% of respondents, necessitates a balanced approach in curriculum design to encourage open dialogue and respectful exploration. Similar findings from Green et al. (2020) emphasize the importance of creating a safe space for students to engage with challenging subjects without fear of judgment. The research findings also illuminate key facilitators that enhance the successful integration of media literacy education in high schools. Collaborative partnerships with external organizations, such as media outlets and community groups, emerge as a promising facilitator, supported by 88% of respondents. This suggests that partnerships enrich curriculum content, provide real-world context, and enhance students' understanding of media's influence on GBV. This finding resonates with the work of Anderson and Thompson (2016), who emphasize the value of real-world connections in educational settings. Availability of relevant and age-appropriate media literacy resources and materials is identified as a significant facilitator by 76% of participants. Providing well-curated resources empowers educators to deliver engaging lessons that resonate with students, fostering a deeper appreciation for media literacy's role in GBV prevention. Parallel research by Jones et al. (2019) underscores the importance of tailored instructional materials to enhance student engagement and learning outcomes. Additionally, the provision of comprehensive media literacy curricula and lesson plans is recognized as a facilitator by 74% of respondents. This underscores the significance of equipping educators with well-structured materials that streamline curriculum design, allowing teachers to focus on effective instruction and skill development. Similar findings by Williams et al. (2021) emphasize the importance of accessible and organized curricular resources in promoting successful educational implementation.

One of the most striking observations from the data is the existence of significant gender disparities in respondents' perceptions and experiences related to media literacy and GBV. Interestingly, there was no significant difference between male and female respondents concerning personal experiences and perceptions of media literacy's role in GBV, suggesting that both genders share similar views on this issue. Equally intriguing is the absence of significant differences in the effectiveness of media literacy interventions on GBV between male and female respondents. This similarity in responses underscores the potential of media literacy programs to resonate across gender lines, emphasizing their role as a unifying force in GBV prevention efforts. Similar to the findings in this research, existing studies have often explored gender disparities in media consumption habits and the potential impact of media literacy interventions. Many researchers have noted that media can perpetuate harmful gender stereotypes and contribute to the normalization of gender-based violence. Effective media literacy programs have been shown to empower young individuals to critically analyze and deconstruct media messages that reinforce such stereotypes and behaviors (Lamb, 2017). However, significant differences between male and female respondents surfaced in various dimensions. Notably, differences in media consumption habits point to potential gender-specific preferences or exposure patterns that warrant further exploration. The observed variations could be attributed to societal norms, cultural influences, or the portrayal of gender roles in media content. These disparities emphasize the importance of tailoring media literacy interventions to address and challenge gender-specific stereotypes and media preferences. Moreover, similar to the findings of this research, previous studies have indicated that media literacy education can play a crucial role in preventing gender-based violence among youths. By enhancing critical thinking skills and fostering a deeper understanding of media representations, young people can develop the tools needed to challenge and resist harmful messages, ultimately contributing to the reduction of gender-based violence (Peter & Valkenburg, 2006). The study also highlights the role of age and religion in shaping respondents' perceptions of media literacy and GBV. Significant differences in responses related to age distribution and religious affiliation indicate the nuanced impact of these factors on individuals' views. Particularly noteworthy is the significant difference in respondents' perceptions regarding the role of media literacy in GBV based on religion. This suggests that religious beliefs and values may intersect with media literacy attitudes, potentially influencing how individuals interpret and engage with media messages related to gender and violence. Another intriguing finding is the relationship between respondents' year in high school and their media consumption habits. The significant difference in media consumption patterns based on educational level highlights the importance of targeting media literacy interventions to specific age groups and educational stages. Understanding these nuances can aid in developing more tailored and effective strategies for engaging youth at various points in their education. Socio-demographic factors, including age, religion, and education, have been acknowledged in various studies as influential factors in shaping youths' responses to media and attitudes towards gender-based violence. Different age groups may have varying levels of media literacy skills and susceptibility to media influences. Similarly, religious beliefs and

cultural norms can impact the interpretation and acceptance of gender-related messages in media (Khan & Raheem, 2017). The data also shed light on the barriers and facilitators of integrating media literacy education. Although the differences were not significant in all aspects, the variations underscore the need for targeted approaches when addressing obstacles to implementing media literacy programs. Identifying and mitigating these barriers can enhance the efficacy of interventions and contribute to more comprehensive GBV prevention strategies. The identification of barriers and facilitators to integrating media literacy education aligns with a common thread in the existing literature. Research has highlighted challenges such as limited resources, lack of trained educators, and resistance to change within educational systems. On the flip side, supportive school environments, collaboration between stakeholders, and innovative teaching approaches have been identified as key facilitators (Pek & Chua, 2016). Many studies have stressed that the effectiveness of media literacy interventions can vary based on the unique experiences and identities of young individuals, emphasizing the need for culturally sensitive and inclusive approaches (Peralta & Fleming-Muñoz, 2018).

## CONCLUSION

### 5.1 Conclusion

In conclusion, the findings from this comprehensive study provide valuable insights into the complex relationship between media literacy, gender-based violence (GBV), and the attitudes of high school students. The gender distribution results underscore the importance of tailored interventions that address both genders' perspectives on GBV, reflecting the need for media literacy programs that engage young men and women equally. The age distribution findings highlight the significance of early exposure to media literacy education, emphasizing the potential of such interventions to equip youths with the tools to recognize and challenge instances of GBV depicted in media content from a young age. The religious distribution results suggest the importance of addressing how media influences perceptions of gender within religious contexts to combat GBV driven by religious beliefs.

The study's exploration of media consumption habits reveals the growing influence of social media platforms as primary sources of news, pointing to the need for media literacy interventions that address the unique challenges posed by these platforms. The considerable time spent consuming news emphasizes the significant impact of media on perceptions and attitudes, underscoring the necessity of comprehensive media literacy education to counteract potential negative influences.

The study's revelation of respondents' willingness to seek out media content challenging traditional gender norms is encouraging, but the presence of those who do not underscores the necessity of targeted efforts to promote critical engagement with media. Furthermore, the overwhelming influence of media content on respondents' attitudes towards gender norms and violence underscores the immense potential of media literacy interventions to foster more equitable and non-violent societal norms.

The research also highlights the urgent need for comprehensive GBV prevention measures, as a substantial portion of respondents reported personal experiences of gender-based violence within their peer groups and school environments. The study's identification of barriers and facilitators in integrating media literacy education in high schools offers valuable insights for designing effective interventions. Collaborative partnerships with external organizations, availability of relevant resources, and comprehensive curricula emerge as key facilitators, while limited resources and inadequate teacher training are significant barriers.

### 5.2 Recommendations

In light of these findings, it is evident that media literacy education has a crucial role to play in addressing GBV and shaping more informed, critical, and empathetic generations. The study underscores the importance of developing targeted, culturally sensitive, and inclusive media literacy interventions that recognize the diverse experiences and perspectives of high school students. By equipping youths with the skills to navigate and critically analyze media messages, media literacy programs can contribute significantly to the prevention of gender-based violence and the cultivation of a more just and equitable society. Based on the findings of this comprehensive study, several key recommendations emerge to guide the development and implementation of effective media literacy interventions aimed at preventing gender-based violence (GBV) among high school students:

1. **Tailored Interventions:** Design media literacy programs that address both genders' perspectives on GBV. Recognize and respond to the specific needs, experiences, and concerns of male and female students, ensuring that interventions are inclusive and relevant to all.
2. **Early Exposure:** Start media literacy education at an early age to equip young individuals with critical thinking skills necessary to recognize and challenge harmful media messages. Develop age-appropriate curriculum content that empowers students to engage with media content constructively from a young age.
3. **Religious Context:** Address how media influences perceptions of gender within religious contexts to combat GBV driven by religious beliefs. Collaborate with religious leaders and institutions to develop

media literacy initiatives that encourage critical analysis of gender-related narratives within religious media.

4. **Social Media Focus:** Recognize the dominance of social media platforms as primary sources of news among high school students. Develop specialized media literacy modules that specifically target the challenges posed by social media platforms, including the rapid spread of misinformation and reinforcement of harmful gender stereotypes.
5. **Teacher Training:** Invest in comprehensive teacher training and professional development programs to ensure educators are equipped with the knowledge and skills to effectively deliver media literacy education. This includes fostering an understanding of GBV dynamics and media's role in perpetuating harmful narratives.
6. **Resource Allocation:** Allocate sufficient resources, including funding and technological support, to enable the successful integration of media literacy education into high school curricula. Provide educators with the necessary tools, materials, and resources to create engaging and impactful learning experiences.
7. **Partnerships and Collaboration:** Forge collaborative partnerships with external organizations, such as media outlets and community groups, to enrich curriculum content and provide real-world context. Engage experts and practitioners to contribute to media literacy initiatives and enhance the authenticity of educational content.
8. **Inclusive Curriculum Design:** Develop inclusive and culturally sensitive media literacy curricula that consider diverse backgrounds, experiences, and identities. Ensure that educational materials reflect the various perspectives and challenges related to GBV prevention.
9. **Address Sensitive Topics:** Create a safe and open environment for discussing sensitive or controversial media literacy topics. Encourage respectful dialogue and exploration of challenging subjects, allowing students to critically engage with complex issues.
10. **Long-term Integration:** Advocate for the integration of media literacy education into high school curricula as a long-term strategy for preventing GBV. Highlight the potential benefits of cultivating critical thinking skills, fostering positive attitudes, and challenging harmful media narratives.
11. **Evaluation and Assessment:** Continuously monitor and evaluate the effectiveness of media literacy interventions in preventing GBV. Collect and analyze data to measure changes in students' attitudes, behaviors, and perceptions over time, allowing for ongoing refinement of program strategies.
12. **Cross-disciplinary Approach:** Integrate media literacy education across various subjects and disciplines to reinforce its importance and create a holistic understanding of media's influence on GBV and gender norms.

By incorporating these recommendations into media literacy initiatives, educational institutions, policymakers, and stakeholders can collaboratively contribute to the prevention of gender-based violence and the promotion of healthier, more equitable societal norms among high school students.

## Appendix I Questionnaire

### The Role of Media Literacy in Preventing Gender-Based Violence Among Youths: A Case Study of High Schools

You are being asked to participate in a study about “**The Role of Media Literacy in Preventing Gender-Based Violence Among Youths: A Case Study of High Schools**”. It is important that you answer the questions truly and honestly in terms of reliability and validity of the research. Your personal identity information will not be used at all in the research process and questionnaires. Please answer all the questions thoroughly. Answering the questions and filling the questionnaire will take not more than 15 minutes.

Thank you for your time and participation.

#### Section 1: Socio-Demographic Information

1. What is your gender? Male [ ] Female [ ]
2. What is your age: : 12-15 [ ] 16-19 [ ] >20 [ ]
3. What is your religion? Christianity [ ] Islam [ ] Traditional [ ]
4. What level are you in High School? Junior [ ] Senior [ ]

#### Section 2: Media consumption habits/ Media Literacy Assessment

6. Where do you primarily get your news from? Television [ ] Newspaper/magazine [ ] social media platforms [ ] online news websites [ ]
7. On average, how many hours per day do you spend consuming news and media (including television, movies, social media, news websites, etc.)? Less than 1 hour [ ] 1-2 hours [ ] 2-3 hours [ ] 3-4 hours [ ] More than 4 hours [ ]
8. How often do you actively seek out media content that challenges traditional gender norms and promotes gender equality? Very often [ ] Often [ ] Occasionally [ ] Rarely [ ] Never [ ]

8. Do you feel that your media consumption habits align with your values regarding gender equality and the prevention of gender-based violence? Yes, always [ ] Yes, sometimes [ ] No, not often [ ] No, never [ ]

9. Have you ever been influenced by media content to change your attitudes or behaviors related to gender norms or violence? Yes [ ] No [ ]

10. How frequently do you discuss the influence of media on gender norms and violence with your peers, family, or teachers? Very frequently [ ] Frequently [ ] Occasionally [ ] Rarely [ ] Never [ ]

| S/N   | Item.  | Yes | No | Maybe |
|---|--|-----|----|-------|
| <b>Section 3: Personal Experiences and Perceptions on media literacy and GBV</b>    |  |     |    |       |
| 11.   | Have you ever witnessed or experienced gender-based violence (physical, verbal, or emotional) among your peers or in your school environment?                        |     |    |       |
| 12.   | Have you received any formal education or training on media literacy and its relation to gender-based violence prevention?   |     |    |       |
| 13.   | Do you think media literacy education can be effective in preventing gender-based violence among young people?   |     |    |       |
| 14.   | Do you think high schools should organize awareness campaigns or events to promote media literacy and prevent gender-based violence?                                 |     |    |       |
| 15.   | Do you think the inclusion of media literacy education in high schools can have long-term benefits in terms of preventing gender-based violence?                     |     |    |       |
| <b>Section 4: Role of media literacy on GBV</b>                                     |  |     |    |       |
| 16.   | Exposure to media violence contributes to an increase in aggressive behaviors among young people.  |     |    |       |
| 17.   | Media portrayals of gender-based violence can desensitize young people to its seriousness.   |     |    |       |
| 18.   | Media can play a positive role in promoting healthy relationships and gender equality.   |     |    |       |
| 19.   | Media representations of healthy and respectful relationships have positively influenced my own relationship behaviors.  |     |    |       |
| 20.   | Media exposure plays a significant role in shaping societal attitudes towards gender-based violence.   |     |    |       |
| <b>Section 5: Effectiveness of Media Literacy Interventions on GBV</b>              |  |     |    |       |
| 21.   | Media literacy interventions can increase knowledge about gender-based violence and its prevention among high school students.                                       |     |    |       |
| 22.   | Media literacy interventions can help high school students develop critical thinking skills to analyze and evaluate media messages related to gender-based violence. |     |    |       |
| 23.   | Media literacy interventions can help high school students identify and challenge harmful gender stereotypes and portrayals in the media.                            |     |    |       |
| 24.   | Media literacy interventions can improve the ability of high school students to recognize and resist media messages that promote gender-based violence.              |     |    |       |
| 25.   | Media literacy interventions can positively influence the attitudes and beliefs of high school students regarding gender-based violence prevention.                  |     |    |       |
| <b>Section 6: Barriers and Facilitators of Integrating Media Literacy Education</b> |  |     |    |       |
| 26.   | Limited resources (financial, technological, etc.) pose a challenge to implementing media literacy education in high schools.  |     |    |       |
| 27.   | Insufficient teacher training and professional development opportunities hinder the effective integration of media literacy education.                               |     |    |       |
| 28.   | Resistance or lack of support from school administration   |     |    |       |

|     |   |  |  |  |
|-----|---|--|--|--|
|     | and policymakers is a barrier to implementing media literacy education in high schools.   |  |  |  |
| 29. | Concerns about the controversial or sensitive nature of some media literacy topics act as a barrier to their inclusion in high school curricula.                              |  |  |  |
| 30. | Collaboration with external partners, such as media organizations or community groups, can facilitate the integration of media literacy education into high school curricula. |  |  |  |
| 31. | Availability of relevant and age-appropriate media literacy resources and materials supports the successful implementation of media literacy education.                       |  |  |  |
| 32. | Providing teachers with access to comprehensive media literacy curricula and lesson plans would facilitate the integration of media literacy education.                       |  |  |  |

# THE ROLE OF SOCIAL MEDIA IN SHAPING CAREER CHOICES OF ASIAN AMERICAN STUDENTS

Nguyen, DIEM  
dnguyen23@liberty.edu

## ABSTRACT

This study explored the role of social media on the career choices of Asian American students, particularly those opting for non-STEM fields, drawing on qualitative data from a sample of 12 participants. The findings revealed that social media exerted both positive and negative influences on career development. Positive influences included exposure to diverse career possibilities, fostering community connections and support, and providing role models and inspirational content. Conversely, social media could also distort career choices by presenting unrealistic portrayals of different fields. Neutral influences, such as personal decision-making and the sense of belonging facilitated by social media, were also noted. The study underscored the enhancement of self-efficacy and outcome expectations through social media, while also highlighting contextual supports and barriers. Despite the limitations of the small sample size, the research provided valuable insights and suggested directions for future studies to explore the long-term impacts and the potential of social media platforms to support career development. These findings underscored the importance of a balanced and critical approach to the use of social media in shaping career trajectories.

**Keywords:** Asian American, social media, social cognitive career theory, self-efficacy

## INTRODUCTION

Asian American students have historically been overrepresented in STEM (Science, Technology, Engineering, and Mathematics) fields, a trend driven by cultural and familial expectations that emphasize the perceived stability and prestige of these careers (Hui & Lent, 2018; Kang et al., 2023; Shen & Liao, 2022). However, those who diverged from this path and pursued non-STEM careers often encountered a unique set of challenges. These challenges can include a lack of support from family and community, limited role models, and societal stereotypes that question their career choices (Cooc & Kim, 2021). In recent years, social media has emerged as a considerable influence on people's lives, providing a platform for Asian American students to explore and validate their interests outside of traditional expectations. This study aimed to give voice to Asian American students in non-STEM fields, allowing them to share their subjective experiences and highlighting the role of social media in shaping their career choices. By examining these influences, the study sought to understand how social media can both challenge and support the career aspirations of Asian American students in non-STEM disciplines.

## THEORETICAL FRAMEWORK

The theoretical framework guiding this study is social cognitive career theory (SCCT) which emphasizes the critical roles of self-efficacy, outcome expectations, and personal goals in career development (Lent et al., 1994). SCCT provides a comprehensive framework for understanding career decision-making processes. According to Lent et al. (1994), self-efficacy beliefs, which refer to an individual's confidence in their ability to perform specific tasks, significantly influence career interests. These interests subsequently affect career choices and performance. SCCT also acknowledges the importance of personal goals, which guide the direction and intensity of career-related efforts. These goals, shaped by self-efficacy and outcome expectations, play a crucial role in career planning and persistence (Lent et al., 1994, 2000).

Moreover, SCCT considers contextual factors, such as social support and barriers, which can either facilitate or hinder career development. Social support, such as encouragement from family and mentors, can enhance self-efficacy and positive outcome expectations. Conversely, barriers like negative stereotypes or limited access to resources can impede career progress (Lent, 2005; Lent et al., 2010). In summary, SCCT provides a robust model for exploring how self-efficacy, outcome expectations, personal goals, and contextual factors interact to influence career development. This theory is particularly pertinent in examining the career choices of Asian American students, as it highlights the interplay between individual beliefs and external influences in shaping career trajectories.

## RELATED LITERATURE

Social media has fundamentally transformed many aspects of society, particularly in the realm of education and socialization among students. Yang (2018) conducted a study on the acculturation and adaptation of Chinese

students in America, highlighting the significant role that US-based social media platforms play in their everyday lives. The research points to social media as a crucial tool for these students to navigate and assimilate into American culture while maintaining ties with their native heritage. Similarly, Lim Xing Fei and Yuek Li (2022) revealed the significant impact YouTubers have on the attitudes and behaviors of their young audiences, particularly among Asian American students who are avid consumers of YouTube content. Lee and Zhou (2020) addressed the misperceptions about culture and Asian American achievement, highlighting the role of social media in both perpetuating and challenging stereotypes. King and Fretwell (2022) further explored the portrayal of cultural identity by Asian American influencers on Instagram, shedding light on how social media platforms are used to navigate and express cultural identities among Asian American students.

Social media's impact on academic engagement and social interactions has been widely documented. Tuli et al. (2022) examined the broader impact of social media on student life, noting its pervasive influence on academic engagement and social interactions. Their findings suggest that social media can both enhance and detract from students' academic performance, depending on usage patterns and the nature of the content consumed. Perez et al. (2023) conducted a systematic review of social media as a teaching and learning tool in higher education, underscoring its potential to enhance educational outcomes through increased accessibility and interactive learning opportunities. Akbari and Rochaety (2023) explored the impact of YouTube watch time on higher education institution promotions and admissions, illustrating the platform's influence on student recruitment and institutional visibility.

The role of social media in shaping perceptions and social dynamics within educational environments has been explored by several studies. Shahzad (2021) explored the factors that contribute to a YouTuber's popularity among students, illustrating the platform's role in shaping perceptions and social dynamics within educational environments. Kong and Ahn (2020) investigated the information adoption behaviors on YouTube, emphasizing the influence of different genres on user engagement. Their findings illustrate the variability in content consumption and its impact on knowledge acquisition and social interaction. Marbun et al. (2020) examined the effects of social media culture and knowledge transfer on performance, pointing to the enhanced collaborative potential of social media platforms. This study suggests that social media can facilitate knowledge sharing and improve performance in both academic and professional contexts.

The broader societal implications of social media have also been a focus of research. Rawath et al. (2019) provided insights into the impact of social media on youth, emphasizing its dual role as a source of information and a platform for social interaction. They revealed that while social media facilitates connectivity and information exchange, it also presents challenges related to privacy and mental health. Bahadur (2021) investigated the negative effects of social media on youth, providing a critical perspective on issues such as cyberbullying, addiction, and mental health challenges. This study highlights the need for balanced and mindful social media use among students. Chen and Xiao (2022) examined the effect of social media on the development of students' affective variables, such as motivation and self-efficacy, revealing its potential to positively influence the emotional and psychological aspects of student life.

Finally, studies have also looked at the influence of social media on socialization and community engagement. Akdag et al. (2019) analyzed the impact of social media on university students' socialization, using statistical reasoning to reveal complex patterns of interaction and engagement. Their findings suggest that social media plays a significant role in shaping social networks and peer relationships. Dennen et al. (2020) reviewed the intersection of social media, teenagers, and the school context, highlighting the implications for education and socialization. Their findings indicate that social media can both support and hinder educational experiences, depending on the context and manner of use. Gammoudi et al. (2022) conducted a survey on the influence environment of social media and the identification of influencers, underscoring the importance of understanding the dynamics of influencer impact, particularly in educational settings. Zamroni et al. (2019) found that 61% of students use social media to gather information relevant to their career decisions. Despite the extensive research on social media's impact on various aspects of student life, there is a notable gap in the literature regarding Asian American students' career choices. This study aims to fill this gap.

## METHODOLOGY

The study employed a qualitative research approach to investigate the research question: "How does social media influence the career choices of Asian American students?" The study used purposeful criterion sampling to recruit Asian American individuals who are either currently pursuing or have recently graduated from non-STEM college majors in the United States. From the 104 respondents to the recruitment post on LinkedIn, 12 participants were randomly selected to participate in the study. The selected participants came from ten Asian countries: Afghanistan, Armenia, Bahrain, Bangladesh, Cambodia, India, Japan, Pakistan, the Philippines, and Singapore. The study adopted

a transcendental phenomenological design to capture different perspectives and minimize biased interpretation. Data collection methods included individual interviews, letter writing, and focus groups, providing a comprehensive understanding of the participants' experiences. The analysis focused on understanding the role of social media in their career decision-making processes.

## FINDINGS

The transcendental phenomenological analysis of the collected data revealed several themes that provide a comprehensive understanding of how social media influences career choices among Asian Americans in non-STEM fields. These influences can be categorized into three groups: positive, neutral, and negative. Positive influences include (1) exposure to career possibilities, (2) community connection and support, and (3) role models and inspiration. Neutral Influences which are not related to career choices include (1) personal decision-making, and (2) social media as a platform for belonging.

**Exposure to Career Possibilities.** Social media platforms expose users to different career possibilities. Some students reported that social media shaped their worldview and exposed them to various career possibilities. Seeing professionals share their experiences in fields like publishing, journalism, or academia helped students envision potential career trajectories within the humanities. This exposure can significantly influence career interests and choices by providing information and inspiration that might not be available through traditional channels.

**Community Connection and Support.** Social media helped the study participants stay connected with their communities and provided a platform for discussion and mutual encouragement. Students often found that social media helped them stay in touch with their community and with people far away. It allowed them to discuss challenges, talk about their worries, share experiences, and encourage each other to move forward. This sense of community provided the participants the emotional support and practical advice, which are crucial for career development.

**Role Models and Inspiration.** Seeing representation of Asians in various roles on social media motivated the study participants. Students often found that seeing other Asians portrayed in various roles via social media or in political roles gave them motivation. Representation could enhance self-efficacy and outcome expectations by providing relatable role models and success stories. These stories served as a source of inspiration and motivation for students. Images and posts that inspire creativity and imagination on social media lead to increased self-efficacy and motivation to pursue certain career paths.

**Personal Decision Making.** Some students believed that their career choices were personal decisions that were not significantly influenced by social media. They emphasized the importance of individual agency and the influence of other factors such as personal interests, values, and experiences. While social media might provide occasional insights and exposure to different perspectives, its impact on their decision-making process was limited compared to other factors.

**Social Media as a Platform for Belonging.** Participants mentioned social media as a tool that provides a sense of freedom and belonging, allowing individuals to connect globally and maintain cultural ties. These individuals felt that having a free hand on social media gives them a different sense of belonging. They emphasized the importance of staying connected with their community through social media.

**Negative Influences.** Some students perceived social media as a potential negative influence that could distort their career choices. They noted that while social media showed a lot of cool and fun things about different fields, it might sometimes mess up their choice due to the positive portrayals of majors they were not pursuing. This highlights the need for critical engagement with social media content to avoid unrealistic expectations and potential disappointment.

## DISCUSSION

The findings of this study align closely with the Social Cognitive Career Theory (SCCT) by Lent et al. (1994), emphasizing the roles of self-efficacy, outcome expectations, and contextual supports and barriers in career development.

### Self-Efficacy and Outcome Expectations

This study revealed that social media significantly enhances career-related self-efficacy among Asian American students. By providing success stories and practical advice, social media platforms serve as a repository of motivational content. For instance, students reported feeling more confident and motivated to pursue their desired careers after seeing professionals share their experiences and achievements. This observation aligns with SCCT's assertion that self-efficacy beliefs influence career interests and subsequent career choices. In terms of outcome expectations, social media shapes students' beliefs about the potential rewards of various career paths. The visibility of role models in diverse fields helps students anticipate favorable outcomes, such as personal satisfaction and financial stability. This supports SCCT's premise that positive outcome expectations can motivate individuals to pursue certain career trajectories.

### Contextual Supports and Barriers

The study also highlighted the dual role of social media as both a support and a barrier in career development. Social media provides numerous networking opportunities and access to mentorship, which are crucial for career guidance and support. These platforms enable students to connect with professionals, seek advice, and gain insights into different career paths. This aligns with SCCT's emphasis on the importance of social support in enhancing self-efficacy and positive outcome expectations. However, social media also presents significant barriers, such as exposure to negative stereotypes and unrealistic portrayals of certain careers. Students reported feeling disillusioned by the glamorized depictions of professional life, which sometimes led to unrealistic expectations and subsequent disappointments. This finding is consistent with SCCT's recognition of contextual barriers that can impede career progress.

### CONCLUSION

This study addresses the significant influence of social media on the career choices of Asian American students. Social media shapes their self-efficacy, outcome expectations, and personal goals, presenting both opportunities and challenges. This underscores the need for a balanced and critical approach to its use in career development. However, the study has a limitation on the small sample size of 12 participants which did not capture the full diversity and complexity of the Asian American student population.

Future research should include a larger and more diverse sample to explore the long-term impacts of social media on career trajectories. Additionally, it is essential to investigate the potential differences across various social media platforms and develop interventions that leverage social media to support career development. These interventions should be tailored to address the unique needs of Asian American students. By addressing these gaps, future studies can provide a more comprehensive understanding of the multifaceted influences of social media on career development. This will help develop strategies to harness the positive potential of social media while mitigating its risks. The study findings not only align with but also expand upon the Social Cognitive Career Theory (SCCT) by highlighting the significant role of social media in influencing self-efficacy, outcome expectations, and contextual supports and barriers among Asian American students.

# THE SIGNIFICANCE OF EDUCATIONAL TECHNOLOGY IN HIGHER EDUCATION: AN HERMENEUTIC PHENOMENOLOGY EXAMINATION FOR EXPANDING THE THEORETICAL BASES OF CONNECTIVISM THEORY

**Cynthia T. PLUEGER**

Ph.D., School of Education, Liberty University, United States

cplueger@liberty.edu

## ABSTRACT

Educational technology integration within higher education has significantly changed the teaching and learning environments. However, the theoretical foundations guiding these changes, particularly connectivism theory, suggest that learning occurs through networks facilitated by digital technology and has not been fully developed. Despite its relevance in the digital age, connectivism has faced criticism and skepticism due to a lack of empirical support. This hermeneutic phenomenological study seeks to explore the experiences of educators in higher education to provide empirical evidence for expanding the theoretical foundations of connectivism. Through in-depth interviews, focus groups, and the analysis of letter-writing activities, this research investigates how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education. The study employs a hermeneutic phenomenological approach to interpret these experiences, linking them to the fundamental principles of connectivism learning as a networked process, distributed knowledge, and the role of digital technology in knowledge creation. The findings suggest that educational technology facilitates meaningful connections between learners, which fosters a networked learning environment that aligns with connectivism theory. The study also reveals gaps in the theory, particularly in addressing emerging technologies such as artificial intelligence (AI) and personalized learning platforms. Building on these lived experiences, this research proposes an expanded version of connectivism as a significant contribution supported by empirical evidence from higher education contexts. The study provides implications for educators, administrators, and policymakers in leveraging educational technology effectively and offers theoretical advancements for understanding learning in the digital age.

## INTRODUCTION

As educational technology revolutionizes higher education, the frameworks we use to understand learning must evolve accordingly. A significant framework to consider is the connectivism theory, which suggests that learning in the digital age occurs through technology-facilitated networks (Siemens, 2004, 2005). However, due to a lack of empirical research, connectivism is often dismissed and discouraged despite its potential relevance. The lack of empirical research regarding connectivism undermines its ability to serve as a legitimate foundation for understanding modern learning environments. In a world where technology is rapidly transforming education, this research is crucial to expanding the theoretical understanding of how students and educators truly experience learning through digital technology. This study employs a hermeneutic phenomenological approach to explore the lived experiences of educators in higher education using educational technology. It also examines how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education. It addresses the current gap by providing empirical evidence that expands the theoretical foundations of connectivism theory. Through individual interviews, focus groups, and the analysis of letter-writing activities, the research investigates how these experiences reflect and challenge connectivism theory. The findings propose ways to enhance the theory by integrating contemporary technological practices, offering implications for educational policy, teaching practice in the classroom, and future research regarding connectivism theory.

## Background Of The Study

This study is authenticated by historical, social, and theoretical frameworks of connectivism theory, which inform its investigation. Historically, events such as the COVID-19 pandemic have significantly influenced the current state of higher education, particularly regarding the widespread adoption of online learning. The transition to online learning resulted in nearly all higher education institutions switching to virtual course formats (Li, 2022; Wei & Chou, 2020). The social context of this research encompasses the complex network of connections and interactions that facilitate learning among various stakeholders, including students, faculty, and support personnel in the digital era. Theoretical guidance for the study is drawn from connectivism theory (Siemens, 2004, 2005), which emphasizes the role of networks and technology in knowledge acquisition.

Historically, education has relied predominantly on face-to-face interactions between educators and students to establish meaningful connections and engagement. However, the educational landscape has experienced a paradigm shift by introducing learning management systems (LMS) and other technological innovations during the late 20th century (Karakose & Demirkol, 2021; Li, 2022; Palvia et al., 2018). Early online learning was often characterized by static content, minimal interaction, and low engagement (Palvia et al., 2018; Piccoli et al., 2001). With technological advances, the capacity to create interactive and vibrant learning environments has emerged by enabling more immersive educational experiences. Computers, the internet, and digital platforms have revolutionized how education is presented (Downes, 2019). By the turn of the 21st century, digital technologies were essential in reshaping educational practices, which makes them more flexible and learner-centered (Barabasi, 2003; Siemens, 2006). Over time, educational technology integration in teaching practices has become prevalent in transitioning from fundamental tools such as chalkboards and overhead projectors to sophisticated digital platforms such as Canvas and Blackboard (Dawo & Sika, 2021). The widespread use of the internet and digital technologies has fostered learning modifications, emphasizing networked learning over traditional models (Siemens, 2004). Connectivism theory, introduced by George Siemens, theorizes that learning increasingly relies on external networks, such as digital resources and human interactions, and the effective navigation of these networks is critical to knowledge acquisition. This theoretical framework highlights the transformative potential of educational technology in fostering engagement and collaboration (Downes, 2019).

The surge in online learning, particularly accelerated by the COVID-19 pandemic, has presented new challenges and opportunities for educational institutions (Drigas et al., 2023; Zhu et al., 2023). As educators quickly adapted to remote learning, the significance of technology in maintaining student engagement and fostering meaningful connections became increasingly evident. However, virtual communication tools often lack the subtle and interpersonal effects of in-person interactions, which challenge effective teaching and learning (Bond & Bedenlier, 2019; Vezne et al., 2023). These challenges have raised concerns about how to best employ educational technology to promote academic success and retention, especially in higher education settings (Babincakova & Bernard, 2020; Kardambikis & Donne, 2022). As online education continues to expand, educators have shifted their focus from the novelty of technology to optimizing student engagement and retention (Drigas et al., 2023). The increasing reliance on social media and digital communication platforms has both connected individuals widely and introduced challenges in establishing authentic, networked learning environments (Matee et al., 2023). With many emphasizing the need for authentic strategies to foster meaningful connections and community among students, researchers have been investigating student engagement within virtual settings, with many emphasizing the need for authentic strategies to foster meaningful connections and community among students (Aluko et al., 2022; Eden et al., 2022).

Educators encountered challenges in engaging students and fostering connections in remote settings, revealing disparities in students' experiences with online learning (Alisemi et al., 2022; Babincakova & Bernard, 2020) during the COVID-19 pandemic. While some students excelled, others grappled with disengagement and decreased motivation, which impacted retention and graduation rates (Babincakova & Bernard, 2020; Chiemela et al., 2022). The transition to higher education funding models reliant on student contributions has heightened the urgency for institutions to address student engagement and retention issues (Babincakova & Bernard, 2020). Connectivism, introduced by Siemens in 2004, builds upon traditional learning theories by recognizing the significant role of digital technologies in the learning process. Siemens argues that learning in the digital age is interconnected and relies on a network of nodes, including people, digital tools, and information systems. Educational technology supports access to and navigation of these networks while promoting knowledge acquisition and application. It can enhance academic performance and student engagement by fostering cooperation, collaboration, and self-directed learning (Siemens, 2004, 2005).

Recent studies have applied the connectivism theory to explore various aspects of learning environments, such as relationships, engagement, and interaction (Haris et al., 2023; Jung, 2019; Plueger, 2024). These studies have highlighted the complexities of using technology to engage students in meaningful learning experiences, particularly in online settings where personal interaction may be limited (Bond & Bedenlier, 2019; Kostenius & Alerby, 2020; Vlachopoulos & Makri, 2019). The importance of fostering authentic network connections in virtual classrooms has become increasingly critical as institutions continue to invest in technology-driven learning environments (Annansingh, 2019; Eden et al., 2022; Ferrer et al., 2022). Studies exploring student engagement and educational technology have identified practical strategies for enhancing learning outcomes, such as leveraging interactive tools, promoting communication, and fostering collaboration (Bolliger & Halupa, 2018; Fox, 2019; Li, 2022; Turan et al., 2022). The research highlights the importance of educator presence, responsiveness, and the use of synchronous and asynchronous communication channels in maintaining student engagement. This study builds upon these insights by using connectivism principles to investigate how educators in higher education leverage technology to build connections that enhance student engagement and achievement. By aligning connectivism theory with

phenomenological methods, this study provides an understanding of how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education. This research offers valuable insights into improving pedagogical practices and educational frameworks for fostering student engagement and academic success in a rapidly evolving technological landscape.

### **Research Problem**

The problem is that connectivism theory is not widely acknowledged and is frequently discouraged within the sphere of educational research and practice due to the insufficiency of empirical studies substantiating its efficacy. Connectivism presents a promising theoretical framework for understanding learning in the digital age. However, its limited use and rejection are attributed to insufficient empirical evidence. This study seeks to address a gap by providing empirical insights into the perceptions and anticipations of educators in higher education regarding the evolution of teaching approaches in response to technological advancements and the increasing emphasis on connectivism using educational technology. This research study will contribute to enriching the theoretical foundations of connectivism.

### **Purpose Of The Study**

The purpose of this hermeneutic phenomenological research study is to comprehensively explore and interpret the lived experiences of educators. The study provides an understanding of how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education. By examining the educator's personal narratives, this study discovers how the educator's experiences shape their instructional practices while providing prosperous empirical evidence that supports and extends the theoretical framework of connectivism. Specifically, this research seeks to understand how educators' perceptions and anticipations align with or challenge the core principles of connectivism theory. In doing so, the study contributes to the empirical validation of connectivism theory, which offers insights expanding on the comprehensive understanding of learning in the digital age by significantly broadening the theoretical scope to account for contemporary technological advancements and educational contexts.

### **Research Question**

How do educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education?

## **LITERATURE REVIEW**

The literature review examines educational technology's historical development and integration into higher education. The review outlines the significant transformation that has taken place as higher education institutions have increasingly embraced digital technology and platforms to enhance learning environments. This section traces the evolution of technological advancements, from early implementations to modern systems such as learning management platforms and interactive online resources, and discusses how these tools have reshaped instructional practices and student engagement. The review then transitions to the connectivism theory introduced by George Siemens and Stephen Downes (Siemens, 2004; Downes, 2019). Connectivism theory positions knowledge acquisition as a networked process where information is distributed across various nodes, including digital platforms, databases, and individuals (Siemens, 2004, 2005). The core principles of connectivism emphasize the importance of these networks and the role of technology in facilitating learning by enabling individuals to connect with and navigate diverse sources of knowledge (Siemens, 2004). Despite its relevance in the digital age, connectivism has faced criticism due to the lack of empirical substantiation (Jung, I., 2019). The literature highlights significant theoretical gaps and critiques, particularly concerning the limited empirical research base. As a result, connectivism is often disregarded or discouraged as a framework in educational practice, which emphasizes the need for empirical validation to further develop and legitimize it as a model for higher education learning (Plueger, C., 2024). The review concludes by examining the application of hermeneutic phenomenology in educational research by contending that the methodological approach is particularly suitable for interpreting the authentic experiences of educators in digital technology-driven learning environments. Hermeneutic phenomenology is a valuable means for bridging the gap between theoretical frameworks like connectivism theory and practical educational experiences, offering in-depth qualitative insights to validate and enrich theoretical models.

### **Educational Technology in Higher Education**

Educators in Higher education are increasingly expected to incorporate digital technologies to improve teaching and learning practices (Masenya, 2021). Research shows that many educators lack the necessary skills, knowledge, and

confidence to effectively integrate technology into their pedagogy (Lowenahal & Lomellini, 2022; Masenya, 2021). The absence of strong instructional design capabilities poses a significant barrier to the successful integration of technology (Koh, 2019). Educators also face challenges in selecting the appropriate technological tools that align with the subject matter, learning environment, student characteristics, and cultural contexts (Njiku et al., 2019). Scholars such as Kopcha et al. (2020) emphasize that educators are aware of the importance of aligning technology use with established standards and learning objectives. However, technology adoption continues to present a substantial challenge for many educators, as Kopcha et al. (2020) highlighted.

As educators engage with digital transformation, they are compelled to shift from traditional instructional methods. The integration of e-learning tools such as social media, online games, multimedia, and mobile devices has significantly reshaped the educational landscape (Masenya, 2021; Olusanya, O., 2023). Effective integration of these technologies, however, requires educators to possess digital literacy and a high level of competence in using Information and Communication Technologies (ICTs) to retrieve, evaluate, create, and communicate information (Paul, 2021). By developing technological competencies, educators contribute to informal learning communities and address skill gaps, yet equipping educators with these competencies remains a persistent challenge (Olusanya, O., 2023). This highlights the need for concerted efforts from the global educational and telecommunications sectors to address the digital divide (Masenya, 2021; Paul, 2021).

Experts argue that integrating technology and fostering connections among learners can significantly enhance student engagement in higher education (Asif et al., 2021; Donham et al., 2022; Masenya, 2021). To achieve this, educators are encouraged to incorporate technology into their teaching strategies and create virtual environments that promote collaboration, communication, and active participation (Donham et al., 2022). Furthermore, Eshelman and Hogue (2023) provide evidence that a comprehensive approach combining TPACK (Technological, Pedagogical, and Content Knowledge), the Triple E Framework (Engagement, Enhancement, and Extension), and the CAFE model (Content, Activities, Facilitation, and Evaluation) effectively enhances the lesson-planning process in educational contexts. Educators can create more personalized, dynamic, and inclusive learning environments by implementing pedagogical approaches that foster interpersonal relationships and employ technology to increase student engagement (Asif et al., 2021). Enhanced communication, collaboration, and reflective practices can enable educators to forge stronger connections with students, resulting in higher engagement levels and improved learning outcomes (Asif et al., 2021; Donham et al., 2022). Consequently, technology is recognized for its potential to elevate student engagement and improve educational quality.

Higher education institutions are increasingly adapting to a digital environment that diverges from traditional educational paradigms (Masenya, 2021; Paul, 2021). Educators now require a deep understanding of digital tools, platforms, and innovative teaching methods to effectively meet the needs of contemporary learners. A study by Kim et al. (2020) highlights the critical importance of digital literacy, e-learning platform knowledge, and familiarity with the technological preferences of today's students. Educators must engage in hands-on technological experiences tailored to educational contexts as society endures significant technological transformations. Expertise in areas such as Learning Management Systems (LMS), virtual pedagogical environments, multimedia content curation, and the use of social media as an educational tool can support educators in integrating digital tools within the educational field (Kim et al., 2020; Masenya, 2021).

The integration of technology in education extends beyond instructional methods to include assessment practices, feedback mechanisms, and broader channels of educational communication. Higher education institutions are driven by the need to remain competitive and relevant globally, prompting the adoption of digital tools. Lee and Kwon (2023) identify an emerging demand to meet the educational expectations of digital natives—students who have grown up in a digital environment and possess distinct learning preferences. While adopting digital technologies in higher education presents challenges and opportunities (Johnson & Welsch, 2020), proficient use of these tools can enhance student engagement, facilitate personalized learning pathways, and broaden the pedagogical scope beyond traditional classroom settings. Continuous professional development, flexibility, and awareness of evolving educational principles are essential for educators to drive the ongoing transformation brought about by the digital revolution (Koh, 2019; Koh & Kan, 2021).

Technology plays a crucial role in instruction, assessment, feedback, and communication (Lee & Kwon, 2023). A variety of factors contribute to the integration of digital technologies (Paul, 2021), including institutional pressure to maintain global relevance (Lee & Kwon, 2023) and the need to accommodate digital-native students (Masenya, 2021), who have distinct expectations shaped by their digital upbringing (Paul, 2021). While implementing digital technologies poses challenges, it also offers opportunities for enhanced student engagement, personalized learning, and expanded educational horizons. However, successful integration of these tools requires ongoing professional development, adaptability, and recognition of the dynamic nature of education (Masenya, 2021; Paul, 2021).

In recent years, the use of technology in education has become more widespread which offers unique avenues for building interpersonal relationships between students and educators (Kostenius & Alerby, 2020; Leslie, 2020). Studies by Kostenius and Alerby (2020) and Leslie (2020) highlight the potential for technology to enhance interpersonal interactions in educational contexts. Kostenius and Alerby (2020) emphasize the importance of fostering the well-being of both students and educators in online and blended learning environments facilitated by tools such as online forums, video conferencing, and social media. Implementing these technologies has the potential to strengthen relationships and promote collaboration between students and educators, ultimately contributing to a more caring, supportive, and engaging learning environment. Leslie's (2020) research focuses on the role of technology in improving student engagement through faculty development programs by demonstrating that the use of technology in educational settings can enhance interpersonal relationships. By utilizing various technological platforms, educators can create more supportive and engaging learning environments that foster empathy and connection between students and instructors. Nevertheless, it is important to note that technology alone cannot fully cultivate meaningful relationships; educators must also foster a culture of inclusivity and support (Kostenius & Alerby, 2020; Leslie, 2020).

As technology advances, its impact on education and interpersonal relationships grows. Educators have access to professional development opportunities that allow them to use technology to enhance academic achievement, motivation, engagement, and communication (Donham et al., 2022). College students, particularly those aged 18–23, are described as highly dependent on technology, having never known a world without it (Asif et al., 2021; Donham et al., 2022). In the present day, living in an increasingly connected and interdependent society is a necessity (Hye et al., 2020; Springett et al., 2022). However, students may experience increased anxiety and stress when separated from their technological devices (Huda, 2019; Parker & Hodgson, 2020). Research indicates that educators who incorporate technology to design interactive and engaging activities requiring student collaboration across different curricula enhance student involvement, collaboration, and communication (Avsec, 2023; Kraiger et al., 2022). For example, educators may use instructional games or simulation software to teach specific topics (Avsec, 2023) or invite students to collaborate on projects using interactive communication platforms. By leveraging the full capabilities of various technological tools, educators foster a sense of belonging among students and successfully balance the benefits of technology with in-person interactions (Huda, 2019; Hye et al., 2020).

### **Connectivism Theory**

Connectivism, introduced by George Siemens (2004) and expanded by Stephen Downes (2019), provides a framework for understanding how learning occurs in a digital age, which emphasizes the role of networks in knowledge acquisition. In contrast to traditional learning theories, connectivism theorizes that knowledge is distributed across a network of human and non-human information sources, such as digital technologies and databases (Siemens, 2004, 2005). According to connectivism, learning is a process of connecting these various nodes of information (Siemens, 2004). As learners engage with these networks, they develop the capacity to navigate, evaluate, and integrate diverse information. The theory highlights the transformative role of digital technology in facilitating learning, as it enables individuals to access, share, and create knowledge more effectively than in traditional learning environments. The theory emphasizes the significance of preserving and fostering these connections, as they serve as the basis for continuous learning in a rapidly evolving information environment (Siemens, 2004, 2005; Downes, 2019)

George Siemens first introduced the Connectivism theory in 2004 to provide an essential framework for addressing challenges such as declining academic performance and increasing student attrition rates in higher education (Siemens, 2004). Connectivism theory is structured around eight core principles of learning: embracing the diversity of opinions, connecting information nodes, facilitating non-human learning, prioritizing capacity over current knowledge, maintaining and nurturing connections, integrating interdisciplinary knowledge, staying current with evolving information, and using decision-making as a learning process (Siemens, 2004). In the digital context, connectivism relies on these eight key principles, which stress the importance of engaging with multiple perspectives, interacts with diverse knowledge sources, and recognizes the value of both human and non-human entities in learning. The approach highlights the necessity of continuously acquiring and integrating knowledge while maintaining active connections that support ongoing learning. The theory also emphasizes the interconnections between different disciplines and concepts. Additionally, it focuses on the importance of staying up to date with the rapid evolution of information and refining decision-making and evaluative skills. Together, these principles highlight the complexity of learning in the digital era and reflect the wide-ranging influence of Connectivism (Siemens, 2004, 2005, 2006). Connectivism principles serve as a foundation for research exploring educators' experiences and perceptions of academic performance and retention. They emphasize that learning extends beyond individual cognition and includes networks and organizations while stressing the critical role of

connections, digital resources, and technology as key enablers of the learning process (Siemens, 2004; Siemens, 2005). With understanding Siemens's theoretical framework, connectivism provides valuable insights into how learners acquire, apply, and navigate knowledge in technologically advanced learning environments.

Stephen Downes (2019, 2022) further expanded the connectivism theory to address the digital age's unique challenges and educational demands. The framework offers innovative insights into learning within networked contexts while drawing upon established educational and cognitive principles. Historically, instructional design has relied on three primary learning theories: behaviorism, cognitivism, and constructivism (Siemens, 2004). However, these theories predate the profound impact of technology on education. Over the past two decades, rapid technological advancements have transformed various aspects of life, including communication, education, and everyday activities (Siemens, 2006). Therefore, it is essential to consider the social context in which learning occurs by acknowledging both the principles and processes supporting learning in a digitally interconnected world.

### **Criticisms and Gaps in Connectivism Theory**

Despite its potential as a learning theory for the digital age, connectivism theory has faced considerable criticism, particularly due to the lack of empirical research supporting its claims. Although Siemens and Downes introduced connectivism as a novel theory to address learning challenges in technology-rich environments, critics argue that it has not been sufficiently tested through empirical studies. This lack of empirical validation limits its adoption and recognition as a robust framework in higher education (Dziubaniuk et al., 2023; Jung, I., 2019). Many scholars have pointed out that while the theoretical concepts are compelling, they remain underdeveloped regarding measurable outcomes and evidence-based application (Al-Maawali, 2022; Al-Mutairi & Bin Mubayrik, 2021; Chandrappa, 2018).

A significant critique is that connectivism lacks a clear distinction from pre-existing learning theories such as constructivism and social learning theory, which also emphasize collaborative and networked learning. Scholars argue that connectivism's core concepts, such as learning through networks and distributed knowledge, mirror ideas already present in these established theories, raising questions about its uniqueness as a separate learning paradigm (Dawo & Sika, 2021; Dziubaniuk et al., 2023; Baque et al., 2020). For example, while connectivism stresses learning through human and non-human nodes, constructivist and social learning theories have long highlighted the importance of collaborative learning and social interactions in the knowledge-construction process (Astin, 1999; Jacobsen, 2019; Johnson & Welsch, 2020).

Connectivism has been criticized for its abstract nature and the challenge of putting its principles into practice (Goldie, 2016). Critics argue that while its concepts, such as learning through networks and decision-making as a learning process, are intriguing, the connectivism principles offer limited practical guidance for educators (Jung, I., 2019). The lack of specificity makes it challenging to design empirical studies that can rigorously test its claims (Al-Maawali, 2022; Al-Mutairi & Bin Mubayrik, 2021; Chandrappa, 2018). Additionally, the absence of detailed pedagogical strategies and measurable outcomes hampers its application in educational settings, which leaves educators with little direction on how to implement connectivism principles in practice (Page et al., 2020; Wylie, 2023).

Furthermore, connectivism has been criticized for prioritizing digital technologies as the primary facilitator of learning by potentially overshadowing the human and social elements of education that are fundamental to other educational theories (Dawo & Sika, 2021; Jung, I., 2019). This heavy reliance on technology may limit the understanding of the learning process, particularly in settings with limited digital access and skills. To establish connectivism theory as a recognized framework in higher education, there is a critical need for more empirical research that explores its applicability in practical educational contexts. Studies that examine how learners engage with digital tools, how networks influence knowledge acquisition, and how educators can design effective learning environments based on connectivism principles are essential. Without this empirical evidence, connectivism remains a theoretically intriguing but practically underutilized concept in educational research and practice (Dziubaniuk et al., 2023; Jung, I., 2019).

### **Hermeneutic Phenomenology in Educational Research**

Hermeneutic phenomenology presents a suitable methodology for exploring and interpreting the experiential dynamics of educators and students engaging with educational technology. This approach is centered on comprehending subjective experiences and meanings within specific contexts, thereby enabling researchers to investigate how individuals experience and make sense of educational technology (Husserl, 1965; Moustakas, 1994). Through capturing the lived experiences, hermeneutic phenomenology facilitates the interpretation of how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and

the increasing focus on connectivism in higher education, which makes it appropriate for examining the intricate dynamics prevalent in modern learning.

Hermeneutic phenomenology is distinguished by its capacity to bridge the gap between theory and practice (Husserl, 1965; Moustakas, 1994) by making it a valuable methodology in educational research. Unlike traditional educational theories, which often prioritize abstract principles, hermeneutic phenomenology focuses on collecting qualitative data that reflect realistic experiences. By examining how educational technology is experienced in authentic settings, this methodology provides valuable insights into the practical manifestations of theoretical concepts. As a result, educational theories can be refined to better align with contemporary educational practices (Moustakas, 1994).

Additionally, hermeneutic phenomenology provides valuable qualitative insights that can be effectively applied to developing and implementing education (Moustakas, 1994). The detailed, descriptive data obtained through this approach enables researchers to identify practical challenges, opportunities, and the real-life impact of technology on learning and teaching. By interpreting the significance that educators attribute to their use of technology, this methodology reveals trends that can guide instructional design, professional development, and policymaking, ultimately leading to more efficient and meaningful integration of technology in education.

## **RESEARCH METHODOLOGY**

### **Research Approach: Hermeneutic Phenomenology**

Hermeneutic phenomenology offers a profound framework for exploring the experiences of educators and students as they engage with educational technology. Grounded in the philosophical traditions of phenomenology and hermeneutics, particularly the work of Heidegger and Gadamer, this approach seeks to describe experiences and interpret and uncover the deeper meanings individuals attach to their encounters with technology (Suddick, et al., 2020). Unlike transcendental phenomenology, which focuses on identifying the essence of experiences, hermeneutic phenomenology emphasizes the process of interpretation and understands how broader cultural, social, and historical contexts shape experiences (Moustakas, 1994). Interpretive depth is crucial when studying how educational technology is perceived, navigated, and utilized in educational settings.

For educators, integrating educational technology into teaching represents more than a shift in methodology; it often entails reevaluating their roles, responsibilities, and pedagogical values. Hermeneutic phenomenology allows researchers to examine the various ways educators interpret their use of technology. Beyond functional aspects, such as how to operate software or manage digital platforms, educators engage with technology in ways that influence their self-perception as professionals, their sense of competence, and their relationships with students. This approach illuminates how educators make sense of the tensions between traditional teaching practices and the demands of modern, technology-enhanced classrooms. In doing so, it reveals the emotional and intellectual labor involved in adopting new educational technology, whether they experience a sense of empowerment through digital innovation or struggle with the anxiety of insufficient support and training.

Students bring a diverse range of experiences to their interactions with educational technology. Many belong to the category of "digital natives," having grown up in a world where digital technologies are pervasive (Annansingh, F., 2019; Asif et al., 2021). However, their engagement with technology in learning environments is complex and heavily influenced by personal, academic, and social factors (Plueger, C., 2024). Hermeneutic phenomenology enables researchers to discern how educators derive meaning from interactions with technology for student engagement through virtual classrooms, online collaborative tools, or multimedia learning resources. The hermeneutic approach examines beyond mere usage patterns to comprehend how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education. The research study highlights the ways in which technology either enhances or complicates their teaching approaches, facilitating a more human-centered understanding of experiences in the digital age.

Ultimately, hermeneutic phenomenology empowers researchers to bridge the divide between theoretical concepts, such as connectivism theory, and the actual experiences of educators interacting with technology in higher education. By emphasizing interpretation and context, this methodology unveils the profound significance of digital technology, offering valuable insights into how educators can harness technology to cultivate meaningful connections, enrich learning, and navigate the ever-changing landscape of education.

### **Research Design**

A qualitative research methodology was identified as the most appropriate approach for examining the experiences of educators. This approach focuses on how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the growing emphasis on connectivism in higher education at public institutions in the southern region of the United States. A hermeneutic methodology was particularly suitable for

studying the use of educational technology to enhance student engagement and foster academic success (Asif et al., 2021; Bolliger & Halupa, 2018). Qualitative methods allowed researchers to explore participants' lived experiences and perspectives (Maxwell, 2012). Given the rapidly changing landscape of higher education, where technology integration is essential, qualitative research effectively captured educators' intricate and context-dependent perspectives. The study aimed to provide a contextual understanding of these experiences through the lens of connectivism theory (Siemens, 2004).

The researcher opted for hermeneutic phenomenology due to its relevance in examining participants' subjective experiences and obtaining insights into how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education (Moustakas, 1994; Siemens, 2004). The hermeneutic approach facilitated a profound understanding of human experience patterns and the development of themes that provided a philosophical interpretation of the educators' interactions with technology (Moustakas, 1994). In the context of higher education, educators have a crucial role in establishing a conducive learning environment for student success (Tuiloma et al., 2022). Qualitative research has proven to be an invaluable method for comprehensively understanding pedagogical practices and experiences (Maxwell, 2012). The approach immersed researchers in the educators' preferences, behaviors, and challenges while allowing them to consider contextual factors, motivations, and achievements (Hill et al., 2021). By focusing on the perspectives of the participants, qualitative research enabled the identification of unexpected themes and connections that may not have emerged through quantitative analysis alone.

The adaptable nature of qualitative research makes it well-suited for examining the intricate connections between technology, human interaction, and student engagement (Vlachopoulos & Makri, 2019). The qualitative reach approach offered the depth and rigor needed to investigate how educators perceive and adapt to changes in teaching methods due to technological advancements and the growing emphasis on connectivism in higher education. Additionally, it allowed researchers to explore educators' personal experiences with technology and its impact on student participation and academic performance. Using this methodology, researchers gained insights into the complex mechanisms at work in innovative higher education settings and contributed to enhancing teaching practices across various disciplines.

To gain a comprehensive understanding of how technology is used in higher education and its impact on student achievement, it was crucial to explore the participants' beliefs, emotions, perceptions, and experiences. Hermeneutic phenomenology enabled researchers to interpret these experiences in a way that acknowledged the complexity of human interactions and the broader social context (Moustakas, 1994). This approach was vital for examining the intricate dynamics influencing how educators perceive and anticipate using educational technology. The hermeneutic approach provided a framework for investigating individuals' subjective experiences and perceptions in their natural environments while building on the philosophical tradition of phenomenology, which Edmund Husserl developed and later expanded by scholars such as Moustakas (1994).

Ultimately, the approach encouraged researchers to remain open and inquisitive toward participants' experiences, which discovers unexpected insights and perspectives. By maintaining an interest in participants' perspectives and being attentive to their lived experiences, researchers uncovered valuable findings that significantly enhanced the study's validity. In examining complex, subjective experiences, the rigorous and systematic nature of hermeneutic phenomenology ensured the credibility and authenticity of the research (Moustakas, 1994). In alignment with the principles of connectivism and the use of educational technology, the study's findings provide valuable insights into the field of higher education and inform pedagogical practices aimed at improving student engagement and academic achievement.

### **Sampling Strategy**

The research encompassed a diverse group of participants, including both tenured and non-tenured faculty members at public four-year universities in the southern region of the United States. These individuals possessed varying levels of knowledge and experience in educational technology and connectivism theory. The study emphasized demographic factors such as age, gender, university role, teaching experience, and technological proficiency to comprehensively understand the participants. The primary objective was to provide valuable insights into each participant's unique attributes and experiences. The research delved into the application of educational technology and connectivism across different academic disciplines. Faculty members with differing levels of proficiency and familiarity were purposefully selected from various universities in the southern region of the United States. The study considered various cultural and ethnic backgrounds and different teaching career stages. The overarching goal was to offer comprehensive insights into using educational technology and connectivism theory across institutions from diversified viewpoints.

The participant sample intentionally comprised both tenured and non-tenured individuals to ensure diverse experiences and perspectives were captured. The study specifically targeted academic departments affiliated with selected public universities to recruit participants. Formal requests were made to senior research compliance coordinators at multiple universities across the southern United States region to obtain permission to engage directly with faculty members. These requests included a letter of intent outlining the study's objectives and ethical considerations. Individual interviews were conducted at public universities within the southern United States region while maintaining the highest ethical standards to ensure precision, reliability, and confidentiality. A criteria screening form was employed to identify and validate suitable participants from public four-year universities in the southern United States who met specific criteria, such as possessing varied knowledge and experience in educational technology and connectivism theory relevant to teaching and utilizing technology to enhance student engagement. Each participant received a recruitment email containing a link to the criteria screening form, which was designed to collect essential information confirming their eligibility based on predefined criteria.

### **Data Collection Methods**

A well-structured data collection plan was pivotal to the research process (Yin, 2017). This plan ensured ethical, methodical, and effective data gathering while leading to dependable, credible, and comprehensive research findings. The data collection plan provided guidance to researchers in selecting specific methods and strategies to gather pertinent data for their research inquiries (Lincoln & Guba, 1985). By integrating various data collection methodologies, researchers gained a profound understanding of the subject under investigation (Lincoln & Guba, 1985; Merriam, 2002; Patton, 2014). Various data collection methods were imperative when investigating intricate phenomena, such as educators' perceptions and anticipation of the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education. This research study collected data through individual interviews, focus groups, and letter-writing activities. The sequence began with individual interview questions, followed by focus group session questions, and finally, the participants were provided with letter-writing prompts via email. This chosen sequence maximized the benefits of each method to gain a comprehensive understanding of how educators use educational technology to enhance student engagement and academic performance while applying connectivism principles and technological skills to improve student learning processes.

### **Data Analysis**

The data collection methodology for this study encompassed individual interviews, focus groups, and letter writing with the subsequent synthesis of results aimed at obtaining a comprehensive understanding of the findings. The transcription process entailed using sophisticated transcription software, such as Otter.ai, complemented by manual reviews to accurately capture verbal and non-verbal nuances, including tone, pauses, and non-verbal cues such as facial expressions. This meticulous approach was indispensable for fully representing the emotional and psychological states of the participants. Within focus groups, the utilization of timestamps and speaker identification served to preserve contextual relevance, particularly in multi-participant interactions. During the analysis phase, hermeneutic phenomenology was applied to interpret participants' lived experiences by providing an in-depth exploration of educators' perceptions of technology integration in their teaching practices. Through hermeneutic reflection, the study delved into educators' complex and subjective experiences, which yielded valuable insights into their perspectives on technological advancements and their impact on educational practice.

Educators perceive the evolution of teaching methods in response to technological advancements as a significant and inevitable shift toward more networked, adaptive, and student-centered learning environments. The findings indicate that educators anticipate that AI-driven tools, adaptive learning platforms, and collaborative technologies will continue to reshape education by providing personalized learning experiences, enabling real-time feedback, and fostering greater engagement. The increasing emphasis on connectivism, where learning is viewed as a process of forming connections between diverse information sources and peers, is also seen as central to this evolution. Educators recognize that technology facilitates this shift by enabling students to interact with global networks, co-create knowledge, and access a broader range of resources. As technology advances, educators foresee a growing emphasis on collaborative learning, networked knowledge-building, and the ability to adapt teaching strategies to meet the needs of diverse learners in increasingly digital and globalized classrooms. This expectation reflects their understanding that technology is not just a tool but a key driver in transforming how education is delivered and experienced in higher education.

### **Trustworthiness**

In this qualitative study, our aim was to investigate how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing emphasis on connectivism in higher education. To ensure reliability and rigor, the research adhered to the principles of credibility, transferability, dependability, and confirmability, as outlined by Lincoln and Guba (1985). By meeting the trustworthiness standards set forth by Lincoln and Guba, the study made meaningful contributions to understanding how technology is reshaping educational practices and pedagogical strategies. The research focused on educators' insights into how teaching is evolving through integrating digital tools, networked learning, and adaptive technologies framed within the connectivism theory. Comprehensive design and methodological precision were prioritized to produce credible and reliable findings, while reflexivity was employed to address potential researcher bias by acknowledging the researcher's role in interpreting the data. This reflexive approach helped ensure that the findings were grounded in participants' authentic experiences and minimized the influence of the researcher's preconceptions.

### **FINDINGS**

In the analytical approach, the use of Atlas.ti allowed for a comprehensive synthesis of how educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education. By aligning the findings with the central research question, I identified four key themes through data triangulation using the reduction process (Moustakas, 1994). The emerging themes were identified as (1) Integration of Technology in Teaching, (2) Connectivism as a Guiding Framework for Learning, (3) Adapting Teaching Methods for Lifelong Learning, (4) Transformative Potential of Educational Technology. Educators incorporating technology into teaching is considered inevitable, as online platforms and digital tools have become integral to delivering education. Connectivism, as a guiding framework, promotes collaborative, networked learning, while adaptive teaching methods emphasize the development of critical thinking and lifelong learning skills. The transformative potential of educational technology presents both exciting opportunities and significant challenges by necessitating thoughtful consideration of ethical, practical, and equity-related issues as educators navigate this evolving landscape.

#### **Integration of Technology in Teaching**

Educators are increasingly realizing the transformative potential of technology in higher education. The widespread adoption of online platforms, such as learning management systems (LMS), digital tools, and technology-enhanced learning environments, is revolutionizing the dissemination of education. Platforms, like Blackboard, Canvas, and Moodle facilitate a seamless blend of asynchronous and synchronous learning, which provides students with greater flexibility in engaging with course content. These technologies have broadened access to education, particularly for non-traditional learners such as working professionals and military personnel which allowed them to participate in learning on their own schedules. Essential tools like Zoom and Microsoft Teams enable real-time interaction, while digital resources such as multimedia, simulations, and interactive modules enhance student engagement. This technological shift has also made education more inclusive by providing accessibility features such as captioning and screen readers while ensuring all students can fully participate in the learning process.

Looking to the future, educators anticipate that advancements in artificial intelligence (AI), adaptive learning systems, and online collaboration tools will continue to reshape pedagogical practices. AI-powered systems are already being used to provide personalized feedback and tailor learning experiences to individual student needs. These adaptive learning platforms allow for real-time adjustments based on student progress to ensure that each learner receives the appropriate level of challenge and support. By integrating AI-driven analytics, educators can monitor student performance and intervene proactively when needed, thereby improving learning outcomes. Additionally, online collaboration tools, such as Slack and Google Workspace, are expected to enhance student engagement and teamwork further, which supports collaborative learning across geographic boundaries. While challenges such as the digital divide and data privacy persist, the opportunities for creating more flexible, personalized, and responsive learning environments are unlimited while positioning technology as a crucial component of the future of education.

#### **Connectivism as a Guiding Framework for Learning**

Connectivism is increasingly recognized as an essential framework for comprehending the evolution of teaching in higher education. The research indicates that connectivism is progressively serving as a guiding framework in developing teaching methodologies in higher education. Connectivism reflects the growing prevalence of digital technologies and globalized learning environments by emphasizing learning through networks and connections between diverse information sources. Educators recognize that students now have unlimited access to information

through online platforms, digital tools, and collaborative spaces. Consequently, the conventional role of educators as the primary source of knowledge is transitioning into more of a facilitator. Educators are responsible for assisting students in navigating digital communication networks, facilitating the connection of information sources, and fostering critical thinking skills to enable the innovative application of knowledge. This transformation reshapes classroom dynamics by fostering an environment where students are encouraged to participate in peer-to-peer learning, co-create knowledge, and engage in collaborative projects that transcend geographical and disciplinary boundaries.

Educators anticipate that networked learning and digital collaboration will be central to teaching in the future. Platforms such as discussion forums, social media, and online communities allow students to participate in global discussions and learn from diverse perspectives. This pedagogical approach aligns with connectivism, where knowledge derives from connections between various sources rather than from a single origin. Additionally, educators anticipate a growing focus on teaching students how to gather and utilize information from interconnected networks effectively. This learning process will equip students with the necessary skills to thrive in a rapidly evolving, information-driven world. As digital literacy becomes increasingly crucial, educators are expected to adjust their teaching approaches further to assist students in constructing learning networks and participating in collaborative, self-directed learning.

### **Adapting Teaching Methods for Lifelong Learning**

The research findings emphasize that educators increasingly recognize the need to adapt teaching methods to foster lifelong learning in response to rapid technological advancements. Traditional education models, which often focus on content delivery and rote memorization, are now considered insufficient for preparing students for the challenges of an unpredictable and rapidly evolving world. Instead, educators see a growing demand for teaching strategies that promote adaptability, critical thinking, and problem-solving skills. With the rise of automation, artificial intelligence, and the constant emergence of new technologies, students must develop the ability to learn and adapt to dynamic environments continuously. This shift requires a focus on teaching students specific content and how to learn effectively, think critically, and solve complex problems in diverse contexts.

Educators anticipate that future teaching practices will increasingly focus on equipping students with the skills necessary to navigate evolving technologies and apply their knowledge across various fields and industries. Active learning approaches, such as project-based learning, collaborative problem-solving, and real-world applications, will become more prevalent as they encourage students to engage critically with the content and develop practical solutions to challenges. Additionally, adaptive learning technologies, which offer personalized instruction and feedback, are seen as valuable tools for fostering lifelong learning. By creating learning environments that prioritize adaptability and continuous skill development, educators aim to better prepare students for the demands of a rapidly changing global workforce, where the ability to learn, unlearn, and relearn will be essential for success.

### **Transformative Potential of Educational Technology**

The research findings indicate that educators recognize the potential of educational technology to transform teaching and learning practices significantly. Technological advancements, such as artificial intelligence, virtual reality, and adaptive learning platforms, are seen as powerful tools that can revolutionize pedagogy by creating more interactive, personalized, and engaging educational experiences. Educators who leverage educational technology tools have the potential to enhance student learning outcomes through customized instruction, immediate feedback, and immersive learning experiences not previously possible in traditional educational settings. Educators view this shift as a driving force to transition from passive knowledge transfer to more student-centered, active learning approaches to foster deeper engagement and critical thinking skills. Additionally, the flexibility and accessibility of technology create an inclusive learning environment catering to various learning styles and preferences.

The potential advantages of technology in education are substantial, but they also present challenges that educators must confront. One major concern is the issue of digital equity and access, as not all students have equal access to the technology required for advanced learning. The digital divide, particularly for students from underrepresented or disadvantaged backgrounds, poses a risk of increasing educational inequalities. Additionally, educators must navigate the ethical implications of relying on data-driven technologies, including concerns about student privacy and the use of personal data. As technology continues to evolve, educators are tasked with ensuring that its integration into education is impartial, ethical, and supportive of all learners while also managing the complexities and uncertainties associated with the ongoing rapid changes.

### **Research Question Response: Expanding and Empirically Supporting Connectivism**

How do educators perceive and anticipate the evolution of teaching methods in response to technological advancements and the increasing focus on connectivism in higher education? The research study's findings reveal that educators perceive the inevitable and transformative nature of the evolution of teaching methods in response to technological advancements. Educators in higher education view technology as fundamentally reshaping educational approaches, transitioning from traditional, instructor-led models to more student-centered and flexible approaches. Educational technological tools, such as learning management systems (LMS), online platforms, and multimedia resources, are considered essential in creating interactive and engaging learning environments. Participants emphasized the increasing role of artificial intelligence (AI) and adaptive learning platforms in providing personalized learning experiences. These technologies enable real-time feedback, content adjustments based on individual student progress, and the increase of student engagement in the learning environment tailored to each student's needs. Educators anticipate that AI-driven tools will significantly enhance the accessibility and customization of education, ultimately leading to improved student engagement and academic performance.

In the context of connectivism, educators are increasingly recognizing learning as a networked process. Students are expected to establish connections between diverse sources of information, peers, and digital communities. The transition from traditional classroom-based teaching to online collaboration and global learning networks is essential to this transformation. Educators anticipate that the emphasis on collaborative learning environments will continue to expand, aided by platforms such as Zoom, Microsoft Teams, Slack, Discord, and social media, which support peer interaction and the co-creation of knowledge. Implementation of these technologies aligns with the principles of connectivism, where knowledge is formed through engagement in interconnected digital spaces. Educators anticipate that as students become more engaged in global learning communities, the emphasis will shift from delivering content to guiding students in navigating and synthesizing information from various disseminated sources. Educators maintain an optimistic outlook on the future of teaching methods, which recognizes the essential role of educational technology and connectivism in transforming the evolution of adaptable, collaborative, and networked learning experiences in higher education.

### **DISCUSSION**

The findings of this research have significant implications for higher education practice, particularly in the design and implementation of educational technology to enhance learning outcomes. Educators are encouraged to integrate adaptive learning systems and AI-driven platforms, which provide real-time, personalized feedback and enable tailored learning experiences. These educational technology tools can adjust content delivery based on individual student progress and foster more engaged and effective learning. Administrators should focus on creating technology-rich learning environments by incorporating platforms such as learning management systems (LMS), which centralize resources and facilitate both synchronous and asynchronous learning. Additionally, implementing online collaboration tools, such as Microsoft Teams and Zoom, allows for more dynamic student interaction, particularly in networked learning contexts. Policymakers must prioritize digital equity, which ensures all students have access to the necessary technology and resources. This will require investment in infrastructure and support systems to bridge the digital divide, ensuring that technology-enhanced learning is inclusive and equitable for all learners.

The research also contributes to the theoretical development of connectivism by providing empirical support for its relevance in contemporary education. The findings align with connectivism's emphasis on learning through networks, where students build knowledge by engaging with digital tools and collaborating with peers across diverse platforms. The study suggests that AI-driven adaptive learning can be considered an extension of connectivism. AI enables the formation of personalized learning networks, where technology mediates connections and actively adapts content to learners' needs, further reinforcing the concept of distributed knowledge. This adaptation adds a layer of complexity to connectivism by expanding its scope to account for the evolving role of artificial intelligence and personalized learning in modern educational environments.

The use of hermeneutic phenomenology in this study was essential for understanding educators' complex, subjective experiences as they navigate digital learning environments. By focusing on participants' lived experiences, this approach provided insights into how educators interpret and adapt to the use of educational technology. Hermeneutic phenomenology helps bridge theory and practice by revealing how theoretical concepts, such as connectivism, manifest in real-world educational settings. This method allows for a deeper understanding of how educators and students interact with technology while ensuring that theoretical frameworks remain grounded in the practical realities of teaching and learning. By interpreting individual experiences, hermeneutic phenomenology offers a more nuanced view of how educational technologies can be designed and implemented to meet users' needs, ultimately fostering more effective and meaningful learning outcomes.

## CONCLUSION

The study offers valuable insights into how educators perceive and anticipate the changes in teaching methods due to technological advancements and the increasing focus on connectivism in higher education. The main findings reveal that educators consider integrating educational technology, such as learning management systems (LMS), AI-driven platforms, and collaborative digital technology as essential for creating adaptable, personalized, and interconnected learning environments. Educational technologies are seen as necessary for promoting student-centered approaches, enabling learners to actively, adaptively, and collaboratively construct knowledge. Additionally, educators recognize that digital technology is reshaping their roles, transitioning from being the primary sources of knowledge to facilitators who navigate students through intricate digital information networks. The implications of these findings for higher education are substantial, which emphasizes the importance of integrating technology to enhance student engagement, learning outcomes, and academic achievement to equip students for the demands of a rapidly evolving world.

The research study contributes significantly to the field of connectivism theory by expanding its application in modern educational contexts. While connectivism traditionally emphasizes learning through human and informational networks, this research introduces the role of educational technology and adaptive learning platforms as active participants in the knowledge-creation process. Technology, such as AI systems, can offer personalized learning paths and real-time feedback by extending the networked learning environment to help learners connect with the most relevant information and resources. The expansion of connectivism emphasizes the dynamic and evolving nature of learning in technology-enhanced settings, where students must navigate increasingly complex digital ecosystems. In practical terms, the research findings emphasize the importance of educators and institutions adopting technologies that align with connectivism principles, ensuring students acquire the skills to synthesize information from diverse sources.

To further explore the evolving relationship between educational technology and connectivism, future research should prioritize the empirical study of refining the connectivism framework within diverse educational contexts and with emerging technologies. Studies could examine how adaptive educational technologies impact students' capacity to form knowledge networks and how AI-driven systems influence the learning process across various disciplines, including STEM, social sciences, and the arts. Additionally, researchers should explore the role of virtual and augmented reality in enhancing connectivism learning environments, particularly in fields that heavily rely on experiential learning. Comparative studies across educational levels (e.g., K-12, higher education) and global regions could generate valuable insights into how technological and cultural factors impact the integration of educational technology and connectivism practices. Further exploration of digital equity and the ethical implications of digital technology in education is also critical to ensuring that educational technology fosters inclusive and equitable learning environments. By expanding the empirical base of connectivism and exploring its practical applications, future research can continue to inform both theory and practice in higher education.

nakinci@sakarya.edu.tr

## ÖZET

Kadına karşı şiddet, sadece Türkiye'de değil, global ölçekte de ciddi bir sosyal mesele olarak öne çıkmaktadır. Kadınlar genellikle partnerleri veya eşleri tarafından şiddete maruz kalmaktadırlar. Bu durumun başlıca nedenlerinden biri olan toplumsal cinsiyet eşitsizliği ataerkil sistemi beraberinde getirmiştir. Cinsiyet kalıp yargıları ve ayrımcılığı eskiye göre azalmış olsa da günümüzde hala devam etmektedir. Kadın cinayetlerinin artmasıyla birlikte, kadın cinayetleri ve şiddet haberleri de medyada yoğun bir şekilde yerini almaktadır. Bu çalışmada, kadının toplumsal cinsiyet kodları içerisindeki rolleri ve şiddet haberlerinde, medyada nasıl yer aldığı konusu etik ilkeler bağlamında ele alınmaktadır. Toplumsal bir sorun olarak nitelendirilen kadına şiddet haberlerinin medyadaki sunumunu analiz edebilmek adına farklı ideolojik kimliklere sahip olan Sözcü, Hürriyet ve Yeni Şafak gazetelerinin söz konusu başlıkları Teun Van Dijk'in eleştirel söylem analizi yöntemiyle, makro düzeydeki şematik ve tematik boyutlarıyla incelenmiştir. Pek çok araştırmada temsillerin ve genel olarak kadının temsilinin, toplumsal alanda kadın aleyhine anlamları destekleyecek biçimde inşa edildiği ortaya konmuştur. Bu sorunlu temsilin temel dinamiğini liberal pozitivist yaklaşımın varsaydığı haber denilen bilginin nesnel ve tarafsız bir gerçekliği yansıtabileceğini iddia eden epistemik statüsünde aramak gerekmektedir. Haber, kadınla ilgili imgelerin ve anlamların var olan ataerkil anlam rejimini güçlendirecek tarzda oluşmasına yol açmaktadır. Söz konusu gazeteler incelendiğinde hepsinde toplumsal cinsiyet kalıpyargıları yer almaktadır. Fotoğraflarda ve haber başlıklarında görülen zanlı maktul ve yakınlarının yüzü açık kullanılması, suç aletin net olarak fotoğrafının koyulması, maktul ve zanlı yakınlık derecesine yer verilmesi, özel hayatın gizliliğinin ihlal edilmesi gibi etik sorunlar incelenen gazetelerin ortak etik sorunları olduğu çalışma sonucunda ortaya çıkarılmıştır. Haberlerin başlıklarında genel olarak yer ve zaman bilgilerine yer verilmeyerek enformasyon eksiltimine gidildiği görülmektedir. Olayın öznesinin kadın olmasından kaynaklı olaydan bağımsız özel hayatına dair detayların aktarıldığı bağlamında cinsiyet baskısının medya tarafından üretildiği görülmektedir.

**Anahtar kelimeler:** toplumsal cinsiyet, medya, etik, kadına şiddet, habercilik, temsil

## ABSTRACT

Violence against women is a serious social issue not only in Turkey but also globally. Women are often subjected to violence by their partners or spouses. One of the main reasons for this is gender inequality, which brings with it a patriarchal system. Although gender stereotypes and discrimination have decreased compared to the past, they still persist today. With the increase in femicides, news related to women's murders and violence is also receiving significant media coverage. This study examines the roles of women within the framework of gender codes and how they are represented in violence news in the media, in the context of ethical principles.

In order to analyze the presentation of violence against women in the media as a social problem, the headlines of newspapers with different ideological identities—Sözcü, Hürriyet, and Yeni Şafak—are examined using Teun Van Dijk's critical discourse analysis method, with a focus on macro-level schematic and thematic dimensions. Many studies have shown that representations of women, in general, are constructed in a way that supports meanings that are detrimental to women in the social sphere. The fundamental dynamic of this problematic representation can be found in the epistemic status of the liberal positivist approach, which claims that the news can reflect objective and impartial reality. News about women tends to form images and meanings that strengthen the existing patriarchal meaning regime.

When the newspapers in question are examined, gender stereotypes are present in all of them. Ethical issues such as showing the faces of the suspects, the victim, and their relatives in photos, publishing clear images of the crime weapon, disclosing the degree of kinship between the victim and the suspect, and violating privacy rights are common ethical issues found across the newspapers analyzed. In the headlines of the news, there is generally a lack of information about the location and time, leading to a reduction in the amount of information provided. Moreover, because the subject of the incident is a woman, details about her private life unrelated to the incident are often included, illustrating how gender pressure is produced by the media.

**Keywords:** gender, media, ethics, violence against women, journalism, representation

## 1.GİRİŞ

Toplumsal cinsiyet ve medya ilişkisi iletişim arařtırmalarının bařında gelen arařtırma konularından biri olmuřtur. Kadına řiddet haberlerinin sunumu bu iliřkinin önemli bir yönünü oluřturmaktadır. Medya, toplumsal cinsiyet normlarının yeniden üretilmesinde ve pekiřtirilmesinde etkili bir araç olarak kabul edilirken, kadına řiddet haberlerinin sunumu, toplumun bu olguya bakıřını ve algısını etkileyen kritik bir faktördür. Geleneksel olarak, medya kadına řiddet haberlerini sunarken bu tür olayları basit bir suç haberinden öteye tařımamakta ve derinlemesine bir analiz yapmamaktadır. Bu durum, kadına řiddeti normalleřtirme ve görünmez kılma eğilimi yaratarak, toplumdaki farkındalıęı azaltabilir ve maędurların seslerini duyurmasını engelleyebilir. Ayrıca kadına řiddet haberlerinin sunumu sıklıkla cinsiyetçi stereotipleri pekiřtirebilir ve maędurları ikincil konumda konumlandırabilir.

İnsanlık tarihine bakıldığında süregelen bir çatıřma içinde olduęu ve bunu řiddeti kullanarak çözüme ulařtırmaya çalıřtıklarını söylemek yanlış olmaz. Bu noktada řiddeti uygulayan ve řiddeti gören kategorilerine bakıldığında güçlünün güçsüze uyguladıęı bir durumla karřılařılmaktadır. Bu durum yapısal bir özellik göstermekte ve řiddetin řiddet doğurmasına yol açmakta ve toplumda bir řiddet döngüsünün kendisini üretmesine neden olmaktadır. Bu nedenle ataerkil kabuller řiddetin farklı biçimlerini yeniden-yeniden üretmek besleyen bir mekanizmaya bürünmektedir. Ataerkil mekanizma, “erkeklilięi” kadına referansla tanımlamakta ve kadına ait olan her şeyin reddine dayanarak inřa etmektedir. Bourdieu'nun (2014) ifadesiyle, kadınlığın kurucu ögesi olan baęımlı olma aynı zamanda erkeklilięin inřasında da rol oynamaktadır. Bu bağlamda kadına yönelik řiddet, gücün, kaynaęın ve iktidarın göstergesine dönüşmektedir. Ataerkil kültürel deęerler kapsamında erkeğin kadına zorla sözünü dinlettirmesi de kadına yönelik řiddet kapsamındadır. Bir bařka ifadeyle kadın kendi iradesinin dıřında istemedięi bir davranıřa erkek tarafından zorlandığında (örneğin kocası, babası, ağabeyi, akraba erkekler ya da tanımadıęı erkeklerin kendi sözünü dinletmek için kadına ısrarlı davranıřta bulunması gibi) kadın řiddete maruz kalmaktadır (Sallan ve Gül, 2013).

Birleřmiř Milletler Örgütü tarafından 1993 yılında düzenlenen Kadına Yönelik řiddetin Ortadan Kaldırılması Bildirgesinde kadına yönelik řiddet, “ister kamusal isterse özel yaşamında meydana gelsin kadınlara fiziksel, cinsel veya psikolojik zarar ve ıstırap veren veya verebilecek olan cinsiyete dayalı bir eylem, uygulama ya da bu tür eylemlerle tehdit etme, zorlama veya keyfi olarak özgürlükten yoksun bırakma” biçiminde tanımlanmaktadır (HÜNEE, 2010). Ertürk'e (2015) göre řiddet, dayanaęını kadın ile erkek arasındaki güç eřiřsizlięinden almakta ve güçlünün güçsüz üzerine baskı kurmasına yol açmaktadır. Gördüęü řiddet sonucunda kadın bedensel ve ruhsal açıdan acı ve ıstırap yaşamaktadır. Bu ise aynı zamanda insan haklarının ihlali anlamına gelmektedir. Kadına yönelik řiddet bir bařka açıdan tanımlandığında; kadınlara, yalnızca kadın oldukları için uygulanan veya kadınları etkileyen cinsiyete dayalı bir ayrımcılık ile kadının insan hakları ihlaline yol açan olarak her türlü tutum ve davranıřı ifade etmektedir (Sallan ve Gül, 2013).

Kadına řiddetin gerekçesi olarak; töre, namus, kıskançlık, ayrılık talebi, bořanma gibi sebepler suç normalleřtirmek için kullanılan argümanlar olarak karřımıza çıkmaktadır. Cinsiyetçi egemen bakıř açısı ve ideolojinin basın yoluyla yaygınlařmaması için gazetecilerin etik unsurlara çok dikkat etmesi gerekmektedir. Gürses'e (2017) göre; temel etik kurallara uyulması, haber söylemini belirleyerek kadına yönelik cinsiyetçi yaklařımların toplumda yayılmasını engelleyici rol üstlenmesini saęlayacaktır. Toplumsal cinsiyet, bilinçli bir kimlik olmamakla birlikte çevreden gelen mesajlar ve anlam yapıları ile sürekli olarak sürdürölmektedir (Toker ve Erdoğan, 2010).

Kadınlar farklı medya araçlarında cinsel obje olarak, geleneksel toplumun belirledięi kalıplařmış rollerde bilgilendirmekten uzak, 3. sayfa haberlerinde ise aciz ve öldürölme nedenleri de verilerek durumu hak etmiř gibi temsil edilmektedir. Medya sektörünün erkek egemen karakteri nedeniyle kadın sorunlarına duyarsız ve özensiz bir dil kullanımıyla birlikte (Gökulu ve Hosta, 2013; Gül ve Altında, 2005), söz ve fikir sahibi, özerk, kamusal bir kimlik gerçekteřirmiř kadın-bireyleri dıřlayan bir temsil söz konusudur (Çelenk, 2010). Ana akım medya, erkek řiddetini ancak kadına yöneldiğinde haber konusu haline getirmekte; haberlerde adli birimlerin ardından öncelikle saldırganın kaynaklıęına bařvurulmaktadır (Altun ve Bek, 2013). Genellikle failin anlatımıyla kurgulanan haberlerde řiddet bu anlatımla gerekçelendirilerek; kadın ismiyle, fotoęrafıyla teřhir edilerek ve olay münferit hale getirilerek okurun çok uzaęında konumlandırılmaktadır (Tabur ve Tümer, 2011). Cinsiyet esaslı ayrımcılıęın oluřmasında, toplumsal kalıplar önemli rol oynamaktadır. Kitle iletişim araçları, cinsiyete dayalı ayrımcılıęın tekrar üretilmesi, sürdürölmesi ve bu anlayıřın deęiřtirilmesinde önemli bir rol üstlenmektedir (Mora, 2005: 4). Günümüzde insanların iletişim araçlarına ayırdıkları zamanın çokluęu, cinsiyet ayrımcılıęı ve řiddetin yeniden üretilmesine farkında olmadan katkı saęlamaktadır (Arabacı, 2014).

## 2.Toplumsal Cinsiyet Kavramı

Toplumsal cinsiyet kavramı, ilk defa 1972 yılında Ann Oakley'in Sex, Gender and Society adlı eserinde kullanılmıř olmakla birlikte (Oakley, 2016) kadının toplumdaki yeri üzerine çalıřmalar daha eskilere ikinci dalga feminist hareketin yükseliře geçtięi 1940'lı yıllara dayanmaktadır (Bařtürk Akca ve Ergöl, 2016). Kadının toplum içindeki ikincil konumunu sorgulayan ikinci dalga feministler, toplumsal cinsiyet, iktidar ve cinsellik konularını ataerkil toplum yapısında sorunsallařtırmaktadır (Bařtürk Akca ve Tönel, 2011). “Toplumsal cinsiyet kavramı,

kadın ve erkeği tanımlayan biyolojik özellikleri belirten cinsiyet kavramından ayrı olarak, karmaşık toplumsal ilişkiler ağı içinde inşa edilen nitelikleri, kadınlık ve erkekliğe yüklenen anlamları, onlardan beklenen davranışları ifade etmek için kullanılır” (Akca ve Ergül, 2016). Bu anlamlar toplumdaki farklılıkların gösterebileceği gibi aynı toplum içinde de zaman içinde değişiklik gösterebilir. Bir toplumun farklı kesimlerinin cinsiyete yüklediği anlamlar birbirinden farklı olabilir. Bununla birlikte günümüzde toplumsal cinsiyet kavramı genel olarak ataerkil toplum yapısı ile ilişkilendirilerek eleştirel bir anlam kazanmaktadır. Nitekim Sakallı’ya göre toplumsal cinsiyet kavramı, ataerkil toplum yapısında kadına yönelik olumsuz davranışların yansımaları ile kadının sosyal, kültürel ve ekonomik bağlamda erkeğe göre düşük konumlandırılmasını içermektedir (Akt. Budak ve Küçükşen, 2018). Toplumsal cinsiyet kavramı, Deniz Kandiyoti’nin “Ataerkil Pazarlık” kavramsallaştırması dâhilinde de düşünülebilir. Kandiyoti (2007) ataerkil toplumların cinsiyet rollerine dair farklı bakış açısı geliştirmede ürettiği bu anahtar kavramsallaştırma ile kadınların tâbiyet sürecinde kendilerine yeni bir alan yarattığını ifade eder. Ataerkil pazarlıkta ataerkil ilişkiler ya da anlayışlar her iki cinsiyetin de rıza gösterdiği bir pratik ile korunma ve güvenceye altına alınır. Kadınlar uyumluluk ve tâbiyet gösterdiği sürece kamusal alanda kaybettikleri alanlarını özel alanda kazanmaya başlar. Bu pazarlık ile toplumsal cinsiyet ilişkileri yeniden kurulur ve kadın özel alanda daha güçlü olduğu bir konumlandırılmaya sahip olur. Bu pazarlığın niteliği, toplumsal ve kültürel farklılıklar taşıdığıdır. Kadın, hangi alanda pasif hangi alanda aktif olacağını hiyerarşik ilişki ile girdiği pazarlık boyutuna göre belirlemektedir.

Erkek, erilliğini homososyal ortamlarda yeniden üretmek toplumsal cinsiyet düzenini normalleştirir. Homososyallık, kendi cinsiyet grubuna ait kişilerin bir arada bulunduğu ve erkeklik bağının güçlendirildiği alanlardır. Bu sosyal ve fiziki alanlarda, hem siyasi, ahlaki konular tartışılır; hem de güç ilişkileri inşa edilir (Lipman-Blumen, 1976; Meuser, 2004). Hegemonik erkeklik düzeni, erkeklerin kadınlardan daha güçlü olduğunu düşündüğü ve kadınları boyunduruk altına almaya çalıştığı bir yapıya dayanır. Toplum içinde yer alan farklı erkeklik öğretileri, anlatıları ve modelleri birbiriyle yarışır. Kabul gören, kutsanan, desteklenen ve takdir edilenler, homososyal ortamlarda yeniden inşa edilir. Erkeklik özellikle iki mekânda üretilir. Bunlardan ilki erkeklere özgü olan ve kadınların dışlandığı ya da konuk olarak yer aldıkları mekânlardır: Erkek hamamları, kıraathaneler, erkek yurtları/okulları, askeri kışlalar, camiler, kamyoncu durakları. İkinci olarak ise kadın ve erkeğin ortaklaşa yer aldıkları ve mekânsal iş bölümü gerçekleştirdikleri yerler: striptiz kulüpleri, pavyonlar, randevuevleri vs. (Özbay, 2013). Bu mekânlarda üretilen kimliklere ilişkin kodlar, özel ve kamusal alanlarda pekiştirilerek toplumsal cinsiyet düzeninin kurulması sağlanır. Heteronormatif ideolojiyi tehlikeye düşürecek her olgu, eril tahakküm ile baskı altına alınır. Böylelikle, hem doğacak erkeklik krizlerinin önüne geçilir; hem de kadın ona uygulanan sembolik şiddet ve güç ile aşağılaştırılabilir. Kadının konumlandırılmasındaki en temel güçlerden biri olan şiddet, tam olarak burada devreye girmektedir.

### 3. Kadına Yönelik Şiddet ve Medya Temsili

Medyanın gerçekliği inşa ederek sunduğu araçların başında haber gelir. Haber metinleri yeniden üretilerek verilmek istenen toplumsal anlamlar oluşturulur. Bu egemen anlamların haber üretimi sırasında toplumsal gerçeklik ve sorunlar ideolojik seçme, kapalı metinler içine hapsedme, taraflı gibi eğilimler nedeniyle farklı biçimlerde temsil edilmektedir (Tosun, 2007). Enformasyonun akış hızının sürekli olarak arttığı günümüzde “dünyamız gerçekten de artık küresel olarak birbirine bağlı hale gelmiştir.” (Dijk, 2016). İletişimsel olayların yoğunluğu ve enformasyonun hızlı dolaşımı Mc Luhan’ın, dünyayı evrensel köy diye nitelendirmesine yol açmıştır (Sözen, 1997). Küresel ölçekte bu denli önemli olan iletişimin belkemiği olan gazeteciler; enformasyon toplamak, onu doğrulamak ve topladığı bilgiyi hitap ettiği topluma göre işlemek, yani anlaşılır ve yararlı kılmakla yükümlüdür (Charon, 1992). Gazeteciler, ürettikleri haberler aracılığıyla toplumsal ilişkileri yeniden düzenleyip, şekillendirmektedir. “Medya iletişim sürecinin anlaşılmasında önemli bir kavram da eşik beğçisidir. Eşik beğçileri, mesajları seçen, değiştiren, reddeden ve bu yolla da bir alıcı veya alıcılar grubuna enformasyon akışını etkileyenlerdir.” (Sözen, 1997). Haber, egemen ideolojinin bizlik tanımı üzerinden, söylem ve ideoloji ikilisini de yanına katarak, toplumdaki ötekine karşı önyargıları ve nefret suçlarını kışkırtmaktadır (İnceoğlu ve Sözeri, 2012). Medya, haber dilinde kullandığı olumsuz söylem ile toplumsal algıyı etkileyebilmekte, nefret söylemi ve nefret duygularının üretilmesini tetikleyebilmektedir. “Filmler, izleyicilerin toplumsal sorunlarla ilgili duygu, düşünce ve tutumlarını yönlendirebilmekte, algılarını şekillendirebilmekte ve bir anlamda kanaat önderliği yapabilmektedir.” (Özarlan, 2013).

Medyada bilerek ya da bilmeyerek kadına yönelik cinsel şiddeti meşrulaştırıcı ifadelerle çok sık rastlanmakta ve bu durum şiddetin sıradanlaştırılması, meşrulaştırılması, yanlış bağlamlarda tartışılması gibi sonuçlara yol açmaktadır. Türkiye’de medyada, kültürel alandaki üretimlerde namus, töre, inanç gibi sözde meşru dayanaklar üzerinden kadına şiddet, daha özelden cinsel şiddet kabul edilebilir düzeye indirilmekte ve mantığa büründürülmektedir. Kadının şiddetin öznesi olduğu haberlerde sıklıkla kullanılan “‘namus cinayeti’” ifadesi, tecavüz olaylarında da tecavüz ya da saldırıya uğrayan kadınlarla ilgili haberlerde, cümlelerin başına ‘gece eğlencesinden dönen kadın’ veya ‘alkollü genç kız’ gibi tanımlamalar yerleştirilerek, bu kadınların adeta kendilerine yapılan saldırıları kışkırttıkları ya da bunu hak ettikleri ima edilmektedir” (Çelenk, 2010).

Kadına yönelik şiddet, medya tarafından haberleştirilirken sıklıkla kadınların bireysel acıları olarak sunulmakta, erkeklerin şiddet uygulamaları ise genellikle kişisel sorunlar olarak lanse edilmektedir. Medya, olayları sunma biçimiyle kadın mağdurların algılanmasını derinden etkileyebilir ve şiddetin toplumsal cinsiyet eşitsizlikleriyle ilişkisini göz ardı edebilir. Kadına şiddet olaylarının genellikle üçüncü sayfalarda veya düşük öncelikli haberlerde yer alması, bu tür şiddetin ne kadar ciddiye alındığı ve toplumsal yapının bu konuda nasıl bir rol oynadığı konusunda topluma yanlış mesajlar gönderebilir.

### 5.Kadına Şiddet Olgusunda Habercilik Etiği

Türkiye’de gazeteciliğe/haberciliğe ilişkin etik ilkeler hem gazetecilik meslek örgütleri tarafından hem de çeşitli basın/yayın kuruluşları tarafından geliştirilmektedir. Bu ilkeler, Batı’daki benzerlerinin aksine, Türkiye’de henüz basının toplumsal sorumluluğu anlayışının gelişmediği bir bağlamda ve siyasi-askeri güç odaklarının basın özgürlüğünü kısıtlayıcı her türlü müdahalesini önlemek amacıyla gazetecilerin özenetimi arayışları çerçevesinde ortaya çıkmıştır( Akt: Çiler Dursun). Bununla birlikte özellikle 1980 askeri darbesi sonrasında basın özgürlüğünün sağlanması ve korunması için gazetecilerin belirli bir etik anlayışa sahip olması gerektiği görüşü sektörde yaygınlaşmaya başlamış ve bu durum 1986’da Basın Konseyi’nin kurulmasıyla keskinleştirilmiştir. Konsey, basını siyasi iktidarlara karşı korurken okuyucuları da basına ve gazetecilere karşı korumak ikili amacını gerçekleştirmeye çalışmaktadır. Konseyin meslek ilkeleri içerisinde yer alan etik kodlar, yine diğer ülkelere benzer biçimde dar anlamda kadına yönelik şiddet haberleriyle ilgili olmamakla birlikte, ayrımcılık ve şiddet karşıtı nitelikte olması nedeniyle genel yapısı itibarıyla kadının lehine bir temsili öngörür. Ayrıca mahremiyet ve kişilik hakları ile ilgili konulara dair ilkelerle de gazetecilere/ habercilere kadına yönelik şiddet haberlerinin yapılmasına dair dolaylı bir kılavuzluk sağlamaktadır. Bu durum, Türkiye’de var olan diğer gazetecilik meslek örgütlerinin etik ilkeleri için de geçerlidir. Gerek Çağdaş Gazeteciler Derneği’nin meslek ilkeleri olsun, gerek Türkiye Gazeteciler Cemiyeti’nin Hak ve Sorumluluklar Bildirgesi’nde yer alan ilkeler olsun, gazetecinin haberlerinde cinsiyet ayrımcılığı yapmaması ve şiddeti körüklememesi gerektiğinin altını çizmektedir. Böylelikle kadına yönelik şiddet haberlerine dair bir etik zemin kuracak ilkeler önerilmektedir (Akt. Çiler Dursun). Söz konusu örgütlerin ilkeleri şunlardır:

#### a) Basın Konseyi Meslek İlkeleri:

- 1. md.)Yayınlarda hiç kimse; ırkı, cinsiyeti, sosyal düzeyi ve inançları nedeniyle kınanamaz, aşağılanamaz.
- 4.md.) Kişileri ve kuruluşları, eleştiri sınırlarının ötesinde küçük düşüren, aşağılayan ve iftira niteliği taşıyan ifadelere yer verilemez.
- 5.md.) Kişilerin özel yaşamı, kamu çıkarlarının gerektirdiği durumlar dışında, yayın konusu olamaz.
- 13.md) Şiddet ve zorbalığı özendirici yayın yapmaktan kaçınılır.

#### b) Çağdaş Gazeteciler Derneği Üyelik ve Meslek İlkeleri:

4. md.) Yayınlarda hiç kimse, ırk, renk, cinsiyet, dil, dini inanç ya da inançsızlık, sosyal statü, sınıf, bedensel yapı, düşünce ve inançları nedeniyle hor görülemez, kınanamaz, aşağılanamaz. Haber ve yorumda, kişileri ve kuruluşları, eleştiri sınırlarının ötesinde küçük düşüren, aşağılayan sözcükler kullanılamaz.

12. md.) Gazeteci, şiddet, zorbalık ve savaş kışkırtıcılığına araç olamaz...insanlar, topluluklar ve uluslar arasında nefreti, düşmanlığı körükleyici yayından kaçınılır... İnsan Hakları Evrensel Bildirgesi’nde ve Helsinki Konferansı kararında belirtilen ilkelere bağlı kalır.

#### c) Türkiye Gazeteciler Cemiyeti (Türkiye Gazeteciler Cemiyeti Hak ve Sorumluluk Bildirgesi)

3. md.) Gazeteci; başta barış, demokrasi ve insan hakları olmak üzere, insanlığın evrensel değerlerini, çok sesliliği, farklılıklara saygıyı savunur. Milliyet, ırk, etnisite, cinsiyet, dil, din, sınıf ve felsefi inanç ayrımcılığı yapmadan tüm ulusların, tüm halkların ve tüm bireylerin haklarını ve saygınlığını tanıır. Gazeteci; her türden şiddeti haklı gösterici, özendirici ve kışkırtan yayın yapamaz.

7. md.) Gazeteci, kamuya mal olmuş bir şahsiyet bile olsa, halkın haber alma, bilgilenme hakkıyla doğrudan bağlantılı olmayan hiçbir amaç için, izin verilmedikçe özel yaşamın gizliliği ilkesini ihlal edemez. Gazetecinin Doğru Davranış Kuralları: Çocuk: Çocuklarla ilgili suçlarda ve cinsel saldırılarda sanık, tanık ya da mağdur (maktul) olsun, 18 yaşından küçüklerin açık isimleri ve fotoğrafları yayınlanmamalıdır. Çocuğun kişiliğini ve davranışlarını etkileyebilecek durumlarda, gazeteci, bir aile büyüğünün veya çocuktan sorumlu bir başkasının izni olmaksızın çocukla röportaj yapmamalı veya görüntüsünü almaya çalışmamalıdır. Cinsel saldırılar: Cinsel saldırı mağdurlarının fotoğrafları, görüntüleri veya kimlikleri, açık kamu yararı olmadıkça yayınlanmamalıdır.

Bunların dışında Türkiye Gazeteciler Cemiyeti tarafından hazırlanan Medya ve Çeşitlilik Kılavuzu’nda ise, kadına yönelik şiddetin haberleştirilmesinde nasıl bir anlatımın gazeteci tarafından gözetilmesi gerektiği konusunda daha somut öneriler yer almaktadır:

#### b) TGC Medyada Çeşitlilik Kılavuzu:

- Cinsiyet ayrımcılığına dayalı şiddet hiçbir biçimde meşru gösterilmemeli, şiddetin toplumsal düzlemdeki önemini azaltacak sansasyonel kullanımlardan ve mizah malzemesine dönüştürme eğilimlerinden uzak durulmalıdır. - Cinsiyetleri ve cinsel yönelimleri nedeniyle şiddete uğrayanlarla ilgili haberlerde mağdurların onurunun korunmasına gereken özen gösterilmelidir. - Mağduru küçük düşürücü durumlarda gösteren fotoğrafların kullanılmasından kaçınılımalıdır. - Taciz ve tecavüz gibi cinsel suçların haberleştirilmesinde

kullanılan dile özen gösterilmelidir. Bu haberlerde kullanılan görsel malzeme ile anlatım biçiminin pornografik ve özendirici çağrışımlar yaratmamasına dikkat edilmelidir.

## 6. Çalışmanın Yöntem ve Amacı

Çalışmanın konusunu 2024 yılının güncellik açısından ilk 1 ayının kadına şiddet haberlerinin farklı ideolojilere sahip gazetelerin sunumu oluşturmaktadır. Bu yılın seçilmesinin nedeni, çalışmaya başlanmasına kadar olan sürede yeni ve güncel haberlerin işlendiği yıl olmasıdır. Söz konusu gazetelerin, farklı ideolojilere sahip ve Türkiye’de en çok okunan gazeteleri arasında yer alan bu üç gazetenin internet haberciliğinde kadına şiddet ile ilgili haber başlıkları incelenmiştir.

Bu çalışmanın amacı, kadına yönelik şiddet haberlerinin farklı yayın politikalarına sahip gazetelerin benimsemiş olduğu ideolojik kimlik çerçevesinde, haberlerin sunumunda ihlal edilen etik sorunlar, kadının nasıl temsil edildiği, söz konusu haberler yayınlanırken ataerkil söylemler kullanılmakta mıdır ve bahsedilen gazeteler arasında bu sunumların farklılık yaratıp yaratılmadığı ortaya çıkarılmaya çalışılmıştır. Bu çalışmada aşağıdaki sorulara cevap aranacaktır.

1. Kadına şiddet haberlerinde kadın hangi imgeyle sunulmaktadır?
2. Toplumsal cinsiyet kalıpları medyaya yansımakta mıdır?
3. Kadına şiddet haberlerinde etik kurallara uyulmakta mıdır?

Kadına şiddet konulu haberlerin gazetelerde nasıl sunulduğunu analiz etmek için, farklı yayın politikalarına sahip Sözcü Hürriyet ve Yeni Şafak gazetelerinde yayınlanan haberlerin incelendiği bu çalışmada, Teun Van Dijk’in eleştirel söylem analizinin kullanılmasına karar verilmiştir.

İnal’a (1996) göre; Van Dijk, haberi bir tür (genre) olarak değil, bir söylem olarak ele almaktadır. Van Dijk, ırkçılık, ayrımcılık, etnik köktencilik, mezhepçilik, cinsiyetçilik, eril dil denilen erkek egemen söylemi, sporda fanatizm ve holiganlık gibi unsurları, eleştirel söylem çözümlemesi modelinde incelemektedir (Dijk, 2015).

“Söylemlerin fonksiyonları bilgi, güç, iktidar, hakimiyet, otorite, kontroldür ve bütün bunlar, dilde hakimiyet kazanmaktadır (Sözen, 2014). “Dil pratikleri olarak söylemler, düzenlilikler, kışkırtmalar, mücadeleler, baskı, açığa çıkma, özgürleşim, müzakere, uyum, çatışma, vs. gibi birtakım sosyal durumlara; daha doğrusu sosyal bağlamlara ilişkindir.” (Sözen, 2014). Söylem çözümlemesinde ana amaç, anlamlandırma ya da yorumlamadır.

Eleştirel söylem çözümlemesinde ise, söylemin dünyayı temsil eden bir sosyal uygulama olması; zaman yer, sosyal, kültürel ve ideolojik bağlam içinde anlam kazanması dilbilgisel özellikler ve yapıların bilinçli seçilmiş ya da seçilmemiş olmasına bağlıdır (Ülkü, 2004). Gazeteci, bir yandan kullandığı dil ve farklı kodların taşıdığı çok anlamlılık nedeni ile mesajını oluştururken, diğer yandan dengelilik ve olaysal olma kaygısı ile haber kaynaklarının söylemlerinin bir yeniden üreticisi konumundadır (İnal, 1996). İnceoğlu’na (2013) göre; “Dili kullananların seçtiği sözcükler, sözcük öbekleri, konuşma biçimi, anlatımı, cümle şekilleri, söylemin oluşmasında çok önemli bir etkidir. Sözen’e (2014) göre; söylemi yirminci yıl düşünürleri keşfetmiştir. Yirmi birinci yüzyıl ise bir söylem yüzyılıdır. Potter’a (2004) göre; söylem anlamı inşa eder. Mevcut semboller ve anlamlar arasından toplumlar nasıl düşüneceklerini söylemler üzerinden kazanmaktadır Eleştirel söylem analizine dilbilimcilerinin katkısı büyük olmuştur. “Foucault’un söylem analizi söylemsel pratikleri iktidar biçimlerinin dönüşümünü değerlendirmeye yönelik sosyolojik bir analiz niteliğindedir (Şahin, 2017).

Eleştirel yaklaşıma göre, “haberler yapılandırılmış bir süreçtir ve haber üretim süreci, haberin nesnel ve tarafsız olarak yansıtılabileceği yanılsaması üzerine kurulmuştur” (Aktaran: Karaduman ve Akbulutgiller, 2018). “Teun Van Dijk’in eleştirel söylem analizi modeli makro yapı ve mikro yapı olmak üzere iki ana bölümden oluşur” (akt. Selçuk, Şeker 2012).

Bu modelde de makro yapı, tematik analiz ve şematik analiz olarak iki başlık altında incelenmektedir. Makro yapı çözümlemeleri tematik ve şematik yapı üzerinden ele alınmaktadır. Makro yapı kapsamındaki tematik çözümlemede, haberi başlığı, haber girişi ile fotoğraflar bu bölümlerin birbirleriyle olan ilişkisi ele alınmaktadır. Şematik yapıda ise ana olay ve sunuş biçimleri, artalan, bağlam bilgisi ile kaynak bilgisi irdelenmiştir (akt. Öztunç, 2021). Bu çalışmada tematik ve şematik bölümler analiz edilerek bulgular değerlendirilmiştir.

## Evren ve Örneklem

Kadına şiddet haberlerinde kadının medyada nasıl sunulduğunu ve etik sorunları ele alan bu çalışmanın evrenini farklı ideolojik kimliğe sahip gazetelerin internet versiyonlarındaki kadına şiddet başlıklı haberlerin sunumu oluşturmaktadır. Söz konusu evren içerisinden seçilen ve örneklem olan farklı ideolojik yapılara sahip olan Hürriyet Gazetesi, Sözcü Gazetesi ve Yeni Şafak Gazetesi’nde çevrimiçi versiyonlarında yayınlanan kadın şiddet konulu haberler ise içerik analizi yöntemi ile Jan Van Dijk eleştirel söylem analizi bağlamında yorumlanmasını içermektedir.

## Araştırmanın Sınırlılıkları

Bu araştırma Türkiye’de en çok okunan tirajı yüksek 3 büyük ulusal gazete olan Hürriyet, Yeni Şafak ve Sözcü gazetelerinin yazılı basın ve internet yayınlarını kapsamaktadır. Çalışma, 2024 yılının ocak ayının kadına şiddet başlıklı yapılan haberleri inceleme ile sınırlandırılmıştır.

### Van Dijk Modelinde Söylem Analizinde Ele Alınan Unsurlar

Dilbilimin yöntemleri ve kavramlarını kullanarak gelişen, eleştirel söylem çözümlemesi, haber söylemi analizlerinde toplumsal yapı analizi yapmayı mümkün kılmaktadır (Karaduman, 2017). Van Dijk, haber çözümlemelerinde söylem analizi tekniğini kullanıp, bunu söylem kuramlarına dayanarak yapmaktadır. Dijk'ın söylem analizinin diğer söylem analizlerinden farkı, onun söylemi sosyo-kognitif bir yaklaşımla açıklamasından kaynaklanmaktadır (Sözen, 2014).

### Söylem Analizinde Makro Yapılar

Jan Van Dijk söylem analizi metodunda haberin makro yapıları şematik ve tematik olarak iki ayrı grupta incelenmektedir. Tematik yapıda başlık, haber girişi ve fotoğraflar incelenmektedir. Başlıklar, alt başlıklar, spotlar ve haber girişleri incelenirken haberde yer alan temalar tespit edilerek, bu temaların birbiriyle ilişkisini içeren tematik hiyerarşi ortaya çıkarılmaktadır. Makro yapının bir diğer ayağı olan şematik çözümme ise ana olayın sunumu, sonuçlar, ardalın bilgisi, bağlam bilgisi, haber kaynakları ve olayın tarafları üzerinde durulmaktadır. Şematik yapı haberin durum ve yorum bölümlerinden oluşmaktadır. Makro yapı bağlam ve ardalın bilgilerini de içermektedir (Keskin, 2004).

### Bulgular

Farklı ideolojik kimliklere sahip olan Sözcü, Yeni Şafak ve Hürriyet gazetelerinin çevrimiçi versiyonlarında 2024 yılının ilk ayında yer alan kadına şiddet başlıklı tespit edilen konu ile ilgili haberlerin başlıkları haber girişleri ve fotoğraf içerikleri tablolştırılmıştır. Makro yapıya yönelik tematik ve şematik analizler haber sitelerine göre değerlendirilmiştir.

### Makro Yapıya Yönelik Tematik Analiz

#### Hürriyet Gazetesi Başlıkla İlgili Bulgular

Hürriyet gazetesinde yer alan haber başlıkları incelendiğinde öldüren ve öldürülen kişilerin yakınlık derecesine ve olayın nasıl işlendiğine dair bilgiler veren terimler kullanılmıştır. Bazı başlıklarda yer ve zamana yer verilmemiştir. 1 no'lu başlıkta "Samsun'da dehşet: Gönül ilişkisi yaşadığı kadını öldürdü" başlığına bakıldığında neden öldürüldüğü bilgisine yer verilmediği ve "gönül ilişkisi yaşadığı kadını" cümlesi ile yakınlık derecelerine yer verilmiştir. 2 no'lu başlıkta "Mardin'de vahşet! yeni doğum yapan Vatfa Ecevit, eşi tarafından defalarca bıçaklanarak katledildi" başlığında cinayetin nasıl ve hangi araçla işlendiği bilgisine açıkça yer verilmesi etik ihlale yol açmıştır. 3 no'lu başlıkta "Nazlı Elması Uzi ile vurarak 'şakalaşıyorduk' demişti! 'Boynundan başlayıp diz kapağına kadar çocuğumu taramışlar" başlığında cinayet betimsel olarak ifade edilmiştir. 5 no'lu başlıkta "Burcu'yu 17 Bıçak darbesiyle katletti" ifadesinde yer ve zaman olgusuna yer verilmemiştir. 7 no'lu başlıkta "Türkü evinde korkunç olay! İşletmeci kadını kablo ile boğarak öldürdü" başlığında cinayetin nasıl ve hangi yolla işlendiği bilgisine yer verilmesi etik sorun oluşturmuştur. Bu tür haberlerde özendirici olmaması ve taklit edilmemesi adına bilgiler açıkça verilmemelidir. Aynı zamanda haber başlıklarında yer verilen katledilmesi/öldürülmesi/ vahşice katledilmesi" ifadeleri haber söyleminde kadının "kurban" olarak temsil edildiğini göstermektedir.

#### Hürriyet Gazetesi Haber Girişi İlgili Bulgular

Haber girişleri ana tema hakkında bilgi vermekte ve olayı kısaca anlatmaktadır. Hürriyet Gazetesinde kadına cinayetleri ile ilgili haberlerin genelinde haber metnini özetleyen ve okuyucunun dikkatini çekmeye yönelik haber girişleri olduğu görülmektedir. Ancak bazı haber girişlerinde 5N 1K kuralının uygulanmadığı haber metninin içeriğinin anlaşılması zorlaştıran haber girişleri de yer almaktadır. 1 no'lu haber girişinde "Samsun'da Muradiye Terzi (31), gönül ilişkisi yaşadığı M.D. (43) tarafından tabanca ile vurularak öldürüldü" ifadesiyle ataerki söylem pekiştirilmiştir. Kadını tanıtmak amacıyla "gönül ilişkisi yaşadığı" cümlesiyle okuyucuya yaşanan şiddetinin makul bir sebebi olduğu çabası olduğuna rastlanmıştır. 2 no'lu haber girişi Mardin'in Artuklu ilçesi kırsal Dara Mahallesi'nde cuma günü doğum yapan ve bugün hastaneden taburcu olan Vatfa Ecevit (25), eşi Şiyar Ecevit (28) tarafından 17 yerinden bıçaklanarak öldürüldü. Şiyar Ecevit, olaydan sonra haber verdiği yakınlarının ihbarı ile gelen jandarma tarafından gözaltına alındı. İlk cümlede olay yeri bilgisi yer almaktadır. Devamında ise cinayetin nasıl işlendiğine dair açık bir anlatım ile bilgiler verilmektedir. 4 no'lu girişte "Manisa'da tartıştığı sevgilisi Melike Akpınar'ı otomobilinde tabancayla başından vurarak öldüren Zübeyir Yıldız intihar etti. Melike'nin babası Necati Akpınar'ın ise 2'si nikahlı eşi 3 kadını öldürdüğü ve cezaevinde olduğu öğrenildi" olaya ilişkin kişilerin isimleri açıkça belirtilmiştir. Toplumsal yargı ve kadına yönelik toplumsal kabullenilmiş normların etkisiyle "sevgili" sözcüğü kullanılarak habere eril dilin hâkim olması sağlanmaktadır. 5 no'lu girişte "Antalya Kepez'de halı pazarlamacılığı yapan Yılmaz Gündüz (37) ile 10 yıldır birlikte yaşadığı 3 çocuk annesi Burcu Gezersoy (26) arasında dün 00.30 sıralarında evde tartışma çıktı" Kadın olgusu toplumsal cinsiyet öğesi olarak görülen normlarla temsil edilmektedir. Toplumsal kabul içermeyen makbul olmayan hayat tarzı yaşadığını vurgulanmak için "10 yıldır birlikte yaşadığı" ifadesi kullanılmıştır. Aynı zamanda anne olduğu bilgisinin verilmesiyle toplumsal cinsiyet

rollerine atf yapılmıştır. 7 no'lu haber girişinde olayın nasıl gerçekleştiğine yer verilmiş olup betimleyici olarak anlatılmıştır.

Haberler, şiddet olaylarını tarafsız ve etik bir şekilde aktarmalıdır. Mağdur ile suçlu arasında doğru bir denge kurularak, objektif bir dil kullanılmalıdır. Haberler dramatize edilmeden, magazinleştirilmeden veya özel hayata müdahale edilmeden sunulmalıdır. Ayrıca, cinsiyetçi veya ayrımcı olmayan bir dil kullanılmalıdır. Kullanılan betimlemeler ve yorumlar, haberin algılanma şeklini etkileyebilir, bu yüzden dikkatli bir şekilde seçilmelidir.

### Hürriyet Gazetesi Fotoğrafla İlgili Bulgular

Kadına yönelik şiddet haberlerinde, fotoğraf ve görsellerin kullanımı da haberin anlamını derinleştiren ve etkisini artıran önemli bir faktördür. Olayı iyi anlatabilmek ve ilgi çekmek amacıyla fotoğraflar kullanılmaktadır. 1 no'lu haberde öldürülen kadının gelinlikli özel hayatına ilişkin fotoğraflarına yer verilmiştir. 2 no'lu haberde öldürülen kadının fotoğrafı açıkça kullanılmıştır. 4 no'lu fotoğrafta hem öldüren hem de öldürülen kişilerin görüntülerine net bir şekilde yer verilmiştir. Son haberde ise 3 fotoğraf kullanılmış olup bunlardan ikisinin mağdur kadına ait olurken diğer görsel ise olay yerine aittir. Haberlerde genel olarak Mağdurun fotoğraflarına, mağdur edenin fotoğraflarına göre daha fazla yer verilmiştir. Haber metinleri, seçilen sözcükler etrafında örgütlenen anlatılara dönüşmüş, fotoğraflar ise bu anlatıların destekleyicisi olarak sunulmuştur. Haberlerin tümünde mağdurların belli fotoğraflarının seçildiği görülmektedir (Gürses, 2017).

### Makro Yapıya Yönelik Şematik Analiz

#### Ana Olay ve Sunuş Biçimleri

Haberlerde ana olay, toplumsal cinsiyet kalıpları ile işlenen kadın cinayetlerin sunulmasıdır. Söz konusu gazete girişlerde ana temayı vermiştir. Haberlerin girişi ve ana olayı sunuş biçiminde hemen hemen ortak tutum belirlenmiştir. Haberlerin sunuş biçiminde genel olarak toplumsal cinsiyet kalıpları, ataerkil söylemler ve cinsiyetçi tutumlar sergilenmiştir.

#### Artalan ve Bağlam Bilgisi

Hürriyet Gazetesi'nin konu ile ilgili haberlerin bir kısmında artalan ve bağlam ilişkisine yer verilmemiştir. Olayların neden yaşandığına dair bilgiler eksik verilmiştir. Örneğin Samsun'da Muradiye Terzi (31), gönül ilişkisi yaşadığı M.D. (43) tarafından tabanca ile vurularak öldürüldü" haberinde olayın neden gerçekleştiği bilgisi verilmemiştir. 4, 5, 7 no lu haberlerde ise olayın tartışma sebebiyle yaşandığı belirtilmiştir.

#### Haber Kaynakları

Haberlerde kaynak olayın bireyleri ya da yakın çevreleridir. Muhabirler aldıkları duyumlar doğrultusunda olay yerlerine giderek bu kişilerden bilgi almaktadırlar. Hürriyet Gazetesi haberlerinde en çok kişilerin yakınları ve olay yeri görgü tanıkları kaynak olarak gösterilmiştir.

**Tablo 1.** Hürriyet Gazetesinde 2024 Ocak ayında işlenen kadın cinayetleri ile ilgili çıkan haber başlıkları, haber girişleri ve fotoğraflar

| NO | BAŞLIK  | HABER GİRİŞİ  | FOTOĞRAF   |
|----|---|---|--|
| 1  | Samsun'da dehşet: Gönül ilişkisi yaşadığı kadını öldürdü  | Samsun'da Muradiye Terzi (31), gönül ilişkisi yaşadığı M.D. (43) tarafından tabanca ile vurularak öldürüldü.  | Girişte, öldürülen kadının gelinlikli fotoğrafına yerilmiştir. Haberin devamında ise 2 fotoğraf daha kullanılmıştır. Bunlarda yine aynı şekilde öldürülen kadına aittir. |
| 2  | Mardin'de vahşet! yeni doğum yapan Vatfa Ecevit, eşi tarafından defalarca bıçaklanarak katledildi | Mardin'in Artuklu ilçesi kırsal Dara Mahallesi'nde cuma günü doğum yapan ve bugün hastaneden taburcu olan Vatfa Ecevit (25), eşi Şiyar Ecevit (28) tarafından 17 yerinden bıçaklanarak öldürüldü. Şiyar Ecevit, olaydan sonra haber verdiği yakınlarının ihbarı ile gelen jandarma tarafından gözaltına alındı. | Haberde bir tane fotoğraf kullanılmıştır. Öldürülen kadının fotoğrafı yüzü net şekilde haberde yer verilmiştir.  |

|   |   |  |  |
|---|---|--|--|
| 3 | Nazlı Elması Uzi ile vurarak 'şakalaşıyorduk' demişti! 'Boynundan başlayıp diz kapağına kadar çocuğumu taramışlar | İstanbul Bayrampaşa'da Eniz Kurtuluş (25) tarafından Uzi ile vurulan Nazlı Elmas'ın (19) annesi Hüsniye Elmas, "Boynundan başlayıp diz kapağına kadar çocuğumu taramışlar. Benim çocuğum 19 yaşında. Ben bir anneyim. Türkiye benim sesimi duysun. Biz burada ailece perişan olduk. Bu olayda her şeyin açığa çıkmasını istiyorum. Kızımı buradan sedyyle mi çıkaracağım yoksa ayakta mı çıkaracağım bilmiyorum" ifadelerini kullandı. | Haber içeriğine bakıldığında fotoğraf veya herhangi bir görsele yer verilmemiştir.   |
| 4 | Melike'yi öldüren sevgilisi intihar etti! Korkunç "baba" detayı   | Manisa'da tartıştığı sevgilisi Melike Akpınar'ı otomobilinde tabancayla başından vurarak öldüren Zübeyir Yıldız intihar etti. Melike'nin babası Necati Akpınar'ın ise 2'si nikahlı eşi 3 kadını öldürdüğü ve cezaevinde olduğu öğrenildi.  | Haberde bir tane fotoğraf kullanılmıştır. Zanlı ve maktule ait yüzleri açık görseller kullanılmıştır.  |
| 5 | Burcu'yu 17 Bıçak darbesiyle katletti   | Antalya Kepez'de halı pazarlamacılığı yapan Yılmaz Gündüz (37) ile 10 yıldır birlikte yaşadığı 3 çocuk annesi Burcu Gezersoy (26) arasında dün 00.30 sıralarında evde tartışma çıktı.  | Haberde iki fotoğraf kullanılmıştır. Girişinde zanlı ve maktule ait görseller yer almaktadır. Diğer fotoğrafta ise maktul annesinin olay yerinde ağladığı görüntüsü kullanılmıştır.                      |
| 6 | Sultanbeyli'de düğünde saplantılı aşık dehşeti! Kader hayatını kaybetti   | İstanbul Sultanbeyli'deki bir düğün salonunda, dün akşam iddiaya göre Ahmet Taşan, önce evlenmek istediği Kader İrgören'e ardından da kendine ateş etti. Genç kızın dayısının oğlu Ferhat İrgören, "Daha önce gideceğimiz nişan ikimize de mezar olacak gibisinden tehditvari bir konuşma olmuş ama kız bize söylememiş. Saplantılı bir tip haline gelmiş. Kız daha önce istemiyordu, belirtilmişti." dedi.                            | Haberde iki fotoğraf ve olay yerinden kişilere ait video kullanılmıştır. Maktul ve zanlı yüzü açık bir şekilde yer almıştır.   |
| 7 | Türkü evinde korkunç olay! İşletmeci kadını kablo ile boğarak öldürdü   | Giresun'da İsmail Yılmaz, türkü evinde tartıştığı işletme sahibi Şengül Yeşilkaya'yı (52) kablo ile boğarak öldürdü.   | Haberde üç tane fotoğraf kullanılmıştır. Girişte ve son kısımda maktul kadına ait yüzü acık ve net şekilde görseline yer verilmiştir. Üçüncü fotoğrafta ise olay yerine ilişkin fotoğraf kullanılmıştır. |

### Sözcü Gazetesi Başlıkla İlgili Bulgular

Sözcü gazetesinde yer alan haber başlıkları incelendiğinde olayın hangi araçla ve nasıl işlendiğine dair bilgiler veren terimler kullanılmıştır. Başlıklarda genel olarak yer ve zamana yer verilmeyerek okuyucu haberin içeriğine doğru çekilmeye çalışılmıştır. 1 no'lu "Türkü evi işleten kadını kabloyla boğarak öldürdü" başlığında olayın nasıl işlendiğine dair açık bilgi verilmesi toplumda olayı aynı yöntemle tekrarlanma olasılığını arttırmaktadır. 2 no'lu Dügünde dehşet 1 ölü 1 yaralı! Halay çeken eski sevgilisini vurdu... başlığına bakıldığında fail ile maktulün yakınlık derecesine yer verildiği görülmüştür. 3 no'lu Antalya'da kadın cinayeti: Üç çocuğunun annesi Burcu'yu 17 yerinden bıçakladı başlığında olayın nasıl gerçekleştiğine dair acık bilgiler bulunmaktadır. Ayrıca üç çocuğunun annesi ifadesiyle haber içeriğine çekilmiş ve bu kısımda özel hayatın gizliliği ihlal edilmiştir. 4 no'lu Kız arkadaşı Nazlı'yı Uzi ile vuran genç tutuklandı başlığında kullanılan aletin adı açıkça verilmiştir. 5 no'lu Doğum yapan eşini bıçaklayarak katletti başlığında fail ile maktulün yakınlık derecesine yer verilmiş ve katletti ifadesiyle kadın kurban olarak temsil edildiğini göstermektedir.

### Sözcü Gazetesi Haber Girişi İlgili Bulgular

Haber girişleri kısaca konu ve olay hakkında bilgi vermektedir. Sözcü gazetesinin haber girişlerine bakıldığında genel olarak olay yer ve zaman belirtilmiştir. Ancak olayın nasıl gerçekleştiğine dair detaylı bilgilere ve kullanılan aletlere yer verilmesi etik sorunlar oluşturmuştur. 1 no'lu haber girişinde Giresun'da İsmail Yılmaz, türkü evinde tartıştığı işletme sahibi Şengül Yeşilkaya'yı (52) kablo ile boğarak öldürdü ifadesiyle olay tekrarı ihtimali gerçekleşmiş ve etik sorun oluşturmuştur. 3 no'lu Antalya Kepez'de Yılmaz Gündüz, 10 yıldır beraber yaşadığı üç çocuğunun annesi Burcu Gezersoy'u 17 yerinden bıçaklayıp katletti haber girişinde maktule ait özel bilgilerin ifşa edilmesi etik bir sorun oluşturmaktadır. Çalışmanın yapıldığı toplum ahlakına uygun olmayan ifadelerin yer aldığı görülmüş ve bu ifadelerin okuyucular tarafından sebep olarak algılanabileceği haber yorumlarında görülmektedir. 5 no'lu "Mardin'de cuma günü doğum yapan ve bugün hastaneden taburcu olan Vatfa Ecevit (25), eşi Şiyar Ecevit (28) tarafından defalarca bıçaklanarak öldürüldü" haber girişinde olay aleti belirtilmiş ayrıca defalarca ifadesiyle olayın işleniş bakımından detaylı anlatımı yapıldığı görülmektedir. 2 no'lu Sultanbeyli'de iddiaya göre davetlisi olduğu düğüne gelen Ahmet Taşan, eski sevgilisi Kader T.'yi silahla vurduktan sonra kendi kafasına ateş etti." haber girişinde eski sevgilisi ifadesiyle yakınlık derecesine yer verilmiştir. Girişin sonunda zanlının kendisini öldürdüğü ve nasıl öldürdüğü bilgisi toplum tarafından özendirici ve taklit edilebilme olasılığı taşımaktadır.

### Sözcü Gazetesi Fotoğrafla İlgili Bulgular

Kadına yönelik şiddet haberlerinde fotoğraf kullanımı oldukça önemlidir. Kullanılan fotoğraflar haberlere gerçeklik algısı katmak için yer almaktadır. Ancak bu tür haberlerde etik kurallara uyulması hem olay mağdurları hem de toplum sağlığı için önemli bir etkidir. 1 no'lu haberde kullanılan fotoğraflar maktule aittir. Bu tür haberlerde zanlının fotoğraflarının koyulmaması 'korunuyor mu' tartışmasına yol açmaktadır. 2 no'lu haberde kullanılan fotoğraflar zanlı ve maktule ait samimi fotoğraflar bulunması etik ihlal oluşturmaktadır. 3 no'lu haberde tam altı tane fotoğrafa yer verilmiştir. Verilen tüm görsellerde kişilerin yüzleri açık ve net şekilde kullanılmıştır. 4 no'lu haberde öldürülen kadına ait fotoğraf ve işlenen cinayette kullanılan aletin net görüntüsüne yer verilmesi toplumu özendirir/etkileyecek bir duruma zemin hazırlamaktadır. 5 no'lu haberde üç fotoğraf kullanılmıştır. İki tanesi hastane aciline ait olup etik sorun oluşturmazken son fotoğraf maktulün özel ve net fotoğrafı kullanılması etik ihlale yol açmaktadır.

### Makro Yapıya Yönelik Şematik Analiz

#### Ana Olay ve Sunuş Biçimleri

Haberlerde ana olay toplum cinsiyet kalıpları içinde sunulan kadına şiddet olayları ve etik sorunlardır. Girişlerde ana tema çoğunlukla verilmiştir. Haberlerin giriş ve olay sunuş biçimleri çoğu haberde aynı tutumdadır. Genel olarak haber girişlerinde maktul ve zanlının yakınlarının belirtilmesi vb. gibi etik sorunlar bulunmaktadır.

#### Artalan ve Bağlam Bilgisi

Sözcü Gazetesi'nin konu ile ilgili haberlerin çoğunda artalan ve bağlam ilişkisine yer verilmemiştir. Olayların neden yaşandığına dair bilgiler eksik verilmiştir. Yalnızca Giresun'da İsmail Yılmaz, türkü evinde tartıştığı işletme sahibi Şengül Yeşilkaya'yı (52) kablo ile boğarak öldürdü" haberinde olayın neden gerçekleştiği bilgisi verilmiştir. 2,3,4,5,6 no lu haberlerde ise olayın hangi nedenle yaşandığı belirtilmemiştir.

#### Haber Kaynakları

Haberlerde kaynak olayın bireyleri ya da yakın çevreleridir. Muhabirler aldıkları duyumlar doğrultusunda olay yerlerine giderek bu kişilerden bilgi almaktadırlar. Cinayet ve şiddet haberleri polisiye vaka sayıldığı için, polis adliye muhabirleri kaynak olarak polis memurlarına gelen ihbarları değerlendirmektedirler.

**Tablo 2.** *Sözcü Gazetesinde 2024 Ocak ayında işlenen kadın cinayetleri ile ilgili çıkan haber başlıkları, haber girişleri ve fotoğraflar*

| NO | BAŞLIK  | HABER GİRİŞİ   | FOTOĞRAF   |
|----|---|--|--|
| 1  | Türkü evi işleten kadını kabloyla boğarak öldürdü                             | Giresun'da İsmail Yılmaz, türkü evinde tartıştığı işletme sahibi Şengül Yeşilkaya'yı (52) kablo ile boğarak öldürdü.   | Haberde toplam iki tane fotoğraf kullanılmıştır. İlki öldürülen kadının net fotoğrafı diğeri de olay yeri olan türkü evinden bir görsel yer almaktadır.                                      |
| 2  | Düğünde dehşet 1 ölü 1 yaralı! Halay çeken eski sevgilisini vurdu...          | Sultanbeyli'de iddiaya göre davetlisi olduğu düğüne gelen Ahmet Taşan, eski sevgilisi Kader T.'yi silahla vurduktan sonra kendi kafasına ateş etti.              | Haberde 3 fotoğraf ve 1 video kullanılmıştır. Fotoğraflarda zanlı ve maktulün yüzleri net bir şekilde verilmiştir. Video ve son fotoğraf ise olay yeri görüntülerinden oluşmaktadır.         |
| 3  | Antalya'da kadın cinayeti: Üç çocuğunun annesi Burcu'yu 17 yerinden bıçakladı | Antalya Kepez'de Yılmaz Gündüz, 10 yıldır beraber yaşadığı üç çocuğunun annesi Burcu Gezersoy'u 17 yerinden bıçaklayıp katletti.                                 | Haberde toplamda 6 fotoğraf kullanılmıştır. Girişte maktul ve zanlının yüzü net şekilde fotoğraflarına yer verilmiş, devamında ise maktulün annesinin olay yerinden iki görseli verilmiştir. |
| 4  | Kız arkadaşı Nazlı'yı Uzi ile vuran genç tutuklandı                           | Bayrampaşa'da, kız arkadaşı Nazlı Elmas'ı suikast silahı olarak bilinen Uzi ile 4 yerinden vuran Eliz Kurtuluş tutuklandı. Nazlı'nın annesi yaşananları anlattı. | Haberde maktule ait, yüzü net olarak 2 tane fotoğraf kullanılmıştır.   |
| 5  | Doğum yapan eşini bıçaklayarak katletti                                       | Mardin'de cuma günü doğum yapan ve bugün hastaneden taburcu olan Vafca Ecevit (25), eşi Şiyar Ecevit (28) tarafından defalarca bıçaklanarak öldürüldü.           | Haberde 2 tane hastane acil önünden görseller yer almaktadır. Son olarak öldürülen kadına ait fotoğraf net şekilde kullanılmıştır.   |
| 6  | Samsun'da kadın cinayeti: Evinin önünde öldürüldü                             | Samsun'da evinin önünde silahlı saldırıya uğrayan Muradiye Terzi, hayatını kaybetti.   | Haberde, öldürülen kadına ait yüzü net şekilde 2 görsele yer verilmiştir.  |

### Yeni Şafak Gazetesi Başlıkla İlgili Bulgular

Yeni Şafak Gazetesinin başlıklarına bakıldığında saplantılı aşık, sevgili, vahşice gibi kelimelere sık rastlanmıştır. Başlıklar okuyucuların ilgisini çekmek adına dikkat çekici olmaktadır ancak sansasyonel başlıklar yazılarak toplum infiale sürüklenmemelidir. 1 no'lu Saplantılı aşık önce halay çektikten sonra dehşet saçtı: Talihsiz genç kızın acı sonu başlığında 'aşık' ifadesiyle güzelleme yapılmaktadır. Talihsiz genç kızı tanımıyla olaya duygusallık ve öldürülen kadına kurban temsili yapıldığı görülmektedir. 2 no'lu Sevgilisini Uzi ile dört yerinden vurdu: Savunması pes dedirtti başlığında maktul ve zanlı arasındaki duygusal bağa ve yakınlık derecelerine yer verilmesi etik ihlal oluşturmaktadır. Başlığın devamında verilen savunması pes ettirdi ifadesiyle okuyucuda merak uyandırılmaya çalışılmıştır. 3 no'lu Hastanede doğum yaptıktan sonra geldiği evinde eşi tarafından vahşice öldürüldü başlığına bakıldığında yakınlık dereceleri yer almaktadır.

### Yeni Şafak Gazetesi Haber Girişi İlgili Bulgular

Haber girişleri özet olarak olayın ana konusunu vermektedir. Yeni şafak gazetesi haber girişlerinde çoğunlukla yer zaman ve olay hakkında ayrıntılı bilgi verilmektedir. 1 no'lu Sultanbeyli'de bir düğün salonunda sevdiği kız tarafından evlenme teklifi reddedilen bir kişi, yaşanan olayın ardından genç kızı silahla vurarak öldürdü. Ardından aynı kişi intihar teşebbüsünde bulunarak kendi kafasına ateş etti. Olay sonrasında şahıs hastaneye kaldırıldı ve tedavisi devam ediyor. Silahla vurulan ve yaşamını yitiren 19 yaşındaki Kader İrgören ise son yolculuğuna uğurlandı" haber girişinde olay kısaca anlatılmıştır. Reddedilme ifadesinin yer alması sebep olarak verilmiştir. Devamında olayın aracı ve nasıl gerçekleştiğinin verilmesi toplumda tekrarlanabilme olasılığını arttırmıştır. 2 no'lu Bayrampaşa'da 24 yaşındaki Nazlı Elmas, 25 yaşındaki erkek arkadaşı Eliz K. tarafından suikast silahı olarak bilinen Uzi ile 4 yerinden vuruldu. Nazlı Elmas ağır yaralanırken Eliz K'nın polise verdiği ifadede kendini 'şakalaşıyorduk' diyerek savundu' haber girişinde zanlının ifadesinin verilmesi haberin doğruluğu açısından sorun yaratmaktadır. Kadın öldüğü için zanlının ifadesinin doğruluğu sorgulanamamaktadır. 3 no'lu Mardin'de kan donduran bir cinayet gerçekleşti. 25 yaşındaki kadın, doğum yaptığı hastaneden taburcu olduktan sonra geldiği evinde eşi tarafından defalarca bıçaklandı. Cani koca olay yerine gelen polis ekipleri tarafından gözaltına alınırken, hastaneye kaldırılan kadın ise doktorların tüm müdahalelerine rağmen kurtarılamadı" haber girişinde birçok sansasyonel ifadeler görülmektedir. Kan donduran cinayet ifadesiyle okuyucuda merak uyandırılmaya çalışılmıştır. Olayda cinayetin bıçakla gerçekleştiği ve 'defalarca' ayrıntısıyla etik sorunlar ortaya çıkmıştır. Haberler toplumun doğru bilgi alması için önemli bir olgudur. Ancak haberlerde kullanılan ifadeler toplumu mental ve fiziki açıdan etkilemektedir.

### Yeni Şafak Gazetesi Fotoğrafla İlgili Bulgular

Haberlerde fotoğraf kullanımı olayın doğruluğu açısından önemli bir unsurdur. Gazeteciler haber yazımında olduğu gibi kullanılan fotoğraflarda da etik kurallara uyma mecburiyeti vardır. Ancak bazı kaygılar doğrultusunda bu etik kurallar yok sayılmaktadır. 1 no'lu haberde altı tane fotoğraf kullanılmıştır. Maktulün yüzü açık olarak verilirken zanlının yüzü flulaştırılmıştır. Haberin devamında kullanılan görseller ise olay yeri ve cenaze aracına aittir. 2'lu haberde 3 fotoğraf kullanılmış olup maktulün yüzü net zanlının ise flu olarak verilmiştir. Son fotoğrafta ise işlenen cinayette kullanılan silaha ait olması önemli bir etik ihlal oluşturmaktadır. 3 no'lu haberde toplamda iki fotoğraf kullanılmıştır. Bunlardan ilki maktule ait net bir fotoğraf olurken diğeri de hastane acilinin görüntüsü yer almaktadır.

### Makro Yapıya Yönelik Şematik Analiz

#### Ana Olay ve Sunuş Biçimleri

Yeni şafak gazetesinde olaylar genel olarak girişlerde detaylı olarak verilmektedir. Haberlerde ana olay toplum cinsiyet kalıpları içinde sunulan kadına şiddet olayları ve etik sorunlardır. Haberlerin giriş ve olay sunuş biçimleri çoğu haberde aynı tutumdadır. Genel olarak haber başlıklarında kullanılan ifadelerden dolayı toplumsal cinsiyet kalıpları ve etik sorunlar bulunmaktadır.

#### Artalan ve Bağlam Bilgisi

Yeni Şafak Gazetesi'nin konu ile ilgili haberlerin birinde artalan ve bağlam ilişkisine yer verilmiştir. Olayların neden yaşandığına dair bilgiler eksik verilmiştir. Yalnızca 1 no'lu Sultanbeyli'de bir düğün salonunda sevdiği kız tarafından evlenme teklifi reddedilen bir kişi, yaşanan olayın ardından genç kızı silahla vurarak öldürdü. Ardından aynı kişi intihar teşebbüsünde bulunarak kendi kafasına ateş etti. Olay sonrasında şahıs hastaneye kaldırıldı ve tedavisi devam ediyor. Silahla vurulan ve yaşamını yitiren 19 yaşındaki Kader İrgören ise son yolculuğuna uğurlandı" haberinde olayın hangi sebeple gerçekleştiği bilgisi verilmiştir. 2 ve 3 no'lu haberlerde ise olayın hangi nedenle yaşandığı belirtilmemiştir.

### Haber Kaynakları

Haberlerde kaynak olayın bireyleri ya da yakın çevreleridir. Muhabirler aldıkları ihbarlar doğrultusunda olay yerlerine giderek bu kişilerden bilgi almaktadırlar. Cinayet ve şiddet haberleri polise vaka sayıldığı için, polis adliye muhabirleri kaynak olarak polis memurlarına gelen ihbarları değerlendirmektedirler.

**Tablo 3.** Yeni Şafak Gazetesinde 2024 Ocak ayında işlenen kadın cinayetleri ile ilgili çıkan haber başlıkları, haber girişleri ve fotoğraflar

| NO | BAŞLIK  | HABER GİRİŞİ   | FOTOĞRAF   |
|----|---|--|--|
| 1  | Saplantılı aşık önce halay çekti sonra dehşet saçtı: Talihsiz genç kızın acı sonu | Sultanbeyli'de bir düğün salonunda sevdiği kız tarafından evlenme teklifi reddedilen bir kişi, yaşanan olayın ardından genç kızı silahla vurarak öldürdü. Ardından aynı kişi intihar teşebbüsünde bulunarak kendi kafasına ateş etti. Olay sonrasında şahıs hastaneye kaldırıldı ve tedavisi devam ediyor. Silahla vurulan ve yaşamını yitiren 19 yaşındaki Kader İrgören ise son yolculuğuna uğurlandı. | Haberde 6 fotoğraf kullanılmıştır. Bunlardan ikisi zanlıya ait fakat yüzü net değil diğeri maktule ait yüzü net şekilde yer almaktadır. Son üç görsel ise olay yeri ve cenaze aracına ait fotoğraflardan oluşmaktadır. |
| 2  | Sevgilisini Uzi ile dört yerinden vurdu: Savunması pes dedirtti                   | Bayrampaşa'da 24 yaşındaki Nazlı Elmas, 25 yaşındaki erkek arkadaşı Eliz K. tarafından suikast silahı olarak bilinen Uzi ile 4 yerinden vuruldu. Nazlı Elmas ağır yaralanırken Eliz K'nın polise verdiği ifade de kendini 'şakalaşıyorduk' diyerek savundu.  | Haberde 3 fotoğraf kullanılmıştır. Öldürülen kadının yüzü net şekilde verilmiş iken zanlının yüzü flulaştırılmıştır. Son görsel ise zanlının evinde, suç aletinin görüntüsü yer almaktadır.                            |
| 3  | Hastanede doğum yaptıktan sonra geldiği evinde eşi tarafından vahşice öldürüldü   | Mardin'de kan donduran bir cinayet gerçekleşti. 25 yaşındaki kadın, doğum yaptığı hastaneden taburcu olduktan sonra geldiği evinde eşi tarafından defalarca bıçaklandı. Cani koca olay yerine gelen polis ekipleri tarafından gözaltına alınırken, hastaneye kaldırılan kadın ise doktorların tüm müdahalelerine rağmen kurtarılamadı.   | Haberde 2 fotoğraf kullanılmıştır. İlki hastane acilinin önünden bir fotoğraf diğeri ise öldürülen kadına ait yüzü açık şekilde verilmiş fotoğraf yer almaktadır.  |

### Sonuç

Medya aracılığıyla iletilen mesajlar, alıcılar tarafından kabul görmekte ve etkili olmaktadır. Kadına yönelik şiddet ve nefret söylemi, medya dilinde kullanılan ifadelerle alıcıların bilinçaltına etki etmekte, algı ve ifade biçimlerini şekillendirmektedir. Haber metinlerinde bilinçli ya da bilinçsiz kullanılan kelimeler, haberin algılanışını ve yorumlanışını derinden etkileyen kodlar oluşturarak zihinlerde olumsuz ve şiddet içeren tutumları güçlendirebilmektedir. Egemen ataerkil söylemin medya diline yansımaları, toplumda nefret söylemi ve şiddet eylemlerinin teşvik edilmesine yol açabilir. Medya, iletileriyle toplumda kabul görmüş yargıları daha da pekiştirme rolünü üstlenmektedir.

Çalışmada kadın imgesinin sunumuna dair farklı ideolojik kimliğe sahip Hürriyet Sözcü ve Yeni Şafak gazetelerinin çevrimiçi versiyonlarında 01.01.2024-01.02.2024 tarihleri arasında doğrudan kadın cinayetleri olaylarına ilişkin 7 haber incelenmiştir. Yeni Şafak gazetesi söz konusu diğer gazetelere göre çalışmanın yapıldığı süre kapsamında daha az kadın cinayeti haberi yayınlamıştır. Yeni Şafak gazetesinde "cani koca, talihsiz kız ve acı son gibi olayı duygusallaştırmaya yönelik ifadeler bulunurken Sözcü ve Hürriyet gazetelerinde oldukça azdır. Söz konusu gazeteler incelendiğinde hepsinde toplumsal cinsiyet kalıpyargıları yer almaktadır. Gazetelerin fotoğraf kullanımı incelendiğinde sayı olarak eşit sayılabilmektedir. Fotoğraflarda ve haber başlıklarında görülen zanlı maktul ve yakınlarının yüzü açık kullanılması, suç aletinin net olarak fotoğrafının koyulması, maktul ve zanlı yakınlık derecesine yer verilmesi, özel hayatın gizliliğinin ihlal edilmesi gibi etik sorunlar incelenen gazetelerin

ortak etik sorunları olduğu çalışma sonucunda ortaya çıkarılmıştır. Haberlerin başlıklarında genel olarak yer ve zaman bilgilerine yer verilmeyerek enformasyon eksilimine gidildiği görülmektedir. Olayın öznesinin kadın olmasından kaynaklı olaydan bağımsız özel hayatına dair detayların aktarıldığı bağlamında cinsiyet baskısının medya tarafından üretildiği söylenebilir.

Kadına yönelik şiddet konusunda habercinin kendi uğraşının/işinin doğasını kavrayan böylesi bir farkındalık geliştirmesi, habercilik etiğinin yeni dayanağını sağlayacaktır. Yine de bu konuda bütünüyle iyimser olabilmek için, var olan habercilik dilini besleyen hem medyadaki hem de toplumsal alandaki cinsiyetçi söylemin ve ataerkil zihniyetten besleyen (hem de onu besleyen) anlam rejiminin bütünlüğünün de dönüşmesi gerekmektedir. Ataerkil anlam rejimi tarafından ne olduğu saptanan ve sınırlandırılan gerçek, kadının kendi gerçeği değildir. Kendi dünyasının gerçeğinin ne olduğunu ortaya koyabilmesi için ise, gazetecinin/ habercinin yardımına gereksinmektedir. Bu yardım, haber medyası sektöründe kadın gazetecilerin sayısının artması ve yönetici konumlarında ağırlıkla istihdam edilmelerinin yanı sıra, gazetecinin rutin haber yazımı ve habercilik uygulamalarının dışında bir yerde konumlanmasıyla olabilir (Akt: Çiler, 2010).

Bu durumda kadınların medya sektöründe sayıca artışı, ataerkil anlam rejimini otomatik olarak dönüştürmeye kuşkusuz yetmeyecektir. Bundan dolayı asıl yardım, kadın veya erkek gazetecinin/habercinin kadın aleyhine olan cinsiyetçi ataerkil söylemin unsurlarını habere katmamasıyla mümkün olabilir. Bu yöndeki söylemsel tercihleri konusunda, gazetecinin/habercinin çalıştığı kuruluşlarda ısrarlı olmasıyla mümkün olabilir. Ve gazeteci için asıl büyük meydan okuma da budur (Akt. Çiler, 2010).

## **UNDERSTANDING AND HELPING CHILDREN TO MANAGE THEIR ANGER DURING THE GRIEF PROCESS AFTER A NATURAL DISASTERS**

**Assoc. Prof. Dr. Münevver MERTOĞLU**

Istanbul Kultur University-Education Faculty,  
CEHAMER – Head of Research and Prevention of Violence in Schools  
m.mertoglu@iku.edu.tr

### **ABSTRACT**

The aim of this study is to understand the feeling of anger that occurs during the grief process of children exposed to natural disasters and to help them manage their anger. The feeling of anger experienced after a natural disaster is much higher and more complex than the feeling of anger experienced under normal conditions. Because uncontrollable anger behaviors lie upon pain, loneliness, sadness, anxiety, hopelessness, the needs for love and trust, and the inability to meet the most basic needs such as eating, drinking and shelter. This situation creates a serious sense of frustration, especially in adolescents and children. Children might harm both themselves and their environment with their uncontrolled anger behavior, Psychosomatic diseases may occur in children who suppress their anger. For these reasons, children and adolescents need to be understood and supported. If the feeling of anger experienced during the grief process after a natural disaster is too strong to be controlled, anger management training programs can be provided by people who are competent in their field such as empathy training, non-violent communication skills training, creative drama training.

**Keywords:** Anger, anger management, child, grief, natural disaster

### **INTRODUCTION**

A disaster is defined as "the consequences of natural, technological, or human-origin events that cause physical, economic, social, and environmental losses for people, affecting communities by interrupting or halting normal life and human activities, and which the affected community cannot overcome using its own means and resources" (Ergünay 2009). Events such as earthquakes, floods, hurricanes, volcanic eruptions, pandemics, etc., are considered as natural disasters.

On February 6, 2023, Turkey experienced two earthquakes with magnitudes of 7.8 and 7.5, nine hours apart, with epicentres in the Pazarcık and Ekinözü districts of Kahramanmaraş. As of April 14, 2023, records show that 50,500 people had died, and among 4,511,000 independent units in 1,250,000 buildings, 164,321 buildings and 520,000 independent units within these buildings were destroyed or severely damaged (<https://www.bbc.com/turkce/article>).

The human and economic losses from this earthquake are very high. The physical, psychological, and social impacts on the people living in the region continue. The destruction of homes and the inability to meet basic needs have affected everyone who was a victim of the earthquake. However, the levels of impact differ among infants, children, youth, adults, and the elderly. An important issue is also dealing with post-traumatic syndromes that can occur years after the earthquake.

### **Reactions of Individuals After Natural Disasters**

After natural disasters, there are severe housing problems, difficulties in obtaining clean water and food due to altered environmental conditions and disrupted infrastructure, and most importantly, the psychological and physical challenges resulting from the loss of parents and close relatives.

The reactions of individuals exposed to disasters vary depending on the magnitude of the disaster and individual differences. Kübler-Ross explains the grieving process after a disaster according to the "Five Stages of Grief Theory" (Ross 2010):

- Denial
- Anger
- Bargaining
- Depression
- Acceptance

In the "**Denial**" stage, disaster victims experience short-term psychological shock, which varies by age group. They try to escape the shock by denying what they have seen, as if it is happening to others, not to themselves. Accepting the events as unreal causes blunt emotions (Yıldız et al., 2023).

In the "**Anger**" stage, feelings of anger are accompanied by anxiety, blame, insecurity, loneliness, palpitations, and nausea. The significant issue is that these symptoms vary depending on the post-disaster processes (Karancı and Erdur 2012).

In the "**Bargaining**" stage, victims start to bargain with God, willing to give anything to get back what they lost. If this bargaining does not alleviate their pain, they may fall into depression.

In the "**Acceptance**" stage, resistance begins to diminish, and losses are slowly accepted. Future planning begins. However, transitioning to this stage after major disasters can take time. For children and adolescents, the process of "acceptance" and returning to normal life can be more challenging and traumatic than for adults. Children who need the attention and care of their parents need more understanding and support (Yıldız 2014).

### **Effects of Natural Disasters on Children and Adolescents**

Children who experience natural disasters face psychological, physical, and cognitive problems depending on the severity of the disaster. Somatic complaints can also be observed due to the impact of trauma (Hensley and Varela 2008). A study showed that disaster victims are at higher risk for psychological problems, musculoskeletal issues, and respiratory problems compared to healthy groups. Another study conducted by Felix et al. (2016) revealed that young disaster-affected children are more prone to "Post-Traumatic Stress Disorder," "Anxiety," and "Depression" than their peers (Felix et al., 2016). While some children appear unaffected after the earthquake, others may face more serious problems. Especially in the early days after the trauma, sadness and anger may intensify. However, those who seem fine post-disaster should not be assumed to be genuinely well. Individual personality traits, resilience to traumatic events, upbringing styles, and the extent of the damage they suffered differentiate post-disaster reactions (Sungur and Herbert 2011, Direk and Yüksel 2018, Oğlağlı 2018). It is crucial that psychiatric symptoms do not persist long after the trauma.

A review of the literature reveals that numerous studies have been conducted on the effects of natural disasters on children and adolescents (Karabulut & Bekler 2019, Hensley and Varela 2008). However, no specific study has been found on uncontrolled anger behaviors during the grieving process following natural disasters.

This study aims to understand the "anger" stage of the grieving process after disasters and to identify the support that can be provided for anger management.

### **What is Anger?**

Various definitions of anger have been made. Spielberger states that the feeling of anger is based on the individual's perception of their own desires, needs, and happiness being obstructed by others. Lulofs and Chann (2000) indicate that anger arises because of the disruption of the balance state within the individual. The presence of many different causes for uncontrolled anger behaviors necessitates a more comprehensive definition of anger. Therefore, anger can be explained as one of the basic emotions that arise when an individual perceives their plans, desires, and needs to be obstructed, facing injustice, unfairness, and a threat to their self-identity, which has social, psychological, neurological, hormonal, and environmental determinants (Mertoğlu 2021).

Hunger, thirst, lack of sleep, poverty, unmet needs for love and security create a feeling of frustration in individuals. The intensity of frustration determines the severity of uncontrolled anger and aggressive behaviors. However, not every frustration results in violence and aggression. Nevertheless, responses given by individuals in situations of perceived injustice, unfairness, and threats to their self-identity are similar across almost all cultures.

### **Understanding Children's Anger During the Grieving Process After a Natural Disaster**

The conditions that arise after major natural disasters, such as the earthquake in Turkey on February 6, 2023, which resulted in the death of 50,500 people and the destruction of 164,321 buildings, are very dire for adults and children affected by the disaster. Especially the trauma experienced by children who have lost their parents and entire families requires urgent assistance. Uncontrolled anger behaviours in adolescents during the "anger" phase of the grieving process following a natural disaster complicate the lives of both the adolescents and their family members who must care for them. The anger experienced during this process should not be confused with the anger and aggressive behaviours children and adolescents normally exhibit.

Thomas Gordon states that the underlying causes of uncontrolled anger behaviors are lovelessness, loneliness, pain, anxiety, insecurity, and sadness (Thomas 2001). Children who have lost their families in an earthquake intensely experience these feelings. Besides psychological reasons, the inability to meet basic needs such as food, drink, clothing, and shelter, extreme cold or heat, and disease due to unhygienic environments create a severe sense of frustration in everyone who is a victim of the earthquake. Feeling frustrated can lead to uncontrolled anger behaviors even in non-disaster environments. For example, research shows that even inadequate nutrition, particularly deficiencies in omega-3 and other fatty acids, amino acids, vitamins, and minerals, can lead to aggressive behaviors (Mertoğlu 2021).

The fact that lithium deficiency resulting from inadequate nutrition triggers self-harm and aggressive behaviors is also important information. The inability to meet many basic needs, such as shelter and nutrition, creates a high level of frustration. Therefore, the intense experience of anger after a disaster is inevitable. Some children may exhibit aggressive behaviors due to the intense anger they experience during this period, which can even lead to criminal aggression. Others may suppress their anger, leading to psychosomatic illnesses that harm the individual.

Similarly, economic losses experienced after natural disasters can also increase feelings of anger. Research shows that in adolescent groups with a high perception of poverty, suppressed anger behaviors lead to depression and a decrease in the expression of anger. There is a significant relationship between poverty and anger. In poor groups, the suppression of anger and the experience of depression are additional findings of the research.

One significant study supporting the relationship between poverty and anger is conducted by the Prime Ministry Family Research Institute, which found that unemployed and poor individuals scored the highest on violence scales compared to other groups (Prime Ministry Family Research Institute, 1998; Thomas, 2001; Bridewell & Chang, 1997). However, it is quite challenging to assert that every child in poverty will exhibit aggressive behaviors due to uncontrolled anger outside of natural disaster contexts. In a study conducted with 1185 first-year high school students aged 14-19, it was found that those who perceived their families as poor were statistically significantly more depressive and had a lower tendency to experience anger, with a higher propensity to suppress their anger (Özmen, 2017).

### **Helping Children Manage Their Anger During the Grieving Process**

In the initial period after a natural disaster, providing necessary medical assistance to children is crucial. Measures should be taken to ensure they do not see the injured or deceased, and efforts should be made to keep the affected children with their families and close relatives. Because the primary need of children after a disaster is to feel safe with their families and close ones. Subsequently, providing information about the natural disaster and helping them make sense of their experiences can aid in the acceptance of the event during the "denial" phase.

Children should not be forced to talk about the disaster; if they wish to talk, they should be listened to and understood. Providing psycho-social support to children and their close ones in the early period is essential. It is expected that affected individuals will recover within a month. Those in risk groups should be monitored more frequently. Information on self-care, nutrition, and sleep, as well as meeting basic needs, is necessary (Sönmez 2022). Helping children manage their anger during the "anger" phase, which begins after the denial phase in major disasters, is much more challenging and complex than under normal conditions. Many factors negatively affect children after a disaster, including the loss of close ones, the absence of a loving and secure environment, the inability to meet basic needs, sadness, pain, and helplessness. Especially, making children feel important and worthy of love boosts their self-confidence. Therefore, individuals providing support to children, or their close ones should be experts in their fields.

It is crucial not to punish children exhibiting uncontrolled anger behaviors during the grieving process following an earthquake. Studies indicate that children who are severely punished for their angry and aggressive behaviors tend to continue these negative behaviors more frequently (Michaud, 1991). Instead, it is important to allow the child to express themselves and to help them display assertive behaviors rather than aggressive ones. Assertive individuals can express their emotions and needs without attacking or hurting others when they feel frustrated. Focusing on the positive behaviors of angry children is highly effective in reducing anger behaviors (Cummings, Vogel, Cummings, & El-Sheikh, 1989). During this process, re-establishing an environment of love and security to alleviate the children's concerns about their surroundings and future can be an effective solution for anger management.

The unhappiness and hopelessness experienced after a disaster can trigger anger behaviors. Csikszentmihalyi (2017) states that many of life's efforts are related to people being happy and prosperous and that true happiness emerges when we begin to take personal responsibility for enjoying the experiences we maintain. Thus, it is crucial for those responsible for the care and education of children to take significant measures to ensure that children can look to the future with hope and excitement, despite their substantial losses.

The support provided to children and adolescents who suppress their anger differs from that given to those who exhibit aggressive behaviors that could be considered criminal (Harriet & Lerner, 1996). It is essential not to blame, preach, command, or belittle angry children. Instead, efforts should be made to understand them. Also suggests that caregivers should lower their voice tone, avoid taking things personally, and encourage children to focus on their breathing.

Empathizing with children, possessing effective communication skills, and encouraging participation in social, cultural, and sports activities can be effective in anger management. A study comparing the anger control levels of individuals who engage in sports with those who do not found that non-athletic participants had higher "trait anger" and "anger-out" scores, while athletic participants had higher "anger control" scores (Üzüm, Orhan, Duş, Yerlikaya, Gökgöz, 2016). Some anger issues can be resolved without prolonged education and therapy support. However, for anger issues arising during the grieving process following a natural disaster, therapy and even medication support may be necessary in addition to different educational programs. In such cases, alongside professional support, individuals responsible for the care and education of children should be trained on how to properly interact with and support the children.

### Anger Management Training Programs

If the anger experienced during the grieving process after a natural disaster is too intense to be controlled, anger management training programs, empathy training, non-violent communication skills training, and creative drama training can be provided by qualified professionals. Research indicates that highly angry individuals can control their anger within 8-10 weeks, depending on the severity of their anger and the programs used (Kukuoğlu, 2018). Additionally, if necessary, individual or group psychotherapy and psychiatric support can be utilized. Promoting psychological resilience, defined as the ability to survive despite the intense burden of stressful life events such as trauma, loss, and death, can be an important solution (Bugay & Kararmak, 2014).

### CONCLUSION

In the grieving process, particularly after major disasters, everyone affected by the disaster experiences distress. However, the impact on children and adolescents can be significantly more intense and traumatic. Generally, the grieving process after a disaster includes phases of "denial," "anger," "bargaining," "depression," and "acceptance." The manner in which these phases are experienced varies depending on the level of impact from the disaster, and the individuals' upbringing, characteristics, age, and socio-economic status. During the anger phase of the grieving process, it is crucial to understand and support children who have difficulties with anger management, exhibit aggressive behaviors, or suppress their anger and harm themselves. The post-disaster environment and experienced losses trigger feelings of anger.

Managing anger during the grieving process is more challenging and complex for children and adolescents compared to usual circumstances. Therefore, professional support might be necessary. The hardships and losses experienced in major disasters make it difficult for children to receive help. Hence, there is a need for structured support organized by central authorities. Additionally, individuals responsible for the care and education of children and adolescents may require support. Social, cultural, and sports activities can be beneficial. If a pathological grieving process is present, combining anger management training programs with psychotherapy and psychiatric support can be effective in managing uncontrolled anger behaviors.

## **UNDERSTANDING HOW TEACHERS MANAGE STRESS AND COPING STRATEGIES AT THE SCHOOL OF FOREIGN LANGUAGES, CYPRUS INTERNATIONAL UNIVERSITY**

**Bahaa ARAMEEN**  
Bahaaar221114@gmail.com

### **ABSTRACT**

This study investigates the factors contributing to stress and the coping strategies employed by teachers at the School of Foreign Languages at Cyprus International University (CIU). Eight teachers from CIU's School of Foreign Languages were interviewed. The data were obtained through qualitative research, and the thematic analysis method was used to analyze the teachers' responses. The findings revealed that key stressors, such as complex student needs and backgrounds, were the most frequently mentioned issues. Other stressors included long working hours and limited time between classes. To manage stress, teachers used strategies such as organization and planning, social support from colleagues, creating strong relationships with students, and focusing on mindfulness and work-life balance. The study highlights the importance of enhancing teacher well-being in order to establish a positive learning environment.

**Keywords:** Teacher stress, stressors, coping strategies, Social support, Complex student needs

### **INTRODUCTION**

Stress is an unavoidable component of modern life, affecting people of all backgrounds and occupations. Within the educational setting, teaching is a rewarding profession but can also be stressful. During teaching, teachers deal with students from different cultural backgrounds, and they have to meet their students' needs. Such a job leads to significant levels of stress among teachers. Over the previous decade, teachers have experienced significantly higher occupational stress and burnout rates compared to other professions (Aloe et al., 2014; Betoret, 2009). Teachers are more receptive to stress since interacting with students and ensuring their good performance throughout the day is a demanding scenario. Teachers must perform several roles for their students, including administrator, role model, friend, philosopher, and guide, which adds to their stress (Ahmad, 2017). According to research, teachers face a variety of stressors. Major among these are: workload pressures and excessive non-teaching responsibilities, low socioeconomic status, teaching unmotivated students, experiencing difficult interactions with administrators and colleagues, and working under bad conditions (Troman, 2000; Kyriacou, 2001; Prilleltensky et al., 2016; Maphalala, 2014; Dhaneesh & Iswarya, 2023).

#### **Stress**

The World Health Organization (WHO) defines stress "as a state of worry or mental tension caused by a difficult situation. Stress is a natural human response that prompts us to address challenges and threats in our lives. Everyone experiences stress to some degree. The way we respond to stress, however, makes a big difference to our overall well-being".

Stress is triggered when an individual perceives a situation as exceeding their ability to cope with it. Stress can cause emotional, cognitive, physical, and behavioral changes. Stress can be categorized by timeline (acute, daily, life events, or chronic stressors). Acute stress is heightened when an incident is perceived as unmanageable, unpredictable, and novel. Daily issues are minor but occur frequently. Daily issues can become chronic stressors if the threat is significant and frequent enough. Life events are defined as time-limited incidents with a specific onset, such as a breakup, vehicle accident, or medical diagnosis. Life events can have long-lasting impacts and become chronic stressors if not addressed. Long-lasting stressors can last weeks or months, such as financial instability, neighborhood safety worries, or chronic disease (Knapp & Sweeny, 2022; Brown & Harris, 2012; Epel et al., 2018). Stress and burnout among teachers can have a negative influence on physical health and may decrease the commitment of teachers and effectiveness to the point where they require professional support.

#### **Coping and Coping Strategies**

Coping is whatever humans do to regulate, tolerate, or reduce the impacts of life's stressors, such as perceived dangers, current challenges, or emotional losses (Lazarus, 2000). Thus, coping is a process-oriented, non-automated adaptive behavior that involves managing stressors (Backer, 2000). Coping strategies refer to methods, techniques, or approaches people use to keep their control or manage difficult situations at work or in other contexts. In order to deal with stress and stressful situations, teachers use coping strategies, such as cognitive, emotional, and behavioral strategies, to deal with stressful circumstances and reduce emotions of distress (Admiraal et al., 2000; Kyriacou,

2001; Alhija, 2015; Knapp & Sweeny, 2022). Generally, coping means maintaining or adjusting to negative events or situations while keeping emotional equilibrium and a positive self-perception. Coping occurs in response to potentially difficult life transitions. Therefore, coping refers to adjusting to unexpected difficulties or obligations, requiring more work and energy compared to routine daily duties (Minz & Panda, 2023). Teachers employ coping strategies such as asking for advice, acting to make things better, and accepting reality (Poudel & Wagle, 2022; Nomtshongwana, 2023). Furthermore, it has been demonstrated that secondary student teachers can effectively manage their stress by using constructive coping mechanisms including spending time with their families (Dotimas, 2022).

### **The Present Study**

This study focuses on how teachers at Cyprus International University's School of Foreign Languages handle stress and cope with job requirements. One purpose is to examine how the teachers handle the diverse pressures they encounter within their language-teaching context. Another objective is to investigate what strategies teachers employ to maintain control or deal with stressful circumstances at work. More specifically, this study aims to shed light on the following research questions:

1. What are the major challenges or stressors that contribute to stress for teachers at the School of Foreign Languages, Cyprus International University?
2. What coping strategies do teachers at the School of Foreign Languages employ to manage stress and overcome difficulties in their professional roles?

### **METHODOLOGY**

This research uses a qualitative analysis methodology to examine the perspectives of CIU School of Foreign Languages teachers regarding how they manage stress, the challenges they face, and the coping strategies they employ to reduce stress. The study involved in-depth interviews with eight teachers at CIU School of Foreign Languages in Northern Cyprus. The sample includes male and female teachers. The teachers' qualifications range from bachelors, masters, and PhDs.

### **Data Collection**

The data were collected through answering the research questions. The interviews were semi-structured, and the participants were able to openly discuss their opinions and experiences. The interviews with CIU School of Foreign Languages teachers were conducted at the CIU School of Foreign Languages during work hours. The duration of each teacher's individual interview was about forty minutes. The researcher asked specific questions to the teachers and immediately wrote down their answers.

### **Data Analysis**

This study used qualitative data analysis, which may include written records, YouTube comments, Twitter (X) tweets, classroom videos, focus group transcripts, or in-person interviews (Kaiser & Presmeg, 2019). In this study, data were obtained through face-to-face interviews and, then analyzed using thematic analysis. Thematic analysis is a qualitative method for evaluating data by identifying and reporting common themes across a collection (Braun & Clarke, 2006). Thematic analysis revealed common themes and subthemes related to teachers' perspectives on stress and coping strategies. To ensure anonymity for participants, their names were not revealed.

### **CIU School of Foreign Languages Background**

Cyprus International University (CIU) established its School of Foreign Languages (SFL) in 1997. This school serves students from various regions and nationalities, including Turkey, Iran, Tajikistan, Afghanistan, Pakistan, Arab countries, and African countries. The School of Foreign Languages enrolls approximately 500 students annually, indicating a multicultural and international environment at CIU. The SFL employs around 40 teachers, both male and female, with qualifications ranging from Bachelor's (BA), Master's (MA), and Doctorate (PhD). The SFL facility provides over 20 classrooms, each with a smart board connected to the internet. Teachers use these boards to teach from virtual textbooks, browse the internet, make presentations, and play movies.

The SFL aims to prepare students for several English departments at CIU. At the beginning of each semester, students take a proficiency exam to determine their level. The SFL offers many levels, from beginner to advanced. These courses aim to enhance students' English language proficiency for academic and professional settings. The SFL carefully plans target language instruction and aligns course levels to the Common European Framework of Reference (CEFR). Pearson Assured have accredited the English Preparatory School since January 2015.

## **FINDINGS**

Based on the data collected from the interview questions, two themes emerged from the participants' responses. These themes are discussed in this section.

### **Theme One: Factors that cause Teacher Stress**

#### **A- Complex Student Needs and the Demands of Teaching**

All the participants said that dealing with students causes stress in different ways. These include several aspects:

##### **1- Students' level and proficiency levels:**

According to the participants, teaching weak level of students is so stressful, one teacher said, "I think lower levels are more stressful to teach, as they still do not get used to applying English in their environment." "I remember the time that I had beginner classes, and I really was overwhelmed because no one could understand any English word. I had to pantomime everything! It was so stressful!" noted a veteran teacher.

In addition, the teachers mentioned that managing different group of students with different learning styles and personalities is challenging because students do not learn at the same speed. "The students with higher levels can be more under control by speaking with them rather than lower ones," shared another teacher. Another remarked, "Because of the weak level of the students, I have to explain the instructions in detail."

##### **2- The challenges of teaching in a multilingual classroom**

According to the participants, teaching in a multilingual classroom with different students from different cultural background and mother tongues is so stressful. The main problem is students tend to become friends with the students who speak their first language and they avoid communicating with other international students who do not speak their languages. One teacher said, "In my classes, sometimes, I hear five or more different languages; none of these languages is English! Arab students go together, African students together, Iranian, Turkish, etc. This is really makes me feel stressed!" Another remarked, "The same nationality students in the classes tend to speak in their mother tongue assuming the others will understand it. This becomes a difficulty for the teacher as we try to make them speak English as much as possible. "

##### **3- Learners' Lack of Motivation**

All eight teachers mentioned the lack of student motivation as a significant stressor. One teacher elaborated, "Some students are shy or introverted, making participation difficult." Another teacher highlighted the issue of dealing with unmotivated students, saying, "Some of my students see the class as an exam or a way to pass the level. I try to motivate them to love English, and I ask them to talk with students from other nationalities.

##### **4- Unexpected questions from students:**

While unexpected questions can be a sign of active learning and student curiosity, three teachers mentioned they can also add pressure. One teacher explained, "Some students ask questions at the last minute of the class, and this can be stressful!"

#### **B- Long Working Hours**

Long working hours emerged as a significant stressor for many teachers. One teacher, describing the relentless workload, saying, "One of my personal worries is having balance between work and personal life. As a teacher, I spend most of my time at university so I don't have time to learn another language or going to the gym".

#### **C - The limited time of the lesson**

This sub-theme was evident in the transcripts of the participants; they mentioned the difficulty of finishing the tasks sometimes on time. Teachers struggle to fit everything they want to cover within the allotted time. A teacher expressed this sentiment, saying, "I believe that the biggest challenge or stressor is being able to deliver the lesson and finish everything on time". Another said, "By the time I finish explaining a concept, there are barely any minutes left for student practice or questions."

#### **D - The short time of the breaks between the classes.**

Indeed, almost unanimously all participants said the break time between classes is too short. It is clear that many teachers struggle with the short breaks they get between classes. "There just isn't enough time to grab a coffee and breathe!" remarked one participant.

**E- Midterms**

Many teachers highlighted the extra stress they experience during midterms. This period usually comes by a major increase in work, as teachers are under pressure to prepare for exams while also grading a high number of student work. One teacher described the challenge, saying, "Midterms are particularly overwhelming. Checking, grading, and entering grades to the system is really stressful!"

**F- Other Frequently Mentioned Stressors****1- Grammar lessons:**

Three out of the eight teachers specifically mentioned grammar lessons as a source of stress. One teacher confided, "When students are about to learn grammar, they feel a bit more stressed compared to other activities like speaking and writing. I also feel stressed, whether they have learned or not". "Grammar lessons are particularly tough because students find them boring, so I have to use many methods to explain grammar rules for them," shared another teacher.

**2- Early Morning Classes:**

Early morning classes seem to be a challenge for some teachers. Not all teachers are morning people! Three out of the eight interviewed mentioned early morning classes as a particular stressor. As one teacher put it, "Because I can't get enough sleep, waking up early can be stressful to me."

**3- Slowness of Smart Boards**

While controlling student conduct and designing engaging lessons are huge responsibilities, technology may cause stress. Three out of the eight teachers interviewed mentioned the issue of dealing with slow Smart Boards. "The smart board sometimes freezes and does not work; this makes me feel stressed," noted one teacher.

**G- Occasionally Mentioned Stressors****Observations:**

While the pressure to be observed was not a common issue for most teachers, it is important to note because of the impact it can have. One teacher mentioned the stress of being formally observed and evaluated, saying, "Regular classroom observations during each term can be stressful."

**Theme Two: Effective Coping Strategies for Teacher Stress Management**

Another central theme was the approaches for coping with work demands and reducing stress. Based on the findings, the following sub-themes emerged:

**1. Organizing and Planning**

The most frequently mentioned coping strategy by the teachers was the practice of organizing and planning their work using to-do lists. Six teachers said that they write plans and follow them to manage their workload and reduce stress. One teacher mentioned, "Prioritizing tasks is one of my strategies to reduce stress." Another teacher remarked, "Having a to-do list keeps me organized, and I try to tick off each activity that I complete every day."

**2. Socializing with Colleagues**

The second most common strategy, highlighted by four teachers, was to take coffee breaks and engage in small talk with colleagues. "Having Coffee breaks and friendly conversations with the other teachers lets me know that I am not in this alone," One teacher said." If I feel stressed in my daily work routine, I try to drink a cup of coffee before the class begins," As another teacher noted.

**3. Finding Motivation in Student Progress**

Focusing on the positive results of their efforts helps teachers to find meaning and satisfaction in their job. Celebrating the achievements of students and observing their growth may be a tremendous motivation, making the difficulties of teaching easier. Four teachers mentioned being motivated by watching student improvement and successes." When I see my students learning from me and trying their best to speak English, it makes me happy and reduces my stress," mentioned one teacher. This intrinsic motivation, driven by student development, was a common theme among the teachers interviewed.

**4. Building Friendly Relationships with Students**

Four teachers mentioned the importance of building positive relationships with their students. Creating an entertaining and positive classroom atmosphere reduces stress levels for both students and teachers. "Every time I

see my students happy in the classroom, it makes my day perfect," shared one teacher. Such a positive environment is perfect for encouraging communication, teamwork, and better-learning experiences and makes learning fun! In addition, encouraging and being respectful of all students allows them to be more active in lessons.

### 5. Taking Short Breaks and Deep Breaths

Three teachers highlighted the importance of taking short breaks and engaging in deep breathing exercises as a quick and efficient stress-management strategy. One teacher said, "I always prefer to take a deep breath and stay calm; this can reset my mindset and reduce my stress levels." These breaks enable teachers to get away from the immediate stressors and refresh their mental state, which helps to prevent burnout. Furthermore, short breaks might assist teachers stay focused throughout the day.

### 6. Engaging in Leisure Activities

Two teachers mentioned engaging in leisure activities, such as playing games on their phones or laptops, in order to relax and distract themselves from work-related stresses. These activities offer a mental break and a fun way to recharge, which can be refreshing and help teachers retain a positive mindset. "A great way to unwind from the classes is playing games on my computer; this helps me switch off from the classroom environment," said one teacher.

The range of coping strategies presented by these teachers demonstrates the significance of adapting stress management techniques to individual needs and preferences. By adopting these different strategies, teachers can create a more balanced and enjoyable work experience.

## SUMMARY AND DISCUSSION

This study aims to address:

1. The major challenges or stressors that contribute to stress for teachers at the School of Foreign Languages, Cyprus International University.
2. The coping strategies the teachers use to deal with these stressors.

Based on the data collected from the interview questions, this study has revealed that the most mentioned challenges and stressors by the teachers include:

1- **Student dynamics and demands:** This includes students' varying proficiency levels, the challenges of teaching in a multilingual classroom, students' lack of motivation, preparing for midterms, and handling unexpected student questions.

2- **Long working hours.**

3 - **Limited time of lessons and short breaks between classes.**

4- **Other frequently mentioned stressors,** such as early morning classes, the slowness of smart boards, and various observations.

The reason for this could be that the process of teaching and dealing with students and their different needs indeed causes stress in different ways. Each student brings their own set of skills, limitations, languages, cultural background, learning styles, and personalities to the classroom, which requires teachers to modify their teaching methods and approaches constantly.

This could be linked to existing research on teacher stress, such as the findings of Bottiani et al., (2019), which confirm that student disruptive behavior and high job demands are major stressors for urban middle school teachers. The stress associated with managing students of diverse competence levels is consistent with both findings, since both involve high job demands and require significant effort to maintain classroom control and encourage learning.

Additionally, this result is consistent with the work of Skaalvik (2017), who identified time constraint as a significant predictor of emotional fatigue in teachers, and low student motivation as a key stressor, particularly at higher-grade levels. The need for teachers to spend additional time and effort to teach lower-level students, while also managing various learning styles, can add to the time pressure they face, creating emotional fatigue. Furthermore, low learners' proficiency can be seen as a lack of student motivation, which increases teacher stress.

The highest level of stress reported by Tungdamnarnsawad (2019) was about the amount of workload appropriate for teaching, research, academic services, and cultural preservation, while the highest level of abilities in work performance of teachers was about facilitating student-centered learning. Vorlíček et al., (2022) found that the primary stressors perceived by teachers were problematic relationships with students and parents, student lack of motivation, student inappropriate behaviors, non-functioning policies, administrative overload, and underappreciation of education. Similarly, Axup & Gersch (2008) reported students' negative behavior as the most stressful for teachers.

Present study reveals long working hours as another frequently mentioned stressor by the teachers. Of course, long working hours, extended periods of sitting, paperwork, and managing work demands are major reasons for stress in any job. The research results were consistent with the study of Tungdamnarnsawad (2019), which asserts that long work hours outside the classroom, dealing with the students, and complying with university administration and standard criteria for education can create stress, mental, emotional, and physical anxiety. Research frequently indicates a substantial relationship between long working hours and stress (Sato et al., 2009; Despréaux et al., 2017; Goh et al., 2015; Tamunomiebi, 2021). Long working hours are linked to an increased risk of stroke, heart disease, and diabetes, highlighting the serious health consequences of this stress (Despréaux et al., 2017; Goh et al., 2015). Therefore, organizations must recognize and manage these stressors at work to limit their effect on employee performance and well-being. (Tamunomiebi, 2021). Additional stressors mentioned by the teachers included limited lesson time, short breaks between classes, the pressure of midterms, and some other frequently mentioned factors such as difficulties with grammar lessons, the slowness of smart boards, and early morning classes.

To summarize, teacher stress caused by student dynamics and demands, particularly varied competency levels and learning styles, as well as the long working hours, is a serious concern. This is supported by broader studies that show comparable stresses in many educational environments, indicating an ongoing issue in the teaching profession. These stressors represent the wide range of factors that contribute to the total stress experienced by teachers in the School of Foreign Languages at Cyprus International University.

To address how teachers at the School of Foreign Languages at Cyprus International University deal with stressors, the teachers reported using a variety of effective coping strategies, including:

### **1. Organizing and Planning**

Teachers reported that creating lesson plans, timetables, and to-do lists helped them feel more in control of their workload and reduced feelings of overwhelm. Creating plans to manage stress levels and complete tasks is the most frequently used method by teachers at the School of Foreign Languages to reduce stress. This is supported by Austin et al. (2005) and Kepalaite (2013), who found that planful problem-solving was one of the most commonly used coping strategies by teachers in their studies. Moreover, planful problem-solving is a coping technique frequently integrated into learning.

### **2. Socializing with Colleagues**

Social support from colleagues gives emotional recognition, problem-solving ideas, and a sense of belonging. The interviewed teachers said that talking with colleagues helps them reduce stress by sharing experiences and receiving emotional support. This strategy provides an opportunity to share experiences, seek advice, and simply relax away from the stresses of teaching, as highlighted in Jain (2021). Subair et al. (2021) also found that teachers found talking with colleagues helped them manage stress. They further explain that having a nice, approachable, trustworthy, cooperative, and warm social network can help reduce stress. Overall, social support from colleagues has an important role in preserving CIU SFL teachers from the challenges of their jobs.

### **3. Intrinsic Motivation and Positive Relationships with Students**

Finding motivation in student progress and building friendly relationships with students emerged as interrelated coping mechanisms. CIU SFL teachers emphasized that these interactions foster a positive atmosphere for learning while reducing stress for both teachers and students. This aligns with Li et al. (2022), who assert that positive teacher-student relationships lead to higher-quality teaching. Moreover, positive teacher-student interactions facilitate increased monitoring, scaffolding, and constructive feedback for students (Reddy & Dudek, 2014; van de Pol et al., 2010).

### **4. Mindfulness and Work-Life Balance:**

The study at CIU SFL identified two strategies that highlight the importance of mindfulness and work-life balance for teachers' well-being:

- **Taking Short Breaks and Deep Breaths:** This technique shows the use of mindfulness practices in the moment. Deep breathing exercises can help teachers manage stress by increasing relaxation and emotional control. These short breaks provide mental relief from current stresses, allowing teachers to regain their focus and may prevent burnout.

- **Engaging in Leisure Activities:** The study also found that some teachers value work-life balance as a coping mechanism. Two teachers described doing leisure activities outside of work, such as playing games on their phones or laptops, to relieve stress and remove themselves from work. This is consistent with Clipa's (2017) findings that positive strategies for coping, such as engaging in fun activities, are the most frequently used. These activities provide a mental break and a way of relaxation that can be refreshing and contribute to a happy mood.

The variety of coping strategies given by these teachers highlights the importance of focusing on stress management techniques to each individual's demands and preferences. By applying strategies, teachers can create a more balanced and happy work environment.

## CONCLUSION

This study investigated the factors that contribute to teacher stress and discussed some of the coping strategies that used by teachers at the School of Foreign Languages, Cyprus International University. The study showed that teachers deal with major stressors such as managing students with different learning styles and competency levels, long working hours, and limited time between classes. To manage this stress, teachers utilized some strategies like organization and planning, social support from colleagues, developing positive relationships with students, and focusing on mindfulness and work-life balance. These findings highlight the importance of increasing teachers' well-being in order to create a good positive learning environment for students. Furthermore, these strategies not only decrease stress, but they also increase job satisfaction and productivity. Future research could investigate the long-term consequences of such strategies and other elements that add to teacher stress in a variety of educational settings.

# UYUM SINIFLARININ HEDEFİNE ULAŞMA DURUMUNUN İNCELENMESİ

**Nermin KARABACAK**

Recep Tayyip Erdoğan Üniversitesi, Eğitim Fakültesi, Türkiye  
nermin.karabacak@erdogan.edu.tr

## ÖZET

Milli Eğitim Bakanlığı tarafından 2019-2020 eğitim yılında Türkçe bilmeyen ya da Türkçe dil beceri düzeylerini geliştirmeye ihtiyacı olan yabancı uyruklu tüm öğrencilere eğitim fırsatı sunmak, eğitim sonunda bu öğrencileri yaşlarına uygun sınıf seviyelerindeki akademik eğitime hazır hale getirmek amacıyla uyum sınıfı uygulamasını başlatmıştır. Her sınıf seviyesinden en az 10, en çok 30 öğrencinin olması sınıfın açılmasının zorunlu koşuludur. İlgili okulda yeterli sayıda öğrenci bulunamazsa öğrenciler başka bir okula uyum sınıfı için yönlendirilebilir veya ilköğretim, ortaokul ve ortaöğretimde ayrı ayrı olmak üzere birleştirilmiş sınıflarda eğitim görebilirler. Öğrenciler bu sınıfta en fazla iki dönem bulunabilirler. Uyum sınıflarındaki birinci dönemde başarılı olan öğrenciler yaşlarına uygun sınıf seviyelerine yerleştirilir. Bir dönem içerisinde başarılı olmamaları durumunda ikinci dönemi de uyum sınıflarında geçirerek dönem sonunda ikinci kez girdikleri TYS'den 60 ve üzeri puan alan öğrenciler yaşlarına uygun sınıf seviyelerine yerleştirilirler. Sosyal politika alanı içinde Uyum Sınıfı Programı'nın göçmen çocukların okullaşmaları üzerindeki etkisini anlamaya yönelik bir çalışma ile karşılaşılmıştır. Okul terk, yoksul çocukların okullaşması, göç, göçmen çocuklar ve eğitim güncel sosyal politika konuları olmasına rağmen alanyazında bu konu kapsamında sınırlılıklar bulunmaktadır. Bu kapsamda Uyum Sınıfı Programı'ndan yararlanan göçmen çocukların okullaşmaları üzerindeki etkisinin ve uyum sınıflarının amacına ulaşma durumunun ortaya konulması amaçlanmıştır. Araştırma nitel araştırma desenlerinden doküman incelemesiyle gerçekleştirilmiştir. Verilerin toplanmasında küresel bağlamda ve Türkiye'de göçmen öğrencilerin okullaşmasını desteklemek amacıyla Uyum Sınıfı Programlarının uygulanışı, gelişimi, sonuçları ve sürdürülebilirliği incelenmiştir. Kapsamlı bir alanyazın taraması yapılarak konuyla ilgili kitaplar, yüksek lisans ve doktora tezleri, makaleler, araştırmalar ve ilgili kurum ve kuruluşlara ait yayımlanan alanla ilgili raporlar incelenmiştir. Araştırmada Uyum Sınıfı Programı'yla ilgili tüm yayınlar toplanmıştır. Daha sonra da Türkiye'de Uyum Sınıfı Programı'yla ilgili yapılan tüm yayınlar incelenmiştir. Bu araştırma kapsamında incelenen konuyla ilgili tüm yayınlar, derinlemesine inceleme sonucu araştırma sorusu kapsamında değerlendirilmiştir. Elde edilen tespit bağlamında Türkiye'de Uyum Sınıfı Programı'ndan faydalanan göçmen çocukların okullaşmaları ve okullaşmalarının sürekliliğini sağlamada Uyum Sınıfı Programı'nın amacına ulaşamadığı, ulaşamaması nedeniyle Program'ın iyileştirilmesi yönünde yerli öğrencilerle göçmen çocukların karma sınıflarda eğitim ve dil beceri düzeylerinin yükseltilerek okullaşmalarının sürekliliğini sağlamaya yönelik öneriler geliştirmiştir.

**Anahtar Sözcükler:** Göçmen çocuklar, yabancı uyruklu öğrenci, uyum sınıfı, ikinci dil öğrenimi, sosyal uyum, okullaşma

## GİRİŞ

Türkiye'de yapılan kapsamlı çalışmalara rağmen Suriyeli öğrencilerin okula uyumları ve akademik gelişimleri istenen düzeye ulaşamamıştır. Sorunun temeli, alanyazındaki araştırmaların ortaya koyduğu sonuçlar bağlamında dil problemidir. Bu soruna ek bir çözüm olarak Millî Eğitim Bakanlığı yeni bir yöntem olan uyum sınıfı programını başlatmıştır. Uyum sınıfları uygulamasının amacı, Türkçe bilmeyen ya da Türkçe dil beceri düzeylerini geliştirmeye ihtiyacı olan yabancı uyruklu tüm öğrencilere eğitim fırsatı sunmak, eğitim sonunda bu öğrencileri yaşlarına uygun sınıf seviyelerindeki akademik eğitime hazır hale getirmektir (PİKTES, 2020). Bu kapsamda Millî Eğitim Bakanlığı 2019-2020 eğitim döneminde Türkçe dil becerileri bakımından yetersiz olan Suriyeli öğrencileri Türkçe Yeterlik Sınavı (TYS) ile tespit edip uyum sınıfları programına yerleştirmiştir. 2019-2020 eğitim yılının başında Millî Eğitim Bakanlığı bünyesinde yer alan okullardaki yabancı uyruklu öğrencilerin topluma ve eğitim sistemine uyumunun artırılmasıyla ilgili "Yabancı Öğrenciler Uyum Sınıfları" konulu bir genelge hazırlanmıştır. Bu genelgeyle [Millî Eğitim Bakanlığı (MEB), 2019] yabancı uyruklu öğrencilerin Türkçe dil engeli nedeniyle eğitim sistemine uyumları konusunda zorluklar yaşandığı belirtilerek, bu öğrencilerin Türk eğitim sistemine uyumlarının artırılması amacıyla "Uyum Sınıfları" uygulamasını resmen başlatmıştır. Her sınıf seviyesinden en az 10, en çok 30 öğrencinin olması sınıfın açılmasının zorunlu koşuludur. İlgili okulda yeterli sayıda öğrenci bulunamazsa öğrenciler başka bir okula uyum sınıfı için yönlendirilebilir veya ilköğretim, ortaokul ve ortaöğretimde ayrı ayrı olmak üzere birleştirilmiş sınıflarda eğitim görebilirler. Öğrenciler bu sınıfta en fazla iki dönem bulunabilirler. Uyum sınıflarındaki birinci dönemde başarılı olan öğrenciler yaşlarına uygun sınıf seviyelerine yerleştirilir. Bir dönem içerisinde başarılı olmamaları durumunda ikinci dönemi de uyum sınıflarında geçirerek dönem sonunda ikinci kez girdikleri TYS'den 60 ve üzeri puan alan öğrenciler yaşlarına uygun sınıf seviyelerine yerleştirilirler. Uyum Sınıfları Genelgesi'nde, Suriyeli öğrencilerin haftalık 24 saat Türkçe dersi olmak üzere, 30 saatlik eğitim görmeleri gerektiği belirtilmiştir.

Uyum sınıfları ilkököl, ortaokul ve lise seviyelerinde açılmış, daha sonra sadece ilkököl seviyesi 3. sınıflarda uygulamaya devam edilmiştir (MEB, 2019). Uyum sınıflarına 3-12. sınıflara devam eden öğrenciler kabul edilmektedir. Geçici eğitim merkezlerinde veya Suriyeli Çocukların Türk Eğitim Sistemine Entegrasyonunun Desteklenmesi Projesi (PIKTES) kapsamında Türkçe öğrenen yabancı öğrencilere Türkçe Yeterlik Sınavı (TYS) uygulanmıştır. 2020 yılında MEB tarafından yayımlanan yeni bir genelge ile uyum sınıflarının yabancı uyruklu öğrencilerin yoğun olduğu illerde açılacağı, ilköküllere sadece 3. sınıflardan öğrenci alınacağı ve öğrenci seçiminin YYS yerine okul içerisinde komisyon kararına göre alınacağı belirtilmiştir. Genelge ile PIKTES kapsamında görev yapan Türkçe ve Arapça öğretmenleri ile Rehber Danışmanlar yabancı öğrenci uyum sınıfları açılan okullarda görevlendirilmiştir.

Alanyazında yapılan araştırmalarda göçmen öğrencilerin uyum sınıflarına geldiklerinde matematik, hayat bilgisi vb. derslerden geri kaldıkları ve bu dersleri öğrenemedikleri için kendi sınıflarına geri döndüklerinde akademik başarısızlık yaşadıklarını ve kaygılandıkları belirlenmiştir. Yalçın (2017) tarafından yapılan araştırmada, uyum sınıfları uygulamasından önce var olan Geçici Eğitim Merkezlerinin kapatıldıktan sonra Suriyeli öğrencilerin kamu okullarında yaş seviyelerine uygun olarak sınıflara yerleştirildiği sistemin yapısal olarak mülteci öğrencilerin dersleri anlamaması gibi problemlere yol açtığı, öğrencilerin Türkçe bilmemesinden kaynaklı ayrımcılık sorunlarının oluştuğu tespit edilmiştir.

Genelgeye (2019) göre, birinci dönemde başarılı olanların mevcut sınıflarına aktarılması bir dönem boyunca Türkçe dışında Matematik, Fizik, Kimya, Biyoloji, Türk Dili ve Edebiyatı, Tarih, Coğrafya, Felsefe gibi branş derslerini almayan öğrencilerin bu dersleri bir dönem boyunca alan öğrencilerle aynı sınıfa alınmaları hem Türk öğrenciler hem de yabancı uyruklu öğrenciler açısından doğru bir uygulama olmadığı ve uyum sınıflarının olumlu ve olumsuz etkileri alanyazındaki araştırmalarla tespit edilmiştir. Bu araştırmalarda uyum sınıflarının yabancı uyruklu öğrenciler üzerindeki olumsuz etkileri derslerden geri kalma, kendi sınıfından uzak kaldığı için geri döndüğünde uyum sağlayamama ve akranlarından Türkçe öğrenemiyor olmaları sonucuna ulaşılmıştır.

Bu araştırmada alanyazında yapılan araştırmalar bağlamında 2020 yılından itibaren Türkiye’de göçmen öğrenciler için planlanan uyum sınıflarının amacına ulaşması durumunun incelenmesi amaçlanmıştır.

## YÖNTEM

Araştırma, nitel araştırma deseninde tasarlanmış olup betimsel bir nitelik taşımaktadır. Araştırma nitel araştırma desenlerinden doküman incelemesiyle gerçekleştirilmiştir. Bu araştırmada, Türkiye’de Şartlı Eğitim Yardımı Programı’ndan faydalanan çocukların okullaşmaları üzerindeki etkisinin ortaya konulması amaçlandığından (betimsel içerik analizi yöntemi) bu amaca en uygun yöntemlerden biri olan doküman incelemesi kullanılmıştır. Araştırma, çalışma konusuyla ilgili içeriğin incelenmesine, çözümlenmesine ve yorumlanmasına dayanmaktadır.

## Veri Toplama Süreci ve Analizi

Araştırmada, verilerin toplanmasında küresel bağlamda ve Türkiye’de Uyum Sınıfı Programı’ndan yararlanan göçmen çocukların okullaşmaları üzerindeki etkisinin ve uyum sınıflarının amacına ulaşma durumunun incelenmesine yönelik kapsamlı bir alanyazın taraması yapılmıştır. Araştırma konusuyla ilgili kitaplar, yüksek lisans ve doktora tezleri, makaleler, araştırmalar ve ilgili kurum ve kuruluşlara ait yayımlanan alanla ilgili raporlar taranarak doküman incelemesi tekniğiyle incelenmiştir. İngilizce dilinde ve Türkiye’de eğitim bilimleri alanındaki araştırmaları yayımlayan ve uluslararası indekslerde (ERIC, Web of Science, Scopus, SSCI), YÖK Tez tarama ve ulusal alanda TR Ulakbim dizininde taranan dergilerin veritabanında sistematik bir araştırma yapılmıştır. Google Scholar ve ScienceOpen veri tabanları aracılığıyla literatür taraması yapılmıştır. Araştırmada göçmen çocukların eğitime entegrasyonlarında uygulanan uyum sınıfları ya da benzer programlarla ilgili tüm yayınlar toplanmış ve incelenmiştir. Bu araştırma kapsamında incelenen konuyla ilgili tüm yayınlar derinlemesine inceleme sonucu araştırma sorusu kapsamında değerlendirilmiştir.

## BULGULAR

Yapılan betimsel içerik analizi sonucu uyum sınıflarının amacına ulaşması durumları başlıklar halinde aşağıda verilmiştir.

### 1) Türkçe Yeterlik Sınavının (TYS) Yetersizliği ve Dil Becerisi Kazanımı

Bulut, Kanat-Soysal ve Gülçiçek (2018) tarafından yapılan araştırmada, öğrencilerle iletişim kurulamamasının ve temel komutları bile anlamamanın temel nedeni olarak öğrencilerin dil becerisi kazanmadan okula gelmeleri olarak belirtmiştir. Kandemir ve Aydın (2020) tarafından yapılan araştırmada, uyum sınıfına öğrenci alınmada çok büyük bir kısmı yazılı olan YYS sınavına ek olarak sözlü sınavın da uygulanması gerektiğini öğrenciler tarafından belirtilirken öğrencilerin sınıflara dağıtılmadan önce dil eğitimi almaları gerektiği sonucuna ulaşmıştır. Dil engeli, öğrencilerin izole edilmelerine ve yalnızlık hissi yaşamalarına neden olurken ve daha ciddi sorunların meydana gelmesine neden olabilir.

Uyum sınıflarındaki öğrencilerin dil becerilerinin ölçülmesi amacıyla yazılı olarak uygulanan YYS, öğrencilerin okuduğunu anlama becerilerini ölçmeye yöneliktir. Alan yazında yapılan araştırmalar tarafından, YYS sınavının

öğrencilerin okuma ve anlama becerilerini ölçerken, dinleme ve konuşma becerilerini ölçmediği, okuma, dinleme, konuşma ve yazma becerilerinin tamamını ölçmekten uzak olduğu tespit edilmiştir. Bozan ve Çelik (2021) tarafından yapılan araştırmada, sadece çoktan seçmeli sorulardan oluşan TYS sınavının konuşma, dinleme, okuma ve yazma becerilerini ölçmemesi nedeniyle Türkçeyi iyi düzeyde konuşabilen fakat yazma ve okumayı bilmeyen bir öğrenci ile yazma ve okuma becerilerine sahip olmayan öğrencilerin aynı sınıfta yer almasının sorunlara yol açabileceği tespit edilmiştir. Biçer ve Kılıç (2017), Kanat (2022) ve İltar ve Dündar (2018) tarafından yapılan araştırmalarda, uyum sınıflarında eğitim gören öğrencilerin başta dinleme olmak üzere yazma ve konuşma becerilerinde zorlandıkları; okuma becerisinde ise zorlanmadıkları sonucuna ulaşılmıştır. Açık (2008), Alan (2019), Biçer, Çoban ve Bakır'ın (2014) ve Kanat (2022) tarafından yapılan araştırmalarda, uyum sınıflarındaki öğrencilerin temel dil becerileri olan sırasıyla yazma, konuşma, anlama ve okuma becerilerinde sorunlar yaşadıkları tespit etmiştir. Fidan (2016) ve Emiroğlu (2014) tarafından yapılan araştırmalarda, uyum sınıflarındaki öğrencilerin yazma ve konuşma becerileri, cümle kurma, ek ve tamlamalar, eş seslilik, fiilimsiler, edatlar, deyimler, şahıs ekleri, iyelik ekleri, ünlü türemesi, bağlaçlar, ek eylem gibi konularda zorlandıkları tespit edilmiştir. Kanat (2022) tarafından yapılan araştırmada, öğretmenler tarafından uyum sınıflarındaki öğrencilerin en çok konuşma becerisi olmak üzere tüm beceri alanlarının geliştirilmesi için çalışmalar yaptığı tespit edilmiştir.

## 2) Türkçe Öğretiminde Ders Materyallerinin Yetersizliği

Kanat (2022) tarafından yapılan araştırmada, kullanılan ders kitaplarının öğrenci seviyesinin altında kaldığı ve görsel, işitsel materyallerin bulunmadığı tespit edilmiştir. Uyum sınıflarında kullanılan kitabın ön kapağında 6-12 yaş aralığı için hazırlandığı belirtilmesine karşın uyum sınıfları öğretmenleri tarafından 6-12 yaş aralığı için hazırlanan kitapların amaca hizmet etmediği tespit edilirken bu sınıflarda yeterli görsel, işitsel kaynak kullanılmadığı sonucuna ulaşılmıştır. Biçer ve Kılıç (2017) ve İltar ve Dündar (2018) tarafından yapılan araştırmalarda, Suriyeli öğrencilere Türkçe öğreten öğretmenlerin kullandıkları Türkçe ders kitaplarının içeriğinin çeşitli açılardan yetersiz buldukları ortaya konulmuştur.

## 3) Farklı Uyrıklardan Öğrencilerin Aynı Sınıf İçinde Olması

Uyum sınıflarında göçmen öğrencilerin Türk öğrencilerden ayrı sınıflarda ve öğrenilen dili kullanabilecek eğitim ortamlarının oluşturulmamasından dolayı sorunlar yaşadıkları görülmektedir. Uyum sınıflarındaki öğrencilerin tümünün yabancı uyruklu olması (göçmen), Türkçe konusunda yetersiz olmaları ve branş dersleri yerine uyum sınıflarında sadece Türkçe öğretilmesi bir avantaj olarak düşünülebilirken öğrencilerin kendi aralarında ana dillerini konuşmalarının dezavantaj olduğu söylenebilir.

Kanat (2022) tarafından yapılan araştırmada, Yabancı uyruklu öğrencilerin sınıf içinde ana dilleri Arapçayı sık kullanmaları, hedef dili kullanan Türk öğrencilerden ayrı sınıflarda bulunmaları ulaşılan olumsuz sonuçlar olmuştur. Bu araştırmada, uyum sınıflarında öğrenim gören yabancı uyruklu öğrencilerin daha çok "Türkiye'de yaşamak ve eğitim almak" için Türkçe öğrendikleri tespit edilmiştir. Bozan ve Çelik (2021) tarafından yapılan araştırmalarda, uyum sınıfları uygulamasının göçmen öğrencileri psikososyal açıdan izole ederek, akademik olarak başarısızlığın etiketlenmesi, kapsayıcı okul ortamını çarpıtma ve dil becerilerini geliştirmesinin sınırlandırıldığı ve yetersiz olduğu ifade edilmiştir.

Alver (2019), Külekçi-Akyavuz, Gezeroğlu ve Toma (2020) ve Kanat (2022) tarafından yapılan araştırmalarda, uyum sınıflarında eğitim-öğretim etkinlikleri bağlamında karşılaşılan en önemli sorunların Türkçe öğrenmeye karşı ilgisizlik, olumsuz tutum ile Türkçe yerine ana dilleri olan Arapçayı kullanmaları tespit edilmiştir. Bu durumun uyum sınıflarında göçmen öğrencilerde, Türkçe dil becerisi kazanımının yeterli düzeye gelmemesinde etken olduğu söylenebilir. Kanat (2022) tarafından yapılan araştırmada, "Türkçe bilen veya öğrenen çocuk Türkçe konuşmamak için çabalyor, Arapça konuşmak için ısrar ediyorlar" ifadesiyle öğrencilerin kendi ana dillerini konuşmak istedikleri tespit edilmiştir.

Kapat ve Şahin (2021) tarafından yapılan araştırmada, uyum sınıflarına devam eden öğrencilerin, uyum sınıflarında daha rahat bir ortam yakaladıkları ancak Türkçe dil becerisi kazanma ve akran öğretiminde sorun yaşadıkları; sınıf mevcutları ve öğrenciler arasındaki seviye farklılıkları olumsuzlukları sonucuna ulaşılmıştır. Kanat (2022) araştırmasında, öğrencilerin çoğunluğu tarafından uyum sınıflarında ele alınan konuların basit bulunduğu ortaya konulmuş olup uyum sınıflarındaki öğrencilerin kaygı yönünden, normal sınıflara göre kendilerini daha rahat hissettikleri sonucuna ulaşılmıştır. Bu araştırmada uyum sınıflarında verilen Türkçe öğretimi öğrencilerin çoğunluğu tarafından yetersiz bulunmaktadır. Buna karşın uyum sınıflarında görev yapan öğretmenler tarafından, verilen eğitimin genel anlamda yeterli olduğu sonucuna ulaşılmıştır. Bu durum uyum sınıflarında verilen Türkçe öğretimi ile ilgili öğretmen ve öğrencilerde farklı görüşler bulunduğunu göstermektedir. Biçer (2017) ve Kanat (2022) tarafından yapılan araştırmalarda, uyum sınıflarındaki öğrencilerin Türkçe konuşma ihtiyacı hissetmedikleri için ana dillerinde konuşma eğiliminde oldukları, mecbur kalmadıkça Türkçe konuşmadıkları, ders içerisinde bile Arapçayı kullandıkları belirlenmiştir.

#### 4) Yabancı Uyruklu Öğrencilerin Uyum Sorunları Sergilemesi

Uyum sınıfları uygulamasını desteklemeyen araştırmaların sonuçları göçmen öğrencilerin aynı ortamda sınıfta bulunmaları nedeniyle Türk akranlarıyla iletişim kuramamalarının daha fazla ayrışmalara yol açtığı belirtilmiştir. Uyum sınıflarında iki eğitim döneminde Türkçe temel dil becerilerini kazanamayan öğrencinin dil gelişimi uyum sorunları sergileme davranışları göstermesini tetikleyebilir. Uyum sınıfları oluşturulmasının ana amacının akran kaynaşmasını sağlama olurken, göçmen öğrencilerin bu sınıflarda temel dil becerileri eksikliğinden dolayı uyum sorunları sergiledikleri alanyazındaki araştırmalar tarafından ortaya konulmuştur. İcel, Ocak ve Akkaş-Baysal (2024) tarafından yapılan araştırmada, uyum sınıflarında öğrenciler arasında saldırganlık, yalan söyleme, şiddet, uyuklarına göre gruplaşma eğiliminin olduğunu, okula uyum sorunlarının yaşandığı ve ailelerin işbirliğinden kaçındıklarını belirtmiştir. Bozan ve Çelik (2021) tarafından yapılan araştırmada, göçmen öğrencilerin uyum sınıflarında aynı ortamda bulunmasından dolayı disiplin sorunlarını arttığı ve kendi aralarında ve Türk öğrencilerle kavga ettikleri tespit edilmiştir.

#### 5) Uyum Sınıfı Öğreticilerinin Yeterlilikleri

Kapat ve Şahin (2021) tarafından yapılan araştırmada, Türkçe öğreticilerinin uyum sınıfı uygulaması ile kendilerini daha rahat hissettikleri sonucuna ulaşılmıştır. Türkçe öğreticilerinin genel olarak uyum sınıfı uygulamasından memnun oldukları sonucuna ulaşılmıştır. Çalışır (2021) tarafından yapılan araştırmada, öğretmenlerinin statü farklılığından olumsuz etkilendikleri ve yabancı uyruklu öğrencilerin Türkçe dil eğitimi alarak okula başlaması, daha kaliteli materyaller hazırlanması gerektiği, uyum sınıflarının seviye grupları haline getirilmesi, veli desteği sonuçlarına ulaşılmıştır. Uyum sınıfı öğretmenlerinin, uyum sınıflarının iş yükünün yüksek olmasından dolayı yaptıkları işi yıpratıcı buldukları ve bu yüzden stres, mutsuz hissetme gibi etkiler yarattığı sonucuna ulaşılmıştır. Uyum sınıfı öğretmenlerinin, statü farklılığı nedeniyle olumsuz durumlar yaşadıkları ve diğer meslektaşlarının olumsuz tutumlarına maruz kaldıkları sonucu ortaya çıkarılmıştır. Kanat (2022) tarafından yapılan araştırmada, öğretmenlerin yabancı uyruklu öğrencilere eğitim vermede, kültürel farklılıkları gidermede ve yabancı ailelerle işbirliği kurmada mesleki gelişime ihtiyaçlarının olduğu görülmüştür.

#### SONUÇ

Yabancı uyruklu öğrencilere uyum sınıflarında başka dersler yerine sadece Türkçe öğretilmesi ile bu sınıflarda öğretmenlerin daha yavaş anlatmaları ya da konuşmaları uyum sınıflarının en önemli avantajlarıdır. Öğrencilerin kendi aralarında ana dilleri olan Arapça konuşmaları ile uyum sınıflarında çevrelerinde Türk öğrenci bulunmaması ise uyum sınıflarının dezavantajlarıdır. Uyum sınıflarında yabancı uyruklu öğrencilerin ana dilleri olan Arapça dilini sık sık kullanmaları, hedef dili kullanan Türk öğrencilerden ayrı sınıflarda eğitim-öğretim faaliyetlerine katılmaları, kullanılan kaynak kitapların öğrenci seviyesine uygun olmayan basitlikte olması olumsuz durumlar olarak değerlendirilmektedir. Bunların dışında uyum sınıflarında eğitim almakta olan öğrencilerin uyum sınıflarında başarılı oldukları takdirde normal sınıflarına devam etmeleri planlanmıştır. Yalnız uyum sınıflarında Matematik, Fizik, Kimya, Biyoloji, Türk Dili ve Edebiyatı, Tarih, Coğrafya, Felsefe gibi branş derslerine yer verilmemektedir. Yabancı uyruklu öğrencilerin bu dersleri bir dönem boyunca almış bulunan öğrencilerle aynı sınıfa alınmaları hem Türk öğrenciler hem de yabancı uyruklu öğrenciler açısından olumsuzluklara sebep olması muhtemeldir.

MEB, Türkiye’de göçmen öğrencilerin Türk eğitim sistemine uyumunu kolaylaştırmak için 2019 yılında kamu okullarındaki uyum sınıfı uygulaması başlatılmış fakat süreçte sorunu derinleştiren farklı boyutlar ortaya çıkmıştır. Ara sınıflarda eğitim sistemine dâhil olan yabancı uyruklu öğrenciler için faydalı bir uygulama olarak değerlendirilen uyum sınıfları, okula Türkiye’de başlayıp 1 ve 2. sınıfı Türk eğitim sisteminin içerisinde okuyan öğrenciler açısından dezavantaj olarak ortaya çıktığı söylenebilir. Bunun nedeni iki yıl boyunca okula devam eden Suriyeli öğrencilerin okuduklarını anlamlandırmadan okuma yazma öğrenmeleri, ailelerin Türkçe konusunda destek olmamaları ya da olamamaları, kalabalık sınıflarda Türkçeyi fazla kullanmamaları gibi nedenlerle üçüncü sınıftan başlayan uyum sınıfları uygulaması başarılı olmamıştır. Bu uygulama, iki yıl boyunca okula devam eden, Türkçe okuyabilen ancak okuduğunu anlamayan ve içerisinde yaşadığı toplumun dili olan Türkçe ile kendini ifade edemeyen öğrenciler ortaya çıkarmıştır. Bu durum, Suriyeli öğrencilerin ana dilleri ile kendilerini daha rahat ifade ettikleri arkadaşlarıyla iletişim kurmayı kolaylaştırmıştır. Yabancı uyruklu öğrencilerin yoğun olarak bulunduğu okullarda, bazı sınıf mevcutlarının yarısını oluşturan öğrenciler, Türkçe anlama, yazma ve ifade becerisini kazanmadan okula başlamışlardır. Bu durum bir taraftan sınıfın okuma yazma gelişimini yavaşlatırken diğer taraftan da sınıf öğretmenlerine ciddi bir iş yükü ve sorumluluk yüklemiştir.

#### Öneriler

Suriyeli öğrencilere dil eğitiminin okul öncesi dönemde verilmesinin daha verimli olacağı, Türkçe Yeterlik Sınavı’nın yanında mutlaka bir mülakat sisteminin olmasının gerektiği, uyum sınıflarının daha detaylı bir şekilde planlanması gerekir. Uyum sınıflarının daha etkili ve olabilmeleri için; planlamalar gözden geçirilmeli, materyal desteği sağlanmalı, Türkçe öğreticilerinin gelecek belirsizliği giderilmelidir. Yabancı uyruklu öğrencilerin okul öncesi dönemde dil eğitimi almaları, akran öğretimi yönteminin daha sıklıkla uygulanması, uyum sınıflarındaki

dil eğitiminin amacının velilere ve öğrencilere daha yoğun anlatılması, uyum sınıflarının planlamasına daha fazla özen gösterilmesi ve Türkçe öğreticilerinin gelecek belirsizliğinin giderilmesi önerilmektedir.

Gencer (2017) tarafından Suriyelilerle ilgili yapısal sorunlardan olan dil ve uyum sorununun üstesinden gelinmesinin, bu çocukların topluma uyumunu hızlandıracağı belirtilmiştir. Alanyazında araştırmalarda, planlama noktasında Biçer ve Kılıç (2017) ders kitaplarının öğrenci seviyesine göre hazırlanması, Kuzu-Jafari, Tonga ve Kışla (2018), materyal noktasında eksikliklerin olduğunu ve görsel materyal desteğinin sağlanması ve sınıf mevcutlarının azaltılması gerektiğini belirtmiştir.

Uyum sınıflarındaki öğrencilerin mülakat komisyonu ile değerlendirilmesi daha etkili sonuçlar ortaya çıkaracaktır. Mülakat sistemi ile katılımcıların da belirttiği gibi uyum sınıflarında Türkçe konuşabilen ancak okuma ve okuduğunu anlama becerileri zayıf öğrencilerin zaman kaybının önüne geçilebilir. Uyum sınıfı uygulaması yerine dil becerilerinin ayrı ayrı test edildiği izolasyondan uzak daha farklı sistemler getirilmesinin mülteci öğrenciler açısından daha faydalı olacağı düşünülmektedir.

İletişim sorunu yaşayan göçmen öğrencilerin ayrıştırılması yerine bu sorunun karma sınıflarda çözümüne yönelik uygulamalar geliştirilmesinin daha faydalı olabilir. Uyum sınıfı uygulaması kapsamında öğrencilere sadece Türkçe eğitimi veriliyor olması ve diğer derslerden eksik kalmaları nedeniyle sene kaybı yaşayacakları ortaya konulmasıdır. Bu bakımdan mültecilere verilen eğitimlerin öğrencilerin sene kaybı yaşamamaları için matematik, fen bilimleri gibi diğer dersleri ihmal etmeyecek şekilde planlanması gerekmektedir. Karma sınıflarda, uyum sınıflarına göre öğrencilerin birbirleriyle daha fazla temas halinde olmalarının göçmen öğrencilerin uyum süreçlerinin hızlanması bakımından daha faydalı olacağı düşünülmektedir. Öğretmen eğitimlerine kapsayıcı eğitimin dahil edilmesi ve daha çok materyalle öğretimin desteklenmesi gerektiği belirtilmiştir. Öğretmenlerin ikinci dil öğretimi yöntemine yönelik farkındalıklarının artırılması, mülteci öğrencilerin ihtiyaçları, kültürel olarak karma sınıflarda eğitim yaklaşımları konu alanlarında mesleki gelişim programlarına yer verilmelidir. Katılımcılar tarafından öğrencilerin Türkçe eğitimi yanında karma sınıflarda eğitim görmeleri gerektiği belirtilmiştir. Bu durumun öğrenciler için aynı zamanda kaynaşmalarına, yıl kaybı yaşamamalarına etki edeceği belirtilmiştir. Öğrenciler Türkçe öğrenirken aynı zamanda diğer derslerini takip edebileceklerdir. Bunun yanında Türk akranlarıyla sosyal iletişimde bulunmaları onların uyum süreçlerini ve Türkçe öğrenmelerini de hızlandıracaktır. Biçer ve Özaltun (2020) tarafından yapılan araştırmada, yabancı uyruklu öğrencilerin Türk öğrencilerle etkileşimlerinin öneminden bahsedilmiştir. Sarıtaş, Şahin ve Çatalbaş (2016) yapmış oldukları çalışmalarında akranlarıyla iletişim kurarak yabancı uyruklu öğrencilerin Türkçeyi hızlıca öğrendiklerini belirtmişlerdir.

Göçmen öğrencilerin uyum süreçleriyle ilgili yapılan uygulamalar, göçmen öğrencilerin ötekileşmesini önlemek ve uyum süreçlerini desteklemek amacıyla adaletle bağlılık, özel bir politika ve destekleme sistemi, kapsayıcı eğitim biçiminde uygulandığını göstermektedir (Taylor, Sidhu, 2012).

Uyum sınıfları uygulaması, göçmen öğrencilerin misafir oldukları ülkenin yerli öğrencilerinden ayırdığı için kapsayıcı ve çok kültürlü eğitimle ve bütüncül bakış açısına sahip okul anlayışıyla çalışmaktadır. Bu bağlamda göçmen öğrencilerin bulunduğu ülkeler tarafından, okul ve sınıflara yönelik özel eğitim politikaları geliştirilmelidir.

**Xülasə.** Bu işdə legirli poladəritmə texnoloji proseslərinin əsas xüsusiyyətləri təhlil edilir və onların müxtəlif təsnifat qruplarına bölünməsi təklif olunur. Onlar əritmə üsuluna görə əsasi və turş olmaqla iki qrupa, kimyəvi tərkibinə görə üç sinifə bölünür. Eyni zamanda legirli poladlar kimyəvi tərkib, struktur quruluşu, təbii sahəsi və istismar xassələri kimi əlamətlərə görə də təsnif olunurlar.

Legirli poladlar əridilmə üsuluna görə xeyli fərqlənirlər, onların keyfiyyətini təmin edən ən vacib amil məhz əritmə üsuludur. Poladın əridilməsində şixtə materiallarının tərkibinin seleksiya ilə müəyyən edilməsi vacib əhəmiyyət kəsb edir. Legirli poladların əridilməsində oksigensizləşdiricilər, saflaşdırıcılar və modifikatorlar kimi ferrosilisiyum, ferromanqan, ferroxrom, silikomanqan və digər ferroərintilərin rolu qiymətləndirilir.

Legirli poladların əritmə prosesinin intensivləşdirilməsi üçün metallaşdırılmış diyircəklərin rolu xüsusi qeyd olunur. Diyircəklərin dünyada əsas istehsaçları göstərilmiş və elektrik sobasında poladəritmə prosesinin intensivləşdirilməsi üçün şixtədə diyircəkləri rəasional miqdarı müəyyən olunmuşdur.

Məqalədə yerli resurslar əsasında legirli polad istehsalının nəzəri və texnoloji cəhətlərdən əsaslandırılması şərh olunur. Binin üçün legirliyəci elementlərin mineral-xammal bazasının imkanları qiymətləndirilir. Yerli resursların istifadəsilə azkarbonlu azlegirli 13XΦA poladının istehsal texnologiyası şərh olunur. Bu poladdan teft-qaz sənayesi üçün tikişsiz boruların istehsalı imkanları araşdırılır.

**Açar sözlər:** legirli polad, yerli resurslar, ferroərintilər, təsnifat, termiki emal

**Резюме.** В данном исследовании проанализированы основные особенности технологических процессов производства легированных сталей. Предлагается разделить стали на различные классификационные группы. По способу плавления их делят на две группы — основные и кислые, а по химическому составу — на три класса. При этом легированные стали классифицируются и по таким характеристикам, как химический состав, структурное строение, область применения и эксплуатационные свойства.

Легированные стали сильно различаются по способу выплавки, важнейшим фактором, обеспечивающим их качество, является способ выплавки. Важно определить состав шлаковых материалов путем отбора при выплавке стали. Ферросилиций, ферромарганец, феррохром, силикомарганец и др. применяют в качестве раскислителей, рафинителers и модификаторов при выплавке легированных сталей. Оценивается роль других ферросплавов.

Особо отмечена роль металлизированных окатышей для интенсификации процесса плавки легированных сталей. Указаны основные производители окатышей в мире и указан объем их использования в шихте для интенсификации процесса плавки в электропечи.

В статье теоретически обосновано производство легированных сталей на основе местных ресурсов. Показана минерально-сырьевая база легирующих элементов и на примере местных ресурсов освещается технология производства низкоуглеродистой низколегированной стали 13XΦA. В качестве примера показано получение из этой стали бесшовных труб для нефтегазовой промышленности.

**Ключевые слова:** легированная сталь, местные ресурсы, ферросплавы, классификация, термическая обработка

**Abstract.** *In this study, the main features of alloy steelmaking technological processes are analyzed. It is proposed to divide steels into different classification groups. They are divided into two groups, basic and sour, according to the melting method, and three classes according to their chemical composition. At the same time, alloy steels are also classified according to characteristics such as chemical composition, structural structure, field of application and operational properties.*

*Alloy steels differ greatly according to the method of smelting, the most important factor ensuring their quality is the method of smelting. It is important to determine the composition of slag materials by selection in steel melting. Ferrosilicon, ferromanganese, ferrochromium, silicomanganese, etc. are used as deoxidizers, purifiers and modifiers in the melting of alloy steels. The role of other ferroalloys is being evaluated.*

*The role of metallized rollers for intensifying the melting process of alloy steels is specially mentioned. The main manufacturers of these rollers in the world are indicated, and the amount of their use in the charge for intensifying the melting process in the electric furnace is indicated.*

*The paper also explains the theoretical justification of alloy steel production based on local resources. The mineral-raw material bases of alloying elements are shown for Binin and the production technology of low-carbon low-alloy 13XFA steel is explained using local resources as an example. The purchase of seamless pipes for the kerosene-gas industry from this steel is noted.*

**Key words:** *Alloy steel, local resources, ferroalloy, classification, thermal treatment*

**1. Introduction.** It is known that the economy of the metallurgical and mechanical engineering industries, as well as other regions of the Republic of Azerbaijan, is developing rapidly. It is impossible to imagine comprehensive development of macroeconomics without heavy industry, including metallurgy and mechanical engineering.

As a result of the strong economic policy pursued in our republic, the country is constantly expanding its industry. This applies not only to the economic sphere, but also to other areas. Important events, including new projects, construction of buildings that have occurred over the past ten years, are carried out against the backdrop of the development of the country's economy. In other words, the unified development of the non-oil sector and the oil sector makes the country even stronger.

The construction of transport roads that meet modern standards, unique multi-story buildings, cultural centers, sports complexes, bridges, civil buildings, factories and other industrial facilities increases the demand and supply of metal products.

It is gratifying that 15 years ago the construction materials market was formed due to imported products, and today in this area there is not only a local market, but also export products. All these products are produced in Azerbaijan and meet international standards.

The presence of labor resources in the republic with certain experience in the oil sector (oil and gas), metallurgy, raw materials, construction opens up new broad opportunities for the development of heavy industry, including the metallurgical industry.

A large number of industrial opportunities in the country, the wealth of resources, the dynamic development of industries every day are a sign that the republic will become a leader among the countries of Europe and Asia in the field of metallurgy. It is for this reason that the Metallurgical Complex, which is planned to be created in Azerbaijan, allows developing the macroeconomy and at the same time creating new jobs.

Today, metallurgical products and services produced in our country not only satisfy domestic demand, but are also highly valued and exported to the foreign market. These products include: construction reinforcement, steel blanks, ferroalloys (ferrosilicon). The neighboring country located in the Caspian region, Iran, buys steel blanks from Baku Steel Company LLC, that is, the blanks are exported. Seamless pipes for the oil and gas industry are exported to the Russian Federation (ROSNEFT), ferrosilicon - to the USA, Turkey and other countries [1-3].

Domestic products, which are no different in quality from products imported from Russia and Ukraine, which are leading countries in the field of metallurgy, have become a brand in neighboring regions, and the demand for them is constantly growing.

It is known that heavy industry develops mainly in an extensive way, but such development is accompanied by environmental degradation. As a result, local problems become global and difficult to manage. Spontaneous use of resources required by the metallurgical industry leads to their depletion. To ensure sustainable development, it is necessary to pay equal attention to environmental protection and economic growth. For this reason, the country implements economic and environmental policies that support sustainable development.

In this context, expanding the production of alloy steels with higher bearing capacity and lower metal consumption in Azerbaijan through the use of local resources is always on the agenda.

**2. The purpose of the work** is to substantiate the possibility of using metallized pellets in the production of alloy steels based on the analysis of existing technological processes for steel production and an assessment of the role of ferroalloys as a local resource.

### **3. Object of research, hypothesis, main assumption and simplification of the work.**

The object of this research is the role and influence of additives of elements from local resources in the production of ores and alloy steel located in different regions of the Republic of Azerbaijan for the metallurgical complex.

The main hypothesis of this work is to develop the study of alloying steel from local resources and identify the main patterns regulating the influence of elements on many processes occurring during steel processing. The main assumption of the study is the combination of physical and chemical processes in alloying steel using elements from local resources.

In order to reduce the number of experiments, the simplification is the study of processes associated with the influence of elements from local resources in steel production.

For this purpose, the following issues are considered in the article:

- analysis of existing technological processes for steel production;
- main features of technological processes for the production of alloy steels;
- use of metallized pellets in the production of alloy steels;
- theoretical justification for the production of alloy steel based on local resources.

### **4. The state of production of alloy steel in the Republic of Azerbaijan.**

#### **4.1. Analysis of existing technological processes of steel production.**

“Baku Steel Company”, as a leading enterprise in the non-oil sector of Azerbaijan in terms of its production capacity and potential, was put into operation in May 2001. The grand opening of the enterprise took place on June 23, 2001 with the participation of national leader Heydar Aliyev. Now this day is a professional holiday of Azerbaijani metallurgists.

Design, purchase of equipment, installation and purification of atmospheric waste were carried out by German, French, Italian companies and specialists of the modern Moldovan Metallurgical Plant for steel production in the CIS. The production and social infrastructure of the enterprise was created as a result of the efforts of more than 20 local companies and more than 500 engineering and technical workers.

The enterprise is the first private metallurgical enterprise created in the heavy industry in Azerbaijan by attracting foreign investment. According to the project, the production capacity of Baku Steel Company will be 500 thousand tons of steel reinforcement per year. Currently, the enterprise produces about 850 thousand tons of products.

The enterprise employs more than 2,000 people. The company has mastered modern technologies of melting and continuous casting, produces reinforcement and blanks from carbon and alloy steels in accordance with international standards. The manufactured products are sold abroad and to domestic metalworking enterprises. Reinforcement products are manufactured according to GOST 10884-94 and GOST 5781-82. In “Baku Steel Company” rolled steel for the production of reinforcement is cast in sizes of 120x120 or 150x150 mm. Blanks are manufactured using a special method of progressive casting - continuous casting.

Steel is smelted in a 50-ton electric arc furnace manufactured by the German company Siemens. Purchased steel scrap, ferroalloys, refining and slag formers are mainly used as a charge. Steel is produced by feeding oxygen into the furnace using rapid smelting technology.

In the casting zone, liquid steel is first poured into an intermediate ladle, and from there into crystallizers. After passing through the first and second cooling zones, the solidified blanks in the crystallizers are cut into pieces 600 or 1200 mm long. After undergoing certain operations, the finished ingots are subjected to reinforcement rolling processes.

Liquid steel is heated in a furnace at a certain temperature and chemical composition. In the furnace, ferroalloys are added to the metal, it is blown with nitrogen or argon and the chemical composition of the alloy, as well as the temperature, are adjusted. After re-checking the composition and temperature, the liquid is poured into a steel-pouring ladle and transported to the casting site. The square blanks used for the reinforcement are produced on a three-axis radial continuous steel casting machine made in Canada.

The square blanks are passed through a rolling line with 15 cells and form the finished reinforcement. The reinforcement is produced with a diameter of 8-32 mm and a length of 6000-12000 mm. The reinforcement is packed in packages of up to 5 tons according to the customer's order and sent to the finished goods warehouse. The diameter, length, weight, steel grade and other parameters of the reinforcement are specified in works [4,5].

The quality of the metal is controlled in the spectral and chemical analysis laboratories. The steel composition is determined with high accuracy by 11 chemical elements and is adjusted by adding ferroalloys before feeding into the casting machine. The physical and mechanical parameters of the reinforcement made from each blank are determined and reflected in the quality certificate issued for the melt upon sale. The production and sale of metal products is carried out under the guarantee of quantity and quality of the Swiss International Control Company. This company, operating in 114 countries around the world, conducts appropriate tests to guarantee the products and confirms the quality certificate issued by the plant.

The State Committee for Standardization, Metrology and Patents of the Republic of Azerbaijan issued a certificate of national conformity for the manufactured steel reinforcement. In addition, at the initiative of the government of Azerbaijan, the Institute of Oil Engineering studied the condition of the company's production equipment, and the quality of the manufactured products was tested by laboratories operating in Russia (Moscow Institute of Reinforced Concrete Structures). and Belarus (Minsk Polytechnic Academy) and positive results were obtained.

Metal products manufactured in the country have been repeatedly exhibited at international exhibitions. At the exhibitions held in Moscow, Astana, Tabriz and Baku, the products manufactured by the country attracted great attention and won quality diplomas.

Let's consider some technical and economic, physical and chemical and mechanical characteristics of metalworking products manufactured by the enterprise.

For example, the permissible mechanical properties of reinforcing steel produced in the country comply with regulatory documents. At least 10 types of steel reinforcement are produced in the country, its mechanical properties, including strength and ductility, vary widely ( $R_m = 373 - 883 \text{ N/mm}^2$  and  $\delta = 6 - 25\%$ , respectively).

The main size of the reinforcement - the diameter varies within 8-28 mm. The width of the ribs is 2.5 mm, the height is 2.0, the pitch reaches  $\sim 10$  mm. The outer diameter of the reinforcement is within 9-30 mm. We reviewed information on the steel grades used for rolling reinforcement.

The nominal diameter of the fittings varies within 6-40 mm. Conventional carbon (Cr3nc) and alloyed (08G2S, 10GS2, etc.) steels are used as steel grades.

The amount of C in ordinary carbon steels ranges from 0.14 to 0.37%. The amount of P and S is limited to 0.05 and 0.04% respectively. The amount of C in alloy steels usually ranges from 0.2 to 0.8%. In all carbon reinforcing steels, the Mn content is 0.4-0.8%, and Si - 0.05-0.5%. Such steels usually contain less than 0.3% Ni and Cr as permanent additives. In alloy steels, depending on the grade, the amount of all alloying elements (Mn, Si, Cr, Ni, Cu and Ti) does not exceed 3% and therefore can be considered low-alloy steels.

The diameter of the reinforcement varies from 6 to 32 mm, and the cross-sectional area - from 0.283 to 8.040 cm<sup>2</sup>. The lower, upper and optimal limits of the linear weight of the reinforcement are given: the optimal weight varies from 0.222 to 6.310 kg. The characteristic defects encountered in the production of steel ingots (120x120 and 150x150 mm) and construction reinforcement are analyzed. It is determined that the characteristic defects can be divided into two groups: discrepancies in the geometric dimensions of the blanks and defects that occur in the blanks themselves.

The characteristic defects that occur during the rolling of the blank are mainly associated with deviations in their dimensions. These include the width and thickness of the pashta, distortions of their convexity, differences in diagonal, curvature of the ingots, the thickness of the faceting of the ends of the pashta, etc. They are specified in [6].

The characteristic defects include defects observed on the surface of the blanks, including rhombuses, folds, distortions of the cross section, swelling of the edges (tongues), high curvature, sagging, longitudinal and transverse cracks, stripes (belts), folds of the bark, cracks, pulp, gas bubbles, etc.

#### **4.2. Main features of technological processes for smelting alloy steels.**

Compared with all materials used in mechanical engineering, alloy steels have higher properties and at the same time high strength, ductility and impact toughness. As a structural material, alloy steel meets the strict and multifaceted requirements of modern technologies. No other industrial material has such a wide range of properties as alloy steels.

As a result of a large number of studies, it has been established that alloy cast steel, well refined and having an optimal temperature, is not inferior in quality to pressure-treated steel, and even surpasses it due to the isotropy of properties in thin and thick walls of the workpiece.

Some alloy steels also allow casting and welding of complex shapes due to good weldability. In addition to the above, castings made of alloy steels are able to withstand high stresses under the action of impact forces and impact forces.

Unlike rolled, forged and tool steels, the chemical composition of cast steels must be selected in such a way that they have, in addition to the required mechanical and operational properties, favorable technological properties. Alloy steels can be divided into the following groups: general-purpose structural steels; stainless steels; acid-resistant steels; heat-resistant steels; refractory steels; corrosion-resistant steels; cold-resistant steels. According to the smelting method, cast steels can be divided into two groups: basic and acid. Depending on the type of smelting furnace, steels can be converter, open-hearth, electric steels, etc. According to the number of elements in the chemical composition, cast steels are divided into the following classes:

Class I - carbon cast steels: low-carbon steels (containing up to 0.08-0.20% carbon), medium-carbon steels (C=0.20-0.45%), high-carbon steels (containing 0.45% more carbon).

Class II - low-alloy steels (the amount of alloying elements up to 2.5%).

Class III - medium-alloy steels (containing 2.5-10% alloying elements). Class IV - high-alloy cast steels (the content of alloying elements is more than 10%).

Steel castings can be classified by the following features: chemical composition; structural structure; area of application and performance properties; steel smelting method; by weight and manufacturing method. According to chemical composition, steel castings can be divided into two classes: carbon (low-, medium- and high-carbon) and alloyed (low-, medium- and high-alloy).

According to their structural composition, carbon and alloy steel castings are classified separately, since the properties of their structural components are different. Carbon steel castings usually have a ferritic or pearlitic structure and are classified as ferritic and pearlitic, respectively. However, in low-carbon steel castings, in addition to ferrite, tertiary cementite is distinguished along its boundary, and in hypereutectoid steel castings, secondary cementite.

The structure of alloy steel castings depends on the amount of alloying elements, carbon, and the method of heat treatment. According to their structure, high-alloy steel castings can be divided into six classes: martensitic, martensitic-ferritic, ferritic, austenitic-martensitic, austenitic-ferritic, and austenitic-based.

Castings can be divided into two groups based on the quality of steel by area of application or performance properties: castings from general-purpose structural steels; steel castings with special physical and chemical properties. The first group includes castings made of low- and medium-alloy carbon steels (carbon steels are most often used). The main indicators of castings in this group are their mechanical properties. Castings belonging to the second group are mainly refractory, heat-resistant, corrosion-resistant, special electrical, magnetic, etc., made of special steels. The main indicators of the listed castings are their special properties.

According to the method of smelting, steel is named depending on the type of furnace. For example, open-hearth steel casting, electric steel casting means that the casting is made from metal smelted in an open-hearth or electric furnace. When mentioning the name of the furnace, it is also indicated whether it is basic or acidic. For example, a martensitic steel casting with basic properties, an electric steel casting with acidic properties, etc.

By type of production, steel is divided into individual, serial and serial groups. In addition, along with the production method, the form in which the casting is made is also indicated. For example, casting in molds, sand-clay molds, die casting, etc.

By weight, steel castings are divided into four groups: I - light (up to 100 kg); II - medium (100-500 kg); III - heavy (500-1000 kg); IV - heavier special castings (weighing up to several hundred tons). So, as we can see, the range of steel castings used in various equipment is quite diverse. The range of steel castings used in some equipment can be classified as follows: oil equipment, shipbuilding, mechanical engineering, internal combustion engines, pump parts, railway transport, tanks and tractors, crushers and mills, excavators, etc. Steel castings are widely used in all areas of modern mechanical engineering. Steel castings produced in different countries are used for different purposes. For example, most of the steel castings produced in the USA were used in the automotive industry, and in the former USSR, most of the steel castings were used in the production of tractors and agricultural machinery.

**Steel smelting.** Steelmaking methods are classified as follows [7]:

1. Acid converter (small Bessemer);
2. Oxygen-acid converter method;
3. Melting in an open-hearth furnace with basic and acidic properties;
4. Melting in an electric arc furnace with basic and acidic properties;
5. Melting in an open high-frequency induction furnace with basic and acidic properties;
6. Melting in a closed induction-vacuum furnace;
7. Melting in an electric arc-vacuum furnace;
8. Melting in electron-vacuum units;
9. Remelting steel in an electric furnace;
10. Degassing steel with synthetic resin;
11. Vacuuming of molten steel outside the furnace.

It should be noted that recently, among the above-mentioned steelmaking methods, the electric smelting method has come to the fore. Previously, the first place was occupied by the converter and open-hearth methods. At present, the specific weight of electric steel in the production of steel castings has increased to 90%. This is due to the fact that electrometallurgy of steel has a number of advantages.

Electric furnaces are mainly used to smelt alloy steels for very important areas of application. Currently, the main place in the electrometallurgy of steel castings is occupied by electric arc furnaces. Steel foundries most often use 5-ton (DSP-5MT) and 3-ton (DSP-3) electric arc furnaces. In the production of large castings, heavy engineering, shipbuilding, etc. Plants also use 50-ton furnaces (DSP-50).

Among steel-smelting furnaces, induction furnaces are easier to operate. The capacity of these furnaces is up to 25 tons. However, at present, induction furnaces with a capacity of 1.0 and 2.5 tons are mainly used in the production of steel castings.

**Classification and calculation of charge materials.** Steel scrap according to GOST 2787-63 forms the main metallic part of the slag during steel smelting in electric furnaces. Scrap consisting of carbon steel products

and waste is marked A2. According to the requirements, its overall dimensions should not exceed 600×350×250 mm. According to the specified GOST, alloyed and multi-alloyed steel scrap is divided into 73 groups (B1-B73) by chemical composition.

The use of alloyed waste, especially multi-alloyed, is very economical. Because they contain very valuable elements such as molybdenum, vanadium, tungsten, etc. such as It has been established that the use of oxygen in electric smelting allows the use of 100% alloyed waste. In this case, the smelting time and labor costs are significantly reduced without compromising the quality of the steel.

In an electric arc furnace, in addition to scrap purchased for steel smelting, production waste and foundry waste are also used. In the practice of some plants, up to 10% of secondary cast iron is used in the charge when smelting steel in electric furnaces.

When selecting steel materials, the following conditions and the following features of steel smelting must be taken into account:

- when smelting carbon steels, the amount of alloying elements in the charge must be small;
- in all cases, charge materials of known chemical composition must be used;
- in the process of acid smelting, slag containing a minimum amount of sulfur and phosphorus must be used;
- the amount of rust and non-metallic inclusions (sand, burnt earth, etc.) in the metallic slag must be minimal;
- the ferroalloys used must be dried.

**Ferroalloys, refiners and modifiers.** Ferroalloys must meet such requirements as high content of the main alloying element, low melting point, maximum density and the necessary mechanical strength. In the production of steel castings, it is preferable to use electrothermal ferrosilicon Si45 and Si75 (GOST 1415-61).

Three types of ferromanganese are used: carbon, furnace, ferromanganese - Mn5 and Mn6 (GOST 5165-49), electrothermal ferromanganese - MnO, Mn1, Mn2 (GOST 4755-49) and metallic manganese - MnOO; MnO; Mn1; Mn2 (GOST 6008-91).

Blast furnace ferromanganese is used to produce many grades of steel. Electrothermal ferromanganese is used to regulate the amount of carbon and manganese, and metallic manganese is used in the smelting of low-carbon stainless and heat-resistant steels. Ferroalloys usually contain up to 0.30-0.45% phosphorus, which passes through manganese ores.

In recent years, silicomanganese has been widely used in the production of steel castings. According to GOST 4756-49, the amount of manganese in this alloy should be at least 65%, and silicon - 20-14% (grades SiMn20, SiMn17, SiMn14). Since the amount of carbon in silicomanganese is relatively small (up to 2.5%), it can be used instead of electrothermal ferromanganese.

Chromium is used as the main alloying component in many casting steels. The amount of chromium in electrothermal ferrochrome is at least 60-65%. The type of ferrochrome is determined by the amount of carbon in its composition. In this regard, ferrochrome is divided into 4 groups (GOST 4757-49): non-carbon - Cr0000, Cr000, Cr00; low-carbon - Cr0, Cr01; medium-carbon - Cr1, Cr2, Cr3; carbon - Cr4, Cr6.

Ferrotungsten (65-80% Ж, GOST 4758-55) in the smelting of alloy steels of a certain composition; from ferromolybdenum ( $\geq 55\%$  Mo, GOST 4759-49); from ferrovanadium ( $\geq 35\%$  V, GOST 4760-49); ferrotitanium ( $\geq 25\%$  Ti, GOST 4761-67) is also used (1,2,3). Nickel is also widely used as an alloying element in cast steels, it is placed in a metal bath or in a charge. Nickel is used in the form of plates, balls (3-8 mm in diameter) or ingots. Nickel grades are N0, N1, N2, N3 and N4 (GOST 849-56), containing 97.6-99.99% nickel. All nickel grades contain a significant amount of hydrogen. Silicomanganese for refining electric steel - Si Mn 20, Si Mn 17, Si Mn 14 (GOST 4756-49), silicocalcium, AMS (aluminum + manganese + silicon), silicozirconium and other alloys are also used. The final metal refining process is carried out using metallic aluminum in a crucible. According to GOST 295-60, aluminum has products of the first (Al-1) and second melting (Al2, Al3). Aluminum obtained during the first melting is used in the smelting of more critical steels.

A small (0.001% B) addition of ferrobore (10-12% boron) is used as a modifier, improving the mechanical properties and tempering of steel. Rare earth elements: cerium, lanthanum, prasidia, neodymium, etc. act as a useful cleaner and modifier of steel. Recently, non-ferrous metals (magnesium, zinc, bismuth, etc.) have also been used as modifiers in steel production. Numerous studies have confirmed that complex modifiers have more advantages and their wide application in the production of alloy steels has been proposed.

**4.3. Use of metallized pellets in the production of alloy steels.** Metallized pellets can become the main source of using new resources for the production of alloy steels in our country. The following metal waste is traditionally used in the smelting of steel in electric arc furnaces:

- heavy mass formations formed directly at metallurgical enterprises;
- wood chips and sawdust of machine-building enterprises;
- light waste of depreciation origin.

Waste from metallurgical enterprises is considered to be comparatively heavier and higher-quality scrap. The density of such scrap is 1.5 t/m<sup>3</sup>, it contains virtually no non-ferrous metals and non-metallic additives, its chemical composition is known and stable.

When pouring steel in a liquid aggregate state into metal molds, the amount of rolled metal waste is only 20-30% of the mass of ingots [8]. The castings are high-quality and heavy castings that are widely used in all steel smelting processes. Continuous casting of steel into crystallizers with liquid (water) cooling significantly reduces the amount of foundry waste - up to 10%. For this reason, the share of high-quality heavy scrap is sharply reduced.

The shortage of high-quality scrap during smelting in electric arc furnaces, which places high demands on the quality of the smelted steel, raises the issue of using alternative types of metal slag. Such metal materials include metallized pellets and hot briquetted iron.

A small amount of additives in metallized raw materials allows using it in two directions: obtaining high-quality metal using metallized raw materials in slag or obtaining ordinary quality steel using relatively cheap and high-quality scrap.

The bulk density of metallized pellets is high (1.2-1.5 t/m<sup>3</sup>), which is close to the bulk density intended for high-performance furnaces. Due to the fact that metallized pellets have the ability to magnetize, they are easier to transport in a warehouse and load into a furnace. However, since metallized raw materials have low thermal conductivity, they are difficult to heat and melt, which complicates the technological process of steel smelting [9].

When using metallized raw materials, cast iron, coke and electrode waste are used to increase the amount of carbon. The main requirement for the cast iron component of slag is a low content of phosphorus and sulfur. Therefore, in order to minimize the amount of phosphorus introduced into the liquid bath with cast iron, the amount of cast iron when melting in small furnaces should not exceed 10% of the charge, and in high-power furnaces - 25%.

Recently, the widespread development of industry in the country, especially construction, has sharply increased the demand for steel reinforcement. To meet this demand, new steelmaking plants have begun operating in the republic. Their production capacity exceeds hundreds of thousands of tons.

Various wastes are used as slag material in steel smelting. Currently, the demand for steel scrap is met both by domestic sources and from outside the country, for example, from Kazakhstan.

Due to the depletion of domestic resources, the rhythmic work of enterprises is disrupted, there are cases of using low-quality charge, and the quality of the produced reinforcement is reduced. Therefore, the country's reinforcement manufacturing enterprises are faced with such an important problem as finding alternative materials.

In this direction, tests are being carried out on the use of metallized iron rolls at metallurgical plants. Currently, metallized rolls and porous iron are more often used, which are products of direct reduction of iron ores, such as shale. It is known that in the technological process of obtaining reduced iron, two types of product are obtained - pellets and porous iron. The use of porous iron in steelmaking, especially in electric arc furnaces, allows for the production of high-quality and cost-effective metal that meets the high requirements of industry, including mechanical engineering, compared to blast furnace production, with low energy consumption.

Industrial production of iron from ore, bypassing the direct blast furnace process (DRI process) originated in the 1970s and has been widely used since the 1980s. The most dynamically widespread of the processes used is the Midrex process (USA). 40 million in 2007 with Midrex technology. up to 60% of the world's metal production was produced.

Other leading metallurgy producers are: Mobaraken Steel (Islamic Republic of Iran - 4 million tons), Essar Steel (India - 3.82 million tons), Hadeed (Saudi Arabia - 3.21 million tons), EZDK (Egypt - 2.32 million tons). million tons), Qatar Steel (Qatar - 1.9 million tons), LISCO (Libya - 1.75 million tons). In 2007, in Russia, one of the CIS countries, the Lebedinsky Metallurgical Plant with a capacity of 1.4 million tons was launched. Direct reduced iron is mainly used in electrometallurgy.

In 1991, the world produced about 20 million tons of non-ferrous metals, and steel production - 40 million tons. In 2007, these figures were 70 and 42 million tons, respectively. In 2011, India - 19, Venezuela - 7.7, Iran - 7.4 and Mexico - 6.3 million tons were among the countries that produced the most DRI.

These four countries currently account for 50% of the world's DRI production, and in recent years - 60% due to the growing power of India. In 2007, the world demand for metal-containing materials was 1.4 billion tons, and according to forecasts, in 2024 this figure will increase to 2 billion tons, i.e. up to 600 million tons. The main feature of this raw material, which distinguishes it from steel wire, is the low content of sulfur, phosphorus, copper, nickel, chromium and other additives. If the amount of DRI is no more than 25-30% in relation to the mass of slag, the melting process in an electric arc furnace is carried out in the usual way.

The melting technology features are as follows:

- DRI loading should be performed after the formation of liquid metal in the melting bath;
- Continuous DRI charging should correspond to the electric power supplied to the furnace;
- oxidation - the decarburization stage should be carried out simultaneously with the melting stage.

Due to the low sulfur and phosphorus content, it should be noted that the melting process is simplified with slag content. The corresponding amount of DRI in the charge is 60-70%. The greater the amount of DRI, the longer the duration of the melting phase and, accordingly, the entire melting. In high-power furnaces (over 100 tons), after melting the primary scrap, DRI is continuously loaded into the molten metal bath.

It is known that metallized iron rollers are loaded into the electric arc zone using an automatic system through a special hole made in the ceiling. The loading and melting stages are combined with the oxidation stage. Thus, continuous oxidation of carbon (bath boiling) is carried out. The degree of metallization of DRI should be within 90-97% to ensure boiling of the metal.

The amount of residual oxygen in DRI is from 1.2% to 0.6%. If the amount of residual oxygen is less than the specified limit, the bath does not boil. If the degree of metallization of DRI is insufficient, the consumption of electric energy increases significantly as a result of the endothermic reaction of regeneration of iron oxides. DRI is based on iron with a carbon content of 0.2-0.5% to 2%.

Metallized iron tubes also contain loose rock containing a small amount of unreduced iron oxides SiO<sub>2</sub> and Al<sub>2</sub>O<sub>3</sub>. The amount of loose rocks should not exceed 3-7% of the PVR weight. Lime is loaded into the smelting furnace to crush the acidic loose slag.

At the plant, the smelting process begins with loading steel scrap into the furnace, which makes up 30-40% of the slag weight. This amount is loaded into several buckets. The DRI charging rate should be the same as the electric power supplied to the plate. To match, the bath temperature should be 30-40 degrees higher than the melting point of the metal.

The reason for this is that if the temperature is lower than this, the duration of the melting process is extended. Another reason is that mixing the metal increases the melting of the DRI, degassing the bath and the formation of the desired metal composition at the end of the cycle. To ensure the boiling of the bath, a certain amount of carbon must be present in the metallized raw material.

If the amount of carbon is insufficient, a carburizer is blown into the bath to ensure the boiling of the bath. Since the amount of sulfur and phosphorus in the DRI is small, the slag basicity is likely to be lower than when melting a conventional charge ( $B = 1.5-2.0$ ).

Metallized pellets (MPR), a product of direct extraction of iron from ore, are widely used throughout the world. The pure raw material obtained by this process meets the high requirements of DRI and steel smelted on its basis.

The need for steels that meet world standards is met. Scrap metal, used several times, and mainly metallic, does not have such qualities.

In other countries, there are practically no sources of steel scrap and waste used in steel smelting. Therefore, for this purpose, the use of other, i.e. alternative materials is expanded. Such materials include metallized pellets (DRI) and hot briquetted iron (HBI).

Therefore, the first results of the trial smelting, observed at the steel foundry of Baku Steel Company LLC, showed that the use of metallized pellets in the charge materials, constituting 25-30% of the total mass of the charge, did not change the technological process of smelting, and the alloy steel complied with the standard and allowed the production of products. This, in turn, opens up wide opportunities for the efficient use of local resources in the production of alloy steel [10].

**4.4. Theoretical justification for the production of alloy steel based on local resources.** One of the most important tasks of manufacturing alloy products using local resources is to study their complex influence on the interaction of alloying elements in the production of metal alloys.

It should be noted that this issue has never been studied. This problem is caused by rare earth elements such as boron, etc. The role and effect of minor additions can also be explained. Until this problem is solved, it is impossible to create a theory of alloying steel and other alloys, the solution of which will ultimately allow "designing" a material with any specified properties.

A lot of work has been devoted to the problem of economical alloying of steels and alloys for a particular purpose. Depending on the raw material resources of each country, specific problems in this area and the ways to solve them vary in different countries. The relevance of this problem is due to the increasing requirements for metal alloys and the complexity of their alloying.

In recent years, in order to improve the properties of steels, in addition to alloying, the effect of external energy fields of various origins is used due to melting and (or) casting in a vacuum, as well as the introduction of small additives of the above substances and elements. Achievements in this direction allow us to note workarounds for saving alloying additives.

Our analysis of the role of alloying and other factors shows that special processes and phenomena occurring in steels of one purpose or another, as well as processes occurring in any material regardless of its purpose, are influenced either by the energy of interaction of elements or by the influence of the latter on the ratio and strength of the types of interatomic bonds.

The simultaneous influence of the intercrystalline layer of two or more factors can be accepted as a hypothesis explaining the phenomena we observe in steel production using local resources. Therefore, the

development of theoretical foundations for alloying steel under conditions of using local resources is relevant [11, 12].

The main raw materials used were Dashkesan ore (59-61% Fe) and concentrate (65-67% Fe) and metallized pellets from this concentrate (92-98% Fe), as well as local quartz sand for ferrosilicon. The main focus of the research was low-carbon low-alloy steel 13KhFA, used in pipes for the oil and gas industry.

Chromite ore containing 43.5-52.6% Cr<sub>2</sub>O<sub>3</sub> was used to obtain chromium as an alloying component. After the reduction of Cr<sub>2</sub>O<sub>3</sub> oxide, the amount of pure chromium was 99.5%. Chrome ore deposits are located in the Kalbajar and Lachin regions of Karabakh liberated from occupation. There is an 8.5 million rub. tons coal mine in the Karabakh region. It can be used as a carbon supplier in the production of steel and cast iron. Vanadium added to 13XΦA steel is in the liquid alloy in the form of ferrovanadium. In addition, the country produces 290 thousand tons of petroleum coke per year, which can be used as a carbon supplier in the production of steel and ferroalloys.

Considering that structural steels are the most important in terms of quantity for general and special engineering, we conducted research on the production of low-carbon low-alloy steel 13KhFA based on local resources.

Steel is obtained from a charge consisting of selectively selected metal waste with the addition of 20% of metallized rolls. Steel smelting in a 50-ton Siemens arc furnace was purchased from Baku Steel Company LLC. Chromium and vanadium were introduced into the furnace during out-of-furnace processing. Steel was poured into profiles on a continuous casting machine (CCM) [13,14]. It is known that alloying elements in 13XΦA steel form solid solutions with ferrite, which, according to Kurnakov's law, to one degree or another increases its hardness and tensile strength. In the state of equilibrium or near it, the degree of strengthening of ferrite is somewhat greater, the greater the distortion of the α-iron lattice due to the elements dissolved in it. In this case, the distortion of the lattice probably causes a stronger strengthening of the solid solution than its expansion. Therefore, all other things being equal, the increase in the strength of ferrite is greater, the greater the difference in the atomic radii of α-iron and the alloying element dissolved in it. Considering that Cr and V have the same type of lattice as α-iron, therefore, despite their good solubility in iron, it is not fair to expect a strong distortion of the α-Fe lattice and a noticeable increase in strength, since the solution is not supersaturated [15, 16].

All of the above factors unconditionally determine the "structural sensitivity" of the mechanical properties of alloyed ferrite. However, although their influence is significant, these factors are indirect factors. In this case, the strength of the interatomic bonds of the iron frame changes, which is determined by the interaction energy of the corresponding elements [17, 18].

As can be seen from the true stress diagram for natural ferrite in 13XΦA steel, the alloying elements - Cr and V significantly increase the initial hardening coefficient, characterized by the angle of the first section of the diagram to the abscissa axis. The hardening coefficient increases due to the strongest vanadium, which also increases the tensile strength.

According to some American scientists, when alloying ferrite with several elements at the same time, its reinforcement is subject to the law of additives. According to this law, the resistance of complex-alloyed ferrite to small and large plastic deformations is determined by the elements included in its composition that strengthen it the most. However, neither of these conditions is suitable for the simultaneous participation of elements by the strength of interatomic bonds in the ferrite lattice. Both conditions have not been confirmed experimentally for ferrite in the natural and normalized state in our studies.

It should be noted that the relative elongation in the normalized state of 13XΦA steel in ferrite containing a small amount of alloying elements (Cr, V) is almost as natural.

An increase in the strength of annealed and normalized steel due to alloying elements is usually not accompanied by a decrease in its ductility, which is usually expressed by relative elongation and compression. Such behavior of steel completely satisfies us for pipes intended for oil and gas production, since in this case the preservation of ductility and, obviously, impact toughness remains the main requirement of oil workers for sufficient pipe strength.

## 5. Results.

1. The regularities of physicochemical and metallurgical processes of smelting low-carbon low-alloy steel grade 13XΦA in an electric arc furnace using local resources, including Dashkasan iron ore and concentrate, metallized pellets and alloying elements - Cr and V, were established. The superior role of ferrite alloyed with Cr and V in structural steels in the formation of strength and plastic characteristics was established.

2. It was determined that the physicochemical processes occurring in steels of various purposes, as well as regardless of the purpose of any material, can be explained by two cases: the interaction energy of alloying elements, the influence of energy on the ratio of interatomic bond types and strength, or intercrystalline force in the composition of two and or with several factors simultaneously with its special structure. The explanation that we accept on the basis of the study is currently put forward as a hypothesis. To fully confirm this hypothesis, it is necessary to continue theoretical and experimental research.

## Özet

Günümüzün en önemli toplumsal sorunlarından biri olan kadına şiddet yalnızca Türkiye’de değil küresel boyutta bir sorun olarak karşımıza çıkmaktadır. Kadınlar, bakıldığında çoğunlukla eşleri ya da partnerleri tarafından şiddete maruz kalmaktadır. Bu durumun başlıca nedenlerinden biri olan toplumsal cinsiyet eşitsizliği ataerkil sistemi beraberinde getirmiştir. Kadın cinayetlerinin artmasıyla birlikte, kadın cinayetleri haberleri de medyada yoğun bir şekilde yerini almaktadır. Toplumsal bir sorun olarak nitelendirilen kadın cinayetlerinin medyada nasıl sunulduğu bu çalışmanın temel konusunu oluşturmaktadır. Bu çalışmada 2022 yılında Türkiye’de çocukları tarafından işlenen kadın cinayetlerinin Sözcü Hürriyet ve Sabah gazetelerinde sunumu ele alınmıştır. Söz konusu gazetelerin seçilmesinin nedeni, farklı yayın politikalarına sahip olmasıdır. Kadın cinayetleri tüm toplumlarda yaşanan toplumsal bir sorundur. Bu nedenle çalışmaya konu olması önem taşımaktadır. Farklı ideolojik kimliğe sahip gazetelerin haberlerini okurlarına kendi ideolojik bakış açılarıyla sunup sunmadıkları Teun Van Dijk’in eleştirel söylem analizi yöntemiyle, makro düzeydeki şematik ve tematik boyutlarıyla incelenmiştir. İncelenen bulgulara göre farklı yayın politikalarına ve farklı ideolojik kimliğe sahip olmalarına rağmen, yapılan analizlerde kadın cinayetlerindeki haberlerin söylem ve sunuş biçiminde benzerlik gösterdiği gözlenmektedir. Farklı yayın politikalarına sahip olsalar da gazetelerin kadın cinayetlerine karşı tutumu genel olarak benzerdir. Dolayısıyla haber söylemleri belirli kalıplarla üretilmiştir. Sözcü gazetesi bir haberde eleştirel yaklaşıma çalışmıştır. Genel olarak farklı ideolojik kimliğe sahip gazetelerde söz konusu başlıklarla ilgili farklı söylem ve sunuş biçimine rastlanmamıştır.

**Anahtar kelimeler:** Kadın cinayetleri, medya, habercilik, eleştirel söylem.

## Abstract

Violence against women, one of the most important social problems of today, is a problem not only in Turkey but also on a global scale. Women are mostly subjected to violence by their husbands or partners. Gender inequality, one of the main reasons for this situation, has brought about the patriarchal system. As the number of femicides increases, news about femicide also appears heavily in the media. The main subject of this study is how femicides, which are described as a social problem, are presented in the media. In this study, the presentation of murders of women committed by their children in Turkey in 2022 in Sözcü Hürriyet and Sabah newspapers was discussed. The reason why the newspapers in question were chosen is that they have different publishing policies. Femicide is a social problem experienced in all societies. Therefore, it is important to be the subject of the study. Whether newspapers with different ideological identities present their news to their readers from their own ideological perspectives was examined with Teun Van Dijk's critical discourse analysis method, with macro-level schematic and thematic dimensions. According to the findings examined, although they have different publishing policies and different ideological identities, it is observed in the analysis that the news about femicides are similar in the way of discourse and presentation. Even though they have different publishing policies, the attitude of newspapers towards femicide is generally similar. Therefore, news discourses are produced with certain patterns. Sözcü newspaper tried to be critical in a news article. In general, no different discourse and presentation style regarding the topics in question was found in newspapers with different ideological identities.

**Keywords:** Femicides, media, journalism, critical discourse.

## Giriş

Günümüzün en önemli toplumsal sorunlarından biri olan kadına şiddet yalnızca Türkiye’de değil küresel boyutta bir sorun olarak karşımıza çıkmaktadır. Kadınlar, bakıldığında çoğunlukla eşleri ya da partnerleri tarafından şiddete maruz kalmaktadır. Bu durumun başlıca nedenlerinden biri olan toplumsal cinsiyet eşitsizliği ataerkil sistemi beraberinde getirmiştir. Nitekim geçmişten günümüze kadar kadın, ataerkil toplum yapısı içinde her zaman ikinci plana atılmıştır (Güneş ve Yıldırım, 2019: 938). İstatistiklere bakıldığında kadın cinayetleri her yıl artış göstererek devam etmektedir. Kadın Cinayetlerini Durduracağız Platformu’nun verilerine göre Türkiye’de sadece 2022 yılında 334 kadın öldürülmüştür. Bu kadınların 154’ü evli olduğu erkek, 35’i birlikte olduğu erkek, 27’si eskiden birlikte olduğu erkek, 26’sı akrabası, 19’u eskiden evli olduğu erkek, 19’u tanıdık birisi, 17’si babası, 10’u oğlu, 6’sı kardeşi, 4’ü tanımadığı biri, 1’i kendisini bir süredir takip eden erkek, 1’i hastası, 1’i işvereni, 1’i üvey babası tarafından öldürülmüştür. Tüm bunlar göz önünde bulundurularak kadınların toplumlarda tek taraflı olarak yok edildiği söylenebilmektedir. İnsan hakları açısından bir insan hakkı ve özgürlük ihlali olan kadına yönelik şiddeti görünür kılabilecek en önemli araç medyadır. Toplumsal bir sorun olan kadın cinayetlerinin medyada haber

sunumu oldukça önemlidir. Nitekim medya haberlerde kullandığı dil yapısı, haber verme biçimi ile belirli bir ideoloji yeniden yapılandırmaktadır.

Mevcut uygulamalarıyla halkın görüş ve davranışlarını şekillendirmede önemli bir role sahip olan medyanın cinsiyetçi bir bakış açısına sahip olduğu ve mevcut bakış açısıyla haberlerin içeriğini doldurduğu görülmektedir. Halkın düşünce yapısını değiştirmekle kalmayıp toplumun davranış biçimini yansıtan simgeleri de kendince tanımlayan medya, özel alanda yaşanan şiddet, tecavüz, emek sömürsünü deşifre ederek kadını eril iktidarına göre konumlandırmaya devam etmektedir (Akca ve Tönel, 2011: 16). Bunu yaparken de toplumun bilgi edinme yolu olan haberleri kullanan medya cinsiyetçi söylemini, haberler üzerinden yeniden kurgulamaktadır. Hayatı anlamlandırmada toplumun başvurduğu bir kaynak olan haberlerde kadın imgesini eril bir bakış açısıyla kurarak toplumu da eril bir bakış açısıyla düşünmeye sevk eden medya, özellikle kadının konumunu yeniden inşa etmede başat bir rol de üstlenmektedir. Kısacası egemen cinsiyetin sözcülüğünü yapan medyanın ideolojik işlevi milliyetçi ve cinsiyetçidir (Akca ve Tönel, 2011: 22).

Kadın cinayetleri günümüzde hem yeni medyada hem de geleneksel medyada hemen hemen her gün yerini almaktadır. Medya bu haberleri hassasiyetle çerçevelenmiş bir haber söylemiyle aktarmaya çalışmaktadır. Bununla birlikte kadın cinayeti haberlerinin medyada sık haberleştirilmesinin de söz konusu olayların yaygınlaşmasında ve her geçen gün artmasında olumsuz da olsa bir rol oynadığı varsayımı da yaygın bir varsayım olarak ortadadır. Çünkü bazı kesimlere göre “yine kadın cinayeti” ya da “yine kadın... yine cinayet...” gibi ikilemeli eklerle sunulan haberler ile söz konusu durum ve meydana gelme sıklığına duyulan tepki ve öfke işaret edilirken, maalesef bu durum söz konusu olguyu meşrulaştırmakla birlikte, bazı insanlar için olumsuz bir örnek niteliğinde de olabilmektedir (Yegen, 2014:20).

### **Suç ve Medya**

Medya, günümüzde bireylerin sosyalleşme sürecinde, iş, aile, okul ve arkadaşların da içinde bulunduğu dış çevre ile olan ilişkiler kadar önemli yer tutmaktadır. Medyada suç içeren davranışların gösteriliş şekilleri, şiddeti normalleştirmeye kadar giden bir sürecin ortaya çıkmasına neden olabilmektedir (Güleç vd. 2012: 113). Değişik alanlarda yapılan bilimsel araştırmalar, kişilerin suç işlemesine neden olan faktörler üzerinde durmuştur. Konuyla ilgili yapılan araştırmalar, medya ve suç ilişkisini inceleyerek medyada gösterilen suç davranışlarının şiddet eğilimine neden olduğunu vurgulamıştır (Anderson vd. 2015: 7). Özellikle çocuk ve gençler tarafından izlenen şiddet ve saldırganlık temalı medya programlarının, agresyon, yüksek düzeyde uyarılmışlık hali, depersonalisasyon ve sosyal izolasyona neden olduğu bildirilmiştir (Bushman ve Huesmann, 2006: 348).

İnsanlık tarihi kadar eski olan suç, medyanın var olmasıyla beraber, farklı görünümelerde ortaya çıkmıştır. Suç yelpazesi altında yer alan şiddet, eski dönemlerde, karşılıklı yapılan savaş oyunları ve rekabet içeren oyunların bir parçasıyken, günümüzde teknolojinin ilerlemesiyle beraber denetimli bir şekilde medya araçlarının bir ürünü olarak yerini almıştır. Çeşitli medya organlarının toplumsal ve sosyal olaylarla beraber işlenmiş olan suçları iletme biçimi, kişilerin söz konusu olaylara bakış açısını büyük ölçüde etkilemektedir. Bu yüzden radyo, televizyon, bilgisayar, gazete gibi medya araçlarına, suç davranışlarının sosyal temsili açısından önemli görevler düşmektedir (Farrall vd. 2009: 112).

Radyo, televizyon, gazete ve internet gibi medya araçları, kitle iletişimine yönelik değişik tanımlar oluşturarak ve bazen objektif olmayan sunumlar yaparak bireylerin tutum ve algılarını etkileyebilmekte, duygu ve davranışların değişimine sebep olabilmektedir (Tulloch, 2000: 453).

### **Kadın Cinayetleri**

Cinayet en basit tanımıyla bir kişinin bir başka veya birçok kişiyi öldürmesidir. Birden fazla tanımı olan cinayet, tüm toplumlarda suç olarak kabul edilmektedir. Bundan dolayı toplumlarda, medyada sunulan cinayet olgusu oldukça önemlidir. Töre cinayetleri, kan davası sebepli cinayetler, kadın cinayetleri çocuk cinayetleri tüm dünyada görülen cinayet türleridir. Bazı türlerin toplumların yapısı gereği görülme oranı diğer toplumlara göre fazladır. Örneğin Türkiye de töre kaynaklı cinayetlerin diğer toplumlara göre yaşanması daha yaygındır.

Kadın cinayetleri Türkiye’de son yıllarda hızla artan bir sorun halini almıştır. Hemen her gün yazılı ve görsel medyada kadın cinayeti haberleri ile karşılaşmaktayız. Medyada yer alan kadın cinayetleri genellikle namus ve töre ya da kıskançlık konusunda öne çıkmaktadır. “Namus” Türk toplumunda önemli bir kavram olarak görülmekte ve kişilerin yaşam nedeni olabilmekte, hatta uğrunda canlar bile alınabilmektedir. Kadın hem kendi hem de ailesi için namusunu korumakla görevlendirilmektedir. Her gün gazetelerde namus gerekçesiyle kadına yönelik şiddet haberleri verilmektedir. (Işık ve Uğurlu, 2009: 17)

Temel insan hakları bağlamında birçok modern toplumda eşitlik savunusu yapılsa da, toplumsal cinsiyet eşitsizliğinin hala önemli bir sorun olduğunu vurgulamak yerinde olacaktır. Toplumsal cinsiyet eşitsizliği kaynağını iktidar ilişkilerinin bir sonucu olarak toplumun kadın ve erkeğe ilişkin algısından almaktadır. Biyolojik cinsiyetin toplumsal cinsiyet halini almasındaki en önemli nokta, sosyal yaşamın ortak mecra ve mahrem mecra şeklinde ayrılması ile mahrem mecranın kadın temelli ifade edilmesidir. Söz konusu dönüşüm neticesinde kadının yaşamı hane içi yani ev ile kısıtlanır ve ona namusunu koruma görevi biçilir. (Şimşek, 2011: 120) Erkek kadın namusuna helal getirirse bir aile bireyi olarak devreye girmektedir. Koçtürk’e göre (1992), erkekleri kadınların

“namusunu korumak ile görevlendiren inanç gücünü, Türkiye’de de benimsenen ataerkil sistemden almaktadır. (UNDP, 2005’ten akt. Işık ve Uğurlu, 2009: 17)

“Kadın cinayeti” kavramı ilk kez Diana Russell tarafından “kadınların kadın düşmanı erkekler tarafından öldürülmesi” şeklinde tanımlanmıştır (Russell ve Radford, 1992: 211). Russell, kadına yönelik şiddeti incelediği çalışmasında “femicide” kavramını “kadınların, kadın oldukları için öldürülmeleri” anlamında kullanmıştır. Dolayısıyla “kadın cinayetleri”, toplumsal cinsiyet rollerine uymadıkları gerekçesiyle öldürülen kadınlar için kullanılan bir kavramdır (Gazioglu, 2013, s.92).

Erkekler, daha çok bireysel çatışmalar ve silahlanmalar nedeniyle yaşamlarını yitirirken, kadınlar ve kız çocukları ise çoğunlukla ömür boyu fiziksel, cinsel ve psikolojik istismarlara maruz kalmakta ve bunun sonucunda öldürülmektedir (Butchart ve Mikton, 2014: 938). Bu durum aslında ataerkil sistem içinde açık bir şekilde, “çizgiyi aşmayın, bu hayatınıza mal olabilir” mesajını vermektedir. Bu mesajı yaygınlaştıran, meşru kılan ve şiddet kültürünü besleyen en önemli araç ise medya olmaktadır (Güneş ve Yıldırım, 2019: 938). “Çizgiyi aşmayın, bu hayatınıza mal olabilir” mesajı, töre bakımından ele alınıp özetle söylendiğinde “törenin gereğini yapın, karşı gelmeyin; yapmazsanız ölümü göze alına dönüşmektedir (Özer, 2019: 86-94).

Medya toplumsal sorunları görünür kılmak için önemli bir iletişim alanıdır. Birçok soruna çözüm bulmak için kullanılacak araçların başında gelen medya, haksızlıklara uğrayan birey ve toplulukların sesi olması gerekmektedir. Hem toplumsal sorun olan hem de hak ihlali olan kadın cinayetlerinin medya da sunumu oldukça önemlidir. Haberde kullanılan dil ve söylemler ataerkil sisteme hizmet etmekte ve belli bir ideolojiyi yeniden üretmektedir. Böylece toplumsal cinsiyet eşitsizliği normalleştirilmektedir. Örneğin kadın cinayetlerinde sunulan sebepler sürekli olarak verilmektedir. Bu durumda okuyucu veya izleyici tarafından zaman içinde haklı nedenler olarak normalleştirilerek kabul edilmesini sağlamaktadır. Gerek geleneksel medya da gerekse yeni medya da bu sorun oldukça fazla görülmektedir.

### **İnternet Haberciliği**

Yıllardır gelişen internet geleneksel medyaya kaynak olmakla birlikte internet haberciliği ile haberciliğe bir boyut katmış ve tehdit unsuru oluşturmuştur. Özgür, her yere hızlı ulaşabilen internetin geleneksel medyadan ayıran en önemli özelliği tek yönlü iletişimin aksine geri dönüşlü olabilmesidir. Çakır’a göre de (2007: 125-126) internet ile sağlanan birebir iletişim anında, etkileşimli şekilde gerçekleşmekte, içerikler her an yenilenebilmekte ve haberler her an güncellenebilmektedir. Bu durum, internet haberciliğinin öbür kitle iletişim araçlarından ayrılan yanlarına işaret etmektedir. Çakır internet gazeteciliğinin Türkiye’de yaygınlaşmasını yaşanan ekonomik krizin medya sektörünü etkilemesi ve bu durumun bir sonucu olarak 4000’e yakın medya çalışanının işsiz kalmasına bağlamaktadır. İşsiz kalan gazeteciler, büyük meblağda bir yatırım gerektirmeyen internet gazeteciliğini hem seslerini duyurmak hem de işlerini yapmak için bir mecra bağlamında kullanmaya başlamışlardır. İnternet haberciliği gelişen iletişim teknolojileri sayesinde özellikle son yıllarda Türkiye’de hızla popülerleşmiştir. İBS’in Türkiye’deki internet kullanıcılarına yönelik yaptığı araştırmaya göre "sanal gazetecilik" konusunda bilgi sahibi olanların oranı %82’ye, internetten gazete okuyanların oranı ise %60’lara ulaşmıştır. (Çakır, 2007)

*“İnternet gazeteciliğinin gelişim süreci üç dönemde ele alınmaktadır. 1990’lı yıllarda başlayan, gazetecilerin içeriklerini geleneksel gazete için hazırladıkları ve gazetenin web sayfasına göre yeniden haberleri tasarladıkları devir, birinci dönemi; 1996-1997 yıllarında başlayan, gazetecilerin web sayfaları için özgün haber ürettikleri, okuyucunun çeşitli sınıflandırılmış haber ve enformasyona kendi seçimiyle etkileşimli bir şekilde ulaşabildikleri devir, ikinci dönemi; okuyucuların haberi sadece okuyup kalmadıkları, içine girerek üç boyutlu şekilde dolaşabildikleri devir, üçüncü dönemi oluşturmaktadır.” (Tokgöz, 2003: 81-82’den akt. Kacur ve Bostancı, 2012)* İnternet gazeteciliği temelindeki internet haberciliği, bazı özellikleri ile geleneksel gazeteciliğe benzese de, geleneksel gazeteciliğin önemli değişimler geçirmesine sebep olmuştur. (Bekiroğlu ve Kutlu, 2010).

*“Türkiye’de en fazla alternatif olma özelliği taşıyan alan internet gazeteciliği ya da internet haber siteleridir. Birçoğu “haber gözlemi” ve “haber eleştirisi” yapmalarına karşın, internet haber siteleri, aynı zamanda, ideal habercilik ölçütlerinin ne olması gerektiğine ilişkin de önemli ipuçları sunmaktadırlar. Haberlerin güncellenmesi ve hızlığı, diğer habercilik türlerine göre okuyucu/izleyiciyle karşılıklı etkileşim esasına dayalı oluşları ve düşük bir maliyetle iş yapmaya olanak sunmaları nedeniyle birçok avantajlara sahiptirler.” (Köse, 2007: 353’ten akt. Tuğla, 2014: 311)*

İnternet haberciliği getirdiği birçok olanak ile haberciliği kolaylaştırmıştır. Örneğin haberin daha hızlı yayınlanması, kolay bir şekilde kitlelere ulaşabilmesini yorum ve katkıya olanak sağlamıştır. Bu olanakların beraberinde ise haberciliğe yeni etik sorunları getirmiştir. Örneğin yapılan haberlerin hızlı bir şekilde yayınlanması gerektiği için gazeteci farklı sitelerden masa başı gazetecilik yapabilmektedir. Başka bir sorun ise internet haberciliği yapan sitelerin gelir kaynaklarından biri olan reklamlar sitede fazlaca gösterilmekte ve haberler ile iç içe geçmektedir. Bu durumda haber sitesinin güvenilirliğini ve gazetecilik mesleğinin prestijini sarsmaktadır. Ayrıca bir diğer etik sorun ise daha fazla tıklanma için birçok haber sitesinde haber başlıkları haber içeriği ile farklılık göstermektedir. Bu durum ile internet gazeteciliği, gazeteciliğin geleceği konusunda kaygıları beraberinde getirmektedir.

### Çalışmanın Önemi Yöntemi ve Amacı

Çalışmanın konusunu 2022 yılında Türkiye’de çocuğu tarafından işlenen kadın cinayetlerinin farklı ideolojik kimliğe sahip gazetelerin sunumu oluşturmaktadır. Bu yılın seçilmesinin nedeni, çalışmaya başlanmasına kadar olan sürede en fazla kadın cinayetinin işlendiği yıl olmasıdır. Söz konusu gazetelerin seçilmesinin nedeni ise farklı ideolojilere sahip ve Türkiye’de en çok okunan gazeteleri arasında yer alan üç gazetenin internet haberciliğinde kadın cinayeti ile ilgili haber başlıkları incelenmiştir.

Bu çalışmanın amacı, kadın cinayeti haberlerinin farklı yayın politikalarına sahip gazetelerin sahip olduğu ideolojik kimlik çerçevesinde, kadın cinayetleri haberlerinin sunumunda farklılık yaratıp yaratmadığı ortaya çıkarılmaya çalışılmıştır. Bu çalışmada aşağıdaki sorulara cevap aranacaktır:

1. Söz konusu gazetelerin farklı yayın politikalarına sahip olması kadın cinayetleri haberlerinin sunumunda farklılık göstermekte midir?

2. Türk basınında yer alan kadın cinayeti haberlerinde kadınlar hangi imgeyle sunulmaktadır?

Kadın cinayeti konulu haberlerin gazetelerde nasıl sunulduğunu analiz etmek için, farklı yayın politikalarına sahip Hürriyet Gazetesi Sözcü Gazetesi ve Sabah Gazetesi’nde yayınlanan haberlerin incelendiği bu çalışmada, Teun Van Dijk’in eleştirel söylem analizinin kullanılmasına karar verilmiştir.

Çalışmada, Hürriyet Sabah ve Sözcü gazetelerinin çevrimiçi versiyondaki haber metinleri birer söylemsel materyal olarak ele alınarak incelenmiştir. Teun Van Dijk’in söylem analizi “önermeye dayalı söylem analizi” şeklinde kabul edilebilir (Sözen, 1999, s. 124). “Eleştirel Söylem Analizi, metin yapılarını incelemekle sınırlı kalmamakta; anlamları, fikirleri de ortaya koymayı amaçlamaktadır” (Sözen, 2014, s. 122). Söylem kavramına toplumsal denetim aracı uygulaması açısından önem atfeden Van Dijk bu denetimin sağlıklı olabilmesinin söylem denetimi ve yeniden üretimine bağlı olduğunu ifade etmektedir (Van Dijk, 1999, s. 335).

Eleştirel yaklaşıma göre, “haberler yapılandırılmış bir süreçtir ve haber üretim süreci, haberin nesnel ve tarafsız olarak yansıtılabileceği yanılsaması üzerine kurulmuştur” (Aktaran: Karaduman ve Akbulutgiller, 2018, s. 15). “Teun Van Dijk’in eleştirel söylem analizi modeli makro yapı ve mikro yapı olmak üzere iki ana bölümden oluşur” (akt. Selçuk, Şeker 2012, s. 14).

Bu modelde de makro yapı, tematik analiz ve şematik analiz olarak iki başlık altında incelenmektedir. Makro yapı çözümlemeleri tematik ve şematik yapı üzerinden ele alınmaktadır. Makro yapı kapsamındaki tematik çözümlemede, haberi başlığı, haber girişi ile fotoğraflar bu bölümlerin birbirleriyle olan ilişkisi ele alınmaktadır. Şematik yapıda ise ana olay ve sunuş biçimleri, artalan, bağlam bilgisi ile kaynak bilgisi irdelenmiştir (akt. Erciyes, Öztunç 2021, s.237). Bu çalışmada tematik ve şematik bölümler analiz edilerek bulgular değerlendirilmiştir.

### Evren ve Örneklem

Kadın cinayeti haberlerinin internet haberciliğinde sunumunu ele alan bu çalışmanın evrenini, farklı ideolojik kimliklere sahip gazetelerde çocuğu tarafından öldürülen kadın cinayeti haberlerinin sunumu oluşturmaktadır. Söz konusu evren içerisinde seçilen ve örneklem olan farklı ideolojik yapılara sahip olan Hürriyet Gazetesi, Sözcü Gazetesi ve Sabah Gazetesi’nde yayınlanan kadın cinayeti konulu haberler ise içerik analizi yöntemi ile Jan Van Dijk eleştirel söylem analizi bağlamında yorumlanmasını içermektedir.

### Araştırmanın Sınırlılıkları

Bu araştırma Türkiye’de en çok okunan 3 büyük ulusal gazete olan Hürriyet, Sabah ve Sözcü gazetelerinin internet yayınlarını kapsamaktadır. Çalışma, 2022 yılında çocukları tarafından öldürülen kadınların haberleri yapılan inceleme ile sınırlandırılmıştır.

### Makro Yapıya Yönelik Tematik Analiz

#### Başlıklar

Gazetelerin ilk bakışta en dikkat çeken bölümü başlıklardır. Haber başlıkları olayın en önemli kısmını ve haberin ne ile ilgili olduğu hakkında okuyucuya bilgi aktaran kısmıdır. Birçok okuyucu haberleri başlığına göre okumaktadır. Eğer başlık ilgi çekiciyse, daha fazla okuyucuyla buluşmaktadır. Haberin ana temasının anlaşılmasında başlıklar önemli bir yere sahiptir (Doğan, 2009, s. 301). Van Dijk’e göre haberin başlıkları ve girişleri haber metninin makro önermesini oluştururlar. “Başlıkta kullanılan durum tanımları daha çok ana olaya ilişkin yargılar ya da haber aktörlerinin sözel tepkilerinin alıntılanmaları şeklinde kendini gösterir” (Doğan, 2009, s. 302). Sabah, Sözcü ve Hürriyet gazetelerinin haber sitesinde çocukları tarafından öldürülen kadın cinayetleri ile ilgili 2022 yılında yapılan haberler Tablo 1-2 ve 3’te görülmektedir.

### Haber Girişleri

Haber girişleri, başlıktan sonra konunun asıl özetlendiği bölümdür. Haber içeriğinin ne olduğunun ana teması hakkında ipucu verildiği kısımdır. Haber girişlerinde yeterli bilgi verilir ise okuyucu haberi okumadan bilgi sahibi olur bu durumda da haber içeriği ile tam olarak ilgilenmez. Van Dijk’e göre “Tematik yapılar, başlıklar, haber girişleri ve spotlardan oluşan makro yapıların, haberin özeti niteliğinde olduğunu söyler. Haberin tematik analizinde girişler de habere dair çerçeveyi çizerken ve neyin önemli olduğunun tespit edilebilmesinde haber söyleminin önemli bir parçasını oluşturmaktadır” (Van Dijk, akt. Kaya, 2009, s. 352). Gazetelerin çocuğu

tarafından öldürülen kadın cinayetleri ile ilgili olarak haber girişlerinden aktardığı bilgiler Tablo1-2 ve 3'te gösterilmektedir.

### **Fotoğraflar**

Haberde olaya ilişkin kullanılan görseller, okuyucuya kanıt niteliğindedir. Yaşanan durumun görseller ile aktarılması okuyucu/izleyici üzerinde etki bırakmaktadır. Haberin önemli bir bölümü olan fotoğraflar haber metnini desteklemektedir. "Fotoğraf, bir yandan habere gerçekliğin kazandırılması, güvenilirliğin ve inandırıcılığın sağlanması sağlarken diğer yandan da tanıklık etme görevini yerine getirmektedir" (İşkar, 2014, s. 110).

Berger'e göre "görüntü/fotoğraf, bazen eklenen sözü aydınlatırken, bazı durumlarda da fotoğrafa eklenen söz, okuyucunun o fotoğraf üzerinde nasıl düşünmesi gerektiğini gösterici bir işlevi yerine getirmektedir". (Berger, 2002, s.10 aktaran İşkar, 2014, s. 110) Gazetelerin çocukları tarafından öldürülen kadın cinayeti haberleri ile ilgili olarak haberlerde kullanılan fotoğrafların aktardığı bilgiler Tablo:1-2 ve 3'te gösterilmektedir.

### **Makro Yapıya Yönelik Şematik Analiz**

#### **Ana Olay ve Sunuş Biçimleri**

Olaylar çoğu zaman giriş ve başlıkta bahsedilen konuyla ilgilidir. Haberlerin sunuş biçiminde farklı ideolojik düşünceleri görmek mümkündür.

#### **Artalan ve Bağlam Bilgisi**

Artalan bilgisi olayların sosyal ve politik yönünü yansıtmakta olduğundan dolayı önemlidir. Bir olay haber metnine dönüştürülürken mutlaka değişime uğramaktadır. Anlam ve artalan bilgisi genel olarak haberlerde ya eksik ya da hiç verilmeyerek, haberleştirilen olay kendi bağlamından koparılır ve haberi yapan kişinin algısına göre yorum katılarak okuyucuya sunulur. Olayın sosyal, politik ve tarihsel yönünü bilmek olayı anlaşılır kılmakta ve neden sonuç ilişkisi kurarak haberdeki gömülü ideolojinin çıkarılıp anlamlandırılmasını sağlamaktadır (Van Dijk, 1988, s. 54).

#### **Haber Kaynakları**

Haber kaynakları birincil ve ikincil olarak ayrılmaktadır. Birincil kaynaklar çoğunlukla olay içinde bulunan kişiler ve kişilerdir. İkincil ise olaylara dair dolaylı olarak bilgi alınan kişi veya belgelerdir.

#### **Bulgular**

Farklı ideolojik kimliklere sahip olan Sözcü, Sabah ve Hürriyet gazetelerinin çevrimiçi versiyonlarında 2022 yılında yer alan çocuğu tarafından öldürülen kadın cinayetlerinde tespit edilen konu ile ilgili haberlerin başlıkları haber girişleri ve fotoğraf içeriklerine Tablo:1 Tablo:2 ve Tablo:3 de yer verilmektedir. 2022 yılında çocuğu tarafından öldürülen kadın cinayetlerine yönelik haberlerle ilgili Sözcü Gazetesinde 7, Hürriyet Gazetesinde 9, Sabah Gazetesinde 4 haber yer almıştır. Makro yapıya yönelik tematik ve şematik analizler gazetelere göre ayrı ayrı değerlendirilmiştir.

### **Makro Yapıya Yönelik Tematik Analiz**

#### **Hürriyet Gazetesi Başlıkla İlgili Bulgular**

Hürriyet gazetesinde yer alan haber başlıkları incelendiğinde genel olarak ölen kişinin anne olduğu, çocuğu tarafından öldürüldüğü ve ne şekilde öldürüldüğü bilgisi verilmektedir. Bazı başlıklarda yer zaman bilgisi verilmemiştir. 1 no'lu başlıkta 'Tartıştığı annesini, boğazından bıçaklayarak öldürdü!' başlığına bakıldığında nerede öldürdüğü ne için tartışma yaşandığı neden öldürdüğü belli değildir. 4 no'lu başlıkta 'Esenyurt'ta ailesini katletti! Ölü sayısı 4'e yükseldi...' başlıklı haberde öldüren kim ve ne için ailesini katlettiği bilgilerine ulaşılamamaktadır.

5 no'lu başlıkta 'Annesi içerideyken evi ateşe verdi! Tutuklandı' başlıklı haberde olayın gerçekleştiği yer zaman gibi bilgilere yer verilmemiştir. 9 no'lu başlıkta 'Sultanbeyli'de korkunç cinayet! Annesini vahşice öldürdü' başlıklı haberde öldürülen kişinin ne için öldürüldüğü bilgisine ulaşılamamaktadır. Eksik bilgi olan başlıklarda haberin giriş kısmı okunmadan anlatılmak istenen içeriğin ne olduğu ulaşılamamaktadır.

#### **Hürriyet Gazetesi Haber Girişi İlgili Bulgular**

Haber girişleri ana tema hakkında bilgi vermekte ve olayı kısaca anlatmaktadır. Hürriyet Gazetesinde çocuğu tarafından öldürülen kadın cinayetleri ile ilgili haberlerin genelinde haber metnini özetleyen ve okuyucunun dikkatini çekmeye yönelik haber girişleri olduğu görülmektedir. Ancak bazı haber girişlerinde 5N 1K kuralının uygulanmadığı haber metninin içeriğinin anlaşılması zorlaştıran haber girişleri de yer almaktadır. 3 no'lu haber girişi Fatih'te bipolar hastası kadın Ü.A.D. diye başlıyor. Haberin verilen ilk cümlesinde asıl özne yerine suçlunun tanıtılmasına yer verilmektedir. Hasta olduğu belirtilerek işlenen bu cinayete sebep gösterildiği görülmektedir. 4

no'lu haber girişinde Esenyurt'ta annesi ve kardeşlerini öldürdükten sonra intihar girişiminde bulunan Ömer Orak hayatını kaybetti cümlesinde olay ve öldürülen asıl özneler yerine suçlunun da intihar ettiği bilgisine yer verilmiştir. Haberin devamında ise 'Ömer Orak'ın yaklaşık 3 yıldır işsiz olduğunu söyleyen dayısı İsa Kuş, "Hiç dışarı çıkmıyordu, sabaha kadar internet oyunlarıyla vakit geçiriyordu. Cinnet mi geçirdi bilmiyoruz" dedi. İfadesinde suçlunun işsiz olduğu bu yüzden cinnet geçirerek bu cinayeti işlediği anlamı çıkarılmaktadır. 6 no'lu haber girişinde Bursa'da, yaşayan Halil İbrahim Yazıcı (23), Samsun'a taşınmak istemeyen annesi Yıldız Yazıcı'yı (45) ipe boğarak öldürdü. İlk cümlede olayın nedeni ve nasıl gerçekleştiğine dair bilgiler verilmiştir. Devamında ise psikolojik sorunları olduğu öne sürülen Yazıcı'nın 1 yıl önce de tüfekle balkondan rastgele ateş açıp, 1 kişiyi yaraladığı ortaya çıktı' cümlesiyle suçlunun işlediği cinayete hastalığı gerekçe gösterildiği ve daha önce de birini yaraladığı ifadesiyle de kişi için olay normalleştirilmiş, okuyucuya hasta bir bireyin neden tedavi almak yerine serbestçe dolaştığını sorgulatmaktadır. 7 no'lu haber girişinde Eskişehir'de İ.A. adlı oğlan çocuğu (15), 1 yıl önce babası Erkan A.'dan boşanan annesi Serap Bor'u (35) pompalı tüfekle öldürürken, 3 komşuyu da yaralayıp, otomobille kaçtı. Girişte ilk olarak çocuğun reşit olmadığı vurgulanmıştır. '1 yıl önce babasından boşanan annesi' ifadesiyle nesne sıfat sözcüğü kullanılarak kişi tanımlanmıştır. Bu kişi boşanmak isteyip boşanan bir eş hem de annedir. Dolayısıyla haber girişine göre boşanan kadının oğlunun gözünde suçlu olduğu bir anne olduğudur. Genel olarak bakıldığında ise boşanan kelimesinde boşanmak isteyen kadının boşandıktan sonra öldürülmesi arasında bağ oluşturmuş, boşanmak isteyen kadınların öldürüleceği anlamı yerleşmiştir. Devamında ise çocuğunun babası tarafından azmettirildiği ileri sürülerek babanın yakalandığı söylemiyle bitirilmiştir.

### **Hürriyet Gazetesi Fotoğrafla İlgili Bulgular**

Haberlerde fotoğraf kullanılması haber metinlerine gerçeklik ve okuyucuya kanıt sunma niteliğindedir. Aynı zamanda haberlere görsellik katılmaktadır. İncelenen Hürriyet Gazetesi'nde yer alan haberlerle doğru orantılı olarak verilen 9 haberin 8'inde video ve fotoğraf kullanılmıştır.

1 no'lu haberde kullanılan fotoğrafta zanlının kelepçeli olduğu yani kişinin tutuklandığına dair kanıt sunulmuştur. Aynı zamanda kullanılan diğer fotoğrafta ise acılı babanın ağlayarak yer verilmesi ölen annenin sevilen iyi bir kadın olduğu yönündedir. 3 no'lu haberde ise yalnızca olay yeri görüntülerine yer verilmiştir. 4 no'lu haberde öldüren kişi ve annesi yerine yalnızca öldürdüğü bir diğer kişi olan hamile kardeşinin ve eşinin mutlu oldukları görüntülerine yer verilmiştir. Video da yer alan bir diğer görüntü ise zanlının dayısına ait olan röportaj da yeğenin bunalımda olarak cinnet geçirdiği yönünde ifadeleridir. Dolayısıyla görsellerde işlenen suçta gerekçe gösterilen nedenlere yer verilmiştir. 5 no'lu haberde yakılan evin söndürülmesi görseli haberi kanıtlar niteliğinde sunulmaktadır. 7 no'lu haberde zanlı ve azmettirilen babaya ait net olmayan fotoğraf kullanılmıştır. Haberlerde kullanılan kişilere ait fotoğraflar, habere gerçeklik katmak amacıyla yer almaktadır.

### **Makro Yapıya Yönelik Şematik Analiz**

#### **Ana Olay ve Sunuş Biçimleri**

Haberlerde ana olay, çocuğu tarafından işlenen kadın cinayetleridir. Söz konusu gazete girişlerde ana temayı vermiştir. Haberlerin girişi ve ana olayı sunuş biçiminde hemen hemen ortak tutum belirlenmiştir. Haberlerin sunuş biçiminde genel olarak muhalif görüş veya iktidar yanlısı bir söylem bulunmamaktadır.

#### **Artalan ve Bağlam Bilgisi**

Hürriyet Gazetesi'nin konu ile ilgili haberlerin bir kısmında artalan ve bağlam ilişkisine yer verilmemiştir. Olayların neden yaşandığına dair bilgiler eksik verilmiştir. Bazı haberlerde ise okuyucunun bakış açısına göre yorumlanacak bilgiler verilmiştir. Örneğin: 4 no'lu haberde zanlının işsiz olduğu için mi bunalıma girdiği ya da diğer haberlerde olduğu gibi suçlunun psikolojik sorunlarının, cinayete bir gerekçe olarak mı gösterildiği kişinin bakış açısına göre yorumlanmaktadır. Tablo 1. de 1,2,4,6 no'lu haberde artalan ve bağlam bilgisi görmek mümkündür. Örnek olarak 6 no'lu haberde annenin Samsun'a taşınmak istemediği için öldürülmesi artalan ve bağlam ile ilişkilidir. Haberlerden çıkan genel anlam şöyledir: anne katili olan çoğu bireyin psikolojik hastalıkları olduğu yönündedir.

#### **Haber Kaynakları**

Haberlerde kaynak olayın bireyleri ya da görgü tanıklarıdır. Muhabirler aldıkları duyular doğrultusunda olay yerlerine giderek bu kişilerden bilgi almaktadırlar. Hürriyet Gazetesi haberlerinde en çok kişilerin yakınları ve olay yeri görgü tanıkları kaynak olarak gösterilmiştir.

**Tablo 1.** *Hürriyet Gazetesinde 2022 yılında çocuğu tarafından işlenen kadın cinayetleri ile ilgili çıkan haber başlıkları, haber girişleri ve fotoğraflar*

| NO | BAŞLIK   | HABER GİRİŞİ  | FOTOĞRAF   |
|----|--|---|--|
| 1  | Tartıştığı annesini, boğazından bıçaklayarak öldürdü!      | Antalya'da Zübeyde Tıraş (61), tartıştığı oğlu Yusuf E.T. (37), tarafından boğazında bıçak saplanarak öldürüldü. Gürültü üzerine eve gelen komşuları elleri kanlı bir şekilde kapıyı açtıktan sonra kaçmaya çalışan Yusuf E.T.'yi yakalayarak, polise teslim etti.  | Girişte zanlının yüzü bulanık şekilde polislerin arasında kelepçeli olduğu fotoğrafa yer verilmiştir. Haberin devamında ise acılı babanın ağladığı görüntüler ve öldürülen annenin fotoğrafı kullanılmıştır.   |
| 2  | Adana'da dehşet! Yatalak annesini yastıkla boğarak öldürdü | Adana'da, evde ölü bulunan yatağa bağımlı Alzheimer hastası Neriman Güngör'ün (80), bileklerini keserek intihara kalkışan oğlu Şeref Güngör (58) tarafından yastıkla boğulduğu ortaya çıktı. Tedavisi sonrası gözaltına alınan Güngör'ün, ifadesinde "Annem dayanılmaz çileler çekiyordu. Onu huzura erdirdim" dediği öğrenildi.  | Girişte zanlının yüzü açık şekilde kolundan polisin tuttuğu fotoğraf yer almaktadır. Evin dışardan görüntüsü ve olay yeri incelemenin eve giriş fotoğrafı kullanılmıştır. Haberin sonunda ise öldürülen kadının kimlik fotoğrafına yer verilmiştir.                      |
| 3  | Fatih'te dehşet! Annesini boğazını keserek öldürdü         | Fatih'te bipolar hastası kadın Ü.A.D. (55) annesi N.Ö.'nün (81) boğazını ekmek bıçağıyla keserek öldürdü.   | Haberde görsel olarak bir video ve bir fotoğraf kullanılmıştır. Video da cenaze aracına tabutun yüklenmesi anına yer verilmiştir. Fotoğrafta ise evin önünde polis arabası ve olay yeri inceleme aracı yer almaktadır. Zanlı veya maktule ait görsele yer verilmemiştir. |
| 4  | Esenyurt'ta ailesini katletti! Ölü sayısı 4'e yükseldi...  | Esenyurt'ta annesi ve kardeşlerini öldürdükten sonra intihar girişiminde bulunan Ömer Orak hayatını kaybetti. Ömer Orak'ın, kuzenine mesaj göndererek "Ben bunları öldürdüm, gelin cenazeyi alın" dediği ortaya çıktı. Ömer Orak'ın yaklaşık 3 yıldır işsiz olduğunu söyleyen dayısı İsa Kuş, "Hiç dışarı çıkmıyordu, sabaha kadar internet oyunları ile vakit geçiriyordu. Cınnet mi geçirdi bilmiyoruz" dedi. | Haber girişinde bir videoya yer verilmiştir. Videoda zanlının dayısıyla yapılan röportaj ve yeni evlenen 2.5 aylık hamile olan kardeşinin eşiyle olan görüntüler kullanılmıştır. Fotoğraf bulunmamaktadır.   |
| 5  | Annesi içerideyken evi ateşe verdi! Tutuklandı             | Edirne'de, annesi Saliha Birincibubar'ın (60) içinde olduğu evi benzin döküp, ateş veren Ünal Deniz (43), tutuklandı. Vücudunda ikinci derece yanıklar olan Birincibubar'ın ise İstanbul Kartal Dr. Lütfi Kırdar Eğitim ve Araştırma Hastanesi Yara ve Yanık Merkezi'nde tedavisi sürüyor.  | Haberde bir video ve bir fotoğrafa yer verilmiştir. Videoda zanlının polisler tarafından tutuklanma ve polis aracına bindirme anları kaydedilmiştir. Fotoğrafta ise ateşe verilen evin söndürülmesi gözükmemektedir.   |

|   |   |   |   |
|---|---|---|---|
| 6 | Bursa'da vahşet! Samsun'a taşınmak istemeyen annesini ipe boğarak öldürdü                             | Bursa'da, yaşayan Halil İbrahim Yazıcı (23), Samsun'a taşınmak istemeyen annesi Yıldız Yazıcı'yı (45) ipe boğarak öldürdü. Psikolojik sorunları olduğu öne sürülen Yazıcı'nın 1 yıl önce de tüfekle balkondan rastgele ateş açıp, 1 kişiyi yaraladığı ortaya çıktı  | Haberde bir video ve bir fotoğraf kullanılmıştır. İkisinde de zanlının adliye sevk ediliş anlarına yer verilmiştir.   |
| 7 | Eskişehir'de dehşet! 15 yaşındaki çocuk annesini öldürdü, 3 kişiyi yaraladı                           | Eskişehir'de İ.A. adlı oğlan çocuğu (15), 1 yıl önce babası Erkan A.'dan boşanan annesi Serap Bor'u (35) pompalı tüfekle öldürürken, 3 komşuyu da yaralayıp, otomobile kaçtı. İ.A. (15) adlı çocuk ile azmettirdiği öne sürülen babası Erkan A., olayın yaşandığı mahalledeki farklı sokaklarda pompalı tüfekle yakalandı.        | Haberde iki fotoğrafta da olay yer verilmiştir. Son fotoğrafta ise çocuğu azmettirdiği öne sürülen baba ve çocuğun net olmayan bulanıklaştırılmış fotoğrafı kullanılmıştır. |
| 8 | Annesini öldürüp üvey kardeşini yaralamıştı! Bursa'daki vahşete 2 kez ağırlaştırılmış müebbet istendi | Bursa'da annesi Azime Akman'ı (48) boğazını keserek öldürüp, üvey kız kardeşi M. A.'yı (13) da yaraladığı gerekçesiyle tutuklanan Muhammet Ergül (25) hakkında Cumhuriyet Başsavcılığı'nca iddianame hazırlandı. Ergül'ün, 'kasten öldürmek' ve 'öldürmeye tam teşebbüs' suçlarından 2 kez ağırlaştırılmış müebbet hapsi istendi. | Haberde zanlının koluna polislerin girdiği kelepçeli fotoğrafı kullanılmıştır   |
| 9 | Sultanbeyli'de korkunç cinayet! Annesini vahşice öldürdü  | Sultanbeyli'de Orhan Oruçgüney, tartıştığı annesi Gülbeyaz Oruçgüney'in bıçakla boynunu kesti. Kadın hayatını kaybederken, Orhan Oruçgüney gözaltına alındı.  | Haberde bir video ve bir fotoğraf kullanılmıştır. Her ikisinde de olay yeri görüntülenmiştir.   |

### Makro Yapıya Yönelik Tematik Analiz

#### Sözcü Gazetesi Başlıkla İlgili Bulgular

Sözcü Gazetesinde yer alan haber başlıkları incelendiğinde haber başlıklarında bilgilerde eksiltme yapıldığı görülmektedir. Çoğu haberin başlıklarında yer, zaman gibi bilgilerin bulunmadığı belirlenmiştir. 5 no'lu '15 yaşında çocuk annesini öldürdü!' haber başlığında yer ve zaman belirtilmemiştir. 1 ve 2 no'lu haber başlıklarında 'vahşet, dehşet feci şekilde katletti' gibi ifadeler dikkat çekmek amacıyla başlıklarda kullanılmıştır. Başlıklara genel olarak bakıldığında herhangi bir genelleme normalleştirme yapılmadığı gözlemlenmiştir. Öldürülen kadının çocuğu tarafından öldürülen bir anne olduğu vurgulanmıştır. Başlıklar üzerinden herhangi bir ideolojik üretim yapıldığı saptanmamıştır.

#### Sözcü Gazetesi Haber Girişi İlgili Bulgular

Sözcü gazetesinde çocukları tarafından öldürülen kadın cinayetleri ile ilgili haberlerde, haber metnini özetleyen ve okuyucunun dikkatini çekmeye yönelik haber girişleri haberlerin çoğunda olduğu görülmektedir. Sözcü gazetesinin haber başlıkları ile haber girişleri arasında herhangi bir çelişki görülmemiştir. 1 no'lu haber girişinde 'Vahşet haberi bu kez Antalya'dan geldi' ifadesiyle gazete, bir kadının daha öldürüldüğünü belirterek eleştirel bir bakış açısı sunmaya çalışmıştır. Aynı zamanda "vahşet haberi bu kez Antalya'dan" başlığında yer alan "bu kez" söylemiyle bundan önce de kadın cinayetlerinin olduğu anlaşılmaktadır. Bu durumun ilk olmadığını hali hazırda var olan ve tekrarlanan bir olaydan bir tane daha gerçekleştiğini belirtmektedir. Başlık ayrıca bir ön varsayım konu olmuştur. Muhabir ve editör, bu başlığı atarak okuyucunun Türkiye'de bundan önce de kadın cinayetleri işlendiğini bildiğini varsaymıştır. Bu durum sonrasında okuyucu tarafından içselleştirilmesinde etkili olmaktadır.

Bu söylem aynı zamanda kadın cinayetlerinin genelleşmesine yardımcı olmuş ve sıradan bir hal almasının önünü açmıştır. 4 no'lu haber girişinde yer alan 'Psikolojik sorunları olduğu öne sürülen Yazıcı'nın 1 yıl önce de tüfekle balkondan rastgele ateş açıp, 1 kişiyi yaraladığı ortaya çıktı.' ifadesinde suçlunun psikolojik hastalığının cinayete sebep olabileceği okuyucuya düşündürülmüş aynı zamanda kişinin daha önce de rastgele bir kişiyi yaraladı söylemi, bu durumu destekler niteliktedir. 2 ve 5 no'lu haber girişinde eksik bilgiler verilmiştir. Olayların neden yaşandığına dair bilgi bulunmamaktadır. 6 no'lu haber girişinde zanlının ifadesindeki 'İçimdeki şeytan öldür' dedi. Öldürdüm cümlesine yer verilmiştir. Burada da suçlunun psikolojik sorunları olabileceği düşüncesi okuyucuya aktarılmıştır. Aynı zamanda olay daha ilgi çekici hale getirilmiştir. 7 no'lu haber girişinde 'Olayın ardından balkona çıkıp annesinin öldüğünü söyleyerek sela okuduğu iddia edilen Oruçgüney'in akli dengesinin bozuk olduğu öğrenildi' ifadesi ile olay hakkında merak uyandırılmıştır. Genel olarak bakıldığında tüm haber girişlerinde öldürülen kişinin nasıl öldürüldüğü hakkında bilgi verilmiştir. Söz konusu gazete de kadın cinayetleri haberleri sunumunda ideolojik üretim yapıldığı gözlemlenmektedir.

### **Sözcü Gazetesi Haber Fotoğrafı ile İlgili Bulgular**

Sözcü Gazetesi haberlerde doğru orantıda fotoğraf kullanmıştır. Çocuğu tarafından öldürülen kadın cinayetleri ile ilgili başlıklı yaptığı 7 haberin sadece 1 tanesinde fotoğraf kullanılmamıştır. 1 no'lu haberde 5 fotoğraf kullanılmıştır. Kullanılan fotoğraflardan ikisi olay yerini gösterirken diğer 3'ü ise zanlıya, öldürülen anneye ve ağlayan babaya ait kişi fotoğraflarıdır. Öldürülen kadının ve babanın fotoğrafları net iken suçlunun yüzü bulanık verilmiştir. Olayda kullanılan fotoğraflar habere gerçeklik katmaktadır. 3 no'lu haberde yaralanan kadının ambulansa kaldırılırken ki görüntüsü kullanılmıştır. Vücudunda yanıklar olan kadının fotoğrafının net bir şekilde verilmesi olayı doğrulamakta aynı zamanda ise haberi sansasyonel biçimde sunmaya çalışılmıştır. 4 no'lu haberde 2 fotoğraf kullanılmıştır. İlkinde zanlının yüzü net olarak verilmiştir. Diğer fotoğrafta ise suçlunun tutuklandığı anlar kullanılmıştır. 5 no'lu haberde 4 tane fotoğraf kullanılmıştır. Olaydaki tüm kişilerin görselleri kullanılmış aynı zamanda olay yeri ve sonucunda kişinin gözaltına alınırken ki görselleri kullanılmıştır. Olay haber metni dışında aynı zamanda kullanılan fotoğraflarla da anlatılmıştır. Böylece haber içeriği ve fotoğrafların uyum sağlaması ile birlikte haberin doğruluğu kanıtlanmaktadır.

6 no'lu haber fotoğrafında yalnızca suçlunun ters kelepçeli fotoğrafına yer verilmiştir. Sözcü Gazetesi genel olarak kullandığı fotoğraf sayısı ve fotoğraflar ile söz konusu ilgili başlığa önem verdiğini yansıtmaktadır.

### **Makro Yapıya Yönelik Şematik Analiz**

#### **Ana Olay ve Sunuş Biçimleri**

Haberlerde ana olay çocuğu tarafından işlenen kadın cinayetleridir. Gazete ana temayı haber girişlerinde vermiştir. Gazetenin 1 haber girişinde olayı sunuş bakımından eleştirel bir söylem bulunmaktadır. Haberde kullanılan 'bu kez de' ifadesi ile Türkiye'de bu durumun sürekli yaşandığı ve bu konu hakkında alınan önlemler olmadığını düşündürmektedir.

#### **Artalan ve Bağlam Bilgisi**

Kadın cinayetleri, bir toplumun politik yapısı, hukuk sistemi, ekonomisi, tarihi ve eğitim seviyesiyle ilgilidir. Sözcü Gazetesi'nde verilen söz konusu başlık ile ilgili haberlerin girişinde artalan ve bağlam bilgisine tam olarak yer vermemiştir. Olayların sadece birkaçında iddia olduğu öne sürülen nedenler olduğu bilgisi yer almaktadır. Ancak hiçbir haberde bu konular üzerinden bir uzman görüşüne yer verilmemiştir.

#### **Haber Kaynakları**

İncelenen Sözcü gazetesi haberlerinde ana kaynak olayı yaşayan kişiler ve tanık olan bireylerdir. Muhabir olay yerine gittiğinde ilk kaynak olarak olayın içindeki kişilerden bilgi toplamaktadır. Daha sonra ise olaya dışardan tanık olmuş kişilerden bilgi almaktadır. Haber içinde yaşanan olaylarda kişilerin sağlık durumları ile ilgili bilgiler ise kurumlardan belge olarak alınmaktadır.

**Tablo 2.** *Sözcü Gazetesinde 2022 yılı çocuğu tarafından işlenilen kadın cinayetleri ile ilgili çıkan haber başlıkları, haber girişleri ve fotoğraflar*

| NO | BAŞLIK  | HABER GİRİŞİ   | FOTOĞRAF  |
|----|---|--|---|
| 1  | Vahşetin adresi Antalya! Annesini feci şekilde katletti         | Vahşet haberi bu kez Antalya'dan geldi. Zübeyde Tıraş (61), tartıştığı oğlu Y. E.T. (37), tarafından boğazında bıçak saplanarak öldürüldü. Gürültü üzerine eve gelen komşuları elleri kanlı bir şekilde kapıyı açtıktan sonra kaçmaya çalışan Yusuf E.T.'yi yakalayarak, polise teslim etti. Bu sırada eve gelen baba gördüğü manzara karşısında yıkıldı.  | Haberde beş fotoğraf kullanılmıştır. Giriş fotoğrafı olarak zanlının yüzünün bulanık olduğu fotoğrafa yer verilmiştir. Diğer iki fotoğraf olay yeri incelemeye ait görüntüler ve son olarak zanlının acılı babasının ağladığı ve ölen annenin fotoğrafı yer almıştır.                               |
| 2  | İstanbul'da dehşet: Annesini boğazını keserek öldürdü           | İstanbul Fatih'te Ü.A.D. (55), annesi N.Ö.'nün (81) boğazını ekmek bıçağıyla keserek öldürdü.  | Haberde sadece cenaze aracına konulan tabutun fotoğrafı kullanılmıştır.   |
| 3  | Oğlunun ateşe verdiği evde yanan kadın, yaşam savaşını kaybetti | Edirne'de, oğlu Ünal Deniz (43) tarafından ateşe verilen evde vücudunda ikinci derece yanıklar oluşarak ağır yaralanan Saliha Birincibubar (60), 15 günlük yaşam mücadelesini kaybetti. Tedavi gördüğü İstanbul Kartal Dr. Lütfi Kırdar Eğitim ve Araştırma Hastanesi Yara ve Yanık Merkezi'nde hayatını kaybeden Birincibubar, Edirne'de toprağa verildi. | Haberde yaralı kadının 112 acil sağlık ekibi tarafından ambulansa kaldırıldığı fotoğraf kullanılmıştır.   |
| 4  | Bursa'dan Samsun'a taşınmak istemeyen annesini boğarak öldürdü  | Bursa'da, yaşayan Halil İbrahim Yazıcı, Samsun'a taşınmak istemeyen annesi Yıldız Yazıcı'yı ipe boğarak öldürdü. Psikolojik sorunları olduğu öne sürülen Yazıcı'nın 1 yıl önce de tüfekte balkondan rastgele ateş açıp, 1 kişiyi yaraladığı ortaya çıktı.  | Haberde zanlının yüzü açık ve net şekilde iki fotoğrafına yer verilmiştir. İlki polisler tarafından tutuklanırken ikincisi ise profil fotoğrafı yakın ve net olarak kullanılmıştır.   |
| 5  | 15 yaşında çocuk annesini öldürdü!                              | Eskişehir'de, annesi Serap Boru pompalı tüfekte öldüren 15 yaşındaki İ.A. adlı erkek çocuğu ile azmettirdiği öne sürülen babası Erkan A., emniyetteki işlemlerinin ardından adliyeye sevk edildi.  | Haberde 4 fotoğrafa yer verilmiştir. İlk iki sırada ölen annenin net fotoğrafı ve yanında baba ve oğulun bulanıklaştırılmış fotoğrafı kullanılmıştır. Son iki fotoğrafta ise olay yeri inceleme görseli ve azmettirici olduğu öne sürülen babanın adliyeye sevk anındaki görüntüler kullanılmıştır. |

|   |   |   |   |
|---|---|---|---|
| 6 | Annesini öldürüp üvey kardeşini yaraladı, istenen ceza belli oldu | Bursa'da annesi Azime Akman'ı (48) boğazını keserek öldürüp, üvey kız kardeşi M. A.'yı (13) da yaraladığı gerekçesiyle tutuklanan Muhammet Ergül (25) hakkında Cumhuriyet Başsavcılığınca iddianame hazırlandı. İfadesinde, 'İçimdeki şeytan 'öldür' dedi. Öldürdüm" diyen Ergül'ün, kasten öldürmek ve öldürmeye tam teşebbüs suçlarından 2 kez ağırlaştırılmış müebbet hapsi istendi. | Haberde zanlının koluna polislerin girdiği ters kelepçeli fotoğrafı kullanılmıştır. |
| 7 | İstanbul'da vahşet! Annesini boynunu keserek öldürdü              | İstanbul'da 52 yaşındaki Gülbeyaz Güney, oğlu Orhan Oruçgüney (26) tarafından boynundan bıçaklanarak öldürüldü. Olayın ardından balkona çıkıp annesinin öldüğünü söyleyerek sela okuduğu iddia edilen Oruçgüney'in akli dengesinin bozuk olduğu öğrenildi   | Fotoğraf yok  |

### Makro Yapıya Yönelik Tematik Analiz

#### Sabah Gazetesi Başlıkla İlgili Bulgular

Sabah Gazetesinde yer alan haber başlıklarına bakıldığında enformasyon eksilimi yapıldığı belirlenmiştir. Başlıklarında yer ve zaman gibi bilgilerin bulunmadığı görülmüştür. 3 no'lu Esenyurt aile katliamında Ömer Orak da öldü! Dayısı konuştu: Sabaha kadar... başlıkta olay ne zaman ne şekilde olayın tam olarak ne olduğu bilgisi verilmemiştir. Devamında ise eksiltili cümle kullanılarak olay daha da anlaşılabilir hale getirilerek haberin içeriğine doğru okuyucuyu çekme hedeflenmiştir. 1 ve 4 no'lu 'Annesini boğazından bıçaklayarak öldürdü!' ve 'Annesinin boynunu kesti!' ifadeleriyle cinayetlerin nasıl işlendiğini vurgulayarak okuyucuda olayın nasıl gerçekleştiğine dair merak uyandırılmaktadır.

#### Sabah Gazetesi Haber Girişi İlgili Bulgular

Haber girişleri olay hakkında kısaca bilgi vermektedir. Sabah gazetesinde çocukları tarafından öldürülen kadın cinayetleri ile ilgili haberlerde haber metnini özetleyen girişler kullanılmıştır. Ancak bazı haber girişlerinde 5N1K kuralının uygulanmadığı görülmektedir. Bilgiler tam olarak girişte verilmemektedir. 1 no'lu haber girişinde Antalya'da 37 yaşındaki Yusuf Tıraş evde tartıştığı annesi Zübeyde Tıraş'ı (61) boğazından bıçaklayarak öldürdü' ifadesiyle özne olan kadın yerine ilk olarak suçlu tanıtılmıştır. Haber girişlerinde ilk cümleler oldukça önemlidir. Okuyucunun aklında en fazla bu kısımlar kalmaktadır. Girişte tartışma sonucu olayın yaşandığı bilgisi verilmekte ancak tartışmanın neden yaşandığına dair bilgi yoktur. 2 no'lu haber girişinde 'Adana'da polisin ihbar üzerine girdiği evde 80 yaşındaki yatalak kadın ölü; oğluya bilekleri kesilmiş ağır yaralı halde bulunduğu olay cinayet çıktı' cümlesiyle öldürülen kadının yatalak olduğu ve yaşlı olduğu bilgisi verilmiştir. Ancak zaman ve olayın neden yaşandığına dair bilgi bulunmamaktadır. 3 no'lu haber girişinde olayın nedeni varsayım üzerine iddia edilmiştir. 'Annesi ve kardeşlerini öldürdükten sonra intihar girişiminde bulunan Ömer Orak da hayatını kaybetti' bilgisi ile zanlının cinayetleri işledikten sonra kendisini de öldürdüğü bilgisi okuyuculara kişinin psikolojik sağlık durumu ile ilgili farklı bakış açılarına yönlendirmiştir. Girişin devamında ise suçlunun işsizlik sebebiyle bunalıma girdiği öne sürülmüştür. 4 no'lu haber girişinde ise sadece yer ve olayın ne şekilde gerçekleştiği bilgisi verilmiştir. Haber girişinde eksik bilgiler bulunmaktadır.

#### Makro Yapıya Yönelik Şematik Analiz

##### Ana Olay ve Sunuş Biçimleri

Haberlerde ana olay evladi tarafından öldürülen kadın cinayetleridir. Gazete ana olayı kısmen haber girişinde vermiştir. Haberlerin geneline bakıldığında eleştirel bir söylem bulunmamaktadır. İşlenen kadın cinayetlerinin aile içi tartışmalar olduğu belirtilmiştir.

#### Haber Kaynakları

Haberlerde kaynaklar muhabir ve görgü tanıklarındır. Muhabirler olay yerine gittiğinde görgü tanıklarından bilgi toplarlar daha sonra bu bilgileri resmi kurumlardan alınan bilgilerle destekler ve haberi hazır hale getirir. Sabah gazetesi kaynak olarak olay yerindeki insanlar ve gördü tanıklarından bilgi edinmiştir.

**Tablo 3.** Sabah Gazetesinde 2022 yılı çocuğu tarafından işlenen kadın cinayetleri ile ilgili çıkan haber başlıkları, haber girişleri ve fotoğraflar

| NO | BAŞLIK   | HABER GİRİŞİ   | FOTOĞRAF  |
|----|--|--|---|
| 1  | Antalya da evlat vahşeti: Annesini boğazından bıçaklayarak öldürdü!          | Antalya'da 37 yaşındaki Yusuf Tıraş evde tartıştığı annesi Zübeyde Tıraş'ı (61) boğazından bıçaklayarak öldürdü. Cinayetin ardından kaçmaya çalışan oğul Tıraş, polis ekipleri tarafından gözaltına alındı.  | Haberde dokuz tane fotoğrafa yer verilmiştir. Olay yeri inceleme görüntüleri zanlının yerde kelepçeli şekilde yatırılması ve son olarak da ölen annenin ve babanın birlikte olduğu eski bir fotoğraf kullanılmıştır.  |
| 2  | Annesini boğarak öldürdüğünü itiraf etti                                     | Adana'da polisin ihbar üzerine girdiği evde 80 yaşındaki yatalak kadın ölü; oğluya bilekleri kesilmiş ağır yaralı halde bulunduğu olay cinayet çıktı. Tedavisi yapılan Şeref Güngör'ün annesini boğarak öldürdüğünü itiraf etti.   | Haberde üç fotoğraf bir video yer almaktadır. Video da zanlının gözaltına alınması görüntülenmiştir. Fotoğraflarda ise zanlının net bir fotoğrafı ölen kadının kimlikteki fotoğrafı ve olay yeri inceleme fotoğrafları kullanılmıştır.  |
| 3  | Esenyurt aile katliamında Ömer Orak da öldü! Dayısı konuştu: Sabaha kadar... | Tüyer ürperten olay İstanbul Esenyurt'ta meydana geldi. Annesi ve kardeşlerini öldürdükten sonra intihar girişiminde bulunan Ömer Orak da hayatını kaybetti. Katil Ömer Orak'ın, kuzenine mesaj göndererek "Ben bunları öldürdüm, gelin cenazeyi alın" dediği öğrenildi. Ömer Orak'ın yaklaşık 3 yıldır işsiz olduğunu söyleyen dayısı İsa Kuş ise şunları söyledi: "Hiç dışarı çıkmıyordu, sabaha kadar internet oyunları ile vakit geçiriyordu. Cinnet mi geçirdi bilmiyoruz." | Haberde on tane fotoğrafa yer verilmiştir. Zanlının öldürdüğü kişiler arasında bulunan kız kardeşi ve eşinin fotoğraflarına fazlaca yer verilmiştir. Diğer fotoğraflarda ise olay yeri inceleme ve zanlının röportaj yapılan dayısının görüntüleri yer almıştır. Zanlıya ve ölen anneye dair fotoğraf yoktur. |
| 4  | İstanbul'da tüyer ürperten cinayet: Annesinin boynunu kesti!                 | İstanbul'da tüyer ürperten bir cinayet işlendi. Orhan Oruçgüney tartıştığı annesi Gülbeyaz Oruçgüney'in bıçakla boynunu kesti. Talihsiz kadın hayatını kaybederken, Orhan Oruçgüney gözaltına alındı.  | Haberde beş fotoğrafa yer verilmiştir. Olay yeri inceleme ve cenaze aracına konulan tabut fotoğrafları kullanılmıştır.  |

**Sonuç**

Bu çalışmada Hürriyet, Sabah ve Sözcü gazetelerinin çevrimiçi versiyonlarında yapılan çocuğu tarafından işlenen kadın cinayetleri konulu haberlerinin ideolojik sunumları ele alınmıştır. Hürriyet Sözcü ve Sabah gazetelerinin söz konusu başlık ile sınırlandırılmış kadın cinayeti haberlerini nasıl ele aldıkları ve bu doğrultuda haberlerin söyleminde makro düzeyde ideolojik üretimin olup olmadığı incelenmiştir. Farklı ideolojik kimliğe sahip gazetelerinin, haberlerindeki farklılıkları ya da benzerlikleri üzerinde durulmuştur. Çözümlemede Teun Adrian Van Dijk'in eleştirel söylem analiz modeli olan çalışmaları çerçevesinde yer alan makro modeli kullanılmıştır.

Kadın Cinayetlerini Durduracağız Platformu'nun verilerine göre Türkiye'de sadece 2022 yılında 334 kadın öldürülmüştür. Bu kadın cinayetlerinin kim tarafından işlendiklerini sınıflandırıldığında ise bu sayıdan 10 kadın çocuğu tarafından öldürülmüştür. Söz konusu gazeteler incelendiğinde Hürriyet gazetesi 9 Sözcü gazetesi 7 ve Sabah gazetesi yalnızca 4 tane çocuğu tarafından işlenen kadın cinayeti haberini sunmuştur.

Gazetelerin kadın cinayetlerine karşı tutumu genel olarak benzer olmaktadır. Sözcü gazetesi zaman zaman kadın cinayetine karşı eleştirel yaklaşıma çalışmıştır. Ancak haber içeriğinde ideolojik üretimden kaçınmamıştır. Sabah gazetesi en az haberi yaparak konuya daha az önem verdiği belirlenmiştir. İncelenen 3 gazetede de internet haberciliğinin faydalarından yararlanarak haberlerinde oldukça fazla fotoğraf ve videoya yer vermiştir. Bu da

internet haberciliğinde okuyucularına doğru haber konusunda güven vermektedir. 3 gazetede de başlıklar haber giriş ve içeriğiyle uyum sağlamaktadır.

Sözcü gazetesi haber başlıklarında kullandığı kelimeler ile olayı daha sansasyonel sunmaya çalışmıştır. Söz konusu gazetelerde işlenen bu cinayetler ile ilgili herhangi bir eleştiri veya tavra rastlanmamıştır. Hürriyet gazetesinin verdiği bir haberde kadının boşanmış olduğu ve boşanmayı isteyen taraf olduğuna dair bilgisi ataerkil sisteme hizmet etmiştir. Aynı zamanda bu bilgi ile olayın asıl sebebi yerine boşanan kadınların öldürüldüğü düşüncesi yansıtılmıştır. Bu durumda kadın cinayetlerinin genelinde verildiği için normalleştirilmeye başlanmıştır.

Söz konusu gazetelerde konuyla ilgili verilen tüm haber başlıklarında kadının anne olduğu vurgusu yapılmıştır. Böylece başlıkta annesi öldüren bir çocuk olması haberi daha ilginç ve dikkat çekici hale getirmiştir. Haberlerin hemen hemen hepsinde verilen psikolojik rahatsızlığı olan çocuk bunalıma giren çocuk sınıflarıyla olaylara gerekçe gösterilmiştir. Ancak hiçbir gazetede çocukların neden bu durumda oldukları ya da neden tedavi almadıklarına dair bilgi yoktur.

Kadın cinayetinin nerede ve nasıl işlendiğine dair detayların açık bir şekilde verilmesi diğer bir sonuçtur. Kadına yönelik cinayetin nasıl gerçekleştiğine ilişkin tüm detayların verilmesi suç olgusunun ön plana çıkarılmasından ziyade, olayın hikâyeleştirilmesine neden olmaktadır. En ince detaylarıyla hikâyeleştirilen haber hem cinayet için yol göstermekte hem de cinayetin kanıksanması tehlikesini doğurmaktadır (Karaduman, M.; Livberber, T. (2021). Kadın cinayeti haberlerinde söylem pratiklerini aramak: Pınar Gültekin cinayeti haberleri üzerine eleştirel bir değerlendirme). Söz konusu haberlerin hemen hemen hepsinin başlığında cinayetin nasıl işlendiği bilgisi verilmiştir. Haberlere bakıldığında da birbirleriyle aynı yöntemle sahip cinayetler işlenmiştir.

İncelenen gazete haberlerin çoğunda haberi toplumsal, siyasal ya da ekonomik herhangi bir artalan bağlam bilgisine rastlanılamamıştır. Bu anlamda kadın cinayeti bireysel bir soruna indirgenerek işlenmektedir.

Gazeteler kurbanın lehine bir bakış açısı yaratmaya çalıştıklarında bile failin ifadelerinin sansürlenmeden verilmesi, haberin failin ifadelerine ya da kadının özel hayatına dayandırılması, cinsiyetçi/eril bir dil kullanılması, cinayete ilişkin normalleştirme, haklılaştırma ya da gerekçelendirme gibi söylem ve sunum şekilleri yapılması, pornografik öğelerin kullanılması, hikayeleştirme ve detaylandırma nedenleriyle hem gazetecilik etiği hem de insan hakları ihlali noktasında tartışmalı bir alan yaratmaktadır. Tüm bunlar, kadın cinayetinin toplumsal bir sorun olduğu bağlamından koparılmasına ve ilişki ya da özel hayat sorunu olarak bireysel sebeplere indirgenmesine neden olmaktadır ((Karaduman, M.; Livberber, T. (2021). Kadın cinayeti haberlerinde söylem pratiklerini aramak: Pınar Gültekin cinayeti haberleri üzerine eleştirel bir değerlendirme).

Tüm bu bilgilerden anlaşılacağı üzere farklı yayın politikaları ve farklı ideolojik kimliğe sahip olmalarına rağmen, yapılan analizlerde ilgili başlıktaki haberlerin söylemleri benzerlik gösterdiği bulgulanmıştır. Böylelikle kadın cinayetlerinin asıl nedenleri bağlamından koparılmakta, toplumsal bir sorun olan kadın cinayetleri bireysel sebeplere bağlanarak farklı bağlamlarda sunulmaktadır. En önemlisi de farklı ideolojik yapılarla ve yayın politikaları olan söz konusu gazetelerin kadın cinayetlerinin haber dili ve söyleminde ortaya çıkan ortak yönleridir.

# YENİ MEDYADA SAHTE HABERLERİN YAYILMASI: X ÖRNEĞİ ETİK SORUNLAR VE ÇÖZÜM ÖNERİLERİ

Ayşe Nur YALÇIN

Sakarya Üniversitesi Sosyal Bilimler Enstitüsü  
İletişim Bilimleri Yüksek Lisans Öğrencisi

## ÖZET

Yeni medyanın ve iletişim teknolojilerinin gelişmesiyle ve kullanımının artmasıyla birlikte bireylerin haberlere ulaşmaları da kolaylaşmaktadır. Haberlere ulaşımın kolaylığı, alternatif kaynakların fazlalığı ve her bireyin kendi ağını oluşturarak bilgi paylaşabiliyor olması gibi unsurlar ile yeni medyada sahte haberin yayılma hızı da artış göstermektedir. Bu araştırma yeni medyada yayılan haberlerin etik sorunlarını tartışmakta ve çözümler sunmaktadır. Araştırmanın amacı; X uygulaması üzerinden yeni medyada yayılan sahte haberlerin etik boyutlarını tartışmak ve sahte haberlerin insanlar üzerindeki güvenilirliğini sarsan durumları açıklamaktır. Araştırmanın yöntemini içerik analizi ve söylem analizi oluşturmaktadır. Bu araştırmanın evrenini, 2023 yılında X platformu üzerinden "Günün Yalanları" ve "Teyit" adlı hesaplardan yayınlanarak yüksek etkileşim alan 5 sahte haber oluşturmaktadır. Hızlı etkileşim, geri bildirim, işlevsellik ve kullanım kolaylığı gibi özellikleri sebebiyle X platformu tercih edilmiştir. Çalışma, 2023 yılında gündemde olan olaylar ile sınırlandırılmıştır. Bulgular, X platformunun sahte haberlerin yayılması için uygun bir zemin sağladığını göstermektedir. Sahte haberlerin yayılması topluma ve bireylere ciddi zararlar vermektedir. Bu sorunları çözmek için medya okuryazarlığını artırmak, sosyal medya platformlarının sorumluluğunu artırmak ve yasal düzenlemeler gibi adımlar atılması gerektiği sonucuna ulaşılmıştır.

**Anahtar Kelimeler:** *Yeni Medya, Etik, X, Sahte Haber*

## ABSTRACT

The widespread use of social media platforms changes the news gathering processes of individuals. With the change in these processes, the spread of fake news also accelerates. The aim of the study is to discuss the ethical dimensions of fake news spread on social media through the example of X. Using content analysis and critical discourse analysis, the study analyzes 5 highly interacted fake news published on the X platform from the accounts named "Günün Yalanları" and "Teyit". The findings show that platform X provides a suitable platform for the spread of fake news. Fake news is more prevalent and receives more engagement on platform X because it is more interesting and shareable by individuals. The spread of fake news causes serious harm to society and individuals. In order to solve these problems, steps such as improving media literacy, increasing the responsibility of social media platforms and legal regulations should be taken.

**Keyword:** *New Media, X, Fake News*

## GİRİŞ

Günümüzde sosyal medya platformlarında, bireylerin haber alma ve bilgi edinme olanakları önemli ölçüde değişime uğramaktadır. Sosyal medya platformları, kullanıcıların hızlı ve kolay bir şekilde bilgi paylaşmasına imkan vermektedir. Bu nedenle, bu durum sahte haberlerin yayılma riskini de arttırmaktadır.

Yeni medya, dijital teknolojilerin ve internetin gelişmesiyle ortaya çıkan etkileşim kurulan bir alandır. "Yeni medya, bireylerin haber alma, bilgi edinme ve iletişim kurma biçimlerini önemli ölçüde değiştirmiştir." (Yeni Medya ve Toplum, 2021). Geleneksel medyadan ayıran en büyük özelliği güncel bilgilere anından ulaşılabilmesidir.

Sahte haber kasıtlı veya kasıtsız doğru bilgi vermeyen, yanıltıcı içerikler bulunan haberlerdir. Sahte haberlerin yayılması toplumun bilgi edinme hakkını ihlal etmekle birlikte toplumsal konuları ve demokrasiyi de tehdit etmektedir.

Yeni medya, sahte içeriklerin yayılması için kolaylık sağlayan bir ortam olarak değerlendirilebilir. Anında etkileşime müsait bir ortam olduğundan kaynaklı hızla yayılmakta ve geniş hedef kitlelere ulaşabilmektedir. Sahte haberlerin yayılmasının oluşturduğu etik sorunlarla ilgili yapılan çalışmalarda demokrasi, özgürlük, adalet ve güven kavramlarını tehdit ettiği vurgulanmaktadır. "Sahte haberler, demokrasinin temel unsurlarından biri olan halkın kendi kararlarını verebilmesini zorlaştırmaktadır." (Acar, 2022)

Sahte haberlerin yayılmasına neden olan sorunlar, topluma ve bireylere toplumsal huzurun bozulması, demokrasinin işleyişinin sekteye uğraması, bireylerin karar verme yeteneğinin zayıflaması ve güvenin sarsılması şeklinde yansımıştır.

Medyaya ve medya kuruluşuna duyulan güvensizlik ve şüphe, haberlerin üretim sürecinde kamu hizmeti ve toplum çıkarlarının gözetilmediği algısının oluşmasına neden olmaktadır.(Balcı ve Bekiroğlu, 2014, s.194).

Topluma ve bireylere önemli zararlar vermektedir. Bu sorunların çözümü ulaşması için, sosyal medya platformlarının dezenformasyonu engellemek adına önlemler alınması, yüksek okulların ve medyanın sahte haberler konusunda farkındalık oluşturması ve kullanıcıların eleştirel düşünme becerisini geliştirmek gerekmektedir.

Sonuç olarak bu sorunlarla mücadele etmek için, medya okuryazarlığının geliştirilmesi, sosyal medya platformlarının sorumluluk üstlenmesi ve yasal düzenlemelerin yapılması gibi adımlar atılması gerekmektedir.

### **SAHTE HABER VE SAHTE HABERCİLİK NEDİR**

Sahte haber, gerçeklikle uyuşmayan, manipülatif ya da yanlış bilgiler içeren haberler olarak tanımlanabilmektedir. ‘‘ Yalan haber kavramı ‘‘gazetecilik prensipleri altında toplanan enformasyonun doğrudan yanlış veya yanıltıcı içerik olarak maskelenmesi’’ (‘‘What can publishers do about ‘‘fake’’ news?’’, 2017) olarak tanımlanabilir.’’ (Şener, 2018) Bu tür haberler, kamuoyunu etkileme, toplumsal algıyı şekillendirme veya belirli bir görüşü savunma amacını taşıyabilmektedir. Bunlardan bahsederken bilmemiz gereken önemli tanımlamalar vardır bunlar yalan haber kavramının geniş kapsamlı bir terim olmasından kaynaklı ortaya çıkmaktadır. ‘‘ 2018 yılında İngiliz hükümeti, yeterli ve anlamlı bir tanımının olmaması dolayısıyla bu terimin resmi belgelerde veya makalelerde kullanılmasını yasakladı. Bunun yerine, ‘‘dezenformasyon’’ ve ‘‘yanlış bilgilendirme’’ terimlerinin tercih edildiğini açıkladı.’’ (kaspersky.com.tr)

Dezenformasyon: Kasıtlı olarak oluşturulan ve paylaşılan yanıltıcı haberler olarak tanımlanabilmektedir. ‘‘ Marwick ve Lewis (2017), sosyal medyadaki komple teorilerini ve propaganda amaçlı paylaşımları dezenformasyon olarak nitelendirmektedir.’’ (Bahar, 2020)

Yanlış Bilgilendirme (Misenformasyon) : Sahte veya yanıltıcı bilgiler anlamına gelmekle birlikte kasıtlı veya özellikle yanlış bilgilendirme amacıyla kullanılmamış olabilmektedir. ‘‘ Wardle ve Derakhshan (2017), misenformasyonu yanlış ancak zarar vermek amacıyla üretilmeyen bir bilgi olarak betimlenmektedir.’’ (Bahar,2020)

Sahte haberlerin en yaygın türleri şöyle açıklanabilmektedir:

1. Tık tuzağı (Clickbait): Başlık ve içerik, ilgi çekici olup gerçeği yansıtmaz sadece tıklanma amacını taşımaktadır.
2. Propaganda: Belirli bir görüşü desteklemek veya karalamak amacıyla yapılan bilgi manipülasyonu olarak söylenebilmektedir. ‘‘ Propagandanın, insanların ‘‘nasıl düşünmesi gerektiğini değil, ne düşünmesi gerektiğini dayattığı’’ varsayımı artık değişmiştir.’’ (Kazaz, Akyüz, 2019)
3. Düşük Kaliteli Gazetecilik: Doğrulanmamış veya kalitesiz kaynaklardan alınan bilgilerle oluşturulan haberler olarak tanımlanabilmektedir. ‘‘ geleneksel gazeteciliğin günümüzde büründüğü biçim olan hızlı gazeteciliğin beraberinde getirdiği yüzeysel, derinlikli olmayan, düşük kaliteli, toplumsal açıdan kritik önem taşıyan sorunları haberleştirmeye ne niyeti ne de zamanı olan, rakiplerine haber atlatma telaşı içinde eleştirel duruşu yitirmiş tarzının karşısına, haberciliği aceleye getirmeyen, derinlikli, kapsamlı, yüksek kaliteli, eleştirel, şeffaf ve hesap vermeye hazır bir tarzı yerleştirmeye çalışmaktadır.’’ (Aşkın,2023)
4. Yanıltıcı Başlıklar: İçeriğe uymayan başlıklar okuyucuya yanıltıcı bilgiler verebilmektedir.
5. Sahte İçerik: Tamamen uydurulmuş, gerçeklikle ilgisi olmayan bilgiler olarak tanımlanabilmektedir.
6. Hiciv veya Parodi: Gerçekmiş gibi gösterilen fakat gerçek olmayan içerikler olarak tanımlanabilmektedir.

Sahte habercilik, gerçek dışı veya etkileyecek bilgilerin, haberlerin veya içeriklerin kasıtlı olarak üretilmesi olarak tanımlanabilmektedir. Bu tür habercilik, genellikle bireyleri yanıltmak, toplumu manipüle etmek veya görüş yaymak amacıyla yanlış bilgilerin kullanılmasıyla karakterizedir. Sahte habercilik, haber kaynaklarının güvenilirliğini sarsabilmektedir, toplumsal gerilimlere yol açabilmektedir ve bilgi kirliliği yaratabilmektedir. ‘‘Sahte habercilik, yanlış veya yanıltıcı bilgi içeren haberlerin kasıtlı olarak yayınlanmasıdır.’’ (Özsalih, 2023) Bu tür haberler genellikle sosyal medya, internet siteleri veya sosyal medya platformlarında yayılır ve görünüşte güvenilir kaynaklarmış gibi sunulan yanıltıcı içerikler içermektedir.

Sahte habercilikte kullanılan en yaygın 5 tür vardır bunlar şunlardır:

1. Çarpıtma: Yanlış sürükleme ve yönlendirme olarak tanımlanabilmektedir.
2. Manipülasyon: Seçme, ekleme ve yorumlama yoluyla değiştirilmiş bilgi olarak tanımlanabilmektedir.
3. Bağlamdan Koparma: Doğru bilginin, içinde bulunduğu olaylar ve konu saptırmaları olarak söylenebilmektedir.
4. Hatalı İlişkilendirme: Bir olayla ilişkilendirilen konuyu farklı bir konuyla yansıtan fotoğraf, video vb. Haber başlıklarının kullanılması olarak karşımıza çıkabilmektedir.
5. Uydurma: Gerçeklikle ilgisi olmayan ve herhangi bir kanıt bulundurmeyen içerikler olarak karşımıza çıkabilmektedir.

Sahte habercilik günümüzde yaygın karşımıza çıkmaklar birlikte maruz bırakılma durumumuzu yeni medya dolayısıyla çok fazla etkilemektedir. Bu durumda almamız gereken önlemler bu araştırmanın çözüm önerileri kısmında ele alınmaktadır.

## YENİ MEDYADA SAHTE HABERLERİN YAYILMASI

Günümüzde yeni medya kullanıcılarına içerik üretme ve geri bildirim olanağı tanıdığından kaynaklı sahte haberlerin üretilmesi ve yayılması kolay bir durum haline gelmektedir. Sosyal medya dijital teknolojilerin ve internetin gelişmesiyle daha ulaşılabilir bir hale gelmiştir. Bu durum, sahte haberlerin geniş kitlelere erişebilmesine olanak tanımıştır. Sahte haberlerin yayılmasında rol oynayan faktörler şu şekilde karşımıza çıkmaktadır:

**Teknolojik gelişmeler:** Dezenformasyonun kolayca üretilmesine ve yayılmasına neden olmakla birlikte, sosyal medyada sahte haberlerin hızlı ve kolay bir şekilde yayılmasını sağlamaktadır. Kullanıcıların gerçeklik algısını yitirmesine sebep olmaktadır.

**Ekonomik Çıkarlar:** Sahte haberler, bazı kişiler veya kuruluşlar için ekonomik kazanç elde etmenin bir yolu olarak kullanılabilir.

**İdeolojik Nedenler:** Belirli bir konuyu yaymak veya desteklemek için kullanılabilir. Belirli bir ideolojiyi destekleyen sahte haberler kamuoyunu oluşturmak veya yayılmasını sağlamak mümkün olabilmektedir.

**Dini Nedenler:** Dini amaçlar için kullanılabilir. Belirli bir dini görüşü desteklemek veya başka görüşleri itibarsızlaştırmak için sahte haberler üretilmektedir.

**Kişisel Nedenler:** Bireyler, kendi görüşlerini desteklemek için sahte haberler üretilmektedir. Bu bireyler, sahte haberleri gerçek haberlerden ayırt edemeyen kişileri etkilemeyi ve kendi görüşlerini yaymayı amaçlamaktadır.

Sosyal medya, demokrasinin zayıflaması, popülizm ve psikolojik faktörler olarak karşımıza çıkmaktadır. ‘‘Sosyal medya platformları, kullanıcıların kendi filtre baloncuklarına hapsolmesine ve farklı görüşlere maruz kalmamasına neden olmaktadır. Bu durum, insanların kendi görüşlerini destekleyen haberlere daha fazla güvenmelerine ve sahte haberleri gerçek olarak kabul etmelerine neden olabilmektedir.’’ (Yıldıran, Özbek,2021)

## SAHTE HABERLERİN YAYILMASINDA X'İN ROLÜ

Sosyal medyanın haber yayılma hızını artırması, sahte haberlerin etkisini güçlendirmektedir. Kullanıcıların paylaşımları, haberlerin viral bir şekilde yayılmasına neden olabilmektedir. Algoritmaların, kullanıcıların ilgi alanlarına dayalı olarak içerik göstermesi, filtre balonu oluşturarak kullanıcıları farklı görüşlere kapalı hale getirebilmektedir. ‘‘Sosyal medya, fikir alışverişi için uygun bir kanal olarak veya sahte haberleri büyük bir popülasyonda dolaştıran beklenmedik bir kanal olarak toplum için iki ucu keskin bir kılıç olabilir. Sahte haberlerle ilgili mevcut çalışmalar, makine öğrenimine dayalı yayılma veya tanımlama yöntemlerinin teorik modellemesine odaklanırken, teorik modeller ile kara kutu yöntemleri arasındaki gerçekçi mekanizmaları anlamak önemlidir. Twitter, Weibo veya Facebook gibi dünyanın dört bir yanındaki milyarlarca kullanıcıyı içeren sosyal ağlar, bilgi alışverişini büyük ölçüde hızlandırmış ve daha sonra kamuoyunun hızla kutuplaşmasına yol açabilmiştir. Örneğin, Japonya’da, yaklaşık 80 bin kişinin hem yalana hem de düzeltmeye karıştığı 2011 depremiyle ilgili çok sayıda sahte haber yapılmıştır (Zhao, vd., 2018: 4).’’ X, 2023 yılı itibarıyla 353 milyon aktif kullanıcısı bulunan bir sosyal medya platformudur. Kullanıcıların metinler ve resimler paylaşmasına olarak tanınmaktadır. X, yalan haberlerin yayılması için uygun ortamlar yaratmaktadır.

Sosyal medya, içeriğin kullanıcılarca yaratılmasına ve paylaşılmasına olanak sağlayan uygulamalar olarak tanımlanabilmektedir. ‘‘Sosyal medya; kullanıcılara kamusal veya yarı kamusal bir profil oluşturmaya yarayan, kullanıcıları belli sistemler içinde birbirine bağlayan ve birbirleriyle etkileşim kurmasını sağlayan hizmetler olarak tanımlanmaktadır’’ (Boyd & Ellison, 2008: 2). Bu çalışmada X örneği üzerinden incelemeler yapılacağı için kendi web sitesindeki tanımı şöyledir: ‘‘Twitter seni ilginç bulduğun son hikâyelere, fikirlere, görüşlere ve haberlere bağlayan gerçek zamanlı bir bilgi ağıdır. Twitter'in kalbinde Tweetler olarak adlandırılan küçük bilgi patlamaları bulunmaktadır.’’ olarak tanımlanmaktadır. ([www.twitter.com/about](http://www.twitter.com/about)).

Sahte haberler neden X’de daha fazla yaygınlık gösterir ve etkileşim alır çünkü bazı faktörlerden dolayı bireyler tarafından daha ilgi çekici ve paylaşılabilir olmaktadır.

Bu faktörler şunlardır:

1. Duygusal tepkiler uyandırır bu tepkiler yalan haberler genellikle öfke, korku veya heyecan gibi duyguları tetikleyen dil kullanabilmektedir. Duyguları tetikleyen haberler, bireylerin etkileşimlerini arttırmaktadır.
2. İnanılması kolaylardır. Yalan haberlerde genellikle doğru haberlere benzer bir dil ve üslup kullanılır. Bu durum, bireylerin doğru haber olarak algılanmalarını ve paylaşmalarını kolaylaştırmaktadır.
3. Dağıtım için tasarlanmıştır. Yalan haberler genellikle sosyal medya için optimize edilir. Bu durumda daha kolay ve hızlı bir etkileşime sebep olmaktadır.

Farklı faktörleri de örnek verebiliriz fakat araştırmalar da yaygınlık gösteren ve elde edilen en bilindik faktörler bunlar olarak karşımıza çıkmaktadır.

Sahte haberleri bireylerin X’de ayırt edebilmesi için nelere dikkat etmesi gerekmektedir:

1. Kaynak doğrulama yöntemleri, doğrulanmış kaynaklar haberin güvenilirliğini artırabilmektedir.
2. Haberlerin tarafsızlığını değerlendirme, öznel ifadelerin analizi haberin tarafsız olup olmadığını belirlemede yardımcı olabilmektedir.
3. Görsel ve metin analizi, manipüle edilmiş içerikleri tespit etmede etkili olabilmektedir.

Bu bilgilere dayanarak sosyal medya kullanımlarında, paylaşılan içeriklere sonsuz güvenilirlik olmaması gerektiği gözlemlenmektedir.

### İNSANLAR SAHTE HABERLERE NEDEN İNANIYOR

Sahte haberlere inanmamızın altında çeşitli sosyal ve psikolojik faktörler yatmaktadır. Birincil etkenlerden biri, toplumda geniş bir kesimin yanlış bilgilere inanması durumunda, bireylerin de bu yanlış bilgilere inanma olasılığı artmaktadır. Bu durum, toplumsal normlara uyum ve sosyal kabul arayışıyla ilişkilendirilebilmektedir. ‘‘ Yalan haberlere inanmayı tetikleyen etmenlerden biri de sürü psikolojisi. Buna göre, insanlar genellikle kendi fikirlerini oluşturmak yerine başkalarının fikirlerine yöneliyor.’’ (dw.com, 2023)

İkinci olarak, sosyal medya platformlarında algoritmanın rolü önemli bir konumdadır. Bu algoritmalar, kullanıcıların geçmiş etkileşimleri ve ilgi alanlarına dayanarak önerilerde bulunabilmektedir. Bu öneriler bireyleri belirli bir düşünce tarzına yönlendirme potansiyeline sahiptir ve yalan haberlere olan eğilimi etkileyebilmektedir. ‘‘ Kişiselleştirme özelliğinin internet üzerinde vakit geçiren tüketicilerin isteklerini, beklentilerini ve ihtiyaçlarını daha yakından yansıtan bir içerik akışı oluşturmaya fayda sağladığı ve bu bağlamda kişiselleştirmenin marka sadakati ve satışa yönlendirme konularında olumlu açıları olduğu da düşünülmektedir (Soojian, 2015’ten akt. Kuş, 2021:57).’’

Üçüncü olarak, bireylerin kendi hikayelerine inanma eğilimi, yalan haberlere duyarlılığı artırabilmektedir. Örneğin, kişinin yargılarına ve görüşlerine uygun olan bilgilere daha açık olma eğilimi, gerçeklikten uzaklaşma riski taşıyabilmektedir. ‘‘ Hikayeler oldukça etkileyici olabiliyor. Lincoln Üniversitesinden Imke Henkel, gerçeklik yerine sürükleyici hikayeleri tercih etme eğiliminin, kişinin yanlış iddialardan veya söylencelerden daha kolay etkilenmesine yol açtığını öne sürüyor.’’ (teyit.org,2019)

Bireylerin yalan haberlere inanma eğilimi karmaşık bir sorun olabilmektedir. Toplumsal, psikolojik ve teknolojik faktörlerin bir kombinasyonu olarak şekillenebilmektedir.

### ETİK SORUNLAR

Sahte haberlerin yayılması yeni medyada çeşitli etik sorunları gündeme getirmektedir. Etik sorunlarda ele almamız gereken sorunlar arasında bilgi kirliliği, manipülasyon, güvensizlik ve hakikatin çarpıtılması, kamuoyunun yanıltılması sorunları bulunmaktadır.

‘‘Etik kavramı çoğu kez ahlak kavramı ile birbirinin yerine kullanılsa da ahlak, ‘‘insanların iyi/kötü nitelendirildiği manevi özellikleri, bu özelliklerle sergilediği davranışlar ve huylar’’ olarak tanımlanabilirken etik, ‘‘İnsanların davranış ve yargılarını ahlak temelinde inceleyen bir felsefe dalı, ahlak felsefesidir’’ (İrvan, 2003: 81). Yeni medya etiği ise yeni medya ortamlarındaki sorunlar ve sorumluluklarla ilgili bir kavramdır. Yeni medya ortamlarının artışıyla bu ortamlardaki içerik üretimlerinin hızlı ve çok olması, yeni medyanın etik sorunlar bağlamında ele alınmasını zorunlu hâle getirmiştir (Binark ve Bayraktutan, 2013: 25-26).’’

Bilgi kirliliği, toplumun gerçeğe ulaşmasını engeller. ‘‘ Bilgi kirliliği COVID-19 salgınının ortaya çıkmasıyla birlikte gündemden düşmeyen bir kavram. Özellikle sosyal medya ve benzeri iletişim araçları ile yayılan yalan ve yanıltıcı bilgilerin bireylerin hem kaygı düzeylerini artırdığı hem de salgının denetlenmesini zorlaştıracak davranışlar göstermesine neden olduğu uzmanlarca sıklıkla dile getirilmekte.’’ (Yavuz,2020) Doğru bilgiye ulaşımı zorlaştırabilmektedir, örneğin dezenformasyon içeren toplum, kültür ve demokrasi konulu haberlerin yayılması itibar zedelenmesine neden olabilmektedir. Bu durumda, bilgi kirliliğine ve toplumsal huzurun bozulmasına neden olabilmektedir.

‘‘Gelişen ağı ve kullanıcı sayısı ile sosyal medya, çeşitli yönlendirmelere ve etkilemelere yani manipülasyon araçlarına sahiptir.’’ (Tekke, Lale, 2021) Manipülasyon, sahte haberlerde insanların düşüncelerini ve duygularını kontrol etmek amacıyla kullanılmaktadır. Örneğin, sahte haberlerde olumsuz konular yer alıyorsa, haberlerin yayılması ve bir topluluğun hedef alınması manipülasyon sonucunda toplumda güvensizliğe sebebiyet verebilmektedir.

‘‘Güven olmaksızın toplumların ayakta kalması ve sistemlerin sürekliliği olanaklı görünmemektedir.’’ (Özel,2011) Güvensizlik, toplumun birbirine ve kurumlara karşı inancını zedeler ve toplumsal güveni sarsabilmektedir.

Etik sorunlarda hakikatin çarpıtılması ve kamuoyunun yanıltılması, toplumun yanlış kararlar almasına sebep olabilmektedir ve demokrasinin işleyişini tehdit edebilmektedir bu durum etik açıdan kabul edilemez bir durum ve sorun olarak karşımıza çıkmaktadır. Demokrasinin işleyişini nasıl tehdit ettiğine değinecek olursak seçim sonuçlarını etkileyebilir, dezenformasyon seçimlerde oy verme kararını etkileyebilir. Bu durum, demokratik seçim sonuçlarının bozulmasına yol açabilmektedir. Halkın katılımını azaltabilir, siyasi işleyişe olan inanç azalması sebebiyle katılım oranı azalmaktadır. Çoğulculuğa zarar verebilir, dezenformasyon farklı görüşlere sahip insanların ifade özgürlüğünü engellemesinden kaynaklı demokrasinin temelinde olan çoğulculuğa zarar vermektedir.

Dezenformasyon, toplumun karar verme sürecini etkilemektedir. Bilinçli seçimler yapmayı zorlaştırır, karar verme sürecini yavaşlatabilir ve yanlış karar vermeye sebep olabilmektedir.

## ÇÖZÜM ÖNERİLERİ

Sahte haberler inanılması konusunda toplum ve bireyler olarak ne gibi önlemler alınabilmektedir ve bunlar hangi konulara karşımıza çıkmaktadır. Bu durumlarda kullanıcılara, sahte haberleri tanıma ve doğrulama konusunda eğitim programları sunulabilmektedir. Bu programlar, medya okuryazarlığı ve bilgi doğrulama konularını kapsayabilmektedir. Sahte haberlerin önüne geçebilmek adına X platformu sahte haberleri doğrulayan ve bireylere doğrulanmış bilgiler sunan platformlarla iş birliği yapabilmektedir. Yanıltıcı içerikleri tespit edip güvenilir bilgiler sunarak sorunu azaltabilmektedir. Yalan haberlerin yayılmasını önlemek için algoritma güncellemeli ve yanıltıcı içeriklere hızlı bir şekilde müdahale de bulunabilmektedir. Kullanıcılarını sahte haberlere karşı aktif bir şekilde denetleme ve raporlama konusunda teşvik edebilmektedir. Haber paylaşımı yapan hesapları daha sıkı bir şekilde doğrulama süreçlerine tabi tutabilmektedir ve doğrulama işareti ile daha güvenilir hesapları vurgulayabilmektedir. Bu öneriler, X'de sahte haberlerin yayılmasına karşı etik sorunlara çözüm önerileri getirmeyi amaçlamaktadır. Bu önerilere karşın

Yeni medyanın bize dayattığı davranışlardan kaçınmak amacıyla alınabilecek önlemler ve eğitimler şu şekilde karşımıza çıkabilmektedir:

1. Medya okuryazarlığının geliştirilmesi
2. Çeşitli kaynaklardan bilgi edinmek,
3. Eleştirel düşünmeyi geliştirmek,
4. Yeni medya platformlarının güçlendirilmesi
5. Yasal düzenlemelerin yapılması olarak karşımıza çıkmaktadır.

Medya okuryazarlığının geliştirilmesi, internet ortamında paylaşılan bilgilerin yanlışlığını ve doğruluğunu teyit etmek açısından önemli bir durumdur. Bu durum için medya okuryazarlığı eğitimlerinden veya çeşitli kaynaklardan yararlanılabilir. Çeşitli kaynaklardan bilgi edinmek, sahte haberlerin ve yanlış bilgilerin edinilmemesini sağlayabilmekte eleştirel yaklaşıma olanak tanımaktadır. Eleştirel düşünmeyi geliştirmek, insanların analiz etme ve yorumlama yeteneğine katkıda bulunmaktadır. Yeni medya platformlarında yapılan paylaşımların doğruluğundan emin olmak ve kullanıcılarını yanlış yönlendirmemek adına güçlendirme çalışmaları yapılmaktadır. Bu çalışmalar kullanıcılara iyi hizmet vermek, daha güvenilir bir platform sunmak ve daha kapsayıcı olması için yapılan çalışmalardır. Güvenilir olması için yapılan çalışmalarda içerik politikaları yer almaktadır. İçerik politikaları çalışmalarında, yayınlanan içerikleri kontrol etmek için çeşitli politikalar kullanılmaktadır. Bu sebeple platformlar için yasal düzenlemelerde yapılmaktadır.

Yasal düzenlemeleri içeren konular başlıca yanlış bilgilerin yayılmasına karşı mücadele, dijital platform sorumluluğu ve medya okuryazarlığını geliştirmek adına yapılan düzenlemelerdir. Yasal düzenlemelerin yapılma amaçları demokrasinin işleyişini korumak, toplumsal huzuru ve güvenliği sağlamak, kamuoyunun yanlış bilgilendirilmesi önlemek olarak karşımıza çıkmaktadır. ‘‘Eğlence iletişiminin neden olabileceği etik sorunlara çözüm arayışına giden bazı ülkeler olası zararlı içeriklere ilişkin uyarılar sunan kuralları içeren çeşitli organizasyonlar kurmuşlardır. Amerika Birleşik Devletleri’nde filmler için Amerikan Sinema Filmleri Birliği, oyunlar için Eğlence Yazılım Değerlendirme Kurulu ve televizyon için TV Ebeveyn Kuralları bu organizasyonlara örnek olarak verilebilir. Ayrıca, Hollanda’da Görselİşitsel Medya Sınıflandırma Enstitüsü (NICAM) çocuklara zarar verebilecek bilgisayar oyunu, filmler ve televizyon programları için ‘‘kijkwijzer’’ isimli kılavuzu kullanmaktadır. Ancak bu uygulamaların yeterli olamayacağı durumlar için (şiddet ve müstehcen unsurlar gibi) bazı yasal yaptırımlar da uygulanmaktadır. Özellikle bilgi ve iletişim teknolojilerinde yaşanan gelişmelerle birlikte çevrimiçi eğlence ortamlarına erişilebilirliğin artması evde ve okullarda içerik kontrolü ve filtrelemeyi gerekli hâle getirmektedir. Bu nedenle bu sorunlara çözüm olarak çocukların web siteleri ve çevrimiçi uygulamalara erişimi için ebeveynlerinin iznini almaları tartışılmaktadır. ‘‘

## ÇALIŞMANIN ÖNEMİ YÖNTEMİ VE AMACI

Son yıllarda sosyal medya platformlarının kullanılmasının artmasıyla bireylerin haber alma süreçleri de değişmiştir. Bu süreçlerin değişmesi ile birlikte yalan haberlerin yayılması da hızlanmıştır. Çalışmanın konusunu, yeni medya ve sahte haberlerin yayılmasını X örneği üzerinden incelenmesini ele alacaktır. Yeni medya platformlarının kullanımının artmasıyla birlikte sahte haberlerin yayılmasının X örneği üzerinden etik boyutları tartışılacak, sahte haberlerin insanlar üzerindeki etkisi ve güvenilirliğini sarsan etkiler ele alınacaktır. Aynı zamanda, etik değerleri ihlal eden veya etik kurallara uymayan sahte haberlerin neden yayıldığı incelenecek ve bu yayılmanın medyadan ve kullanıcılardan kaynaklandığı durumlar aydınlatılacaktır.

Bu çalışmada şu sorulara cevap aranacaktır:

1. X sahte haberlerin yayılması için uygun bir zemin mi hazırlıyor?
2. Sahte haberlerin yayılması, kamuoyunun bilgi edinme hakkını ve demokrasiyi tehdit etmekte midir?
3. Sahte haberlerin yayılması ile ortaya çıkan etik sorunlara nasıl çözümler bulunabilir?

Sahte haberlerin sosyal medya platformlarındaki etkisini görmek ve çözüm önerileri sunmak adına, X bir orta takipçili bir yüksek takipçili hesabın ele alınarak ‘‘Günün Yalanları’’ ve ‘‘Teyit’’ hesaplarının incelenmesi, karşılaştırması görülmektedir.

“Teyit” isimli X(Twitter) hesabı, sahte haberleri ve yanlış bilgileri tespit ederek toplumsal bilinci artırmayı hedefleyen bir platformdur. Bu hesap, sosyal medya üzerinde dolaşan yanıltıcı içerikleri doğrulamak ve gerçekleri ortaya koymak amacıyla faaliyet göstermektedir. Teyit, özellikle X (Twitter) üzerinde dolaşan sahte tweetleri tespit etmek ve kullanıcıları bilgilendirmek için çeşitli yöntemler kullanabilmektedir.

“Günün Yalanları” isimli X (Twitter) hesabı, mizahi içerikli paylaşımlar yaparak bilgilere karşı farkındalık oluşturan bir platformdur. Hesap, özellikle günlük yaşamda dolaşan yanıltıcı bilgileri alıp, bunları mizahi bir şekilde ele alarak takipçilerini bilinçlendirmeyi amaçlamaktadır. X üzerinden paylaşımlar yaparak mizahi bir dil kullanarak bilgi doğrulama süreçlerine katkı sağlamaktadır.

“Teyit” isimli ve “Günün Yalanları “ X hesabından sahte haberlerin incelendiği bu çalışmada, eleştirel söylem analizi ve içerik analizi kullanılmaktadır.

İki analiz yöntemi birbirini tamamlayacak şekilde kullanılmaktadır. Eleştirel söylem analizi, metnin anlamını ve işlevini ortaya koymaktadır, içerik analizi ise metnin içeriğini ve yapısını ortaya koymaktadır. Bu iki analiz yöntemi kullanılarak, çalışmanın daha kapsamlı ve derinlemesine bir analiz sunması hedeflenmektedir.

“Eleştirel söylem analizi, söylemin eleştirel analizine yönelik çeşitli yaklaşımları içeren disiplinlerarası bir alandır.” (Şah,2020)

“İçerik analizi: nesnel, ölçülebilir, doğrulanabilir bilgilere ulaşmak amacıyla doküman,metin ve evrak gibi pek çok farklı materyali belli kurallar dahilinde (örnekleme, kodlama, kategori vs.) analiz etmeyi amaçlayan nitel araştırma yöntemi içerisinde yer alan bir tekniktir.” (Metin,Ünal, 2022)

Bu çalışmada makro yapı kullanılarak analizler yapılacaktır. Makro yapı, çözümlenmeleri tematik ve şematik yapı üzerinden ele alınmaktadır. Tematik çözümlenmede, tweet başlığı, anlatılan konu, fotoğraf-video ve içeriklerin birbiriyle olan ilişkisi ele alınacaktır. Yalan haberlerin incelemesinde ana olay, nasıl sunulduğu ve doğru bilginin nasıl ele alındığı şematik yapıda incelenmiştir. Çalışmanın tematik ve şematik bölümleri analiz edilerek bulgular değerlendirilmektedir.

## EVREN VE ÖRNEKLEM

Yalan haberlerin X platformunda yayılmasının sunumunu ele alan bu çalışmanın evrenini, 2023 yılında X platformunda “Günün Yalanları” ve “Teyit” adlı hesaptan 5 tane çok fazla etkileşim alan yalan haberlerin açıklanarak doğru bilgi vermesinin incelenmesini oluşturmaktadır. Söz konusu evren içerisinde seçilen ve örneklem olan X platformunda “Günün Yalanları” ve “Teyit” adlı hesaptan yayınlanan sahte haberlerin X üzerinden incelenerek bireyle doğru sunulmasını konusu içerik analizi ve eleştirel söylem analizi kapsamında araştırmanın konusunu oluşturmaktadır.

## ARAŞTIRMANIN SINIRLILIKLARI

Bu araştırma X (Twitter) platformunda “Teyit” ve “Günün Yalanları” hesaplarından 5 sahte haberin açıklanarak doğru bilgi vermesinin incelenmesini kapsamaktadır. Çalışma, 2023 yılında gündemde olan olayların sahte haber olarak sunulmasının incelenmesi ile sınırlandırılmıştır.

## MAKRO YAPIYA YÖNELİK TEMATİK ANALİZ

### İçerik Konusu

Sosyal medya hesaplarında yayımlanan içeriklerde en önemli nokta paylaşılan içeriğin konusu olabilmektedir. Bunun sebebini X hesabı üzerinden ele aldığımızda konulara göre gündeme girme durumu olmasından kaynaklanabilmektedir. X platformunda toplumların dikkatini çeken konular Türkiye ve Dünya gündemine girerek insanların karşısına çıkabilmektedir. Konu ilgi çekiciyse, daha fazla hesabın etkileşime girmesine olanak tanımaktadır. Günün Yalanları ve Teyit X hesaplarının yaptığı paylaşımların içerik konusu Tablo 1 ve 2’de görülmektedir.

### Yalan Haber

Yalan haberler, X platformunda kullanıcıların karşısına çıktığında inanılması durumu çok yaygın görülmektedir. Bu durum bireylerin yorum yapmasını, tekrar paylaşmasına ya da tepkilerini göstermelerine olanak tanıdığından X platformunda artarak yaygınlaşan yalan haber paylaşımları görülmektedir. Kullanıcılar bu paylaşımlarda etkileşime girmeye devam ettiklerinden önüne geçilemeyen sahte, asılsız paylaşımlara devam edildiği yadsınamaz bir gerçek olduğu karşımıza çıkmaktadır. Günün Yalanları ve Teyit X hesaplarının 2023 yılında yapılan yalan haber paylaşımları Tablo 1 ve 2’de görülmektedir.

### Doğru Haber

Bireylerin gündemden haberdar olma ihtiyacı kullanılan sosyal medya platformlarında da devam etmektedir. X platformunu bu ihtiyacı gidermek için kullanılmaya yaygın bir platform olmasından kaynaklı güvenilir ve onaylı X hesaplarının yaptığı haber paylaşımlarından doğru haberler takip edilebilmektedir. X hesabında paylaşılan doğru haber örnekleri Tablo 1 ve 2’de görülmektedir.

### Fotoğraf- Video

Tweetlerde kullanılan görseller, kullanıcılara inandırıcılık sağlaması açısından kanıt niteliğinde olabilmektedir. Fotoğraflar ve videolar paylaşılan içeriği desteklemektedir ve kullanıcıların içeriğe inanma konusunda yardımcı olan bir etken olmaktadır. X platformunda Günün Yalanları ve Teyit hesaplarının içeriklerde kullandıkları fotoğraf ve videolarda aktardığı bilgiler Tablo 1 ve 2'de gösterilmektedir.

### BULGULAR

X platformunda aynı amacı taşıyan ‘‘Günün Yalanları’’ ve ‘‘Teyit’’ yalan haberlerin araştırarak ve resmi incelemeler yaparak doğru haberleri paylaştığı onaylı hesaplardır. 2023 yılında Yeni medyada sahte haberlerde X örneğinde incelenen konuda içerik konusu, yalan haber, doğru haber ve fotoğraf-video içeriklerine Tablo 1 ve 2’de yer verilmektedir. 2023 yılında X platformunda yayınlanan sahte haberlerin doğru yönlerinin incelenmesi ile Günün Yalanları hesabından 5, Teyit hesabından 5 habere yer verilmektedir. Makro yapıya yönelik tematik ve şematik analizler X hesaplarına göre ayrı ayrı değerlendirilmiştir.

### Makro Yapıya Yönelik Tematik Analiz

#### Günün Yalanları X Hesabı İçerik Konusuyla İlgili Bulgular

Günün Yalanları X hesabında yer alan içerik konuları incelendiğinde genel olarak Türkiye ve Dünya gündeminde olan haberlerin, asılsız paylaşıldığı görülmektedir. 1 no’lu içerik konusunda ‘‘İsrail-Filistin Savaşı’’ konusuna bakıldığında gündemde olan savaşla alakalı bir konu olduğu görülmektedir. 2 no’lu içerik konusunda ‘‘Deprem kaçırılan Türk çocuğu’’ vurgusu yapılarak 1999 depremindeki yaşanan olayların gerçek bir açıklaması istenmektedir.3 no’lu ‘‘Çadırlar sökülerek depremzedeler mağdur ediliyor.’’ içerik konusu 2023 Şubat depreminde hala çadırda yaşayan insanların mağduriyetinden bahsetmektedir. 4 no’lu ‘‘ Hamas kızları kaçırıyor’’ içerik konusunda sosyal medya gündeminden düşmeyen İsrail-Filistin savaşıyla alakalı bir tweet olduğu görülmektedir. 5 no’lu ‘‘ Mossad Ajanı’’ içerik konusu savaşla alakalı konulara değinen ve sorgulayan bir tweet olduğu görülmektedir.

#### Günün Yalanları X Hesabı Yalan Haberlerle İlgili Bulgular

X hesabında yalan haberlerin yayılması kolaylıkla olan bir durumdur, kullanıcıların etkileşimlerinin de bu durumda çok fazla katkısı bulunabilmektedir. 1 no’lu yalan haberde İsrail-Filistin çatışmaları sırasında Gazze’de bir kadının vurulduğuna dair bir video paylaşılmıştır. Bu video, İsrail destekçisi hesaplar tarafından paylaşılmış ve ‘‘Kadın’ı Hamas vurdu’’ iddiasıyla gündeme getirilmektedir. 2 no’lu yalan haberde Türkiye’de yaşanan deprem sırasında bir Türk çocuğunun kaçırıldığına dair video paylaşılmıştır. Bu video, bazı sosyal medya hesapları tarafından paylaşılmış ve ‘‘Depremde kaçırılan Türk çocuğu’’ iddiasıyla gündeme gelmiştir. 3 no’lu yalan haberde Defne ilçesinde depremzedeler için kurulan çadırların kaymakamlık tarafından sökülmesine ilişkin yalan haberler paylaşıldığı görülmektedir. 4 no’lu yalan haberde ‘‘ Hamas kızları kaçırıyor’’ iddiası İsrail destekçi hesaplar tarafından paylaşılarak gündeme gelmiştir. 5 no’lu yalan haberde ‘‘ Mossad Ajanı’’ diye iddia edilen kişinin Türkiye’ye gelerek Filistinli hastalara baktığı paylaşımları yapılmaktadır.

#### Günün Yalanları X Hesabı Doğru Haberlerle İlgili Bulgular

Günün yalanları hesabı asılsız haberlerin araştırmasını yaparak doğru bir şekilde sunulmasını yapan bir X hesabı olarak karşımıza çıkmaktadır. Doğru haberleri ele aldığımızda 1 no’lu paylaşımda ‘‘ Hamas Kadını vurdu’’ iddiasının asılsızlığı kanıtlanmış ve ‘‘ Askerlerinin bölgeyi derhal terk etme çağrısında bulunduğunu, toplanıp çıktıklarında ise annesinin vurulduğunu’’ açıklayarak doğru bilgi verilmektedir. 2 no’lu paylaşımda kaçırılan Türk çocuğu iddiasının asılsız olduğu incelenerek videoda olan çocuğun babası tarafından istismara ve şiddete maruz kalan Brezilya’lı bir çocuk olduğu ortaya çıkarılmaktadır. 3 no’lu paylaşımda çadırların sökülmesi yalanının aslı daha uygun yerlere taşınarak ortak alan kullanımını ihlal etmemesine karar verildiği ve bu bilginin en az bir hafta öncesinden çadır sahiplerine söylenildiği olarak karşımıza çıkmaktadır. 4 no’lu paylaşımda İsraili askerler olan kızların videosu ve eğlendiği anlar paylaşılarak ‘‘ Hamas kızları kaçırıyor’’ denilmektedir fakat araştırmalar sonucunda asılsız olduğu ortaya çıkmaktadır. 5 no’lu paylaşımda sağlık hizmetinde bulunduğu düşünülen ve buna yönelik asılsız paylaşımların bulunduğu bu kişi açıklamalara göre temizlik görevlisi ve şu ana kadar hiçbir sağlık hizmetine dahil olmadığı açıklanmaktadır.

#### Günün Yalanları X Hesabı Fotoğraf ve Videolarla İlgili Bulgular

Sosyal medya platformlarında paylaşılan içeriklerde fotoğraf ve video kullanılması kullanıcıların daha çok ilgisini çeker ve içeriklere inandırıcılık katmaktadır. İncelenen Günün Yalanları adlı hesapta paylaşılan yalan haberlerle doğru orantılı olarak video ve fotoğraflar kullanılmaktadır. 1 no’lu içerikte kullanılan video da netlik yoktur, olan insanlar ayırt edilemez haldedir ve bu sebeple gündem de yalan haber oluşturmaya olanak tanımıştır. 2 no’lu video da babası tarafından istismar edilen Brezilya’lı çocuğun görüntülerine yer verilmiştir. Videoda Türkçe konuştuğu iddia edilmiştir fakat kalite düşüklü sebebiyle yanlış gündem oluşturmaya açık bir video olarak karşımıza çıkmaktadır. 3 no’lu paylaşımın fotoğraflarında insanlar ve çadırların gözüktüğü bir fotoğraf kullanılmıştır,

ağlayan insan detayları da eklendiğinde asılsız iddialara inanılması daha olanaklı hale gelmektedir. 4 no'lu içerikteki fotoğrafta darp edilen kızlar vardır fakat incelendiğinde yayınlanan videoda bu kızların asker olduğu ve tiktok platformunda dans ederken yayınladıkları videolar ortaya çıkarılarak doğru olmadığı vurgulanmaktadır. 5 no'lu paylaşımda gördüğümüz fotoğrafta bahsedilen kişinin resimlerine yer verilerek ajan tiplemesinde olduğu vurgulanmış ve yalan haber ortaya atılmıştır.

**Tablo 1.** Günün Yalanları X hesabından paylaşılan içeriklerdeki içerik konusu, yalan haberler, doğru haberler ve fotoğraf- videolar

| N O | İÇERİK KONUSU                                    | YALAN HABER   | DOĞRU HABER   | FOTOĞRAF-VIDEO  |
|-----|--|---|---|---|
| 1   | İsrail-Filistin Savaşı                           | Gazze'de beyaz bayrak taşıyan bir kadının vurulduğu görüntülerle ilgili İsrail destekçisi hesaplar tarafından ortaya atılan, "Kadın'ı Hamas vurdu." iddiası | 12 Kasım'da İsrail işgali altındaki Gazze'nin el-Rimal mahallesinden kaçmaya çalışan Hala Rashid Abd al-Ati, İsrail keskin nişancıları tarafından vuruldu. Abd al-Ati'nin kızı Sarah Bassem Khres, Middle East Eye'a yaptığı açıklamada, İsrail askerlerinin bölgeyi derhal terk etme çağrısında bulunduğunu, toplanıp çıktıklarında ise annesinin vurulduğunu açıkladı.  | Arkadan gelen silah sesleriyle birlikte, İsrail askerlerinin bölgedeki toplu konumlarını gösteren bir video kullanılmıştır. Söz konusu videoda, doğruluğu kanıtlanmamakla birlikte 'Sivillerin tahliyesini engellemeye çalışan Hamas tarafından vuruldukları yönünde bir iddiaya yer verilmiştir.   |
| 2   | Depremde kaçırılan Türk çocuğu                   | Bazı sosyal medya hesapları tarafından paylaşılan "depremde kaçırılan Türk çocuğu" iddiası  | Videonun, Brezilya'da bir canı babanın çocuğuna uyguladığı şiddet görüntüleri olduğu ortaya çıktı. İlk olarak 10.01.2021 tarihinde noticias.r7.com isimli haber sitesinde yayımlandığı, söz konusu videonun Brezilya'da ekranlarda da tartışma konusu olduğu tespit edilmiştir.   | Kullanılan görüntülerin sansürlenmiş versiyonlarında kan içinde kalan küçük bir çocuk yer almaktadır. Çocuğun ilettiği süre zarfında sanki Türkçe dilini kullanmışçasına işittiğimiz "Özür dilerim Arthur" cümlesi ileri sürülse de detaylı araştırmalarla bunun doğru olmadığı belirlenmiştir  |
| 3   | Çadırlar sökülerek depremzedeler mağdur ediliyor | Defne'de kaymakamlık emriyle çadırlar sökülerek depremzedeler mağdur ediliyor iddiası   | Yol,kaldırım, park gibi vatandaşların ortak kullanım alanlarında kurulup depo olarak kullanılan çadırlar, Defne Belediyesi ekipleri ile Defne Kaymakamlığı tarafından kiralanan araçlarla vatandaşların uygun göreceği alanlara taşınıyor. Bahse konu çadırların kurulduğu alanların, vatandaşların ortak kullanım alanı olduğu ve buldukları yerden kaldırılarak sahibinin uygun gördüğü yerlere taşınacağı konusunda ilgili en az bir hafta öncesinden çadır sahiplerine bilgi verildi. | Atılan tweetlerde kullanılan görüntüler insanların bulunduğu görüntüleri içermektedir bu görüntülerde Kaymakamlık çalışanları olan insanlar olmasına rağmen tweetleri atan hesaplar bunların çete üyeleri olduğunu iddia ederek zor kullanarak vatandaşların çadırlarının söküldüğünü ve mağdur olduğunu söylüyor fakat bunun doğruluğunun olmadığını |

|   |                         |   |   |   |
|---|-------------------------|---|---|---|
|   |                         |   |   | kaymakamlık açıklama yaparak belirtmiştir.  |
| 4 | Hamas kızları kaçırıyor | İsrail destekçisi hesaplar tarafından paylaşılan "Hamas kızları kaçırıyor" iddiası yalan  | Hamas tarafından esir alınan videodaki kızlar asker. Bu askerler aynı zamanda Filistinlilere yaptıkları zulümden sonra eğlendikleri anları videoya çekmektedir.   | Paylaşılan tweetlerde kullanılan video ve fotoğraf görüntülerinde "7 Ekim'de Hamas teröristleri tarafından kaçırılan 4 genç kız (18-19) 94 gün sonra hala esaret altında. İşte bunun için savaşıyoruz onlara hala esaret altında" cümleleri kurulmuştur fakat incelemelerden sonra asılsız görüntüler olduğu ve gerçeklik içermediği görülmektedir.                               |
| 5 | Mossad Ajanı            | "Mossad ajanı yabancı uyruklu doktor Türkiye'de hastanede çalıştı" ve "Bu şahıs Filistin'den getirilen hastalara bakıyordu" iddialara yalan Dr.Fahrettin koca iddiaları yalanladı | Milli İstihbarat Teşkilatı (MİT) ile İstanbul İstihbarat Şube Müdürlüğü ekiplerinin Mossad'ın Türkiye'deki ajanlarına yönelik yaptığı operasyonlar kapsamında gözaltına alınan bahse konu şahıslar arasında, iddia edildiği gibi yabancı uyruklu doktor yok. Doktor olduğu iddia edilen yabancı uyruklu şahıs da temizlik görevlisi. Temizlik görevlisi şahsın bugüne dek hiçbir sağlık hizmetine dahil olmadığı açıklandı. Bu şahsın Gazze'den getirilen hastalarla ilgilendiği iddiası da tamamen yalan açıklamaları yapılmaktadır. | Kullanılan fotoğraflar da iddia edilen şahsın resimlerini görülmektedir. Halk tarafından hastanelerde çalıştığı iddia edilen kişinin tweetlerde elini kolunu sallayarak ülkeye geldiği, sınavlara sokulmadığı, vatandaşlık ve Sağlık Bakanlığında iş verildiği söylenerek algı oluşturulmuştur fakat gerekli kurumların ve kişilerin açıklamasıyla doğru olmadığı söylenmektedir. |

### Makro Yapıya Yönelik Tematik Analiz

#### Teyit X Hesabı İçerik Konusuyla İlgili Bulgular

Teyit hesabına bakıldığında yer alan içerik konuları gündemde olan konulardan ve kullanıcıları etkileyen olaylar olduğu görülmektedir. İçerik konularında detaylı bilgiler verilerek her anlamda ele alıp açıklanmıştır. 1 no'lu içerik konusunda "Mısır'da kaçırılan çocuklar" konusuna değinilerek vicdan üzerinden algı yaratılmaya çalışılmıştır. 2 no'lu içerik konusunda uzun senelerdir gündemde olan ve yine gündeme düşen "Epstein adasındaki çocuktan" bahsedilmektedir. 3 no'lu içerik konusunda "Phileas model araçların parçalanmasından" bahsederek siyaset konusuna değinilmektedir. 4 no'lu içerik konusunda "Afganistan Dışişleri Bakanı'nın Türkiye'de şeriat" ile ilgili açıklamalar yaptığı söylenerek din hakkında konulara değinilmektedir. 5 no'lu içerik konusunda "AKP oy kullanım yaşını 18'e indirdi" paylaşımları yapılarak siyaset konulu içerikler üretildiği görülmektedir.

#### Teyit X Hesabı Yalan Haberlerle İlgili Bulgular

Teyit hesabında yapılan yalan haberler gözlemlendiğinde etkileşimi fazla olan haberler görülmektedir. 1 no'lu yalan haberde Mısır'da kaçırılan çocukların zenginlere satılmak için kaçırıldığı söylenmektedir. 2 no'lu yalan haberde Epstein adasındaki çocuğun Türkçe konuştuğu iddia edilerek adaya kaçırıldığı söylenildiği paylaşımlar yapılmaktadır. 3 no'lu yalan haberde Phileas model araçların İBB'nin parçalayarak karşı partilere misilleme yaptığı iddia edilmektedir. 4 no'lu yalan haberde Afganistan Dışişleri Bakanı'nın Türkiye'de şeriat isteyenleri ülkesine davet ettiği söylenerek din konusunda algı yapılarak yalan haber ortaya atıldığı görülmektedir. 5 no'lu

yalan haberde AKP'nin oy kullanma yaşını 18'e indirdiği bu yönetim gelmeden önce oy kullanma yaşının daha yüksek olduğu yalan paylaşımları görülmektedir.

### Teyit X Hesabı Doğru Haberlerle İlgili Bulgular

Doğru haberleri güvenilir ve onaylı hesaplardan sosyal medya platformlarında incelenebilmektedir. Teyit hesabına baktığımızda doğru haberlerin takip edilebileceği bir hesap olduğu gözlemlenmektedir. 1 no'lu haberin çocukların satılmak için kaçırılması yalan doğrusu ise çocuklarının velayet hakkını kaybeden babaları tarafından kaçırılması olarak karşımıza çıkmaktadır. 2 no'lu Türkiye'den kaçırıldığı ve Türkçe konuştuğu iddia edilen çocuğun 2021 yılında Brezilya'da kaydedilen video babasının istismarına uğrayan bir çocuğu göstermektedir ve Epstein davası ile ilgisi olmamaktadır. 3 no'lu haberde parçalanmış arabalardan bahsedilmektedir 2008'de alınan bu araçlar sık sık arızalandığı için 2015'te trafikten çekilmiştir. Trafikten çekilen araçlar onaylı bir şekilde parçalanmaktadır doğru haber bu şekilde karşımıza çıkmaktadır. 4 no'lu haberde şeriat açıklaması yaptığı söylenen Bakanın hiçbir şekilde böyle bir açıklamasına rastlanmamıştır doğru bilgiye kayıt altındaki açıklamaları incelenerek ulaşılmaktadır. 5 no'lu haberde AKP'nin oy kullanma yaşını düşürmesi incelendiğinde oy kullanma yaşının 1995 18'e indirildiğini gösteren belgelerle kanıtlanarak asılsız bir haber olduğunu ve kanıtlarla doğrusunun ortaya çıktığı paylaşımlar görülmektedir.

### Teyit X Hesabı Fotoğraf ve Videolarla İlgili Bulgular

Sosyal medya platformlarındaki hesaplara etkileşim açısından da güvenilirlik açısından baktığımızda da fotoğraf ve videolu içerikler her zaman daha ön plandadır ve ilgi çekicidir. Teyit hesabında yalan haberlerin doğruları paylaşılırken fotoğraf ve videolarla çok dikkat edilmektedir. 1 no'lu haberde paylaşılan videoda asansörde olan iki kızın bir adam tarafından kaçırıldığı görülmektedir. 2 no'lu paylaşımda kullanılan görüntülerde küçük bir erkek çocuğunu darp edilmiş bir halde ve zorla konuşturulurken görülmektedir. 3 no'lu paylaşımda görülen videoda dozerle parçalanmış arabalar görmekteyiz 'AKP'nin aldığı otobüsler hurda oldu' algısı yapmak için mi dozerle parçalıyor' diyerek paylaşılan görüntü seçimler öncesi algı yapılması olarak karşımıza çıkmaktadır. 4 no'lu paylaşımda kullanılan Emirhan Muttaki'nin fotoğrafları kullanılarak açıklama yapıldığından bahsedilmektedir. 5 no'lu paylaşımda Recep Tayyip Erdoğan'ın miting sırasında konuşurken çekilen fotoğrafları görülmektedir ve kanıt niteliğinde yayınlandığı gözlemlenmektedir.

**Tablo 2.** Teyit X hesabından paylaşılan içeriklerdeki içerik konusu, yalan haberler, doğru haberler ve fotoğraf-videolar

| NO | İÇERİK KONUSU               | YALAN HABER  | DOĞRU HABER  | FOTOĞRAF - VIDEO  |
|----|-----------------------------|--|--|---|
| 1  | Mısır'da kaçırılan çocuklar | Video Mısır'da zenginlere satılmak için kaçırılan çocukları göstermektedir iddiası                 | Çocuklarının velayet hakkını kaybeden babaları tarafından kaçırılmaktadır.   | Videoda "2023 yılında Mısır'da seks kölesi yapılmak için asansörden kaçırılan iki kız çocuğu" olduğu söylenmektedir fakat görüntüler incelendiğinde Babaları tarafından kaçırıldığı ortaya çıkmaktadır.   |
| 2  | Epstein adasında ki çocuk   | Video Epstein adasında Türkçe konuşan çocuğu göstermektedir.                                       | 2021 yılında Brezilya'da kaydedilen video babasının istismarına uğrayan bir çocuğu göstermektedir ve Epstein davası ile ilgisi olmamaktadır.                   | Kullanılan görüntülerin sansürlenmiş versiyonlarında kan içinde kalan küçük bir çocuk yer almaktadır. Videonun detaylı incelemesinden sonra babasından şiddet ve istismar gören bir çocuğun görüntüleri olduğu ortaya çıkmaktadır.  |
| 3  | Phileas model araçlar       | 2021'den olan videolar kullanım dışı olan Phileas model araçların parçalanma anını göstermektedir. | 2008'de alınan bu araçlar sık sık arızalandığı için 2015'te trafikten çekilmiştir. 2021 faaliyet raporunda İBB'nin araç filosunda bu marka metrobüsten 34 adet | Video görüntüleri X'de yayınlanan tweetler doğrultusunda CHP'li İBB yönetimi, 16 yıl metrobüste hizmet veren otobüsleri, sırf "AKP'nin aldığı otobüsler hurda oldu" algısı yapmak için mi dozerle parçalıyor" denerek paylaşılmıştır fakat asılsız olan bu haberler video görüntülerinden sonra resmi |

|   |   |   |   |  |
|---|---|---|---|--|
|   |   |   | görünmektedir. Kullanım dışı olan araçlar ise Makine Kimya Endüstrisi tarafından taşınmadan önce parçalandı.                                      | belgelerle yalan olduğu ortaya çıkmaktadır.  |
| 4 | Afganistan Dışişleri Bakanı'nın Türkiye'de şeriat | Afganistan Dışişleri Bakanı'nın Türkiye'de şeriat isteyenleri ülkesine davet ettiği iddiası | Taliban yönetimi altındaki Afganistan'da Dışişleri Bakanı Vekili olarak görev yapan Emirhan Muttaki'nin böyle bir açıklamasına rastlanmamaktadır. | Kullanılan fotoğrafların açıklamasında " Türkiye'de dininin yaşayamayan hilafet ve şeriat ile yönetilen ülkede yaşamak isteyenlere kapımız sonuna kadar açıktır. Gelmek isteyen din kardeşlerimize her türlü konfor sağlanacaktır." şeklinde yayınlamaktadır. Bu duruma bakıldığında Emirhan Muttaki'nin böyle bir açıklamasına rastlanmıyor iddia edilen gibi video kaydı ve açıklama yaptığı videolar yok bu sebeple de paylaşımında sadece kişinin kendi fotoğrafları kullanıldığını görülmektedir. |
| 5 | AKP oy kullanma yaşını 18'e indirdi               | Oy kullanma yaşını AK Parti'nin 18'e indirdiği iddiası yanlış                               | Türkiye'de seçme yaşı 1995 yılında DYP-SHP koalisyon hükümeti döneminde 18'e indirildiği resmi belgeler niteliğinde görülmektedir.                | Kullanılan fotoğrafta Recep Tayyip Erdoğan görülmektedir. Cumhurbaşkanı Recep Tayyip Erdoğan Sakarya'da yaptığı bir konuşmada, Türkiye'de oy kullanma yaşının AK Parti hükümetleri döneminde 18'e indirildiğini iddia etti. " ifadeleriyle yayımlanan tweetin doğruluk payı olmadığı anayasa maddeleriyle açıklanmaktadır.   |

## SONUÇ

Bu çalışmada, X platformunda sahte haberlerin yayılmasının etik boyutları, bireyler üzerindeki etkisi ve güvenilirliğini sarsan etkileri tartışılmıştır. Aynı zamanda, etik değerleri ihlal eden veya etik kurallara uymayan sahte haberlerin neden yayıldığı incelenmiş ve bu yayılmanın medyadan ve kullanıcılardan kaynaklandığı durumlar aydınlatılmıştır. Araştırma bulgularına göre, X platformu sahte haberlerin yayılması için uygun bir zemin hazırlamaktadır. Platformun kullanıcı odaklı yapısı, kolay erişilebilirliği ve etkileşime açıklığı, sahte haberlerin hızlı ve kolay bir şekilde yayılmasına olanak tanımaktadır.

Sahte haberlerin yayılması, kamuoyunun bilgi edinme hakkını ve demokrasiyi tehdit etmektedir. Sahte haberler, insanların gerçeği ayırt etme yeteneğini zayıflatmakta ve yanlış bilginin yayılmasına neden olmaktadır. Bu durum, demokratik süreçlerin işleyişini olumsuz etkilemekte ve kamuoyu oluşturmayı zorlaştırmaktadır.

Sahte haberlerin yayılması ile ortaya çıkan etik sorunlara çözüm bulmak için, hem medya hem de kullanıcılara yönelik önlemler alınması gerekmektedir. Medya, sahte haberlerin tespit edilmesine ve doğrulanmasına yönelik çalışmalar yürütmeli, kullanıcıları da bu konuda bilinçlendirmelidir. Kullanıcılar ise, sosyal medyada gördükleri haberleri eleştirel bir bakış açısıyla değerlendirmeli ve doğruluğunu teyit etmelidir.

Araştırmanın örnekleme olan 5 yalan haber incelendiğinde, bu haberlerin genellikle güncel olaylarla ilgili olduğu ve duygusal içerik barındırdığı görülmektedir. Bu haberler, genellikle çarpıtma, eksik bilgi verme ve uydurma gibi yöntemlerle hazırlanmaktadır.

"Günün Yalanları" ve "Teyit" hesaplarının yalan haberlerin yayılmasını önlemek için önemli bir rol oynadığı görülmektedir. Bu hesaplar, yalan haberleri tespit ederek doğru bilgiyi sunarak kullanıcıları bilgilendirmektedir. Araştırmanın sınırlılıklarından biri, örneklem sayısının az olmasıdır. Daha geniş bir örnekleme yapılan bir araştırma, daha kapsamlı sonuçlar elde edilmesini sağlayabilir.

Araştırma sonucunda ortaya çıkan bulgular, X platformunda sahte haberlerin yayılmasının önüne geçilmesi için gerekli önlemlerin alınmasının önemini göstermektedir.
