

# *Quality Assurance: Validating Realistic Self Assessment Through External Evaluation*

Douglas S. Franklin, Ph.D.  
Emeritus Assistant Dean

The best student-centered learning experience in America

**OHIO**  
UNIVERSITY

# Introduction

- What **theories undergird quality assurance** efforts?
- What is **self-assessment** and **reflective practice** and how might they influence **organizational quality**?
- How does **external evaluation** validate organizational self reflection?
- What **Industry 4.0 tools** support quality improvement and the assessment and evaluation processes.

By three methods we may learn wisdom: First, **by reflection, which is noblest**; Second, by imitation, which is easiest; and third by experience, which is the bitterest.

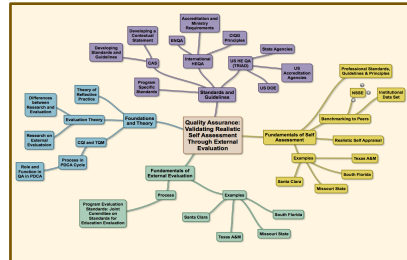

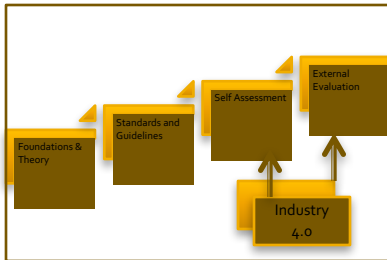

(Confucius)

# Introduction

- Process
- Mind-mapping
- Delivery
- Summary & Recommendations

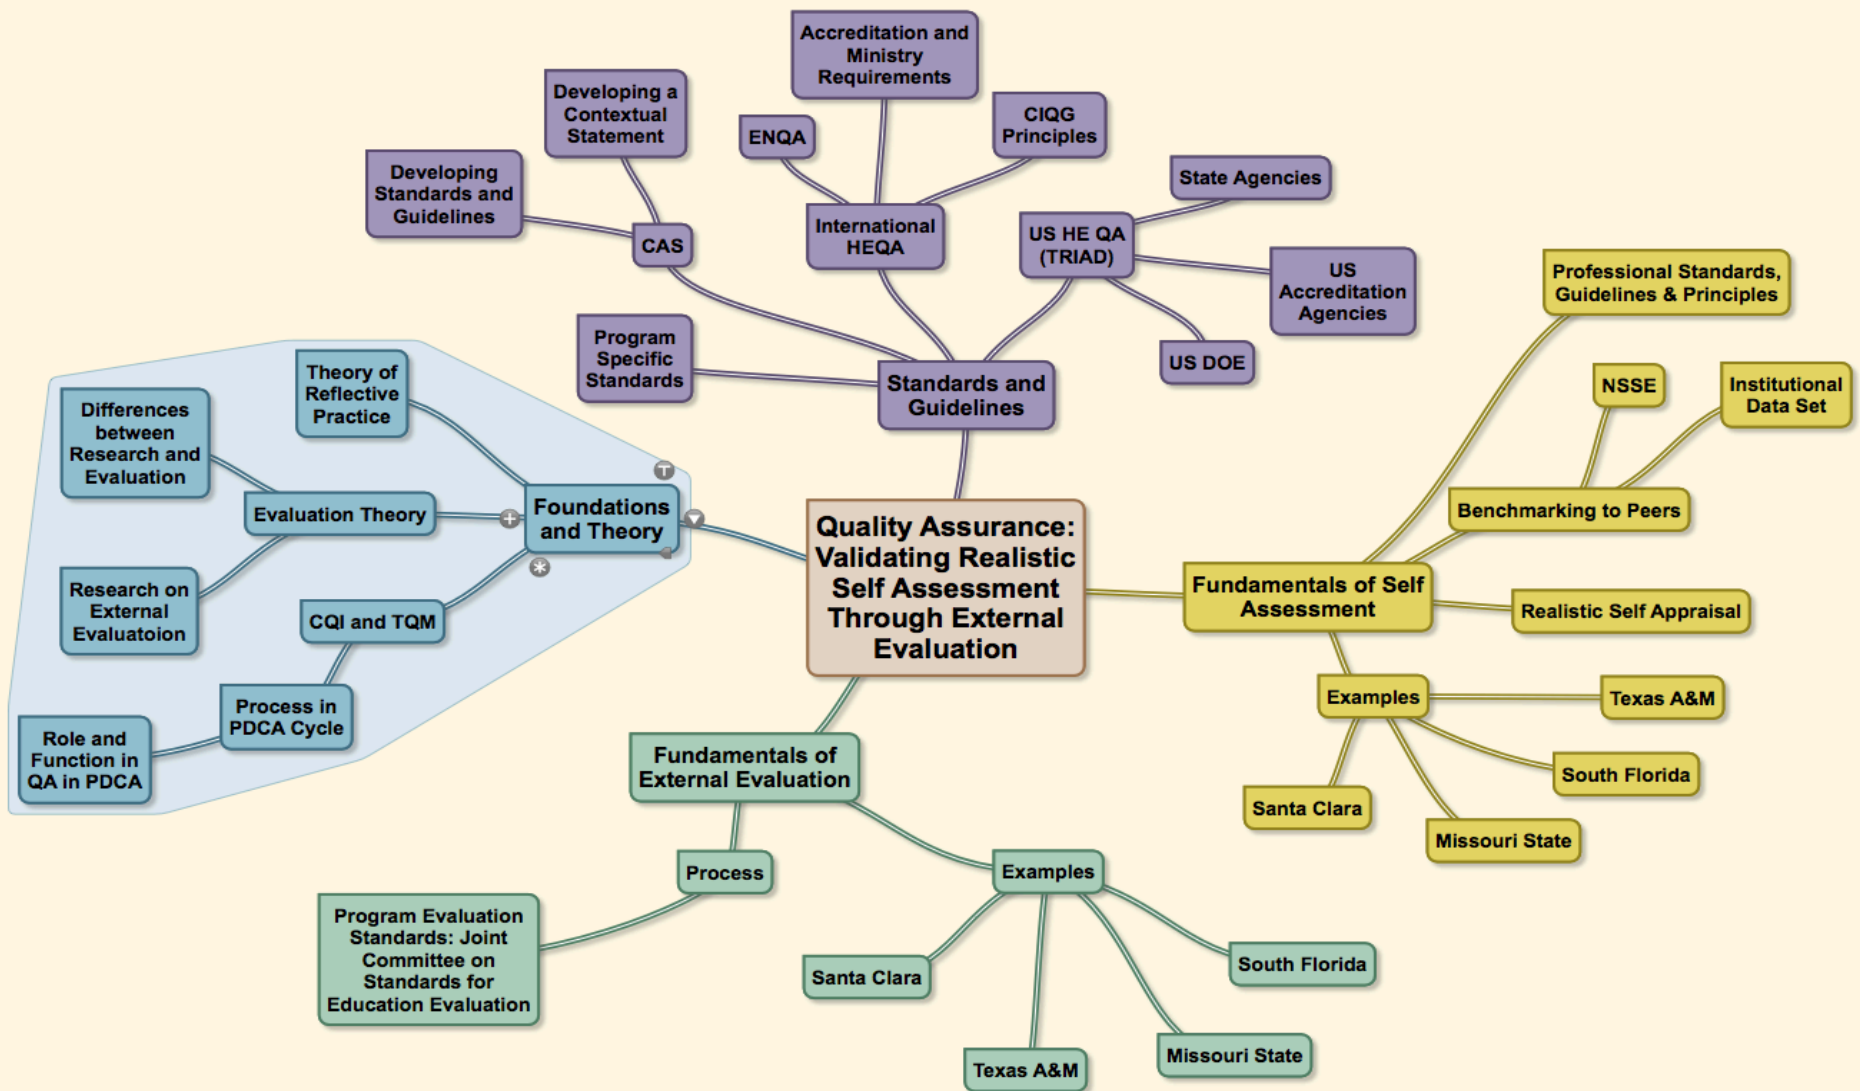

# ***Quality Assurance: Validating Realistic Self Assessment Through External Evaluation***

# ***Quality Assurance: Validating Realistic Self Assessment Through External Evaluation***

# Quality Defined

- American Society for Quality
  - “the **planned** and **systematic** activities implemented in a quality **system** so that **quality requirements** for a product or service will be **fulfilled**”

American Society of Quality (ASQ)

*"Quality is never an accident; it is always the **result of high intention, sincere effort, intelligent direction and skillful execution**; it represents the wise choice of many alternatives."* William A. Foster

Source: <http://asq.org/learn-about-quality/quality-assurance-quality-control/overview/overview.html>

# Quality Assurance

- UNESCO
  - the **systematic** review of educational programs to ensure that **acceptable standards of education**, scholarship and infrastructure are being maintained.

*“Quality is not an act,  
it is a **habit**. Aristotle*

<http://www.unesco.org/new/en/education/themes/strengthening-education-systems/higher-education/quality-assurance/>

# Quality Assurance

## ■ ENQA

- “a term imported into higher education from the world of business (and predominantly from the sector of manufacturing) as is the related term ‘quality control’. In France ‘quality management’ has been used often in place of ‘quality assurance’ in the translation of the ESG, with the intention of instilling a sense of responsibility to the academics to manage quality for themselves.”

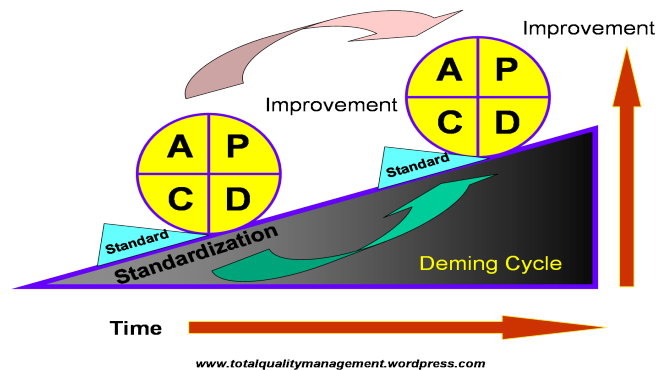

*“The term ‘quality assurance’ is ...to describe all activities within the continuous improvement cycle (i.e. assurance and enhancement activities).” ENQA 2015*

Crozier, F., Curvale, B., Dearlove, R., Helle, E. & Henard, F. (2006) ENQA Operational Papers 12: Terminology of quality assurance: toward shared European Values?

# General Concepts of Quality Management

- Approach to **quality management** that builds upon traditional quality assurance methods by **emphasizing the organization and systems that** focuses on:
  - **Process** rather than the individual;
  - Recognizes both **internal and external “customers”**;
  - Promotes the **need for objective data** to analyze & improve processes.

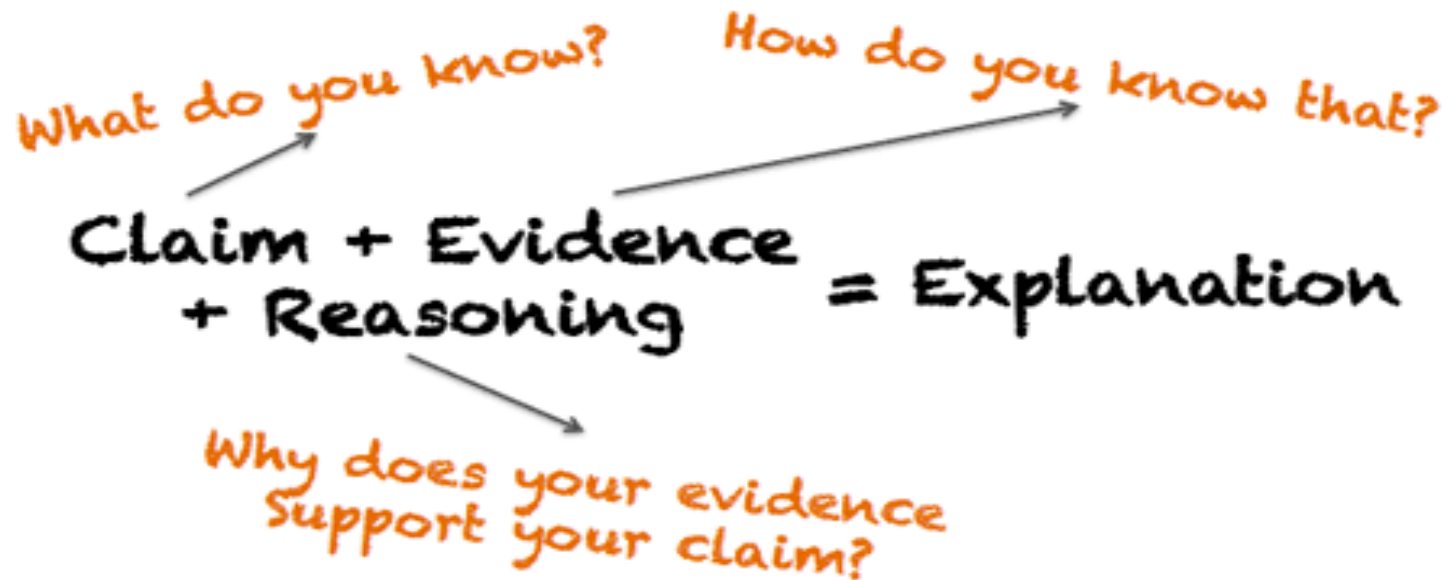

*"It is not enough to just do your best or work hard. **You must know what to work on.**"- W. Edwards Deming*

Deming, W.E. (1992) *Out of the Crisis*

<https://www.fpm.iastate.edu/worldclass/cqi.asp>

# Assessment Defined

*"the **gathering of information** concerning the functioning of students, staff and institutions of higher education. The information may or may not be in numerical form, but the basic motive for gathering it is **to improve the functioning of the institution and its people.**"*

# Assessment

*"...any effort to **gather, analyze, and interpret evidence** which describes institutional, departmental, divisional, or agency **effectiveness**."*

Upcraft, M.L & Schuh, J.H. (1996). Assessment in Student Affairs: A Guide for Practitioners

# Maki Assessment Cycle

- "Assessment Is"
  - Evidence driven relying on multiple measures
  - Formative rather than simply summative
  - Focused on outcomes
  - A complex process of comparison
  - Always a process of reasoning from evidence
  - Always, to some degree, imprecise

# Maki Assessment Cycle

- "Assessment Is NOT"
  - Episodic
  - Just about measurement
  - About performance
  - Solely an administrative process
  - Easy or quick

# Self Assessment

- “questions of **accountability**, cost, **quality**, access, equity, and accreditation combine to make **assessment a necessity** in higher education.”

*"Accountability breeds  
response-ability." Stephen  
Covey*

[https://www.brainyquote.com/quotes/quotes/s/stephencov636497.html?src=t\\_accountability](https://www.brainyquote.com/quotes/quotes/s/stephencov636497.html?src=t_accountability)

## accountability

The obligation of an individual or organization to account for its activities, accept responsibility for them, and to ...

BusinessDictionary

Upcraft, M.L. & Schuh, J.H. (1996). Assessment in Student Affairs: A Guide for Practitioners.

# Self Assessment

- Why self assessment:
  - Establish a **culture** of realistic self appraisal and **quality**;
  - Determine the extent to which the organization/department/unit personnel perceive **achieving the organization's designed purpose**;
  - Identifying **evidence** to support achievement of purpose and **alignment with industry standards**

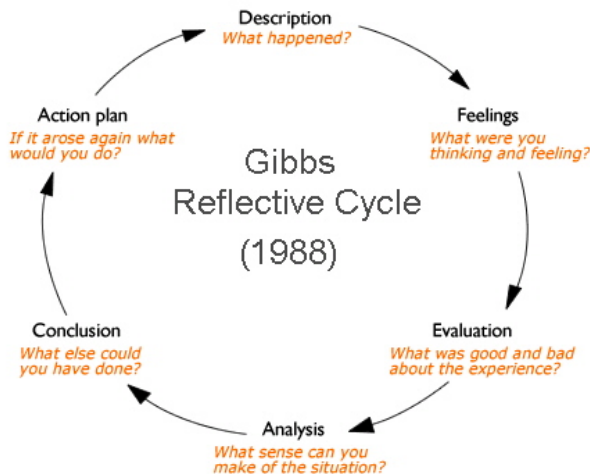

*"We don't learn by doing,  
we **learn by reflecting** on  
what we've done."  
Author Unknown*

<https://ocmbocesiss.wordpress.com/2016/04/26/a-time-for-reflection-we-dont-learn-by-doing-we-learn-by-reflecting-on-what-weve-done/>

# Self Assessment: Theory of Reflective Practice

- Reflective practice is:
  - Capacity to reflect on action to engage in **continuous learning** (Schon 1983:102-104)
  - Paying critical attention to **practical values and theories** which **inform everyday actions**, by examining practice life/work experiences reflectively and reflexively.”

*"We don't learn by doing, we **learn by reflecting** on what we've done." Author Unknown*

# Organizational Assessment

- **Systematic process** for obtaining valid information about the **performance of an organization** and the factors that affect performance.
- Conducted in order to **demonstrate areas of competence, areas for improvement, and possible risks**, help support investment and restructuring decisions.

[http://betterevaluation.org/en/theme/organizational\\_performance](http://betterevaluation.org/en/theme/organizational_performance)

<http://www.reflectlearn.org/discover/your-introductory-guide-to-oa>

# Assessing Quality in Higher Education

- Virtually everyone who has thought carefully about the question of **assessing quality** in higher education agrees that **"value added?" is the only valid approach. ... (or) what is improved about students' capabilities or knowledge** as a consequence of their education at a particular college or university.

*"Price is what you pay. **Value** is what you get." Warren Buffett*

*How Do You Define It?*

Bennett, D.C., 2001 AAC&U)

# Advantages of Self-Assessment

- Self assessment;
  - Provides recognition and rewards;
  - Is internally driven;
  - Is staff developed;
  - Creates shared vision;
  - **Requires self awareness.**

*"The first principle is that you must not fool yourself - and you are the easiest person to fool." [Richard Feynman](#) US educator & physicist (1918 - 1988)*

# Evaluation Theory (Models)

## Aikin's Prescriptive Model

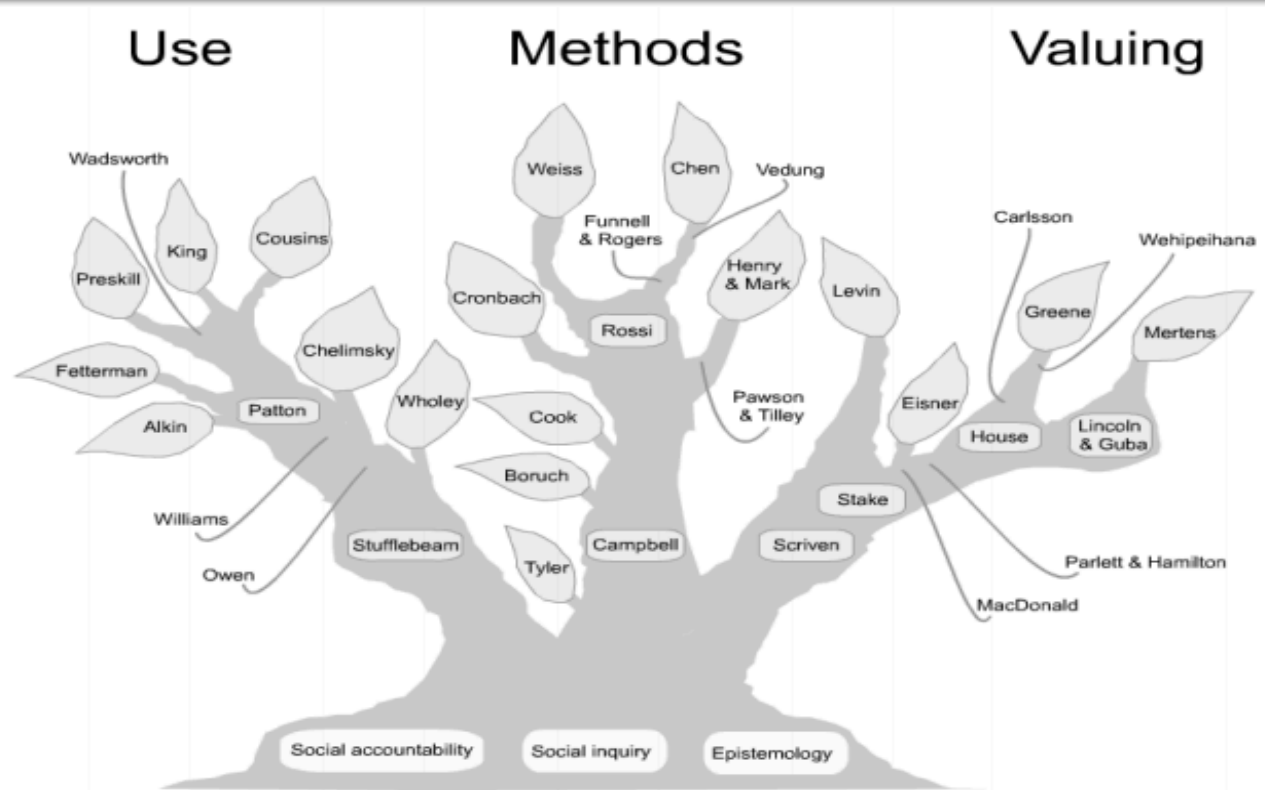

Figure 1. Evaluation Theory Tree

Source: Alkin, M. C. (2012). *Evaluation roots* (2nd ed.). Thousand Oaks, CA: Sage.

"set of rules, prescriptions, prohibitions, & *guiding frameworks that specify what a good or proper evaluation is and how evaluation should be done*" (e.g., empowerment evaluation, *Roots*, p. 4)

# Program Evaluation Defined

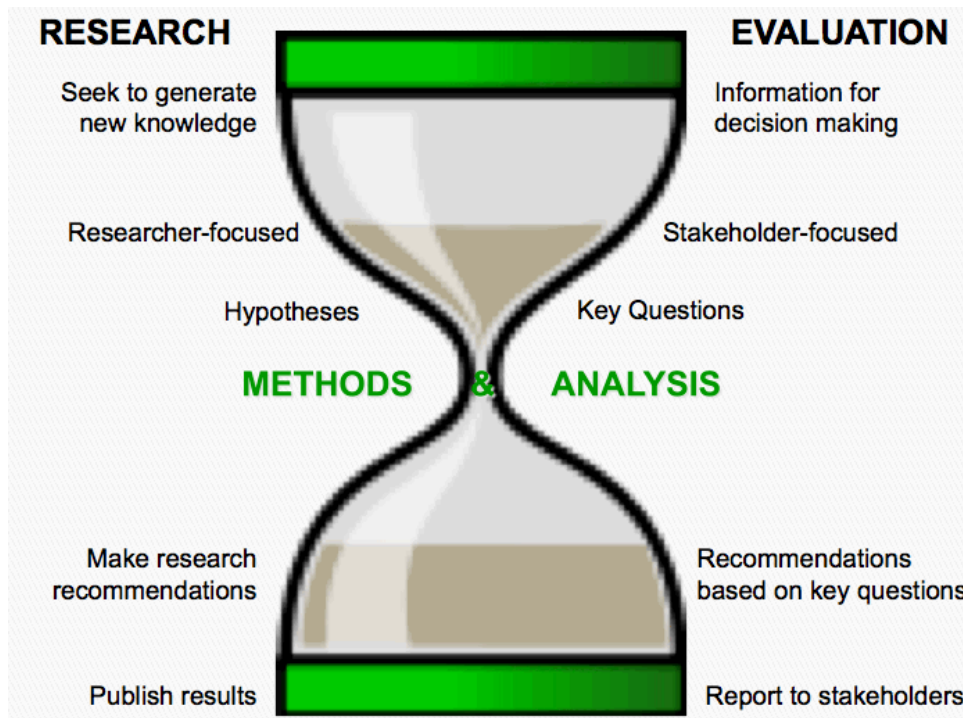

- Defined: The **systematic investigation of the worth or merit** of an object. (The Joint Committee on Standards for Educational Evaluation, 1994)

© Can Stock Photo - csp14339407

# Differences in Evaluation and Research

- Purpose: Seek difference ends
  - Research: **Add knowledge** to the field and theory growth
  - Evaluation: **Help** stakeholders **in decision making**

Page 6 of Program Evaluation: Alternative Approaches and Practical Guidelines  
Fitzpatrick, Sanders, Worthen (2004)

# System

- Set of **detailed methods, procedures and routines** created to carry out a specific activity, perform a duty, or solve a problem.
  - Organized, **purposeful structure** that consists of **interrelated and interdependent elements** that continually influence one another (directly or indirectly) ...

*“94% of **problems are systems driven** and only 6% are people driven”*

*"Self-regulation through accreditation embodies a traditional U.S. philosophy that **a free people can and ought to govern themselves through a representative, flexible, and responsive system.**"*

Source: Southern Association of Colleges and Schools, 2011

# Underlying Principles of Accreditation

- HEIs have **primary responsibility** for academic **quality**; colleges and universities are the leaders and the key sources of authority in academic matters.
- Institutional **mission drives** academic **quality**.
- Institutional **autonomy** is essential to **sustaining** & enhancing academic **quality**.

*"In the United States, accreditation is carried out by **private, nonprofit organizations designed for this specific purpose.**"*

Source: Eaton, J. ( 2012) An Overview of U.S. Accreditation, CHEA, p. 3

CHEA

# Underlying Principles of Accreditation

- **Academic freedom** flourishes in an environment of academic leadership of institutions.
- Higher education enterprise and our society thrive on **decentralization and diversity** of institutional purpose and mission.
- Process (**intentionality**) leads to **status**.

*"Accreditation...is a means to assure and improve higher education quality, assisting institutions and programs using a set of standards developed by peers."*

Source: The Value of Accreditation. CHEA, 2010 pg. 3.

## CHEA INTERNATIONAL QUALITY GROUP INTERNATIONAL QUALITY PRINCIPLES

(May 2015)

### Context

The growing international activity within higher education – greater student mobility, expanding faculty exchanges and research collaboration, more cross-border partnerships among institutions and the growing reliance on online or Web-based education – has created a sense of urgency for a shared understanding of educational quality. While any single worldwide regimen of educational quality would be difficult and perhaps undesirable, a shared understanding about the dimensions of quality would be useful. These guiding principles are one effort to move toward such understanding while acknowledging and respecting the many differences of history, culture, beliefs and values that shape our systems of higher education and our perspectives on quality.

### Purpose

The guiding principles are intended to serve as a framework for international deliberation about quality in higher education. Their aim is to seek common ground and establish a foundation for understanding quality. The principles may be used to inform discussions of quality, quality assurance and qualifications at the country, regional or international level. The intended audiences include academics and other higher education professionals, students, employers, government officials and the public. They are invited to affirm and use these principles in the ongoing quest for effectiveness and quality in higher education.<sup>1</sup>

### Principles

1. **Quality and higher education providers:** Assuring and achieving quality in higher education is the primary responsibility of higher education providers and their staff.
2. **Quality and students:** The quality of higher education is measured by the learning outcomes pursued.
3. **Quality and society:** The quality of higher education is a reflection of the quality of society, engenders public confidence and sustains the social contract.
4. **Quality and government:** Governments have a role in higher education.
5. **Quality and accountability:** It is the responsibility of higher education providers and accreditation bodies to sustain a strong culture of quality.
6. **Quality and the role of quality assurance and accreditation:** Quality assurance and accreditation bodies, working with higher education providers and their leadership, staff and students, are responsible for the implementation of processes, tools, benchmarks and measures of learning outcomes that help to create a shared understanding of quality.
7. **Quality and change:** Quality higher education needs to be flexible, creative and innovative; developing and evolving to meet students' needs, to justify the confidence of society and to maintain diversity.

# Standards and Guidelines for Quality Assurance in European Higher Education (ESG)

- ESG are based on the following four **principles for quality assurance** in the EHEA:
  - Higher education **institutions have primary responsibility for the quality** of their provision and its assurance;
  - QA **responds to the diversity of higher education systems**, institutions, programmes and students;
  - QA supports the **development of a quality culture**;
  - QA takes into account the **needs and expectations** of students, all other **stakeholders and society**.

[http://www.eua.be/Libraries/quality-assurance/esg\\_2015.pdf?sfvrsn=0](http://www.eua.be/Libraries/quality-assurance/esg_2015.pdf?sfvrsn=0)

*ESG standards and guidelines are for internal and external quality assurance in higher education...not standards for quality, nor a prescription for how QA processes are implemented. They provide guidance, covering areas vital for successful quality provision and learning environments in higher education. (pg. 6).*

<http://www.cas.edu/>

Founded in 1979, CAS is the pre-eminent force for promoting standards in student affairs, student services, and student development programs. CAS creates and delivers dynamic, credible standards, guidelines, and Self-Assessment Guides ...designed to lead to a host of quality programs and services. CAS aims to foster and enhance student learning, development, and achievement.

# Council for the Advancement of Standards in Higher Education (CAS)

## GENERAL STANDARDS

CAS Standards and

Program and services **must develop, disseminate, implement, and regularly review** their missions.

### Part 1. MISSION

Programs and services **must develop, disseminate, implement, and regularly review** their missions. The mission must be consistent with the mission of the institution and with professional standards. The mission must be appropriate for the institution's student populations and community settings. Mission statements must reference student learning and development.

### Part 2. PROGRAM

The formal education of students, including the curriculum, must promote student learning and development. The curriculum must be purposeful, contribute to students' realization of their potential, and prepare students for satisfying and productive lives.

The formal **education of students, consisting of the curriculum and co-curriculum** must promote student learning development outcomes that are purposeful ...

<http://www.cas.edu/>

# Council for the Advancement of Standards in Higher Education (CAS)

## Student Learning Outcomes

<b>Interpersonal competence</b>	Meaningful relationships	Establishes healthy, mutually beneficial relationships with others; treats others with respect; manages interpersonal conflicts effectively; demonstrates appropriately assertive behavior
	Interdependence	Seeks assistance from others when needed and offers assistance to others; shares a group or organizational goal and works with others to achieve it; learns the contributions and involvement of others; seeks supervision and direction as needed
<p>Domain= Interpersonal competence</p> <p>Dimension=Meaningful relationships</p>		Works cooperatively with others, including people
		Establishes healthy, mutually beneficial relationships with others; treats others with respect...
		exhibits democratic principles as a leader or group member; communicates a vision, mission, or purpose that encourages commitment and action in others

<http://www.cas.edu/>

# Evaluation Standards

- Utility Standards
- Feasibility Standards
- Propriety Standards
- Accuracy Standards
- Evaluation Accountability Standards

*Joint Committee on Standards for Educational Evaluation: Created in 1975 is a coalition of major professional associations in the United States and Canada concerned with the quality of evaluation.*

Joint Committee on Standards for Educational Evaluation

Utility Standards	Feasibility Standards	Propriety Standards	Accuracy Standards	Evaluation Accountability Standards
The utility standards are intended to increase the extent to which program stakeholders find evaluation processes and products valuable in meeting their needs.	The feasibility standards are intended to increase evaluation effectiveness and efficiency.	The propriety standards support what is proper, fair, legal, right and just in evaluations.	Accuracy standards are intended to increase dependability and truthfulness of evaluation representations, propositions, and findings, especially those that support interpretations and judgments about quality.	Accountability standards encourage adequate documentation of evaluations and a meta-evaluative perspective focused on improvement and accountability for evaluation processes and products.
<b>U1 Evaluator Credibility</b> Evaluations should be conducted by qualified people who establish and maintain credibility in the evaluation context.	<b>F1 Project Management</b> Evaluations should be effective project management.	<b>P1 Responsive and Inclusive Orientation</b> Evaluations should be responsive to stakeholders and their communities.	<b>A1 Justified Conclusions and Decisions</b> Evaluation conclusions and decisions should be explicitly justified in the cultures and contexts where they have consequences.	<b>E1 Evaluation Documentation</b> Evaluations should fully document their negotiated purposes and implemented designs, procedures, data, and outcomes.
<b>U2 Attention to Stakeholders</b> Evaluations should devote attention to the full range of individuals and groups invested in the program and affected by its evaluation.	<b>F2 Practical Procedures</b> Evaluation procedures should be practical and responsive to the way the program operates.	<b>P2 Fairness</b> Evaluations should be fair to all stakeholders.	<b>A2 Valid Information</b> Evaluation information should be valid and reliable.	<b>E2 Inter Meta evaluation</b> Evaluators should use these and other applicable standards to examine the accountability of the evaluation design, procedures employed, information collected, and outcomes.
<b>U3 Negotiated Purposes</b> Evaluation purposes should be identified and continually negotiated based on the needs of stakeholders.	<b>F3 Contextual Viability</b> Evaluations should recognize, monitor, and balance the cultural and political interests and needs of individuals and groups.	<b>P3 Transparency</b> Evaluations should be transparent to all stakeholders.	<b>A3 Sound Methods</b> Evaluation methods and procedures should be sound and appropriate for the intended uses.	<b>E3 External Meta-evaluation</b> Program evaluation sponsors, clients, evaluators, and other stakeholders should encourage the conduct of external meta-evaluations using these and other applicable standards.
<b>U4 Explicit Values</b> Evaluations should clarify and specify the individual and cultural values underpinning purposes, processes, and judgments.	<b>F4 Resource Use</b> Evaluations should use resources effectively and efficiently.	<b>P4 Conflicts of Interests</b> Evaluations should openly and honestly identify and address real or perceived conflicts of interests that may compromise the evaluation.	<b>A4 Sound Designs and Analyses</b> Evaluations should employ technically adequate designs and analyses that are appropriate for the evaluation purposes.	<b>E4 Documentation</b> Evaluations should document appropriate purposes, procedures, data, and outcomes.
<b>U5 Relevant Information</b> Evaluation information should serve the identified and emergent needs of stakeholders.		<b>P5 Conflicts of Interests</b> Evaluations should openly and honestly identify and address real or perceived conflicts of interests that may compromise the evaluation.	<b>A5 Sound Designs and Analyses</b> Evaluations should employ technically adequate designs and analyses that are appropriate for the evaluation purposes.	<b>E5 Documentation</b> Evaluations should document appropriate purposes, procedures, data, and outcomes.
<b>U6 Meaningful Processes and Products</b> Evaluations should construct activities, descriptions, and judgments in ways that encourage participants to rediscover, reinterpret, or revise their understandings and behaviors.		<b>P6 Conflicts of Interests</b> Evaluations should openly and honestly identify and address real or perceived conflicts of interests that may compromise the evaluation.	<b>A6 Sound Designs and Analyses</b> Evaluations should employ technically adequate designs and analyses that are appropriate for the evaluation purposes.	<b>E6 Documentation</b> Evaluations should document appropriate purposes, procedures, data, and outcomes.
<b>U7 Timely and Appropriate Communicating and Reporting</b> Evaluations should attend to the continuing information needs of their multiple audiences.		<b>P7 Fiscal Responsibility</b> Evaluations should account for all expended resources and comply with sound fiscal procedures and processes.	<b>A7 Explicit Evaluation Reasoning</b> Evaluation reasoning leading from information and analyses to findings, interpretations, conclusions, and judgments should be clearly and completely documented.	<b>E7 Documentation</b> Evaluations should document appropriate purposes, procedures, data, and outcomes.
<b>U8 Concern for Consequences and Influence</b> Evaluations should promote responsible and adaptive use while guarding against unintended negative consequences and misuse.			<b>A8 Communication and Reporting</b> Evaluation communications should have adequate scope and guard against misconceptions, biases, distortions, and errors.	<b>E8 Documentation</b> Evaluations should document appropriate purposes, procedures, data, and outcomes.

Utility Standards: intended to increase the extent to which program stakeholders find evaluation processes and products valuable in meeting their needs.

Utility Standards	Feasibility Standards	Propriety Standards	Accuracy Standards	Evaluation Accountability Standards
The utility standards are intended to increase the extent to which program stakeholders find evaluation processes and products valuable in meeting their needs.	The feasibility standards are intended to increase evaluation effectiveness and efficiency.	The propriety standards support what is proper, fair, legal, right and just in evaluations.	Accuracy standards are intended to increase dependability and truthfulness of evaluation representations, propositions, and findings, especially those that support interpretations and judgments about quality.	Accountability standards encourage adequate documentation of evaluations and a meta-evaluative perspective focused on improvement and accountability for evaluation processes and products.
<b>U1 Evaluator Credibility</b> Evaluations should be conducted by qualified people who establish and maintain credibility in the evaluation context.	<b>F1 Project Management</b> Evaluations should use effective project management strategies.	<b>P1 Responsive and Inclusive</b> Evaluations should be responsive to stakeholders and their needs.	<b>A1 Justified Conclusions and Decisions</b> Evaluation conclusions and decisions should be explicitly justified in the cultures and contexts where they have consequences.	<b>E1 Evaluation Documentation</b> Evaluations should fully document their negotiated purposes and implemented designs, procedures, data, and outcomes.
<b>U2 Attention to Stakeholders</b> Evaluations should devote attention to the full range of individuals and groups invested in the program and affected by its evaluation.	<b>F2 Practical Procedures</b> Evaluation procedures should be practical and responsive to the way the program operates.	<b>P2 Program Evaluation</b> Evaluations should address stakeholder needs and purposes.	<b>A2 Valid Information</b> Evaluation information should be accurate and relevant.	<b>E2 Inter Meta evaluation</b> Evaluators should use these and other applicable standards to examine the accountability of the evaluation design, procedures employed, information collected, and outcomes.
<b>U3 Negotiated Purposes</b> Evaluation purposes should be identified and continually negotiated based on the needs of stakeholders.	<b>F3 Contextual Viability</b> Evaluations should recognize, monitor, and balance the cultural and political interests and needs of individuals and groups.	<b>P3 Transparency and Disclosure</b> Evaluations should provide complete descriptions of findings, limitations, and conclusions to all stakeholders, unless doing so would violate legal and propriety obligations.	<b>A3 Information Management</b> Evaluations should employ systematic information collection, review, verification, and storage methods.	<b>E3 Exter Meta-evaluation</b> Program evaluation sponsors, clients, evaluators, and other stakeholders should encourage the conduct of external meta-valuations using these and other applicable standards.
<b>U4 Explicit Values</b> Evaluations should clarify and specify the individual and cultural values underpinning purposes, processes, and judgments.	<b>F4 Resource Use</b> Evaluations should use resources effectively and efficiently.	<b>P4 Conflicts of Interests</b> Evaluations should openly and honestly identify and address real or perceived conflicts of interests that may compromise the evaluation.	<b>A4 Sound Designs and Analyses</b> Evaluations should employ technically adequate designs and analyses that are appropriate for the evaluation purposes.	
<b>U5 Relevant Information</b> Evaluation information should serve the identified and emergent needs of stakeholders.		<b>P5 Fiscal Responsibility</b> Evaluations should account for all expended resources and comply with sound fiscal procedures and processes.	<b>A5 Explicit Evaluation Reasoning</b> Evaluation reasoning leading from information and analyses to findings, interpretations, conclusions, and judgments should be clearly and completely documented.	
<b>U6 Meaningful Processes and Products</b> Evaluations should construct activities, descriptions, and judgments in ways that encourage participants to rediscover, reinterpret, or revise their understandings and behaviors.			<b>A6 Communication and Reporting</b> Evaluation communications should have adequate scope and guard against misconceptions, biases, distortions, and errors.	
<b>U7 Timely and Appropriate Communicating and Reporting</b> Evaluations should attend to the continuing information needs of their multiple audiences.				
<b>U8 Concern for Consequences and Influence</b> Evaluations should promote responsible and adaptive use while guarding against unintended negative consequences and misuse.				

Feasibility Standards:  
intended to increase  
evaluation effectiveness  
and efficiency.

Utility Standards	Feasibility Standards	Propriety Standards	Accuracy Standards	Evaluation Accountability Standards
The utility standards are intended to increase the extent to which program stakeholders find evaluation processes and products valuable in meeting their needs.	The feasibility standards are intended to increase evaluation effectiveness and efficiency.	The propriety standards support what is proper, fair, legal, right and just in evaluations.	Accuracy standards are intended to increase dependability and truthfulness of evaluation representations, propositions, and findings, especially those that support interpretations and judgments about quality.	Accountability standards encourage adequate documentation of evaluations and a meta-evaluative perspective focused on improvement and accountability for evaluation processes and products.
<b>U1 Evaluator Credibility</b> Evaluations should be conducted by qualified people who establish and maintain credibility in the evaluation context.	<b>F1 Project Management</b> Evaluations should use effective project management strategies.	<b>P1 Reasonable and Inclusive</b> Evaluations should be conducted with stakeholders and their interests in mind.	<b>A1 Justified Conclusions and Decisions</b> Evaluation conclusions and decisions should be explicitly justified in the cultures and contexts where they have consequences.	<b>E1 Evaluation Documentation</b> Evaluations should fully document their negotiated purposes and implemented designs, procedures, data, and outcomes.
<b>U2 Attention to Stakeholders</b> Evaluations should devote attention to the full range of individuals and groups invested in the program and affected by its evaluation.	<b>F2 Practical Procedures</b> Evaluation procedures should be responsive to the program that operates.	<b>P2 Stakeholder Agreements</b> Evaluation procedures should be negotiated with stakeholders and their interests in mind.	<b>A2 Valid Information</b> Evaluation information should be collected for the intended purposes and uses.	<b>E2 Inter Meta evaluation</b> Evaluators should use these and other applicable standards to examine the accountability of the evaluation design, procedures employed, information collected, and outcomes.
<b>U3 Negotiated Purposes</b> Evaluation purposes should be identified and continually negotiated based on the needs of stakeholders.	<b>F3 Contextual Balance</b> Evaluation procedures should recognize and balance the interests and needs of individuals and groups.	<b>P3 Stakeholder Involvement</b> Evaluation procedures should be negotiated with stakeholders and their interests in mind.	<b>A3 Evaluation Procedures</b> Evaluation procedures should be systematic, reliable, and defensible for the intended uses.	<b>E3 External Meta-evaluation</b> Program evaluation sponsors, clients, evaluators, and other stakeholders should encourage the conduct of external meta-evaluations using these and other applicable standards.
<b>U4 Explicit Values</b> Evaluations should clarify and specify the individual and cultural values underpinning purposes, processes, and judgments.	<b>F4 Resource Efficiency</b> Evaluation procedures should use resources efficiently.	<b>P4 Stakeholder Needs</b> Evaluation procedures should address stakeholder needs and purposes.	<b>A4 Evaluation Context</b> Evaluations should document the context of the programs and their contexts with appropriate detail and scope for the evaluation purposes.	
<b>U5 Relevant Information</b> Evaluation information should serve the identified and emergent needs of stakeholders.		<b>P5 Transparency and Disclosure</b> Evaluations should provide complete descriptions of findings, limitations, and conclusions to all stakeholders, unless doing so would violate legal and propriety obligations.	<b>A5 Information Management</b> Evaluations should employ systematic information collection, review, verification, and storage methods.	
<b>U6 Meaningful Processes and Products</b> Evaluations should construct activities, descriptions, and judgments in ways that encourage participants to rediscover, reinterpret, or revise their understandings and behaviors.		<b>P6 Conflicts of Interests</b> Evaluations should openly and honestly identify and address real or perceived conflicts of interests that may compromise the evaluation.	<b>A6 Sound Designs and Analyses</b> Evaluations should employ technically adequate designs and analyses that are appropriate for the evaluation purposes.	
<b>U7 Timely and Appropriate Communicating and Reporting</b> Evaluations should attend to the continuing information needs of their multiple audiences.		<b>P7 Fiscal Responsibility</b> Evaluations should account for all expended resources and comply with sound fiscal procedures and processes.	<b>A7 Explicit Evaluation Reasoning</b> Evaluation reasoning leading from information and analyses to findings, interpretations, conclusions, and judgments should be clearly and completely documented.	
<b>U8 Concern for Consequences and Influence</b> Evaluations should promote responsible and adaptive use while guarding against unintended negative consequences and misuse.			<b>A8 Communication and Reporting</b> Evaluation communications should have adequate scope and guard against misconceptions, biases, distortions, and errors.	

Propriety Standards:  
support what is proper, fair,  
legal, right and just in  
evaluations

Utility Standards	Feasibility Standards	Propriety Standards	Accuracy Standards	Evaluation Accountability Standards
The utility standards are intended to increase the extent to which program stakeholders find evaluation processes and products valuable in meeting their needs.	The feasibility standards are intended to increase evaluation effectiveness and efficiency.	The propriety standards support what is proper, fair, legal, right and just in evaluations.	Accuracy standards are intended to increase dependability and truthfulness of evaluation representations, propositions, and findings, especially those that support interpretations and judgments about quality.	Accountability standards encourage adequate documentation of evaluations and a meta-evaluative perspective focused on improvement and accountability for evaluation processes and products.
<b>U1 Evaluator Credibility</b> Evaluations should be conducted by qualified people who establish and maintain credibility in the evaluation context.	<b>F1 Project Management</b> Evaluations should use effective project management strategies.	<b>P1 Responsive and Inclusive Orientation</b> Evaluations should be responsive to stakeholders and their communities.	<b>Conclusions and Justification</b> Evaluation conclusions and decisions should be explicitly justified in the cultures and contexts where they have consequences.	<b>E1 Evaluation Documentation</b> Evaluations should fully document their negotiated purposes and implemented designs, procedures, data, and outcomes.
<b>U2 Attention to Stakeholders</b> Evaluations should devote attention to the full range of individuals and groups invested in the program and affected by its evaluation.	<b>F2 Practical Procedures</b> Evaluation procedures should be practical and responsive to the way the program operates.	<b>P2 Formal Agreements</b> Evaluation agreements should be negotiated and make obligations explicit.	<b>Information</b> Evaluation information should serve the intended purposes and support valid interpretations.	<b>E2 Inter Meta evaluation</b> Evaluators should use these and other applicable standards to examine the accountability of the evaluation design, procedures employed, information collected, and outcomes.
<b>U3 Negotiated Purposes</b> Evaluation purposes should be identified and continually negotiated based on the needs of stakeholders.			<b>Evaluation procedures</b> Evaluation procedures should be dependable and appropriate for the intended uses.	<b>E3 Exter Meta-evaluation Program</b> evaluation sponsors, clients, evaluators, and other stakeholders should encourage the conduct of external meta-valuations using these and other applicable standards.
<b>U4 Explicit Values</b> Evaluation should clarify and specify the individual and cultural values underpinning evaluation processes, and judgments.			<b>Context</b> Evaluations should document contexts with appropriate information for evaluation purposes.	
<b>U5 Relevant Information</b> Evaluation information should serve the identified and emergent needs of stakeholders.			<b>Information</b> Evaluations should document information collection, and storage.	
<b>U6 Meaningful Processes and Products</b> Evaluations should document activities, descriptions, and judgments in ways that encourage participants to rediscover, reinterpret, or revise their understandings and behaviors.		interests that may compromise the evaluation.	<b>Analyses</b> Evaluations should have adequate designs and analyses appropriate for the evaluation purposes.	
<b>U7 Timely and Appropriate Communicating and Reporting</b> Evaluations should attend to the continuing information needs of their multiple audiences.		<b>P7 Fiscal Responsibility</b> Evaluations should account for all expended resources and comply with sound fiscal procedures and processes.	<b>A7 Explicit Evaluation Reasoning</b> Evaluation reasoning leading from information and analyses to findings, interpretations, conclusions, and judgments should be clearly and completely documented.	
<b>U8 Concern for Consequences and Influence</b> Evaluations should promote responsible and adaptive use while guarding against unintended negative consequences and misuse.			<b>A8 Communication and Reporting</b> Evaluation communications should have adequate scope and guard against misconceptions, biases, distortions, and errors.	

Accuracy Standards: intended to increase dependability and truthfulness of evaluation representations, propositions, and findings, especially those that support interpretations and judgments about quality.

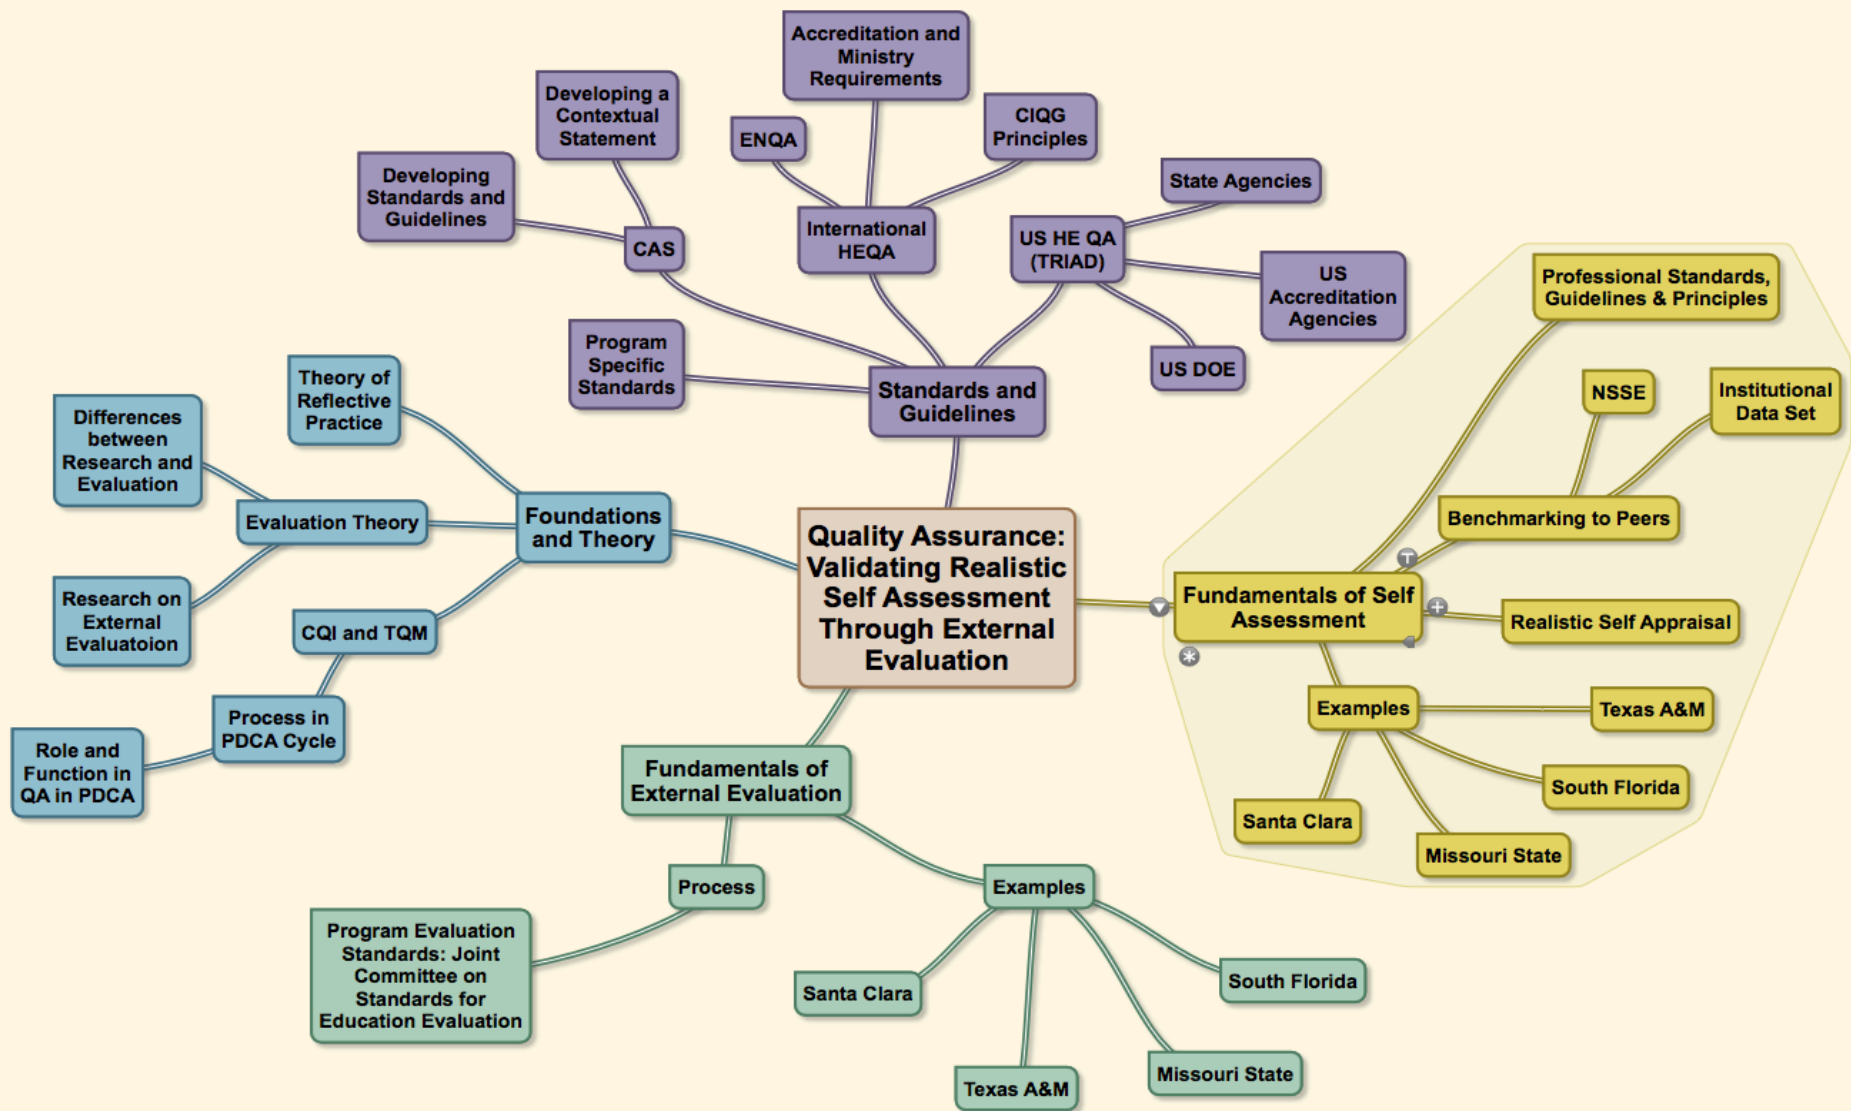

Utility Standards	Feasibility Standards	Propriety Standards	Accuracy Standards	Evaluation Accountability Standards
The utility standards are intended to increase the extent to which program stakeholders find evaluation processes and products valuable in meeting their needs.	The feasibility standards are intended to increase evaluation effectiveness and efficiency.	The propriety standards support what is proper, fair, legal, right and just in evaluations.	Accuracy standards are intended to increase dependability and truthfulness of evaluation representations, propositions, and findings, especially those that support interpretation and judgments about quality.	Accountability standards encourage adequate documentation of evaluations and a meta-evaluative perspective focused on improvement and accountability for evaluation processes and products.
<b>U1 Evaluator Credibility</b> Evaluations should be conducted by qualified people who establish and maintain credibility in the evaluation context.	<b>F1 Project Management</b> Evaluations should use effective project management strategies.	<b>P1 Responsive and Inclusive Orientation</b> Evaluations should be responsive to stakeholders and their communities.	<b>A1 Justified Conclusions and Decisions</b> Evaluation conclusions and decisions should be explicit about the cultures and contexts where they are used and their consequences.	<b>E1 Evaluation Documentation</b> Evaluations should fully document their negotiated purposes and implemented designs, procedures, data, and outcomes.
<b>U2 Attention to Stakeholders</b> Evaluations should devote attention to the full range of individuals and groups invested in the program and affected by its evaluation.	<b>F2 Practical Procedures</b> Evaluation procedures should be practical and responsibly operates.	<b>P2 Formal Agreements</b> Evaluation agreements should be negotiated.	<b>A2 Evaluation Information</b> Evaluation information should be intended purposes and	<b>E2 Inter Meta evaluation</b> Evaluators should use these and other applicable standards to examine the accountability of the evaluation design, procedures employed, information collected, and outcomes.
<b>U3 Negotiated Purposes</b> Evaluation purposes should be identified and continually negotiated based on the needs of stakeholders.	<b>F3 Context</b> Evaluation should be able to balance the interests and group		<b>A3 Evaluation Procedures</b> Evaluation procedures should be able and intended uses.	<b>E3 Exter Meta-evaluation Program</b> evaluation sponsors, clients, evaluators, and other stakeholders should encourage the conduct of external meta-valuations using these and other applicable standards.
<b>U4 Explicit Values</b> Evaluations should clarify and specify the individual and cultural values underpinning purposes, processes, and judgments.	<b>F4 Resources</b> Evaluation should use resources efficiently		<b>A4 Evaluation Documentation</b> Evaluations should document with appropriate information purposes.	
<b>U5 Relevant Information</b> Evaluation information should serve the identified and emergent needs of stakeholders.			<b>A5 Evaluation Information</b> Evaluation information should be and storage	
<b>U6 Meaningful Processes and Products</b> Evaluations should construct activities, descriptions, and judgments in ways that encourage participants to rediscover, reinterpret, or revise their understandings and behaviors.			<b>A6 Evaluation Designs</b> Evaluations should use adequate designs and for the	
<b>U7 Timely and Appropriate Communicating and Reporting</b> Evaluations should attend to the continuing information needs of their multiple audiences.		<b>P7 Fiscal Responsibility</b> Evaluations should account for all expended resources and comply with sound fiscal procedures and processes.	<b>A7 Explicit Evaluation Reasoning</b> Evaluation reasoning leading from information and analyses to findings, interpretations, conclusions, and judgments should be clearly and completely documented.	
<b>U8 Concern for Consequences and Influence</b> Evaluations should promote responsible and adaptive use while guarding against unintended negative consequences and misuse.			<b>A8 Communication and Reporting</b> Evaluation communications should have adequate scope and guard against misconceptions, biases, distortions, and errors.	

Accountability Standards:  
encourage adequate  
documentation of evaluations  
and a meta-evaluative  
perspective focused on  
improvement and  
accountability for evaluation  
process and products.

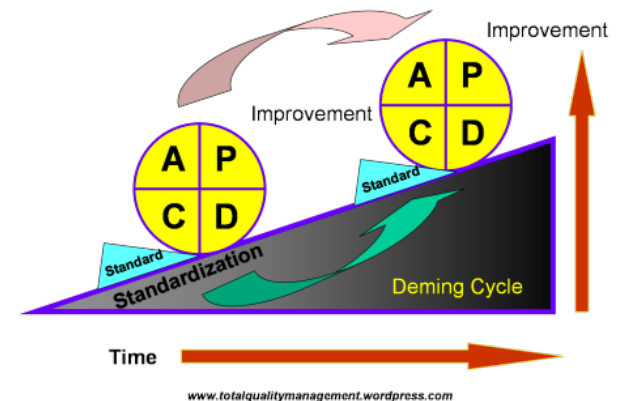

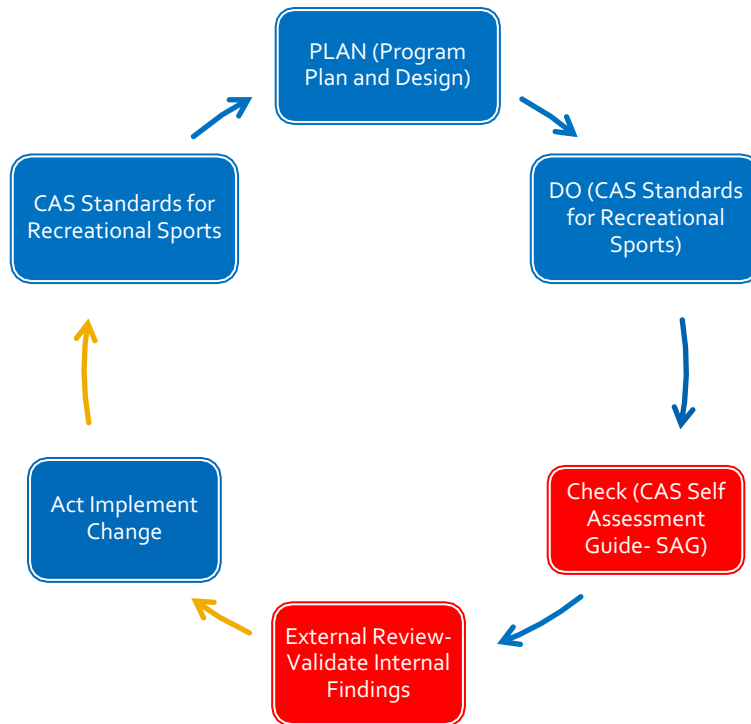

# *Quality Assurance: Validating Realistic Self Assessment Through External Evaluation*

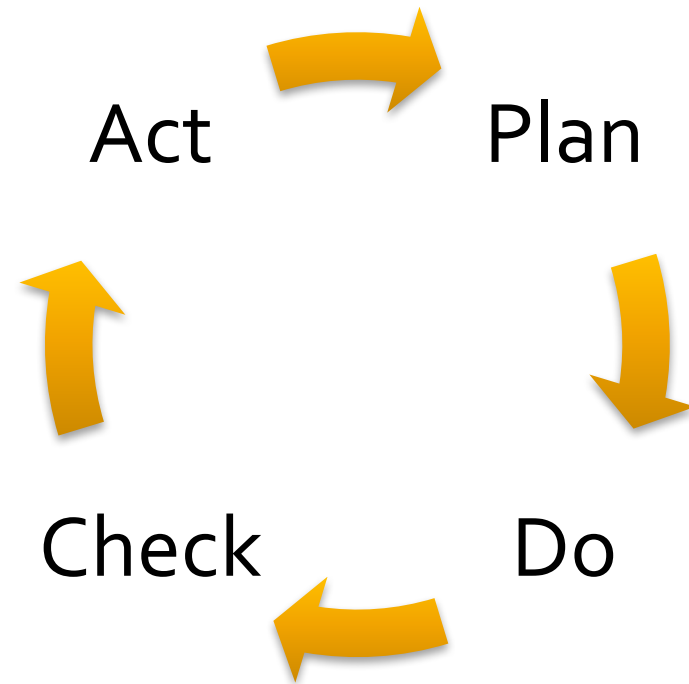

# Self Assessment and External Evaluation in the CQI Cycle

*Quality begins with the intent, which is fixed by management."- W. Edwards Deming*

# Self Assessment for Quality

# Self Assess for Quality

# CAS Self-Assessment Process

- Understand the CAS Standards and Guidelines
  - Must and Shall
  - Should and May
  - **Criterion measures internal ratings**
- Establish and prepare the team
  - As a group, examine the standards

## CAS Parts

1. **Mission**
2. **Program**
3. Organization & Leadership
4. **Human Resources**
5. Ethics
6. Law, Policy & Governance
7. Diversity, Equity, & Access
8. **Internal and External Relations**
9. Financial Resources

11. Facilities & Equipment
12. Assessment

# CAS Self-Assessment Process

- Compile and review evidence
  - Student Recruitment and Marketing Materials
  - Program Documents
  - Institutional Administrative Documents
  - Research, Assessment and Evaluation Data
  - Staff Activity Reports
  - Student Activity Reports

*"Facts are stubborn things; and whatever may be our wishes, our inclinations, or the dictates of our passion, they cannot alter the state of facts and evidence."* John Adams, US diplomat & politician (1735 - 1826)

# CAS Self-Assessment Process

- Judge Performance
  - 5-Point rating scale
  - Rationale for rating

CAS Criterion Measure Rating Scale

ND	0	1	2	3	4	5
Does Not Apply	Insufficient Evidence/U nable to Rate	Does Not Meet	Partly Meets	Meets	Exceeds	Exemplary

# CAS Self-Assessment Process

- Complete the Assessment Process
  - Explain mission, purpose and philosophy
  - Review the outcome of the assessment
  - Make recommendations for action

*"In preparing for battle I have always found that plans are useless, but planning is indispensable."* [Dwight D. Eisenhower](#)  
34th president of US 1953-1961 (1890 - 1969)

# Answer Qualitative Overview Questions

- Stimulate **summary** thinking
- Identify **overarching** issues
- Interpret ratings
- Develop report
- Identify Program **Strength**
- Identify Program **Weakness**

# Benchmarking

- Measurement of the quality of an organization's policies, products, programs, strategies, etc., (compared with) with standard measurements, or similar measurements of its peers.
- Objectives:
  - Determine what and where improvements are called for;
  - Analyze how other organizations achieve high performance levels;
  - Use this information to improve performance

# *Quality Assurance: Validating Realistic Self Assessment Through External Evaluation*

# Program Evaluation Defined

- “A form of appraisal using valid and reliable research methods, that examines the process of outcomes of an organization that exists to fulfill some social need.” (Grinnel and Unrau, 2008, pg. 553)

PRO•CESS

# Potential Evaluation Checklist (Modified from Scriven, 2003)

- Executive Summary
- Preface
- Methodology
- Background and Context
- Descriptions and Definitions
- Consumers
- Resources
- Values
- Process Evaluation
- Outcome Evaluation
- Comparative Cost-effectiveness
- Exportability
- Overall Significance
- Recommendations
- Responsibilities
- Reporting and Follow-up
- Meta Evaluation

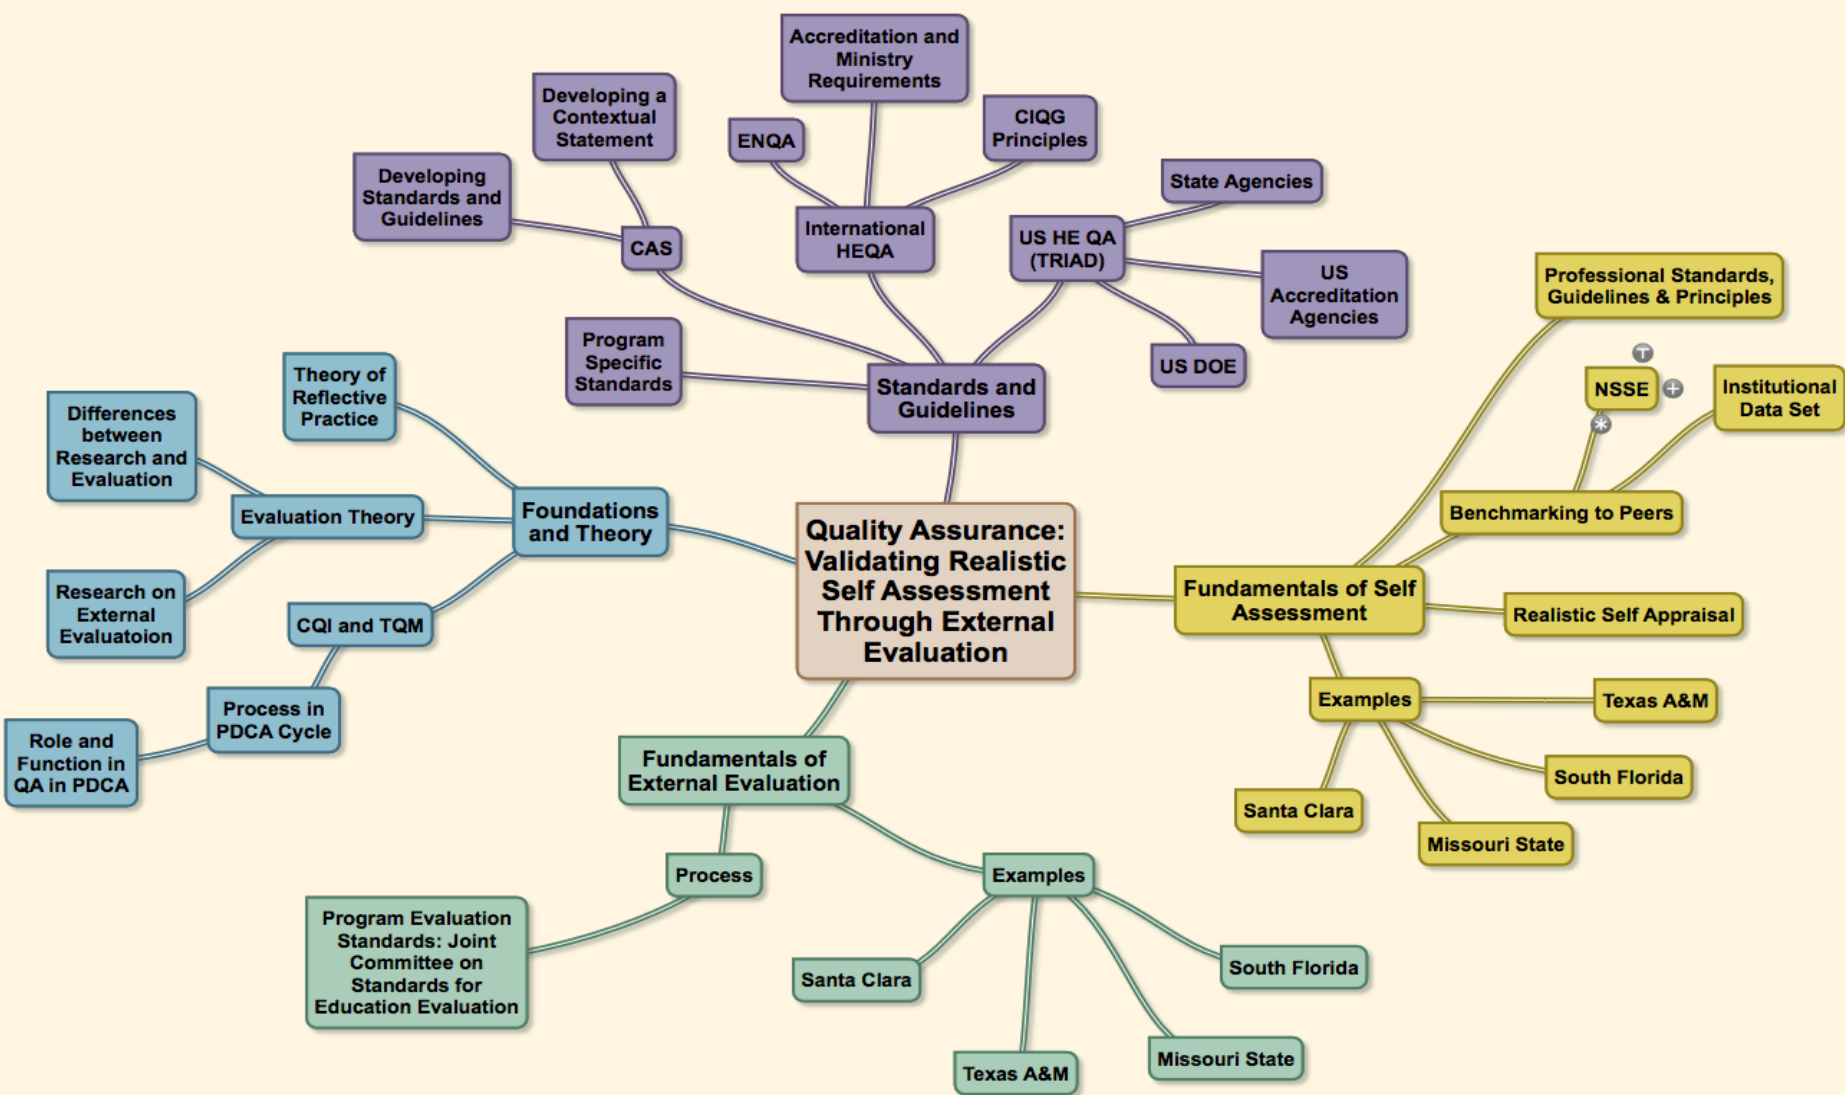

# External Evaluation Process

- Organizational **data were triangulated** using a variety of methods and sources, including:
  - Review of documentary **evidence including, department's CAS-self assessment;**
  - Externally developed **survey of employees** and;
  - Onsite **interviews and focus groups** of employees and participants.
- External program review of the program, including analysis the documents and evidence, a survey of employees, and focus groups **finalized the data collection** portion of the comprehensive review.

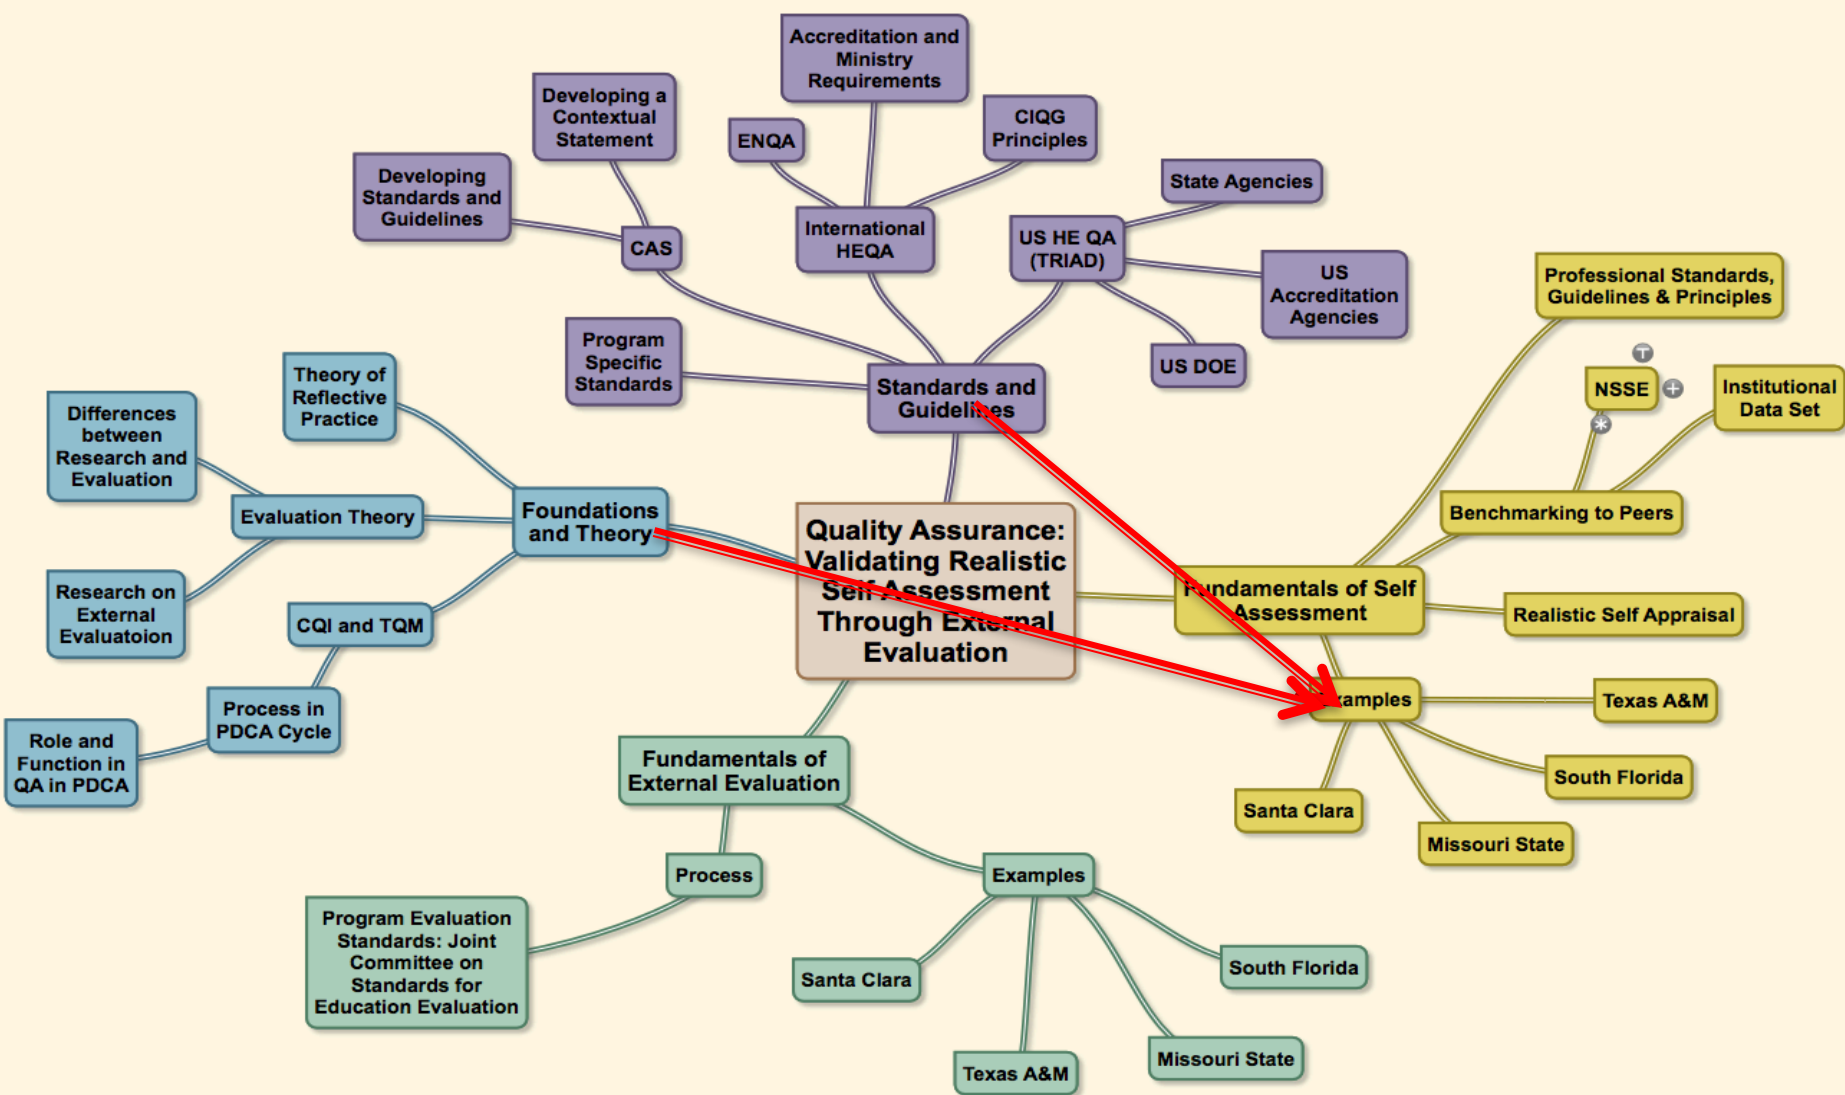

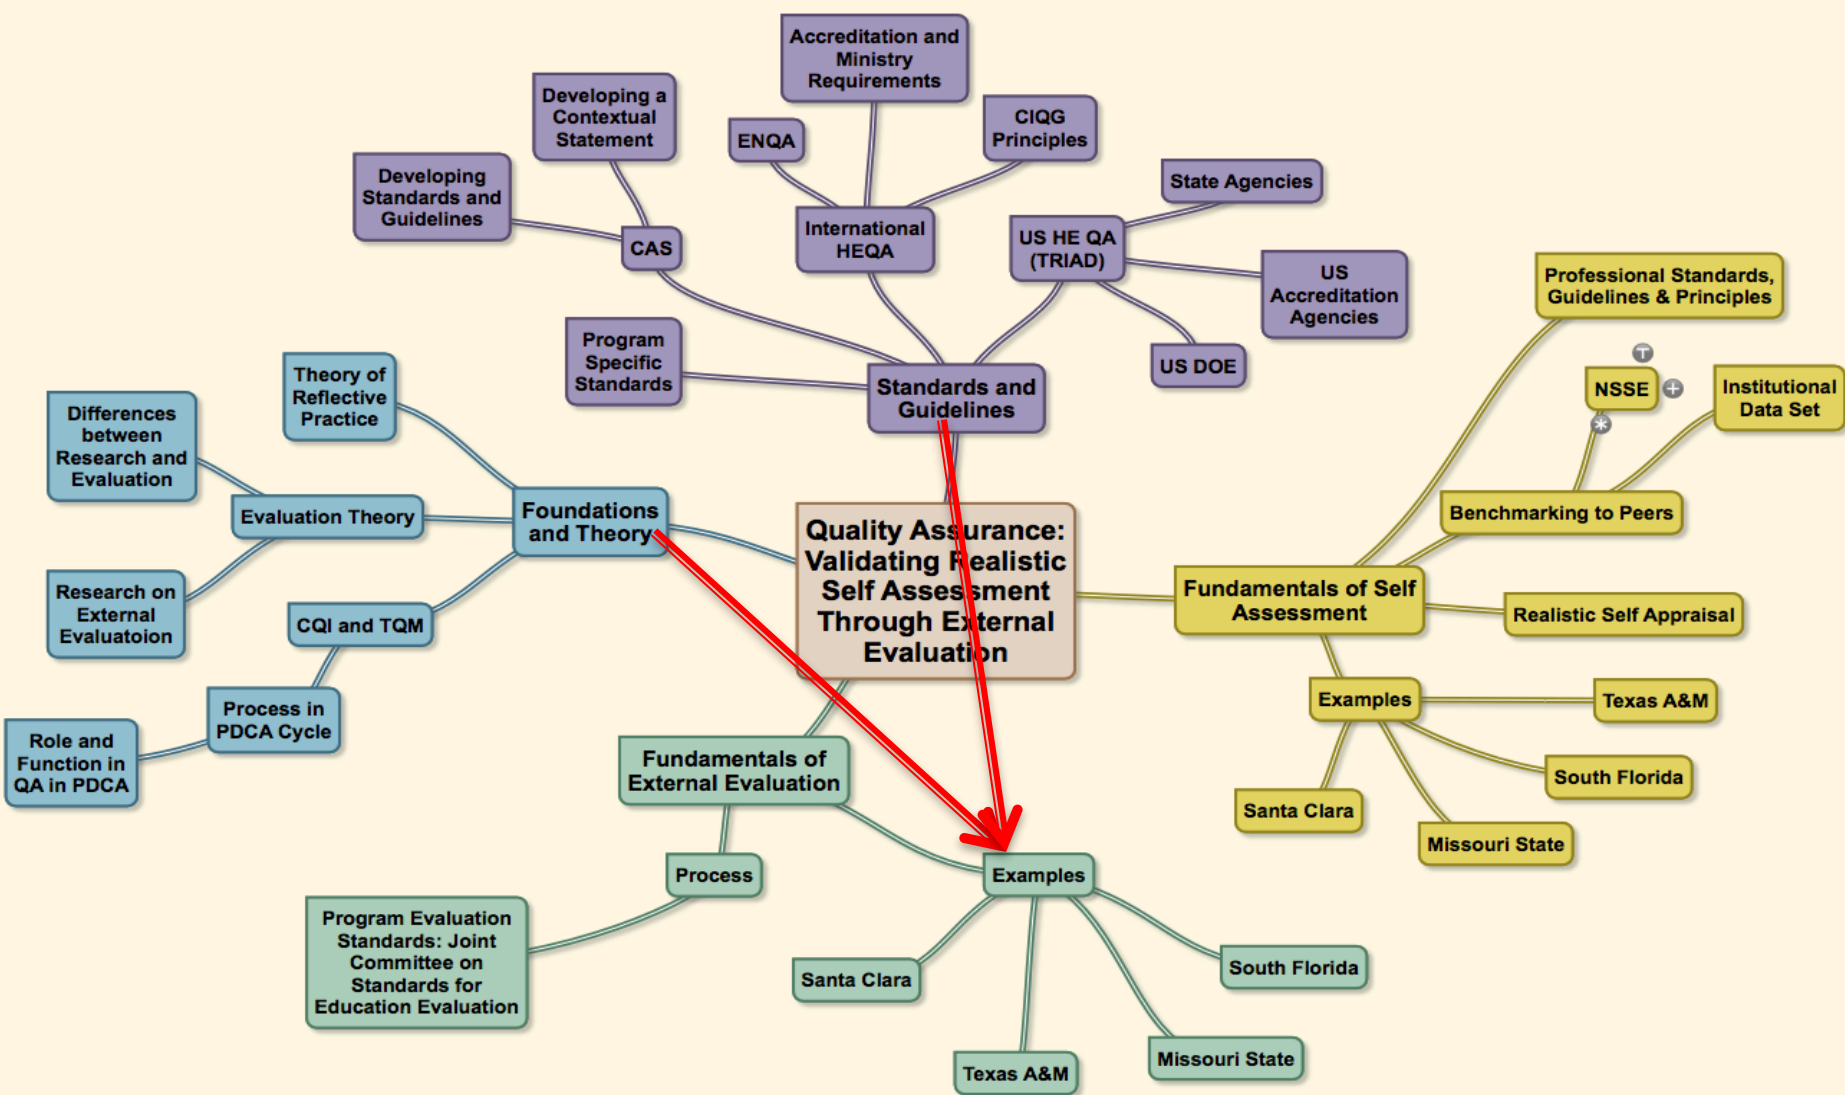

# DSF Evaluation Process

- Review of Evidence
  - Align with CAS Standards and identified benchmarks
- Conduct and analyze survey
- Site visit for interviews and focus groups
- Create report focused on:
  - General findings
  - Specific findings
  - Recommendations

# Validation of Self Assessment through External Evaluation

- Texas A&M University (Large Research)
- Missouri State University (Mid size regional)
- University of South Florida (Large Mid-tier)
- Santa Clara University (Small Private)

# Texas A&M: CAS Self Assessment

- Part 1. Mission:
  - The mission of Recreational Sports Programs (RSP) **must be to enhance the mind, body and spirit** of students and other eligible individuals by providing programs, services and facilities that are responsive to the physical social, recreational and lifelong educational needs of the campus community.
  - TAMU Response: Department of Recreational Sports Mission is **to provide quality programs, services and facilities to a diverse Texas A&M community.** We encourage the **lifelong pursuit of active healthy lifestyles and enhance student development** by providing leadership and employment opportunities.

# Texas A&M: External Evaluation

- **Mission:** The mission addresses the fundamental purpose of the organization and emphasizes that the program need for enhancing the mind, body, and spirit of students and other eligible individuals by providing programs, services, and facilities that are responsive to the physical, social, recreational, and lifelong educational needs of the campus community as they relate to health, fitness, and learning.
- **Finding:** The department's mission aligns well with relevant standards as well as with the Division and Institutional mission. Review of the department's mission is irregular and there is no evidence of any review or revision. The lack of review of the mission was viewed as limited and supported by statement "there is no documentation to support that a regular, systematic process is utilized to review the mission statement."

**Recommendation:** The department would benefit from regularly reviewing its mission and to consider a revision to include the term "student learning."

# Missouri State: CAS Self Assessment

## ■ Part 2. Program

- The RSP **must contribute to student learning and development** outcomes that are purposeful:
- MSU Response:
  - Personal Training is designed for participants who seek assistance in developing exercise routines. **Trainers can increase or decrease the difficulty of the workout to maximize participant effort and satisfaction.**
  - Swimming lessons **classes are designed for participants who are unable to swim or swim well.** Three levels of lessons are offered to accommodate most participants.
  - Intramurals offers **programming for various skill levels.**

# Missouri State: External Evaluation

- **Program:** ... program area focuses on the promotion of student learning and development outcomes that are purposeful,...
- **Finding:** ...programming efforts are up-to-date and inclusive of varying interests and abilities. Operational and program policy/procedure are well-written and available to participants in easy-to-find places on the department's website. Many student-employees articulated a learning value associated with their employment that exceeded what they had learned in the classroom and alignment of student employment with academic preparation was not harnessed.

**Recommendation:** The department should explore co-curricular collaborations that provide experiential learning opportunities as well as academic partnerships with units closely associated with student employment.

# University of South Florida: CAS Self Assessment

- Part 4. Human Resources: RSP must be **staffed adequately by individuals qualified to accomplish mission and goals.**
- USF Response:
  - **USF CR is staffed adequately to meet the mission and goals.** One **area identified as lacking support is office administrative assistance.** USF CR intentionally reclassified an office manager position to emphasize the importance of membership services (coordinator), the result is a hybrid position that still handles limited office management and administrative support.
  - USF CR has **advanced its efforts in ensuring appropriate marketing messaging,** campaigns, and program advertisement through a reclassification of a senior clerk (reception and administrative support) into a Marketing officer. This **move has improved marketing** but again challenges the department by removing administrative support. The marketing officer

Criterion Measures:

DNA	IE	0	1	2	3
Does Not Apply	Insufficient Evidence/ Unable to Rate	Does Not Meet	Partly Meets	Meets	Exceeds

2

## 4.1 Adequate Staffing and Support

- → **Recreational Sports Programs (RSP) is staffed adequately to accomplish mission and goals.**
- → **RSP has access to technical and support personnel adequate to accomplish the mission.**

# University of South Florida: External Evaluation

- **Human Resources:** The department appears to be **staffed by experienced and qualified professionals**. With the exception of “hiring practices are fair”, survey responses in all areas related to human resources **showed some growth**. There was **no evidence presented that hiring practices were “unfair.”** Training and performance evaluation could be enhanced to improve performance.
  - **Finding:** Professional **development and training for departmental personnel is irregular and does not include continuing education** in the development of student learning outcomes and assessment.

**Recommendation:** **Education and training in student learning outcomes and assessment would enhance department personnel’s ability** to create an enhanced learning environment for student participants and employees.

Review 2016

# Santa Clara University

- Part 8. Institutional and External Relations
  - Recreational Sports Programs (RSP) **must reach out to relevant individuals, groups, communities, and organizations internal and external to the institution** to establish, maintain, and promote understanding and effective relations with those that have a significant interest in or potential effect on the students or other constituents served by the programs and services
- SCU Response
  - The SCU CR **program maintains effective relations with the institutional offices** of Risk Management, Athletics, Student Life, Center for Student Leadership, Wellness Ctr., Healthy and Safety, Facilities, Development, Alumni, General Counsel, and Center for Sustainability. **Outside of campus – SCU CR works with other universities in the Bay Area, and NIRSA** friends and colleagues.

# Santa Clara University

## ■ *Internal and External Relations:*

- *Finding:* Relationship building is a key strength of Campus Recreation as evidenced by the large number of focus group participants representing a variety of partner organizations. Survey responses indicate the perception that campus and external relationships were valued (86.30%; 3.26). A great example of collaboration by Campus Recreation has been exhibited by their leadership role in achieving institutional goals related to sustainability (94%; 3.70). Focus group discussions with partners revealed professional staff are actively engaged throughout campus and perceived as leaders in collaboration.

Recommendation: Maintain current collaborative engagement practices with internal and external partners. Address partner needs during the facility expansion process.

# Self Assess for Quality

### A Summary of Student Engagement Results

Student engagement represents two critical features of collegiate quality. The first is the amount of time and effort students put into their studies and other educationally purposeful activities. The second is how institutional resources, courses, and other learning opportunities facilitate student participation in activities that matter to student learning. NSSE surveys first-year and senior students to assess their levels of engagement and related information about their experience at your institution.

#### Comparison Group

The comparison group  
featured in this report is

#### GLC Peers

See your *Selected Comparison Groups*  
report for details.

This *Snapshot* is a concise collection of key findings from your institution's NSSE 2016 administration. We hope this information stimulates discussions about the undergraduate experience. Additional details about these and other results appear in the reports referenced throughout.

#### Engagement Indicators

Sets of items are grouped into ten Engagement Indicators, organized under four broad themes. At right are summary results for your institution. For details, see your *Engagement Indicators* report.

Key:

▲ Your students' average was significantly higher ( $p < .05$ ) with an effect size at least .3 in magnitude.

▲ Your students' average was significantly higher ( $p < .05$ ) with an effect size less than .3 in magnitude.

-- No significant difference.

▼ Your students' average was significantly lower ( $p < .05$ ) with an effect size less than .3 in magnitude.

▼ Your students' average was significantly lower ( $p < .05$ ) with an effect size at least .3 in magnitude.

Theme	Engagement Indicator	Your students compared with GLC Peers	
		First-year	Senior
Academic Challenge	Higher-Order Learning	--	▲
	Reflective & Integrative Learning	--	--
	Learning Strategies	--	▲
	Quantitative Reasoning	▲	--
Learning with Peers	Collaborative Learning	▼	--
	Discussions with Diverse Others	--	--
Experiences with Faculty	Student-Faculty Interaction	▲	▲
	Effective Teaching Practices	--	▲
Campus Environment	Quality of Interactions	--	▲
	Supportive Environment	--	▲

## Item Comparisons

By examining individual NSSE questions, you can better understand what contributes to your institution's performance on the Engagement Indicators. This section displays the five questions<sup>a</sup> on which your first-year and senior students scored the highest and the five questions on which they scored the lowest, relative to students in your comparison group. Parenthetical notes indicate whether an item belongs to a specific Engagement Indicator or is a High-Impact Practice. While these questions represent the largest differences (in percentage points), they may not be the most important to your institutional mission or current program or policy goals. For additional results, see your *Frequencies and Statistical Comparisons* report.

### First-year

#### Highest Performing Relative to GLC Peers

About how many courses have included a community-based project (service-learning)?<sup>e</sup> (HIP)

Talked about career plans with a faculty member<sup>b</sup> (SF)

Discussions with... People with political views other than your own<sup>b</sup> (DD)

Instructors provided feedback on a draft or work in progress<sup>c</sup> (ET)

Used numerical information to examine a real-world problem or issue (...) <sup>b</sup> (QR)

#### Lowest Performing Relative to GLC Peers

Asked another student to help you understand course material<sup>b</sup> (CL)

Participated in a learning community or some other formal program where... (HIP)

Extent to which courses challenged you to do your best work<sup>d</sup>

Spent more than 10 hours per week on assigned reading<sup>f</sup>

Spent more than 15 hours per week preparing for class

### Senior

#### Highest Performing Relative to GLC Peers

Discussed your academic performance with a faculty member<sup>b</sup> (SF)

About how many courses have included a community-based project (service-learning)?<sup>e</sup> (HIP)

Reviewed your notes after class<sup>b</sup> (LS)

Institution emphasis on encouraging contact among students from different backgrounds...<sup>c</sup> (SE)

Instructors provided prompt and detailed feedback on tests or completed assignments<sup>c</sup> (ET)

#### Lowest Performing Relative to GLC Peers

Completed a culminating senior experience (...) (HIP)

Spent more than 15 hours per week preparing for class

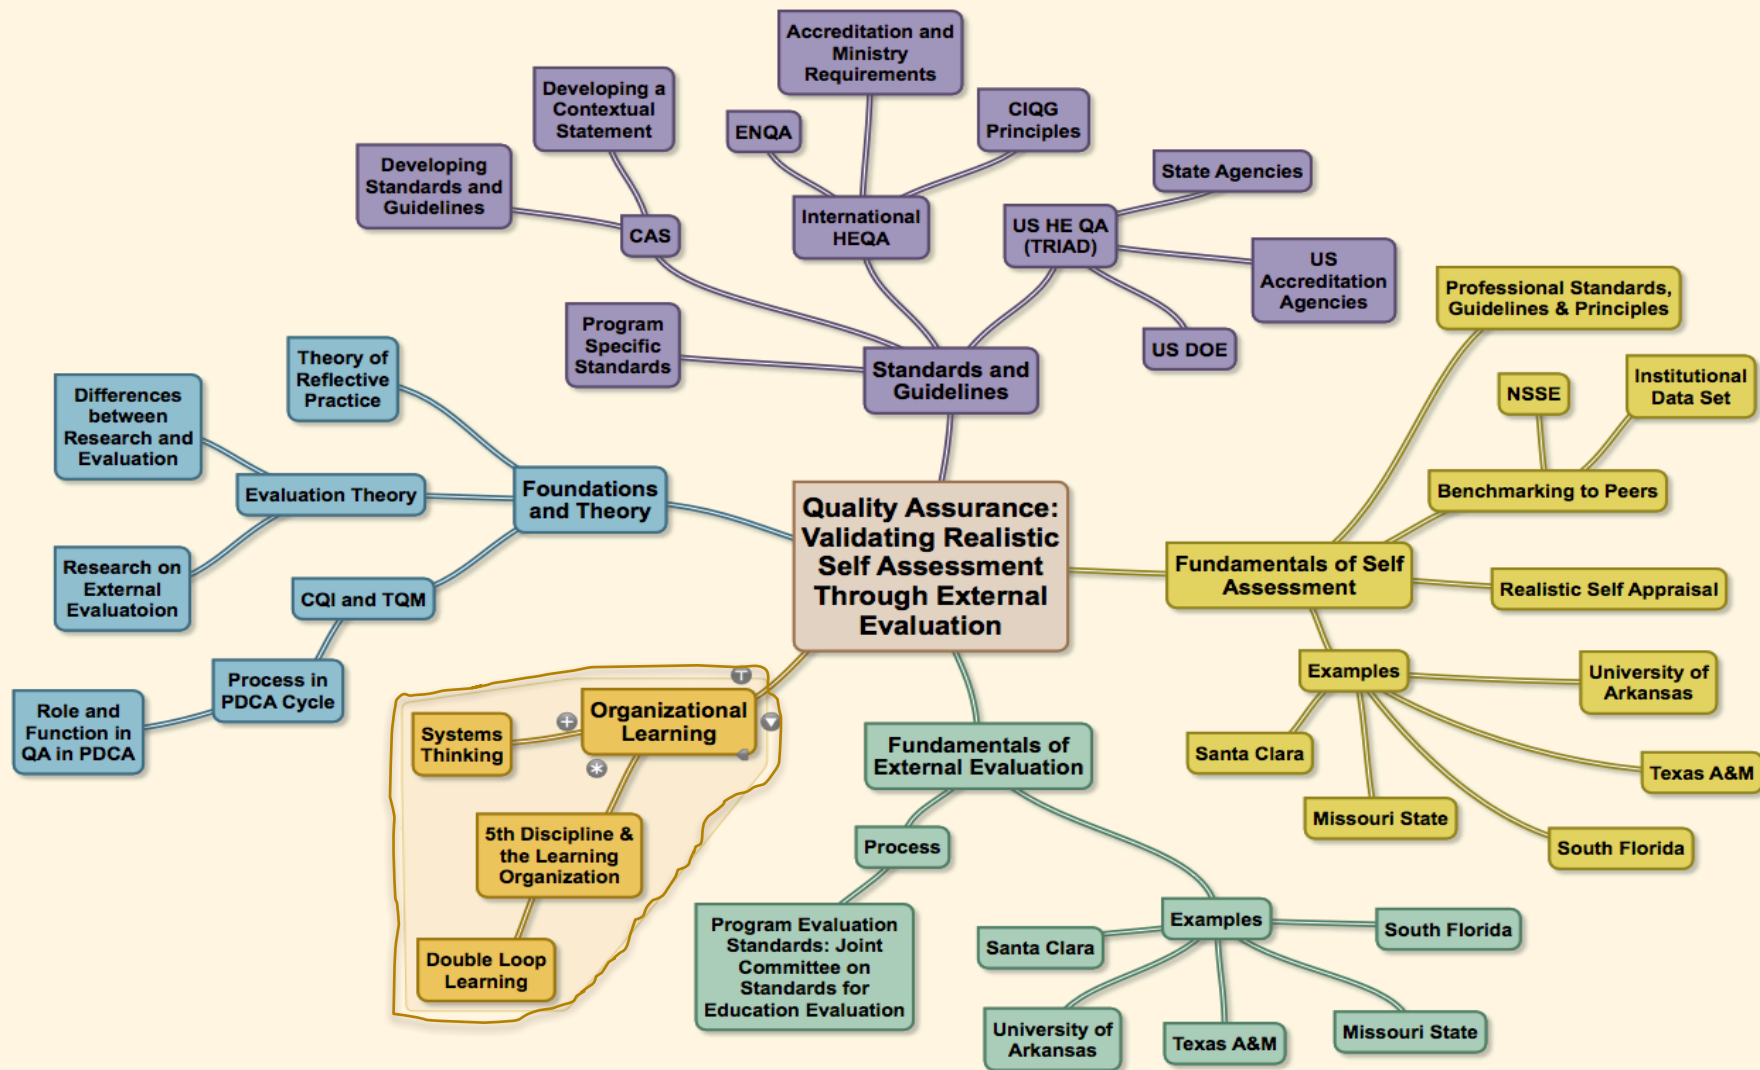

Worked with a faculty member on a research project (HIP)

Participated in an internship, co-op, field exp., student teach., clinical placemt. (HIP)

Participated in a study abroad program (HIP)

# Learning Organizations

- Personal Mastery
- Mental Models
- Building Shared Vision
- Team Learning
- **Systems Thinking**

*"Business and human endeavors are systems...we tend to focus on snapshots of isolated parts of the system. And wonder why our deepest problems never get solved." Peter M. Senge*

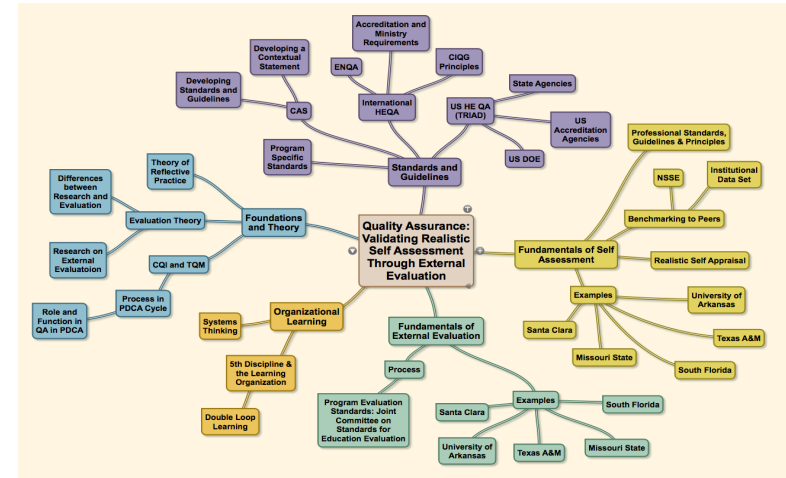

# Learning Organizations

# Learning Organizations

- Complex
  - State of being complex or intricate

Read more:

<http://www.referenceforbusiness.com/management/Bun-Comp/Complexity-Theory.html#ixzz4QJEk1JMI>

# Learning Organizations

- Systems Thinking: discipline for seeing:
  - Wholes rather than parts;
  - Patterns of change rather than static snapshots
  - Understanding subtle interconnectedness that gives living systems their unique character.

Peter Senge, Author of The Fifth Discipline: The Art and Practice of the Learning Organization

# System

- All systems have:
  - inputs, outputs and feedback mechanisms;
  - maintain an internal steady-state (called homeostasis) despite a changing external environment;
  - display properties different than the whole (called emergent properties) but not possessed by any of the individual elements, and have boundaries usually defined by the system observer.

Read more:  
<http://www.businessdictionary.com/definition/system.html>

# Systems Thinking

- What is system thinking and how does it play out in ensuring organizational quality?

## Event Oriented Thinking

Thinks in straight lines

In event oriented thinking everything can be explained by causal chains of events. From this perspective the **root causes** are the events starting the chains of cause and effect, such as A and B.

## Systems Thinking

Thinks in loop structure

In systems thinking a system's behavior emerges from the structure of its feedback loops. **Root causes** are not individual nodes. They are the forces emerging from particular feedback loops.

<http://www.thwink.org/>

*“Systems thinking is a management discipline that **concerns an understanding of a system by examining the linkages and interactions between the components that comprise the entirety of that defined system.**”*

<http://www.systemicleadershipinstitute.org/systemic-leadership/theories/basic-principles-of-systems-thinking-as-applied-to-management-and-leadership-2/>

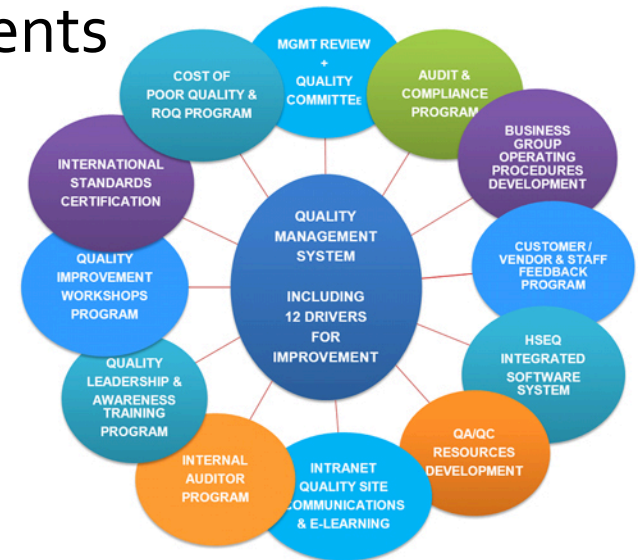

# Quality Management System

- “Formalized system that documents processes, procedures, and responsibilities for achieving quality policies and objectives...helps coordinate and direct an organization’s activities to meet customer and regulatory requirements and improve its effectiveness and efficiency on a continuous basis.”

American Society of Quality (ASQ)

Source: <http://asq.org/learn-about-quality/quality-management-system>

# *Quality Assurance: Validating Realistic Self Assessment Through External Evaluation*
